Tuskegeo Institute, Ala., Nov. — The fall meeting of the Board of Trustees of Tuskegee Institute was held in New York City October 28, 1932. The five vacancies on the Board caused by the death of Victor Tulane, Montgomery, Ala., Julius Rosenwald, Chicago, Paul Warburg, New York, A. J. Wilborn, Tuskegee, Ala., and by the retirement of W. W. Campbell, Tuskegee, are to be filled by the following:

Mr. Frederick H. Ecker, New York, president of the Metropolitan Life Insurance Company; Mr. Alexander B. Siegel of the Van Verst, Siegel and Smith firm, New York City; Dr. Walter G. Crump, New York, eminent surgeon, Mr. Clude A. Barnett, Chicago, Director of the Associated Negro Press, and Richard H. Harris, Montgomery, Ala., progressive business man.

Tuskegee Institute Chrysanthenum

Tuskegee Institute, Ala., Nov.— The Silver Anniversary Exhibition of the Tuskegee Institute Chrysanthenum Show was held in Logan Hall, Nov. 10 Prises were awarded as follows: Prizes for Chrysanthenums, 1 Mrs. Lightfoot, 2 Mrs. Neely, 3. Mrs. M. J. Coles-Dauiels, 4. Mrs. Lula Johnson, 5. Mrs. G. M. D. Griffin, 6 Mrs. Ala. Daniels; Prizos for Ferns, 1. Mrs. Rowena Smith, 2. Mrs. Ala. Daniels 3. Mrs. G. N. D. Griffin; Prizes for Vegetables, 1. Mrs. Mary Simpson. 2.Mrs. Ala Daniels. 3. Mrs. M. N. Stevens, 4. Mrs. Susan Johnson.

Mr. D. A. Williston, landscape architect, and **Mr. Harry Romm, of the Biology Division, acted as judges.**

The Chrysanthemum Show organized in response to Dr. Washington's love for flowers and his efforts to encourage the growing of flowers and beautifying of yards among his peoplo is sponsored by the Tuskegee Woman's Club, Mrs. Jennie D. Moton, president. It is held each year on that day in November most conveniently near the date of Dr. Washington's death.

Money for tho prizes is contributed by the Woman's Club, that for the Principal's Prize by Dr. R. R. Moton, and that for the Founder's Prizo by Mr. E. D. Washington, Mrs. Portia Washington, Pittman, son and daughter of Dr. Booker T. Washington.

John A. Andrews Memorial Hospital Approved

Tuskegee Institute, Ala, Nov.— Dr. E. H. Dibble, Medical Director, Tuskegee Institute has just been notified that the John A. Andrews Memorial Hospital has been awarded full approval by the American College of Surgeons for the year 1932.

This approval is given from year to year to the hospitals that fully comply with the requirements as laid down in the Minimum Stardard.

The John A. Andrew Memorial Hospital, the gift to Tuskegee Institute of Mrs. Charles E. Mason of Boston and named in memory of her grandfather, John A. Andrew, War governor of Massachusetts, has a capacity of 75 beds, adequately equipped X-ray laboratory, facilities for administrating electrotheraputic treatments, emergency room, dressing rooms, drug room. library and the latest approved operating and sterilizing rooms. Three years ago, through the continued interest of Mrs. Mason, the Annex was built containing 10 clinic rooms and a large lecture room.

The Institute Hospital server not only the school family, but through its public health nurses, baby clinics, perseutive clinics and the annual spring clinic conducted under the auspices of the John A. Andrew Clinical Society, it ministers to Macon County, Alabama, and many sections of the South where hospital facilities for Negroes aro most inadequate. The countries leading physicians and surgeons, black and white give their time and skill unsparingly for the week of the clinic.

At present the hospital has in training 38 student nurses, all of college rank, three interner and a staff composed of E. H. Dibble, Jr. Medical Director; Octavia T. Shippen, R. N., Superintendent of Nurses; J. Jerome Peters, B. S. M. D., part time pathologist; Geo. C. Branche, B. S., M. D., Instructor in Psychiatry; Toussant T. Tildon, B. S., M. D., Instructor in Veneral Diseases; Dorothy O. Jones, A. B., Ph., C., Pharmacist; Allouise S. Jaxon, R. N., Assistant Supt. of Nurses; Mary E. Williams, R. N. Public Health Nurse; Leola S. Wafford, Dietician; Mrs. L. Jackson, Secretary; Eunice Rivers, R. N., Night Supervisor; Allen P. Smith, A. B., M. D., Mental and Physical Hygiene; J. J. Kennedy, B. S. M. D., Bacteriology.

STATE'S NEGRO FARMERS REMAIN ON THEIR LAND

Washington, D. C.,—Colored farmers in Illinois have held their own during a decade marked by a general shrinkage in agricultural population, number of forms and acres under cultivation, according to the census of 1930..

From 1920 to 1930, the number of Negro farm operators in Illinois increased from 892 to 893, of whom more than half owned their own farms. Land in their farms increaser from 57,696 to 57,805 acres, valued at $2,926,618.

In common with all farms, the value of land and buildings owned by colored farmers in the state dropped from $6,082, 675 in 1920 to $3,704,618 in 1930. The value of buildings alone in the latter year was $778,000, and of implement and machinery $126,810.

AN IMPORTANT LETTER TO FARMERS

From Leon R. Harris

Brother Farmers:

Last spring Congress passed an act giving to the Red Cross 500,000 bales of cotton and several million bushels of wheat. The cotton was to be converted into cloth and given to the needy. The wheat was to be converted into flour and given to the hungry. It was to be given without any discrimination as to race, creed or color. Those in need, who were suffering for the necessities of life were to receive.

I know that many colored farmers in some sections of our country are in need, are suffering now, and will suffer more this winter unless they receive relief. A sack or two of flour and cloth enough for shirts, dresses or underwear would be keenly appreciated. Some of these farmers, share-croppers or farm-hands may be right in your own neighborhood. If they are they can get this help if they will go after it in the right way. Because I want them to go after it the right way is the reason why I am writing this plain letter.

This is the way I suggest:

FIRST— Write a letter to the Red Cross like this: (The American Red Cross, Washington, D. C. —Dear Sirs: We, the undersigned farmers and our wives, who live in the ... ...community, ...County, State of .... are in destitute circumstances and a supply of the flour and cloth appropriated by Congress for the relief of the destitute would help us very much. Please arrange that we be supplied through our nearest local chapter.)

SECONDLY:— After you have written this letter have every destitute parfmer and his wife sign it. I mean,— all of you who need this help, sign the one letter. It makes no difference if it is ten or a hundred. Have all who need, sign, whether members of the N. F. C. F. or not.

THIRD: Make three copies of the letter. Send the first copy to The American Red Cross, Washington, D. C. Send the second copy to me: (Leon R. Harris, Box 209 Moline, Ill.) Keep the third copy. Have all who sign, sign all three copies.

Do not sign the letter or ask for help unless you really need it and can prove that you need it. If you have no money and no work, for wages, and are out of clothes, and your family is suffering, you need this help and are entitled to it and should ask for it. Write the letter. Have all in your community who are in need to sign together. Do this at once.

If you have already requested aid from your local Red Cross chapter and have been refused, yet know that you need assistance, then sign the letter. Do not become discouraged. I have received reports from several sections, especially in Mississippi, South Carolina and Alabama, that large landlords in these sections are making statements to the Red Cross that their tentants and hands do not need any help. I know that some of them are making untrue statements. Some of them do not want you to receive this help because they want to keep you dependent upon them for food and clothing. They want to keep yo nin debt and hungry and naked so they can force you to continue working for them for a bare living and hardly that. No decent. landlord will treat his tenant in this way, but, I am sorry to say, there are a few left who will and do.

I am kindly asking you to follow these instructions. As Secretary of the N. F. C. F. and editor of this paper, I will use every bit of influence I may have to see that you get consideration.

Sincerely,
Leon R. Harris.

(Please address your letter to me as above.)

BELIEVED ROOSEVELT FAVORED SUBSIDY PLAN

Chicago —The National Federation of Colored Farmers, Inc., has received information believed to be reliable, that President-elect Franklin D. Roosevelt favors the "voluntary domestic allotment plan" as an aid to agriculture and will call a conference of farm leaders and economists early in his administration with a view toward its adoption.

This plan was introduced in both houses of Congress near the close of the past session. If adopted it would be of particular aid to producers of cotton, rice, tobacco, wheat and hogs, all of which are raised to such an extent in the nation that they cannot be consumed in the home market. The plan would place a tax on these products to be paid by the miller or processor who would pass it on to the consumer. The tax would eventually be paid to the farmer who would receive a share based on his average production or a given product over a five year period. Farmers would be compelled to sign contracts to limit production of commodities taxed.

The N. F. C. F. believes that this plan will be adopted and is advising colored farmers throughout the country to organize that they may be in position to take advantage of the aid promised and to protect their interests.

PITTSBURGHERS SUPPORT ROOSEVELT IN PROTEST OF G. O. P. LEADER

Pittsburgh, Pa., Nov.—(By the Associated Negro Press)—Although the state gave President Hoover a plurality in last Tuesday's election, this home of Andrew Mellon found the Negro Republicans wavering and casting their lot with the Roosevelt Democrats. A local newspaper, active with the Democrats, states that the Fifth Ward, dominated by Harry Feldman, much-hated Jewish Republican, could return only a 168 majority for Hoover, despite the aid of city and county payrolls, and that the colored districts in the Tenth, Twelfth, Thirteenth wards and in Penn townships, Rankin, Swissvale, Braddock and Wilmerding, showed a pronounced preference for the Democratic candidate. With 35,000 Negro votes in the county, it is pointed out that Roosevelt won the county by only 40,000 and thus demonstrated that the Negro vote is the balance of power.

SOCIALISTS WOULD PENALIZE SOUTH FOR BALLOT DISCRIMINATION

New York, Nov. (By the Associated Negro Press) — Norman Thomas, Socialist candidate for President in Tuesday's election, in a last-minute street-corner speech in Harlem asserted that the Socialist party stands for the absolute equality of all groups and that if his party was placed in power, it was pledged to take a step which the Republican party has avoided; "cut by constitutional methods the representation in states which deliberately on racial grounds deny the ballot to any group of citizens or discriminate against them."

"Contrary to false reports," he stated, "we Socialists believe absolutely in the equality of races—legal, economic, political, social.

"The question of intermarriage is not involved in the action of political parties. That is a quetsion which should be effected by personal choice influenced by practical survey of existing social conscience and feeling

"We are pledged to enact anti-lynching legislation. No Republican or Democrat can do as much. The Republican record of neglect almost matches the Democratic record of outrages in southern states."

Roland Hayes At Hampton Institute

Noted Singer Pleases Large Audience

By George A. Kuyper

Hampton Institute, Va., Nov. 14 Returning to Hampton Institute after an absence of nine years, Roland Hayes, the famous tenor appeared before a large and enthusiastic audience in Ogden Hall last Thursday evening. The audience was made up not only of the student body and faculty of Hampton Institute, but also a large number of music lovers who had come from many miles around Hampton to hear this delightful singer.

His program included several selections from Mozart, which Mr. Hayes rendered with his unusually fine sense of music poetic qualities. There were also selections by Brahms and Debussy. Of these the one which seemed most impressive was a selection by Brahms which Mr. Hayes has only recently added to his repertoire— "Die Kranze," in which both artist and accompaniest play an important role. The selection of modern English songs followed, of which "Requiem'" by Morhardt, with words by Countee Cullen, made the deepest impression upon the audience.

The group with which Mr. Hayes always concludes his concerts, the Negro Spirituals, was rendered with his usual sincerity and depth of religious reverence. In Mr. Hayes' sensitive interpretation and earnestness, given through the medium of one of the most beautiful voices on the concert platform today, these "Spirituals" are among the most moving experiences that the modern music lover is able to meet. To hear Mr. Hayes sing these songs was an experience which the audience at Hampton Institute will not soon for get. A spiritual new to Mr. Hayes' Hayes' program is "e Will Beark Bread Together on Our Knees." The soloist was liberal with his encores and was the recipient of tumultuous applauses.

The concert by Mr. Hayes was the opening of the Music Art Series, which will include a Christmas concert, with selections by the guest artist, Miss Louise Burge, Contralto, the Hampton Institute Choir, Hampton Institute Glee Club the Women's Glee Club, and faculty members, to be given December 18; Escudero and his Spanish dancers, on January 21; The Barrere Little Symphony, on February 27; Miss Charlotte Wallace-Murray, Contralto, of Dr. Fosdick's Church on Riverside Drive, and Mr. Clarance Cameron White, Violist and Composer, who has recently become director of the School of Music at Hampton Institute, on March 16; and the Annual Spring Concert, date to be announced later.

LABORER FINDS LARGE SUM IN OLD VEST, GIVES IT TO COP

New York, Nov. (By the Associaed Negro Press)—Love Powell, a handyman laborer, is also an honest man. When he found an old vest Saturday around the west 47th street police station, instead of taking it home to wear, he turned it over to Lieut. Oscar Johnson at the police station. Johnson searched vest and found $150 in currency. No one has claimed the vest, but the prudent lieutenant is holding tight to the currency.

TEXAS NEGROES HELP "MA" FERGUSON BEAT "WHITE SUPREMACY" CROWD

Houston, Tex., Nov. (By the Associated Negro Press)—John Nancy Garner's home state, Texas, registered a significant vote against the myrmidons of " white supremacy" and white Democratic primaries here last Tuesday, when Orville Bullington, white Republican candidate for governor, aided by Ross Sterling, Democratic governer, and one of the leaders of the forces which would deny the Negro the right to vote in Democratic primaries, was soundly trounced by Mrs. Miriam "Ma" Ferguson.

Mrs. Ferguson defeated Sterling in the Democratic primary by a narrow margin. The governor set up a howl and contested the certification of Mrs. Ferguson on the grounds that many Negroes had been allowed to vote for her.

The issues set up by Sterling were disallowed and Mrs. Ferguson was certified as the candidate. Thereupon Sterling deserted his party and he and those leaders who felt like he did about Negroes voting in Democratic primaries, threw the weight of their support to the Republican, Bullington.

However, the Negroes who had voted for Mrs. Ferguson in the primary proved their loyalty by augmenting their number for the election. Throughout the election campaign feverish activity was engaged in by the Negro leaders and the press in behalf of Mrs. Ferguson and the Republicans were lampooned wherever they stuck their heads up.

The election of Mrs. Ferguson is perhaps more significant than the last Supreme court decision respecting the Democratic primary in the state of Texas. That opinion held that there might possibly be a way to set up a political club or party and exclude the Negro, but the state Democrats had not selected the legal way. Thus the door was left open for experimenting with new devices by that section of the Democratic party which favors excluding the Negro. But Mrs. Ferguson yielded to the inclusion of Negroes in the Democratic primary and in the election will doubtless continue to oppose any future movement for their exclusion as long as she is in power.

NEGRO YOUTH WINS PLACE ON U. OF S. CALIFORNIA DEBATING TEAM

Los Angeles, Calif., Nov. (By the Associated Negro Press) — Los Angeles Negro citizenry appeared quite jubilant this week following publication in the Campus bulletin at the University of Southern California, that Crispus A. Wright, Negro freshman at that institution, placed second in a field of 18 aspirants to win a place on the Freshman Debating squad. The team of which young Wright is on, is made up of the first five of the 18 competitors. The title of the topic, upon the merits, of whic these youth argued to win their places was "Resolved That the United States Should Not Cancel The European War Debt." Wright, upheld the resolution.

Application for Membership

NATIONAL FEDERATION OF COLORED FARMERS (Inc.)

Vincennes Hotel, Chicago

As a farmer, I believe the time has arrived when the Colored Farmers should form a National Organization devoted to diversified production, grading, packing, shipping and marketing of farm products and to the purchase of needed farm supplies through co-operative methods, to the end that a more prosperous financial condition may result from their efforts as producers.
I hereby subscribe $5.00 for membership in the National Federation of Colored Farmers for a period of 12 months from date. Also $1.00 for an Annual Subscription to the Modern Farmer.

Name ..... Address .....

State ..... Date .....

882,650 NEGROES IN AGRICULTURAL PURSUITS

(Continued from Page 1)

The further fact was brought out in the report that there are Negro farmers either owners or tenants in every state in the Union. The smallest number of any one state, of race men aoperating, owning farms or tenants was in Nevada where only five are given in this statistical report.

At the recent session of the National Federation of Colored Farmers held in Memphis, the secretary of the Association and the editor of The Modern Farmer, Leon Harris, presented a paper dealing with this report, showing the advantages as well as the disadvantages of the present farm mode of operation. The co-operative farming as well as co-operative marketing was emphasized in this lengthly report and extensive survey presented to the Association.

Another interesting study in the facts and the figures was the tremendous decline of Negro farm owners and operators in the state of South Carolina, because in 1920 this state had 109,005, while in 1930 it had been reduced to the alarming figures of 77,331. A noticeable decline in the past ten years was shown in all of the states south of the Mason and Dixon Line, such as Virginia, North Carolina, Florida and all the way through.

It is thought by the officials of the National Federation of Colored Farmers that the recent innovation put on by the National Congress to help the farmer through the Home Loan Banks, the Reconstruction Finance Corporation and the Loan Bank, would serve as an inducement to start the trend and create the momentum of "Back to the Farm."

INDIAN PENNIES WORTH ONE CENT, SAYS COLLECTOR

If all those persons who are saving Indian head pennies go to the world's fair expecting to get a dollar apiece for them, there is going to be a great deal of disillusionment, according to William F. Fratcher, veteran Detroit stamp and coin collector, who is quoted in the Detroit News.

"As a matter of fact," said Mr. Fratcher, "the average Indian head penny is worth no more than face value. How the rumor got about is beyond me, although there are certain pennies worth considerably more than face value if they are uncirculated. 'Uncirculated,' in the language of the numismatist, means that the condition of the coin is exactly the same as it was the day it came from the mint. Stamp and book collectors say 'mint.' Numismatists who logically should say 'mint,' say 'uncirculated.'

"All lecturing seems in vain. People come in by the dozens and insist that Indian heads are worth a dollar. One woman came in one day and thumped a bag containing $00 down on the counter. She seemed a bit indignant when I offered $8 for them.

"However, I would gladly pay 50 cents for Idian heads of the 1877 issue but remember, they must be uncirculated. And that, by the way, is probably the root of the Indian head rumor tree that has grown to such large proportions."

Two things indicate a weak mind —to be silent when it is proper to speak and to speak when it proper to be silent.—Persian Proverb.

MRS. NETTIE GEORGE SPEEDY BECOMES TRUSTEE OF LANE COLLEGE

Chicago, Ill., Nov (By the Associated Negro Press)—Mrs. Nettie George Speedy, veteran newspaper woman and nationally known social and civic leader was signally honored Saturday when the Southeastern Missouri and Illinois Conference of the C. M. E. church, in session here at St. Paul church, elected her to membership of the board of trustees of Lane college, Jackson, Tenn.

The electio nof Mrs. Speedy, who as a member of the Chicago Defender staff, has become intimately known throughout this country and abroad, marks the first time in history that a woman has sat on the board of trustees at Lane, which is celebrating its 50th anniversary this week. Mrs. Speedy is a member of the trustee board of Jubilee Temple C. M. E. Temple.

Rev. William Turner ,presiding elder of the St. Louis district, made a brilliant speech in proposing the name of Mrs. Speedy. He recounted many of her achievements in the church and pointed proudly to her work as a newspaper woman, for the good of her people as additional reason why she should be elected to the board. There wer eseveral persons on the floor to second the nomination which was hailed with a roar of applause that lasted intensely for fully five minutes. Mrs. Speedy was then elected unopposed. Dr. O. B. Payne, prominent local physician, was also elected to the board.

The new trustee will leave the city Thursday night to appear on the anniversary program at the college which is one of the leading schools under the supervision of the C. M. E. church. Bishop J. C. Martin is the presiding officer of this diocese.

DETROIT NEGROES DESERT COLORED CANDIDATES TO SUPPORT DEMOCRATIC PARTY

Detroit, Mich., Nov.—(By the Associated Negro Press)—Although there was not a single Negro candidate for any position on the Democratic ticket last Tuesday, an analysis of the vote discloses that the majority of the Negro vote cast was straight Democratic and, therefore, against three prominent candidates who were running as Republicans.

The three candidates who lost because the members of their race forgot or neglected to split their ballots were Charles Mahoney, for Congress, and Dr. O. H. Sweet and Charles Roxborough for the state senate.

In the First District, which Mahoney sought to represent, a large segment of the Italian vote was cast for Mahoney because the Italians did not want a Pole, Mahoney's rival, to represent them. But despite this Italian vote, Mahoney received only 21,551 votes out of 71,311 votes cast, the indication being that most of the Negro vote in the district, cast traight, went to the Democratic Pole.

The same situation was observed in the Second Senatorial District where Dr. Sweet obtained only 14,131 of the 49,698 votes cast.

It was believed by many that Senator Roxborough would pull through because he was known to have more support from the white voters than either of the other two colored candidates, but the 12,000 votes cast for him still left him 2,904 votes behind the Polish Democrat who opposed him.

Mahoney's contest was waged throughout 170 election districts; Dr Sweet's in 114, and Roxborough campaigned in 77.

Thus the Negro voter joined the new white element in upsetting the tradition of Republican Michigan. Post-election contemplation by the leaders centers around the prospects for benefits from Democrats for colored citizens, now that the Democrats have been able to grab almost every office from governor to the humblest county position. Large numbers of Negroes are employed by the Republicans in the Wayne county buildings as clerks, stenographers, deptuy sheriffs, investigators, prosecuting attorneys and the like. If changes are made, the question is being asked, will Negroes be given those jobs by the Democrats?

Homes not merely four square walls. Through wiith pictures hung and gilded; Home is where affection calls,—

Filled with shrines the hear hath builded—Swain.

Joy descends gently upon us like the evening dew, and does not patter down like a hailstorm—Richter.

UNEMPLOYMENT ADDS TO SOCIAL PROBLEMS OF HARLEM

New York City, Nov. (By the Associated Negro Press)—In a plea for contributions to the emergency relief fund, J. Dalmns Steele, chairman of the committee declared that the social problem in Harlem and been intensified by unemployment, especially among women.

"Many girls" stated Mr. Steele, 'coming to New York City seeking work have been unable to find employment in capacities they are accustomed to fill. Housework and part time jobs are decreasing daily and the pay on these jobs have been cut to the lowest possible scale Thus we find many of these girls roaming the streets dependent upon whatever income they can pick up legitimately or otherwise.

"Not onl yare women of Harlem being driven to criminal activities, but the general increase in crime, not serious offenses, but concerned chiefly with larceny and purse-snatching, is attributed to inability to secure work. For this reason we are appealing to the citizens of Harlem to give of their funds to help those who seek aid from the relief committee."

Notice is hereby given to the public, which we hope they will take note of, that the National Baptist Publishing Board of the National Baptist Convention of America has no connection whatever with the Nashville Negro Doll Company nor the National Negro Doll Company or any other Company handling dolls, nor does the National Baptist Publishing Board sell dolls of any description. The said Board cannot be responsible for any shortages, failures, delays et cetera of any customer sending money to the above named Doll Company.

THE MODERN FARMER

Vol. V. Nashville, Tenn., December 15, 1932 No. 8.

Excerpts From Annual Address to Nat'l Federation of Colored Farmers

EDITOR LEON HARRIS GIVES FACTS AND FIGURES

Secretary of Federation Points the Way to all Delegates Present

"The biggest business carried on by the Negro racial group in our Nation is the business of farming. According to the 1930 census, 916,070 colored citizens are engaged in this one business. There are 916,070 separate farms in the United States owned or operated by colored farmers, which is nearly one-fifth of all the farms there are in this country. The total acreage of farms owned or operated by us is 41,087,982. The value of this acreage and farm buildings is more than one and one-half billion dollars."

"There are colored farmers in every state. We find the smallest number in the state of New Hampshire, only eight, and the largest number in the state of Mississippi, 182,888."

"No one person has sense enough to run a big business successfully. All big business in this country and all over the world is carried on by organizations of men and women who are engaged in that particular business. This big farming business carried on by almost a million colored Americans will succeed when it becomes an organized business."

"Organization has made American white farmers the most successful farmers living on God's green earth. They possess more wealth,—more comforts,—more

Interesting Addresses and Reports at Federation Meet

Exhibitors Are Awarded Valuable Prizes

DISPLAY CREATES MUCH INTEREST TO DELEGATES

Mrs. Gertrude Harris Describes Exhibit Made At Memphis

The best collection of farm and garden products, home products and household arts ever exhibited by colored farmers, their wives and daughters in the city of Memphis, was on display during the annual convention of the National Federation of Colored Farmers in that city. This display filled one large and commodious room in New Prospect Beale Ave., Baptist Church, was viewed by scores of visitors and brought forth enthusiastic comment. Colored farmers came near proving there and then that they are the world's best farmers, and colored farmers' wives and daughters may rest assured that their city sisters have nothing on them when it comes to making quilts, dresses, shirts, bread or canning and processing fruits and vegetables.

All exhibits were good, from cotton to peanuts and from quilts to baby dresses. The judges had to think and perspire freely in making the awards and were hardly satisfied after the work was done, because so many, who should have been rewarded were not rewarded because some one else had something in view just a little bit bet-

Resolutions of N. F. C. F. Conventions

FARM EDITORS ON PLANS

Moline, Illinois, Dispatch On Inequalities Shown

OPEN FACTORIES BY RESTORING BUYING POWER SAYS WRITER

(From Moline Dispatch)

Restoration of equitable prices for farm products is the only practical key to improved business conditions, Clifford V. Gregory, editor of Prairie Farmer and nationally recognized authority on agriculture told members of the Moline Association of Commerce and their guests at the organization's annual meeting in the Elks' building.

"Two British soldiers were in a shell hole on the front during the late war,' Mr. Gregory began. "One of them said to the other, 'we are in a 'ell of a 'ole,' and the other replied, "If you know of a better 'ole, go and find it.' We, the United States, are in a 'ell of a 'ole, but we believe that somewhere there is a better 'ole.

Conditions Form Puzzle.

"When we consider the ability of our farmers, our industrial leaders and our factory men we wonder why so many of us have to do without things to which we have become accustomed. Conditions puzzle us. Now that politics are out of the way, we must settle down and look for the road out.

"Some appear to believe that beer will bring us prosperity others that we can save our way out of the depression; still others that more borrowing is the solution. To the thinking man none of these represents a cure.

'We are determined that no one shall starve. In Illinois we are borrowing and spending 1½ millions each week to prevent people from starving. It is obvious that this can not continue.

"What is the farmer's answer? Farmers have better reputations as prophets than the business man, banker or politician. In 1928 when business men, bankers, and politicians were basking in a false prosperity farm leaders were saying that it can not last with agriculture denied its share of the national income.

Farmer Has Paid Bill.

"The farmer has paid the bill for this depression for three years. I say that because while industry has been able to meet conditions to some degree by curtailing payroll and production, the farmer has not. He has continued to-produce and dump his goods on the market at market prices, far below the cost or production.

"Ho has done this at the cost of

(Continued on Page 7 Col. 1)

ABRIDGED COPY OF INTEREST TO PUBLIC

Chicago Headquarters Hands Out Much Data To Members

Chicago, Ill.,—An abridged copy of resolutions adopted at the annual convention of the National Federation of Colored Farmers, Inc., by delegates meeting in executive session, has been released by Leon R. Harris, national secretary, and reads as follows:

Co-operative Purchasing

"The practice of purchasing needed home and farm supplies by following co-operative methods should be continued. Market prices of farm product are extremely low at the present time and, in order to realize any profit at all, the colored farmer must be able to purchase his needs as cheaply as possible. By purchasing co-operatively, Units are able to purchase a major portion of their needs at wholesale or near wholesale prices. Units should patronize local merchants if given courteous treatment and if their prices do not exceed prices quoted on goods offered for sale eslewhere plus the shipping charges. For instance, if you can purchase sugar at wholesale at five cents per pound and your local merchant will sell you the same quality of sugar at six cents, then you should patronize the local merchant. But on the other hand, if the local merchant wants ten cents per pound or more for this quality of sugar, his price is exorbitant and you are justified in refusing to trade with him. Seek the best bargains obtainable for by so doing we can cut down on our expenses and realize more profit from our efforts as producers.

We recommend that Units give more consideration to the purchase of seed, plants, stock-feed, fertilizer, and such articles of clothing as work-shirts, overalls and shoes, co operatively."

Co-operative Production

"Because farmers can get better prices by selling many kinds of produce in carlot quantities, we urge our Units to plant a large enough acreage in crops suitable to their soil and climate that will enable them to ship and sell in carlots. Crops such as hay, peanuts, sweet potatoes, watermelons and many fruit and vegetable crops can usually be profitably marketed in carlot quantities. Units should decide early in the year on acreage and variety of crop. By practicing co-operative production we believe colored farmers can prove conclusively that they are better

(Continued on Page 7 Co 3)

SUCCESSFUL CONVENTION IS GENERAL EXPRESSION

Dr. Crossland, Pres. Davis And Henry Allen Boyd Leading Speakers

Memphis, Tenn.,—The National Federation of Colored Farmers, Inc., closed an eventful three-day convention session Friday afternoon, October 28th, by awarding approximately a thousand dollars worth of prizes to delegates and representatives of local units. The meetings were held at New Prospect Beale Ave., Baptist Church, pastored by that progressive Race leader and pulpiteer, Rev. C. H. Perkins.

Dr. J. A. Crossland, Present

The Convention opened Wednesday morning at ten o'clock. After devotional exercises, registration reporting of delegates and other routine business, the morning session adjourned. An executive meeting of officers and delegates was held in the afternoon. The main feature of the night session was an address by Dr. J. R. A. Crossland, representative of the U. S. Government Crop Production Farm Loan Office, of St. Louis, Mo. Dr. Crossland explained to farmers the necessary steps to take to secure government relief. He also informed the delegates of the interest of the present administration in the welfare of Negro farmers and brought greetings from Pres. Hoover and Sec., of Agriculture, Arthur M. Hyde, Dr. Crossland delivered a stirring address which was roundly applauded. He was introduced by Lieut. George Lee, District Manager of the Atlanta Life Ins. Co., who also welcomed the delegates and visitors to Memphis.

President Davis Warmly Welcomed

President James P. Davis swung into action Thursday morning and delivered a plain, practical and sensible address. He reviewed the work of the organization during the past year and appealed for unity, harmony and continued co-operation. He explained in detail the efforts that have been made by national officers to aid members obtain government and Red Cross relief and to discover farms they could rent or purchase on favorable terms. His address was well received and he got a royal welcome from delegates and visitors. He especially urged members to continue the practice of purchasing home and farm supplies through co-operative methods and informed them that on such practice depended the only chance they had to make a reasonable profit from farming operations next year.

Three minute talks by delegates of units from six states consumed the time of the afternoon session. These talks were of the greatest interest. One after another representatives informed the convention how their units had functioned

(Continued on Page 8 Col. 1).

MANY THANKS

The Officers and Board of Directors of the National Federation of Colored Farmers, Inc., desire to express their sincere thanks and appreciation to all who assisted in any way toward making our recent annual convention in Memphis, Tennessee, the great success it was. We feel especially indebted to Hon. Arthur M. Hyde, Secretary of Agriculture, Dr. J. R. A. Crossland of the Crop Production Farm Loan Bureau, to the governors of states who commissioned special representatives, to the corporation, business firms and associations that sent letters and telegrams expressing greetings and good-will, to Dr. Henry Allen Boyd, of Nashville, to Lieut. George Lee and Geo. J. Strong, of Memphis, to the pastor, officers, choirs and members of the New Prospect Beale Avenue Baptist Church, to the many organizations and citizens of Memphis, who entertained our delegates and visitors, to the Memphis World, whose co-operation and unselfish service will never be forgotten, and to the many firms, corporations and individuals. who. contributed. valuable premiums and prizes. To all who assisted us in any way we say, "Many, Many Thanks."

DISPLAY CREATES MUCH INTEREST

(Continued from Page 1)

ter. These hard-working and hard-thinking judges deserve much credit for their painstaking service. Theirs was a thankless job, and altogether, they did it well.

It was not a farmer, but a farmerette, Miss Martha Chalmers, of Louise, Miss., representing Holiday Chapel Unit, who carried off the highest honors and the biggest prize. Miss Chalmers knows her cotton and also how to produce it. The samples of cotton were sent to government graders right there in the city of Memphis, and when they were judged and returned, Miss Chalmer's sample was marked the best. Her award was a valuable pair of pedigreed Hampshire pigs.

Another farmerette, Mrs. Martha Henry, of Renova (Miss) Unit, was awarded first prize for her display of garden products, fresh and ready to be cooked. Joe Chalmers, also of Holiday Unit, won the prize for the best ear corn exhibit. Albert Larry, of Democrat, Ark., ran him a close second. Alligator, Miss., carried off the prizes for best beans and best stalk sugar cane, the former going to Nathaniel Kemp and the latter to Jessie James. Arkansas, Tenn., Miss., North Carolina and Missouri competed for the sweet potato prize. Mississippi won, the first going to D. C. Givens, of Lexington and the second to G. W. Williams, of Vaughn. A farmer-minister, Rev. Engene Noel, of Hernando, Miss., won prizes for best pop corn and also peanuts, but on the peanuts he was hard pressed by a farmers' daughter, Miss Julia Chalmers. Richard Farlye, of Renova, Miss. won the first for field peas. He had an excellent exhibit.

It became apparent as the judges, when they began considering the many samples of needlework and household arts, that the men of the farm are beginning to try their hands at needlework just as the women are determined to prove that they can do better with the heavy work. An eighteen year old boy, Calliop Madison, of Glendora, Miss., exhibited the best set of pillowshams, and another gentleman, Richard Hall, of Tchula, Miss. won first prize on best hand-made men's jumper. But to cap the climax, up came Bro. Ed. Hollingshade, of Baldwin Units, Cruger, Miss., with the best loaf of homemade bread. He was awarded a sack of flour and we hope he carried it back to Sister Hollingshade, for we cannot help but believe that she was the one who taught our good brother to make bread so well.

Renova Unit, of Mississippi, had the best display of canned fruits and vegetables, individual first prize going to Mrs. F. M. Barnes. Mary J. Ford, of Essex, Mo. received second prize. Prize for best man's shirt went to Miss Martha Chalmers. Prize for best woman's dress was won by Mrs. F. M. Barnes. The two Marthas also won the best quilt prizes—Martha Chalmers, first, and Martha Henry, second . Prizes for best exhibits of fancy needlework were awarded to Fanny Chalmers, Mrs. E. A. Steavenson, Mary Farley, Mary Anderson. Prizes for best art work exhibited was won by Mrs. M. Sanders, of Earle, Ark, the faithful and efficient assistant secretary of the convention. Some fine and very pretty rag rugs were shown by Mrs. Mary Farley, of Glendora Unit. Richard Farley exhibited a hand-bag made from corn-shucks which not only drew a prize but was talked about as much as any other article in its class. The best bed-room set was the one placed by Mrs. Ella Miles, of Clarksdale, Miss. Mrs. Tabbie Young, of Tchula, Miss., was awarded first prize for baby's dress and also first for a beautiful pair of pillowslips. Prize for the best child's dress was awarded to Mrs. C. Owsley, of Renova.

Nathan Jones, of Swan Lake, Miss., was awarded a beautiful chest of silver for securing the largest number of subscriptions to MODERN FARMER, D. C. Johnson, of Essex, Mo., was awarded a suit of clothes for being instrumental in securing the largest number of new members. Mrs. Rachel Cooper Baskins, of Sunflower, Miss., represented the Unit that made the best statement of accomplishments during the past year. The award was a barrel of house paint. The Unit that made the largest purchasing during the year, by following co-operative methods, was awarded a fine assortment of farm and garden seeds.

Approximately a thousand dollars worth of prizes and premiums were awarded, chief among which were a pair of pedigreed Hampshire pigs,—cook stove,—clothes washer,—set of silverware,—set of aluminum ware,—two barrels of flour,—set of dishes,—five boxes of Wrigley Chewing gum,—box of assorted farm and garden seeds,—two bolts of cloth,—one suit of clothes,—one case of Mme. Walker's Vegetable soap,—one case of Lifebuoy soap,—one case of Rinso,—a box of Murray Hair products,—a box of Poro Hair product,—one case of Kitchen Kleanzer,—200 lbs., of granulated sugar,—100 pounds or rice,—three dozen Ball Bros. fruit jars,—one barrel of house paint, and many other useful articles.

A majority of the prizes were donated to the Federation by some of the most prominent corporations and business firms of the country and by prominent individuals who also sent greetings and well-wishes. They were gratefully appreciated by the organization and the lucky recipients.

NEW ZION UNIT DONATES

Among the Units making up the National Federation of Colored Farmers is the New Zion Unit, with Mr. E. W. Williams as president, Mr. L. R. Triplett, secretary. Their post office is Vaughn, Miss.

In a report coming to The Modern Farmer from their Thanksgiving services the president and secretary said they were glad to send their contribution in the form of a donation of $1.75 for The Modern Farmer. The newspaper at once acknowledged receipt of this and publishes this as an appreciation for the donation.

COW HONORED AT LUNCHEON

To honor a cow, people from town and country recently flocked to New Plymouth, N. Z. The bovine is Woodlands Felicie, a 4-year-old Jersey, owned by P. J. Petersen of Brixton. She established a record by producing 1220 pounds of butter fat in 365 days, which broke that previously held in America.

MISSISSIPPI UNITS MAKE DONATION

Zion Springs Sends Eight Dollars Seventy-five Cents, Shady Grove Three Dollars Eighty-five Cents.

For nearly five years The Modern Farmer has been issuing monthly in the interest of the Negro farmer throughout the nation. It has treaded the wine press practically alone except for the sympathetic co-operation extended by the officials of the National Federation of Colored Farmers to the various Units, with one or two State Convention. It has not received, until recently, any financial consideration except through subscriptions annually, but this year, upon the recommendation of the president of the National Federation, all Units were asked to hold Thanksgiving services and to send the results from these financial efforts to The Modern Farmer.

Among the first to come in was a contribution from the Zion Springs Unit No. 177 of which Mr. Willie Blanchard of Egypt, Miss., is the treasurer, who sent $8.75. Following close on the heels of this was Shady Grove Unit at Louisville, Ky., with Mr. A. J. Willis secretary, amounting to $3.85.

The Modern Farmer's editor, secretary, business manager and treasurer wish these Units to know how they appreciate the donations and the financial contributions.

"I have been to the auction of property left on railway trains.

"Did you get a bargain?"

"No. I left my umbrella there."
—Gazzettino Illustrato (Venice).

MARYLAND IN 1848

From "Unwritten History," by Bishop Levi J. Coppin

"My mother always referred to me as her 'Christmas gift.' I was born between sundown, December 24th and daybreak, December 25th.

"We had no clock in the house, and the people in those days did not go to bed at all on 'Christmas Eve Night, and it may have been after midnight when I came. But the record in the old family Bible says:

"'Jenkins Coppin, born December 24, 1848.'

"The Christmas gift' idea is all right, for Santa Claus is always credited with coming at night and not in the morning.

"I discovered early in life that I was always the one called upon when company came, to 'speak a piece,' and to tell what day of the month it was; and later on to get down the Farmers' Almanac, and tell about the 'full and changes of the moon.' Tell about the man standing there with 'Pharaoh's plagues' all around him, punching him; and to read, to the admiration of the listening hosts, conjectures of the weather.'

"With an eloquence that held all spellbound, I would cry out, 'first and second, third and fourth, cloudy; fifth and sixth, variable; seventh and eighth, showers.'

"There were two things upon which father and mother did not entirely agree in the earlier days, at least, of their married life. First, father could not see the wisdom of taking such risks as mother would take, to teach tho children to read and write. Of what service could it ever be to them?

"Another point on which father and mother differed somewhat was, father always regarded mother as being recklessly generous.

"The philosophy of father was different. He thought the best way to keep away want was to kill several fat hogs; bury a plenty of potatoes and cabbages; dry and preserve much fruit; salt away a barrel of herrings and pile up cord after cord of wood at the 'wood pile' and his theory was let others do the same.

"My mother did not at all object to such as course, for she was hand in hand with him in providing. But she believed in sharing with others, especially, the unfortunate and needy."

WOMEN SEW FOR THE NEEDY

Thousands of women in all parts of the country are busily engaged in making garments for those who are in need on account of depression and unemployment. Cloth is furnished to local chapters by the American Red Cross. This cloth was woven from 500,000 bales of cotton appropriated to this society by the last Congress.

The officers of the National Federation of Colored Farmers are requesting women's auxiliaries of the Federation and Sewing Clubs to offer their services to local Red Cross chapters and many have done so.

I SAW THREE SHIPS

I saw three ships come sailing by,
Sailing by, sailing by;
I saw three ships come sailing by,
On Christmas day in the morning.

GOD REST YOU

God rest you merry gentlemen,
Let nothing you dismay;
For Jesus Christ, our Saviour
Was born upon this day.

—English Carol.

Indianapolis News: Another disappointed citizen was the man who expected to find beer on tap the morning after election.

CORN STALK LUMBER IS HERE

Corn stalk lumber of all kinds is now being made in an Iowa factory and sells for over $200 a ton. This is the very best of lumber and is manufactured in sizes that the largest tree can't furnish. It is without knots or grain and can be made either very hard or very soft, according to the wants of the buyer. The corn stalks are cooked under pressure to manufacture it. Less cooking makes the softer wood.

Dr. O. R. Sweeney, of Ames College, Ames, Iowa, says that good lumber can be made by his process from all kinds of farm wastes, such as corn stalks, oats hulls, sugar cane, straw and weeds, and that the use of this lumber will conserve our forests. The price is too high yet but will be reduced as soon as manufacturing processes are simplified. The colored farmer of the future will be able to sell his cotton, corn and cane stalks, and also his weeds.

END OF THE DAY

By J. A. Weaver

I sat with my face toward the sunset
All radiant with amber and gold,
Retouched with the tints of the rainbow,
A pattern of exquisite mold;

I watched while the deep shadows lengthened
Then changed to a uniform gray,
While around me the mantle of twilight
Dropped gently, and shut out the day.

How like are our loves at the closing
As we turn from events that have passed,
And look toward the misty horizon
Our sun is approaching so fast;

May we see, not the lengthening shadows,
Nor the darkness that waits to enshroud,
But only the silver reflection
On the face of a bright fleecy cloud;

Not the gloom of uncertainty's brooding,
Nor the grave in the mouldering dust,
But only the rainbow colors
Of faith in the God whom we trust.

LOVE

Read By Little Miss Jennie Cox

A life without love in it is like a a heap of ashes upon a deserted hearth, with fire dead. For love is the greatest thing that God can give us, for himself is love. And it is the greatest thing we give to God. Be loving and you will never want for love. Be humble and you will never want for guidance. God knows that we need all the unselfish love that can come to us. For love is seldom unselfish. There is nothing holier in this life than love. Love to do for others as you would have them to do unto you. And if any one does us a wrong we should in return give him unguiding love and the more evil he does to us the more good we should do to him. We should not keep our love sealed up in a box until our friends are dead. We should fill their lives with the sweetness, speak cheering words while their ears can hear them, and while their hearts can be thrilled by them. So we should be glad of life because it gives us a chance to love to work and to play. We should love everything in this world except falsehood and meanness. We should covet nothing of our neighbors but kindness of heart and gentleness of manners. Think seldom of your enemies, but often of your friends.

THE MODERN FARMER

Official organ of the National Federation of Colored Farmers, Inc.

Leon R. Harris - - Editor

Published monthly by the Modern Farmer at Nashville, Tennessee, and Chicago, Ill.

Nashville, Tenn., Office, 447 4th Avenue, North.

Devoted to the interests of the Farmer, Truck Gardner, Livestock and Poultry Breeder, the Home and the People.

Entered as Second Class Matter, April 10, 1929, at the Post Office at Nashville, Tenn., under act of March 3, 1879.

All contributions for publication in the Modern Farmer should be addressed to The Modern Farmer, 447 4th Avenue, North, Nashville, Tenn.

No libelous matter will be published. Unsigned articles or letters, and those written on both sides of the paper will not be used.

Subscription price $1.00 per year, 75c for six months, payable in advance. Personal checks must be certified. Make all checks or money orders payable to The Modern Farmer.

Advertising rates and sworn circulation figures presented upon application.

"OUR SLOGAN"

STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT.

THE LAW

"It is hereby declared to be the policy of Congress to promote the effective merchandising of agricultural commodities by encouraging the organization of producers into effective associations under their own control.

The Board is authorized and directed—to promote education in the principles and practices of cooperative marketing—to encourage the organization, improvement in methods, and development of effective cooperative associations. (Public—No. 10—71st Congress. Sec. 1-5.)

THE GOSPEL

"This law is predicated upon the ability of the farmer to manage his own business, once he is organized to do so. Cooperation is the key to it and only in exceptional cases can the Federal Farm Board have any dealings with a farmer who is not a member of a producer-owned and producer-contrloled marketing unit." Hon. Sam'l R. McKelvie, Former Member, Federal Farm Board.

-:- Editorials -:-

A little child in a cabin small
Lugs by the arm a brown-skin doll.
And O, how happy is she!
A father and mother kneel by their chairs
And lift to Heaven two earnest prayers
That thus she may ever be:
The Christ-child's love illumines each face.....
And banished are thoughts of color or race
—'Twas Christmas morning!

In the game of life the coward never started because he lost his nerve: the weak-kneed fellow started but stopped on the way: but the man of faith and conrage, who would not be bluffed or bull-dozed, reached his goal!—James P. Davis.

NEGRO PERSECUTION AND NEGRO DOLLARS

Fully a quarter of a million Negro farm tenants, share croppers and farm hands in the United States are living in a state of debt-slave is bad enough as it is but when slavery. Partly, because of economic conditions, the number has increased during the past three years. The condition of the debt slave is bad enough as it, but when persecution is added the condition becomes almost unbearable.

Many of these debt slaves remain in bondage because they don't know how to get out. Their masters are willing to liberate them— are anxious to do so.—but the slaves just won't try to be free. They insist that the landlord must "carry them" or "furnish them" year after year. They don't try to get out of debt. They have depended on the landlords all their lives, as our schools and welfare organiza- will remain in this condition until our schools and welfare organizations discover them and teach them what they should know.

But some of these slaves are anxious to be free and would be free if their masters would give them half a chance. They are industrious and ambitious. They want to be free men and live as free men. It is this class who are persecuted. They are persecuted because they want what their mas- believe is too much.

Much is being said and written nowadays about the farm market. It is said to be worth seven billion dollars a year. The Negro farm market is at least one-eighth of it. For many years we have been hearing much about farm improvement also. Certain improvements have come to be regarded as desirable on all farms, such as telephones, running water, electricity, electric motors and the gas engine. Ambitious colored farmers want these improvements and many others, just as good white farmers desire them. But they will never get them as long as they are debt slaves.

Manufacturers and business men, who can readily see what it would mean to them if 250,000 debt slaves were turned into free and independent farmers, should issue another emancipation proclamation for the benefit of both the debt slaves and their mastors. Neither can prosper as long as there is hate, selfishness and persecution. It would be far better and cheaper to build up a Negro farm market in the United States than to seek markets in other parts of the world.

THE COLORED FARM WOMAN

As we expected, the colored farm woman is going ahead, seeing quicker and doing faster the things to be done to build up a real Negro farm civilization in this country. Woman has started ahour everything worth while any way. According to Mary Beard in her new book, "On Understanding Women," she was the first farmer, the first cook, the first artisan. She organized the first family, developed religion, did the first spinning, the first weaving and made the first dishes. She plowed the soil first, planted seeds first and inventer the first flour mill. She has kept the world together from the beginning.

We congratulate the women who won a majority of the premiums and prizes awarded at the recent convention of the N. F. C. F. We also congratulate them on their ability to organize associations and sewing clubs as auxiliaries to Units of that organization and we note they are preparing to take the lead in further promoting the work of 4-H Clubs. All honor and success to the colored farm woman!

RED CROSS RELIEF

The last Congress appropriated thousands of bushels of wheat and 500,000 bales of cotton for the relief of the Nation's needy and destitute. The Red Cross was named as the organization to distribute these goods and distribution is now in progress. No one should suffer from the cold this winter and no one should be hungry.

Thousands of sacks of flour are now in the Red Cross' possession and many yards of cotton goods and some made garments. The materials include, ginghams, white and dark outing flannel, prints, muslins, shirting and pique. Made garments include women's stockings, men's sox, children and babies' stockings, women's bloomers, women's, men and children's underwear, men's trousers, overalls and jumpers, boys' knickers and children's play suits.

We are publishing this information so that colored farmers and their families who are in need or, who know of those in need, may apply to their local Red Cross chapter for some of this food or clothing. You do not have to suffer. We told you in last month's paper what to do if you are refused relief unjustly. Several have followed our suggestions and their cases are now being investigated.

We wish every reader of the MODERN FARMER a "Merry Christmas." And if you want us to have a Merry Christmas, renew your subscription and get a few of your friends to subscribe. A subscription to the MODERN FARMER would be a fine Christmas present to send to a friend.

The National Federation of Colored Farmers, Inc., is not a secret organizations and needs no secret representatives. All of our organizers and representatives carry official credentials. If they cannot show them they are not our representatives.

SILENT NIGHT

Silent night, holy night.
All is calm, all is bright,
Round yon Virgin Mother and Child.
Holy infant, so tender and mild,
Sleep in heavenly peace.
—Joseph Mohr.

TALK TO COLORED FARMERS

"About Co-operative Production"

By Leon R. Harris, Secretary National Federation of Colored Farmers, Inc.

Make yourself a Christmas present this season, Brother Farmer, by promising that sometime during Christmas week you will meet with the other members of your Unit and take the first steps necessary to carry out some method of co-operative production next year. I believe times are going to be better for the farmer next year and we must try to get out of debt, —catch up, and begin to live and enjoy life again as we should. Co-operative production will help many of us out, if we get busy and start it, and I want to tell you now just how to make the start.

First of all, let me again explain it to you. Your national office can greatly assist you in marketing many of your products if you will produce enough of a certain product in your community to enable you to ship in carlots and thus cut down your shipping charges. As many of you know we have been able to find what I am calling," special markets" for the benefit of our members only. It's nobody's business how we find them or how we are going to find more of them when we need them, but nevertheless we can get them and you are the ones who benefit. You help us get them too, because your produce is first grade.— you are good farmers and the folks who buy produce are beginning to realize it. The big trouble is,— you just won't produce enough of it. (Forget about that thing called "over-production." I am not talking about cotton, corn wheat or tobacco.)

Last week I got a letter from a Brother whose Unit had around 75 bushels of peanuts to sell. I have not seen a sample of them yet and don't know what they are, but I imagine they are "farmers' run." When they grade them they may have some jumbos, some No. 1's and some 2's and some culls. But the big idea is—they will not have a car-load of any one grade— no, not a car-load of all of them put together. We may be able to sell them for this Unit and we may be able to get them a better price than they can get at home, but we know we could get them a price that would really please them if they had 750 or more bushels instead of the measly 75 bushels.

Well, why have they not got them? They all belong to the same Unit and live in the same community. They are neighbors and friends. But they have not practiced co-operative production as they should. Now what they should do, and what all of you should do some time during Christmas week, is,— get together and resolve that you will, as a Unit, produce enough of some crop next year that will enable you to sell in carlot quantities so you will stand a better chance of getting some sure-enough profit out of it What crop will it be? One well suited to your soil and climate Let me suggest these: a variety of hay, cowpeas sweet potatoes, watermelons, collards, (I could sell two carloads of collards in Chicago today if I had them) peanuts, etc. Early vegetables, fruits, hogs too, but these require more than a month's preparation. You see what I am driving at. Decide on a crop you know you can grow and on the variety of that crop that brings the most money when marketed, if you can grow that variety in your community. Suppose you don't know. Then, ask some one who does. Ask your county agent white or colored. Ask your state agricultural department. Ask the national office of the N. F. C. F. Any of these agencies will be glad to furnish the information.

Next, decide on the Unit acreage. Tom Jones can plant an acre,— Bill Smith five acres, etc. But remember you are talking about car-loads, not bushels, and agree on and sign up an acerage large enough from which you can reasonably expect to harvest two or three carloads. After you have gone this far, then purchase your seed and fertilizer. Buy it together —co-operatively. Buy good seed and good fertilizer. Buy the right kind of fertilizer, not any old kind.

Plant your "co-operative crop" at one time, I mean, all who are planting the crop should plant together. If one member is sick or in hard luck when planting time comes then the others should help him out. Remember, all of you will want to harvest at the same time so you can sell at the same time.

When selling time comes estimate the size of your crop in carlots and notify your national office that you are ready to market. You will receive information about harvesting, grading, packing, loading and shipping. Follow the instructions you get to the letter. You may

SPECIAL MEMBERSHIP APPLICATION BLANK

THE NATIONAL FEDERATION OF COLORED FARMERS, Inc.
Vincennes Hotel, Chicago, Illinois.

I hereby apply for membership in your organization for myself—

not win out but nine times out of ten you will win out, so go to it. It beats the old way anyhow. Take the chance. It's worth trying.

I want to hear from at least fifty Units during January and February that have agreed to try out co-operative production. The Lord will help you if you will try to help yourself. Merry Christmas to everyone and remember, make yourself this Christmas present I have suggested.

FEDERAL CONTROL ASKED

Holton Says Government Should Adjust Cotton Acreage

Jackson, Miss., Federal government control of cotton acreage and production is the only force left to curb overproduction and bring about a substantial price recovery, Commissioner of Agriculture Holton said today.

"All other efforts having failed in a cause in which all men recognize as just, equitable and an absolute economic necessity, there remains but one avenue of preventing further drastic overproduction —and that is our government," Commissioner Holton said.

"In an almost constant effort against overproduction, every conceivable weapon has been unsuccessfully used save only the intervention of the federal government," he said "Voluntary reduction, reduction through co-operative organization, reduced harvest by plowing under mature cotton or leaving it in the field to decay, state laws requiring cotton holidays or definitely limiting acreage have all failed."

Commissioner Holton said the one word that sums up the financial ills of the south since reconstruction days is the fatal words "overproduction."

MONGREL PUP SAVES LIFE OF IOWA FARMER ATTACKED BY PRIZE BULL

Harry Stoltenberg Taken to Hospital; Praises Little Dog.

Harry Stoltenberg, a farmer residing near Stockton, Ia., about twenty miles west of Davenport, was in Mercy hospital today severly injured but not in too much pain to voice his eternal gratitude to a mongrel pup.

The mongrel pup saved his master's life Sunday noon when the farmer was attacked by a prize Guernsey bull. Stoltenberg said the animal had broken through a fence into a neighbor's field, and that accompanied by the dog he went after the bull. When Stoltenberg offered an ear of corn to the bull the animal followed him for a short distance.

Without warning the bull charged, knocking the farmer to the ground. He was butting and pawing the injured man when the pup with a warning yip clamped his teeth on the bull's nose and hung on.

The enraged bull finally shook off the valiant pup, the interruption was long enough to allow Stoltenberg to crawl to safety under a heavy fence. Beyond a few bruises the dog was unhurt, but Stoltenberg had incurred factures of several ribs and internal injuries that necessitated his removal to the hospital.

He will sell that bull.

Swarms of bees descended on the candy booths at a fair at Stokesley, England, and drove away attendants and customers.

An egg three and a half inches long and six and a half inches in circumference, was laid by a Rhode Island hen at Brea, England.

WHAT UNEMPLOYMENT DOES TO YOUNG PEOPLE

By P. R. Hayward

Chicago, Ill., — I was careless and left my spare cash lying around the house. So my mother or my brother swiped it on me. Now, I am up against it. Oh, you know we are all thieves!"

He was a bright young chap in his late teens, talking in a street car to the director of a university settlement "along the river," in the poor section of a great city. He told this woman that his way of earning money during these days of depression and unemployment was to buy a box of twenty-five-cents packages of chewing gum and sell them through the business district. He always had to have a small sum set aside with which to purchase a new supply. It was this "capital," as he gaily called it, that had been stolen from him by some member of his family.

"We are all thieves!" He said it with such cheerful acceptance that it sent a cold shiver through the woman who heard it.

This is what the "depression," or unemployment does to the moral ideals of a family.

The same woman records a conversation which she had with another young fellow about the same age. He had finished public school some years before and had been for three or four years without work, although he had wanted it and looked for it. Finally in desperation he stated one day through the Loop, which is the down-town business district of Chicago, and deliberately tramped on all the east and west streets until he had examined every building; he followed this with a similar journey on the north and south streets. He covered the whole Loop looking for a sign "Boy Wanted" and found none. In reporting his experience to her he said. "One thing I noticed was the big bank buildings. Everyone of them had a police man standing in front. You know, Miss—— there is money in those places!" His eyes shone as he said it and she knew that in his desperate and fruitless struggle for honest employment he was probably lying the foundation for a dishonest and lawless life.

This is the sort of thing that our economic depression and the unemployment that grows out of it is doing to growing boys.

This same head worker in the settlement reports that the present depression and its unemployment struck her district about two years before it was evident in the country as a whole. This means that they have had about five years of hard times and lack of work while the most of us have been conscious of only three. It means further that a large number of boys and girls who five or six years ago were finishing their school work and were ready for their normal activity in some employment have during all that time had nothing to do. They have formed themselves into small groups and gangs of all sort, many of them with vicious and unlawful purposes. During the period from fifteen to twenty years of age when the habit of lawful living, industry, sobriety, thrift, and all the other things that go with normal and wholesome life would have been established, they have not only wasted their time but have dissipated the best things in their characters and laid the foundations for may udesirable habits and attitudes.

This is what our present way of organizing our economic order which very often brings about a depression which does to the lives of growing boys and girls.

This woman also reports that a considerable number of men, who are heads of families, when they have seen the small savings of many years gradually used up, and their children denied opportunities for education and many other things they had planned for them, have broken under the stress of it all and gone insane. In some cases this insanity takes a violent form. In other cases, it merely reveals itself in queer ideas and habits.

This is another of those things that an economic depression does to people.

These incidents, of course, do not tell the whole story. They merely open up some windows into the world in which hundreds of thousands of other persons live and enable us to see something of the difficulties they face and the great obstacles they have to overcome. Millions of people, young and old, as a result of the economic depression through which we have all passed during the last years, have suffered the break-up of their life plans and have endured disappointment, hunger, and many kinds of hardships. In an overwhelming number of cases they have endured things that no amount of careful planning on their part could have prevented.

These are some of the things that the economic and industrial society of which we are a part does to growing boys and girls men and women.

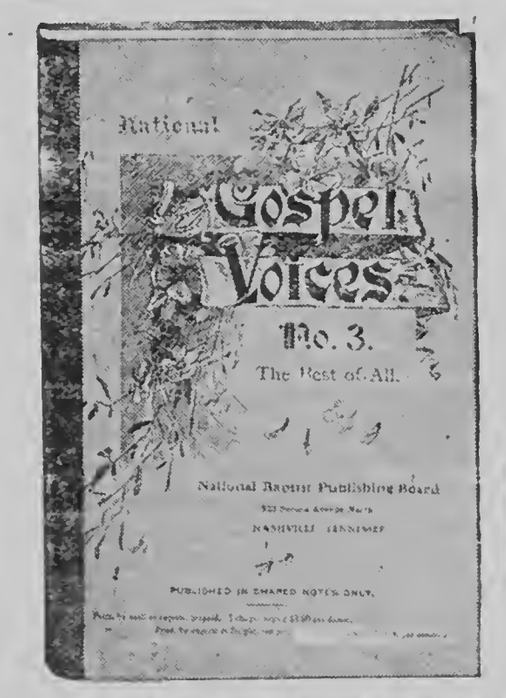
This is such an important problem for Christian young people that the leaders of young people's work of the Protestant denominations of North America which cooperate through the International Council of Religious Education, agreed last February to give especial attention to this problem in the young people's program of these various denominations during the coming year. In this connection, duringe the fall and winter, probably 2,000 young people's conferences will be held bringing together young people in rallies in their own communities, in county and district young people's conferences, in state conferences, and in many other ways.

These young people will face up to these problems, see what the facts are, understand something about causes of these wrong conditions, making a study of the proposed remedies, and ask themselve squarely the question as to what they as individuals and as groups of young people can do about it. Readers of this paper can secure full information about this campaign by writing to the director of young people's work of their own denomination, or to Roy A. Burkhart, secretary of the Joint Committee on Emphases, which is caring for the general promotion of this campaign. His address is 203 North Wabash Ave., Chicago.

WHY I STAY

By Philip Wendell Crannell

I stay,
Because he bids me stay;
Could there a better reason be?
How can God's soldiers run away?
And I should be ashamed to see
Even in that vast felicity,
Within my sainted fellows' eyes
A look of quizzical surprise,
As who should say: "What does
he here?
He is not due for many a year-"
I stay.
I stay.
Because I see,
Broken and battered tho I be,
Some chance of further work for
me,
Some word to speak, some woe to
share,
Some load to lighten, pang to
bear;
To show even on my faulty face
Some gleam of his indwelling
grace;
I stay.
I stay:
For it is hard to break away
From the loved comrades of life's
day ,
Who,— but more tongue should not
say;
I stay!
I stay
Until he bids me come away
To share in his unbroken ray,
Whose slanting glories gild my
gray.
While blessings flood my way with
cheer,
His heaven ahead, my Comrade
here,
With thankful heart, till his good
day,
I stay.



Gospel Voices
No. 3.

Gospel Voices Song book is especially adopted for use in the Sunday school room. This little song book is said to be the best of all Gospel Voices Song books.

THIS BOOK
SELLS FOR ONLY
40 CENTS

National Jubilee Melody Song Book

American's original music. Songs from the Plantation and Slave Days. More than one hundred thousand sold in the year of 1921. More now going. Send your order.

PRICE 50c.

INTERESTING NEWS AND NOTES

Three of our large national farm organizations have held their annual conventions this year. The National Federation of Colored Farmers met in Memphis the last week of October,—the National Farmers' Union met in Omaha, Neb.,— and the National Grange met in Winston-Salem, N. C. The American Farm Bureau Federation will meet in annual convention in Chicago in December.

The Home Loan Bank of the Reconstruction Finance Corporation has made loans amounting to over four million dollars to farmers during the past six weeks. Several colored farmers have gotten their loans through.

Eggs are now selling at over 35 cents a dozen for the larger sizes and butter at 30 cents a pound.

Officers of the N. F. C. F. have advised members who are tenants and share-croppers to be slow about signing contracts for next year. They are also advised in a recent bulletin to refuse to sign contracts with landlords who have not given them a fair deal this year. This organization is finding many farms tenants can rent that are owned by good landlords and supervised by humane managers.

A farm relief program proposed by the National Farmers' Union this year included remonetization of silver, government refinancing of responsible farmers, federal regulation of crop marketing and discarding of the manufacturers sales tax.

Gen. Glassford, former superintendent of police of Washington, D. C., has started a movement to assist the thousands of young men and boys who are wandering over the country looking for work. It is estimated that there are close to a million of these wanderers. Thousands of them are colored.

There are 55 colored farmers in the state of Wisconsin, and increase of eight since 1920. 41 are owners. They cultivate 5,295 acres 3,390 of which is owned and the value of land and buildings is 343,105. Minnesota has 27 colored farmers, a decrease of six since 1920. 19 are owners and eight tenants. Total acerage is 2 692 and value of land and buildings is $187 325.

An Iowa farmer has reported that he made more money last year from his 250 colonies of bees than from his quarter-section of land. Some Iowa bee keepers sell as much as 100 tons of honey each year. The cash income from honey and beewax in this state is about three million dollars annually. Bees do well in the south and colored farmers shoud go into this business.

The U. S. Supreme Court has set aside the sentences imposed on the seven Scottsboro, Ala., colored boys on the grounds that they did not have a fair trial.

Eugene State, a tenant farmer of Manchester, Iowa, pays rent to his landlord every week and says he would not have any other kind of a contract. The landlord gets half the income from the livestock and a third from the poultry. He operates a 200 acre farm and milks nineteen cows without ever employing hired help, stating that he uses a tractor and a milking machine. He has been settling with his landlord every Saturday for the past fifteen years and both are satisfied.

According to statistics, the tobacco bull of the nation costs every man, woman and child around $14 per year. We spend more for tobacco than we do for the upkeep of our army and navy.

John Eilola, Michigan's new Irish potato champion, obtained an average yield of 582 bushels per acre.

A South Carolina family has a bale of cotton 70 years old. It was picked and ginned by slave labor in 1862.

Oscar Depriest, colored congressman from the first Illinois district, was re-elected by his constituents. His majority over his Democratic opponent was approximately 6,000 votes.

The Rumford Baking Powder Co., is employing two well educated young colored men as salesmen to acquaint the Negro population of our large cities with their product. They also employ two colored women as demonstrators.

The average price paid South Carolina growers for tobacco this season has average $1.18 a hundred higher than the price paid last season. The price is still low.

Cotton cloth, made from government cotton, has been shipped to many local Red Cross chapters in Georgia and Florida.

A new all-Negro play, "O'l Man Satan," is the Green Pastures viewed from the lower regions. Donald Heywood, a Negro poet, is its author. It is creating some interest.

POOR RICE FARMER NOW CHAMPION HOG RAISER

A poor rice farmer, who was unable to read or write until four years ago when he attended night school, is now the champion hog breeder of the state of Louisiana, an honor he won the first time he exhibited at the state fair.

The name of this farmer is J. R. Meaux, of Acadia parish. He gives all credit for his success to his county agent and the extension division of the State university. His herd consists of fifty high quality hogs, headed by King, an eleven hundred pound Poland China boar, which was named grand champion this year.

Meaux follows the advice of his county agent and the program of the extension division. He runs a dairy on the side and feeds his hogs plenty of skim milk. He also feeds rice polish, brewers' rice and other products raised on his farm. He is now able to read books and papers on agriculture and he keeps his books in good shape.

RECEIVES R. F. C. LOAN

James Shelly, a colored farmer residing near Mansfield, La., is reported as being the first colored farmer in the country to receive a loan of funds furnished by the Reconstruction Finance Corporation. The Loan was for $600 and will run ten years.

Shelly is a member and loyal supporter of the National Federation of Colored Farmers.

MISSISSIPPI AND SOUTH CAROLINA

Population of Two Southern States Where Race Is Leading

Much good is expected to come from the recent Democratic landslide as a result of the last November election. This is the concensus of opinion from throughout the southland. Both the lower and the upper branch of Congress will be asked by men of both races below the Mason and Dixon Line, to lift the ban, to move disfranchisement, to make inoperative the grandfather clause and other barriers that have prevented hundreds of thousands of Americans from electing to support any one of the old Parties. This became more evident several weeks ago when over in the Lone Star State, out in Texas an unusually large delegation was received by Governor-Elect Mrs. Ferguson and her husband, who also is a former governor. This delegation is said to have only asked that the franchise be not withheld from the more than one million Negroes residing in the state.

This has caused not a survey, as it might be termed, but rather a recapitulation of certain figures taken from the census showing the numerical strength of the population in some states down in Dixie. It has brought out the fact that there are 81,222 more Negroes living in the state of Mississippi than there are whites in the same state. The figures show that there is a total of 1,789,146 people of both races in the state of Mississippi, and that these are divided as follows: Colored population 935,184, while the white population is but 853,962. The same startling revelation can be applied to South Carolina. Its total population, according to the census is 1,683,257; this is divided as follows: Colored population 864.719, with a population of 818,538 of whites, showing that the majority in favor of the colored population is 46,181.

It is pointed out further that here in Tennessee, a Senator could be elected in the state, if there were three in the race running, by the majority shown in Negro population in Mississippi or in South Carolina; but there are those who are of the opinion that if a political emancipation is effected by the large Democratic majority, that Dixieland would be more secure with the Democratic Party.

Some years ago Georgia's Negro population, Virginia's Negro population and Florida's Negro population were beyond that of the whites, but that since the exodus began just before and during the world war, these states have lost a large colored population.

THE THREE KINGS

Three Kings came riding from far away:
Melchior and Gaspar and Balthasar
Three Wise Men out of the East were they,
And they travelled by night and slept by day,
For their guide was a beautiful, wonderful star.

—Henry W. Longfellow.

BIG BUSINESS TO AID AGRICULTURE

Gen. Robert E. Wood, president of Sears, Roebuck & Co., is chairman of a special committee appointed by H. I. Harriman, of Boston, president of the U. S. Chamber of Commerce, to study means by which the business interests of the country may aid agriculture.

Gen. Wood says that the business men realize that the farm depression has been unusually severe and realize that higher prices for agriculture will be of immense aid to business. It is believed that the committee will recommend a plan of farm relief similar to the proposed "allotment plan" to Congress which convenes Dec. 5.

NEW CHICKEN MAKES ITS APPEARANCE

Chicago— A new chicken was exhibited at the twenty-fourth annual poultry exposition held here recently.

This new breed is a cross between the Wyandotte and bantam. It was originated in England. It looks like a general mixture of Wayndottes, weighs from three to five and a half pounds, and lays an egg that averages fourteen ounces to the dozen. The average size egg weighs from twenty to twenty-two ounces.

This chicken is said to eat only one-third as much as the ordinary size chicken. It is believed that it will make a good "city chicken" as it is large enough to lay eggs and be eaten, yet small enough to find living space in the ordinary city back yard.

THE
NATIONAL BAPTIST PUBLISHING BOARD
Recommends some of
THE POPULAR SONG BOOKS
Listed below for use in Churches, Sunday Schools and B. Y. P. U. Meetings:

National Baptist Hymnal—Price, $1.00 per copy, $11.50 per doz.
National Baptist Old Style Hymn Book (words only)—Price, 70c per copy, $8.40 per doz.
Lasting Hymns—Price, 40c per copy, $4.80 per doz.
National Gospel Voice Hymnals—50c per copy, $6.00 per doz.
New Songs of the Gospel—Price 50 per copy, $6.00 per doz.
Victory Song Books, 40c per copy, $4.80 per dozen.
National Anthems—Price 50c per copy, $6.00 per dozen.
Steal Away To Jesus Anthem—Price 25c per copy, $3.00 per dozen.
Metoka and Galeda Anthems—Price 10c per copy, $1.00 per dozen.
National Jubilee Melody—Price, 50c per copy, $5.50 per doz.

If you are interested in congregational singing as well as choir music, send in for some of these books.

Send all orders to

NASHVILLE, TENNESSEE.

FARM EDITORS

(Continued from Page 1)

his capital. Then it's in reality the farmer's depression and he ought to have something to say about the solution. If the farmer had curtailed his production the depression would have been over long ago. A revolution would have ended it.

"Industry has established some resistance to price declines, until we have reached a point where the farmer's dollar is worth just 50 cents. By that I mean that he has to exchange twice as much of his products to buy a manufactured article at present as he did before the war. Before we can hope for prosperity the farmer must be placed on a more equitable basis of exchange.

"Industry lived in a fool's paradise for fifteen years while farmers were going steadily downgrade, thus the purchasing power of 25 percent of the population was being destroyed.

"First the war produced an artificial demand; then came the great export business accomplished by loans to foreign countries; then installment selling added a few more years to this false prosperity. We have stopped making foreign loans. Peruvian bonds which were forced on country banks by the great financiers have been defaulted and are no longer much in demand.

McNary-Haugen Bill

"Here I want to say that if President Coolidge had signed the McNary-Haugen bill in 1926 we would not have had the speculative boom of 1928 nor would we have had the depths of the depression.

"Money was going to the cities where it was not needed. There it was diverted to insane speculation. The farmer was not getting his share of the profits. The present vicious circle has resulted. Many men are unemployed and can not buy. This stops the factories and adds more to the ranks of the unemployed and thus there is still less demand for goods and more factories close. The problem is how to break this circle.

"There are two means advocated. The first is to put the 10,000,000 unemployed to work on a program of public building. But where will we get the money? If that part of the problem is solved, then months and months of planning will be necessary before such a program can get started. This means, then, can scarcely be called a practical solution of the emergency.

The Farmer's Plan.

"The other plan is the farmer's plan. The farmer is now paying, as a result of our tariffs, a protected price for the things he buys. The price he receives for his products is the world price, because we produce a surplus in the major crops.

"Who pays the tariff on manufactured goods? It is the consumer, of course. He pays in the higher price asked for the article he buys.

"Now what the farmer wants is the benefit of that tariff on his products, and there's the way it is proposed to give it to him. We will take wheat as an example. About 25 percent of the national wheat crop is exported. It is on this portion that the price is based for the entire crop.

"The tariff on wheat is 42 cents a bushel. Supposing an individual farmer takes 1000 bushels of wheat to market. Under the plan he would be paid the market price plus the tariff of 42 cents for 75 percent of his wheat, the amount consumed at home. For the remaining 25 per cent he would get the market price.

"Now who is going to pay this extra 42 cents? Farm leaders believe that it should be paid by the processor, that is the man who makes flour or some other product out of the wheat. He in turn passes it on to those who buy the flour. In the case of bread it would increase the cost of the consumer only ½ cent a loaf.

Cost to Consumer Small.

"Now there is no one who would not pay ½ cent a loaf more for his bread in exchange for a great betterment in business conditions. I have made a statement in the past which has never been challenged. That is if the price of agricultural products were by some miracle doubled overnight, we would be on the way to prosperity the next day.

"The farmer does not propose to use this plan on all of his products; only the major crops, a portion of which are exported, would be affected."

In concluding his address Mr. Gregory touched on the debt problem, stating that the people of the United States owe some 200 billion dollars and pointing out the enormous difficulty in paying these debts with dollars 30 percent more valuable than they were when the obligations were contracted.

He suggested a mild form of currency inflation as the solution.

The New Days

"The new days will not be days of excessive profit such as those of 1928. We are not going to permit a few people by the exercise of shrewdness to amass far more than their share of our national wealth.

"That's not socialism nor communism. It's not even radicalism. It is the new day for the United States."

ABRIDGED COPY

(Continued from Page 1)

farmers than the average and that special markets may be rapidly developed for their benefit."

Co-operative Marketing

"Many of our Units are not receiving, maximum benefits available by marketing products co-operatively because they fail to follow to the letter instructions issued by our home office relative to the proper methods to follow in harvesting, grading, loading and shipping. Products should be graded before they are offered for sale and when a satisfactory price is obtained they should be loaded and shipped immediately.

Members of our Units should take advantage of the marketing facilities and privileges offered by the large cotton, grain, tobacco and other national and regional co-operatives operating in their territory."

Government Relief

"We go on record as favoring a plan similar to the proposed "domestic allotment plan" be considered by the coming Congress as a means of giving additional relief to farmers and offer the present and incoming national administrations our loyal support if such a plan is proposed.

The administration of federal farm relief for the benefit of colored farmers in particular is often retarded due to a lack of understanding and familiarity with conditions affecting our farmers by those appointed to subordinate positions in the administrative offices and bureaus. To remedy this situation we recommend that appointees of the Negro racial group be selected to supervise relief activities among colored farmers. The work carried on by Dr. J. R. A. Crossland, Representative of the Crop Production Farm Loan Office and his assistants, has been of untold benefit to colored farmers. We request that he be retained in office and provided assistance and facilities to extend his services."

Federal Farm Board

"The federal farm board, established by act of Congress, is especially authorized and directed to "promote education in the principles and practices of co-operative marketing." We believe that no fair-minded taxpayer would object if the farm board would employ some farm leaders of the colored racial group to assist in organization work and in giving educational assistance to colored farmers in harvesting, packing and grading of farm products."

Red Cross.

"The American Red Cross Society deserve our loyal support and every colored farmer should join it. We realize however, that in some agricultural districts, destitute and needy colored farmers and their families are prevented from securing aid from this organization by false statements relative to their condition and situation made by officials of local and county charters. To remedy this injustice we recommend that local and county chapters for colored members be organized in communities having a large Negro population."

Negro Tenancy

"Negro tenancy and the crop-sharing system of farming are twin evils which are retarding the development and prosperity of the southern states and other sections. These evils are responsible for debt-salvery, peonage, poor housing and living conditions and a major portion of all the misfortunes Negro farmers and their families suffer. As long as they exit, so long will we as farmers, be deprived of an equal opportunity with other farmers of our common country to enjoy the privileges of citizenship and the rewards of our labor. We call upon the national officers and leaders of our organization to continue their efforts to abolish these evils"

HOME OWNERSHIP

"Realizing that the real farmer is the one who owns the land he plows and plows the land he owns, we shall never cease our efforts to persuade and assist tenant-farmers of our Race to become farm owners. At the present time our members have unlimited opportunities to purchase farm homes on favorable terms. We urge all who possibly can do so, to take advantage of these opportunities and request our national office to continue to give prospective buyers all information and assistance possible."

Farm Community

"We have faith in the permanency of the Negro farm community and desire to see more such communities established. We endorse the bill to be presented to Congress providing for the establishment of a model farm community of colored farmers in each of the southern states. We believe that the successful existence of such a community would be a great object lesson to all our farmers."

County Extension Agents

"We endorse the work of our county extension and home demonstration agents. Units in counties where agents of our group are not employed, and where their services are needed should make every effort to secure them. We urge our members to co-operate with their advice and loyally support their programs."

Agricultural Institutions

"Our agricultural institutions are doing what they can to increase the prosperity and welfare of colored farmers. Their work is handicapped however on account of insufficient appropriations to carry out their programs, modernize and increase the efficiency of their plants. Members should keep in close contact with the work of our institutions and support them."

CRUGER, MISS., UNIT DONATES

Down at Cruger, Miss., there came to The Modern Farmer from Mr. W. G. Woodard, representing the Cruger Unit, a donation of $5.00 as a result of the collection taken on Thanksgiving Day from their expenses.

This is one of the thriving Units in the Mississippi Organization of the Federation of Colored Farmers.

The Modern Farmer acknowledges the receipt of this assistance and has sent the Unit a letter.

Literary Digest Agrees

National Publication Discusses Subject Similar to the Henry Allen Boyd Plan.

That "The Henry Allen Boyd Plan" is nationally known and universally being accepted, was proven in a recent issue of The Literary Digest, in writing editorially and in quoting the author on the feasible plans and methods for individuals, groups or racial units in helping to kill "Old Man Depression." Several citizens residing here read The Literary Digest production, and are all convinced that it is almost a duplicate, coinciding in the main, with the plan so well known which is being accredited to the president of the Citizens Saving Bank, and styled "The Henry Allen Boyd Plan."

The president of this institution has advocated a "Save a dollar a week" movement among church groups, such as National Conventions, State Conventions, Associations, Fraternities, and to the citizens at large. It is his belief, and he supports it by strong argument, that any particular denomination would be in a position to finance itself out of its membership if The Henry Allen Boyd Plan was accepted, adopted and put into practice at once.

While The Literary Digest does not call the name of the author nor give any credit to this Nashville individual, those who have read it declare that there is practically no difference; it is named however, something else. In the main, they claim, its context and the matter differ but little from The Henry Allen Boyd Plan, whose author has not only been known in the commercial and journalistic world, but in the religious publishing house activities, he having stepped into the shoes of his lamented father, the founder of the National Baptist Publishing Board's Plant.

Prairie View State College

Admitted to the Southern Association of Colleges

By Napoleon B. Edward

Prairie View State Normal and Industrial College has been admitted to the Association of Colleges and Secondary Schools of the Southern States. This information was conveyed in a telegram to Principal W. R. Banks December 1 from Dr. Fred McCuistion, representative of the association.

The college has just recently undergone a careful and critical survey by Dr. McCuistion, who was accompanied on his visit to the college by Mr. D. B. Taylor, of the State Department of Education. Friends of Prairie View State Normal and Industrial College, everywhere, will manifest keen interest in the recognition accorded. The recognition has increased its standing and prestige among the leading colleges and universities of the country.

Prairie View State Normal and Industrial College is composed of four divisions leading to bachelor's degrees in agriculture, arts and sciences, mechanic arts, and home economics, and one division, nursing education, leading to a standard diploma. Students now leaving the state to continue their training will find less difficulty in matriculating in higher institutions of learning in industrial no less than in the various literary and professional avocations.

Application for Membership

NATIONAL FEDERATION OF COLORED FARMERS (Inc.)

Vincennes Hotel, Chicago

As a farmer, I believe the time has arrived when the Colored Farmers should form a National Organization devoted to diversified production, grading, packing, shipping and marketing of farm products and to the purchase of needed farm supplies through co-operative methods, to the end that a more prosperous financial condition may result from their efforts as producers.
I hereby subscribe $5.00 for membership in the National Federation of Colored Farmers for a period of 12 months from date. Also $1.00 for an Annual Subscription to the Modern Farmer.

Name ..... Address .....

SUCCESSFUL CONVENTION .

(Continued from Page 1)

and prospered, in some cases, under the most trying difficulties imaginable. There was always exhibited a spirit of optimism and determination.

At the close of the meeting the secretary announced the names of assistant secretaries and marshals and the appointment of the following delegates to serve as judges of the exhibits; Mrs. L. H. Sanders, Mrs. Fredonia Smith, Nathan Jones, Gus Moore, D. C. Johnson, H. R. Parker, Sam Diggs, and R. C. Darity.

Thursday night, a mass meeting was held by the citizens of Memphis which was attended by delegates and visitors.

Dr. Henry Allen Boyd Speaks

An executive session of officers and organizers was held Friday morning, presided over by Pres. Davis. The main address of the afternoon session was delivered by Dr. Henry Allen Boyd, secretary of the National Baptist Publishing Board, of Nashville, Tenn., who was appointed by Gov. Henry Horton to represent this state. Dr. Boyd declared that if "400,000 tillers of the soil could raise ten dollars each for a period of one year they would have to their credit $4,000,000, enough money to lift every mortgage on a Negro's farm in the nation." Leon R. Harris, editor of the Modern Farmer, and national secretary of the Federation, followed Dr. Boyd. His address was an enunciation of the benefits of organization and co-operation to colored farmers and he gave some pertinent advice relative to the practice of purchasing, producing and marketing co-operatively.

Delegates from units located in fourteen states were registered. The convention entertained several distinguished visitors, including Dr. Jernigan, noted Baptist divine of Washington, D. C., who addressed the delegates. Dr. Jernigan is a native of Mississippi,—the state most largely represented.

Citizens, business men, clubs and local organizations of Memphis combined to make the stay of the visitors pleasant and profitable. The choirs of New Prospect Beale Ave., Baptist Church furnished the best of music during the evening sessions, which was highly enjoyed by all. Local arrangements were planned and supervised by Mr. Geo. J. Strong, advertising representative of the Memphis World, who deserves much praise and credit for the success of the meeting.

EDITOR LEON HARRIS

(Continued from Page 1)

luxuries, than any farmers anywhere."

"A national organization of American Negro farmers is a necessity."

"The National Federation of Colored Farmers is a non-profit organization. It is legally organized,—it is incorporated,—and every membership is protected as well as are the memberships of white farmers in their National Grange, Farmers' Union or Farm Bureau Its officers and leaders expect every member to receive the same consideration and the same courtesy from governmental agencies, Federal and State,—and from business firms and associations that is given members of other large national farm organizations."

"We are organized to promote co-operation in every effort to improve conditions for the economic production, conservation, marketing, transportation and distribution of farm products. We are organized to further the study and enactment of constructive farm legislation. We are organized to advise with representatives of public agricultural institutions in the determination of nation-wide farm policies. We are organized to keep members informed regarding all movements that affect their interests."

"The founders of our organization resolved that colored farmers should be assisted in a way that would enable them to earn more, save more, and therefore, have more and be more as a result of their labor."

"The National Federation of Colored Farmers came into existence as an organization of co-operative Units. As such, its farmer-members have the legal right to pool their resources and purchase needed home and farm supplies through co-operative methods."

" 'A penny saved is a penny earned' and a Negro farmer has as much right to an opportunity to save his pennies as has any other man."

"Negro farmers have been loyal too long already to those who have abused their support, friendship and patronage. It is high time that we learn to be loyal to ourselves,—to our wives, and children, —to our race and to the great God of our fathers and mothers."

"I have the utmost respect for the honest, live-and-let-live merchant or planter. I know he will continue to get your patronage and he will deserve it. He will survive and he should survive. But those who are forever trying to skin you,—who still believe that you are illiterate, dumb and helpless, —who persist in over-charging you for the necessities of life,—for that class I have no respect. The sooner they go, the better."

"We must continue the practice of co-operative buying. We must become bargain-hunters. The farmer who gets on top is the one who has learned to save what he has earned. We have always been good spenders. We must learn to become good savers."

"Co-operative production will pay. Let your Unit and community be known as the Unit and community that produces one crop, or variety of crop better than any other in the world. Colored farmers are the world's best farmers. The trouble is,—the world has not found it out. Let's advertise."

"Co-operative marketing is a business that demands faith, foresight, keenness, and especially, promptness."

"Negro farm tenancy must be destroyed. It is an evil and must be treated as an evil. Every sensible American white man, Northerner or Southerner,—and every sensible American Negro knows it is an evil. It has out-lived its usefulness if it has ever been useful. It is unnecessary now if it has ever been necessary. It is the source of the Negro farmer's debt-slavery,—the source of poverty,—the source of oppression and persecution. It is a hideous monster that covers the Southland with two—room shacks, undernourished children, worn out bodies and blighted souls. It has existed long enough in this civilized age, —in this bountiful, beautiful country. It is destroying the happiness of three million American Negro citizens and is smudging the souls of all who profit by it."

"This is no time for Negro leaders to be skeptical, blind and reactionary."

"The Negro farmer must become a real farmer. He must own the land he plows and plow the land he owns."

"The American farm market is worth seven billion dollars a year. One-eighth of that market is Negro. Manufacturers are short-sighted indeed who will neglect this market much longer."

"I have faith in the permanency of the Negro farm community. But what are these communities going to be? They are going to be communities of colored farmers working as hired hands on farms owned and controlled by larger corporations and money-interests, or they are going to be communities of colored farmers who own their own soil and live and work together in harmony and co-operation. Which do you want?"

"The co-operation of organized rural and city women, in the marketing of farm products, will be found to be very beneficial."

"The outlook for the intelligent colored farmer is not dark and gloomy. He must be a real man. He must be diligent, industrious and far-sighted. He must learn the art of being agreeable,—that he may live in peace and harmony with his fellows. He must organize and learn the secret of successful co-operation,—'You help me,—I help you."

"I know of no reward more perfect that Heaven has given to man than the opportunity to live a farmer's life. I know of no man more blessed than the colored farmer of the present generation. It is he who will be the father of Negro statesmen,—Negro philosophers,—Negro orators,—Negro poets. It is his opportunity to guide his Race into pastures of peace, and plenty, and if he stands up like a man, and does his duty, and keeps his hands clean, his heart pure, generations unborn will rise up and call him blessed."

Lincoln To Enter Debate Tournament In Illinois

Dett Choral Club Sacred Concert Aldridge Players Present Three One-act Plays

The Lincoln University Debate club recently accepted an invitation from the Illinois State Normal at Bloomington, Ill., to compete in a debate tournament there January 27, 1933. The club, also, has accepted an invitation from the Interstate Literary Society to stage a debate during the forty-first anniversary meeting of the Society in Kansas City, Mo. The debate is to be held during the Christmas holiday season. The following members of the Debate Club have won places on the varsity team: the Misses Mildred Roberson '32, E. Doreene Johnson, '35, Irma G. Taylor, '35; the Messrs. Leslie Newsome '33, Alphonso Turner '32, Floyd Roberson, '35.

Dett Choral Club

The Nathaniel R. Dett Choral club of Lincoln University presented a sacred concert on Sunday, Dec. 4, at 3:00 p. m., in Page Auditorium to a large and appreciative audience. This was the first of a series of similar programs to be offered from time to time during the year. The music was selected from a group of outstanding compositions. Included in the program were three Negro Spirituals: "Swing Low Sweet Chariot," arrangement by N. Clark Smith, "Somebody's Knocking At Your Door," arrangement by Nathaniel R. Dett, and "On Ma Journey," by Boatner. The arrangement by N. Clark Smith was nicely handled by the mixed voices, with the solo part soothingly carried out by the contralto voices. The arrangement by Dett was presented by the young women's quartette. The Boatner number, written for the tenor voice, was exquisitly rendered by Mr. Luther Hartley.

Miss Marie H. Ford, Director of Music in the University has done an excellent job in training the various members of the Choral club for their various parts. In each instance the tone quality and harmony were admirably developed.

The Program

Prelude—

Thou, O Lord, Art Our Father, from "The Prodigal Son," Choral club, Sullivan.

Vocal Solo—"Submission" Baldwin, Gerald Brooks.

Swing Low, Sweet Chariot, N. Clark Smith, Choral club.

Somebody's Knocking at Your Door, Dett, Young Ladies quartet.

Fear Not Ye, O Israel! Buck, Choral club.

Vocal Solo—"On Ma Journey," Boatner, Luther Hartley.

The Prayer Perfect, Stenson, Choral club.

Postlude, Elgar March.

THE MODERN FARMER

Vol. V. NASHVILLE, TENN., JANUARY 16, 1933. No. 9.

FARM LIQUIDATION URGED

United States Owned Cotton To Be Sold

Cotton merchants and officials of the American Cotton Shippers Association called on President-elect Roosevelt recently and asked that a non-partisan agency be formed to dispose of all cotton now held in warehouses under mortgage to the U. S Government.

It is believed that some effort to dispose of this surplus cotton will be made shortly after Governor Roosevelt assumes office.

WANTS U. S. TO BUY FARM MORTGAGES

Senator L. J. Frazier of North Dakota has introduced a bill in Congress empowering the federal government to issue several billions of dollars worth of new bonds to sell to private investors, the proceeds of which would be used to buy up mortgages now resting on farm lands. Farmers would be charged a very low rate of interest, 3 per cent being the rate suggested, one-half of which would be used to retire the principal of the money lent.

Financial leaders claim that the government cannot sell bonds at such low interest rates. They claim that enactment of the Frazier legislation will lead to the issue of paper money which will be worthless and will cause more panic and distress. Other leaders claim that the government should not continue to tax all the people for the particular benefit of one class—the farmers.

It will be interesting to follow the discussions of the various farm relief plans in Congress which will probably have to meet in special session next spring to dispose of them.

NEGRO FARMERS SCORE AS TOBACCO MARKET OPENS

Lexington, Ky., Nov. 25—Local tobacco warehouses were busy all this week receiving tobacco for the first sales which begin Monday morning, December 5. Lexington already the largest loose-leaf tobacco market in the world, has added three new warehouses to her former list of twenty, and several old ones have been enlarged by new additions, giving a total capacity of nearly fifteen million pounds.

One of the chief results from a meeting of the local warehousemen, November 17 was the agreement to discontinue the practice of furnishing growers with baskets so that they can pack their tobacco at their farms. All tobacco will have to be packed at the warehouses this season.

Another announcement of importance was that plans are underway for the 4-H clubs tobacco show December 16 and 17.

A large number of Negro farmers have prepared their crops early and placed them on the floors preparatory to sale Monday week. Others are well on the way with their stripping. The amount of tobacco raised this year by the colored farmers is somewhat less than that

FARM ALLOTMENT PLAN

Popular Idea Gaining Throughout the U. S.

Leading economists, agriculturists and business men have gone on record recently as endorsing the "Farm Allotment" plan as the one offering the best method at present available to relieve the farmer and business conditions generally. This plan is said to be favored by President-elect Roosevelt. It is well known that a majority of the plans formerly enacted by Congress for the farmer's benefit have been the plans introduced and sponsored by representatives of the cities—not by the farmers themselves. Farm leaders are now insisting that a real plan favored by farmers and their organizations be adopted and it is highly probable that at last the farmers will win out.

Such leaders as Hon. Henry A. Wallace, of Des Moines, Pres. Edward A. O'Neal, of the American Farm Bureau Federation and Henry I Harriman, president of the National Chamber of Commerce, favor the allotment plan. Every business and industry in the nation is suffering because the farmer is unable to buy his necessities.

ENGLAND BUYING MORE COTTON

The best "cotton news" published last month was the information that England is buying more cotton and English textile mills are getting ready to double their level of output which has been 40 per cent of capacity. Most spinners have made peace with their employees and have decided not to reduce the wages of the lower paid operatives.

Buyers are discarding Egyptian cotton and are going back to staple 1-inch American trade. Not a single bale of Russian cotton has been imported into Great Britain this season. India is beginning to buy British cloth again and it is expected that trade will pick up and gradually improve.

MORE, BETTER GRAPES FROM GRAFTED VINES

Geneva, New York, — Grafted vines of such common varieties of grapes as Catawba, Campbell, Concord, Deleware, Iona, Niagara and Worden after 17 years in the vineyards of the State Experiment Station continue to give marked increases in yield and greatly improved quality of fruit over that from own-rooted vines growing along side, declares Prof. F. E. Gladwin, grape specialist at the station's vineyard laboratory at Fredonia. The cost of grafted vines is still high, says Prof. Galdwin, and the profitable use of grafted stock by the commercial grape grower is dependent upon several factors, but there is no question about the advantage of grafted vines for the home planting.

"In grafting the grape there is a time and a way, not so particular as many believe, but rather more particular than in grafting most other fruits," says Prof. Gladwin in an introduction of a brief circular entitled "Grafting Grapes" in which he describes the important details to

(Continued on Page 2 Col 1.)

LIVE STOCK MEN HAPPY

Good Prices Received at Chicago's Exposition

Chicago—Livestock breeders were made happy here near the close of the International Livestock Exposition, when auctioned stock sold at prices only a little below last season's top. These were all prime animals that had been placed on exhibit.

The Hereford steer that won first place and was named grand champion of the exposition, brought $1.25 a pound. Another Hereford, owned by Kenneth Zink, a 4-H Club boy of Verona, Wis., won the junior feeding honors.

Shorthorn cattle men sold forty head of pure breds at an average of $175. Aberdeen-Angus brought an average of $151.50, the top prices for this breed going to $825. Hogs, sheep, horse and mule breeders also reported encouraging prices. One breeder remarked that pure bred stock is the best property in America today and said further that many people are becoming interested in owning such stock.

There were few colored farmers present. One of the most interesting exhibitors was a colored mule breeder of Missouri, who has not missed a show in many years. He raises and sells a carload of mules each year off his own farm. This prosperous colored farmer remarked that our farmers do not take enough interest in producing pure bred stock and are never in sight where the big money is. He further stated that colored farmers should organize in their communities, start producing good livestock together, and get their boys and girls interested in 4-H Club work.

INTERESTING NEWS NOTES

JAN 23 1933

Items Helpful to the Member Units Throughout

Great Britain has launched a giant co-operative scheme for farmers which is being closely watched by all agricultural interests in the world. Organizers announce four principal aims, as follows: to control as far as possible the production of food-stuffs; to supply producers with seed, stock, implements and other supplies; to sell to consumers at cost of production in British colonies. It will be noted that the first three aims are similar to the ams of the National Federation of Colored Farmers.

As a result of successful experiments conducted by Dr. Chas. H. Herty, white paper made from southern yellow pine is as good as any other white paper and this makes possible the use of huge pine forest in the South. Colored farm owners of the future will be able to get much profit from their wood lands.

Farmers of Peru, South America, are planting more cotton than usual.

Scotland County, N. S., of which Laurinburg is the county seat, is planting a minimum of 500 acres in early tomatoes for carlot shipments to northern markets. Two N. C. Units of the N. F. C. F. report that they will go in for co-operative production this year on a large scale.

Congressman Oscar DePriest, of Illinois, lone Negro member of the House of Representatives, by a suc-

(Continued on Page 2 Col. 2)

PROF. L. B. MILLER'S IDEA

Farm Crop Rotation Might Solve the Problem

According to Prof. L. B. Miller o. the University of Illinois, if farmers understood and practiced sensible crop rotation there would be no periods of over production of surplus crops and fluctuating farm prices. Prof. Miller states that many farmers are today making profits because they practice the right kind of rotation and that others should follow their example.

FARM BUREAU PROPOSALS

At the recent convention of the American Farm Bureau, Edward A. O'Neal, president of the organization, proposed to delegates that the government adopt a form of the "allotment plan" as a means of securing for farmers better prices for crops. Other proposals made include:

Remonetization of silver and reduction from 23.22 to 16 grains the weight of gold behind the dollar.

Reorganization of the department of agriculture and coordination of all agencies serving the farmer.

Higher tariffs on oils, fats, jute and other commodities from abroad which can be substituted for home-grown products.

Readjustment to bring about "true equality between industrial and agricultural tariffs."

Independence for the Philippines.

Refinancing of mortgages by "a federal land mortgage corporation with debenturable assets extending to a possible five billions of dollars."

Retirement of marginal farm lands, possibly financed by a billion dollar federal fund.

Consistent reduction of public expenditures and equal distribution of taxation.

Opposition to war debt cancellation unless trade agreements can be obtained to give foreign markets for American farm produce.

Amendment to the agricultural marketing act to make it fully ef-

(Continued on Page 3 Col. 2)

ILL. BEE KEEPERS HEAR ADDRESS BY DR. R. C. J. MEYERS OF HILLSDALE

Honey Provides Human System With Needed Alcohol, He Explains.

Dr. R. C. J. Meyers of Hillsdale, an expert on honey production and other agricultural pursuits, spoke today before the Illinois State Bee Keepers' association, at a meeting in St. Nicholas' hotel in Springfield. Dr. Meyers' address was of interest to the general public as well as to apiarists. It was as follows, in part:

Natural Sweet.

"Honey is a natural sweet made by the honeybec from nectar gathered by the bee from plants and trees. The nectar is gathered and placed within the honey sack and carried to the hive and there placed in the comb by the bees. As this nectar passes through the mouth and aesophagus of the bee it comes in contact with saliva and invertase which starts the inversion of nectar into honey that is completed in the comb.

"With a proper evaporation of the excess moisture it is ripened into honey and the combs, capped and sealed, are now ready for use.

"Nectar is more than a sugar syrup or solution, however, as it contains other substances such as enzymes and invertase produced in considerable quantities by the

EARLY CABBAGE

By John S. Gardner

Kentucky College of Agriculture.

Early cabbage setting time is here, or almost here.

As has been their custom, large numbers of home gardeners will use again the so-called "frost-proof" plants, as being the easiest and surest means toward having extremely

Kentucky College of Agriculture over Kentucky, however, are gardeners who fail annually to raise satisfactory cabbage, because of the cabbage "yellows" disease. The symptom is the yellowing and wilting of the slips just as heading should begin. Such plants will be found to have rotted completely off, just at the ground line.

Use Immune Plants.

A disease, whose germs live over in the soil, no plant treatment is effective against is "yellows" but its control is by avoidance, through the use of cabbage varieties that are immune to it. Of these, there are three: Iacope, Marion Market and Wisconsin Hollander, named in the order of their season.

Unless the "frostproof" plants are of these varieties, the gardener who has been having trouble with the yellows disease, may prepare himself for just another disappointment.

(Continued on Page 2 Col 1.)

GRANGE HOLDS TO MARKETING ACT

Louis J. Taber, master of the National Grange and its official spokesman, in his annual address to the organization said of the farm board and the marketing act:

"Legislation creating the marketing act and the farm board have not given the results expected or desired, yet the purpose of this act was a step in the right direction. It gave to agriculture additional machinery that can be used in the perfecting of a sound marketing program. When the marketing act is amended, it must be amended by the friends and not the enemies of agriculture. All amendments must seek to give the farmer more, rather than less, control in handling the product of his own toil.

"Stabilization features of this act have not been wholly successful. It must be remembered, however, that there has been a declining world market, both at home and abroad, since the enactment of this law. No

(Continued on Page 2 Col. 4).

NEGRO FARMERS SCORE AS TOBACCO MARKET OPENS

(Continued from Page 1).

raised last year, according to farm agents.

Some of the finest tobacco sold on the Lexington market each year is raised by Negro farm tenants who crop on shares. A number of others who produce valuable crops own their own land.

MORE, BETTER GRAPES FROM GRAFTED VINES.

(Continued from Page 1).

be considered in the operation. Also, in a recent bulletin, Prof. Gladwin reports on the behavior of the grafted vines in his tests which were begun in 1915. "Grafting American Grapes on Vigorous Stocks" is the title of this bulletin, a copy of which may be had free of charge, together with the circular on grafting, upon request to the Experiment Station at Geneva.

Two types of grafting are available, says Prof. Gladwin, vineyard grafting and bench grafting, Vineyard grafting has the advantage of enabling the grape grower to change over an undesirable variety to a better sort. Vineyard grafting is best performed just after active sap flow has passed in the spring.

All things considered, bench grafting indoors will give best results. By this method the vineyardist may expect from 40 to 60 per cent ot his grafts to grow, although as greater skill is acquired a larger proportion will survive.

EARLY CABBAGE

(Continued from Page 1).

Good strategy on his part would be to start with "frost-proof" plants, but to have growing a reserve of seedlings of the resistant varieties just named. All seedsmen handle them if apprised in time.

In gardens that are free from "yellows," the varieties to use are Golden Acre, Copenhagen Market and Succession. The first two are round-heads, less subject to bursting than Early Jersey and Charleston Wakefield; Golden Acre is, if anything, slightly earlier than the favorite Early Jersey, besides.

Cabbage needs good ground, high in moisture-holding capacity, for cabbage is over 95 per cent water. Cabbage land should be rich in nitrogen, the plantfood that causes leaf growth.

Turning under, deeply, a generous coat of manure insures both these requirements. The manure may be used fairly fresh, before its store of nitrogen will have passed off. Further, in the breaking down of manure, a half-pint to a plant, may and this is of benefit in getting the cabbage to start off promptly.

In adidtion to the manure, feeding should be done, by applying top-dressings of nitrogenous material. This may be chicken manure that has been stored dry, at the rate of one bushel to 300 feet of row, or "liquid manure" made by leaching water through mixed (fresh) stable manure, a half-pint to a plate, may be used.

Better than either of these, as being more concentrated and more quickly available, is nitrate of soda, used at the rate of one pound to 75 plants. Two dressings may be made with benefit. The first, when the cabbage begins growing, and the second two weeks later.

Set Cabbage Level.

Cabbage should be set level, not in hills, except in the instance that the soil is distinctly wet. In such a case, setting on a slight ridge may be of advantage in permitting earlier setting, but, highly ridged rows may find themselves in an embarrassing situation when the soil dries out, and the weather becomes warm.

Cultivation should be shallow, and the land should be left level. It is better to remove weeds from between the cabbages than to try to keep them smothered.

Cabbage worm and harlequin bug control will be covered in a leter article, but it is pertinent to speak of plant lice now, for these pests make their appearance early; they are, in fact, sometimes introduced on the slips. Users of "frost-proof" slips should examine these before they set them, or better still, acting on the suspicion that the plants are infected, they should dip them in a strong tobacco solution before setting them.

Further, close watch should be kept, and the plants promptly sprayed with tobacco solutions, either home-made or using any of the commercial nicotine sulfate compounds, after the directions printed on the container.

INTERESTING NEWS NOTES

(Continued from page 1)

cessful legislative coup, forced the house to appropriate $460,000 for a new heating plant at Howard University.

During December the Mississippi river at St. Louis, Mo., was lower than at any time during the past 72 years.

A politician of Nanking, China, has introduced laws to compel Chinese women's limbs to be "properly covered." This will mean long skirts and sleeves and will require the use of more cloth made at the local cotton mills. If successful, the Chinese will be required to purchase more American cotton.

The vote given Herbert Hoover, defeated candidate for president, was the largest ever given a defeated nominee. Norman Thomas, Socialist, polled more than 800,000 votes. William Z. Foster, Communist, who ran with James Ford, a Negro, for vice-president, polled nearly 70,000.

Hens that lay larger eggs will receive higher scores than those that lay smaller eggs during this year's Illinois egg-laying contest.

Warren B. Perry, 73 year old Iowa farmer, is the popcorn king of the country. He has been interested in popcorn for 51 years. He has developed 40 kinds of popcorn of various shades and colors and this last year harvested fourteen tons of popcorn from ten acres.

Farm implement factories in Moline, Ill., are engaged in experimental work on tractors with rubber tires. It is claimed that the experiments have proven a success.

A rabbit hunter near Chicago was shot by his dog. He laid his gun on the ground and his dog stepped on the trigger.

It is estimated that fully one-half of the working population of Chicago are unemployed and are existing on relief funds provided by the state and city.

The National Federation of Colored Farmers is advising members to plant the better grades of cotton this season, believing that by doing so they will obtain better prices. It takes as much time and labor to produce low grade as high grade cotton.

Fourteen per cent of the farm population of the United States belong to the colored racial group.

It is claimed that the largest calf ever born in Illinois was a Holstein, born recently, that weiged 156 1-2.

There are 118 colored farmers in the state of Iowa, an increase of nine since 1920. Of this number 67 are full owners. Land owned is 3,775 acres and value of this land and buildings is $350,814.

Joe Lascanni planted a Mexican variety of corn in Colorado last season and the stalks grew to a height of over 15 feet.

337 farms in the states of Mississippi, Alabama and Louisiana are offered for sale at a price of one thousand dollars or less. Down payments on 48 of these farms are $100, on 139 of them, $150, and on the other 150 the down payment is $200. All of these places have been farmed and have houses, barns, well, etc. Buyers have ten years to pay for them after making down payment and only 6 per cent interest is charged, payable annually. Colored farmers should purchase all of these farms while they have the opportunity. Those who want them, who are able to make the down payment and have stock and feed enough to manage the first year should communicate with the National Federation of Colored Farmers, Inc., Vincennes Hotel, Chicago, Ill.

GRANGE HOLDS TO MARKETING ACT

(Continued from Page 1)

legislation can receive a fair test under such disturbed conditions; yet it is apparent that a better substitute must be found if there is to be any permanent good derived from machinery of this character."

As a matter of identification it may be said that the National Grange is the farmers' organization that advocated the debenture plan of aid to agriculture.

We are not sufficiently informed on the working of the farm board and the marketing act to be a competent witness, but we consider it worth while to call such witnesses as Mr. Taber, Calvin Coolidge and President Hoover to testify in its behalf in view of the assaults upon it made here in the midwest.

We should say that Mr. Taber, if biased, would be biased in the direction of the farmer. We should say that the president and the former president have the viewpoint of public welfare with an eye to the farm situation to which the legislation relates.

Testimony on the other side, or propaganda on the other side, issues from the Chicago board of trade and the millers and grain processors. If it is biased, we should say that the bias is in favor of the interests of the grain exchanges and the processors and against the interest of the farmer where there is conflict of interest.

During the last year there has been a flood of such propaganda out of headquarters maintained in Chicago for the purpose of "smearing" the farm board and marketing activities of the farm organizations.

It was of some public interest, therefore, what President Hoover would say concerning the board when he next had occasion to speak of it. The occasion arose when he delivered his address of acceptance. He stood by the board. In a later address he said that stabilization by purchase had not proved satisfactory. He advocated its discontinuance. That was only an emergency provision. It might have worked if the emergency had not been so deep and so wide, but even that is only guessing, because it was deep and wide and we have not had an experiment with any other kind.

In one of his recent addresses former President Coolidge noted the legislation creating the farm board and the marketing acts as advantageous to agriculture.

Now comes the master of the National Grange, who stands by the farm board and by the marketing act, but finds that a substitute will be required for stabilization of prices, which is in line with the findings of President Hoover.

Until we possess more technical knowledge of the results of this legislation, we shall incline to the positions taken by the head of the National Grange, who speaks for a large agricultural group, and by the president and the former president against the testimony of headquarters established in Chicago with the apparent purpose of destroying the marketing act in interest of private agencies whose interests are likely to conflict with those of agriculture. We do not mean that they do not have a right to work for and to protect their own interests. We mean only that their testimony and their activities will be regarded solely in the light of a probable desire to take some advantage of producers that may not be possible in the event of success of the marketing act.

ILL. BEE KEEPERS HEAR ADDRESS BY DR. R. C. J. MEYERS OF HILLSDALE

(Continued from Page 1)

honeybee and used in transformation of sucrose in nectar to dextrose and lavulose in honey. Honey also contains acids, proteins and mineral matters in small quantities, as well as colloidal substances that consists of small particles that do not enter into solution, as organic acids, salts and other crystallizable constituents of honey and other substances do.

Honey Complex

"Honey is a complex article of food. When food contains starch and sugar and is taken into the system there is a definite increase in the amount of sugar in the blood, and as this is stored in the body the sugar in the blood falls to its normal one-tenth of one percent.

"Now while dextrose produces a sharp normal rise, lavulose does not. In fact there is considerable evidence to suggest that lavulose is not utilized by the body as dextrose but is stored in a different and complex manner.

"How do carbohydrates, starches and sugar affect our bodies? We obtain our fuel from them. They are converted into invert sugar, dextrose and lavulose. Honey is composed of 34.02 percent dextrose (grape sugar), and 40.5 percent of lavulose (fruit sugar) in addition to its other constituents. It has been my firm opinion that these invert sugars are finally converted into alcohol and as such are consumed by the body to produce heat and energy.

Man Alcohol Engine

"Man is, then, an alcohol-burning engine. Every twitch of a muscle, every movement of the body is produced by the breaking down of a certain amount of alcohol in the system, into energy, heat and carbonic acid gas.

"The carbonic acid gas is finally exhaled by the lungs. If my theory is correct man can not live without alcohol in his system, and this alcohol must be maintained at a certain percentage of the body weight. This is proven by the normal sugar content necessary to maintain health. Every movement of the body and vital organs is dependent upon this vital process. The more we exercise the more alcohol is consumed.

"It is therefore important to have the carbohydrates in the most easily convertible form in certain diseases, fatigue, exhaustion, heart failure, and so on. Honey, with its invert sugars, provides such a substance. We can understand why some people are more energetic than others. Their organs of digestion and assimilation are constituted so as to more readily convert the starches consumed in sugar, dextrose, invert sugars and finally alcohol into heart, energy and carbonic acid gas."

Dr. Meyers went on to show that any artificial increase in the amount of alcohol in the system provides "too rich a mixture," in effect "fouls the human engine" and results in intoxication and its many attendant evils. He continued by recommending honey as a stimulant in preference to alcohol because it already is partly digested and so is easily assimilated.

Strong Drink

Craving for strong drink, he explained, may be of a system starving for heat and energy-producing material. A vicious cycle results, for the system is so deranged by the strong liquor that it becomes weak and is unable to carry on normal digestive processes.

Dr. Meyers cited the example of Julius Ceasar dining with a man who had just passed the century mark but retained body and mental vigor. The great general asked the aged man what his formula for long life was. The laconic answer was "Internal honey, external oil." When some student discovers the nature of that oil, said Dr. Meyers, the problem of gaining long life—half-solved by honey—no longer will exist.

PROF. L. B. MILLER'S IDEA

(Continued from page 1)

fective in promoting farm cooperatives.

Control of speculation in basic farm crops.

Regulation of public service corporations.

Reorganization and coordination of farm credit agencies.

The Convention was held in Chicago and delegates from nearly all the forty-eight states were in attendance.

NEW IRISH POTATO SHOWS SOME PROMISE

Raleigh, N. C.—A new Irish potato developed by vegetable scientists of the United States Department of Agriculture and tested in this state for three years shows considerable promise, especially in the western part of the state, announces M. E. Gardner, horticulturist at State College.

This new variety is known as Katahdin and is rated highly by horticultural experts because of its excellent shape, its shallow eyes and small percentage of culls. In the eastern or early commercial section, the Katahdin variety is from 18 to 21 days later than the Irish Cobbler in maturing and for that reason will not be so widely in demand by eastern growers. However, when allowed to mature, the final yield compares favorably with that of the Cobbler. The Katahdin is said to give a higher yield of No. 1 potatoes than does the Cobbler.

In the western section, where earliness is not such a factor, the new variety has found great favor, Mr. Gardner says. In this territory, however, the total yield is below the Cobbler but other good features seem to outweigh this disadvantage.

In 1931, a large number of Katahdin hills were selected from test plots grown in Ashe and Watauga counties. Seed pieces were taken from each hill, tested for disease, and those showing any trace of disease were discarded before planting the 1932 crop. This has provided a source of disease-free seed for this year. Mr. Gardner says he has received many requests for seed of the new variety and the demands may exceed the supply.

WORKER BURIED IN WHEAT DIES AS RESCUERS LABOR

Chicago—Firemen worked frantically yesterday in an attempt to rescue Bruno Riedwzycki, 42 years old, a laborer who was buried under an avalanche of 30,000 bushels of wheat in a tank at the Albert Dickinson Feed company, 2750 West 35th street. When they had shoveled the wheat off the buried workman he was dead.

Riedwzycki was engaged in shoveling wheat from one side of a tank to the other so it could be carried away by the suction apparatus. An unexpected flow of wheat from above knocked him down into a pit, the grain flowing down upon him like an avalanche. Fellow workmen threw him a rope before he was completely submerged, but he failed to grasp it.

The fire department was callled and Chief Thomas Cline of the 21st battalion and his men responded with Rescue Squad No. 7. The suction apparatus was put to work while the firemen dug with shovels to reach the buried worker, but they were too late.

FREAKISH NAMES FOR MANY TOWNS

Some American Places Seem to Have Been Named in Extreme Haste

What's in a name?

First families have left their famous surnames to designate post-office and railroad stations in the United States, says a bulletin from the Washington, D. C., headquarters of the National Geographic society, and in addition many humble folk have contributed their more familiar appelations such as Dad, Bill, Nick, Tim, Floe, Vick and Maggie. Aside from family names the homely nouns and adjective of the work-a-day world have found their way by the score to maps and signposts.

Greasy Creek, Tub Biscuit, Cheap, Busy and Dimple are Kentucky towns. There is Horse Heaven, Humptulips, Gooseprairie and Steptoe in Washington state.

Ballclub and Shivers

Pie Town, Dusty, Gallup and High Rolls are in New Mexico; Jelly, Needles and Likely in California; and Sopchoppy, Plerky and Frostproof in Florida.

Illinois has Sandwich, Joy and Muddy, while across the state line in Indiana there is Speed, Economy, and Harmony. Trump, Vim, Flues and Joes are in Colorado; Bumble Bee, Sunglow, Wikieup and Cactus in Arizona; Asbestos, Ladiesburg, Fearer and Appeal in Maryland; and Deadwater, Grindstone, Thorofare and Merepoint in Maine.

In Minnesota there is Ballclub, Happyland, Otter Tail, Money Creek, Knife River and Embarrass; and in Mississippi, Arn, Lemon, Whynot, Chunky, Shivers and Soso. Montan's Bay Horse, Big Arm, Giltedge and Pray are equally as odd as North Carolina's Nags Head, Bearwallow, Pee Dee, Shoe, Toast, Topnot and Worry; and Missouri's Rat, Gang, Damsite, Clever and Enough.

Wagontire and Colt's Neck

There is Accord, Teaticket and Feeding Hills in Massachusetts; Anvil Location, Inkster, Ahmeek and Honor in Michigan; Echo, Happy Jack and Water Proof in Louisiana; Leaky in North Dakota, and Novelty, Overpeck, Long Bottom and Charm in Ohio.

Oklahoma's contribution to odd place names is Antlers, Hominy, Slick, Slim and Scraper; while Oregon has Wagontire, Sixes, Tyce, Izee and Fossil. New York state gives Horseheads, Sag Harbor, Silvernalis, Yaphank and Whiteface; and New Jersey, Colt's Neck, Peapack, Tranquility, Changewater and Chews.

Dingy and Cutlips.

Goodnight, Razor, Fort Spunky, Happy and Gunsight are towns in Texas; while Pennsylvania has Shickshinny, Showers, Moosic and Bird in Hand. Cowpens, Silverstreet, Nine Times and Ninety Six are in South Carolina; Faith, Tea and Twilight in South Dakota; Devils Slide in Utah; and Idol, Inskip, Littlecrab and Shop Spring in Tennessee.

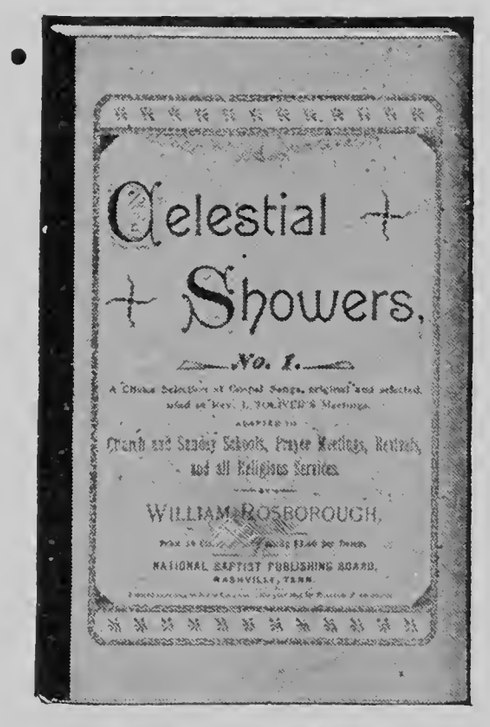
Ferry passengers calling "hey" to "Si," a ferryman, are said to have named Haysi, Virginia. Other odd names in the Old Diminion are Modest Town, Cap, Crabbottom, Dandy, Smoky Ordinary, Traffic, Fancy Gap, Duty and Success; while its neighbor, West Virginia, has Joker, Cutlips, Smoke Hole, Dingy, Hazy, Odd, Pink and Quick. In Wisconsin there is Luck, New Diggings and Rib Lake; in Wyoming a Doggie, Badwater, Four Horse and Ten Sleep.

What Cheer, Promise City, Coin, Nodaway, Stout and Wick are Iowa towns; Cad, Deepstep, Dewyrose and Ty Ty are in Georgia; Cocolalia, Cuprum, Inkom and Notus in Idaho; Coats, Peck and Potwin in Kansas; and Doughboy, Flats, Hire, Rescue and Wynot in Nebraska.

Half a dozen of Arkansas' place names in a row sketch for the imaginative a thumb-nail story: Lost Corner, Reform, Health, Prosperity, Romance and Love.

LEXINGTON MISSISSIPPI UNIT MAKES DONATION

Six members of the Unit of the National Federation of Colored Farmers, located at Lexington, Mississippi, sent in a donation from the Thanksgiving services held recently with them. They are falling in line with the other Units in making these contributions, as it seems to be the desire of the Mississippian to cooperate with the National Federation to the end that their farm newspaper will go to the homes of the hundreds of thousands scattered throughout the nation. Among those who attended the services, as shown in a letter that came from Mr. William Hughes, were Mrs. Annie Samples, Messrs. Henry Williams, W. M. Hughes, Sam Redmond, George W. Smith, and Henry Stokes.



Celestial Showers 40c each; $4.80 per dozen.

THE MODERN FARMER

Official organ of the National Federation of Colored Farmers, Inc.

Leon R. Harris - - Editor

Published monthly by the Modern Farmer at Nashville, Tennessee, and Chicago, Ill.

Nashville, Tenn., Office, 447 4th Avenue, North.

Devoted to the interests of the Farmer, Truck Gardner, Livestock and Poultry Breeder, the Home and the People.

Entered as Second Class Matter, April 10, 1929, at the Post Office at Nashville, Tenn., under act of March 3, 1879.

All contributions for publication in the Modern Farmer should be addressed to The Modern Farmer, 447 4th Avenue, North, Nashville Tenn.

No libelous matter will be published. Unsigned articles or letters, and those written on both sides of the paper will not be used.

Subscription price $1.00 per year, 75c for six months, payable in advance. Personal checks must be certified. Make all checks or money orders payable to The Modern Farmer.

Advertising rates and sworn circulation figures presented upon application.

"OUR SLOGAN"

STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT.

THE LAW

"It is hereby declared to be the policy of Congress to promote the effective merchandising of agricultural commodities by encouraging the organization of producers into effective associations under their own control.

The Board is authorized and directed—to promote education in the principles and practices of cooperative marketing—to encourage the organization, improvement in methods, and development of effective cooperative associations. (Public—No. 10—71st Congress. Sec. 1-5.)

THE GOSPEL

"This law is predicated upon the ability of the farmer to manage his own business, once he is organized to do so. Cooperation is the key to it and only in exceptional cases can the Federal Farm Board have any dealings with a farmer who is not a member of a producer-owned and producer-controloled marketing unit." Hon. Sam'l R. McKelvie, Former Member, Federal Farm Board.

TALKS TO COLORED FARMERS

"About That '33 Program"

By Leon R. Harris, Secretary The National Federation of Colored Farmers, Inc.

Happy New Year! I sincerely hope it will be a happy one for all of us and am wondering just what we should first do ourselves to try to make it a happy one. First, let's pray,—and next, let's go to work. The first work to do is to build a program for the entire year.

It will take more thought and effort to build a program than to build a chicken house or a pig pen. The first thing to do is to take stock. Where are you? Do you have to move? Will it pay you to move or to stay where you are? Can you move? You may be so deep in debt to your landlord that you can't get away. These questions you must answer for yourself. If you have a good, reasonable landlord who will give you a favorable contract, you had better stay where you are unless you know you can find a better one. If you can arrange to purchase a farm and home, by all means do that. If you can rent a place this year with the privelege of contracting to buy after the year's crops are harvested, I believe you should do that. No matter what condition you are in now, ownership of a farm and home should be your goal. Always keep that one thin in mind. If you are in debt to your landlord and things look dark and gloomy, and you can't move or help yourself even though you want to do it, I suggest that you do this:—Go to your landlord like a man and ask him how much you owe him unless you already know. But get his statement of your indebtedness if you possibly can. Then do this:—Tell him that everybody has had it hard the past three years and that most all creditors are reducing debts due them: that if he will reduce yours to a reasonable figure you will work your head off this year to pay him and get clear of debt. If he is a reasonable man, he will appreciate your promise and sincerity and will give you this favor. Its worth asking for anyway and you never know what you can get till you ask for it. If you are a farm owner you are lucky and your program will not be so hard to build.

Then you must think about the material for your program. How about your food supply? How much money have you on hand? How much will you have to borrow? How large an acreage can you cultivate well? So often, when thinking about this last mentioned question, we bit off more than we can chew. We put in too large a crop and on account of being unable to well cultivate, we get less out of it than we would have gotten had we planted less. If you have not a large food supply on hand for yourself and stock you will plan to start something growing just as early as possible. If you have a good winter garden you can eat pretty well now. I want to remind you right here that the old hen is a big help to any farm family. Eggs are going to sell well for the next six months. Probably longer. Keep your laying hens and feed them so they will lay more. Hatch out some early chickens. Be a two-cow family. There is more sense in being a two-cow farmer than a two-ford farmer. A farmer who knows the value of a cow, sow, hen and garden is a modern farmer. He is bound to win. He has learned the big lesson of feeding himself off his land instead of out of the grocery store or commissary.

You will have an opportunity to borrow again this year from the government but I want to warn you now that you should not borrow a penny more than you just must have. Settling time is bound to come. The less you borrow the less you will have to repay. Don't borrow blindly. Know what you are doing and what you are signing. Don't agree to pay anyone or any institution a "robbing rate" of interest. Find out from your organization how much you should pay.

When building your program remember that a year is twelve months long and is tied on to another year that is coming, so be sure and plan so you will be better off at the beginning of next year than you are now. No matter whether you are a farm owner, tenant, sharecropper or farm hand, you should belong to a farmer's organization in your community and get your share of the many benefits of organization. Purchase your needed supplies cooperatively, that you may be able to save as much as possible. Join the effort made to practice cooperative production or start the effort yourself. This farming business is not a one-man business any longer. No matter how well you are succeeding, you can do still better if you will come out of your shell and work with your brethren.

To the Modern Farmer, 447 Fourth Avenue, North, Nashville, Tenn. —Dear Editor:— This is my method of coming before this great national body of colored farmers to say a word about The Modern Farmer. Just at this time I am lost for words to say, only it has been the ideal Negro paper to read. Dear readers, all that I could think to say or tongue could express would not be sufficient to render proper praise to the worthy paper I can truthfully say that since 1930 it has been the Guiding Star for the Negro in the south land. Too, I can say that it has taught the first lessons in economy— how to save— how to live together, how to cooperate one with another. It has taught them how to sell and buy. It has also stood by every dangerous zone, a shining light and a notice at every pitfall; such has been before. The Modern Farmer has brought more Negroes together cooperatively than any other paper in the world. It has been our spy glass. Now, dear readers, in every organization there is always an organ which is a live wire to publish the activities. Dear readers, do not forget your leader. The people claim that the world is suffering from want of true leadership, but the true leaders are suffering for true followers. I can truthfully say that since this great light has been shining through the south there has been more corn, peas and potatoes. The gardens have been much better than ever before in the world's history, and there have been more hogs to kill Dear readers, we are reading of much depression and oppression existing among the people. Were it not for The Modern Farmer and its guiding light it would be at least fifty per cent worse. Dear subscribers, will you suffer this Modern Mile Board to be destroyed or taken down, or its light to be blown out? The publication is worth more than tongues can tell. Will you release the cost the expense that it takes to publish this wonderful Modern Farmer to every subscriber and to all concerned? The distance is too far, the journey is too long without having some sign board to guide you. See The Modern Farmer as your Way Bill to success. Dear readers, too much praise cannot be given to Mr. James P. Davis, as organizer of The National Federation of Colored Farmers, who has laid the foundation of a bridge across the River of Difficulty. He has proven to be a faithful and worthy servant of his race group. He has placed his life on the altar for our success. I still say that the world has never had a man with such an outstanding character one who has been placed in a contest by the people; yet he has proven himself to be a true leader. This is my plea, above all things renew your subscription to The Modern Farmer, 447 Fourth Avenue, North, Nashville, Tennessee.

Best wishes to The National Federation of Colored Farmers.

Fom your friend.

H. H. Ingram,

Agent of Holly Unit, Cruger, Miss.

BAD SOIL CAN BE IMPROVE TO GET HEAVIER YIELDS

Soil conditions are a regulating factor in the success of a garden. Fortunately they can be controlled to a great extent. They can be regulated to texture and fertility if given proper attention. They can also be regulated in a large measure as to drainage. Drainage can be provided where the soil is not well drained. A more difficult problem is that of checking drainage where the subsoil is sand of great depth such as is found in gardens in some sections.

Study soil conditions and take measures each year to improve its quality. In a few seasons it will be brought to proper tilth. Humus is the great curative to break up heavy soils and make light, sandy soils more moisture retentive. It is the great ameliorator of clay and sandy soils. It is also needed to replenish losses from plant growth in soil of ideal quality and tilth.

In the olden days, it was readily supplied in the form of stable manure spaded or plowed in each year, the most practical means of keeping soils up to grade. Now that is practically impossible for the majority of gardeners. The substitute is the home-made compost heap, made by stacking up waste vegetable matter, such as lawn clippings, autumn leaves, weeds pulled from the garden and old vegetable and flower tops, wetting them down to decay and then spading them in the decaying matter. This decay is hastened and made possible in the course of one season by chemical compounds generally sold.

Heavy clay soils are one of the most difficult problems. One of the quickest means of starting to reduced them to good tilth is working torpedo sand into them in combination with humus; and liming the soil also helps to hasten the breaking up of clay. Clay soils should not be worked while they are sticky wet. It seems to make them lumpier and more impossiblo for garden purposes.

Light sandy soils are benefited by working clay and humus into them. They require attention in this regard for several seasons. They must be dug deeply and unless the slop of the ground provides natural drainage, the main hope of getting them into really first class shape is under drainage. However, they can be worked into condition to grow good vegetables or flowers without this expensive work. Study soil needs now and be prepared to build it up when you start garden operations this spring. Good soil is the first requisite of a good garden.

DR. THOMPSON IN FINE ADDRESS TO CROWD

Birmingham, Ala., Nov. 25—Measuring up to the most sanguine expectations of the members and friends of the Sixteenth Street Baptist Church, and the public generally, Dr. D. F. Thompson, formerly of Augusta, Georgia, and newly elected pastor of the Sixteenth St. Church, speaking from the subject, "The Twelfth Man," arrayed himself in honor, to the delight of his hearers, last Sunday morning at 1 o'clock when he preached what might be termed his inaugural sermon to an audience that filled the main auditorium of the church.

BOSTON, NEW FAMILIES EAT GENESEO POULTRY

City's Two Produce Concerns Ship More Than Million Pounds a Year

HIGH PRICES COMMANDED

Producers of Locality Paid $500,000 Annually; Rush Season Ending

(*) EDITOR'S NOTE—The following article shows what co-operative production can accomplish and should be of much interest to colored farmers. This little community is no larger than many in the South where thousands of Negro farmers live. But where is the colored farm community that produces half a million dollars worth of chickens a year to market co-operatively? But this can be, and is done right in little Geneseo. Wake up, colored farmers. You can do it too!

By Kenneth H. Smith
(Moline Dispatch)

Geneseo—"Thousands of families in Boston and New York are celebrating Christmas today by gathering about dinners whose main courses are chickens which were raised on farms in the vicinity of Geneseo. From this little city, in the heart of the corn belt, more than a million pounds of dressed poultry is shipped each year to the center of culture in the east, Boston, and to the world's largest city, New York.

"At the beginning of this century less than 100,000 pounds of dressed poultry was marketed from Geneseo; now two concerns have a combined business of ten times that amount.

The poultry business gives employment to about forty men in Geneseo during the rush season, which lasts from September until January. During the rest of the year about ten men are employed to handle eggs and poultry. Some of the pickers who work at top speed are able to make from $50 o $60 a week, receiving a few cents for each bird they dress. About twenty-five pickers are employed by the two concerns.

Topping the Market

High quality produce from Geneseo enables the poultry shippers here to command top prices in the New York and Boston markets. Geneseo's two concerns, the Geneseo Produce company, managed by J. Otis Ogden, and the J. J. Weaver company, managed by Elmer Grossenburg, are able to pay farmers prices which often are higher than those quoted in the Chicago market, due to the fact that their methods of feeding, grading and packing allow the dressed hens and spring chickens to bring fancy prices in the east. Much of the poultry produced within a radius of twenty miles or more of Geneseo is marketed here. In general, the concerns here handle spring chickens weighing from 3 1-2 to more than 6 pounds, hens, which have passed the peak of their egg production, and year-old cockerels.

It is most profitable, they say, for producers to keep springers until they will dress 5 pounds or more, as the larger birds command higher prices. They advise, too, a heavy breed of poultry, which will gain rapidly in proportion to the amount of food it consumes. The shippers advise, however, against the practice of taking springers which have been allowed to run on the range, housing them in close quarters and feeding them grain, expecting to fatten them.

Many times such a practice will result in the fowls becoming foundered. The grain may gorge in their crops, causing them to lose weight, rather than to gain.

Buttermilk Forcing.

Intensive feeding in the poultry gathering centers extends over a period of from ten days to two weeks, or even less. The best of ground feeds are mixed with buttermilk, to a thick consistency. Such a mixture will not cause digestive disorders as will grain. A ground mixture containing oats, corn, linseed oil, low-grade flour, charcoal, meat scraps and salt is used. This is mixed with buttermilk and fed in troughs, six or ten time a day, or as often as is necessary to keep constant supply in the feeding troughs. Buttermilk is secured from creameries in Peoria and Davenport. It comes in 50-pound containers, in a condensed form. More than 150 barrels of buttermilk are used by the concerns each year.

According to experts, a milk-fed springer is far superior in flavor and quality to an ordinary range-fed bird. The shippers emphasize the fact, too, that fancy birds are as easy to rear as are culls, and the beter qualiy birds command relatively higher prices.

$500,000 a Year.

Each of the firms in Geneseo pays to producers in this locality about $250,000 annually, for poultry, eggs, and cream—a business of half a million dollars each year. Necessarily conducting such a large business entails expenses besides the purchase price of the produce. As an example, each of the firms spends about $5000 each year for lumber and lining-paper used in preparing the boxes in which the poultry is shipped.

During the late fall and early winter months about 2500 birds are dressed each day in each of the plants in Geneseo. About thirty carloads of poultry are shipped from Geneseo each year.

Off Come the Feathers!

The picking operations are interesting. When the birds have been fed the required period of time, they are brought to the plucking rooms, where they are hung on racks. They are killed and bled, and thereafter are dipped into a vat of water, the temperature of which is not allowed to vary from 128 degrees Fahrenheit. They are kept in the water exactly 25 seconds, and then are ready for the pickers. This system of scalding was worked out after much experimenting.

Formerly, all birds were plucked without scalding. However, it was decided that an improvement could be made, and the "slack scald" method was worked out. The water is not hot enough to burn and redden the flesh, but it is hot enough to loosen the feathers.

After the feathers are rapidly but efficiently and fully removed, the birds' heads are wrapped in paper, the birds are graded, and then they are placed on racks to be taken into the refrigerator rooms, where they are kept a temperature slightly lower than freezing until enough are on hand to fill a car.

The predominating breed of chicken in this locality seems to be the Buff Orpington, with White Rocks and Barred Rocks following in the order named. The Buff Orpingtons and the White Rocks are good layers, and both make the finest kind of spring chickens. The Barred Rock was the most popular variety thirty years ago, but it has deteriorated in quality partly through in-breeding, and is now losing its prestige in this locality.

THE FRIENDLY HAND

When a man ain't got a penny,
And he's feeling kinda blue,
And the clouds hang dark and heavy
And won't let the sunshine thru,
It's a great thing, O my brethren,
For a feller just to lay
His hand upon your shoulder
In a friendly sort o' way.

—James Whitcomb Riley.

NEW COMMANDMENTS FOR MARRIED COUPLES

The honorary chamberlain of Pope Pius, head of the Roman Catholic Church, has issued the following commandments, which he says every married couple should follow if they desire peace and happiness in the home. Ten were laid down for the wife and seven for the husband and are as follows:

For the Husband:

1. Thou shalt show thy wife today the same courtesy thou showed her the day of thy wedding.
2. Thou shalt express, by word or gesture, thy approval for the dinner that is brought before thee, since it did not come to the table by itself.
3. Thou shalt remember thy wife, consult her about thy problems, speak to her of thy work.
4. Thou shalt always avoid the appearance of evil, observing the same conduct thou believest reasonable for thy wife.
5. Thou shalt not lie about thy income, because God deems the man culpable who keeps his wife in the dark about domestic finances.
6. Thou shalt remember the birthday of thy wife and of thy children, and thy wedding anniversary.
7. Thou shalt not indulge in heated arguments with thy wife, since thou well knowest that the woman has the last word.

For the Wife:

1. Thou shalt not speak eternally. Thy husband must also be listened to.
2. Thou shalt lovingly prepare good food and keep thy house in order.
3. Thou shalt not embarrass thy husband in business.
4. Thou shalt not amuse thyself spreading unfounded gossip about thy neighbors.
5. Thou shalt not boast of thy husband before other men, but respect him silently.
6. When it is necessary to reprove him thou shalt do it immediately and then forget it.
7. Thou shalt be patient over thy husband's defects, and occasionally exalt his good qualities.
8. Thou shalt not make of thy husband a housemaid.
9. Thou shalt not give all thy thought to clothes, since thy first duty is to thy house.
10. Thou shalt remember that sometimes it is good for thy husband to be alone. On these occasions thou absolutely shalt not disturb him.

OHIO PLANNING TO CROSS WILD RABBITS AND HARES

The democratic cottontail, here of Uncle Remus tales, chief distributor of the lucky left hind feet and familiar creature in most states, will take on a swankier appearance and leap with a superior aid in Ohio after a few years, if the new conservation commissioner, William H. Reinhart, succeeds in carrying out a plan which he recently disclosed to the American Game association.

The new commissioner has recommended the establishment of a "super-game" ranch in Ohio. The proposed ranch would produce for liberation in the wild larger and better cottontails by crossing the native rabbit with Belgian hares. The ranch would also produce gray raccoons, a type which Mr. Reinhart believes would improve the native variety.

A strictly managed game refuge in every county, on which desirable species would be protected from predatory killers, and a new fish-protection system, under which a third of the streams of the state would be closed alternately to fishing every year, are other plans recommended by Mr. Reinhart.

BOYLE, MISSISSIPPI UNIT

Thanksgiving exercises were held by the Boyle, Mississippi Unit during the month of November. This entertainment was fairly well attended, although Mrs. Jerusha E. Wilson, who reported a donation of $1.00 raised for The Modern Farmer, said the weather was very bad, as it rained practically all day.

This Unit sent the donation directly to James P. Davis, the president of the National Federation. He in turn forwarded it to The Modern Farmer, and the paper wishes to make this public acknowledgement to the Boyle, Mississippi Unit.

MORE YANKS NEEDED

Tucson Citizen: Now that Russia has Yankee-built factories, she could build a lot of trucks and tractors if she had Yankee mechanics.

New York Herald-Tribune: Mrs. James Roosevelt is one of six women who have lived to see their sons elected president. The others are Mary Ball Washington, Jane Knox Polk, Hanna Simpson Grant, Eliza Ballou Garfield and Nancy Allison McKinley.

WHEN RURAL AND URBAN MERGE

Women's Organizations

Written for The Christian Science Monitor

A few weeks ago we promised to outline in this column some of the problems which appear in the lives of rural women that may be solved in a satisfactory manner by the intelligent cooperation of urban women, and, incidentally, to the lasting benefit of women who are living in the larger centers.

Mrs. Leslie Sommer, a rural woman of Wyoming, said in a recent address at a Club Institute in her state, as reported in the Wyoming Clubwoman, that it is almost impossible to express in a few words what the Federation of Women's Clubs means to the rural club woman.

It used to be that when we thought of the rural woman we imagined a hard working, rather unimaginative woman, with no apparent interests outside the boundaries of her own home. Of course, she had her dreams, but they were usually submerged in the greater tasks of her family duties. However, with the advent of the women's clubs, and the affiliation of the smaller clubs to the federation, we have found her to be anything but the unimaginative person we had pictured.

"Pretty Much Alike"

One of the things that the rural woman has learned from her contacts with club leaders is that all women, whether their homes happen to be in large or small communities, have common interests, and that, after all, they are "pretty much alike." Mrs. Sommer tells of a well-known club leader visiting a rural club and giving a stirring address which inspired all of her hearers, and left them a bit awed, and then, "ten minutes later, she was just a neighbor lady, very much interested in the wedding-ring quilt our hostess had on her bed."

We are asked to stop and remember how many of the distinguished heads of organizations, research, workers, and writers of ability, had their roots taken from rural foundations, owing much of their success to the homely philosophy of those who work with nature.

And so it is a mutual benefit, this mingling of rural and urban women, in club conventions and activities. The rural woman is receiving a new desire and inspiration through the personal touch of her sisters, and the federation is learning a great deal from the deep thinking, steady minds of its rural members.

Marketing

Marketing is one of the problems of rural women which is being eased and greatly helped through the cooperation of urban women. It is not unusual to hear the notice given in large clubs of a new market for goods which women are always eager to purchase fresh and reliable. "Women Scouts" are continually hearing of places where hooked rugs, fresh vegetables, good cooking, and other commodities may be procured and are passing on the news to others who welcome it.

One woman in a small town said recently, "We don't need a cooperative marketing scheme in this town so much as we used to before the Federation of Women's Clubs held its convention here; the women who attended that meeting saw for themselves what we have here and are buying all that we can produce."

The educational program in rural districts is sometimes a difficult one, It always seems as though the abandoning of a small rural school and sending the pupils to the larger grade school at some distance was in the line of progress, but it has not always proved to be so. It would help if women could acquaint themselves with all the conditions of transportation and distance and vote intelligently when the question is before the school authorities.

Recreational programs in rural communities may be stimulated and real progress may be made if the conditions are studied by rural and urban women, together. In some small places there is, at present, a discussion of eliminating such important things as community drama, musical instruction in the schools, supervised summer recreational facilities, and other factors that make rural life today so happy and progressive. A little intelligent persuasion on the part of organized women can, in many instances, induce the "powers that be" to retrench their financial program along other lines. It needs only a "long pull and a strong pull all together."

AN INJURED MAN'S NEIGHBORS SHUCK 7,000 BUSHELS OF CORN

Bloomington, Ill.—Seven thousand bushels of corn were stored away Saturday and today in a crib at the Raymond Atterberry farm near Armington by more than 200 neighbors and friends. The small army of good hearted persons gathered at the Atterberry place and shucked the entire corn crop. About four weeks ago Mr. Atterberry was kicked in the head by a horse and his skull was fractured. Until recently he had been a patient in a Lincoln hospital.

SHELBY, MISSISSIPPI UNIT DONATES

Among the donations coming in to The Modern Farmer as a result of the Thanksgiving services held by the various Units at the suggestion of President James P. Davis, was $2.00 sent in by Mr. A. E. McWane who lives on R. No 2, Box 103, Shelby, Miss In his letter to The Modern Farmer he said: "The Magnolia Unit located here in Shelby, Miss., is sending $2.00 as a donation to our newspaper, The Modern Farmer. We were instructed to do what we could by President James P. Davis, of the National Federation, to assist this publication that has been so instrumental in helping to build our organization.

"Nothing is more pleasing to our Unit than to comply with this request, and to help in this laudable movement. The weather was very bad on Thanksgiving Day, but we had a splendid program and a very good attendance, thus we raised this $2.00.

SIDON, MISSISSIPPI MAKES DONATION

Mt. Carmel Unit of the Mississippi State organization belonging to the National Federation of Colored Farmers sent $2.00 as a donation to the Modern Farmer from its festival giving during Thanksgiving. Mr. A. D. Banks, an influential farmer and prominnet member of the organization, sent the contribution in. This newspaper acknowledged the receipt of the donation.

GREELYVILLE UNIT'S DONATION

From over in Greelyville, South Carolina, the Unit that is a member of the National Federation of Colored Farmers remembered the Modern Farmer in its Thanksgiving Festival. They sent a donation of $1.25 to help this publication to balance its budget for the year. The money was forwarded to headqquarters by Mr. John Dukes, a member of the organization.

LAMBERT, MISSISSIPPI UNIT

There comes from the Lambert Unit of the National Federation of Colored Farmers, down in Mississippi, a contribution of $5.40 to the Modern Farmer. It was sent in by Mr. John Howard, Chairman, and Mr. Ben Houston, Secretary. This contribution is what was raised at the Thanksgiving Day services through the recommendation of the President of the National Federation of Colored Farmers to help the official organ of this Association to continue its publication and as a further appreciation for the splendid work the newspaper has been able to do for the farmers of the nation.

SHEEP IN WALSH DRIVE

Twenty-five thousand sheep were gathered recently in the biggest drive of the Walsh mountains. They came from the entire Migneint mountain range of north Wales, combining three counties. The sheep were assembled for the second annual dip of the season. During the day the entire range was alive with dogs, sheep and shepherds.

Join Our Dollar Per Week Savings Club Now Open

Every Citizen Is invited to Cooperate in a Definite Movement Where they Themselves will be the Recipients of all the Benefits Both Principal and Interest

Send $1.00 every week to the Citizens Savings Bank and Trust Company, at Nashville, Tennessee, either in cash or post office money order, or you may send your personal check, if it is certified. This will open a savings account on which we pay interest twice a year. It will make you a member of our "Save a Dollar a week Club." Every member of the club, who qualifies by sending the regular amount, will receive special recognition and an acknowledgement of their remittance when it arrives. You can deposit more than $1.00 per week if it is convenient. No matter where you live, in the United States, Canada or Mexico you can take out membership in this savings plan. The Citizens Savings Bank has been operating for twenty-seven years. Its capital is fully paid. Its officers and directors represent men and women who are nationally known. "Procrastination is the thief of time," so do not wait. Open your savings account at once.

MR. JAMES FORTSON'S DONATION

Among the contributions received from Units that are a part of State Federation that make up The National Federation of Colored Farmers, there came $2.00 from Mr. Jas. Fortson of Egypt, Mississippi. His report as well as his letter says that this amount was realized from Thanksgiving Day Festival, given by his Unit in the interest of The Modern Farmer's continuance and publication.

Mr. Fortson expresses much satisfaction over the progress that his local Unit is making down in Egypt.

THE TEST OF A MAN

The place to take the true measure of a man is not the forum or the field, not the market-place or the Amen corner, but at his own fireside. There he lays aside his mask and you may judge whether he is imp or angel, king or cur, hero or humbug. I care not what the world says of him, whether it crown him with bay, or pelt him with bad eggs; I care never a copper what his reputation or may be; if his babes dread his home-coming and his better half has to swallow her heart every time she has to ask him for a five-dollar bill, he's a fraud of the first water, even though he prays night and morn till he's black in the face, howls hallelujah till he shakes t he eternal hills. But if his children rush to the front gate to greet him, and love's own sunshine illuminates the face of his wife when she hears his footfall, you may take it for granted that he is true gold, for his home's a heaven and the humbug never gets that near the great white throne of God. I can forgive much in the fellow mortal who would rather make men swear than women weep; who would rather have the hate of the whole he-world than the contempt of his wife; who would rather call anger to the eyes of a King than fear to the face of a child.

—William Cowper Brann.

More than five times as many bananas were exported from the French West Indies in the first eight months of this year as in the same period of 1931.

GRAPE PRUNING NOT A DIFFICULT TASK

Geneva, N. Y.—Grape pruning is much less complicated than the pruning of fruit trees, once a few fundamental principles are mastered, says Prof. F. E. Gladwin, grape specialist at the State Experiment Station at Geneva, who has prepared a brief account of how to prune and train grapes. Even the inexperienced can learn how to prune grapes in a few lessons, either from word of mouth or from printed directions, declares this authority. A copy of Prof. Gladwin's circular entitled "Grape Pruning" may be obtained free of charge by addressing a post card to the station at Geneva.

"The grape is pruned to limit or increase the quanity of the crop, and this is pruning proper," says Prof. Gladwin. "Grapes are also pruned to make well proportioned plants with the parts so disposed that the vines are to the highest degree manageable in the vineyard. This is training. Grape growers usually speak of both operations as 'pruning,' but it is well to keep in mind that the two have different objectives."

Winter pruning is advocated, although it is stated that pruning can be done without danger of injuring the vines at any time after the leaves drop in the fall until the buds swell in the spring, providing the wood is not actually frozen at the time. Pruning should be delayed until after a heavy freeze in the fall so that immature wood will be killed and withered and can thus be easily identified and removed, it is said.

Following general directions on pruning and on the construction and care of the trellis, Prof. Gladwin goes into some detail on methods of training grapes in the eastern United States. The four methods commonly used in this state are described and illustrated, including the Chautauqua, the Keuka High Renewal, the Single-stem Four-cane Kniffen, and the Umbrella Kniffen systems.

COMMANDMENTS NOT DEAD

(From the Hamilton Spectator, Ontario, Canada)

In a recent address to Girl Guides of New York, Bishop Manning uttered the following words that should be broadcast through every similar organization on the continent. "We Christians are not to be moral weaklings, blown about by every wind of thought and opinion. We are to guide the currents of thought and opinion by the teachings of Jesus Christ. God has not given us the spirit of fear, but of power, and courage, and moral strength. We are to love all that is good, and wholesome, and beautiful in life. We are to have our good times....But we are to judge clearly between the true and false, between that which is clean and pure and that which is vulgar and degrading. Never give your support to those who make money and seek popularity by sneering at moral ideals and standards. There are writers and teachers today trying to tell us that there is no longer any code of morals binding upon us, any clear standard of right and wrong, or any law of God to guide our lives. That false and atheistic teaching has many followers today, but it must be utterly condemned by all of us who care for the life of our country, and by all who believe in Christ and in God.

"The law of God does not change. Murder, theft, lying and adultery are sins against God and against human life, no matter what our clever and immoral novelists, and playwrights, and professors of psychology may choose to say. All history show us that the rejection of God's law brings to the individual or the nation degradation, destruction, misery, and death. Against the false and immoral teachings that we are hearing today our Girl Scouts, and all our young people, are called to bear witness for purity, for duty, and for God."

TELLS HOW TO RID BEANS OF WEEVILS

Indianapolis, Ind.—Simple treatments now are available to destroy weevils infesting beans and to prevent uninfested beans from becoming infested, according to J. J. Davis, head of the entomology department of Purdue University.

"There are only tow satisfactory treatments for seed supposed or known to be infested," he said, "namely fumigation with carbon bisulphid or killing by heat. The latter is satisfactory where the necessary heating facilities are available, thus small quantities can be treated in an oven or in some seed establishments where facilities are available for treating with heat on a large scale. To be effective the treatment should be continued for several hours at a temperature of 120 to 145 degrees.

"Fumigation with carbon bisulphid is the standard remedy. The seed should be placed in a container which should be gas tight throughout or at least at the bottom and sides. A water-tight barrell, wash boiler, garbage can or a substantial box which has been lined with heavy paper, the latter being well glued to the box, makes a good fumigator. Having placed the seed, carbon bisulphid is sprinkled over the seed, using it at the rate of one pound to each 100 cubic feet of space. If a large lot is being fumigated, rapid and thorough distribution of the fumes is obtained by saturatng a sack or cloth of some kind which is then pushed down into the seed. After applying the bisulphid, the container should be tightly covered with a lid or a heavy blanket or tarpaulin.

"Fumigation never should be attempted when the temperature is below 60 degsees and to get the best results the temperature should be 75 degrees or above. No fire should be brought near at any stage of the procedings. If beans are treated with air-slaked lime when they are harvested, and put away for storage, futher development of bean weevils can be prevented."

STEEL-LIKE GLASS TESTED

Glass which neither splinters nor breaks has been produced in Germany. In tests made recently three adults used a long narrow sheet as a seesaw. The glass shows an elasticity similar to that of highly flexible steel. A heavy steel ball dropped from a height of ten feet left no impression. The glass is produced by special heating process. Railway and automobile officials are interested in the product.

KENNEL GOSSIP

Terrier: "How did Scottie know where you hid your bones?"

Hound: "I must have barked in my sleep!"

PROPER CARE MOST SATISFACTORY WAY TO ENJOY FLOWERS

No chemical has been found that will directly preserve cutflowers, although much has been said about the use of chemicals for this purpose, it is reported by H. B. Dorner, chief in floriculture at the University of Illinois.

There are, however, several simple rules which, if followed, will do much to lengthen the life of cutflowers, garden flowers as well as those grown under glass, he said.

"With the supply of outdoor flowers now cut off by frosts, one is even more anxious than ever to preserve, as long as possible, those flowers that must be bought or are presented. When cutflowers are received, the first step in their care is to clip off a short section from the base of the stems to give a fresh surface to aid in absorbing water. This clipping should be done under water so that no air may enter the stem and prevent the absorption of water. The flowers may then be arranged in vases or other receptacles, but this should be done without allowing the stems to become dry.

"Cutflowers should not be placed in a draft nor close to a heater. In either case there is much danger of increasing the loss of water from the flowers and foliage to the point where it is greater than the intake through the cut end of the stem. This will cause the flowers to wilt. Wilted flowers usually may be revived by again clipping the stems under water. Wilting is likely to be greater with those cut flowers having more or less woody stems, such as chrysanthemums, roses and lilacs.

"Each day the flowers should be removed from the vases, the stems washed off, the stems clipped and the flowers again replaced in the vases but in fresh water. This is to prevent as much as possible the development of bacteria which attack the submerged stems and leaves and cause them to rot. Whatever benefit there may be from the use of chemicals in the water comes from checking the development of those organisms which cause the rotting.

"Another aid in lengthening the life of cutflowers is to remove them at night to a cool place but not where they will be in a draft or where they will freeze. This seems to give them an opportunity to recover so that they can be enjoyed longer."

In the project to put men back on the land in New Zealand small farms, each with a four-room cottage, are being supplied to worthy applicants, who are paid $5 a week until they can make a living off the place.

A quart of oil will cover a water surface two acres in area?

OF INTEREST TO THE HOUSEWIFE

If sugar gets lumpy store it in the bread box.

* * *

To cool a dish quickly set it in a pan of cold salt water.

* * *

A few whole cloves in the kettle of fat give doughnuts a nice flavor.

* * *

Cook cauliflower, cabbage or onions in half milk and half water to retain white color.

* * *

Serve frozen canned grapejuice cubes in iced tea or fruit drinks to lend a new flavor.

* * *

To clean zinc, wet a cloth with kerosene and wipe it off. This is an easy way, as it removes all the grease and spots.

* * *

Add two tablespoonfuls of chili sauce to mayonnaise and use for dressing for lettuce or other vegetable salads.

* * *

Feathers will not fly around if a piece of damp cheesecloth is spread under bird cage when cleaning. They will cling to cloth.

* * *

Nests of measuring cups as well as measuring spoons will help the home maker be accurate in recipe measurements. They particularly simplify measure shortening.

FIRST CHRISTIANS IN NEW YORK

Many nights I have stood at my washtub all night, from six in the morning until six the next morning, and so at my ironing table, night and day. I would get so sleepy I could hardly stand on my feet until the first deep sleep would pass off, then I would work on till daylight with perfect ease.

—Amanda Smith's Own Story, Christmas, 1862.

A wild cattle herd has been in Chillingham Park, England, for at least 700 years?

The National Federation of Colored Farmers is receiving hundreds of letters from Colored farmers requesting all kinds of aid and information. We are willing to do everything we can for all the Colored farmers of America. It costs money, however, to maintain offices and our expenses are becoming so heavy that we are compelled to discontinue supplying information to those who request it who are not members of the Federation. If you have faith enough in the organization to believe that it can aid you, then you should be willing to join it and help support it. Isn't that so?

Several County Units have organized and elected officers but have not sent in their membership dues. These units are not eligible to Membership in the Federation until dues are paid. Be helpful. Co-operate. Pay up. "All for each and each for all."

Application for Membership

NATIONAL FEDERATION OF COLORED FARMERS (Inc.)

Vincennes Hotel, Chicago

As a farmer, I believe the time has arrived when the Colored Farmers should form a National Organization devoted to diversified production, grading, packing, shipping and marketing of farm products and to the purchase of needed farm supplies through co-operative methods, to the end that a more prosperous financial condition may result from their efforts as producers.
I hereby subscribe $5.00 for membership in the National Federation of Colored Farmers for a period of 12 months from date. Also $1.00 for an Annual Subscription to the Modern Farmer.

ROOSEVELT IS IN GOOD CONDITION, SAYS CLENDENING

Kansas City, Mo.—Illness in all probability has made President-elect Franklin D. Roosevelt a keener, more vigorous man mentally. Such is the opinion of Dr. Logan Clendening, noted writer on medical subjects.

"Fears which have been expressed that the president-elect's physical infirmities would be instrumental in causing a physical breakdown under the strenuous duties of the presidency are unfounded," Dr. Clendening says.

"Quite the opposite is the case. Governor Roosevelt's general health has been strengthened by the care he has taken of himself and he is better fit than the majority of men to stand up under the burdens of the presidency.

"When Governor Roosevelt was stricken with infantile paralysis in August, 1921, the affliction probably became a positive advantage to him as a statesman," Dr. Clendening adds. "He had more opportunity to sit quietly and study problems of government—a course which he followed relentlessly.

Life Span May Be Longer

"And his life may be prolonged beyond the average man's—for he has been prevented from over-exercising, a tendency dangerous with middle-aged men.

"Furthermore, psychologists now say that when a man has a disability of some kind his other faculties are stimulated to compensate. This may prove to be as much to his advantage as was the speech defect of Demosthenes. The Greek, orator, it will be recalled, had to overcome a peech defect by speaking with pebbles in his mouth. So thoroughly did Demosthenes overcome his defect that he became the greatest orator of all.

"It should be borne in mind that the disease from which Governor Roosevelt is suffering affects only a few cells in the spinal cord and does not involve the brain in any way, nor the blood vessels or blood pressure, nor anything of that kind in the affected legs.

General Health Not Affected

"The general health is not affected. He is not suffering from a disease progressive in character. Few men could have stood the campaign as well as the president-elect. He is a man of vigorous health.

"Governor Roosevelt goes to Warm Springs, Ga., for a treatment that is widely recommended—exercises under water. The water at Warm Springs is said to possess certain beneficial qualities.

"By such exercises, the president-elect develops the affected leg muscles.

"Another man in public life similarly afflicted, who performed strenuous duties, is Philip Snowden, of England. Although paralyzed in his legs, he carried on as chancellor of the exchequer through years that tried men's souls.

"And his brilliant mind may yet rescue England from her financial troubles.

"Sir Walter Scott was another notable man afflicted with infantile paralysis. Following a childhood illness, he was lame in one foot. He reached great heights of mentality during his long life.

A horse in Cleveland Ohio, it is reported, went through town without a driver, keeping to its own side of the street, stopping for red lights and proceeding when they flashed green, and did not break a single traffic ordinance. A similar display of horse sense on the part of many motorists would make the streets and highways much safer.
—Christian Science Monitor.

WHY THEY COMPLAIN

Quincy Herald-Wing: During the World War a wagon load of corn would bring the farmer around $75 or $80. Two or three loads would pay the taxes on the average-sized farm.

Four years ago a smilar load would bring around $20 and it would take ten or twelve loads to pay the taxes.

But wagonloads of corn today have been ruinously deflated. One hauled to market at Horton, Kas., recently brought the owner exactly $5.23, at which price it would take thirty or forty loads of corn to pay the taxes on the land that produced it. If fed into hogs there would be little more profit in it.

This is the chief reason why the farmer complains. He stood the chance to become prosperous in the years following the war but the deflation of 1921 ruined his hopes. He was the first to feel the decline in commodity prices and it has been continuing with him since. Wages were not deflated to any extent until the depression set in, three years ago.

About the only consolation the farmer has is that he has enough to eat. What he has to buy is purchased dearly, using his corn as the measure of value.

BOY SAVES MAIMED DOG

Fourteen-year-old Peter Burns risked his life in a blazing barn at Lisfree, Ireland, to save his little maimed terrior. The pet was in a bed of straw when the fire started at midnight. The boy rushed through the flames, tore among the burning straw to reach the dog, and carried it out. He was seriously burned on the head and face.

MYSTERY.

Cincinnati Enquirer: Another thing we can't understand is, how our grandparents managed to live to such a ripe old age without having started the day with a glass of orange juice.

UNCIVILIZED.

Atlanta Constitution: Heathens have their little faults, but they don't stage an orgy and then blame Providence for the headache.

Chicago News: It is easier to solve the beer problem on the stump than in the halls of legislation.

NEGRO HAS TEETH FILLED WITH GEMS

Edenton—Amidst the many strange things recently made public about this city is a Negro man with a diamond lined mouth who came here.

"Diamond Slim," as the strange character was called, was arrested here Sunday under suspicion.

"Diamond Slim" told police authorities when questioned that he got his million dollar set of teeth while he was in the army. This, being queer, added to the charges of suspicion.

With all of his front teeth removed, the gold teeth replacing them were set between what the Negro man claimed to be genuine diamonds, set in gold bridgework. Ten or fifteen of the precious stones composed the display of mouth jewelry.

FARM MORTGAGE PROBLEM

St. Louis Post-Dispatch: It is not the problem of foreign debts alone that will rise to plague the coming session of congress.

The domestic farm mortgage problem, totaling $9,500,000,000, will approximate in importance the inter-governmental debts, which total only $2,000,000,000 more.

The farm mortgage problem is one that concentrates in the great north central agricultural states. Iowa alone has almost 15 per cent of the total mortgage debt. Iowa, Illinois, and Nebraska have about one-third of it. The New England and mid-Atlantic states have a little more than 5 per cent, the Pacific and southern states about the same proportion. Almost 40 per cent of all farms in the United States are mortgaged. Two-thirds of the farm mortgage debt is in twelve north central states.

TO TREAT IRISH POTATO SCAB

Floyd Moon, county extension agent near Steamboat Springs, Colorado, says treat seed potatoes for scab before planting. He recommends the following:

Dissolve six ounces of corrosive sublimate in one quart of hydrochloric acid. Add this mixture to 25 gallons of water in a wooden container. Place the uncut potatoes in a wooden basket and dip for a period of five minutes. Remove and dry quickly. One batch of 25 gallons will be sufficient to dip 40 bushels of seed. This solution is poisonous and should be kept from human beings and livestock.

JUDEAN SHEPHERD TODAY

The shepherd still wears the same dress as in ancient days. His cloak is of sheepskin, one side for day and one for night. He carries his rod and staff; his bag is made of kid skins, where he carries his food; his milk is carried in a gourd.

The rod, "his weapon of defense," is made of strong oak formed from a straight young tree, the head being trimmed from the root end forming a large round handle. This is supposed to be the same kind of weapon David slew the Philistines with.

—BAGLEY, "My Trip Through the Holy Land.

BEYOND TOMORROW

There's a Road Beyond Tomorrow,
Where the skies are blue again!
There is hope to follow sorrow,
Just as sunshine follows rain.

And, altho the rain is falling
And the skies are gray, not blue,
On the Road Beyond Tomorrow
There are brighter days for you!
—Author Unknown.

NEW STANDARDS FOR COTTON WORKED OUT

Washington—Standards for upland cotton known as "extra white" to supersede and replace present standards for grades and colors of extra white cotton have been established by the Secretary of Agriculture and will become effective on August 10, 1933, it was announced today. These standards will replace the present standards which became effective August 1, 1930.

SHORT ITEMS

1932!

This summer a man was taken suddenly ill on a ship which was thirty miles out at sea and carried no doctor. What to do?

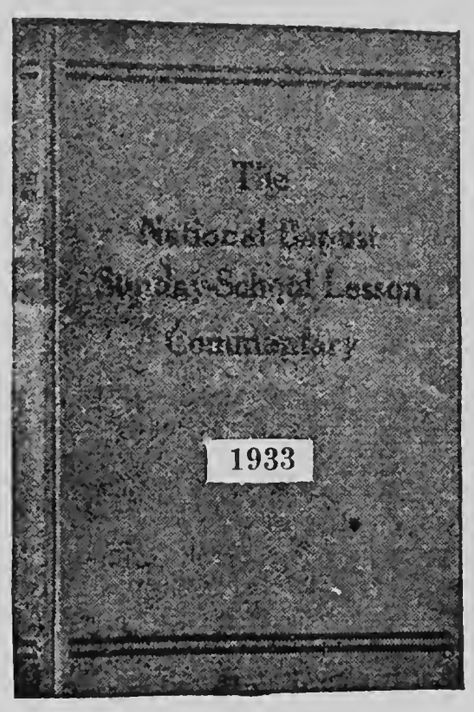
A few dots and dashes by radio and within thirty minutes a doctor arrived at the ship in a coast guard seaplane, and administered emergency treatment. Then he loaded the patient into the plane and flew to Philadelphia, where an ambulance whisked him to the hospital and recovery. The world surely do move.—Medical Pocket Quarterly.

PEAS DISCOVERED IN TOMB OF KING GROW IN SWEDEN

The story of the bean that sprouted and grew to produce more beans when it was planted after it had been buried for 500 years in an Aztec tomb in Arizona is completely over-shadowed by one that now comes from Stockholm, Sweden, says the Detroit News.

It is about a crop of peas grown from seeds that had been buried in the tomb of Tut-ankh-Amen in Egypt for 3000 years. Some of these peas, said to have been found by a Danish professor while he was taking part in the excavation of the tomb, were planted in Smaaland in 1930. Two seeds from this crop were given to C. G. Svensson in Romeby who is now raising a second crop of the peas in his garden. From the two seeds he first planted he obtained 202 peas.

R. E. Warwick, who owns a five-acre farm south of Tacoma, is raising five hills of beans from seeds, the progenitor of which, was the one taken from the Aztec tomb. These beans which were cultivated by Aztec farmers of five centuries ago are an unusual variety about eighteen times the size of a navy bean. They are known as the Giant Aztecs.



SUNDAY SCHOOL LESSON Commentary

For 1933

Every Sunday School Teacher Should Have It

SIX REASONS WHY YOU SHOULD USE IT:

First: It is the production of your own National Baptist Publishing Board which gives employment to more of our people than any similar concern in the United States.

Second: It is purely baptistic and orthodox in every particular.

Third: Its doctrines are unquestioned, and the Biblical requirements are stressed in a manner to make it absolutely dependable.

Fourth: None of the modern theories leading to skepticism are admitted.

Fifth: It aims to be true to the teachings of Jesus and whatever there is presented which has not the "Thus saith the Lord" is discarded as unsafe and destructive of the best interests of mankind.

Sixth: Thoroughly adapted to the uses of our Sunday school constituency, it stands as a beacon light to all those who would like to rise in the scale of intelligence and demonstrate the qualification necessary for the accomplishment of the "Great Work" devolving upon us as a people.

ORGANIZATION AND BUYING TOGETHER WILL PAY FARMERS

1,500,000 POUNDS OF MEATS CURED BY FARMERS

Louisiana State University College of Agriculture Reports Farmers Activities

"LIVE-AT-HOME" PROGRAM PRODUCES ENCOURAGING RESULTS IN LOUISIANA

Baton Rouge, Feb. 7—About 2,500,000 cans of foodstuffs have been placed on pantry shelves on Louisiana plantations this year, according to Dean J. G. Lee, Jr., of the L. S. U. college of agriculture. In addition, it is expected that 1,500,000 pounds of meat will have been added to the farm larders by the close of the season. All of the work has been done as part of the live-at-home program, which has been sponsored throughout the state by the L. S. U college of agriculture this year.

The farm meats work, begun under the direction of Prof. John B. Francioni, head of the L. S. U. animal industry department, has been carried on chiefly through the university division of agriculture extension with the aid of farm and home agents in the parishes. Men of this division who have especially aided in directing the work are W. T. Cobb, beef cattle specialist, and G. L. Burleson, assistant state agent in club work.

The work had its beginning, however, as far back as 1923, when Mr. Francioni went to the Iowa State college at Ames and took special work in farm meats. He came back to the university enthusiastic over the prospects of developing state-wide interest in the subject. He began by organizing the first class in farm meats ever offered to students of

Another Letter About Red Cross Relief

Brother Farmers:

Many of you have followed my suggestion and have written to the American Red Cross, Washington, D. C., informing them that you are in destitute circumstances. We have assurances that an investigation will be made, is now being made in fact, and we hope that by the time you read this you will have obtained some help.

Some of you have sent letters to me but not to the Red Cross in Washington. The Flour and cloth appropriated by Congress is being distributed through the Red Cross. Write to the Red Cross for it. I can only be of help to you when I know that you have done this. That is why I asked you to send me a copy of your letter to Washington.

Many of you are writing about shoes and other articles of clothing and food. Congress did not appropriate any shoes nor any other foodstuffs except the flour.

It is unfortunate that the states in which a majority of you live are so deeply in debt that their legislatures are backward in requesting re-

(Continued on Page 5)

TEXAS FARMERS FOR SELF-HELP

Lone Star State Owners Go to Work For Themselves

It is reported that the farmers of San Augustine county, Texas, have decided to go to work and get their own selves out of the depression. They have adopted a five-year program to better their condition, and all the farmers of the country, both white and colored, are determined to carry it through.

Among other things, the plan calls for better churches, schools, homes and roads. The use of modern farm machinery and household conveniences is another objective. The program also includes more cooperative production and marketing, more attention to fruit and truck produce, better health conditions in all communities and more cooperation between town and country.

There are many colored farmers in this county and the leaders are seeking the advice and assistance of the National Federation of Colored Farmers to aid with their wise and progressive program.

ALCOHOL AND GASOLINE MIXTURE WILL AID FARMERS

Farmers of the wheat and corn belts are rejoicing over the prospect of being able to dispose of much of their crops to alcohol distilleries for the production of ethyl alcohol for motor fuel. Several European countries are now using a dilution of gasoline and alcohol as fuel for motor cars and it is said to work well. Sponsors of the idea in this country claim that if 10 per cent of alcohol was used in every gallon of gas consumed, farmers would be able to get rid of 600 million bushels of corn and 418 million bushels of wheat a year. Corn and wheat belt states are talking of laws to compel the use of alcohol as motor fuel and it is reported that a bill will be introduced in Congress for the same purpose.

Bassfield (Miss.) Community Organizes Colored Red Cross Chapter

RELIEF PROMISED AT ONCE

As we go to press we are informed that the colored residents of the Bassfield, Miss., community hove organized a local Red Cross Chapter, the members of which are all of the colored group. Relief has been promised as fast as it can be shipped.

It might be a good idea for all colored communities in need of relief and unable to obtain it through the local chapter to set up separate chapters of their own. Continue writing to the Red Cross at Washington, D. C., and request the privilege of organizing your own local chapter.

FARMERS ORGANIZE RED CROSS

Mississippi Community First to Take Steps Reported

The Booth and Harper Unit of the National Federation of Colored Farmers, Inc., of Bassfield, Miss., in a communication to the Chicago office of the organization reports that a local Red Cross chapter for colored members was organized under the auspices of that Unit Jan. 9. Officers of the chapter are Rev. J. H. Harper, chairman; Robert Grove, Asst. chairman and Prof. V. W. Booth, secretary. One hundred have enrolled as members.

The chapter was organized as an auxiliary of the Jeff Davis county chapter of which Mr. R. C. Puckett is chairman. Mr. Puckett assisted in the organization and explained to the officers their duties. Relief is being given through this chapter to needy colored farmers and their families.

The N. F. C. F. is urging colored farmers to organize local Red Cross chapters in all their communities. A

(Continued on Page 5)

Many Bills Aim To Aid Farmers

Many bills have been introduced in Congress this session, the aim of which is to relieve farmers. No one can foretell at the present time how many of these bills will become laws, but it is certain that some of them will pass.

Chief of these bills is the "Allotment Bill." This bill would tax processors of wheat, cotton, tobacco, hogs, rice, peanuts and dairy products to pay the farmer an amount that would equal the price he got for any of these products before the war. The tax, of course, would be passed on to the consumer who would pay more for his flour,

International Harvester Co. Aids Farm Buyers

The International Harvester Co., has announced that it will guarantee a price of 8 1-2 cents a pound for middling cotton, New Orleans, 45 cents a bushel for corn and 70 cents a bushel for wheat to the farmer who purchases from the company implements he needs for the 1933 crop. Purchases must be $150 or more and the note must mature this year under the plan. The plan will cover purchase of all farm machines except repair parts and motor trucks.

The company believes that farm prices will show an improvement during the year. Under the plan, if the price for middling cotton falls under 3 1-2 cents a pound, the farmer-purchaser will be credited with the difference.

ALLOTMENT BILL AS A SALE TAX

Moline, Illinois, Dispatch Writes on Farm Aid Matter

(From Moline Dispatch)

Perhaps the principles involved in the crop allotment plan should not be written into law, but some of the arguments against the bill are as weak as the argument against the equalization fee, when it was compared to the protective tariff.

Farm aid measures are written with eyes on two important legislative acts:

1. The protective tariff, enated for the purpose of maintaining high prices and high wages.

2. Legislation to support increase in wages of railway labor, which are reflected in all farm transactions.

Naturally, when farmers of the proposed legislation devise their plans it is with the supposition that the public will recognize the aid it has given industry and labor and that it will not object to doing things equally favorable for agriculture.

When the McNary-Haugen bills were in congress, the farm leaders were fighting with their backs to the walls, the seaboard not even acknowledging that anything was the matter with agriculture or that anything should be done for it. In fact, there was evidence that eastern industrial interests were satisfied with the situation as it was; that they considered the farmer's place in the economic scheme as the producer of cheap food for industrialists.

In some respects that period seems to be behind us, and in other respects it seems not to be. It seems to be behind us to the extent that the east begins to assert that the quickest way to restore purchasing activity is to restore buying power to agriculture. On the other hand any measure designed to restore that power is opposed to the bitter end by industrial states and cities.

N. F. C. F. MEMBERS SAVE MUCH BY COOPERATION

Interesting Price List From Headquarters Reported by President

Chicago, Ill.—The National Federation of Colored Farmers, Inc., has made public a recent price list of home and farm supplies bulletined to members of that organization which presents a striking example of the benefits of organization and cooperative purchasing by Negro farmers. Prices quoted on many articles are from ten to fifty per cent less than the same articles are sold for to colored farmers in some local communities. Under the Capper-Volstead Act of 1923, organized cooperative units of the N. F. C. F. can purchase from wholesalers and dealers as they desire. The national office does not sell any goods to member units but keeps in close touch with wholesale markets and with those who have the goods to sell. Specific and valuable information is furnished to members as received. The national office has on file hundreds of letters from members stating that they have made a profit from farm operations, even during the present depression, by following the advice of their leaders and buying cooperatively. Some have written that they have saved a year's membership dues in the organization on the first order sent in.

Wholesalers and supply dealers are beginning to compete for the organized Negro farmers' business and are giving market agents fine courtesy and consideration. There is a reason when the fact is known that this business has amounted to more than $100,000 during the past three years. It will increase proportionately as prices for farm products increase.

We give below some of the prices quoted. Colored farmers who are

(Continued on page 8)

IMPORTANT NOTICE TO EVERY READER

If you have moved from one address to another please send a written notice to your postmaster; write it out plainly and give it to your letter carrier if you live in the city, or your rural route carrier, if you live on a rural free delivery route. If you fail to do this the publisher of this paper will have to pay two cents on every paper going to your old address. This is a new postal law and regulation.

It is unfair to the publisher of this paper to have to pay the government two cents every week merely because you do not send a written notice to your post office. Not only should you notify the post master at once, even when you know you are going to move, but you should send a written notice to this newspaper so that they could change your address on the mailing list. Do not overlook these instructions.

THE MODERN FARMER

A NEW STORY OF GEORGE WASHINGTON AND THE NEGRO

By Carter G. Woodson, Editor of "The Journal of Negro History"

A few months ago a white lady of Staten Island, New York, walked into my office with a novel built around the life and services of a Negro boy whose career she had observed from the days of her youth. When a girl she saw the missionary element of Maine bring from West Virginia to Bowdoin College a colored lad whom they educated and desired to adopt as their own. Stay here among us, they said, and be one of our community and of our state. If you are ambiitious we will open the door of opportunity for you. We will even send you to Congress from Maine if you wish thus to serve your country.

This boy, however, feeling the urge of race, returned to serve his people as a teacher in West Virginia. Plunging into the battle of life there engaging the freedmen, however, he soon became disillusioned as to the great things which he might do for them. They were not united on a program for what they needed to do in that crisis, and the recrudescence of racial antipathy made impossible the accomplishment of what they undertook.

This boy, then, went into the United States army where he experienced a new sort of life and saw more of the world. He left this service to be head of the West Virginia Institute, but responded again to the call of the army during the Spanish-American War in which he served with distinction as an officer. Life for him never became what he thought it would be when he left those friends in Maine, but in spite of the ordeal of racial strife he made a contribution to the welfare of the nation. This was John H. Hill of Institute, West Virginia.

John Hill, however, has lived to render another service. As the grandchild of a slave of the family of George Washington he learned the traditions of these white people and became an ardent admirer of them. He heard about how they lived, how they stood in the community, how they dealt with the Indians, how they treated their slaves, and how they demeaned themselves toward the people of color. Drawing, then, upon what has been handed down from sire to son, he has written a narrative based upon the relations of the three races of George Washing's time.

Unfortunately the story is written in the language of history when it is a novel not too far removed from realiism. The author does not always rely upon history for his turning point. He makes his own story and tries to develop it in cinformity to tradition. In the story, however, there is a great truth. Slavery of the eighteenth century was decidedly different from what it was in the nineteenth cetury after the cotten grin and the industrial revolution. The other such appliances had effected slaves and free people of color of George Washigton's day were living all but in a paradiise as compared with the lot of these people in the time of Jefferson Dvals.

Malah, the heroine of the story, is an unusual woman with the blood of three races in her veins, The author makes hor the daughter of Lawrence Washington, the brother of George Washington. Her mother was an Indian woman of the lost tribe, that had an infusion of Negro blood. By special arrangement prior to her death her father provided that she should have a home at Mt. Vernon. In this way she plays an important role in the life of the Father of the Country.

Malah, however, is peculiarly situated in the social world. She is neither whitie nor black nor red She has associates of all races, and yet she has none who fully supply the demands of the social ... Wherever others went she had to go, but although among them she was not of them. On approaching womanhood, then, her problems became more difficult, and those who had to deal with her were at a loss as to how to receive her.

This book, PRINCESS MALAH, opens with the scene of George Washington's marriage when all of Mount Vernon must make preparation to go to the home of the bride to figure in this significant event. Malah with proper escort arrives upon the scene bedecked with so much finery and making such an impression as to evoke questions about the role which she plays in the life of Mount Vernon. It is explained that she is a skeleton from the closet from the Washigton family, but these questions go on to embarrass others with whom she is thrown.

After the wedding ceremonies have cleared away she goes with the family to Williamsburg where the same experience is repeated Not long thereafter, however, she is sent on amission to the Indians in the year 1759 to induce a large number to rmain loyal to the British flag, and after carrying out the orders of Colonel Washington at various posts on the way she arrives at the reservation of the Indians in Western New York. From this point she opens up negotiations with the natives on the frontier, but the mission closes with the fall of Quebec. She had then reached a great crisis in her life in that she had rendered the white race a service. She could now think of herself. Inasmuch as she could not be socially received among the whites she finally accepted the hand of an Indian Chief with whom she wended her way in the direction of the harvest moon.

While the author iis frank in accounting for the racial elements embodied in Malah he does not attack in any way the character of George Washington On the contrary the author shows great admiration for the Colonel because of the high regard which he had for others less fortunate than himself. Here, then, we have a great character in history viewed from another angle. The Associated Publishers, at 1538 Ninth St., N. W., Washington, D. C., then, have rendered a public service in offering this gripping narrative for the small sum of $2.15.

MISSISSIPPI'S SALES TAX

Decatur Review: Mississippi is furnishing some interesting figures to other states now considering a sales tax. The same arguments for and against such a tax were made in Mississippi that are being made in Illinois. The 2 percent tax was voted last May and a detailed analysis of the first six months' operation has just been made.

Border counties protested that trade would go to Tennessee, Alabama and Louisiana. A river, without bridges, took Arkansas out of the picture. The analysis shows that every border county of any size collected sales taxes in excess of the state average. Total tax collected for the six months was $1,173,721.15. On the basis of 2,009,821 population, made up of 996,856 white and 1,012,965 Negro, the monthly average per capita sales tax was 8.7 cents while the per capita average for the state for the six months period was 58.5 cents.

Adams county on the Louisiana border with Natchez the principal city, had of six months per capita average of 84.7 cents; Warren county with Vicksburg had 124.1 cents; Lee county, close to Tennessee, had 62.1 cents average and Lowndes county on the Alabama border with Columbus as the large city had a 62.4 cents average. A. S. Coody, secretary of the tax commission, reports these counties in easy driving distance of competitive towns in other states.

Evidently Mississippi folks did just what Governor Conner and they would do; trade at home rather than drive very far to save two cents on the dollar.

Mississippi's average per capita tax of 58.5 cents for the six months period indicates a yearly average of $1.17 or for a family of four, $4.72 for the year, paid daily a few cents at a time.

Illinois' proposed sales tax is a 2 percent tax. The Mississippi figures should give some indication of what may be expected in Illinois, with a much larger population and higher purchasing power.

COTTON ACREAGE DROPS

(From Atlanta Constitution)

With southern cotton growers having during the past three years broken all records in the reduction of acreage, the American Cotton Cooperative Association sees still further reduction next spring.

In 1922 cotton was planted on 30,500,000 acres in the south. Then came four years of 22-cent cotton, and by 1926 more than 16,000,000 acres had been added, making a total acreage of nearly 48,000,000. No wonder, the Cooperative Association points out, that there resulted "the largest crop America ever produced, 18,000,000 bales, and broke the price down to 11 cents a pound, one-half of what it had averaged during the expansion period."

Despite the fact that prices are now less than a third of what they were during the expansion period, the growers have made large cuts in their acreage during the past three years.

More than 10,000,000 acres have been taken out of cotton cultivation during the past three years, but 6,000,000 more must be planted in other crops before the level which brought the prosperous prices of 1921 is reached.

Although the price of cotton is a half cent higher this year than last, the growers will receive less per acre because the yield per acre is less by 46 ponnds, leaving the grower $1.85 an acre worse off.

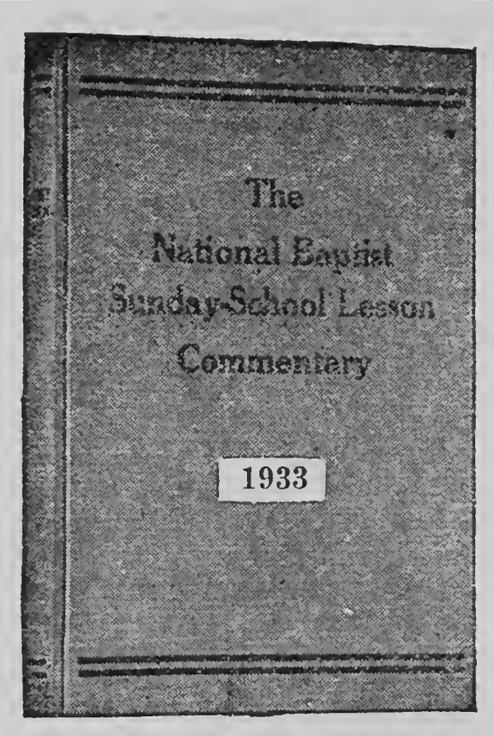
The cooperative association feels, however, that this situation encourages a sound belief that next year will see a further reduction in acreage, because "whatever forces acted to cause reduction last year will be reinforced by the lessened return of this year."

Certainly the gospel of acreage reduction must be taken to heart by the southern cotton grower next spring or else he cannot expect material improvement in present prices. There is already a huge surplus, the world is not able to buy as it was in years of normal economic conditions and production in other countries has increased by leaps and bounds.

In the face of such conditions the only course of wisdom is for the southern farmer to decrease his product and increase its quality.

"CHICKEN-DOG" FOLLOWS BOY

"That is my chicken-dog," declared a newsboy at a busy corner in Budapest, Hungary, in describing his pet, which stands every day with him as the lad sells his papers. He keeps the tiny black fowl fastened to a string tied to his wrist and often jerks it out of danger. At home, when the string is taken off, the chicken follows him like a dog. The boy's dog died, and he is training the bird to do dog tricks.



SUNDAY SCHOOL LESSON Commentary

For 1933

Every Sunday School Teacher Should Have It

SIX REASONS WHY YOU SHOULD USE IT:

First: It is the production of your own National Baptist Publishing Board which gives employment to more of our people than any similar concern in the United States.

Second: It is purely baptistic and orthodox in every particular.

Third: Its doctrines are unquestioned, and the Biblical requirements are stressed in a manner to make it absolutely dependable.

Fourth: None of the modern theories leading to skepticism are admitted.

Fifth: It aims to be true to the teachings of Jesus and whatever there is presented which has not the "Thus saith the Lord" is discarded as unsafe and destructive of the best interests of mankind.

Sixth: Thoroughly adapted to the uses of our Sunday school constituency, it stands as a beacon light to all those who would like to rise in the scale of intelligence and demonstrate the qualification necessary for the accomplishment of the "Great Work" devolving upon us as a people.

Price $1.00 Per Copy.

Interesting News & Notes

Frank Loveland, a Helm, Colo., farmer, grew a sunflower last year measured fourteen feet from roots to flower. It is believed to be one of the tallest ever grown.

Harold Umbaugh, a twenty year old youth of Nappanee, Ind., is managing a 261 acre farm, doing much of the work himself and is making it pay him a good profit. He represented his state last year at the National congress of the Future Farmers of America and won the highest honor awarded. Last year he had 25 acres of wheat, 28 acres of oats, 22 of corn, 14 of clover, 25 of soy beans, 14 in hay, besides his pasture and garden. He has a herd of ten dairy cattle and says they are making him money now. His father is dead and he has been sole manager of the farm for three years. Can any young colored farmer beat this record?

Angelo Herndon, a Cincinnatti Negro Communist, was sentenced to from eighteen to twenty years in prison in the Atlanta, Ga. courts for attempting to incite insurrection. He was convicted under a law passed sixty years ago. The case will probably be appealed on the grounds that the trial was unfair because Negroes were excluded from the jury.

A dairy farmer living near Ellisville, Wis., traded twin Holstein calves for one good ten cent cigar and declared that he got the best of the bargain. Calves are sure cheap in Wisconsin.

It is reported that a colored farmer in Edgefield county, N. C., has found a two-headed snake and turned it over to a professor of the University of South Carolina, for preservation. The snake was thirty inches long and had a head on either end. It could raise both heads at the same time and stick out two forked tongues.

W. E. Eltzroth of Laurel, Mont., produced a sugar beat last year that weighed 14 1-2 pounds without the top. Four acres of his land produced 105 tons of beets. Some beet crop.

Colored farmers of Mississippi are purchasing many farms in that state this month and many are contracting to rent farms with privilege of purchasing after the first crop is made. Terms given are very liberal It is reported by the National Federation of Colored Farmers, Inc., that Race farmers in South Carolina, Georgia and Florida are also buying farms.

Illinois has 954 farm cooperatives with 242,850 members and did a total of $181,946,000 worth of business in 1932. Few colored farmers are members of these cooperatives. Colored farmers in the southern part of the state are rapidly joining the National Federation of Colored Farmers.

Gov. Murray of Oklahoma has a plan for a 1,000 acre garden near Tulsa. Elderly men and women who are unemployed will cultivate it and the surplus will be canned and distributed to all needy. The legislature will be asked to appropriate funds for free seed.

Chairman Payne of the National Red Cross has informed Congress that cotton voted last session to supply clothing for the needy is providing only about twenty per cent of the demand for it. He said that more cotton was needed badly.

A resolution for Senate investigation of working conditions on the lower Mississippi river flood control projects was reported favorably by the commerce committee. It is alleged that hundreds of Negro laborers on these projects are underpaid, abused and generally mistreated by the contractors who are doing the work.

Georgia is fewer hogs than were raised in that state ten years ago. There were 1,357,400 in April, 1930 and 2,071,000 on January, 1920. Many colored farmers have left that state during the past ten years.

There are 5,844 colored farmers in the state of Missouri, of whom 1,163 are full owners. There are 3,020 more farmers in the state than ten years ago but 480 fewer owners Colored farmers cultivate 255,623 acres and the value of land and buildings is $14,498,297. Value of land and buildings owned by colored farmers is $3,429,544.

NEBRASKA HERMIT KEEPS DEPRESSION ON HAND AS GUEST

Springfield, Neb.—"Old Henry" Morris has beaten the depression. "Old Henry" doesn't even know there's been a depression. He's lived in a hole in the bank of the Platte river for the last forty-six years and depressions and other events pass over his head like water off a duck's back. They mean nothing in Henry's life.

Just so the squirrels don't beat him to the walnut and other nut trees, everything is O. K. to Henry Morris. Nuts and berries and things of that kind have made it possible for Morris to beat the hard times.

Morris is 77 years old, now. He was 31 when he found this hole in the river bank and crawled in to take a nap. He's lived there ever since. With logs and planks salvaged from the river, he's built a sort of front to his cave, with a door, and here he lives, year in and year out. In the winter he "hibernates," coming out of the hole only once or twice during the entire season. He is known as the Hermit of the Platte.

Neighbors Wrecked His Cave.

Henry fell sick last fall and the farmers gathered in force the other day and built him a little one-room shack near his cave. They furnished it with a stove, a bed a chair, bedding, etc. But Henry simply wouldn't move from his cave to the house. Neighbors had to take him by force. Then they wrecked his cave so that he couldn't return to it.

Nuts are among Henry's principal articles of diet. In the fall he lays up quantities of them for winter. It's a tragedy with Morris when the squirrels beat him to the nut trees, for it means "eats" in the cave will be curtailed. Dried berries, corn gathered from some farmers' corn fields after the shuckers have passed, and a few bushels of wheat gleaned from fence corners the combines have not reached, provide the remainder of his food. He doesn't use coffee, tea nor milk. His only drink is water and the Platte river is within 100 feet of his cave.

If there is a fuel trust, Henry Morris has it beaten. He burns wood in his little, old dilapidated stove. He picks up the limbs which fall from trees or driftwood by the river and stacks it up inside his cave. And when he shuts and barricades the door for the winter. not much fuel is necessary to keep him warm. When the door is closed, Morris spends practically all his time in bed, anyway. In the summer he comes out, mostly at night, but during cold weather he may not get outside his cave more than once or twice in six months.

Pants Worn for Sixteen Years.

And clothing. "I've worn these pants sixteen years," he told a newspaper man several years ago And he's still wearing them. He doesn't remember just where nor when he got his shoes, but it was years ago. He goes barefoot all summer and takes off his shoes. when he "retires" in winter.

He hasn't had a shave in the entire forty-six years he has lived in his cave, nor a haircut by a barber. When his hair gets about a foot long, he goes to some farmer and gets him to cut off six or eight inches. He wants his hair cut and he gets it cut. Looks don't count with Henry.

Morris came from New Jersey—Mount Holly. When he was a young fellow he started tramping around the country, and passed into Nebraska when he was 31. He found the cave and there he rested. He denies that a woman is responsible for his becoming a hermit.

To City Twice

The old fellow has no books and no newspapers. During the winter he just "thinks." In the forty-six years he has lived in that hole in the ground he has been to Omaha, fifteen miles away, only twice. One of these was six years ago when an Omaha newspaperman, hearing of the old fellow, got him to come to the city just for a feature story. Everything he saw was new to Henry, but he wouldn't stay all night in the city.

A small sack of salt a couple of times a year is about all that Morris buys. Each summer, for a day or two, he works in the harvest field and gets the cash. That's all he needs. He beats up his wheat and corn into a coarse flour or meal, mixes it with water from the river, adds a little salt and cooks it on his little stove. Then he'll eat some nuts or dried berries, and take a drink of water.

This is the way Henry Morris has beaten several depressions.

A TIN CAN AGE

Kansas City Star: It is something of a shock to read in the annual trade reviews that more steel was sold last year for containers—mostly tin cans—than was bought by the railroads, and more than half as much as was taken by the building industry and by the motor car manufacturers. The purchases of steel by the railroads were less than a million tons, compared with more than 8 million tones in 1926 and 10 million tons in 1923. The great decrease in railroad traffic, which amounted in 1932 to only about half that of 1929, forced the railroads to economize in every way possible to conserve their restricted revenues. But the can industry used more steel last year than ten years ago.

Popularity of package foods accounts for the sustained activity of the manufacture of tin cans, though the demand comes from many other lines of business. Food is now supplied to consumers in ever increasing volume in small packages, which include a great variety of paper, glass and fabric containers as wel las tin cans. But the cans are chiefly responsible for the widespread custom of purchasing prepared foods the use of which eases the labor of the homes in the preparation of meals.

There are still large numbers of "old-fashioned" women who prefer to do their own canning and to buy and cook raw foods, but the extensive use of prepared foods justifies the characterization of these times as a tin can age.

State College Faculty Conducting Professional Studies

Members of the faculty of A. & I. State College are busily engaged in the construction of course syllabi to be used in required and survey courses of the institution in connection with curricula reorganization for 1933-34. The work is being conducted under the headings of the following divisions of the institution: Agriculture, Education, Home Economics, Industrial and Fine Arts, Language and Literature, Mathematics, Physical Sciences, Secretarial Commerce and Social Studies.

THE MODERN FARMER

Official organ of the National Federation of Colored Farmers, Inc.

Leon R. Harris - - Editor

Published monthly by the Modern Farmer at Nashville, Tennessee, and Chicago, Ill.

Nashville, Tenn., Office, 447 4th Avenue, North.

Devoted to the interests of the Farmer, Truck Gardner, Livestock and Poultry Breeder, the Home and the People.

Entered as Second Class Matter, April 10, 1929, at the Post Office at Nashville, Tenn., under act of March 3, 1879.

All contributions for publication in the Modern Farmer should be addressed to The Modern Farmer, 447 4th Avenue, North, Nashville. Tenn.

No libelous matter will be published. Unsigned articles or letters, and those written on both sides of the paper will not be used.

Subscription price $1.00 per year, 75c for six months, payable in advance. Personal checks must be certified. Make all checks or money orders payable to The Modern Farmer.

Advertising rates and sworn circulation figures presented upon application.

"OUR SLOGAN"

STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT.

THE LAW

"It is hereby declared to be the policy of Congress to promote the effective merchandising of agricultural commodities by encouraging the organization of producers into effective associations under their own control.

The Board is authorized and directed—to promote education in the principles and practices of cooperative marketing—to encourage the organization, improvement in methods, and development of effective cooperative associations. (Public—No. 10—71st Congress. Sec. 1-5.)

THE GOSPEL

"This law is predicated upon the ability of the farmer to manage his own business, once he is organized to do so. Cooperation is the key to it and only in exceptional cases can the Federal Farm Board have any dealings with a farmer who is not a member of a producer-owned and producer-contrloled marketing unit." Hon. Sam'l R. McKelvie, Former Member, Federal Farm Board.

"Hear you not the jubilation, shouts of joy and songs of cheer?
'Tis a new world bidding welcome to a glorious New Year!
A world wherein each honest man may do his honest part—
Where ev'ry human being is getting better in his heart."

SAY "I WILL" TO 1933

(Reprinted from last January's edition by request.)

I will be an industrious, thoughtful, progressive farmer this year. I will work hard for hard work keeps my body healthy, my mind free from worry and my conscience clear. I will plan my work,—I will save my time and energy,—I will accept advice from those qualified to teach me. I will join a cooperative organization of farmers in my neighborhood or attempt to build such an organization. I will imitate the work and methods of those who are succeeding around me. I will read more and will strive to originate something myself.

I will be a thrifty farmer this year. I will not borrow more than I can reasonably hope to earn. I will make a budget,—I will start a banking account,—I will spend wisely and not foolishly.

I will be a good American farmer this year. I will have faith in my country, — in her institution, — in her opportunities. I will be proud of my citizenship,—I will pay my taxes, — I will vote and I will take an interest in public affairs so I can vote intelligently.

I will be a good Christian farmer this year. I will remember the faith of my fathers. I will be true to my family and to friends. I will speak the truth, — I will be honest, — I will be courageous. I will keep the Ten Commandments and the Greatest Commandment. I will be a good man for a good God has promised to bless only those who do right and serve.

WHY NOT "SUPERIOR" NEGRO TENANTS

A writer in the Atlanta Constitution, discussing the subject: "What Is Wrong With Southern Agriculture," states that decadence began when the better element of landlords moved to near by towns and cities and became "absentee landlords" and turned over their country homesteads and lands to the "occupancy and squalor of inferior Negro tenants, who were expected to pay rentals in cotton, buy their food and feed supplies from their landlord merchants and liquidate their indebtedness for such supplies with cotton." He goes on to say that 'the average Negro tenants have neither the disposition nor incentive to improve the lands they cultivate under such a system. They are largely a shiftless, gypsy-inclined class, living from hand to mouth, always ready to move, and but few of them accumulate anything after the year's rents and credits for supplies are paid from the small average crops of cotton they grow per family."

This writer, who is certainly a prominent agricultural leader, tells part of the truth at least. The remainder of the truth about the situation is that the inferior Negro tenant exists because there is an inferior white landlord and an inferior system of farming. If anyone can tell us how any Negro tenant, living under such a system of farming and under such landlords, can be anything but inferior, we would like to hear from him.

The southern landlord, along with most of his fellow-citizens, has been guilty of the great American sin, "Hoggery." He established the share cropping system to preserve his caste. He has retained it because he has found it to be financially profitable. The moment he became a share-cropping landlord he ceased to be a farmer. His fertile land went to waste by erosion and careless culture because he did not love it any more. He cared only for the dollars he could bleed out of it to invest in other businesses and enterprises. Hence his tenants and share-croppers became his vassals. He kept them in debt, poverty and ignorance that he might the more easily collect his pound of flesh.

Southern agriculture will never improve permanently until the farms and plantations now owned and controlled by absentee and inferior landlords are broken up and possessed by the present inferior tenants. Fortunately, the best minds of the South are beginning to realize this fact and are advocating the overthrow of the present system. When this happens,—as it surely will,—the "superior' Negro tenant will come into existence. He will be the tenant of his own acres.

LEARNING FROM OTHERS

Colored farmers should remember that knowledge, like salvation, is free, or at least it is very cheap. We can learn much from the recorded experiences of others if we will take the time to sit down and read a few books and papers or have our friends or children to read to us. In this enlightened age there is little excuse for ignorance.

Glancing through our exchanges we have found many items of interest to colored farmers and are herewith recording them in the hope that we will get the habit of seeking information and knowledge and accepting sound advice. We cannot possibly keep up now-a-days unless we keep up to date.

First,—We note that an Illinois county farm bureau association has approved a 1933 program for its members which has been planned to enable them to profit during this depression period. One item calls for more profitable poultry and egg production. They are informed that eggs are fairly high in price and by balanced feeding and careful flock management farmers can obtain more profit. Colored farmers should produce more chickens and eggs and study the poultry business thoroughly. It requires as much thought and effort to produce good, profitable chickens and eggs as it does to produce good cotton.

Another paragraph of this program mentions improving the quality and lowering the cost of fruit production. It mentions the fact that only the best quality of fruit is worth producing. Our farmers should get rid of their scrub orchards and barren fruit trees and get together and produce good varieties of fruit that they can ship in carlots and sell at a profit.

A system of keeping farm accounts was also mentioned. The average colored farmer keeps his accounts in his head and his head is usually wrong. Your agricultural institutions and State Departments of Agriculture are anxious to inform you how to keep your accounts correctly and you should call on them for advice and assistance.

These members were also advised to use home-grown feeds for their stock and were told that they would have to use no purchased feeds to balance the ration if they knew how to feed properly. Southern farmers purchase more stock feed than those of any other section. The habit is a foolish one and unnecessary.

Members were also urged to buy and ship and sell through their own cooperative associations. This is sound advice for colored farmers too. We must learn to cooperate and look out for ourselves. We must realize that every community of colored farmers has been made a separate community and must progress as a separate community. We have our separate schools and churches, whether we want them or not, and we will progress faster and have more and be more when we begin to buy and sell together.

ABOUT TRAITORS, ETC.

We are informed that a certain member and organizer of the National Federation of Colored Farmers, Inc., has left his first love, joined up with some white lawyers and merchants of a certain southern state, and is attempting to organize and set up another organization for colored farmers. We have a pretty good idea of what sensible Negro farmers will think of this new "Negro organization" when they learn that the organizers are one Negro and a few white persons.

We have repeatedly warned colored farmers to beware of false leaders and false doctrines. The National Federation of Colored Farmers was the first organization founded for the benefit of colored farmers in the U. S. and it will always remain the first. We trust, and have a right to believe that it will always be the best. It is a Negro organization from the top on down—was started as such and will continue as such. Its founders and leaders are proud of its progress. By fair dealing and unique, conscientious service, it has won the respect of the best thinking people of the Nation, colored and white. It is not opposed by any intelligent Americans who understand its purpose and objectives. To quote from an editorial written three years ago:

"The National Federation of Colored Farmers, Inc., is an organization independent of any other. It is the only national organization of Negro farmers in America. It is growing and it is growing fast. Call it is a segregated organization if you want to,—we don't care. But thank your stars for this:—it is segregated from the top on down. It is not like the American Legion and several other national organizations of which you know. It is not a "white" organization with a few Negro 'chapters' or 'units.'"

"This organization merits your support. It is a national organization for Colored Farmers. If you have any race pride you will know your duty. If you have any race love,—YOU WILL DO YOUR DUTY."

And we have said enough.

SERVICE FROM HOME LOAN BANKS

Home owners who want to borrow can borrow direct from Home Loan Banks if they cannot get a loan from local building and loan associations. However, they must apply to these latter institutions first. This is our understanding of the new Home Loan Bank law. We consider it to be of little value to small farmers.

Colored farmers should organize loan and savings associations among themselves. It would be a good idea to start such an organization in your community.

NOT MORE, BUT BETTER COTTON

Southeastern cotton farmers will never obtain premiums for the better grades of cotton they produce until they convince mill owners and buyers generally that they are producing a uniform and more dependable grade than can possibly be produced in the West, China, India, Russia or Egypt. Texas is now the greatest cotton producer of all the southern states and this state can produce the poorer grades so cheaply that it is foolish for Alabama, Mississippi and the other southeastern states to attempt to compete with her unless they devote all of their efforts to producing better cotton than Texas can possibly produce. They can do this if they try, because they are blest with a better soil and climate. And they had better do this for if they don't they might as well decide to stop raising cotton right now.

One authority states that there is ground enough in Texas and Oklahoma to produce 25,000,000 bales a year. The total production of the entire United States averages around 14,000,000 bales a year. One Texas farmer picked 1700 bales from 2,000 acres with the help of only five laborers. The crop was planted,

cultivated and picked by machinery. It would have required 200 hands to have harvested such a crop in Mississippi.

Southern farmers have been raising cotton for over a hundred years and have never yet learned how to grow it well. From now on they must pay closer attention to seed, cultivation and marketing. They must grow, not more, but better cotton, and convince buyers that good cotton is better than bad and is worth the premium they demand.

TASK FOR THE "BIG TEN"

A subscriber writes: "Why don't ten of our big leaders get together and give the race a program to follow the next few years? If we could "gee and haw' together for a while we might get some place."

A good idea. We will accept the responsibility of carrying it a little farther and naming the "Big Ten." Some we name are not so well known but that's nothing. The best leaders are never recognized. Here they are,—the "Big Ten" in alphabetical order:

Dr. J. C. Austin, Henry Allen Boyd, John W. Davis, James P. Davis, Bishop J. A. Hamlett, James Weldon Johnson, Dewey R. Jones, Donald Marshall, Robert R. Moten and Carter G. Woodson.

Well, how do you like them? Some are young enough to see visions and some are old enough to dream dreams and they are the men to do the work.

All right, gentlemen, get together, pick out five leading women to work with you (we wouldn't name them for a hundred depression dollars) and find the plan, make the program, or show the path. If you can get together we will follow.

FOR N. F. C. F. MEMBERS

Get together and decide early on the varieties of vegetables you are going to plant in your communities this year, especially melons and sweet potatoes. Chicago will use thousands of cars of melons this summer and cars of mixed varieties won't bring you anything. Be sensible and progressive. Practice cooperative production right.

Your national office can sell your cars and get you top prices if you will follow instructions. This is the first instruction: "Plant the same varieties of vegatables in your community." Nancy Hall or Jersey sweet potatoes sell best in Chicago.

PATRONIZE YOUR FRIENDS

We call our readers' attention to the fact that the W. W. Barnard Co., 3942 Federal street, Chicago, Ill., is a good friend of the National Federation of Colored Farmers and merits your patronage. Remember this company when ordering your vegetable and flower seeds, plants and other articles sold by seed houses. Units can buy at contract prices. We must learn to be friendly with those who show themselves friendly and give such our support and patronage.

GOOD COOPERATION

Fifty-two men, most of whom were fellow-members of his farm organization, with fifteen teams and wagons, gathered at the home of an Illinois tenant farmer and gathered and husked 1200 bushels of corn for him on twenty acres. The reason was,—this farmer had been laid up for six weeks by a broken ankle. The women also met and served dinner at his home.

This is practicing the kind of cooperation we are urging colored farmers to practice. When we get in the habit of helping each other out of holes instead of trying to keep each other in the hole, all of us will be much better off. Cooperation is not only sensible,—it is Christian.

How about planting four or five acres together this coming year, the proceeds to go to help support your church, school and unit? Isn't it a pretty good idea?

The March issue of the MODERN FARMER will be a big special number, full of facts and information of value to every colored man, woman and child in the Nation. Subscribe now and get your friends to subscribe. You cannot afford to miss this number.

1,500,000 POUNDS OF MEET CURED BY FARMERS

(Continued from page 1)

the L. S. U. college of agriculture. He continued the work, the classes today ranking as one of the most important in the college.

Mr. Francione was one of a small group of men invited last year to attend a short course in meats sponsored by the national livestock and meat board. During a year's advanced study at the Iowa State college, 1929-30, he held a fellowship in the meat department.

Since his return to the university in 1930 he has trained the greater number of farm and home agents in the work of curing and canning meats, and last year he assisted Mr. Cobb of the extension division in interesting the ice plants of the state in a program of meat curing by refrigeration.

"There are now 350 plants furnishing to farmers what we call 'guaranteed weather,'" Mr. Francioni states, "Two years ago there were only about 5,000 pounds of meat cured in cold storage. Four hundred thousand pounds were cured last year, and this year we expect over a million pounds to be saved by this method."

—Exchange.

ANOTHER LETTER ABOUT RED CROSS RELIEF

(Continued from Page 1)

lief funds from the Reconstruction Finance Corporation. They do not want to borrow for relief because they can see no way in which they can pay the loan. The Red Cross feels that the states should take the lead in furnishing relief for their own citizens. Most of them are doing this.

Don't think you are the only one who is suffering. This depression is all over the country and men and women and children are cold and hungry in every city in the land. I was in Des Moines, Iowa, the other day and gave away six nickles to six different people I met on the streets in the brief space of less time than one hour. Everyone of them told me he was hungry and all but one were white men.

Leon R. Harris, Editor,
Box 209, Moline, Ill.

FARMERS ORGANIZE RED CROSS

(Continued from Page 1).

more just and equitable distribution of relief for needy colored people can be made through colored chapters in communities where a large majority of the needy are colored.

In its communication, the Bassfield unit gave high praise to the N. F. C. F., and the Modern Farmer. We print the letter as received:

"Our Unit of the National Federation of Colored Farmers, Inc., was organized by Prof. V. W. Booth, May 1, 1931. Through the operation of our unit here, our farmers have been greatly benefitted. By practicing cooperation marketing we get top prices for our products. The women of our community get good prices for their eggs and poultry. We get our farm and household necessities at near wholesale prices. By practicing cooperation, we have learned to make a "live-at-home program."

The members of the Booth and Harper Unit have donated liberally to the operating expenses of their organization. It is through the operation and cooperation of this Unit that we have been able to set up a Red Cross chapter here in our community as an auxiliary to the "white" County Chapter, which is operated under the chairmanship of Mr. R. C. Puckett. Mr. Puckett is chairman of the Red Cross chapter of Jeff Davis County. It is now that through this, our Red Cross auxiliary, that our poor and destitute have obtained help.

This auxiliary was organized by Mr. Puckett, Jan. 3, 1933. Mr. Puckett acted as temporary chairman of the meeting. Officers elected were, Rev. J. H. Harper, chairman; Robert Grove, Asst. chairman, and Prof. V. W. Booth, secretary. Mr. Puckett explained to the officers their duties. Rev. E. B. Blackmon, an outstanding character of our little town of Bassfield, gave some helpful and encouraging remarks on the organization. Among the many distinguished friends present were Mrs. Julia D. Barnes, Mrs. Mary E. Booth and Mr. Otho Groves. These served as enrolling secretaries. The enrollment for the day was one hundred.

We thank Mr. Puckett very much for the opportunity given us to organize this auxiliary through which the poor and destitute of our race in this community may obtain help. Too much praise cannot be given Prof. Booth for his efforts in securing both the Unit of the N. F. C. F. and our Red Cross Chapter.

We cannot express in words how much we appreciate the information received through the Modern Farmer. We are urging all of our people here to subscribe for the Modern Farmer and read it."

ALLOTMENT BILL AS A SALES TAX

(Continued from Page 1.)

favored class of people.

So, while we have acknowledgment that farm prosperity is sufficiently basic of all prosperity to receive attention, we also have opposition to any plan of farm restoration.

The allotment plan is assailed as a super-sales tax. The designation is supposed to call to arms the opposition of all persons opposed to the sales tax principle.

It is further pictured as a measure by which this sales tax is collected and distributed among a

That is what is proposed. It is proposed upon the theory that it is justified as a measure comparative to a protecive tariff, which collects from all consumers and distributes to the producers of the articles manufactured. It is proposed on the theory that it is justified as a measure comparative to a railway wage law that provides that money shall be collected from all the people in freight and passenger rates and distributed to a class.

It is not an important discovery that the proceeds of the allotment law are to be distributed among people of one class, because the proposal is born of the idea that agriculture should be granted legislation as favorable as that granted industry, transportation, and labor. It is not an important discovery that the proposed legislation will take from the rest of us and give to agriculture, because it is based upon public and country-wide admission now that the best way to help all of us is to restore the purchasing power of the great agricultural areas.

If it is wrong to help the farmers as a class, then it is wrong to help industry as class and labor as a class, and the slogan, "Protection for all or protection for none," is sound.

The allotment plan may not be the right course, but the principal arguments against it are thin, when viewed in the light of other special legislation.

MANY BILLS AIM TO AID FARMERS

(Continued from Page 1)

clothing, etc. This bill is being strongly opposed by millers, packers and many manufacturers, but is said to have a good chance to pass. It received the endorsement of all the large national farm organizations.

Senator Harrison, of Mississippi, has introduced a bill to authorize the Reconstruction Finance Corporation to loan the owner of a home or farm under mortgage enough to pay his taxes for two years.

The Robinson bill, of which Sen. Robinson of Arkansas, is sponsor, would create a billion dollar federal corporation to loan money to farmers on first or second mortgages. Senator Shipstead of Minn., has introduced a bill to refinance all farm indebtedness in the country.

Many bills have been introduced to reduce by law the amount of debt owed by farmers and others. It is well understood by both debtors and creditors that a dollar today, paid on a debt that was made three years ago, is equal to more than two dollars.

A mighty effort is being made for the farmer's benefit. We will know in a few weeks just how much relief some of the proposed laws will bring.

RADIO, YO-YO WANTED IN COFFIN

In a will drawn recently by a wealthy man in Warsaw, Poland, he has specified that the following are to be placed in his coffin before the funeral: a radio set, a yo-yo with a silken string, three favorite pipes and four pounds of tobacco.

A LEADER LOST

Salem News: Calvin Coolidge's greatest contribution in the government was his advocacy of the plain old ideas of economy and thrift. If the nation had clung to them as he insistently urged it to do, much trouble would have been saved. His sudden passing is a great loss to the nation, more than we can realize today.

We needed him.

IMPORTANT MESSAGE!

PRIZES OFFERED!

"WHAT'S THE MATTER WITH THE AVERAGE NEGRO FARMER?"

Some question, is it not? Well, we want to know and nearly everyone wants to know. We want you to tell us in your own way and in your own words.

We want to know so badly that we are offering three cash prizes for the best letters received as an answer to the question. Any man, woman or child may write. The contest closes September 1, 1933. Write 'em long or short, just answer the question. You may win a prize.

FIRST PRIZE—Five Dollars in Gold.
SECOND PRIZE—Three Dollars.
THIRD PRIZE—Two Dollars.

The best letters will be published throughout the year. All letters become the property of the Modern Farmer, when received. Judges are the editor and one representative from each state in which the National Federation of Colored Farmers, Inc., has chartered Units. These representatives will be chosen by the Executive Committee of the organization. Prizes will be awarded during the 1933 N. F. C. F. Convention.

Mail all letters written for this contest to

LEON R. HARRIS, Editor,
Box 209 Moline, Illinois

As a sample, we publish below a little sketch about? "What's The Matter With the Average Georgia Farmer." Don't copy from this, it won't count. We just want to give you an idea.

"What's the Matter With the Average Georgia Farmer?

"The average Georgia Farmer gets up in the morning by the alarm of an Illinois clock (Big Ben), buttons his Chicago suspenders to a Detroit overall, washes his face with Cincinnati soap in a Pennsylvania pan, sets down to a Grand Rapids table and eats Chicago meat, Indiana hominy, fried in Kansas lard, on a St. Louis stove.

"He then lights his New York lantern and goes out to the barn and puts an Indianapolis bridle on a mule fed by Iowa corn and plows the farm covered by an Ohio Mortgage with a South Bend plow, and when bed time comes he reads a chapter in the Bible printed in Boston and says a prayer written in Jerusalem. Crawls under a blanket made in New Jersey only to be kept awake all night by the barks and wails of a Georgia yellow hound dog, the only home product on the place, and then wonders why he cannot make money."

Now Get Busy And Answer The Question And Win One Of The Prizes

A LETTER FROM BLACK HAWK, MISS., TO THE MODERN FARMER, NASHVILLE, TENN.

Dear Friends—As I have been silent reading the many beautiful letters and thought to write again as I think it is such a good paper for the farmers as we get instructions from all parts of the states, and we as farmers should be glad of it. And to know it was gotten up by Negro hands, I feel like we all should try and raise everything we can this year because the time has come, if we don't raise it we will go hungry. I am hurrying spring on, that we may get busy with chickens and the garden; as I do love farm-life. I think it is the happiest life one can live; well I am going to say as I did before as I keep hearing a voice saying: "What makes times so dull." I will answer you (sin) is the cause of it all. I said this because I love the Negro race, because I am one and glad of it; because the Negroes are the meekest people on earth; and God said the meek shall inherit the earth. Although I feel like we are in need of instruction, do you remember the city of Jerusalem was once destroyed on the account of no education and not instructing their people. I can look out and see hundreds and thousands of so-called mothers walking the streets and highways, unable to give their daughters or their neighbor's daughter a word of instruction. So long as we live, that way your girls are going to shame and disgrace; and we cannot prosper in that condition. The time has come for us to wake up; for we are living in dark days, and it makes me think our churches and our preachers are responsible for our people as a whole. The churches indulged their members in what they commit, and our preachers are failing to tell the people what God would have them to know, for fear that their collection would be cut; when if you do good God will take care of you.

I am going to ask everyone who is working for N. F. C. F. to continue until you have brought our Negro people out of darkness into the light. I am hoping to see this in print, should I see it I will come again when the fruit gets ripe.

Yours in Christ,

ELLA R. FLUKER.

SAYS ALLOTMENT PLAN UNPOPULAR

To the extent that a voluntary domestic allotment plan goes beyond an educational measure to restrict acreage it will, like every other artificial means, prove a boomerang declares Henry H. Heimann, executive manager of the National Association of Credit Men, in an analysis of the farming situation which is part of his January review of business.

"This attitude on the allotment pla is not popular but it is historical fact," he explains. "All other domestic premium schemes are simply shifting burdens, involving more and more other related industries and increasing taxation. Furthermore, a plan of this kind, if started, in wheat and cotton, could not well be restricted to these commodities. Those interested in other commodities which are selling at

NEGROES ARE NOT INHERENTLY INFERIOR

Two False Philosophies Must be Abandoned

Augusta, Ga., Feb. 9:—The notion that Negroes are inherently inferior and the practice of disfranchising them on the basis of color are wholly fallacious and indefensible, and must speedily be abandoned, the General Missionary Council of the M. E. Church, South was told here yesterday by Dr. Will W. Alexander, director of the Commission on Interracial Cooperation.

The occasion was the point meeting of the Council and the celebration of the fiftieth anniversary of Paine College, local institution for Negroes supporetd jointly by the M. E. Church, South and the C. M. E. Church. Elaborating his convictions, Dr. Alexander said:

"The whole tradition of America is against the exclusion of American citizens from participation in the government. The movement for Negro suffrage in the South is definite and will continue with increasing persistence. It may come with the consent and encouragement of intelligent white leaders, or it may come through the selfish efforts of unscrupulous demagogues but come it will. This is one of the profound changes for which our people must prepare.

"We must also abandon two false philosophies that have misled us," Dr. Alexander continued. "These are (1) the idea that slavery was a divine instituton; and (2) the notion that Negroes are an inferior people. Time has discredited the first of these fallacies The second is being discreditied rapidly by the astonishing progress made by American Negroes since emancipation. This progress has not been the achievement of an inferior people. In every phase of American life Negroes have demonstrated their ability and their worth. Sooner or later we shall realize that our attitude toward them iis the surest test of our own worthiness and of the sincerity of our Christian profesion."

Featuring the elaborate three day program carried out by the Council there were addresses by Dr. Channing H. Tobias, Prof. W. A. Bell, and Bishop R. A. Carter, as well as by many bishops and missionary leaders of the other church. The occasion is regarded as a rmarkable demonstration of mutual understanding and cooperation between the two groups

or near, all time lows, could and would demand equal consideration. While they might not be politically strong enough to secure it, the effect would be further maladjustments and disgruntled classes.

"Over a long range point of view, sad as it has been, a favorable factor in the agricultural situation is the deflation that has taken place in farm land, placing new owners in a position to effect low cost production by reason of small capital investment. The realization throughout the nation that the burdens of taxation must be more equitably spread and should not be borne to such great extent by real estate will be most helpful to the farms. Taxation on farm lands in the future will not be the problem it has been in the past."

U. S. JUST BOWL OF TOMATOES

The homely tomato at last is coming into it sown.

So the National Canner's Association at the Stevens Hotel was told today by James McGowan, Jr., of Camden, N. J., who disclosed that whereas 316,268 cases of tomato juice were packed in 1929, 4,548,596 cases were put up in 1931 and even more in 1932. The American public in its search for new beverages has taken up the drinking of tomato juice on a big time scale, the speaker said.

The drink has proved healthful as well as appealing to the taste, he said.

THIS APPLIES EVERYWHERE

New Bedford Standard - Times: The destiny of this community is largely in the hands of the people who inhabit it. They can not, it is true, lift themselves by their own bootstraps, but they can, by intelligent effort, contribute to its comeback and its betterment.

RECIPROCITY

Schoolboy (home from college for holidays): "Well, dad, I bought some books on farming for you to dig into."

Father: "Yes and I've bought another eighty acres for you to dig into."

SAVE Something!

TALKS TO COLORED FARMERS

About "Dangers Ahead."

By Leon R. Harris, Secretary National Federation of Colored Farmers, Inc.

I take for granted, Brother Farmers, that all of us know that from now on we will have to make our own place in this country and must stop depending on some one else to set us down in pastures of peace and plenty where we may kick up our heels and have a good time without doing any thinking or work for ourselves. That old day when we could depend on the landlord, or the merchant, or the bankers, or the Red Cross, or the government, or any other individual or institution to carry us or furnish us or guide us to help us is about to pass and that day is not going to come back. A new day is here right now and we must wake up, put on our clothes, get washed and all ready for the new day's work. We are not going to find the way to success and prosperity very easy in this new day. There are dangers ahead—many of them. I want to tell you about a few of them that you may be on your guard and not get caught napping.

First, of all, in this new day. whether you are a farm owner, sharecropper, tenant or farm-hand, you are going to have to make deals, contracts and arrangements unlike any you have made in the past. You are going to have to make these deals, contracts or arrangements with harder masters who will expect you to keep your promises. You may not believe it, but you are going to find out that those who have dealings with you in a business way from now on are going to expect you to be a grown man,—not a child. You will be expected to know what you want and need,—how much it takes yearly for you to support yourself and family,—how much you can produce yearly,—all in all how much you are worth to the community in whch you live. You will be expected to have the ability to look ahead, to think clearly, to plan wisely and to carry out to the end the program you will make for your own welfare. Get this one thing down deep in your head,—from now on you will have to stand on your own feet and fight your own battles.

Let me warn you now to look out for false friends and advisers. You will be asked to join movements and organizations that look like they have been sent down from heaven for your particular benefit. Some of these organizations I know of promise everything. They promise you freedom from prejudice, discrimination, debt, poverty, worry and everything else now troubling you, in a year's time. These are the kind of organizations that will do everything for you if you will just join them. You are not told what you must do for the organization. Keep out of such organizations. They will only make you do something foolish and get you into more trouble than you are in now. I know of only three organizations any colored farmer should attempt to support. They are your church, —your rural school,—and your local community farm organization. Of course. if you are able,—you should do what you can to help some of our large national organizations,— such as the National Assn., for the Advancement of Colored People,—the National Urban League,—the Assn., for the study of Negro Life and History. But you should really sacrifice to support your community church, school and farm organization. You need these three organizations in particular and should realize that they deserve you support and sympathy and should have it. If you would prosper and progress, you must stick loyally to the big three—the church—the school,—and your farm organization. These organizations will help you more than any others can help you, because they teach you and show you how you may help yourself. Stick to the "Big Three" for the next few years and stop wasting time and money joining yourselves to every other movement that comes along.

And you are going to be better off and in a few years because conditions are going to change. All American farmers are going to be better off and naturally you will be carried along with the tide. You will be tempted to borrow what you do not need because you can get it. You will be tempted to buy what you can do without before you are able to buy it. You will be "worked on" as you have been in the past by those who think you are dumb and careless,—by those who are always trying to get something for nothing.

Don't be deceived by slick talkers. Don't spend a dime unless you know you are getting ten cents' worth. If you don't already own a farm and home,—save your money and buy one. You owe this to yourself,—to your children and to your Race. Buy in a Negro farm community,—near where others of our group have, farms,—for if we mean to exist in this country as Negro farmers we must develop and build up the Negro Farm Community. This is plain talk and some will not agree with it,—but I know what I am talking about. In a few years there will be no Negro sharecroppers at all and few tenants. There will be thousands of Negro farm hands who will be paid low wages by the week or month. I say this because I know that many of the large plantations,—especially in the South,—are going to be tied up together and run as "Corporation Farms." Those who work on these farms will be in the same condition as those who work in our large factories and steel mills, etc. They will be paid by the hour,— will be hired and fired as the bosses wish,—and perhaps often they will be out of work and their families will be cold and hungry.

I don't want you and your children to become farm hands. I want you to become a farm owner. I want you to live in a community of Negro farm owners. I want you to practice co-operative buying, producing, and marketing. I want you to be your own boss. I want you to be an Independent American citizen.

It's up to you. Stick to your church—your school,—your Unit of the N. F. C. F. Accept good advice and think hard for yourself.

COIN CARDS HELP TO RAISE FUNDS FOR N. A. A. C. P.

New York, Feb. 17—As a method of raising badly-needed funds during the depression, the N. A. A. C. P. has adopted a one dollar coin card, with spaces on it for ten dimes. Persons interested in soliciting aid for the association in this manner may secure cards from local branches of the N. A. A. C. P.

HERBERT HOOVER SAYS

"A family that owns its own home takes a pride in it, maintains it better, gets more pleasure out of it, and has more wholesome, healthful and happy atmosphere in which to bring up children.

N. A. A. C. P. WOULD STOP TALKIE OF "BIRTH OF A NATION" FILM

New York, Feb. 17—Announcement in the film gossip column of a New York daily paper that Thomas Dixon, author of "The Clansman", from which the silent picture, "The Birth of a Nation" was made, was seeking to have a talking picture version of the film produced, caused Roy Wilkins, Assistant Secretary of the N. A. A. C. P. to write the Motion Picture Producers and Distributors of America, Inc., urging that no consideration be given such a proposal. The association's letter declared the silent version of the picture depicted Negroes as bestial creatures and that these scenes were presented as historically accurate pictures of the Negro's place in this country's development. It asked that no effort be made to produce a talking picture version because racial strife would be stirred. The producer's association, through Carl E. Milliken, secretary, replied that it had no information indicating interest on the part of its companies in a talking version of "The Birth of a Nation."

GREAT NEGROES OF THE RACE

Chas. D. Dawson, Painter And Illustrator Issues Publication.

There has just come from the press of the National Baptist Publishing Board Plant, this city, a book under the caption of "A. B. C.'s of Great Negroes." The compilation was made by Charles D. Dawson, a painter and illustrator. He is responsible also for the drawings and the engraving in the book. Mr. Dawson can be reached at 3511 South Parkway, in the great city of Chicago. It is regarded as one of the most unique publications coming out during the year. The material is concise but the author, the painter, the illustrator and the writer seems to have left nothing undone to bring before the reading public the likeness accompanied with an accurate statement in so far as history can ascertain about these great race characters. It is understood here that he purposes to offer it to teachers in Public Schools, in Rural Schools as well as in Colleges.

LANE COLLEGE CONFERENCE OF FARMERS AND OTHER WORKERS TO MEET FRIDAY, MARCH 17

Jackson, Tenn., February 5th, 1933 (Special) The 30th annual conference of garmers, and other workers will be held at Lane College of this city on the 17th of March. The prospects for the usual large attendance of farmers, preachers, teachers, and day laborers are good. They are coming from all parts of Tennessee and from many of the adjoining states. The slogan of the Conference this year is: "Find a Way Out, or Make One," while the subjects for group discussion are: "A Sane Farm Program for the Farmer this Year," "A Study of Marketing," "The Importance of the Farmer Cooperating with His Wife," "Home Organization," "How Teachers and Preachers Can Help in Improving Rural or Farm Life."

Congressman DePriest To Speak

At the closing session of the Conference of farmers, and other workman Oscar DePriest of the First Illinois District, Chicago, will deliver the address. While his congressional district is well out of the farming region for the masses of the colored people, the Congressman is a student of the farm problems and has shown a keen interest in them and their proper solution. He will bring a ringing message for the farmers as he is anxious to see something worth-while done to improve the condition of the masses of people who live on the farm.

Dr. Henry Allen Boyd, Secretary-Treasurer of the National Baptist Publishing Board of the National Baptist Convention (Unincorporated) and the President of the Citizens Savings Bank and Trust Co., the only banking institution belonging to Negroes in the State of Tennessee, and the oldest in the United States, has been invited to be present and introduce the Congressman to the large audience that will be on hand to hear the message that the Congressman will bring. Dr. Boyd is a personal friend of Mr. DePriest, and for that reason a special invitation has been extended the noted churchman and bank president to be present.

Unit Farm Will Be Cultivated

YAZOO MT. ZION UNIT TAKES RIGHT STEP

James Davis, chairman of the Yazoo Mt. Zion Unit N. F. C. F., of Vaughn, Miss., has informed the national office that his Unit has rented forty acres of land and will plant it in cotton and peas and cultivate as a Unit farm. Members will do all the work and all proceeds from the 40 acres will be used for the benefit of the Unit and its members.

This is one of the first Unite to report this year that they have caught the spirit of cooperation and are working together as they should. Planting and cultivating a "Unit Farm" has been proven to be one of the easiest ways possible for a unit to pay its dues and hold to its charter. Officers of the N. F. C. F. have commended this unit on its progressive plan and wish it all success. They are anxious to hear from all others that are going to have "Unit Farms" this year.

Because of low prices for livestock in the Irish Free State sheep are being offered as prizes for card games instead of turkeys or geese, One Cappoquin man put up a fat sheep for a "45" drive for which sixty-six players contributed 25 cents each. The winner thus got the sheep for 25 cents, and the owner realized the good price of $16.50 for his animal.

CARRYING THE GOOD NEWS

The night lies dark upon the earth,
and WE have light;
So many have to grope their way,
and WE have sight;
One path is theirs and ours—of sin
and care,
But WE are borne along, and
THEY their burden bear;
Footsore, heart-weary, faint THEY
on the way,
Mute in their sorrow, while WE
kneel to pray;
Glad are THEY of a stone on which
to rest,
While WE lie pillowed on the
Father's breast.
Father, why is it that these millions roam,
And guess that that is Home, and
urge their way?
Is it enough to keep the door ajar,
In hope that some may see the
gleam afar,
And guess that that is Home, and
urge their way
To reach it haply, somehow and
some day?
May not I go, and lend them of MY
light?
May not MINE eyes be unto them
for sight?
May not the brotherlove THY love
portray?
And news of Home make Home less
far away?

R. Wright Hay in
Lutheran Herald.

Application for Membership

NATIONAL FEDERATION OF COLORED FARMERS (Inc.)

Vincennes Hotel, Chicago

As a farmer, I believe the time has arrived when the Colored Farmers should form a National Organization devoted to diversified production, grading, packing, shipping and marketing of farm products and to the purchase of needed farm supplies through co-operative methods, to the end that a more prosperous financial condition may result from their efforts as producers.
I hereby subscribe $5.00 for membership in the National Federation of Colored Farmers for a period of 12 months from date. Also $1.00 for an Annual Subscription to the Modern Farmer.

SOUTHERN WOMEN CONTINUE DRIVE AGAINST MOBS

Louisiana Women Form Council and Join Southwide Association for Prevention of Lynching

Baton Rouge, La., Feb. 10:—Leading white women of this state began here last week a new drive against mob violence by the organization of the Louisiana Council of the Association of Southern Women for the Prevention of Lynching, an organization promoted by the Interracial Commission.

The Louisiana Council comprises eleven women prominent in religious and civic circles, including representatives of the Federation of Women's Clubs, the Congress of Mothers, the Daughters of the Confederacy, the Council of Jewish Women, and the Presbyterian, Baptist, Methodist, and Catholic denominations. Mrs. Ben Knox, of Shreveport, was elected chairman Each member signed personally the following declaration as the platform of the Council:

"We declare lynching is an indefensible crime destructive of all principles of government, hateful and hostile to every ideal of religion and humanitiy, debasing and degrading to every person involved.....public opinion has accepted too easily the claim of lynchers and mobsters that they were acting solely in the defense of womanhood. In the light of facts..... .....we repudiate this disgraceful claim for all time. In evidence of our purpose we solemnly pledge ourselves to create a new public opinion in the South which will not condone for any reason whatever acts of mobs or lynchers. We shall teach our children at home, at school, and at church a new interpretation of law and religion; we will assist all officials to uphold their oath of office; and finally we will join with every minister, editor, School teacher, and patriotic citizen in a program of ducation to eradicate lynching and mobs forever from our land."

Louisiana is the ninth Southern state to form a branch of the Asso ciation. A tenth, Virginia, iis to organized n a few days. To date, more than seven thousand white women, located in 1200 towns in Southern States, have signed the above declaration and committed themselves to the Association's program. Mrs. Jessie Daniel Ames, director of woman's work of the Interracial Commission, has been the organizer of the movement.

The product of Tennessee dairy cows sold for more in 1931 than the total value of the cows.

BOOKER WASHINGTON SAID THIS

One cannot hold another in the ditch without staying down in the ditch with him, and in helping the man who is down to rise, the man who is up is freeing himself from a burden that would else drag him down. For the man who is down there is always something to hope for, always something to be gained.

When any people, regardless of race or geographical location, have not been trained to habits of industry, have not been given skill of hand in youth and taught to love labor, a direct result is the breeding of a worthless, idle class, which spends a great deal of its time in trying to live by its wits.—Booker T. Washington.

N. F. C. F. MEMBERS SAVE MUCH BY COOPERATION

(Continued from Page 1)

not members of the N. F. C. F. should note the savings possible.

Members in Tenn., Miss., Ala., Ark., Louisiana and southeastern Missouri are quoted the following prices:

"Clear Belly side meat 4c per pound. Salmon 75c per dozen cans. Pure coffee packed in 50 pound bags 10c per pound, cracked rice $1.05 and whole grain $1.63 per hundred pound sack. Patent flour from $2.75 to $4.55 per barrel, according to brand, corn meal $1.40 per barrel, pure lard $2.69 for a fifty pound can, macaroni 49 cents per case of 2 dozen packages, fancy daisy cheese 12 1-2 cents per pound, wheat shorts 94 cents per hundred pound sack, horse and mule feed (90 per cent grain) $1.00 per hundred pound sack. Five string brooms $1.45 per dozen, cotton plow lines packed one dozen 3 foot pair to the carton, $1.75 per doz. Canvas knit wrist gloves 75c per dozen pairs. Genuine red rust proof oats for seeding 30 cents per bushel or $1.50 per bag. Triumph seed Irish potatoes, $1.60 per hundred pound bag, or 96 cents per bushel. Red or Yellow onion sets $1.25 per bushel or about 4 cents per quart. Three ply roofing $1.25 per roll. Clean Easy laundry soap, 60 bars to the case, $1.48."

Members in the Carolinas, Georgia and northern Florida are quoted prices on the following articles:

"Rice screenings $1.45 and mixed, $1.90 per hundred. Patent flour $4.00 per barrel either in 24s or 48s sacks Granulated sugar $4.25 per hundred. Laundry soap 100 bars to the case $1.90. Salt 90 cents per 100 pound bag. Roasted coffee 12 1-2 cents per pound, packed in 50 pound bags."

In addition to these, members in southern Mississippi, southern Alabama and Louisiana are quoted the following prices on fertilizer:

"Nitrate of Soda packed in 200 pound bags, even weight, at about $29.76 per ton, including tax tags and freight. Sulphate of Ammonia, packed in even weight 200 pound bags, $25.80 per ton, including tax tags and freight. Nothing less than 15 ton cars can be ordered at these prices."

Members of the organization are well pleased with this service and as a result, new units are being organized weekly in many sections of the country.

Farm Leaders Expect Improvement

Farm leaders all over the country are expressing opinions that farm conditions will not get any worse and will gradually begin to improve during the present year. They base most of their hopes on legislation but realize that economic conditions generally will have a part in helping to restore to the farmer his proper share of the national income.

Sec. of Agriculture Hyde reports that there is an improvement in the demand for agricultural products. Cattle and hogs are apt to be cheap for a year or more but poultry is scarce and the prices are good. The cotton acreage has been reduced and is expected to be reduced still further this year.

Farmers are advised to practice diversified farming and continue to produce all foods possible for home consumption. Colored farmers should again plan to raise large gardens and can their surplus vegetables and fruits. They should increase their flocks of poultry and raise more hogs and keep more than one cow to the family.

PRAIRIE VIEW COLLEGE NEWS NOTES

By Napoleon B. Edward

Under the direction of Principal W. R. Banks, Prairie View State College has agreed to make a comprehensive survey of Negro education in Texas. Questionnaires for the survey are going forth to boards, superintendents, principals and teachers of the state. Beginning at home the first snrvey will be made of Walier County. This survey will be largely personal. Representatives of the faculty have been divided into groups and assigned to different sections of the county, enabling the whole county to be covered the shortest time possible. Each Negro school will be visited and first hand observations made and snbmitted by each group.

During the past week Prairie View State College was the mecca for outstanding educators and leaders of public thought, state, interstate, and national. Among the visitors were Drs. T. Arnold Hill and Jesse O. Thomas, representatives of the Urban League, New York City; Dr. Roscoe C. Brown, National Health Service, Washington, D. C.; Dr. F. Rivers Barnwell, State Health Service, Austin, Texas; Miss Florence R. Curtis, Director of Library Education, Hampton Institute, Hampton, Virginia; and Dr. Charles Johnson, sociologist and statistician, Fisk University, Nashville, Tennessee. Each and all of the visitors left a message of hope and encouragement in the face of depression and the unemployment sitnation. They predicted that dark clouds would pass and that Negroes as well as other races will see a brighter day, socially and economically.

Three questions will be debated this year by Prairie View State College submitted by Professor S. E. Warren, director of debates, as follows: (a) Resolved: That the Several States Should Enact Legislation Providing for Compulsory Insnrance. (b) Resolved: That the Uniited States Should Agree to Mutual Cancellation of Inter Allied War Debts. (c) Resolved: That the Economic Progress of the Negro will do more to Overcome Race Prejudice than the Cultural Achievements of the Negro. These questions will be debatd with the teams of Langston University, Arkansas State College, Tuskegee Institute, Alabama State College, and Florida A. and M. College.

FOR TARIFF TINKERS

Los Angeles Times: In 1922, under low tariffs, we imported 308,000 head of cattle, 24,897,000 pounds of fresh beef, 4,897,000 lbs., of veal, 6,730,000 pounds of fresh pork and 2,382,000 pounds of fresh lamb. Then came the Smoot-Hawley tariff act. The next year we imported but 86,000 head of cattle 1,784,000 pounds of fresh beef, 44,000 pounds of veal, 865,00 pounds of pork and 88,000 pounds of lamb.

POETRY IN REAL ESTATE

Bill bought a car with his money
And Joe bought a piece of ground;
Bill was a swell for a year or two,
As he traveled the country around,
But the car grew old and the paint came off
And often the tires went flat,
But Joe's land did not depreciate
In any such way as that.

Joe had little to show at first
For the money he had spent,
For a piece of ground couldn't follow him around
On pleasure and business bent.
Bill was a swell for a year or two,
But the worth of a car goes down
While a bit of earth increases its worth
If it is close to a thriving town.

Today Joe rides in a modern car,
For a bit of his land he sold.
He has no fear for the coming year,
No terror of growing old,
For he bought land with his little sum,
While Bill bought a shining car.
Now Joe has a first class modern home.
And Bill has a worn-out car.

THE MODERN FARMER

Vol. V. NASHVILLE, TENN., MARCH 15, 1933. No. 11.

APPLICATION BLANKS FOR CROP LOANS

FARMERS WHO NEED MONEY MAKE REQUESTS

Application blanks for farmers who borrow from the federal government, giving 1933 crops as security, are now being distributed. Colored farmers who must borrow should file their applications as soon as possible. It is reported that blanks may be secured from a committee in each county which has been appointed to supervise the distribution of blanks and applications. They may also be secured from the nearest crop production loan office or from the U. S. Crop Production Loan Office, Washington, D. C.

Regulations specify that only those can get loans from the government who cannot get them elsewhere. Loans can be used only for crop production and the borrower must agree to reduce his cash crop acreage 30 per cent under last year, unless he does not intend to plant but a small crop.

LOANS EXPLAINED

The maximum permitted to any one borrower this year is $300; or, in the case of tenants, the total of all loans to tenants of any one landlord within a single county can not exceed $1,200. The actual amount advanced by the authorities will depend upon the borrower's requirements. A first lien or mortgage on the crop will be required. The regulations require that loans be repaid on or before Oct. 31, 1933. Interest at 5 1-2 percent, deducted in advance, will be charged.

Since the loans call for a first lien on the crop as security the borrower frequently has to procure waivers from prior mortgages or rights. If the application is a

Roosevelt's Iron Will Stalled Off Surrender

For a man of such restless energy as Franklin D. Roosevelt to be stricken with paralysis one year after his vice presidential campaign would ordinarily have meant complete surrender, writes Drew Pearson in Harper's magazine. For adults, infantile paralysis frequently is fatal. Their recovery is infinitely more difficult than that of children.

Roosevelt was then 39. At first he could scarcely move. Most men at that age would have considered their active life ended. Roosevelt had squeezed into his thirty-nine years more than most men accomplish in sixty. He had wealth, social position, family—everything to tempt him to surrender to the life of an invalid.

That he did not, is what made Roosevelt what he is today. For there is written on his face now something he did not have eleven years ago. The traces of suffering are there, and understanding—but under the smile which his political opponents say is worth a million dollars, there is steel, hardened by a crucible through which few persons have ever passed.

BACK TO THE SOIL ADVOCATED

Prominent Ohio Pastor Issues Helpful Advice

Cleveland, O. Jan. 5, 1933.—Rev. Henry A. Boyd, Nashville, Tenn., Dear Brother: — I address this communication to you to allow you to know that we are interested in a National Farmers Association. To prove the fact to you and all who may be interested in the thing which will produce our living conditions to a minimum if persistently followed by our group, will do much to relieve the economic ailments in this nation: Last April Mr. Frank Chamdler and his wife, Rev. B. J. Prince and Mrs. Prince rented a seventy-six acre farm in Ashtabulah County state of Ohio, and raised much produce, many chickens and other live stock which were of great use and assisted much in helping to solve the economic conditions in their homes, and assisted many others in their various needs. These same persons expect to do more in 1933 to create a desire in the many citizens dwelling in densely-populated citles to leave the cities and take the same interest in the same work.

They expect to have a large chicken, duck, goose, turkey and hog ranch this year, besides raising all other produce. We would like to join the others who are in this National Association of Farmers in the nation. We hope that you will assist us in arousing the interest of others of our race living in the north, to go out of the cities to the farm, and that will assist the race much in making other races respect the black man as they should.

Going into the cities is not the thing for the race to do as a majority, but we must deal with the soil to become independent as other nations are doing. Let's market our prbduce and become self-sustaining in this country, which we can do if we labor to that end as others. Send us a copy of your journal, that we may become familiar with your program. Yours respectfully,

B. J. Prince.

Church Groups Helping Organized Agriculture

Formation of a league for justice for agriculture among a group of workers within Catholic and Prostestant churches gives organized agriculture's fight for equality the backing of thousands of rural preachers and priests throughout the nation.

One powerful activity of the organization is the preparation of special sermons for use on Rural Life Sunday on the fifth Sunday after Easter

Two other recent developments in religious organizations are definite actions taken in support of organized agriculture's program by the Federal Council of the Churches of Christ in America and the national Catholic Rural Life conference. The latter group has endorsed the domestic allotment plan for farm relief.

FARM MORTGAGES SOUND

Insurance Companies Still Ready to Invest

Insurance companies and other investors still perfer farm mortgages to city mortgages. Most money on mortgages has not been lost on farms but on tall buildings in New York, Chicago and other large cities.

Farm mortgages in the entire United States are just about equal to total mortgages on New York City property. In spite of the racket made about foreclosures and farm mortgages getting behind, less that 6 per cent are behind and less than five per cent of them are in foreclosure. The racket comes from organized farmers in particular, who object to being forced to pay off mortgages when money is scarce and as high as the sky and crop prices are as low as they have ever been. And no sensible person blames them for objecting and they should keep on kicking.

Agricultural Prorate Act Introduced in California

Sacramento, Calif.,—Assembly bill No. 1122, know as the Agricultural Prorate Act, has been introduced in both houses of the California state legislature. The bill is sponsored by farm bureau groups and large farm organizations throughout the state; also large canning organizations have become very much interested in the act as have large fruit growing and selling organizations.

The purpose of the act is to conserve the agricutural wealth of the state and to prevent economic waste in the marketing of agricultural crops. It further provides for the institution of prorate programs restricting shipping with respect to agricultural crops and for the enforcement of such programs.

The act also provides for the creation of a prorate commission which would consist of nine members and would hold hearings within the districts in which a request has been made for a prorate program.

Missouri Plans Farm For Homeless Youths

Kansas City, Mo.,—"Back to the land of berries" will be Missouri's answer to the question of what to do with its wandering youths and those from adjoining states.

Southern Missouri, where the Ozarks stir the natives to song and the visitors to admiration, offers the solution, according to welfare workers. Three thousand five hundred acres of land will be purchased near Table Rock Dam. This will be planted with strawberries raspberries, peaches, plums, pears and cherries. The farm will have 50,000 chickens and 100 cows Corn, wheat, barley, alfalfa and vegetables, will be raised.

A staff of instructors will operate the farm and direct the homeless youths. Shops, canneries and dairies will provide products which are expected to make the project self-supporting.

RACE CITIZEN AND DOCTOR GET PRAISE

HORSES REGAIN FAVOR

State Has Over 900,000 Animals

There will be no such thing as unemployment for the 902,000 horses and mules on Illinois farms this year, for farmers are going to use them to the limit as a source of economical power, it is reported by E. T. Robbins, livestock extension specialist of the University of Illinois.

Whenever farmers gathered at meetings this winter, they discussed the savings made by working their horses steadily last year, and they are going to do it again this season, he said. For one thing, this saved expense. In addition the horses and mules ate up about 22 1-2 million bushels of corn, or about one-seventeenth of the 1932 crop, and 36 million bushels of oats, or more than one-fifth of the 1932 crop. Otherwise this gain would have gone on an already overcrowded market and at best would have sold for less than the cost of production.

Farmers' interest in the increased use of horses was evident more than a year ago when a survey at county livestock schools conducted by Robbins indicated that one-third of those enrolled used five or more horses in one team for plowing and others heavy field work. The farmers found that any implement can be pulled easily if enough horses are hitched to it.

"This winter farmers expressed a still greater determination to let the horses do their bit to furnish an outlet for cheap grain and thus cut down cash costs for farm work. Byron Kline, of McLean county, for instance, plowed about 200 acres last year with an eight-horse team. He says that this team is going to enable him to do most of his field work alone this year. In this way he hopes to keep operation costs more nearly in line with farm income."

Heavy Pigs Grow More Rapidly, Report Shows

The birth weight of pigs has an important bearing on the gains they make in weight for the first six months, the United States department of agriculture found after observing 1429 hogs at its experiment station at Miles City, Mont., during the five-year period, 1927-1931.

The department found that the pigs varied in weight at birth from one and one-half pounds to four pounds, with most of them weighing from two and one-half to three pounds. The study of the pigs indicated that for each one-pound variation in birth weight there is a corresponding variation of approximately one-tenth of a pound average daily gain up to 190 days. In other words, a pig weighing on the average nineteen pounds three pounds at birth weighed more at the end of 190 days than a pig weighing two pounds at birth.

POOR PERSONS ARE FED BY TWO LEADERS

Idlewild, Mich.,— "I would rather walk than ride and have my people know no want when it is within my power to give relief," said John G. Robinson, a Race man, who came here a few years ago from his home in Jackson, Miss.

Robinson is an employee on the large and beautiful estate of Dr. Frank H. Escher, seven miles southeast of Idlewild. He had 55 hogs for which he had been offered cash or his choice of two fine automobiles, but he revealed to his employer that he preferred to give them to his people who were without either employment or funds.

Dr. Escher, not only a physician and surgeon of more than local repute, but who is known far and wide for his benevolence, said, "If that is the way you feel about it Robinson, I will join you with the 55 hogs I have and we will give your people 110 hogs." As a result more than 11,000 pounds of pork were distributed to 268 persons. Added to this a few hundred pounds of tender beef, coupled with groceries and medicines were given the more aged and helpless.

John E. Goodson of the Idlewild Heights garage, John Simmons, Charles Scott and Oscar Blankenship, contractors; William Lewis and many others placed their cars at the command of the philanthrophists for the distribution of the meat and the men of the community did the butchering and dressing of the hogs and beef.

Last Wednesday and Thursday were days universal rejoicing and thanksgiving on the part of Idlewild and its environs— days which by many will never be forgotten.

By the unanimous vote of the entire morning congregation gathered at the Idlewild Tabernacle, the pastor, Rev. H. Franklin Bray, was authorized to send a letter to Dr. Escher and Mr. Robinson expressing the grateful thanks and appreciation of the immediate beneficiaries in particular and the entire community in general.

The Farm Emigration

Peoria Star: During the last two years the agricultural population of the United States has increased by nearly 650,000 men, according to reports drawn up by economists at Chicago. This is largely due to the movement of the unemployed from the city to the country—motivated, no doubt, by the fact that no matter how bad the depression may be, the man who grows his own potatoes and raises his own chickens is at least going to escape starvation.

In some ways this is an encouraging development. But in the long run little will be gained if we simply transfer poverty from the city to the country. Unless some way is found of enabling these new farmers to get something more than a bare living out of the soil, this shift can not be permanent. A down-and-out farmer can be just about as pitiable an object as a down-and-out factory hand.

A BLESSING IN DISGUISE

Shakespeare tells that one touch of nature makes all flesh kin. The world-wide depression which holds all mankind in its grip has focussed the thought of the oneness of the world and the brotherhood of man. our own nation is being reduced to the lowest common denominator of basic human needs. Twelve million unemployed cry out in the language of the Lord's Prayer: "Give us this day our daily bread." The millionaire is no longer wailing over the loss of his swollen fortune in sight of millions more wretched than himself. The overlords of industry are chiefly concerned with finding work for others rather than making gain for themselves. The nation has come to a realizing sense of the actual situation and is addressing itself to comprehensive schemes of relief and restoration. Franklin Delano Roosevelt has been chosen and proclaimed the leader of the host to guide and direct our destiny in such a time as this. All partizan differences have been laid aside or subordinated to the accomplishment of the main purpose of recovery. Ex-President Hoover, with a fine spirit of patriotism, has placed his accumulated wisdom and experience at the disposal of his successor.

The American people are united as they have never been before except in times of war. Beneath it all there runs an undercurrent of deep thinking. We may not hope to return to where we were four years ago. Mr. Hoover was genuinely and sincerely mistaken when he urged that prosperity was right around the corner. His prediction was based on an outgrown economic philosophy. The day of rugged individuality by means of which huge private fortunes are accumulated is past and gone. Man made the machine which is disputing mastery with the maker. The machine has extolled the superman, and ignored the forgotten man. But in this day of readjustment the creator will regain his rightful dominion over the creature which he has made. The rugged individual will find the amplest room for the display of his individuality, but his reward will not be in dollars and cents or any other material units, but recognition that comes from high human service. The nation is fortunate indeed that it has a leader who has the wisdom and forethought to bring about the desired change without a bloody revolution. He starts out with the courage of a Mussilini and the audacity of a Hitler, tempered and restrained by the checks and balances of democracy. With Roosevelt, the rich and the poor meet together and he is the guide, philosopher and friend of them all. The crowning claim of the Gospel of Jesus was that the "poor have the gospel preached to them." As outcome of this depression, the rich may not be so rich, but the poor will doubtless be less poor. Comparatively few may have more than they need; but none will have less. A just balance between extreme theories of production and distribution will bring this golden mean to pass. What the twelve million unemployed crave is not so much instant gratification of their hunger, but the assurance that in the future there will be ample work and reward to prevent this calamatous recurrence. This is a program, not merely of recovery, but of reconstruction.

In the midst of the nation's distress we hear little or nothing of races, classes, sex, section, or factionalism. Most of our internal bickerings and animosities have given way to the common stress and strain. We have almost forgotten the race problem in face of the universal demand of pity and need. And yet these dark days force upon our attention the special circumstances of a group shut off from the rest by the double bars of race and class. The brunt of depression bears hardest on the man at the bottom. All relief brought to the upper strata lightens the superimposed burden of the man who lies underneath it all There is no race or color line in relief. No movement in our time has brought about such sympathetic understanding and cooperation between the races as the common pressure of depression. The watch word of relief agencies in all parts of the country is "how can we best feed the hungry, warm the freezing, clothe the naked and succor the suffering." Religion, creed, race and color are forgotten in eagerness to reach the forgotten man.

But the thoughts of the statesman must reach beyond the emergencies of this crisis. In the fullness of time this crisis must needs pass away. Our abundant material and human reources make that result absolutely sure. Starvation in the midst of plenty is a reflection on human intelligence and practical statesmanship. When this depression shall have been lifted, where then will the Negro stand in the general economic equation? The economic status of the Negro in our large cities and his future outlook are certainly not assuring. The agricultural conditions seem to be gloomy enough. But the necessities of the case require comprehensive reconstruction of both urban and rural industries. Mr. Roosevelt is committed to a program of such reconstruction, of which the Negro cannot fail to become the beneficiary. After it is all over, the present depression may yet prove to be a blessing in disguise.

KELLY MILLER.

Richmond Times-Dispatch: A noted publicist passes the news along that "angels don't eat." Well they say conditions have been bad everywhere.

FARMERS WHO NEED MAY BORROW

(Continued from page 1)

tenant, or is farming land under contract for a deed or so-called crop contract, or has given a prior mortgage on his 1933 crops, the regulations state he must secure the waivers of the actual owners of the land, and all prior mortgage holders. If the applicant is the owner of the land and farms it with tenants or share croppers, waivers of such tenants or share croppers must be secured. The regulations further specify that the person waiving his prior rights must agree not to dispose of his rent note, mortgage or other security without first having obtained the written consent of a duly authorized agent of the secretary of agriculture.

The regulations make it unlawful for any person to dispose of or assist in disposing of any crops given as security for any crop loan, except for the account of the secretary of agriculture and provide for a fine and imprisonment violation of such regulation. The regulations also require that each borrower agree to plant a garden for his home use and sufficient acreage to furnish feed for his livestock.

CITY-BRED MEN ON FARM FIND LIFE IS NO BED OF POSIES

The man who comes into a farming community from the streets and really shows them something, does exist, but it is equally true that his occurrence is of a sufficient rarity of attract farm paper reporters from afar, writes Russell Lord in Forum and Century.

From twenty-odd years of such reporting I can think of still others, but for every one such there are many more like the sick man who put up $9000 worth of henhouses on a ridge nearby my boyhood home in Maryland, and died of overwork and exposure within two years. (His buildings stand there yet.)

Or like the man who was among the first in our country to buy a tractor. When the thing broke down he would stamp off a little way and throw stones at it.

Must Be Strong to Farm.

From these and other borrowed expediences, and from a youth spent on a farm, as a back-to-the-lander under the happiest conditions, I assemble four cautionary generalities:

1. Don't try farming for your health; or your wife's health; not if the two of you are so fixed that you have to do most of your own work. You have to be strong to begin with, to stand up to that.

2. Take it slow. Long, sure thoughts beat brilliance in farming. You have to be effectively intelligent in numberless ways—as a hand, a mechanic, a manger, a weather prophet, in veterinary science, engineering, practical chemistry, genetics and so on, endlessly. To be a good talker helps little, if at all. The restless, imaginative temperament quite generally goes to smash.

Don't Expect Too Much

3. Don't expect independence. A man bosses his own place only in a manner of speaking. Most of his choices are choices made for him by the distant sway of markets, and by the swing of the earth and its weather.

4. Don't expect simplicity. It is city life which really is simple, with all the work specialized and most of it attended to by people you never see. A one-man farm with everything going haywire at once—a cow with milk fever, fence down, the neighbor's horses eating themselves into colic at the expense of your new corn, a child sick, the well dry and a note due—can be the most complex place in the world to that one man.

Wood alcohol will remove paint or varish from window panes.

FARMERS ARE TOLD TO PROTECT SELVES IN SEED PURCHASES

The United States department of agriculture gives farmers and seed dealers five suggestions for protecting themselves in the purchase of seed. With the need for economy greater this year than ever, the department offers these pointers to help farmers make sure that the seed they get will grow. The department administers the federal seed act, which forbids the sale of fraudulently misbranded seed in intersate commerce.

The five protective pointers are:

1. Buy seed early enough to allow for testing at home or at the state seed laboratory before planting.

2. Insist on a statement of the germination and the data tested. The test date should be within two months of the date of purchase, because some seeds fall off in germination rapidly.

3. Where variety is important, insist on a statement as to variety by the seller, or state certification.

4. Make sure of the quality of seed, particularly that offered at abnormally low prices.

5. Save all tags, invoices, advertisements and correspondence about the seed and report anything wrong to the state seed office.

The department reports the case of a Midwestern farmer as an example of what NOT to do. He bought a mixture of afalfa and clover seed from a distant seed house. The seller asserted that the seed, one-third alfalfa and two thirds red clover, was high in germination. The farmer complained that he did not get a single alfalfa plant. Late in the summer the case was reported to state officials. Some remaining seed was tested and found of poor quality, but it was too late for anything to be done. Testing of the seed before planting could have prevented the partial crop failure, the department says. The department urges reporting sales of misbranded seed to state authorities.

CITIZENS SAVINGS BANK & TRUST CO.

FOUND TO BE IN SOUND CONDITION AND LICENSE ISSUED TO OPEN

Tuesday Morning, March 14

The Citizens Savings Bank and Trust Co., the oldest banking institution in the world operated by Negroes, was considered a sound banking institution by the State Banking Department Monday and opened Tuesday Morning, March 14th, for the accommodation of its patrons whom it has served in the past as well as those who will open new accounts, according to the statement of Henry Allen Boyd, the president.

The Following are the Directors of the Institution:

HENRY A. BOYD,
J. C. NAPIER,
C. D. GORDON,
MISS S. B. WILSON,
D. W. CRUTCHER,
W. J. HALE,
C. A. DICKSON,
WM. D. LAWS,
MRS. S. F. WATKINS,
MRS. PRESTON TAYLOR,
C. V. ROMAN,
W. C. SHEFFIELD,
W. R. WALKER,
A. G. PRICE,
E. L. PRICE,
J. L. HARDING,
J. T. PATTON.

ANNUAL MEETING OF SUPREME LIBERTY LIFE STOCKHOLDERS

Chicago, Ill.—(Specali)—Stockholders of the Supreme Liberty Life Insurance Company were called to attend the annual meeting in this city by the president, chairman of the board of directors and the president. The date is set as high noon Tuesday, April 4th. It is taken for granted here that the largest number of stockholders ever gathered would be on hand to hear the reports of the past year's work and to elect a board of directors to continue the operation of this company that grew out of a merger of three corporations, all operating north of the Mason and Dixon Line. The session will be presided over by President Harry H. Pace.

Just prior to the stockholders' meeting the directors are to hold their session so as to hear and formulate reports to be submitted to the owners of the company that they have directed the last twelve months. There are forty-four of these direc- in this city, and the others coming from the various states where the company is operating and doing business. After the new board is elected by the stockholders they will hold a second meeting and elect officers to conduct the affairs of Supreme Liberty for another year.

FARM BUREAU HEAD OUTLINES PLAN TO RENEW PROSPERITY

Organized agriculture's plan to rehabilitate agriculture and restore its purchasing power to a normal basis was outlined before the senate committee on finance by Edward A. O'Neal, president of the American Farm Bureau federation, on February 20.

Mr. O'Neal recommended as a basic remedy for the country's ills (1) enactment of surplus control legislation to restore to agriculture price parity with other groups; (2) tariff adjustment to restore foreign trade, and to give benefit of the home market to agriculture as much as industry; (3) reduction of taxes and redistribution of the tax burden on a more equitable basis; (4) provision of adequate agricultural credit at rates as low as other groups enjoy; (5) reduction of transportation costs on farm products to a basis comparable with farm prices; (6) promotion of farmers' cooperative organizations; (7) guarantee of bank deposits in order to restore confidence and protect the public; (8) develop national planning for the rehabilitation of rural life.

Proposes Second Remedy

"The second basic remedy which I propose," said Mr. O'Neal, "is the adoption of a national monetary policy which will raise commodity prices and stabilize the purchasing power of the dollar at the average level in the period 1921-1929."

O'Neal called attention to the agricluture, with 25 percent of the fact that in the year 1925 to 1932 total population, received only 13 percent of the national income. From 1919 to 1932 gross farm income in the United States declined from 17 billion to less than 5 billion, he said. This in quality is a result of various national policies.

Cotton, wheat and hog farmers sell their products to a large extent on a world market or free trade basis, because the tariffs, if any, on farm products exported are largely ineffective, said O'Neal. Hog, cotton and wheat farmers must buy commodities, on the other hand, which are highly protected by tariffs.

"Another discrimination which has contributed to the inequitable distribution of income to agriculture is the inelasticity of fixed charges which agriculture must meet. Freight rates, interest charges and taxes have been out of line with farm prices more than ten years. Instead of building up buying power of agriculture and labor, which constitute the main market for the goods of the country, we have allowed a concentration of wealth and income to go on unparalled in our history. This concentration of income has been greatly aided by enormous concentration of capital through mergers, consolidations and monpolistic control. Yet some are advocating the further weakening of anti-trust laws so bigger and more powerful monopolies can be formed to operate with less restraint. I fear such a policy would ultimately drive the country to a state of socialism or something worse." O'Neal went on.

Answering the "bitter-end deflationists" who are against any form of inflation or price raising he said: "If we adopt this course, you will have to cut down the pay envelope of every worker, clip all salaries, scale down a large part of all private debts, put up with wholesome defaults of public debt, reduce taxes drastically and possibly reorganize the whole structure of goverment.

Pessimistic Outlook

"You will have to write down all costs and capitalizations, and while the process is going on it may be hoped that load of corporate bankrupticies and failures will not drag the business ship completely under. There will be further waves of security declines, wholesale bank failures and vanishing private fortunes. You will have to cut freight rates whether you like it or not, live through a chapter of railroad receiverships that well appall a bank, university, or life insurance president to say nothing of the railroad men themselves. In short, you will have to scale down the whole structure of wages charges, capitalizations, costs of every kind until they are in adjustment with the lower price level that prevails."

WOULDN'T SIGN NOTE; FARMER'S STOCK TAKEN

WAVERLY, Ala., (CNA)—Swooping down on the 200-acre place of a poor farmer here, four carloads of white deputies seized his livestock and farm implements while he was absent, because he had refused to sign a note which would have given his farm into the hands of the landlord of the district, L. H. (Hawk) Dawson.

This farmer, who works his land with the help of his three sons and one son-in-law, bought the land nine years ago for nine dollars an acre from the Farley family in Opelika. He paid all but $700 of the debt, giving five crops of cotton besides to "pay the interest." Four years ago the note was transferred to Hawk Dawson, a partner in the store there, fertilizer merchant and landord who sometimes works as many as 75 share-croppers and renters at one time on his estate. Dawson juggled figures to prevent this farmer from paying off the note, which was to run three years, charging what he received to "interest" and crediting only one hundred dollars on the principal.

MISSISSIPPI'S RESOURCES TO BE SHOWN AT FAIR

Plans to use the world's fair as a show window for the display of Mississippi's resources are revealed by E. H. Bradshaw, Jackson, Miss., chairman of the state's commission to the Century of Progress exposition, who has been conferring with fair officials on the Bayou state's exhibit, which is to use 2,000 square feet in the Hall of States Northerly island.

"Few persons up north realize the great advantages my state has to offer the youth of America in the way of oportunity, natural beauty, recreational facilities and health," he said. "We intend to present these advantages in the form of displays. Instead of "Go west, young man,' we say 'go south."

"In our state is a potential oil field that will make Mississippi the future oil center. Jackson, the capital, is located over a huge oil field. Our state is the home of the new tung oil industry. Already 2,000,000 tung trees are growing, and within five years we will have 100,000 acres of them.

"The nuts of the tree produce es-sential oils used in making paints, varnishes, linoleum and other water-proof compounds. The potential American market for tung oil is estimated at $90,000,000 annually. We will have a fine tung oil display.

"My state is fast becoming a leading dairy state; it affords the best of grazing for live stock as you will learn when you visit our exhibit at the fair."

To the Men of the Disarmament Conference

Take up the words of Jesus,
Ye statesmen, sorely vexed
By rival goals and counter claims,—
There is no other text.
All other proclamations
Heard by a world of strife
Are void and vain: take up again
The burning words of life.

Exalt the mind of Jesus.
No crafty thought will do;
The walking peoples of the earth
Will search your meaning through
The more august your phrases,
The more they doubt the scheme:
Men will be cold until ye hold
The golden rule supreme.

Turn to the love of Jesus.
There is no other peace,
No other plan from murderous greed
To bring the world release.
No trade in oil or cotton—
O be it understood—
Can stay from hence the growing sense
Of human brotherhood.

When ye have strewn to oceans
With shattered ship and plane,
What end is won, what good is done
If human hates remain?
Give to the deep your navies,
Your arsenals to the flame.
Without good will, the world is still
A shambles and a shame.

Follow the life of Jesus.
He walked the hostile earth
With simple deeds of service clean
To measure human worth.
No race, no creed, no station
To him was last or first:
No land was great except the state
For righteousness athirst.

Who now will rise among you
To dare those heights sublime
To which the whole creation calls
The conscience of our time!
Who now will cry: "No parley
Of niggard gain or loss,
While o'er the scene the Nazarene
Still hangs upon the cross!"

—Leslie Pinckney Hill.
—From Federal Council Bulletin.

PRAIRIE VIEW STATE COLLEGE PLANNING FOR CONFERENCE ON NEGRO EDUCATION.

Every necessary step is being taken by Principal W. R. Banks and faculty to greet and provide hospitable accomodations for educators and leaders of both races who will attend the Fourth Annual Conferen e on Negro Education, convening at Prairie View State College Friday morning, March 24.

Daily mail coming into the office of the Principal now makes it certain that the Conference convening March 24 will have a larger attendance than at any previous session. This is due in large part to the nature of the conference program. The greater number of Negro schools in the state is in the rural districts. The conference in its deliberations will, in the main, feature the following questions: (a) Negro Rural Schools in Texas, (b) Special Study in Detail of Negro Schools in Waller County.

The questions for discussion at the coming session of the conference are of primary importance to rural schools and rural school officials and are attracting a large attendance from every rural section in the state as well as from the cities and towns —school officials, superintendents, principals, presidents of Negro colleges, supervisors, teachers, preachers, physicians, farm and home demonstration agents, and editors.

The following directors of extension are thoroughly in accord with the objectives of the conference and are desirous to have their co-workers attend the session: Professor C. H. Waller, Leader, State Agricultural Extension Service for Negroes; Professor J. C. McAdams, Itineratn Teacher-Trainer, Smith-Hughes Work; and Professor F. A. Jackson, Chairman, Extension Schools Committee.

The consensus of opinion now is that the three years the Conference on Negro Education has been held at the college have proved its wisdom and justified its continuance. The Conferences have stimuplated interest in Negro education through out the state, resulting in better building better teachers, longer terms, and more effective school work.

Napoleon B. Edward,
Executive Secretary and Publicity Agent.

POTATO CROP MAY BE EQUAL TO 1932 YIELD

The potato crop this year may be as large as last year, on the basis of smaller acreage and increased yields, says the bureau of agricultural economics.

The bureau says that the harvested acreage this year "seems likely to be only 3 percent smaller than the acerage harvested in 1932, as indicated by farmers' planting intentions. This would put the acreage to be harvested in 1933 close to 3,270,000 acres, or about 100,000 acres less than in 1932. But the decrease in acreage, says the bureau, "is likely to be offset by higher yields which would result in a supply equal to or greater than that produced in 1932."

Farmers' planting intentions this year, according to the bureau, "reveal a continuation of the shift in potato acreage that has been developing the last two years in the increased plantings within trucking distance of consuming markets and for home use. There is also evidence that acreage of potatoes in gardens in and around industrial districts have been expanded materially the last few years, and in 1933 these will likely show further increases in sections where there are large numbers of unemployed or part-time workers."

Nature has given us two ears, two eyes and but one tongue to the end we should hear and see more than we speak.—Socrates. (Father of philosophy. Born at Athens, Greece, 470 B. C. Died 399.

IMPORTANT MESSAGE!

PRIZES OFFERED!

"WHAT'S THE MATTER WITH THE AVERAGE NEGRO FARMER?"

Some question, is it not? Well, we want to know and nearly everyone wants to know. We want you to tell us in your own way and in your own words.

We want to know so badly that we are offering three cash prizes for the best letters received as an answer to the question. Any man, woman or child may write. The contest closes September 1, 1933. Write 'em long or short, just answer the question. You may win a prize.

FIRST PRIZE—Five Dollars in Gold.
SECOND PRIZE—Three Dollars.
THIRD PRIZE—Two Dollars.

The best letters will be published throughout the year. All letters become the property of the Modern Farmer, when received. Judges are the editor and one representative from each state in which the National Federation of Colored Farmers, Inc., has chartered Units. These representatives will be chosen by the Executive Committee of the organization. Prizes will be awarded during the 1933 N. F. C. F. Convention.

Mail all letters written for this contest to

LEON R. HARRIS, Editor,
Box 209 Moline, Illinois

As a sample, we publish below a little sketch about? "What's The Matter With the Average Georgia Farmer." Don't copy from this, it won't count. We just want to give you an idea.

"What's the Matter With the Average Georgia Farmer?

"The average Georgia Farmer gets up in the morning by the alarm of an Illinois clock (Big Ben), buttons his Chicago suspenders to a Detroit overall, washes his face with Cincinnati soap in a Pennsylvania pan, sets down to a Grand Rapids table and eats Chicago meat, Indiana hominy, fried in Kansas lard, on a St. Louis stove.

"He then lights his New York lantern and goes out to the barn and puts an Indianapolis bridle on a mule fed by Iowa corn and plows the farm covered by an Ohio Mortgage with a South Bend plow, and when bed time comes he reads a chapter in the Bible printed in Boston and says a prayer written in Jerusalem. Crawls under a blanket made in New Jersey only to be kept awake all night by the barks and wails of a Georgia yellow hound dog, the only home product on the place, and then wonders why he cannot make money."

Now Get Busy And Answer The Question And Win One Of The Prizes

THE MODERN FARMER

Official organ of the National Federation of Colored Farmers, Inc.

Leon R. Harris - - Editor

Published monthly by the Modern Farmer at Nashville, Tennessee, and Chicago, Ill.

Nashville, Tenn., Office, 447 4th Avenue, North.

Devoted to the interests of the Farmer, Truck Gardner, Livestock and Poultry Breeder, the Home and the People.

Entered as Second Class Matter, April 10, 1929, at the Post Office at Nashville, Tenn., under act of March 3, 1879.

All contributions for publication in the Modern Farmer should be addressed to The Modern Farmer, 447 4th Avenue, North, Nashville Tenn.

No libelous matter will be published. Unsigned articles or letters, and those written on both sides of the paper will not be used.

Subscription price $1.00 per year, 75c for six months, payable in advance. Personal checks must be certified. Make all checks or money orders payable to The Modern Farmer.

Advertising rates and sworn circulation figures presented upon application.

"OUR SLOGAN"

STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT.

THE LAW

"It is hereby declared to be the policy of Congress to promote the effective merchandising of agricultural commodities by encouraging the organization of producers into effective associations under their own control.

The Board is authorized and directed—to promote education in the principles and practices of cooperative marketing—to encourage the organization, improvement in methods, and develojment of effective cooperative assosiations. (Public—No. 10—71st Congress. Sec. 1-5.)

THE GOSPEL

"This law is predicated upon the ability of the farmer to manage his own business, once he is organized to do so. Cooperation is the key to it and only in exceptional cases can the Federal Farm Board have any dealings with a farmer who is not a member of a producer-owned and producer-contrloled marketing unit." Hon. Sam'l R. McKelvie, Former Member, Federal Farm Board.

WHAT GOD HATH PROMISED

God hath not promised
Skies always blue—
Flower-strewn pathways
All our lives through—
God hath not promised
Sun without rain—
Joy without sorrow
Peace without pain.

But God hath promised
Strength for the day—
Rest for the Laborer,
Light on the way—
Grace for the trial,
Help from above,
Unfailing sympathy
Undying Love.

—Unknown.

WHEN "TH' FAULT'S IN ME"

The deplorable condition of the people of the cotton belt, black and white, is not the fault of the people of the other sections of the nation nor of the federal government. More than anything else, it is due to a lack of foresight and common sense in the people of the cotton belt themselves, especially the leaders. They have refused to accept sound advice,— have disregarded the lessons brought them by experience,— have refused to appreciate the law of supply and demand, and even today, instead of thinking economic, they are still thinking political and are turning to the government for relief.

The federal government nor any of its agencies will never be able to give the cotton belt the relief it needs most. This relief must come from its own soil and from its own people. When the fault's in me and I am suffering, I, me, myself must repent and change my ways and actions.

In the cotton belt there are thousands who play a big part in cotton but a mighty small part in the government, under which cotton is grown. This should not be. When the cotton belt really wants to find a way out of its difficulties it will begin by emancipating its tenants and shareeroppers and letting them live as American citizens.

THE NEW SECRETARY OF AGRICULTURE

Henry A. Wallace, of Iowa, editor of Wallace's Farmer, is our new Secretary of Agriculture. He is the third Henry Wallace who has edited this fine farm paper and the second to occupy the position of Secretary of Agriculture. His father served in a republican cabinet twelve years, under Presidents Harding and Coolidge. He died while in office.

Secretary Wallace has promised that his supreme concern will be for the "welfare of agriculture. In going to Washington in this new administration," he says in a farewell message to the readers of his paper.

"I hope to attack the problems of this day with as much courage and vigor as my father brought to the same task twelve years ago. While the situation of the world and of agriculture is far more desperate today than it was then, I have an advantage he did not have I have the privilege of working under a chief who is definitely progressive, entirely sympathetic toward agriculture, and completely determined to use every means at his command to restore farm buying power."

We believe Mr. Wallace will have the support and sympathy of all fair-minded Americans. We sincerely hope that he will recognize the plight of the colored tenant farmer and sharecropper, and that under his administration they may receive a little more consideration they than have received in the past We hope and pray that the "new deal" in some way will help agriculture's most forgotten men."

FARMER'S SUNDAY

The National Federation of Colored Farmers has chosen April 30th as Farmer's Sunday and President Davis has issued his annual proclamation. The day should be observed as such in all our rural communities and the opportunity is given our city congregations to give a little thought to their country cousins.

Officers of all units of the N. F. C. F. should work diligently for the success of the day's efforts. Especially should they seek to interest their friends and neighbors in the work and objectives of their organization. The N. F. C. F. has grown rapidly but the effort must not cease until all colored farmers are organized and working under its banner.

These times have taught all farmers some good and useful lessons. Money crops have not brought a return equal to cost of production so most of us are filling our own needs from our fields, orchards, gardens and barns. We are not depending much on products formerly purchased.

Unemployed city people are drifting back to the farms. There is a demand for information from all agricultural extension agencies. Iowa farmers want to know how to cure hams. Ohio farmers want to know the best methods of tapping maple trees growing along the highways. Farm women are making garments out of flour sacks and feed bags. In some sections farmers have gone back to the old art of splitting rails and making boards to provide less costly fences and roofs. This is the era of patching and repairing on the farms.

This is a mighty good thing for all of us and especially for our young people, the future farmers. We have simply gotten too big for our breeches. When we start going forward and upward again we will know better how to appreciate our blessings and will be less greedy and selfish.

GOD WAS NOT FORGOTTEN

Just before he took the oath of office and assumed his duties as President of the United States, President Roosevelt, with members of his cabinet and their families, stopped at old St. John's Episcopal church, where Rev. Endicott Peabody asked spiritual aid for the new president and the nation.

And noble act and a fine example! No man can be a failure who does not forget God. The biggest reason why so many of us have so much woe and trouble is because we are too indifferent to stop by the church.

The National Federation of Colored Farmers is again urging all Units to plant the same varieties of crops in their communities that they may be able to ship in carlots and obtain the better market prices. Decide early on the variety and plant sufficient acreage. If in doubt, write the National Office for information.

Units that did not hold their "Benefit Festivals" for the Modern Farmer are urged to hold them Saturday, April 29, —the day before "Farmer's Sunday." Send receipts direct to The Modern Farmer 447 Fourth Avenue, North, Nashville, Tenn. If all will do a little we can keep going.

Are you getting ready to cultivate your Unit Farm for the benefit of your community church school or Unit ? It will pay you to do this.

TALKS TO COLORED FARMERS

About "Farming Right."

By Leon R. Harris, Secretary National Federation of Colored Farmers, Inc.

Brother Farmers, I am aquainted with a good many colored farm owners who have caught that funny American disease known as "Bigness." Ever hear of it? The disease is "catching." These colored farmers caught it from their big white farmer neighbors and it has made them pretty sick and unhappy. These farmers purchased 150 acres or larger farms,— have worked themselves and their families half to death trying to pay for them and to keep them up,—and today they are still in debt, are getting old, and their disgusted children have left them and fled to the cities. They wanted the big farm because Mr. John had a big farm,— they wanted a ten mule farm because Mr. Sam had a ten mule farm,—they got them and the most they got after all was a big sack full of debts and worries and troubles. They believed that the slogan, "Bigger and Better" was the very thing. They know now that "Small and Good" would have been more sensible.

Nearly all big farmers are in pretty bad shape today but the small, good farmers are holding their own. The small farmers are going to continue being the best and the happiest farmers. The day of "big" farming is about over. So the first thing to think about when thinking about "farming right" is to think about being a good farmer instead of a big farmer.

The good farmer will cultivate his best land only. He will stop wasting time and money trying to grow crops on land that will not produce enough to pay for the seed and fertilizer, much like the labor. He will pay as much attention to control his production. For instance, he will grow more food and feed crops this year and less cotton, tobacco and other crops of which there is now a large surplus He will rotate his crops,—will plant clover, peas or other legumes one year out of every three,— that he may build up his soil and stop wearing it out growing one "pay crop" after another.

The good farmer will be an all around farmer,— not just a "cotton," tobacco, or peanut farmer. He will pay as much attention to his orchard as he does to his cotton or tobacco patch. He will be as interested in his cows or chickens as he is in his mules or hogs. He will be as willing to buy his wife a washing machine or a labor saving cook stove as he is to buy for himself a new cultivator or any other labor-saving implement.

Anything worth doing is worth doing right, no matter how small or how big. Farming is more than just making a living. Farm life should be the happiest life a colored family can enjoy in this nation. And when you pay more attention to "farming right" than to "farming big," you stand a chance of getting some happiness out of your work and will find contentment instead of worries.

During the past twenty years there has been a rush to the cities. During the next twenty there will be a migration back to rural centers. Big cities are not going to be so important in the future because the big city factories and plants are going to be broken up and scattered about in the smaller towns and cities and even in rural districts. Colored farmers should look ahead,—remember that the world moves,—and be ready to take advantage of the changes as they come. Your ideal place for a home should be a small farm in a colored farm community.

CHINESE MAXIMS

To spoil what is good by unreasonableness is like letting off fireworks in the rain.

Nine-storied terraces rise by a gradual accumulation of bricks.

The prince who deserves the favor of heaven should practice and honor the five virtues; charity, justice, prudence, fidelity, and politeness.

An unkind word falls easily from the tongue, but a coach with six horses cannot bring it back.

Nothing causes women to lose the taste of visiting but the want of attire and ornament.

Without going, you can get nowhere.

The hearts of the people are the foundations of empire.

Trust not the flatterer; in the days of sunshine he will give thee three pounds of butter, and in thy need deny thee a crust of bread.

Something is learned every time a book is opened.

The more a wife loves her husband, the more she corrects his faults.

Never was good work done without much trouble.

—From Christian Science Monitor

Application for Membership

NATIONAL FEDERATION OF COLORED FARMERS (Inc.)

Vincennes Hotel, Chicago

As a farmer, I believe the time has arrived when the Colored Farmers should form a National Organization devoted to diversified production, grading, packing, shipping and marketing of farm products and to the purchase of needed farm supplies through co-operative methods, to the end that a more prosperous financial condition may result from their efforts as producers.
I hereby subscribe $5.00 for membership in the National Federation of Colored Farmers for a period of 12 months from date. Also $1.00 for an Annual Subscription to the Modern Farmer.

Interesting News & Notes

Agents of the Scully estate of 45,000 acres near Lincoln, Ill., have announced a rental reduction of 40 per cent. The rent has been reduced during the past two years from $7 to 3 dollars per acre.

Pres. Roosevelt is a great lover of trees and it is believed that more trees will be planted during his administration than under any other.

It is estimated that the winter wheat crop will be the smallest in more than twenty-five years.

Italian bacteriologists claim that smoking destroys microbes in the teeth and leaves the mouth sterilized for several hours and therefore, is beneficial. Some good news for the harassed smokers.

A large timber wolf was shot and killed by a county official of Whiteside county, Ill. He trailed two wolves all day and finally managed to kill one of them.

The Bureau of Census has reported that there are 2,803,756 colored families in the United States. 739,812 of these have only two persons in the family; 338,114 have only one member and 500,990 have three persons in the family. The medium size of the rural farm family is 4.05 per cent.

A vegetable growers' association has been organized by the colored farmers of St. Croix, Virgin Islands and has signed an agreement with a New York commission firm to market early crops. Some 500 acres of tomatoes and other vegetables are growing. These will reach New York three months before Florida vegetables are ready for shipment.

Plans are being made to swap sweet potatoes grown by the unemployed of Shelby county, Tenn, for Irish potatoes grown by the jobless of Winnebago County, Illnois.

There are ten colored farmers in North Dakota, a decrease of sixteen during the past ten years. Five are owners. These five farmers own 1,405 acres and the value of land and buildings is $40,700. South Dakota has 40 colored farmers, a decrease of only seven during the last ten yeas. Of these, 26 are full owners. They own 10,744 acres and the value of their land and buidings is $163,295.

MORGAN COLLEGE NEWS

DR. A. D. WRIGHT LECTURES ON "GREAT EXPECTATIONS"

Dr. Arthur D. Wright, president of the Jean-Slater foundation addressed the student-body of Morgan College on the subject "Great Expectations' at the weekly chapel services on March 8th.

Dr. Wright stated in his discourse that every youth has a right to expect a college to give him a training that will enable him to utilize whatever talents he possesses and a right to expect the world to utilize his talents when he presents them. In addition to his address, Dr. Wright outlined the work that has been accomplished through the two foundations of which he is president.

Phi Beta Sigma Fraternity Sponsers Essay Contest

An essay contest dealing with the various phases of Negro business is being sponsered among the students of Morgan College by the Phi Beta Sigma Fraternity. The contest is opened to all students and prizes of five and two and a half dollar gold pieces are being offered.

Dramatic Club Appears At Bethel Church

W. S. Gilbert's fairy-like drama came to life on the stage of the lecture room in Bethel A. M. E. Church on Wednesday night, when it was performed by the Mogran College Dramatic Club and excusing a few minor flaws it was well performed.

Fine Cast

James Brown, Rosetta Murray and Phenola Valentine as the three leading characters in the play, gave excellent portrayals of their roles. Rosetta Murray was ideally suited to the role of innocent animated statue. Phenola Valentine and James Brown demonstrated their acting ability which led to their receiving such wide acclaim in the one act play "Rain" which was performed at Howard University last week These three were ably supported by Annette Colbert, the shrewish wife, and Lloyd Galloway her husband. At times, Erma Williams's portrayal of Lady Myrine had a little too much burlesque in it, but on the whole was quiite satisfactory. Harvey Denmark as the soldier, Verner Henry and Cornelle Daye as the slaves, injected much realism in the depiction of their parts.

The Dramatic Club appeared at the weekly social meeting of the City Wide Young People's Forum on Saturday night in a presentation of H. Stuart Cottman and Le Vergne Shaws's one-act play, "A Message From Khufu" on March 11th. The play deals with the fate of an explorer and his assistant who disturb the remains of mummy in spite of a warning written on the sarcophogus. Three of the explore pay the price of their folly with death. The third escapes with his life after replacing in the coffin priceless jewel which they had stolen from the mummy. The cast includes William Lewis, James Grant James Mebaen and Harvey Denmark, Mr. James Brown gave a reading from James Weldom Johnson's "Creation" which was very faorably received.

MORGAN COLLEGE DRAMATIC CLUB IN EXTENSIVE PROGRAM

After completing a successful program of three one-act plays at Howard University under the auspices of the Howard Players and W. S. Gilbert's mythical three act drama at Bethel A. M. E. Church, Mr. James R. Gibbs, student manager of The Morgan Players released the full schedule of the club for the second semester. He explained that the aim of the club accepting so many engagements was to turn over to the college at the end of the season all the club's surplus in order to help the school along with its finances during these strenuous times.

The schedule of the club takes it to many of the important cities in the cast. The players will appear for some of the largest white and colored churches, and a Jewish synagogue. They will appear for college, high school, welfare groups, forum, A. U. W. C. A., a tournament and a radio broadcast are also on the program. In short the Morgan Players will travel further and put on what is perhaps largest dramatic program ever put on by a Negro college. The complete program for the second semester including those already presented, is follows:

(Where organizations are not mentioned the church is sponsoring the program).

Feb. 10th—Mount Vernon Place M. E. Church, (white) Baltimore

Feb 24th—Howard University, Washington, D. C., Presented by The Howard Players A. N. I. D. A. Program.

March 28th—Bethel A, M. E. Church Baltimore.

March 11th—City-Wide Young People's Forum (Social Hour) Baltimore.

March 14th— Eutaw Place Temple (Jewish) Baltimore.

March 13th—Presentation of Va. State Players Guild. Baltimore A. N. I. D. A. Program.

March 25th—Metropolitan M. E. Church

March 28th—Lutherville, Md. Green Spring Chapel.

April 5th—Negro Intercolegiate Dramatic Association's Turnament, Richmond, Va., Lyric Theatre

April 6th—Roanoke, Va., Addison High School—Mr. T. R. Parker and Faculty

April 7th Lynchburg, Va.,—Lawrence Burton, William Thompson, alumni and friends.

April 20th—Grace Presbyterian Church, Baltimore

April 21st—Annapolis, Maryland, Annapolis Public Forum.

April 24th—Wilmington, Deleware Howard High School, Junior Class

April 25th—Atlantic City, N J. Y. W. C. A. Mrs. Louie Love

April 26th—Orange, New Jersey Union Baptist Church

April 27th Montclair, N. J.—Mrs. L. B. Jewett and church organization.

April 28th—New York City (afternoon) Broadcast Station W. E. V. D. (night) St. Mark's Church Church organizations and Morgan Alumni Group.

April 30th—Philadelphia, Pa. Mr. John H. Marquess and Quaker City Lodge of Elks.

May 4th—Baltimore, Md.

Final Program

The one-act plays in the club's repertory are: "A Marriage Has Been Arranged," and "The Man on The Curb," by Alfred Sutro, "A Matter of Husbands," "More Man" by Alico Garstenburg, "In Dixon's Kitchen," by Wilber Stout, "Out of The Night," by Frances Smith, "A Message From Khufu." by Cottman and Shaw, "Magnolia's Man" by Gertrude Coffin, "Rain," by Dona Burnett, and "Bad Man," by Radolph Edmonds. The three act play is "Pygmalion and Galatea," by W. S. Gilbert.

To fill the many engagements and keep the student casts out of school as little as possible, different groups will fulfill as many as possible. Due to the depression, however, the non royalty plays in the list will be presented the largest number of times.

The director of the Morgan Playtrs is Professor Randolph Edmonds who specialized in drama and play production in Oberlin College, and Columbia University. He is the author of "Shades and Shadows," o collection of six weirdly imaginative stories in the form of drama. Besides courses in literature he teaches the ccurses in playwriting, Play-Production and the arts of the Little Theatre.

ATLANTA UNIVERSITY SUMMER SCHOOL OPENS JUNE 10 with six affiliated institutions

The Atlanta University Summer School which opens June 10th will have six affiliated colleges—Morehouse College, Spelman College Atlanta School of Social Work, Morris Brown College, Clark University and Gammon Theological Seminary, it has just been announced by Dr. John Hope, president of the University. This pooling of the resources of all the Negro institutions of higher learning in Atlanta will make possible opportunities for summer study unparalleled in this section of the country.

The Summer School is designed particularly to meet the needs of teachers, social workers, graduate students, and students working for college credit. This year three ad-

ditional features of major importance will be offered,—a model one-teacher rural school for observation and practice; a Community Recreation School, sponsored by the National Recreation Association; and a four-week Minister's Institute, the first interdenominational school for ministers ever held in Georgia. Expenses will be kept at a minimum, and reduced rates on the Round Trip Indentification Plan have been authorized by the railroads from stations in Georgia, Alabama, Florida, Mississippi, Tennessee, North and South Carolina.

The Summer School had its beginnings in 1921 when Morehouse College featured courses in education for the benefit of public school teachers of the State. Each year brought increasing demands for content courses, and in 1923 the Summer School was reorganized as the Morehouse-Spelman Summer School, and was conducted jointly by Morehouse and Spelman Colleges. Atlanta University became affiliated in 1928, and the Atlanta School of Social Work in 1929. In 1932 graduate courses were offered, and over ten per cent of the students registered for graduate work.

This year graduate courses will be offered in Biology, Chemistry, English, History, Economics, Education, and Mathematics, and all courses will have same standard and corresponding credit value as during the regular academic year. The Sixth Annual Rural Institute will be conducted for teachers and leaders in rural communities. The Nursery School of Spelman College will be open to student of the Summer School and courses in the education of the pre-school child will be closely correlated with the Nursery School. Introductory and advanced courses in Social Work will be offered by members of the staff of the Atlanta School of Social Work.

A large number of faculty members of the seven affiliated institutions will be in residence for the Summer School, and in addition, outstanding teachers from other institutions are being secured Increased cooperation among the Atlanta institutions makes available facilities, including science laboratories and equipment. The Atlanta University Library, which has a seating capacity of 600, and includes the books collections of Atlanta University, Morehouse College and Spelman College, offers excellent opportunities for study reference, and cultural reading.

PIG ROUTS CATTLE THIEVES

When cattle thieves attempted to raid a dairy farm in Vila Fran queza, near Ailcante, Spain, they were frightened away by the loud grunts of a suspicious pig. The grunts also aroused the people of the farm but the theives, enrage by the interruption, killed the porker before they fled.

FERTILIZER COMPANY FORMED

New Orleans, Feb. 24. —Organization of the American Potash and Super-Phosphate Corporation with a capital stock of $250,000 has been announced. The concern will extract soluble potash from feldspar, glauconite and potassium bearing minerals found in the south and will also manufacture acid phosphate, according to L. M. Turnbull, vice president and general manager. The company is headed by Stephens F. Sherman of New York.

HOW A FARMER SEES IT

New Bedford Standard Times: The Cotton Textile institute has compiled a list of certain staple articles made from cotton to show how the farm relief bill passed by the house and now before the senate would increase prices. The list includes overalls, house dresses, work shirts, cotton blankets, sheets, towels, bedspreads and duck trousers, practically all of them things that farmers would require for themselves or their families. The price increases are substantial and should give farmers as well as urbanites something to think about.

More trenchant is the letter of a northern New York farmer who can see no help for him and his neighbors in the bill but quite the reverse. "We raise a few hogs for our own use," he says, "but we have to buy tobacco, overalls and flour for ourselves and western grain for our stock, and the prices of these are to be boostod to pay the south and west a bonus. Looks to us as though somebody was paying off an election bet at our expense." And in conclusion he writes: "It took two quarts of milk to pay for the 3-cent postage stamp on this letter."

FARM HAND WAGES REPORTED LOWEST IN THREE DECADES

Farm wages are the lowest in thirty-four years, ranging from an average of 40 cents a day with board in South Carolina and Georgia to $1.75 a day in Rhode Island, according to the bureau of agricultural economics, United States department of agriculture. The bureau has reports that some farm hands in the north central states are getting only board and lodging for their labor.

The bureau's index of the general level of farm wage rates on January 1 was 74 percent of the five-year pre-war average, having declined 12 percent since Oct. 1, 1932, when the index was 84, whereas the average seasonal decrease during the preceding ten years has been about 9. percent The declino since October 1 is attributed to increased supply of farm labor and decreased demand.

The supply of farm labor on January 1 was 127.3 percent of normal, but the demand on that date was only 53.8 percent of normal. Actually there is no demand for additional hired hands because practically all farm labor jobs are filled.

The bureau attributes the unprecedented low demand for hired hands primarily to the continued decline in prices of farm products Farm operators are being compelled to do their own work, and those who have any cash resources are spending only what is unavoidable for the services of hired hands.

The bureau notes that farm wage rates went down at a faster rate last year than the decline in industrial wages, farm wages having declined 24 percent in 1932 whereas industrial wages dropped 10 percent.

THE TEACHER EXPLAINS

City Boy (on visit to country): "Say, teacher, what's that funny lookin' cow with his tail straight up in the air and that mad look in his eyes?"

Teacher: "Sh-h-h! That's no cow —that's the cow's husband!— Farmerette.

AMERICAN TELEPHONE AND TELEGRAPH CO. REPORT

The annual report of this company showed strong resistance to influences. Total operating revenues of the system as a whole, excluding Western Electric and Bell Telep hone of Canada, declined 11 per cent during 1932, but operating expenses were reduced in similar proportion. Customary policies as to maintenance and depreciation were continued, 36 per cent of total gross revenues having been used or set aside for such purposes. Net earnings before charges (for the system as a whole) were $194,471,039, or an increased moderate return of 3.9 per cent on the cost of plants and other assets.. Approximately one-third of the system's capitalization is in funded debt, and charges thereon were earned 3.58 times, as against 3.98 times in 1931. Income of the par ent company, alone, was equivalent to 6.82 times interest charges on its funded obligations, as compared with 6.55 times in 1931. The increase resulted from lower charges, because of some bond retirements in 1931. Telephone disconnections are now at a less rapid rate, indicating that net gains would supplant net losses promptly with any sustained business upturn.

"Financial position of the system at the 1932 year—and disclosed the characteristically conservative policies of the management, and its foresight in having obtained a large supply of additional capital under the comparatively easy money conditions of 1930. Total current assets were $13,378,620, as against current liabilities of $168,874,427. Of the former, $59,771,569 was cash adn $144,478,899 was temporarily invested in government securities. The current ratio at the close of 1931 was somewhat stronger, changes last year having mainly reflected the financing of necessary extensions and the refunding of maturing bond issues out of funds in hand, since Bell System companies did no public financing in 1932. There were no bank loans, and no obligations of any consequece will mature prior to 1937.

Bonds of this company are amply protected by earnings, whether viewed with respect to their position as junior obligations of the Bell System as a whole or as obligations of American Telephone and Telegraph Co. alone."

Citizens Trust of Atlanta Opens

Atlanta, Ga.—(Special Wire To The Nashville Globe)—Permit to resume business on unrestricted basis was granted the Citizens Trust Company on yesterday by the State Banking Department, this week. The order was affective as of March 14th.

The officers of the bank, its stockholders, directors and friends were jubilant over this announcement here, and the finest spirit ever evidenced in this, the capital of Georgia, was shown.

The president, and the cashier of the institution reported that the first day's business showed deposits far in excess of withdrawals.

A book of verses underneath the bough,
A jug of wine, a loaf of bread and thou
Beside me singing in the wilderness—
Ah, wilderness were paradise now.

SQUASH AS A CONTROL FOR PICKLE AND MELON WORM

Gainesville, Fla., Feb. 24.—By planting early summer squash among fields of cantaloupes and cucumbers, truck growers of Florida are able to control in a fair measure two of their worst enemies, the pickle worm and the melon worm, according to J. R Watson, entomologist of the Florida experiment station.

Observations have shown, Mr. Watson says, that the moths which lay the eggs for these worms prefer the summer crook-neck squash to cantaloupes or cucumbers Growers take advantage of this fact by planting squash around the edges of their fields. Many growers also plant a row of squash through the field every 200 or 300 feet. The squash are planted at the same time as the cantaloupes or cucumbers.

This method of control has been recommended strongly by Mr. Watson, who adds that it is also a good plan to go through the field after the crop is up and plant all missing hills to squash. The squash will grow more rapidly than the cucumbers or cantaloupes and will be more attractive to the moths, he says. Infested squashes should be picked and destroyed.

A thorough spraying of lead arsenate in bordeaux mixture will go far toward controlling the melon worm, but not the pickle worm, according to Mr. Watson. The pickle worm lives entirely inside of the fruit or stalks where it is out of reach of insecticides. Before the melons appear, the melon worm feeds to a considerable extent on the leaves where it can be poisoned by the spray,

The moths which lay the eggs for these worms do not get abundant until along in the spring, Mr. Watson says, so that early cucumbers frequently escape their ravages or suffer comparatively little damage, but late cucumbers and cantaloupes are invariably severely damaged.

The Dying Gasp of the Eighteenth Amendment

The last election seemed to settle the doom of the Eighteenth Amendment. The American people, with impressive majority, declared for its erasure from the Constitution. The Congress of the United States in obedience to the popular mandate has submitted the matter to the people of the several states for their anticipated approval. In the fullness of time it is expected that the amendment repealing the Eighteenth Amendment will be ratified.

The old motto is not universally true. Moral reform may indeed move backwards. The nation seems to see fit to look backwards after having taken hold of the plow or righteousness. It is but fair to hold the mortal and religious forces of the country responsible for this moral debacle. The children of darkness were wiser in the art of getting results than the sons of light. The drys were outgeneraled and out maneuvered by the wets. The friends of temperance stood impotently by while wets reversed the overwhelming majority against them and turned it into a like majority for wetness.

The Republican Party cut a sorry figure indeed. The party of morals and temperance from its beginning lost its moral prestige by compromising with the forces of evil. The emocratic Party has been consistently wrong on this issue. Even the proponents of dryness can hardly forbear admiring their boldness and daring. It is entitled to whatever glory there may be in the victory of an worthy cause. The matter now is up to the people of the several states. As they have already spoken on this issue through their chosen representatives, we can only expect them to ratity the poor judgment already registered. The twenty first amendment to the Constitution will be the first to eradicate an existing amendment and also to reverse the order of progress in the moral direction.

The genuine believers in the principle of prohabition as the only effective means of temperance, out of moral consstency will be compelled to continue the fight to the last ditch. For after all, moral principles cannot be decided by majority vote. One in the right is a majority. If the prohibition forces are wise they will reorganize their shattered forces and prosecute the most vigorous fight possible before the electorate of the several states. At this stage of the proceedure the victory of the drys can only be technical and of limited value. To retain the Eighteenth Amendment in the Constitution by a bare majority vote in one fourth of the states against the overwhelming majority of three fourths of the most populous settes would seem like a mockery of the majority rule. If the law should be upheld by such technical subtifuge, it would be openly repudiated by the practice of the people. The only effective hope of the drys is to get the majority on their side by argument and moral suasion. To this end it is better to have the law upheld in principle than to have it eliminated. For if once the law is expunged from the Constitution, it will be all but impossible ever again to have it reinstated. But if it is allowed to remain, even if nulified for the time being, in practice, there is better hope of edueating the people up to the wisdom and good policy of its observance.

The religious and moral forces of the country cannot afford to lie down and let the cause of temperance lose out by default. The example of the last campaign ought to be sufficient warning. There was no forthwith onsault made on the enemies' strong hold. The friends of temperance divided themselves into different political campus and ignored the moral issue for reasons of political expediency. Many life long temperance advocates were more bent on defeating Herbert Hoover than in advancing the cause of prohibition. In order to make sure of this political result they took no chances of wasting their vote on what they deemed an extraneous issue. But now they wake up and look around, and see that all has been lost to the cause which they hold dear. To retrieve lost ground immediate strenous effort is necessary. Political issues as between rival parties must be dismissed or subordinated. As many dry state as possible must be urged to defeat the impending repeal. The impersonated cause of temperance appeals to its earnest advocate— "whoever loves political parties more than me is not worthy of me."

Let me now direct this appeal to the peculiar needs and situation of the colored race. The religious and moral leaders of this race need to upbraid themselves for their utter indifference of this great moral reform. Our churches Y. M. C. A. and other organizations devoted to the development of character remained in sinster silence while this moral warfare was going on. In instances they even joined hands with the forces of evil which so sasily involve the race in the clutches of rum and ruin. The white promoters of prohibition allowed race prejudice to enter the equation and shut out the colored brother from participation in the warfare against the common foe. But now the winning of thirteen states against ratification will require every vote, white or black, to maintain the Constitution in its moral integrity.

Kelly Miller.

TO SHARPEN SCISSORS

To sharpen a pair of scissors, take the steel used to put an edge on the carving knife and insert the steel between the two blades at the same time "sniping" the blades lightly on the hard steel. A splendid cutting edge will result.

Farmers of Greece may have their land plowed by the Greek government, according to a report from Athens. The charges are from 75 cents to $1.50 an acre, according to the depth of the plowing. Nearly fifty tractors are used and more may be ordered shortly.

DR. BURLESON TO SPEAK AT HAMPTON

Anniversary Program Being Arranged

By George A. Kuyper

Hampton Institute, Va., March 19—Anniversary exercises will be held at Hampton Institute on April 27 and 28. The ceremonies will be of importance to everyone interested in the field of Negro education. Not only will the sixty-fifth anniversary of Hampton Institute's founding be observed, but the fiftieth anniversary of the John F. Slater Fund and the seventy-fifth of the Anna T. Jeanes Fund will also be celebrated. The trustees of both these Boards will meet on the Hampton Institute campus. Their anniversary exercises will be held in Ogden Hall on Thursday evening, April 27. Dr. Will W. Alexander, Executive Director of the Commission on Interracial Cooperation, of Atlanta, Georgia, and President of Dillard University of New Orleans, will be the speaker.

Hampton Institute's ceremonies will be observed on Friday afternoon, the twenty-eighth. The speaker will be the Rt. Rev. Hugh Latimer Burleston, D. D., Assistant Presiding Bishop of the Protestant Episcopal Church in U. S. A., New York City.

In addition to many friends of Hampton, North and South, representatives from some of the larger universities of the country will be present.

IMPORTANT NOTICE TO EVERY READER

If you have moved from one address to another please send a written notice to your postmaster; write it out plainly and give it to your letter carrier if you live in the city, or your rural route carrier, if you live on a rural free delivery route. If you fail to do this the publisher of this paper will have to pay two cents on every paper going to your old address. This is a new postal law and regulation.

It is unfair to the publisher of this paper to have to pay the government two cents every week merely because you do not send a written notice to your post office. Not only should you notify the post master at once, even when you know you are going to move, but you should send a written notice to this newspaper so that they could change your address on the mailing list. Do not overlook these instructions.

AMMONIA ADDED TO PEAT; RESULT NEW, BETTER FERTILIZER

Ammoniated peat, a new fertilizer material, has been developed in the laboratories of the United States department of agriculture. It seems to combine many of the good features of the two familiar types of nitrogen-carrying fertilizers It has not been developed commercially yet, but chemists of the department say that the manufacturing process is simple and relatively inexpensive and that the commercial production of ammoniate peat offeres opportunity for material saving in freight on fertilizers. Small scale experiments with plants have given promising results.

By heating ammonia and peat under pressure, about two-thirds of the reacting ammonia is changed to chemical combinations that are not soluble in water. These forms are generally similar to the nitrogenous fertilizer materials in cotton-seed meal and animal tankage. Roughly a third of the ammonia remains in water-soluble forms. Depending on temperature, the peat may be ammoniated to contain up to 20 percent of nitrogen. A 20 percent product would thus contain in each 100 pounds nearly half as much quick-acting nitrogen as 100 pounds of sodium nitrate and would at the same time contain about twice as much slower-acting nitrogen as 100 pounds of cottonseed meal. In other words, 100 pounds of 20 percent ammoniated peat would be roughly equivalent to 200 pounds of cottonseed meal plus 50 pounds of sodium nitrate. The product could be shipped with notable savings in freight and with notable advantage in combining the good features of both the slow-acting and the quick-acting nitrogen carriers. Raw peat is of relatively little value as a nutritive ingredient in fertilizer, but is recognized as a highly desirable element in mixed fertilizers because of its value as a conditioner and because it supplies to the soil a desirable form of organic matter.

WHEELBARROWS MAY HAVE BALLOON TIRES IF TREND CONTINUES

Not only farm tractors but also wheelbarrows may be equipped with balloon tires, as result of one of the recent innovations in mechanical farm equipment. This was among developments explained in the annual tractor and gas engine short course at the college of agriculture, University of Illinois.

Twenty-seven men from twelve counties attended the course. It was held as art of the work which the agricultural engineering department of the college is conducting to help farmers operate their power and machinery more efficiently, thereby reducing losses and wastes and widening the margin of net return. There are approximatey 10,000 tractors and 80,000 stationary gas engines on Illinois farms.

Few innovations in mechanical farm equipment have created as much interest as low pressure pneumatic tires for tractors, agricultural engineers say. One of the fourteen tractors available for the short course students was equipped with the tires so that the men might study this new development first hand. Among the advantages claimed for the new type tractor tires are that they are particularly well adapted to such conditions as cultivated fields, the tractor is equipped at all times for hauling on hard roads, there is a reduction in tractor wear and tear as a result of shocks, a much increased rate of speed is permitted and greater comfort is provided for the operator.

Carrying the idea further, agricultural engineers claim that a garden barrow equipped with a ballon tire can be ushed with surprising ease over turf or soft garden soil.

AN APPEAL TO CONGRESS

Pointing out that under the present system of Unemployment Relief, Negroes are victims of widespread discrimination throughout the country, the National Urban League has asked that liberal-minded citizens address their Representatives and Senators urging the enactment of legislation crimination in the distri- designed to prevent racial distribution or relief funds made available by the Reconstruction Finance Corporation.

A letter detailing the situation has been sent by T. Arnold Hill, Director of the Department of Industrial Relations of the National Urban League, to Senators Robert F. Wagner, Edward P. Costigan, Robert M. La Follette, and Congressman Oscar De Priest.

Bills offered by the three Senators have been presented in the Senate. These bills will provide for the expenditure of a billion dollars if plans now under consideration by the authors of the bills and the Secretary of Labor can be agreed upon.

Despite the allotment of some two hundred million dollars by the Reconstruction Finance Corporation for material and emergency work relief, Negroes especially in the South, according to a recent investigation by the Department of Industrial Relations of the National Urban League, are undergoing intense suffering and want because of racial prejudices which prevail in that section of the country.

Mr. Hill's letter outlining these irregularities to the Senators follows:

Department of Industrial Relations
NATIONAL URBAN LEAGUE
1133 Broadway
New York City
March 15, 1933

"Sir:

"I would like to direct your attention which, if it is not corrected in the proosed relief legislation, will work untold harm to millions of Negro citizens who, according to every authentic nd unbiased investigation, are by far the greatest sufferers from the present economic crisis.

"I have just completed a study of the conditions which obtain among Negroes in the principal cities of Georgia, Florida, Alabama Louisiana, Arkansas and Texas. I need not inform you that among the Negro citizens in these cities there is widespread and devastating distress. And in addition the Negro unemployed worker is the victim of rank discrimination in the allotment both of material relief and emergency work relief, in part provided for by loans of the Reconstruction Finance Corporation to states in this area.

"The basis of relief in not a few of these cities is not Need — but the ratio of Negro population to the total population. Thus, if Negroes comprise 25 per cent of the population, Negro unemploymed receive an aggregate of 25 per cent of the funds dispensed, even though the percentage of unemployment among Negroes is greater by for than that of the remainder of the populatio n. And in some cities the wage rate for Negroes is less than half that aid to workers of other races, and in every city in the area visited the wage of Negroes is less than the prevailing wage. There are numerous instances where Negroes receive one day's work per week, as compared with three day's work for others, and in a number of cities the wage rate for Negroes is $1.25 per day, while white workers receive $2.45 for the same work.

"I submit that this method of allocating funds provided by the Government of the United States is undemocratic and unsound, both from the social viewpoint, and from the viewpoint of economy. It has condemned thousands of Negro families to want, and provides a fertile field for the propaganda of radical organizations which are making significant progress in the states of Alabama and Texas.

"In the State of New York where the Temporary Emergency Relief Administration functions under State authority, the right is reserved to refuse the approval, in whole or in part of claims by Municipal Corporations in cases 'where there is discrimination in the giving or withholding of relief by reason of consideration of race, color, religion, non-citizenship or political connection, or activities.'

"I hope that you may see fit to incorporate in the coming legislation for unemployment relief, some provision which will make such practices as I have described illegal, to the end that no portion of our citizenry shall suffer more than any other.

Sincerely yours,
(Signed) T. Arnold Hill, Director
Department of Industrial Relations
National Urban League."

DEPRESSION CREDIT

Dayton Daily News: An economist says we are now paying for the good things we enjoyed during prosperity. And we can't say they aren't giving us plenty of time to pay.

FAIR WARNING

THREE-YEAR-OLD Jane woke from her nap, cross. She pouted, and refused to put on her shoes. Dorothy, two years older, was worried.

"You can't go down to Mother, barefooted," she warned.

"Don't wanna!" Jane sulked, stubbornly.

"But if you don't come," Dorothy told her, anxiously, "you'll be up here all alone, cause God's going downstairs with me.'

LITTLE INCOME FROM COTTON

Cotton, as a source of farm income, dropped 72 per cent last year compared with figures for 1929, it has been announced by the bureau of farm economics. For the first time, the cow led as the chief source of farm income, dairy products having brought to farmers $1,180,000,000. This was a decline of nearly 50 per cent from the 1929 figure. Livestock held second place. Wheat fell 70 per cent.

TOO MUCH COTTON YET

The N. Y. Cotton Exchange estimates that the world consumption of cotton between last August and through January was the largest in three years. In spite of this increased consumption there is still a carryover of about 8 million bales. Cotton acreage this year should be further reduced.

A NON-SPINACHER

THE MODERN FARMER

Vol. V. NASHVILLE, TENN., APRIL, 15, 1933. No. 12.

Talks to Colored Farmers About "Getting Up to Date"

EDITOR LEON R. HARRIS, SECRETARY N. F. C. F. INC.

Document Calculated to Help Tillers of the Soil Everywhere

Not long ago, Brother Farmers, I read an article written by the manager of the Mississippi Farm Bureau Federation, and the first and the best thing he said in his excellent article was this: "If we farmers of Mississippi and the United States are to keep abreast with the times, we must organize into groups, federate those groups and secure adequate finance for the proper handling of our business."

Now I hardly expect this gentleman had colored farmers in mind when he wrote the article, but whether he did or not, that statement hits all of us squarely on the head. As a group of farmers, we, the colored farmers of the nation must organize, and we must learn to cooperate with other groups so all of us may rise together. When we don't do this, when we continue staying apart, when we continue kicking and fighting each other, its a cinch that all of us are going to stay down in the mud together and we are never going to get any place.

When we organize as a group we are getting up to date. Individuals are not doing much today, just as individuals. It is the big organizations that are doing the big things that are being talked about. And as farmers, if we mean to get anywhere, we have got to organize, and be as proud of what our farm organization is doing as we are about what we are doing as individuals.

Colored farmers can't become full-fledged members of the Mississippi Farm Bureau nor of any of the big "white" farm organizations. But we can join and work for the National Federation of Colored Farmers and make it just as strong and useful as any of the others are. The sooner we do this, the better off all of us will be. Until we do this, we are going to stay right where we are now, and right now nearly all of us are down in the dumps.

The gentleman of Mississippi says that his Farm Bureaus were organized mainly to find markets for surplus crops, such as chickens, eggs, watermelons, potatoes, hay and etc. They have developed a pretty good marketing program and the white farmers have learned a lot about good seed, the right sort of varieties to plant, and about packing and grading. They have also learned how to finance their operations, all have put in a little and no one has been imposed upon.

Well, what about our organization, the N. F. C. F.? I believe it has done more, on less money, than any farmers' organization has ever done. If you would only half support it, you would be surprised just what it could and would do. Your organization, too, could find markets for your surplus crops, and you would soon learn how to grade,

Interesting News, Notes Gathered for Units

FARMERS ADVOCATING STRIKE

Declare Legislation Must Be Enacted

The Farmers' Holiday Association is advocating a 'farm strike" to be called early in May unless national legislation is passed considered to be favorable to the organization. They are in favor of inflation of money. They declare they will not pay interest, debts or taxes unless the "dollar is made to serve as an honest measure of value."

'BIG NIGGER'

Is the way Former Gov. Arthur Hyde of Missouri, Hoover's Secretary of Agriculture, Inscribed Picture Presented to Negro Valet

Washington, (ANP)—Just before former Gov. Arthur M. Hyde of Missouri, the Hoover secretary of agriculture, was retired the valet for the secretary, Edward Crockett, expressed his regret that the secretary was leaving and requested that Mr. Hyde favor him with the gift of a photograph to be added to the collection which he has. Mr. Hyde left his photograph before he departed. It carried the following inscription:

"To Eddie, the big nigger, Arthur M. Hyde."

PONTIAC SERVANT WILLED $50,000

Pontiac, Michigan—According to a will filed for probate in the Oakland County courts here Wednesday, Mrs. Mary Welter, seventy-year-old resident of this town, is to receive a fortune of about $50,000 as a reward for 28 years service with Mrs. Arthur S. Parker, wealthy white woman who died here February 13.

Upon Mrs. Welter's death, $25,000 is to go to a nephew of the deceased, Milton L. Woodward, Detroit insurance man. The remainder of the legacy will go to a township library.

A CANDOKA PEACH TREE SENT TO PRES. ROOSEVELT

Wenatchee, Wash., Mar. 31.—Upon a request made last fall by Franklin D. Roosevelt while on a speaking tour of this state, a Candoka peach tree has been shipped to the President's Warm Springs, Ga., home.

Last September W. F. Ramsey, discoverer and propagator of the new fuzzless peach, presented Mr. Roosevelt with a box of his peaches. A few weeks later he received an enthusiastic letter from the then candidate for president, asking that one of the trees be sent to Warm Springs. The Columbia and Okanogan Nursery Company, which has taken over the growing and distribution of the new peach variety, selected a six-foot tree and shipped it as directed.

BUYING POWER DISCUSSED

Half Is Lost in Purchasing Recently

New York.—The industrial population of the United States has lost more than half of the purchasing power that it possessed in 1929, according to studies recently completed by the national industrial conference board.

It has long been a matter of common knowledge that a large volume of purchasing power has been lost during the depression, but the extent of this loss has not been known. The conference board has now assembled the statistical data required for measuring the loss in the purchasing power of industrial workers, including average reduction in wage scales, shortening of weekly work time, decline in employment and rise in the buying power of the dollar because of falling prices. Computations based on these data indicate that purchasing power available today, at today's wages and prices, is only 46.3 percent of what it was in 1929.

The conference board studies show that since 1929 industrial wage rates have been reduced 19.3 percent; that working hours of employed workers have been shortened on the average 26.9 percent and that the volume of employment has declined 43.4 percent. When these factors are combined, it is found that the industrial population as a whole including both employed and unemployed, is receiving only 33.4 percent as many dollars in wage income as in 1929. But in the meantime prices have declined, with the result that a dollar goes further than it did three years ago. This fact is taken into account by adjusting the amount of income received according to the decline in prices represented by the cost of living index.

PROPER FERTILIZATION OF POTATOES IS DESCRIBED

Columbia, Mo., March 31.—Best results in fertilizing potatoes have been obtained when the fertilizer is placed in a narrow band on each side of the seed piece, separated from it by two inches of fertilizer-free soil and in a depth zone from two inches below the seed, to the seed level, according to O. T. Coleman of the College of Agriculture here.

When planting across sloping land the deeper placement is preferred, according to Mr. Coleman, who says further that uniform distribution along the row is essential for greatest efficiency. To drill the fertilizer in a band at each side of the row, as recommended, the use of two common disk furrow openers is suggested. Tubes or boots of adequate size to prevent clogging should be mounted in a manner that will insure delivery to the bottom of the fertilizer furrow, Mr. Coleman says.

SOME PRIZE LETTERS

Reproduction of the Kind Editor Solicits

Editor's Note:—We publish below two of the many prize letters received, answering the above stated question. One comes from a mighty plain spoken young lady of North Carolina,—the other from a Delta farmer. Have you written yours yet? You may win a prize.

I'll tell you what's the matter with the average Negro farmer. They do all their farming in the winter time while they are sitting around the fires gossiping. Then, when the time comes to farm sure

(Continued on Page 2)

FOWL CHOLERA OFTEN CAUSES SUDDEN DEATH

Fowl cholera is a form of hemorrhage septicemia which causes trouble in chickens, turkeys, ducks and geese. Sudden death often is the first warning. Postmortem examination reveals spots on the heart that are cholera marks. Sanitation is very important in keeping down outbreaks. Vaccination for this trouble is cheap, but is not always 100 percent. However, it is worthy of a trial if you have this trouble.

DR. MANN APPOINTED MEMBER OF HAMPTON'S BOARD OF TRUSTEES

Dr. Albert Russell Mann, the Provost of Cornell University, was appointed a member of Hampton's Board of Trustees at their Founder's Day meeting, January 28. Dr. Mann was formerly Dean of the New York State College of Agriculture, and he has held many other important educational posts throughout the North and South.

His appointment brings to the Board another of the foremost educators of the country. He has already given liberally of his time and talent to this work. His kindly manner and keen understanding immediately won for him an enthusiastic welcome by both students and faculty.

A NEW SOIL TEST

East Lansing, Mich—Prof. C. H. Spurway, Michigan State College agronomist and "inventor" of a simple method of testing soils for lime requirements, announces he has perfected another simple method for extension workers and county agents for use in testing soils for all plant food requirements. With the new testing outfit he says it is possible to ascertain the soil content of soluble nitrogen, phosphorus, potash, potassium, calcium, carbonates, magnesium, iron, aluminum, manganese, sulphates, chlorides, nitrates, sodium and ammonia in 15 to 20 minutes. Tests can be made in the fields, he adds.

NATIONAL HEADQUARTERS RELEASE MORE FACTS

Data Collected by Staff Correspondent as Well As Editors

If the Roosevelt farm bill now before Congress restores the average prices of farm products to what they were during pre-war years, corn will sell at from 49 to 69 cents per bushed; wheat at 76 to 99 cents a bushel; hogs at $7.35 to $8.90 a hundred; cattle at $6.35 to $8.65 a hundred and cotton at $8.86 to $14.23 cents a pound.

High test gasoline that contains 10 per cent alcohol has been placed on sale by thirteen Illinois Farm Bureaus. The Ill. Agricultural Association is sponsoring a test of the new fuel. It is being handled on a non-profit basis during the experiment. After the test has been made for sixty days a survey will be conducted to find out how the users like it. If the plan to compel use of alcohol with gasoline is enacted into law it is believed it would require about 650,000,000 bushels of grain a year to make the new fuel. Farmers would be able to raise larger grain crops instead of reducing them as is being advocated now.

Illinois Farm Bureau members pay $15.00 yer year dues. Last year the State Bureau conducted a fight to lower farm taxes and as a result, $33 less is being paid in taxes this year per farm. This is equal to more than the cost of membership dues for two years. Farmers in Illinois know that it pays to be organized.

Chickens will come home to roost. An Illinois farmer had 125 of his chickens stolen. The thieves carried part of the loot to a city and sold it and were arrested. They left three sacks filled with chickens in a weed patch about a quarter of a mile from the house. One of the chickens got out and came home to roost. The farmer followed its tracks across the muddy field and found the rest of the sacks in the weed patch.

Fifty-nine per cent of the colored families in the U. S. have no children under ten years of age. The state of North Carolina has the largest average families 26,564 colored families include twelve or more persons.

Gov. Pearson of the Virgin Islands reports that three large estates, totalling approximately 3,000 acres have been secured and will be subdivided to provide farm homes for the inhabitants. The subdivisions will be small enough to be worked by a single family. Another boost for the small farm idea.

(Continued on Page 2)

EDITOR LEON R. HARRIS SECRETARY N. F. C. F. INC.

(Continued from Page 1.)

pack and ship correctly. You would soon learn how well it would pay you to practice cooperative production, so you could ship in carlots and get the most for your labor. Your membership dues, which you pay to finance your organization, would be nothing compared with what you would gain.

I laughed when I read that The Mississippi Farm Bureau had distributed two million dollars worth of fertilizer to its members in four months. That is cooperative buying on a big scale. I remembered what a kick some of our neighbors made when we colored farmers started buying groceries, home supplies and also fertilizer cooperatively. Well if the good white farmers of Mississippi can buy two million dollars worth of fertilizer cooperatively in four months, no one ought to kick when you only buy $200,000 worth of groceries and other things cooperatively in four years. Keep it up You know it pays you to do this.

The gentleman also says that the county agents of Mississippi have been a great help to their Bureaus In fact, he says that they could not get along without the help of these good agents. That's mighty fine. Our county agents, what few there are, have not done much toward helping out the N. F. C. F. The main reason is because we have not got enough of them. Your organization is going to keep on kicking until there is a colored county agent in every county where there are as many as a thousand colored farmers, whether farm owners or tenants. And then we must keep on kicking until our colored county agents are just as anxious and as willing to serve Units of the N. F. C. F. as the white county agents of Mississippi are anxious to serve the Bureau of the American Farm Bureau Federation.

The white farmers of Mississippi have found out that organization is a mighty fine thing for them. We must keep up with the times, get up to date, and know that in organization is our salvation too.

NATIONAL HEADQUARTERS RELEASE MORE FACTS

(Continued from Page 1)

A six-inch bull-frog, owned by the University of Oklahoma, ate up an eleven inch, year old alligator. The frog was a little sick after the meal but the professor of the zoological department predicted it would get well.

It is reported that California has given 2,000 carloads of surplus oranges to the needy of many western and a few eastern cities. Mayors of the cities arranged for distribution and the railroads reduced transportation charges.

Thirty solid cars and numerous express and truck shipments of cabbage plants were shipped from the Valdosta, Georgia territory last month. There has been a very heavy demand for cabbage plants this year and prices have been good. Colored farmers could raise and ship plants in carlots if they were organized and would practice cooperative production.

Thousands of colored men and women are employed by the great Chicago packing houses. It is estimated that colored persons consume an average of 200 pounds of meat a year.

There are 38 colored farmers in the state of Nebraska, a decrease of 25 since 1920. Of this number, 16 are owners. They own 4,454 acres in land and buildings are valued at $149,530.

An Indiana farmer reports the birth of a lamb with two mouths, both of which can be used for eating.

Gov. Ruby Laffon of Kentucky issued a proclamation in February requesting holders of farm mortgages to withhold foreclosures until conditions improve.

Government agents have killed 10,000 worthless wild horses in Arizona, New Mexico and Utah during the last six months. The horses are being killed so that cattle and sheep may be raised.

St. Louis markets most of the nation's 200,000 pounds of ginseng gathered annually. Most of it is exported to China.

SOME PRIZE LETTERS

(Continued from Page 1)

enough, they do everything else but farm.

About the biggest thing they ever do is to go from house to house and talk about one another.

Miss Nancy Wiley,
High Point, N. C., Rt. 1.

Dear Editor:—

The trouble with the average Negro farmers around here is that they are most too slow. They think they are always working for nothing. Every day they are eating and wearing clothes and doing as well as others these hard times, but still they think they are worse off than farmers anywhere.

Another thing, they work too much for the good of other people. They raise too much cotton and corn, not enough things that will help their own selves. Farming means more than just raising cotton for the other man. If they would raise more home products they would be much better off. But instead, they have to buy stuff raised by other farmers in other states They even buy molasses that is raised in Louisiana when they know they can raise plenty of it here at home.

They grumble a lot and talk too much and make things really worse than they are.

E. V. Brown,
Pace, Mississippi.

SHARP DECLINE SEEN IN WATERMELON ACREAGE

Washington, D. C.—Acreage to watermelons in the second early states is expected to show a 20 percent decrease from the 1932 acreage and a 16 percent drop below the five year average, intentions to plant reports to the Department of Agriculture indicate. The heaviest decrease is reported in Georgia—30 percent—with decreases in other states ranging from 8 to 22 percent. For the early and second early states combined, the intended decrease amounts to 19 per cent below the 1932 acreage and 18 percent below the five year average.

Plantings in the early group are placed at 32,500 acres by the Department, compared with 38,000 a year ago. Acreage in the second early group totals 112,650 acres compared with 141,560. The total for the two groups amounts to 145,150 acres against 179,560 a year ago.

In the second early states, Alabama expects 5,000 acres compared with 6,400 a year ago. Arizona 850 against 1,000 in 1932, Georgia 53,000 acres against 76,000 last season, Mississippi 1,000 compared with 1,060 last year, North Carolina, 8,000 against 8,200 a year ago. South Carolina 13,500 against 15,000 last year. Texas 31,300 against 33,900 acres last season.

A friend is a person with whom I may be sincere.

—Ralph Waldo Emerson.

STUDENT SECURES SPLENDID STAND OF ALFAFA

Analyzes Soil Beforehand to Ascertain Suitability

Merritt Woodson, Ag. '34. has seven acres of alfalfa as fine as was ever produced in this section of the country.

He began his project last August under very adverse weather conditions. One of his first steps was to test the soil for acidity. The reaction indicated that a light application of calcium carbonate would be beneficial. Consequently, after plowing and disking the land very thoroughly with a tractor, he applied lime to the field.

The seed was inoculated, and consisted of a total mixture of 50 pounds Grimm and 100 pounds Kansas. It was applied to the field with a drill on September 6, 1933. Although very dry weather followed the seeding, careful preparation of the land beforehand resulted in his getting an ideal stand of alfalfa. Present indications are that he will receive a bumper harvest during the next two summers, after which time his project expires.

Mr. Woodson is majoring in Agricultural Engineering. His chief purpose in taking this project is to grow a crop without the use of horses and to see to what extent an all-machinery farm is practical.

WAGE CAMPAIGN TO CURTAIL THE 1933 PEANUT ACREAGE

Winchester, Va.,—The campaign under way to curtail the 1933 peanut acreage has awakened much interest on the part of all identified with the industry, according to word from Suffolk, Va., the "peanut capital."

Federal crop production loans will be made only to peanut growers who agree to cut their acreage 30 per cent, but the effect of this regulation will be lessened by the fact that it does not apply to growers or tenants who do not plant more than eight acres of peanuts this season.

CAUSE OF PEACH BLIGHT DISCOVERED

Yonkers, N. Y.,—According to an announcement made here by Dr. Louis O. Kunkle, of the Boyce Thompson Institute for Plant Research, a wingless insect has been identified as the carrier of disease that causes blight on peach trees. This finding is the result of 13 years of research work.

It solves the cause of blight which to a greater or less extent affects commercial orchards in all parts of the country. The discovery now furnishes a starting point for further scientific study to overcome and eradicate blight damage, which if accomplished will mean much to commercial growers in Georgia, Colorado, Utah and other heavy producing districts.

TENNESSEE VALLEY PROJECT BRINGS REJOICING

Pres. Roosevelt's giant scheme for industrialization of the Tennessee river valley is bringing joy to all throughout the section extending from the Virginia mountains to the Gulf of Mexico. It is believed that this region can be made one of the richest in the world. It is a land of forests and minerals and abundant water power can be developed. Nearly four million Negroes live in this section.

MAORIS TAKE UP FARMING

Maoris, the brown-skinned aborigines of New Zealand, are learning to be farmers and dairymen. They have established their own dairy, which last year produced 460 tons of butter. All Maroris now speak English and send their children to public schools.

GETTING ACQUAINTED WITH SEEDS

Wild species of plants produce seeds which are able to withstand severe natural conditions, while cultivated species produce seeds that are usually very sensitive and require special care.

Since the ability of seeds to sprout is greatly affected by the way in which they are harvested and stored, it is much to the advantage of the farmer to understand clearly the requirements of all the seeds that he uses, especially if he is growing his own. According to reports of the Bureau of Agronomy, thousands of dollars are lost annually to farmers through reduced total yields from sparce stands and from expensive replanting.

If the farmer is breeding plants it is even more important that he should know the correct care of the seeds from the time of harvest through the germination process. Especial care must be taken of germinate as many seeds as possible, for a single sprout may be a plant that will prove to be of inestimable value to the world. This fact is clearly brought out by the late Luther Burbank. He planted sixty thousand seeds of the Shasta daisy and only one out of that number proved to be the plant desired. Had not this one seed germinated, the work in breeding for the daisy probably would have been a failure.

The vitality of seeds may be considerably lessened by some diseases that are borne on the seed. It is important to know how to store such seeds and how to treat them both for the prevention of disease and for obtaining vigorous seedlings. Consult your county agent or agricultural teacher for further information on this important subject.

AGRICULTURAL ASSOCIATION HOLDS SERIES OF INTERESTING MEETINGS

During the past few weeks the members of the Agricultural Association at Hampton have had the opportunity of listening to some mighty sound advice from widely experienced individuals.

At one of these meetings Mr. Cooper, Director of Extension, was the guest speaker. In a heart-to-heart talk he emphasized the importance of knowing how to get along with rural people, of gaining the confidence of the community leaders, and of improving the appearances of our homes and schools.

On another occasion, Miss Anna Graves, world social worker, lectured to the boys in the browsing room of the library, concerning how the small Negro agricultural republic of Liberia was being exploited by American capitalists.

At a late date Mr. Higginbotham, of the Horticultural Department, told how Negro extension work is helping the farmers to improve their standards of living. He also told about the vegetable demonstrations which he has been giving at numerous Extension Schools throughout Virginia for many years, and of the benefits that have resulted therefrom.

NEW CATALOGS

Hampton Institute's regular annual catalog is now in press, and will be ready for mailing sometime after April 15. In addition to the usual line of attractive courses, it will list several new agricultural courses, including one on economic entomology, and another on meat production.

The Summer Session Bulletin will be ready for mailing about May 1. President Howe has announced that there will be two terms of summer school as usual this year.

FARMERS OFFERED EMERGENCY LOANS BY CREDIT BRANCH

The opening of additional banks each day throughout Illinois improves the situation in such localities, and it is obvious the advantages will spread over greater areas as these openings increase.

"In the meantime," suggests H. A. Chetham, manager of the Chicago branch of the Regional Agricultural Credit corporation, "this corporation has been created for the express purpose of meeting just such an emergency by providing a source of credit for the farmer and stockman who is unable temporarily to finance his current operations through local institutions."

"We are not authorized to solicit loans, nor are we willing to urge any farmer or stockman to borrow money; on the other hand, solvent farmers and stockman should know that this source of credit exists," Mr. Chetham adds.

To take advantage of the facilities of this agency, the farmer and stockman must make application on the corporation's form. This form may be secured from the Rock Island county farm bureau, or upon receipt of the applicant s name and address sent to the Regional Agricultural Credit corporation, 4201 South Halsted street, Chicago, the necessary forms will be forwarded promptly to the applicant to fill out and sign.

Loans are to be adequately secured by first lien on personal property, principally livestock. The rate of interest at present is 6½ percent a year and the borrower also bears the mortgage recording and abstract fees, but does not pay any inspection or investigation fee.

For convenience of reference the various loans made are divided into types as follows:

1. Feeder loans, to fatten livestock for market.
2. Breeder and dairy loans, to replenish existing herds.
3. Barnyard loans, to provide running expenses and to purchase hogs or other small stock. These loans will be made in amounts to be determined largely by what can be repaid in one year, out of farming operations, after taking into account reasonable living expenses.
4. Marketing loans, at the present time principally to help carry corn. These loans, if on corn in crib, are secured by warehouse receipts issued under the Illinois grain storage law.
5. Crop production loans, in excess of $300, for cost of seed, cultivation, harvesting and repairs. Note that the secretary of agriculture has announced that loans will be made by the United States department of agriculture to farmers unable to obtain loans for crop production in 1933 from other sources, not to exceed $300, with interest at 5½ percent a year. Farmers desiring to make such loans in amounts of $300 or less should apply to the farmers' seed loan office, department of agriculture, St. Louis, Mo.

CROWDED BIRDS DON'T PAY

Student Gets More Eggs From Fewer Hens

A few weeks ago one of the project boys at Hampton attempted to house 182 laying hens in a house twenty feet square. This gave each hen only a trifle more than two square feet of floor space. As a result, his highest daily productoin during those weeks was 51 eggs.

Perceiving that his hens were too crowded, he sold 38 birds. A few days later the daily production had mounted to 75 eggs. In other words, he was getting 24 more eggs daily and at the same time had 38 less hens to feed.

Yes, he is convinced that it pays to allow three or four square feet of floor space for each bird.

RECOMMENDS SWEET POTATOES TO N. C. FARMERS

Raleigh, North Carolina. — Sweet potatoes are adapted to North Carolina. They are easily grown and keep well when handled and housed properly, according to E. B. Morrow, extension horticulturist at the college here, who says that some should be grown every year on every North Carolina farm. To the "in-and-outer" the crop is a gamble but to the man who plans to have an adequate acreage each season, it is a source of food, feed and cash, Mr. Morrow says.

"A high yield per acre at a low cost of production per bushel is essential for profit," he continues. "High yields are secured by planting disease-free seed stock, by setting the plants reasonably early and by using a high grade fertilizer. We had 183 growers in eastern Carolina last year to use the improved Porto Rico strain developed by the station and these men made an average of 58 bushels an acre more than with the regular seed. Other growers in 17 counties used the high grade fertilizer recommended and made an average increase per acre of 38 bushels."

Mr. Morrow says the station recommends an 8-4-8 or an 8-4-10 mixture for average eastern Carolina soils.

In addition to these good cultural methods, Mr. Morrow recommends the use of curing houses in handling the harvested crop. For instance, he has records of 125 tobacco barns in 26 eastern counties being remodeled to house sweet potatoes. The total capacity was 189,000 bushels.

POINTERS ON NITROGEN FERTILIZING OF TREES

Independence, Missouri — H. W Guengerich, county horticultural agent, in discussing fertilizing of fruit trees says:

"Past experience has proven that lack of nitrogen causes alternate bearing of apples. Between 1926 and 1929 orchard after orchard was brought into regular production by fertilizing with ammonium sulphate. Then things went wrong. Since 1929 we have had a protracted drought, with especially dry weather each spring. In dry weather the fertilizer is not washed down where the trees can get it. The effect of nitrogen on trees and grasses can be seen very easily. It gives dark green leaves and increased growth. During the past three years the grass under fertilized trees has grown luxuriantly, but the trees have shown little rseponse. Evidently the grass has been getting the fertilizer. The obvious remedy is to disk or cultivate a strip along the tree rows and to then apply the fertilizer to the cultivated strips. This is no year to waste ammonium sulphate on grass growing under the trees.

"All trees do not need ammonium sulphate, but the signs of nitrogen starvation are easy to read. Growth of less than six inches on the ends of the lower branches, reddish color of the bark, and very large buds, indicate lack of nitrogen. Greenish bark, vigorous growth and moderate sized buds indicate a good supply of nitrogen."

NOTHING LIKE MAKING SURE

Tourist—"What's that big crowd there in front of the courthouse?"

Native—"Oh, they're just tryin' the case o' Sam Johnson, suh."

Tourist—"Sam Johnson! Why someone just told me he was lynched yesterday."

Native—"You're right, suh, he was, but today some of the boys got to feelin' curious to know whether he was innocent or guilty."

There is nothing either good or bad, but thinking makes it so.

—Shakespeare.

METER IS INVENTED TO DETECT FLAVOR OF FOODS

New York—The invention of a meter which is able to detect certain fundamentals of flavor in foodstuffs has been announced by the Westinghouse Company here. The meter detects electric currents constantly flowing in foodstuffs and is able to indicate acidity and ripeness in fruit, saltiness in meat and acid contents in tea and coffee.

The meter, called an electrynx, is a cylindrical object smaller than a baseball, with a dial on one face and two needle-like legs on the other. According to R. C. Hitchcock, the inventor, when these needles are thrust into an unripe apple, the electric current is high. When the apple is ripe, the current becomes low. A rising current indicates rot.

"Canners and preservers of fruit and vegetables," said Mr. Hitchcock, "may be able to keep the flavors of their products at a given standard with this instrument, because it will be possible for the samplers to select raw products more scientifically. With further development it may be that the whole system of sampling and testing wil lbe affected."

Fruit with an acid taste registers a higher current than a sweet fruit. Of the fruits tested, California lemons went highest, with 19 points on the dial. Italian lemons were second with 15 and oranges were lowest with five and a half.

Vegetables registered like fruits, but no general averages have been looked for yet in the vegetable kingdom, raw and cooked alike, showed electric currents too large for the meter to record. The readings indicated, however, that saltiness of meats showed by electrical effects

FEEDING "PORK" TO PIGS IS EXPENSIVE PRACTICE

Feeding "pork" to baby pigs is uneconomical and as foolish as it sounds.

Unless sows are fed a proper ration after spring farrowing, they will do their best to nourish the suckling pigs by turning their own flesh, bone and blood into milk for the hungry youngsters. This is expensive business for the swine raiser, C. C. Culberton, of Iowa State college explains, since the price of feeds is relatively lower than pork and because the sow is seriously weakened by this suckling

Low spring egg prices do not justify poorer feeding of the flock. Failure to feed well through the spring and summer will result in lower egg production the following fall and winter when egg prices have made their usual seasonal climb.

When considerable quantities of animal or green manure have been used on the ground for several years, it is usually necessary to lime the soil for best results. Ground limestone is the most economical but hydrated or air-slaked lime may be used to the small garden if ground limestone is unavailable. Lime should not be applied to land to be immediately planted to potatoes, since potato scab is worse on limed soils.

WITHOUT MONEY AND WITHOUT PRICE

Earth gets its price for what Earth gives us;
The beggar is taxed for a corner to die in,
The priest has his fee who comes and shrives us,
We bargain for the graves we lie in;
At the devil's booth are all things sold,
Each ounce of dross costs its ounce of gold;
For a cap and bells our lives we pay,
Bubbles we buy with a whole soul's tasking:
'Tis Heaven alone that is given away,
'Tis only God may be had for the asking;
No price is set on the lavish summer;
June may be had by the poorest comer.

—By James Russell Lowell.

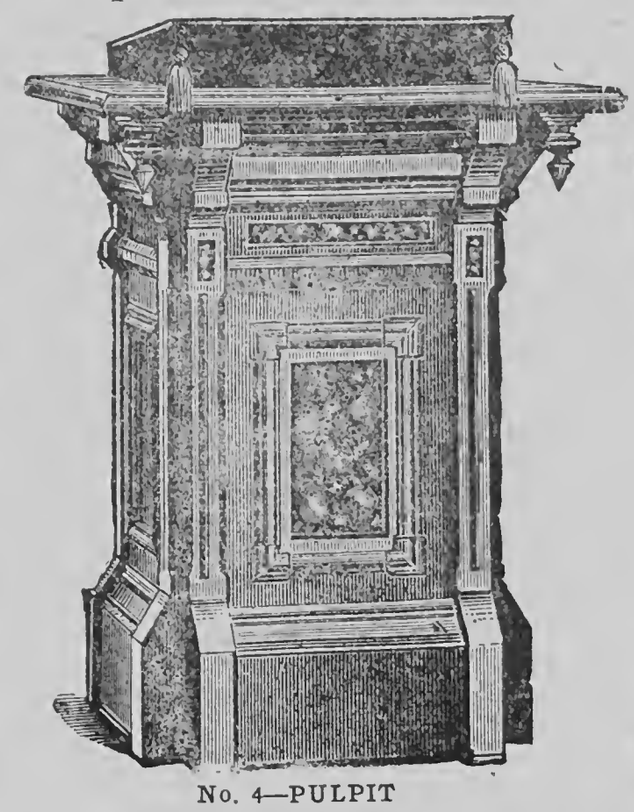
I know not how that Bethlehem's Babe
Could in the God-head be;
I only know the Manger Child
Has brought God's life to me.

I know not how that Calvary's cross
A word from sin could free:
I only know its matchless love
Has brought God's love to me.

I know not how that Joseph's tomb
Could solve death's mystery:
I only know a living Christ,
Our immortality.

—Henry Webb Farrington.

Pulpits or Bible Stands that Grace any Church Edifice



No. 4—PULPIT
Price $37.50

No. 16 1-2—PULPIT.
Price $50.00

THE MODERN FARMER

Official organ of the National Federation of Colored Farmers, Inc.

Leon R. Harris - - Editor

Published monthly by the Modern Farmer at Nashville, Tennessee, and Chicago, Ill.

Nashville, Tenn., Office, 447 4th Avenue, North.

Devoted to the interests of the Farmer, Truck Gardner, Livestock and Poultry Breeder, the Home and the People.

Entered as Second Class Matter, April 10, 1929, at the Post Office at Nashville, Tenn., under act of March 3, 1879.

All contributions for publication in the Modern Farmer should be addressed to The Modern Farmer, 447 4th Avenue, North, Nashville, Tenn.

No libelous matter will be published. Unsigned articles or letters, and those written on both sides of the paper will not be used.

Subscription price $1.00 per year, 75c for six months, payable in advance. Personal checks must be certified. Make all checks or money orders payable to The Modern Farmer.

Advertising rates and sworn circulation figures presented upon application.

"OUR SLOGAN"

STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT.

THE LAW

"It is hereby declared to be the policy of Congress to promote the effective merchandising of agricultural commodities by encouraging the organization of producers into effective associations under their own control.

The Board is authorized and directed—to promote education in the principles and practices of cooperative marketing—to encourage the organization, improvement in methods, and develojment of effective cooperative associations. (Public—No. 10—71st Congress. Sec. 1-5.)

THE GOSPEL

"This law is predicated upon the ability of the farmer to manage his own business, once he is organized to do so. Cooperation is the key to it and only in exceptional cases can the Federal Farm Board have any dealings with a farmer who is not a member of a producer-owned and producer-controloed marketing unit." Hon. Sam'l R. McKelvie, Former Member, Federal Farm Board.

HOW FLOWERS GROW

First a seed so tiny, hidden from the sight;
Then two pretty leaflets struggling toward the light.
Soon a bud appearing turns into a flower
Warmed by golden sunshine, washed by silver shower.
Growing sweeter, taller, every happy hour!
Showing God's great kindness, and his wondrous power.

DON'T PAY FOR LOAN AID

We print this item from the Atlanta Constitution:

"Kenneth Murphy, field supervisor of the crop production loan office in the Fulton county courthouse, said Saturday that farmers who apply for loans tris year from the $90,000,000 fund authorized by congress should "refuse to pay any fees for help in the preparation of their loan applications."

The new law, as enacted by congress, Murphy said, specifically prohibits the charging of any fee for preparation of the application, and provides for fine or imprisonment, or both, for any person found guilty of making such a charge against the applicant for a loan. Notarial fees, however, are still required as are fees charged by the county recording official and for searching the records for prior liens.

The new application blank requires a statement of the amount of the loan desired, the number of acres for which seed and fertilizer are to be purchased, the amount desired for feed and the amount desired for fuel and oil for tractors. The sum total for all items must not exceed the maximum rates per acre specified in the regulations."

This statement is plain enough to be understood by all colored farmers who apply for loans. You have to pay notary public fees and also fees charged by county recorder's office. But you are to pay no fees to anyone for giving you application blanks or for helping you fill it out. You break the law when you pay such fees and the one who charges them, or, takes them from you, also breaks the law.

It is reported that complaints have already been received at the office of the N. F. C. F., from members who have been charged fees by some who have helped them fill out loan application blanks. It will be wise for members to report such charges to the national office of the N. F. C. F., together with the name of the one who makes them.

FARM DISORGANIZATION — A CURSE

We publish in another column an expression by the president of the Dairyman's League Cooperative Association Inc., that the farmer's biggest problem today is one of low prices but that it will take more than a revision of the money system to save him. He says that the farmer must be represented my some organization with power equal to that of the purchaser, that he must put his own shoulders to the wheel, that he must get away from the every-man-for-himself policy and must cooperate with his fellow farmers for the common good of all.

All wide-awake farmers are beginning to realize that disorganization is the farmer's biggest curse. All crop buyers are organized, grocers, hardware merchants, druggists, fertilizer dealers, doctors and practically all who sell anything to farmers are organized. The manufacturers of goods sold are also organized. These merchants, dealers and manufacturers work together. They set prices the farmers must pay. They set standards of workmanship, and an article the farmer buys lasts just as long. The farmer is wholly at their mercy when it comes to buying what he needs.

But when the farmer has something to sell, he has no protection. He must take what is offered or see his crops perish. The other fellow controls the market because he is organized. He sets prices because he is organized. The farmer gets it going and coming because he is NOT ORGANIZED.

Disorganization is a curse to us. Let us get rid of this curse. Let us meet in our communities, build up a strong local Unit of the National Federation of Colored Farmers, and be in a position where we will be able to cooperate with all other farmer's spending dollar is just as good of all.

BUYING COMBINE ORGANIZED

Representatives of farmers of sixteen middle-western states, met in Indianapolis recently and organized a buying combine to be known as the National Cooperatives. The new organization is to engage in wholesale buying of supplies for farm use and may also engage in manufacture and distribution.

This movement is in line with the policy of the National Federation of Colored Farmers, which urges its members to buy together in wholesale quantities and thus secure their farm supplies at reasonable prices. It is foolish for farmers to pay two prices for articles they can buy together at less than half what they are charged. If white farmers of the country find it economical to purchase supplies cooperatively, colored farmers certainly should follow the same course, no matter who opposes the movement. The colored farmer's spending dollar is ust as valuable as anyone's.

ALL IN THE SAME BOAT

A report from the far western state of Idaho says that farmers there are just as bad as anywhere else. It takes the entire gross income of the farms to pay taxes. Only a small part of the taxes have been paid. Farmers have drawn on their life insurance, have taken the money out of the baby's bank, have sold or mortgaged their personal property, have given up autos, radios, telephones, papers and books, and even sugar and coffee. Their shoes and clothing are badly worn, and in some places the schools are closed for lack of funds. As in some parts of the South, many farmers would be starving were it not for the aid of the Reconstruction Finance Corporation, which gives six days work a month to married men only. Farmers are mighty glad to get the $12 per month.

These are nearly all white farmers. Colored farmers are hardly any worse off. All are in the same boat. During these times, and until condition are made better, we should be thankful indeed for a roof over our heads and a full stomach.

The new farm bill is now being considered by Congress and no one can say just what it will be when finally passed and signed by the President. Let us hope and pray that it will be a real benefit and blessing to all of us.

Are you preparing to plant and cultivate a community farm this year? It will bring you more blessings than you hope for. Working together along this line is a good way to learn cooperation. In some northern cities, Negro congregations are planting church and Sunday school gardens.

Remember that written contract this year. Any landlord who refuses you a written contract bears watching. Such a landlord is not looking for good tenants. He is looking for the kind he can take advantage of.

Don't borrow any more than you can possibly get along with. Debts must be paid and it is always harder to repay than to borrow. Borrow wisely if you must borrow.

Resolve to purchase a home of your own. You will not be a REAL FARMER until you become a FARM OWNER.

MR. WILLIAM THOMAS WRITES FROM HEMMINGWAY, SOUTH CAROLINA

Modern Farmer,
447 Fourth Ave., N.
Nashville, Tenn.,
Mr. Editor:

Sir, be informed of this that the St. Mark Unit of the Indiantown Township of Williamsburg County, S. C. was organized in the said St. Mark A. M. E. church by Mr. O. Lightbourne of Chicago, Ill, Feb. 26, 1931. We the officers and members hereof, do highly appreciate and send greetings to this valuable paper of yours, or ours, titled, "Modern Farmer, the mouth-piece which we hope will bear tidings of great joy to the nation for and near relative to the success and prosperity of the N. F. of C. F. in all the states of the Union. The officers with their post office address are as follows:

M. D. Cooper, Pres., Hemmingway, S. C.. R. 4, Box 88.

M. W. Wilson, vice Pres., Neswith S. C., R. 1, Box 27.

Rev. C. W. Williams, seed and sale gent, Hemmingway, S. C., R. 4, Box 121.

Kelly Thomas. Treas., Neswith, S. C., R. 1, Box 25.

Wm. Thomas, Sec.; Hemmingway, S. C.. R. 4. Box 82.

Please send us a copy of your first edition and oblige.

Yours truly,
Wm. Thomas,
Hemmingway, S. C., R. 4, B. 82.

POULTRYMEN CAN MIX CHICK FEEDS

Use of Own Farm Grains Is Possible; Formulas Are Outlined

Many poultry flock owners who are wondering about using their own farm grains for chick-starting feeds this spring can do so with good results if they carefully select, grind and mix the ingredients says H. H. Alp, poultry extension specialist at the University of Illinois college of agriculture.

Flock owners of the state were raising more than 38 million chickens annually in the last census, so that economy of feeding is a big item, he pointed out.

When ground wheat is used in place of wheat bran and wheat middlings, a good starting mash can be made as follows the figures indicating pounds):

Ground yellow corn	50
Ground Wheat	15
Finely ground oats	10
Dried skim milk or buttermilk	10
Meat scrap	10
Alfalfa leaf meal	4
Salt	1

When wheat bran and wheat middlings are used in place of ground wheat, the formula is as follows (figures in pounds):

Ground yellow corn	50
Alfalfa leaf meal	4
Wheat flour middlings	10
Dried skim milk or butter milk	10
Meat scrap	10
Bran	15
Salt	1

When the chicks can be given milk to drink instead of water, a mash can be made from the following formula (figures in pounds):

Ground yellow corn	55
Alfalfa leaf meal	5
Finely ground oats	15
Ground oyster shell	2
Ground wheat	15
Bone meal	2
Meat scrap	5
Salt	1

A mash mixture which has given satisfactory results when fed to chicks confined to batteries is as follows (figures in pounds):

Ground yellow corn	40
Wheat bran	20
Wheat flour middlings	20
Alfalfa leaf meal	4
Dried milk	4
Meat scrap	10
Cod liver oil	pint
Salt	1

ALABAMA COURTS RULE COLLECTORS MUST BE LAWYERS

One Bernard Berk, conducting a commercial collection agency, was charged with holding himself out to the public as ready, able and willing to represent, out of court, any person or company in the adjustment, collection or compromise of any claim or demand; that he would turn claims or demands over to his attorney to prosecute actions thereon: that he did so turn over such claims or demands to his attorney, says Bradstreet's.

A proceeding was instituted questioning Berg's right to so transact business without obtaining a license to engage in the practice of law. Upon a hearing the court entered an order prohibiting him from proceeding as he had until he should become regularly licensed as a member of the Alabama state bar. This was upheld by the supreme court in an opinion declaring that the court should take judical notice that the usual business of lawyers in the state of Alabama included office practice, not necessitating appearance in court, and collection and settlement of claims and demands

Application for Membership

NATIONAL FEDERATION OF COLORED FARMERS (Inc.)

Vincennes Hotel, Chicago

As a farmer, I believe the time has arrived when the Colored Farmers should form a National Organization devoted to diversified production, grading, packing, shipping and marketing of farm products and to the purchase of needed farm supplies through co-operative methods, to the end that a more prosperous financial condition may result from their efforts as producers.
I hereby subscribe $5.00 for membership in the National Federation of Colored Farmers for a period of 12 months from date. Also $1.00 for an Annual Subscription to the Modern Farmer.

Name .... Address .....

City ..... County .....

State ..... Date ....

It was further held that the statute requiring a license to engage in such practice was valid exercise of the police power; did not constitute usurpation of judical power; did not deprive Berk of his liberty or property without due process and did not amount to a denial of civil rights nor a grant of special privilege and immunities, nor a denial of rights retained by the people.

REDUCTION IN SWEET POTATO ACREAGE SEEN

Washington, D. C.—The acreage of sweet potatoes for harvest in 1933 seems likely to be about 806,000 acres, judging by the March reports of growers, the Department of Agriculture declares. This is 13 per cent less than the 926,000 acres harvested in 1932 but still 3 per cent larger than the harvested acreage of 1931. In general, the major decreases are expected to occur in those southern states where acreage has been expanded greatly in the past two years. Comparative acreage figures appear in the following table:

State	Harvested 1932 Acres	Indicated 1933 Acres
New Jersey	12,000	10,000
Indiana	4,000	4,000
Illinois	7,000	7,000
Iowa	3,000	3,000
Missouri	10,000	10,000
Kansas	6,000	6,000
Delaware	7,000,	7,000
Maryland	8,000	8,000
Virginia	38,000	38,000
North Carolina	94,000	80,000
South Carolina	66,000	63,000
Georgia	109,000	98,000
Florida	25,000	24,000
Kentucky	25,000	22,000
Tennessee	75,000	58,000
Alabama	101,000	92,000
Mississippi	79,000	67,000
Arkansas	38,000	27,000
Louisiana	84,000	71,000
Oklahoma	22,000	22,000
Texas	100,000	75,000
California	13,000	14,000
United States	926,000	806,000

Estimates for each state cover the entire acreage, whether commercial or non-commercial, early or late.

GROWTH OF COMMUNITY GARDENS

Bloomington Pantagraph: The summer of 1932 was the first season when the conduct of gardens on a large scale was used as a serious effort to combat the needs of public relief for the unemployed. The history of the effort for Bloomington-Normal and the substantial results achieved are recent history.

It appearing that the extent of necessary relief will be fully as great this year as last, plans for the coming summer here are extended to a considerable degree. One tract of eighty acres has been obtained in one body, with several smaller pieces of land, and innumerable private gardens of one city lot or less. Probably hundreds of unemployed men will find in these gardens the opportunity for helping with the production of food supplies for the summer and winter for families who are not yet able to support themselves entirely.

Other communities are planning even larger expansion of the garden work. Over in Danville, for instance, a tract of 800 acres has been obtained for use as community gardens, and it is said that this is the largest single enterprise of its kind in the United States. If fully tilled, it is now estimated that the land will produce food enough for the summer for the 3,000 families now receiving public aid in that city, together with a large surplus for winter canning which will make a substantial cut in the need for cash relief next winter.

The extraordinary size of the tillable tract at Danville will require constant service of a special committee for the board of supervisors to provide proper supervision, assignment of workers, harvesting and care of the products. This committee is already organized and will begin to function as soon as the first plantings are made.

WITCHES AND FAIRIES IN CAROLINAS, INDIANS SAY

Real witches, wizards and fairies cavort to this day among North Carolina's great Smoky mountains—real, at least, to the Cherokee Indians who live there.

The Cherokee's imagination peoples the woods, rocks and streams of the remote Great Smoky country with as many supernatural beings as any child's fairy tale, says report to the Smithsonian Institution by Dr. Frans Oldbrechts.

Should you meet a Cherokee witch among the mountains, shoot him with a bullet around which is wound one of the hairs of your head, old folk of the tribe will tell you. But before you can shoot the witch you must see him in his regular human form. To do this you must fast until sunset for seven days, and drink a concoction made from a shrub which is believed to give the witches themselves some of their power.

Instead of a witch, however, you may meet the "two little red men," sons of the thunder, friendly fellows who may be recognized by their peaked caps of purple and red, and who always travel together.

Also usually friendly to men are the "little people," akin to the European fairies, who are very small with long hair falling to their heels. They live in colonies like humans, hold dances and councils, and lonely travelers at night may sometimes hear the sounds of their music and dancing, the Cherokees say. Sometimes the little people forget their kindness and cause disease, especially among children.

Ghosts, at least Cherokee ghosts, are creatures whose attentions are well meant but unwelcome. Because they are homesick in the ghost land to the west, they try to make their friends and relatives ill so that they will die and join them.

Dreaming of a dead relative is considered the first symptom of disease, so the Cherokees try to blot out the memory of the dead by merrymaking, no matter how much they may feel the loss.

Most feared of all are the witches and wizards, human beings believed to possess supernatural powers of evil. They try to take the life of their victims and add it to their own, the Indians say, by stealing their breath. Witches can take the forms of animals and fly through the air or travel underground. Often they appear as ravens or earthworms.

Coming of a witch, the tribe lore says, can be detected by dropping powdered tobacco on hot ashes. If a particle of the tobacco catches fire it shows by its position the direction from which the witch is approaching.

AFTER RABBITS, GOT FISH

Two Rock Island, Ill., school boys went hunting last month and came home with a large fish. While hunting they climbed to the top of a 125 foot cliff above Carroll Lake. Shoving a large rock loose, they saw it hit the ice, break through and send the water spouting high in the air. The fish also came up with the water. The boys made their way down the cliff and picked up the fish.

"Corn Cob Bill" Hudson, unemployed teamster, struck oil eighteen feet under ground at Blackwell, Okla.

Horse and mule population in Tennessee declined from 350,000 in 1910 to 157,000 in 1932.

NEGROES CONSERVATIVE IN RELIGIOUS SERVICES

The emotional paroxysm of "getting religion" is passing among the Negroes, according to a report published by the Institute of Social and Religious Research. It is also said that the Negro is "overchurched," and that the teaching of religion in Negro churches is at a "low ebb," reports the Literary Digest.

In the fourth ward of Atlanta, an area of less than one and one-quarter square miles, forty-seven Negro churches are concentrated, say the authors of the report, Benjamin Elijah Mays and Joseph William Nicholson, Negro ministers.

"Scores of churches in close proximity to one another, and often of the same denomination, many with only a handful of people,' are doing the same type of work; in many instances they are doing it poorly, and in addition are competing against one another," they say.

The other-worldly, highly emotional type of preaching" is passing, add the authors, because ministers often experience great difficulty in getting their hearers to shout and cry "amen."

"The shouting, highly emotional sermon can not survive except in an atmosphere where the response is spontaneous and warm," they write, "and two years' observation during the period of his study would lead one to believe that the 'shouting' sermon is rapidly on the wane."

MISSISSIPPI SHIPS A CAR OF JERUSALEM ARTICHOKES

Picayune, Mississippi.—A 30,000 pound shipment of Jerusalem artichokes, probably the first carload of the product ever to leave this state, was recently shipped from the south Mississippi experiment station at Poplarville to the United States Bureau of Standards, according to George E. Murrell, horticulturalist of the Southern Railway System. This shipment, Mr. Murrell believes, may open the way for a new industry in Mississippi.

"This product," he declared, "has a number of possible uses. It belongs to the sunflower family but bears tubers underground resembling knotty Irish potatoes which are superior hog feed. These tubers, when boiled, are thought by many persons to equal or be superior to Irish potatoes."

A farmer received a crate containing some fowls. He wrote to the sender, informing him that the crate was so badly made that it had come to pieces when he was taking the hens home with him and they had all escaped, and, after much searching, he had only succeeded in finding eleven of them. In due course he received the following reply:

"You were lucky to find eleven hens, because I only sent you six!"

FARM STATISTICS

Statistics gathered by the department of agriculture for President Roosevelt show in figures what the farmer's troubles are:

Since 1928 the price of the things the farmer grows have dropped an average of 60 percent. The things he buys have dropped only 29 percent.

Since 1910 farm mortgage indebtedness has risen from $4,320,470,000 to $,241,390,000.

Forty-two percent of all farms were mortgaged in 1930.

In the fiscal year 1931-32, 2.84 percent of all farms were lost through foreclosure.

From 1913 to 1930 farm taxes increased two and one-half times.

In 1931 these taxes took 47.2 percent of the money the farmer had to be paid in cash had been met.

Agriculture's gross income dropped from around $12,000,000,000 in 1929 to $5,200,000,000 in 1932.

The value of farm lands has dropped 50 percent since 1920.

The farmers share of the national income dropped from around 17 percent in the period between 1914 and 1919 to less than 7 percent in 1932.

EXPERIMENTING WITH NEW FRUIT VARIETIES

Kansas City.—There are endless possibilities for the novic in the production of new varieties of fruits of every sort, Missouri specialists say. If he has trees, plants or vines of several varieties of the same species he can experiment as well as the trained scientist.

As soon as the pollen develops, he can pick a blossom from one variety and invert it over a blossom of another variety, shaking or gently tapping it against the center of the flowers and left until the fruit has Then this blossom so fertilized may be covered with a paper sack securely tied around the twig below the flower and left until the fruit has set.

This prevents more pollen from some other source coming in contact with the flower and so causing a further and unknown mixture. The sack can be removed any time after the fruit has started to set. The seed from this fruit when ripe is saved and planted. The result is almost certain to be a new variety, it is stated.

MODERNS CAN USE BOW, ARROW, AS WELL AS INDIANS

After waiting years for the opportunity, J. S. Farmer of Texas shot and killed a 7-pound buck deer, using a bow and arrow, comments the Toledo Blade. Indian fashion, he shot from a distance of only 45 yards. That is excellent work for a modern hunter using primitive methods far antedating the discovery of America when red skin natives slew their tribal enemies and obtained food by means of archery.

Archaeologists say flint arrows date back 25,000 years and arrows without stone points were used ages earlier. It is generally believed that our Indians were the world's greatest archery adepts, but such is not the fact. The bow of some African tribes has a draw of eighty pounds and the arrow is cast 250 yards. White Americans frequentlyy have excelled Indians in archery contests and have record kills of grizzly bears in this country and lions in Africa with the arrow. They draw a good bow—as good or better than any barbarians. As Robert Louis Stevenson wrote in Black Arrow: "Who'll shoot me a good shot? It's there the eye comes in and the head between the shoulders."

PRUNING AID FROM SHOE BRUSH

Washington, D. C.,—Fruitgrowers may make a simple and cheap aid for painting the wounds of fruit-trees pruned with a pole saw or pruning poles by fastening a 10c shoe dauber to a bamboo or similar pole says the Department of Agriculture. The pruning wounds which are beyond easy reach or difficult to get at with a paint brush may then be easily painted with the long handled brush which usually has the bristlse on the side.

HORSES DESERTED IN POLAND

Farmers in Poland are getting rid of their horses to stop the cost of feeding them. In one district not far from Warsaw a horse was sold for 50 cents. In another place one was given in exchange for a man's cap. Sometimes horses whose owners have failed to sell are deserted in market places.

TWO CENTS PER MILE IS THE NEW RATE

Those who travel by rail, those who ride the railroads, those who are to enjoy the benefits given by these serviceable institutions, the railroads, have been given further advantages by the Louisville and Nashville Railroad Company of which Mr. Whitefoord R. Cole, a former resident of this city, is the president.

The following excerpt and part of an interview from the President appeared in a recent issue of several newspapers and magazines:

"Throughout the system of the Louisville and Nashville Railroad, reduction of passenger fares goes into effect April 1st," states President Whitefoord R. Cole. "In coaches, the new rate will be 2 cents a mile. In sleeping and parlor cars, it will be 3 cents a mile, with no surcharge."

"It is a well known fact that for several years the railroads have experienced a continuous decline in passenger revenue," said Mr. Cole. "We have encountered one form of competition after another. We have realized that changing conditions call for changes in our operations. Various methods for solving the problem have been presented, but we have agreed upon the reduction of fares as the most practicable solution."

"We believe the public values the advantages of travel by rail. People like the cleanliness, safety and comfort of our trains. They appreciate the savings of time and trouble. Now we are making these benefits available at a rate which removes the economy of competitive methods of transportation from consideration."

"Beginning with April 1st, countless men who have been using their own automobiles for short trips will prefer the greater economy and ease of the train trip. For long trips, there will be no question as to the desirability of the train, from the standpoints of comfort and convenience, as well as cost.

"The Louisville and Nashville Railroad is authorized by the Interstate Commerce Commission," said Mr. Cole, "to make this experiment in reduced fares for a period of six months. At the end of that time the justification of the reduced rates must be judged by the results, but it is our hope and expectation that the 2-cent rate will bring back lost passenger traffic to such a degree that its continuance will be justified."

MAKING IT SNAPPY

If you have a thing to say,
  Cut it down!
Something you must write today,
  Cut it down.
Let your words be short and few.
Aim to make them clear and true.
Monosyllables will do.
  Cut it down!

Are you writing to the press?
  Cut it down!
Make it half or even less,
  Cut it down!
Editors like pithy prose,
Lengthly letters are their foes.
Take a hint from "One Who
  Knows."

Cut it down.
—Grenville Kleiser in the Paris Herald.

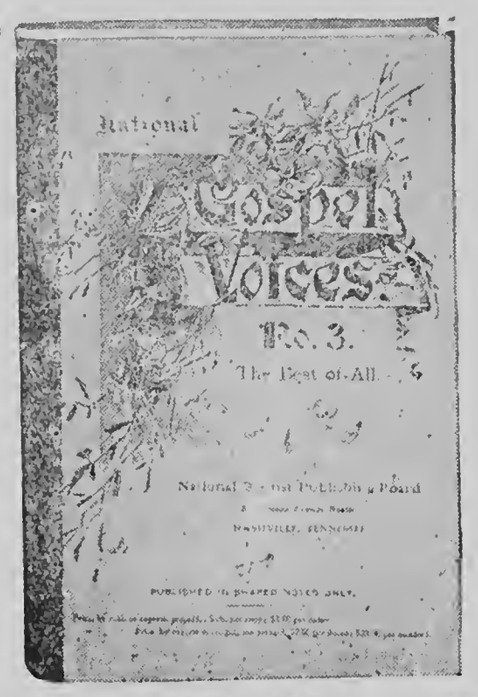
IDENTIFICATION CERTIFICATES ORDERED

Congress Secretary Says Early Delivery Assured

Thousands of Identification Certificates have been ordered printed for distribution by the Secretary of the Sunday School Congress. They will be issued by Mr. J. E. Hannegan, the chairman of the Southwestern Passenger Association Territory Bureau at St. Louis, after which they will be forwarded here to the Congress Secretary's office in Nashville. He in turn will dispatch them to the "Key People" throughout the Convention, to be distributed to Congress messengers only and dependent members of their families, as provided by the regulation promulgated from the Association Bureau provided for the use of these certificates. Each one will bear a fac simile signature of the Congress Secretary.

It was expressed in his office this week that within the next fifteen or twenty days those desiring the certificates might secure them by writing directly here to Nashville.

For the past few years the rate has been passed on the certificate plan, and railroad ticket agents are required to sell a Congress round-trip ticket upon presentation of this certificate by the messengers and the accredited representatives of the various religious organizations who contemplate attending this annual gathering.



Gospel Voices
No. 3.

Gospel Voices Song book is especially adopted for use in the Sunday school room. This little song book is said to be the best of all Gospel Voices Song books.

EXTENSION TRAINEES PARTICIPATE IN BETTER HOMES MOVEMENT

Build Sanitary Privy in Nearby Neighborhood as Demonstration

As a part of their regular course in extension training, two of Hampton's agricultural seniors recently constructed a sanitary privy at the nearby home of a poor widow This project was undertaken as a practical example of how the Extension agent can encourage better health conditions through demonstrations.

After deciding on the plan of construction, these young men donned their over-alls, secured the necessary timber, and built the house during their spare time. Practically all the materials used were salvaged from the old Whittier School building which was abandoned last year. The only materials purchased were the nails and a small piece of roofing. The boys did the whole job with dispatch and accuracy, and have good reason to be proud of their work.

Earlier in the year, two of the Home Economics classes renovated and painted the outside of the dwelling located on the same lot. Plans are under way to landscape the grounds this spring. When fully completed, the little home will be a striking contrast to the forlorn and dilapidated hut that appeared on the same lot six months ago.

Negotiations are being made with W. M. Cooper, Director of Extension at Hampton, to enter the project as a part of the better Homes campaign.

35c A DAY IS ALABAMA PAY

Montgomery, Alabama—The revelation that farm labor can be obtained in Lowndes County for only food and shelter and that a maximum of 35 cents a day is being offered in other sections of the state was discovered by an AFRO representative here last week.

Criticism has been leveled by whites at the Red Cross for giving aid to destitute laborers, white plantation owners pointing out that as long as such conditions exist the laborers will refuse to work for the 35-cents-a-day wages offered.

Lowndes County recently put on relief work through money obtained from the R. F. C. and set the price for labor at 50 cents a day. Over 600 men have been put to work for the foregoing wages and 500 more are said to be on the waiting list. The men are entirely dependent on this pittance for feeding their families through the winter months.

President Howe has upon several public occasions during the past few weeks given some very inspiring talks concerning Hungerford School, at Maitland, Florida. Very recently Hampton friends sent a truck load of provisions and equipment to this struggling little school, where L. E. Hall, J. C. Williams, and several other Hampton graduates are carrying on so gallantly.

NEW CONSUMER PACKAGES PUTTING IN APPEARANCE

Washington, D. C.— Innovations in packaging fruits and vegetables have been developed this winter, says the Department of Agriculture Strawberries are wearing cellophane faces; celery is appearing in colorful cartons having a front window; many fruit sand vegetables customarily sold in bulk are being retailed in mesh bags.

Container manufacturers report to the Bureau of Agricultural Economics that they have developed consumer cartons for practically all kinds of fruits and vegetables. Most of these cartons feature a front window. A new tomato package is a two-pound carton with the window feature.

Paper baskets and paper hampers are growing in popularity. Grape and apple baskets and berry boxes are being made of paper .

Last week there appeared on the Chicago market a carload of California cauliflower with heads trimmed of outer jackets, wrapped in oiled paper, and sealed in pasteboard boxes, each of which held from 11 to 18 heads. The chief advantage of this container is said to be a saving in freight costs; the package is easy to handle, and the cauliflower requires little preparation by store keepers. Chicago receivers stated, however, that the package has too many disadvantages to make it acceptable to the trade. They listed these as heavier shrinkage at shipping points, probably double the expense of packaging, and danger of rapid deterioration during warm weather.

Bureau officials believe that consumers have been pleased with the new consumer package, principally on account of sanitary features.

"FERTILIZER PAYS ON LIGHTER SOILS"

Ithaca, N. Y.—"Grape growers who have vineyards on the lighter, gravelly soils can expect 800 pounds more grapes, on the average, from a 200-pound application of sodium nitrate or the equivalent amount of ammonium sulfate," says G. P. Scoville of the New York State College of Agriculture. "The same amount of fertilizer applied on the heavier soils returned but 300 pounds more grapes," he says, in reviewing a survey of New York state vineyards in 1928 and 1929. At the time of the study grapes were worth $22 a ton and it took $12 worth of fertilizer to grow an extra ton of grapes.

IMPORTANT NOTICE TO EVERY READER

If you have moved from one address to another please send a written notice to your postmaster; write it out plainly and give it to your letter carrier if you live in the city, or your rural route carrier, if you live on a rural free delivery route. If you fail to do this the publisher of this paper will have to pay two cents on every paper going to your old address. This is a new postal law and regulation.

It is unfair to the publisher of this paper to have to pay the government two cents every week merely because you do not send a written notice to your post office. Not only should you notify the post master at once, even when you know you are going to move, but you should send a written notice to this newspaper so that they could change your address on the mailing list. Do not overlook these instructions.

THE MODERN FARMER

WHY I BELIEVE IN PROHIBITION

(By Henry Ford)

"I believe in PROHIBITION because I believe in the new industrial order that America is creating. Booze is as much out of place in that new order as a horse and buggy in down town Detroit—and a lot more dangerous.

"The HORSE and BUGGY order is gone and liquor had to go with it. Society could take chances back of a dashboard that it can't afford to take behind a steering wheel!

"Perhaps," he said, "you don't recall the old hitching post days Well a lot of folks seem to have forgotten them. They shouldn't The streets on Saturday nights were lined with wagons and buggies and the saloons were filled with customers. At closing time a crowd of irresponsible men backed their rigs into the streets, the horses were headed towards home the reins dropped over the dash and forgotten. THE HORSES WERE SOBER!

"Well, if we want our streets lined again with shops that do that kind of business we shall have to put up our automobiles and go back to the hitching posts. Automobiles wan't go straight unless they are driven straight, and THEY DON'T KNOW THE WAY HOME.

"An industrial order that has discorded the reins, dashboards and a team-that-knows-the-way-home can't afford to line its highways with 'regulated liquor shops'— not with a forty-horsepower motor under the toe of the drinking citizen."

WHERE TO FIND HELPS

If you are impatient, sit down quietly and talk with Job.
If you are just a little headstrong, see Moses.
If you are getting weak-kneed, take a good look at Elijah.
If there is no song in your heart, listen to David.
If you are a policy person, read Daniel.
If you are getting sordid, spend a while with Isaiah.
If you feel chilly, get the beloved disciple to put his arms around you.
If your faith is below par, read Paul.
If you are getting lazy, watch James.
If you are losing sight of the future, climb up the stairs of Revelation and get a glimpse of the promised land.

—Selected.

LET ME BE KIND TODAY

Let me be kind today,
Nor carelessly let fall
One cruel, hurtful word
Which I cannot recall.
The heart I wound today
Tomorrow may be stilled;
I cannot gather up
The poison when 'tis spilled.

I must not waste today,
Life's harvest time is brief;
How scant the hour allowed
For me to glean my sheaf!
Haste, Haste! Oh, leggard hand,
To plant the goodly seed;
Bear in the golden grain,
Perform the noble deed.

I would be true today—
Today is all I own;
Tomorrow may not dawn,
And yesterday has flown.
May I be given strength
To do my task, I pray,
And in my humble place
Let me be true today.

Don't put manure on the garden or lawn which contains live weed seeds.

LEROY MORRISON, NEGRO PIANIST, IS ACCREDITED WORLD'S OCTAVE CHAMP

(Boulder Daily Paper)

It was learned today that LeRoy Morrison, son of Mrs. Dewey Emanuel of this city, and a fine piano player, is able to span one full octave and four additional keys—a total of 12.

This feat is not considered of exceptional news value until a story in a Denver paper told of the ability of Walter Gieseking, famous German pianist, to span a full octave and declare his accomplishment a world record The fact that Morrison is able to better the feat of the famous German was revealed in a conversation today with Prof. Merle Black, instrumental instructor in the Boulder schools, who has Morrison as a pupil at Prep. Morrison is a prep and plans to study music at the University and make it his life work. His father, the late Lee Morrison, was a well known musician. His orchestra gained fame throughout the entire country LeRoy is 19 years old and lives at 2224 Pine street with his mother and step-father. He has a fine record in the Boulder schools.

M. V. James, 351 Williams avenue, is an uncle of LeRoy, and his aunt, Mrs. Myrtle James is in California for her health. His mother Mrs. Manuel, and grandmother, Mrs. Jennie James, visited in Portland a number of years ago.

THE WAY TO SUPPORT A CHURCH

There was a church in our town
Which though 'twas wondrous wise,
It tries to pay expenses
By selling cakes and pies.
But after years of trying
That plan to raise the cash,
The folks got tired of buying
And the whole thing went to smash.

There was a church in our town
And it was wondrous wise,
It always paid expenses
By simply paying tithes.
For when 'twas found the tithe did pay,
It seemed so very plain,
Forthwith 'twould have no other way,
No, never once again.

—(Clipped.)

So teach us to number our days that we may apply our hearts unto wisdom.

—Psalm 90:12.

IMPORTANT MESSAGE!

PRIZES OFFERED!

"WHAT'S THE MATTER WITH THE AVERAGE NEGRO FARMER?"

Some question, is it not? Well, we want to know and nearly everyone wants to know. We want you to tell us in your own way and in your own words.

We want to know so badly that we are offering three cash prizes for the best letters received as an answer to the question. Any man, woman or child may write. The contest closes September 1, 1933. Write 'em long or short, just answer the question. You may win a prize.

FIRST PRIZE—Five Dollars in Gold.
SECOND PRIZE—Three Dollars.
THIRD PRIZE—Two Dollars.

The best letters will be published throughout the year. All letters become the property of the Modern Farmer, when received. Judges are the editor and one representative from each state in which the National Federation of Colored Farmers, Inc., has chartered Units. These representatives will be chosen by the Executive Committee of the organization. Prizes will be awarded during the 1933 N. F. C. F. Convention.

Mail all letters written for this contest to

LEON R. HARRIS, Editor,
Box 209 Moline, Illinois

As a sample, we publish below a little sketch about? "What's The Matter With the Average Georgia Farmer." Don't copy from this, it won't count. We just want to give you an idea.

"What's the Matter With the Average Georgia Farmer?

"The average Georgia Farmer gets up in the morning by the alarm of an Illinois clock (Big Ben), buttons his Chicago suspenders to a Detroit overall, washes his face with Cincinnati soap in a Pennsylvania pan, sets down to a Grand Rapids table and eats Chicago meat, Indiana hominy, fried in Kansas lard, on a St. Louis stove.

"He then lights his New York lantern and goes out to the barn and puts an Indianapolis bridle on a mule fed by Iowa corn and plows the farm covered by an Ohio Mortgage with a South Bend plow, and when bed time comes he reads a chapter in the Bible printed in Boston and says a prayer written in Jerusalem. Crawls under a blanket made in New Jersey only to be kept awake all night by the barks and wails of a Georgia yellow hound dog, the only home product on the place, and then wonders why he cannot make money."

Now Get Busy And Answer The Question And Win One Of The Prizes

AGRICULTURAL SENIORS RETURN FROM RURAL TRAINING CENTERS

Spend Busy Three Weeks Learning the Job at First Hand

On the night of March 8, nine young college men arrived back on the Hampton Campus, considerably wiser and more experienced after having spent three short weeks as apprentice teachers or county agents in outlying communities.

There are ten young men who hope to complete the agricultural course this year. Of this number, two are taking the course in extension training, seven the teacher-training course, and one, Harold Williams, of Roanoke, Virginia, is specializing in Horticulture.

The whole project in apprenticeship training was carefully planned in advance, and conducted under the general supervision of O. R. LeBeau, agricultural teacher-training at Hampton. Messrs. Klinck and Ridgway also visited most of the trainees while the work was in progress. The respective training centers, together with the agents and teachers who cooperated, are listed below.

Extension Training Class

S. E. Marshall, Morgantown, W Va., Prince George and Surry Co., Va., Herbert W. George, Agent.

Henry Rose, of Luther, Oklahoma. Nansemond County, Virginia. Howard P. Reid, agent.

Teacher-Training Class

L. T. Brown, of Richmond, Va., Sussex Co., Training School, Va P. M. Morton, Teacher.

R. A. Bryant, of Kimbrough, Ga., York County Training School, Va James A. Allen, Teacher.

A. C. Grant, of Salisbury, N. C., Hawkins School, Warrenton, N. C. C. S. Wynn, Teacher.

N. A. McLean, of Lillington, N. C., Warren Co. Training School, N. C., J. L. Bolden, Teacher.

G. A. Rivers, of Phoebus, Va., Nansemond Co. Tr. School, Va., W. B. Godwin, Teacher.

K. C. Rowe, of Wadley, Ala., Gloucester Co. Training School, Va., E. L. Harrison, Teacher.

R. O. Wilson, of Richmond, Va., Southampton Co. Tr. School, Va., W. F. Banks, Teacher.

These young men will continue to round out their training by doing additional observation and practice work in the vicinity of Hampton during the spring quarter.

Deaths

Randolph Ruffin, Hampton '21, died Feb. 27, at his home near North Emporia, Virginia. He had been suffering from circulatory trouble for the past eighteen months.

Ever since his graduation from Hampton, Mr. Ruffin has served as the local agricultural agent in his native county, Greenville, Virginia. With his passing Negro extension work lost one of its most esteemed and valuable workers. He is survived by his wife and four small children.

Only a few days before this, Mrs S. V. T. Smith, local home agent for Nelson County, Virginia had succumbed at Massies Mill, Va. She was a frequent visitor at Hampton.

Hampton workers were glad to see such a large number of graduates and friends present at the Inaugural Pageant which was staged so successfully on the campus by the Y. M. C. A. on March 4.

THAT WOULD BE NEWS

Suburbanite: "Your hens have been over the wall and scratched my garden."

Neighbor: "Well, there's nothing queer in that. It's the nature of hens to scratch. Now, if your garden had come over the wall and scratched my hens, you'd have something to talk about."—The Reflector (Elgin, Ill.)

FARMERS' SUNDAY, APRIL 30, 1933

THE PRESIDENT'S PROCLAMATION

Pursuant to the authority vested in me by the Executive Board of The National Federation of Colored Farmers, Inc., I, James P. Davis, president of said organization, do designate Sunday, April 30, 1933 as our annual "Farmers' Sunday." All Local Units are hereby ordered to have appropriate religious exereises on that day.

Again we have the happy privilege of assembling together to render thanksgiving and praise and to pray for guidance and help in this hour of need. In spite of all diffienlties, we must be patient. We must keep our faith in the God of our fathers and mothers, in our eountry, and in our fellowmen.

We should be thankful for life and opportunities. We should be thankful that our organization has been able to endure. We should be thankful that we still have a way and a chance to help others through our organization.

Today, let us pray for more patienee, for more faith, for more knowledge, for more love. Let us pray for our organization, for our offieers and brethren, and for the many thousands of our group who need our assistanee but know us not. Let us pray for our enemies. Let us pray for our native land, and for those in authority; that we may have peaee and prosperity and that every citizen may have an equal chance to live and grow therein.

For this purpose therefore, every Unit under the jurisdiction of the National Federation of Colored Farmers, Inc., is instructed to assemble in some ehurch on this day to render thanks unto Almighty God for the manifold blessings we have been permitted to enjoy, and to pray for Divine guidanee and assistance. Every member is hereby instructed to take part in the exereises.

May the prineiples of cooperation, of service, and of charity, fill every mind and heart on this day and, united, may we go forth with a stronger determination to advance the work and welfare of our organization.

Given under my hand, this, the 15th day of March, 1933.

(Signed) JAMES P. DAVIS, President.

FARM PROBLEM PRODUCE PRICE

The principal problem of the farmer was simply and lucidly expressed by Fred H. Sexauer, president the Dairymen's League Cooperative association, Inc., when he said:

"Our biggest problem today is one of low prices, not low prices of milk alone, but of butter, cabbage, hay, beef, wheat, hogs, onions, etc. Low prices in themselves would not be so serious were it not for the fact that those things which make up our living costs have not gone down as much as have the prices of our products.

"The solution of our problem, then, lies in one of two courses: either we must reduce the prices of things bought to the level of those things which we sell, or raise the price level of those things which we sell to the level of the things we buy."

The latter course is obviously the most desirable and the most feasible. Mr. Sexauer believes that it can be partly achieved by a revision of the monetary system, to recognize other mediums as well as gold, as the basis of credit. This would doubtless help to a great extent, and some such change may come. But the farmer must not believe that that alone would save him. To the efforts of cooperative leaders and public officials must be added his own individual efforts if he is to succeed in freeing himself from depression.

He must, in other words, cooperate with his fellows in any program designed for the common good. It is unquestionably true that an important factor in the collapse of the farm price level, was disorganization, an every-man-for-himself policy that gave the middleman the upper hand in all dealings. All of us buy as cheaply as we can. The farmer will always sell cheaply unless he is represented by some organization with power equal to that of the purchaser.

In short, the farmer must bend his own shoulder to the wheel along with those who are seeking to solve his difficulties for him.

BRO. R. B. BANKS PASSES

We note with sorrow the death of Bro. R. B. Banks, chairman of Sandy Bayou Unit of the National Federation of Colored Farmers, Inc., which occured at his home on March 14. Bro. Banks was a good, fearless man and a fine leader. His passing will be keenly felt by the members of his Unit and by the N. F. C. F. The MODERN FARMER extends sincerest sympathy to the bereaved family.

Bro. Sim Washington has been elected to succeed Bro. Banks as chairman of his Unit. We wish him abundant success.

SOY BEAN PAINT FOR FORDS

The Ford Company has announced that paint used on the new cars manufactured this year will be developed from oil extracted from soy beans. Mr. Ford believes in using farm products in industry. He says we are going to have a better standard than ever and wages won't have anything to do with it.

FARMERS' SUNDAY, APRIL 30, 1933

OFFICIAL ANNIVERSARY PROGRAM

Authorized by the Executive Board,
The National Federation of Colored Farmers, Inc.
Vincennes Hotel, Chicago, Ill.

Song—"Bringing In The Sheaves."

Prayer—

Responsive Reading—Led by Master of Ceremonies.

Master of Ceremonies:—"Behold how good and how pleasant it is for brethren to dwell together in unity..

Congregation:—"O Lord, how manifold are thy works: in wisdom hast thou made them all: the earth is full of thy riches.

M. of C.:—"Behold, the eye of the Lord is upon them that fear him, upon them that hope in his mercy;

Congregation:—"To deliver their soul from death, and to keep them alive in famine.

M. of C.:—"He loveth righteousness and judgement: the earth is full of the goodness of the Lord.

Congregation:—"The poor man cried and the Lord heard him, and saved him out of all his troubles.

M. of C.:—"A little that a righteous man hath is better than the riehes of many wicked.

Congregation:—"He causeth grass to grow for the eattle and herb for the service of man; that he may bring forth food out of the earth.

All:—"Trust in the Lord and do good; so shalt thou dwell in the land, and verily thou shalt be fed.

Song:—Selected.

Reading of President's Proclamation.

Address of Welcome on Behalf of Church.

Response.

Song:—"The farmer's Hymn" Official Hymn, National Federation of Colored Farmers, Inc. (**Tune: "My Country 'Tis of Thee.)**

God bless us, we, who toil
Upon the goodly soil
Which thou hast made:
Uphold us by thy might,
Help us to know the right,
And ever, day and night,
Be thou our aid.

Send plenteous sun and rain
On mountain, hill and plain,
And valley wide:
Grant us prosperity,
Increase our faith in Thee,
O may we happy be
Whate'er betide.

Unite us heart and hand
In one fraternal band
Unto the end:
That we may praise thy name,
Of all men, Lord, the same,
Our God, whom we proclaim:
"The farmer's Friend."

(Copyright: By Leon R. Harris).

Address:—"How Organization Helps Colored Farmers."

Song—Selected.

Introduetion of Visitors.

Three Minute Talks:—By Officers and Agent for MODERN FARMER.

Sermon, Offering, Announcements, Benediction.

INSTRUCTIONS

Officers and members of local Units should strive diligently to make "Farmers' Sunday" a great day for the eause of Organization of Colored Farmers throughout the Nation. Appoint a special committee for this day. Invite the public to attend. Send notices to all the churches in your community. Invite your city friends. Have special music. The Chairman of local Unit will act as Master of Ceremonies. Secure your best talent for the address on "How Organization Helps Colored Farmers." The program may be lengthened or revised if desired. Remember this is "Farmers' Sunday" and an all-day meeting would not be out of place. Let the public know that you are proud of your organization and that the N. F. C. F. merits any assistanee given it.

SPECIAL NOTICE, NO. ONE

Officers of Loeal Units are instructed to send one-half of general offering received on this day to the NATIONAL FEDERATION OF COLORED FARMERS, INC., Vineennes Hotel, CHICAGO, ILL. This money is for the "Missionary Fund" and is used to carry the gospel of organization and cooperation to the many thousands of American Negro farmers yet not organized. Be liberal. It is a great work and must be carried on. "As ye have received, freely give."

SPECIAL NOTICE, NO. TWO

All Units of the N. F. C. F., and affiliated Women's Clubs that have not held their festival for the benefit of the MODERN FARMER, as ordered at 1932 Convention, are instrueted to hold this affair the day before Farmers' Sunday, Saturday, April 29. All receipts from festival should be sent promptly to MODERN FARMER, 447 Fourth Ave., N.,. Nashville, Tenn.

SPECIAL NOTICE, NO. THREE

Please preserve this issue as this program will not appear again. You will need it for your services. If more copies of this paper are wanted, you may get them for five eents per copy. Address the MODERN FARMER, 447 FOURTH AVE., N., NASHVILLE, TENN.

BOTH RACES AT TUSKEGEE CONFERENCE

SURVEY OF SMALL FARM OWNERS MADE

Nine Cotton Growing Communities in Four Alabama Units

Tuskegee Institute, Ala., May 9th:—A Conference of white and Negro leaders from all parts of the State of Alabama was held here yesterday to consider the report of a survey of nine cotton growing communities of small farmers, and thirty plantations of share tenants in four counties in this state, typieal of both farms tilled by Negro farmers, both land owners and share tenants. The survey comprised studies made by the Federal Counell of Churches of Christ in Americа, under the direction of two of its staff, Dr. Benson Y. Landis, Department of Researeh and Edueation, and Dr. George E. Hayes, Department of Race Relations. The field work to gather faets was done by Ernest A. Grant, Agricultural Department of Tuskegee Institute. In the nine communities of small farms studied here were two thousand four hundred eighty-two white rural residents and five thousand seven hundred fifteen Negro rural residents. The community populations ranged from forty to forty-seven whites and from three hundred to one thousand six hundred ten Negroes. The smallest farming eommunity had a total population of four hundred sixty-four and the largest had a total population of one thousand seven hundred thirty-eight persons. On the thirty plantations there was a total of two hundred ninety-two whites and two thousand two hundred sixty-three Negro persons. The survey dealt with questions of cash and other returns from farming, white and Negro landownership, eontractural relations of white landlords and Negro tenants, credit and credit sources for Negro farmers and a number of other questions, such as tool equipment on farms, housing, sanitation and health. The data covering three hundred twenty-two small farms, operated by Negroes, showed that 43.5 percent of the farms were operated by Negro owners, 37.5 pereent were operated by Negro tenants and 19 pereent by Negro croppers. The pereentage of farms owned is higher than the Negro farm ownership for the county as a whole. The survey ineluded a series of case reeords of both successful and unsuecessful efforts of Negro farmers to buy land and houses of their own. The study of eredit showed that short term loans now come largely from produetion loans of the Federal Government for seed, feed and fertilizer, while long term loans were from banks and individuals. Prevailing rates of interest for short term loans all ranged above 8 pereent and some communities reported as high as twenty-five pereent prevailing interest rates. On long term loans two communities reported prevailing rates between 9 and 14 percent and one above 15 pereent. A number of suggestions and recommendations to improve conditions

RED CROSS RUSHES AID

Tornado Victims to be Given Assistance

Washington, May—(By the Associated Negro Press)—The American Red Cross Wednesday wired its chapter chairmen in Minden and Arcadia, La., to meet the emergency needs of victims of the tornado which struck in their communities and also ordered four national staff disaster relief workers to proceed to the seene to give neeessary relief.

The tornado last night was the fourth serious one in southern states within thirty days each eausing heavy loss of life and property. The Red Cross had a staff of workers in Red River parish, immediately south of Webster parish of which Minden is the largest city, who had only yesterday concluded a similar tornado relief operation following eyelonie winds of March 30. Other national workers were sent yesterday to Yazoo City, Miss., where a tornado struck Saturday night.

CAN BE REACHED THE WORLD OVER

National Baptist Publishing Board and Another Race Institution Renew Their Cable Address

Two institutions in this city can be reached from anywhere in the civilized world where Unithe use of just one word. This was made possible again by these firms renewing the cable eode addresses. These eode addresses are as follow: "BAPTIST," whieh means when deciphered anywhere in the civilized world where Universal or Western Union Code Book is used, "NATIONAL BAPTIST PUBLISHING BOARD, 523 2nd AVENUE NORTH, NASHVILLE, TENNESSEE." The other word is "CITBANK," which when deciphered means "CITIZENS SAVINGS BAND AND TRUST COMPANY, FOURTH AVENUE, AND CEDAR STREET, NASHVILLE, TENNESSEE.

Both the bank and the Publishing Board have earried their addresses in a eable book for a number of years. Only recently much money was saved in getting information from a foreign eountry to this city by having this cable address. When Rev. E. D. Hubbard, who passed away in Afriea, died, his relatives were able to save money in reaching the Publishing Board by using the word "BAPTIST" as their eable address. The same oeenrred when the late Minister of Liberia Mr. Francis, died an inquiry was sent to the widow, Mrs. Francis at Morovia, and she was able to reply in the code address and this insured prompt delivery of the message.

The Lever Code Book of Ad-Book of Addresses are two of the best known in the world.

COLORED AIRPORT DESTROYED

Announcement From Dale White, the Mgr.

Chicago, May—(By the Associated Negro Press)—Robbins Airport, located at the all-colored town of Robbins, and operated by the Challenger Aero club, founded by Johnny Robinson, was completely destroyed by a freak of the storm which swept this city's suburbs last Monday.

Airplanes in the hangar were blown 150 feet in the air and landed a block away from the field on top of a house.

The plane of Mrs. Janet Waterford, the only woman pilot in the race, was completely destroyed.

Robbins Airport was the only licensed port owned by Negroes in the United States.

Dale White, business manager of the Challenger Air Pilots Association announced after Monday's storm that plans were to be hurried to rebuild the hangar by the time of the opening of the World Fair.

MORE ABOUT MIS-EDUCATION

Prof. Kelly Miller Elaborates on Subject of Writer

Washington, D. C.—The late Julius Rosenwald stated that he was "miseducated" in the public schools. Dr. Carter G. Woodson has collected a series of essays under the title: "The Miseducation of the Negro." Lord Macauley used to take the title of an author as a point of departure using it as a pretext to indulge his own dissertation upon the suggested theme. Prof. Horace M. Bond has made an adequate review of Dr. Woodson's book in the April number of the Journal of Negro Education. I shall discuss the subject as if the book had not been written.

The higher education of the Negro in private schools may be divided into three periods: (1) under support and tuition of Northern philanthropy, with religious aim, (2) the Armstrong-Washington regime, and (3) under direetion of the educational foundations.

The early philanthropists posted a definite aim and ideal. They sought to make the Negro a Christian and to give him as mueh of the so-called higher learning as he was able to take so as to make him serviceable in the uplift and reclamation of the race. They borrowed the elassieal curriculum, which had proved itself effeetive for the needs of the choiee white youth throughout the European world. Their ideology was definite and certain or of the North pole to whieh it points. Of this they had no more doubt than the captain of his compass. Ware of Atlanta, Tupper of Shaw, Reynolds of Lincoln, Cravath of Fisk, Matoon of Biddle, and Patton of Howard lived, labored and died in the faith. Although they did not reach the goal aimed at, it would be sacrilegious to refer to their work as "Miseducation."

Armstrong and Washington formulated a different ideal, and aimed at a different objective. With them, religion as a dynamic was

F. D. ROOSEVELT TO HELP NEGROES

WAR DEPARTMENT'S ORDER

Thousands to be Sent to All Forest Camps

Washington, May—(By the Associated Negro Press)—Robert Fechner, director of the Emergency Conservation Work, Thursday approved War Department orders authorizing the movement of 24,400 additional men from conditioning camps to Emergency Conservation Work camps in the National Forests and National Parks. The men will be established in 122 camps located in twenty-six states. All told, orders have now been approved authorizing the movement into forest eamps of 33,600 of the young men who have been selected for reforestation work in accordanee with the President's Emergency Conservation Program. A total of 168 eamps will be needed to aeeommodate these men. Nine of the 168 camps are now occupied, the first having been established near Luray, Va.

Not all of the unit movements authorized today will be made at onee. In several instances the men who will go into these camps are just being enrolled. These men still have to go through the conditioning eamps set up in the various eorps areas by the War Department. In all cases the actual dates when men will be moved from conditioning eamps into work eamps in the National Forests or Parks will be arranged by Corps Area Commanders and Regional Foresters. No movements will be made until the men are ready, the forest eamp sites are in condition to receive the men and both the Army and Forest Service of the Department of Agriculture are in agreement that they should be made. In the movement of men, the general policy is being followed of sending men to work camps in the same States in which they were enrolled when this is practicable.

Up to date approximately 40,000 young men have been enrolled to carry out President Roosevelt's Reforestation Program. A total of 821 forest camps have been selected and approved by President Roosevelt and Mr. Fechner.

WOODSON TO BE KNOXVILLE COLLEGE COMMENCEMENT SPEAKER

Knoxville, Tenn., April 29—Dr Carter G. Woodson will deliver the commeneement address to Knoxville College seniors this spring and Dr. Huber Ferguson of Washington, Pennsylvania, will speak at the Sabbath baecalaureate service and to the Christian associations.

Dr. Woodson, nationally known Negro historian, was to have appeared on the artist-lecture eourse of the college this spring. By arrangement it has been possible to have him is the eommencement speaker instead.

SEC'Y OF LABOR REPLIES TO QUESTIONS

Reconstruction Plans for Employment to Include All People

That the Negroes of America will not be overlooked in the vast reconstruction plans for employment and relief of the Administration was assured to Eugene Kinckle Jones, Executive Secretary of the National Urban League in a letter addressed to him by Miss Frances Perkins, Seeretary of Labor. Miss Perkins' letter to Mr. Jones was prompted by a special memorandum for The President, Franklin Delano Roosevelt, on "The Soeial Adjustment of Negroes in the United States", whieh the National Urban League recently submitted to The President and to his cabinet and other high officials of the government as well as leading citizens, black and white, throughout the nation.

Miss Perkins in her letter said: "May I congratulate you on the Special Memorandum for the President on "The Social Adjustment of Negroes in the United States." He asked me to tell you that he is very glad to have this factual summary. He realizes the unfavorable economie position of the Negro, and the tremendous suffering which the present depression has brought to them and to other unskilled as well as skilled workers.....

"I can assure you that as this Administration undertakes the problems of relief administration, of providing work opportunities, of raising basic wage levels, etc., etc., we shall not forget the speeial problems of the more than ten million who belong to your raee."

Last week Mr. Jones and T. Arnold Hill, Direetor of the Department of Industrial Relations of the National Urban League, were granted a conferenee with the Secretary of Labor and the plight of Negro

(Continued on Page 8, Col. 5)

MOREHOUSE MINISTERS STAGE CAKE RACE

Atlanta, Ga., May—(By the Associated Negro Press)—Keen competition is expected in the Annual Cake Race to be held at Morehouse college Wednesday afternoon at four o'clock under the auspices of the Ministers union.

The event, which is a three mile cross eountry run starting from the campus and ending with three laps aromnd the athletic field, will have for its favorites two members of the Junior class, Theodore Stewart of New York City, who was the winner of the event two years ago and "Josh" Archer of Atlanta, who was victorious last year.

With an entry list of seventy or eighty eompetitors, there is still room for several dark horses to furnish surprises.

Fifteen eakes donated by members of the faculty will be awarded as prizes for the first fifteen runners to cross the finish line.

MORGAN COLLEGE NEWS ITEMS

Dramatic Club presents Three One-Act Plays

Three one-act folk plays were presented by the Morgan College Dramatic Club at the Douglass High School auditorium before an audience of more than one thousand persons on May 4th. The scope of the program ranged from stark tragedy to hilarious comedy as the student actors interpreted stories of North Carolina, New England and Alabama.

The bill opened with "Rain" a study of New England "peasant" life by Dana Burnett. Pitched in a somber key, it shows a woman going insane under the pressure of monotony, haunted by the memory of a lover who perished at sea many years before. The role of "Allie Baird" was excellently portrayed by Phenola Valentine and she was ably supported by Robert Burrows and James Brown.

The tension created by this play was broken instantly by "Magnolia's Man," a Carolina folk play by Gertrude Coffin. It portrayed the story of a spinster who ordered a husband through the mail and was somewhat disappointed when he turned out to be not exactly what she had ordered. Real comedy was provided by Helen Edmonds, Elizabeth Bradley, Ages Bryand and Eldridge Waters who composed the cast.

The program closed with "Bad Man", an inter-collegiate prize winning play by Randolph Edmonds, who is director of the Morgan Players. Taking for his lacale a saw mill camp in Alabama, the author painted the portrait of "Thea Dugger, killer, desperado and gambler, who in time of stress, displayed qualities of heroism. Filled with fast-moving action, the play held the attention of the audience at a high pitch. The role of "Thea Dugger, niller, desperado and gambler, preted by James Mebane and he had an excellent supporting cast which included Annette Colbert, James Grant, Agnes Bryant, Robert Burrows, Eldridge Waters, Wililam Lewis and James Browne.

The entire program was enthusiastically received by the audience as being one that pointed to a brilliant future for the Negro in the dramatic field and for the Morgan College Dramatic Club and their director, S. Randolph Edmonds.

HERSHEY COMPANY PRESENTS MOTION PICTURE

On May 3, a motion picture portraying the manufacture and preparation of the Hershey Chocolate products was shown as a special feature of the weekly assembly program.

The picture was presented by a representative of the Hershey Co., and was conceded by all to be of outstanding educational value.

"THE NEGRO IN AMERICA"

The Westminster Adult Bible Class for April Contains Article

On page 194 of The Westminster Adult Bible Class, a monthly magazine for April, there appears an article under the caption of "The Negro in America." It is in the editorial point of view section of this publication, which is said to have more than a million circulation, because it contains the International Uniform Series Lessons.

The publication is issued by the Board of Christian Education of the Presbyterian Church in the U. S. A. The article reads:

In 1790 there were 757,206 Negroes in the territory comprising the United States. The census of 1930 gives 11,891 143. When the Civil War opened there were less than five million.

This editorial aims to call attention to a fact frequently overlooked by people who see the Negro primarily as a problem. This fact is the progress made by this race since the Civil War. A recent compilation of achievement showed that there are 4,000 Negro musicians and music teachers; nearly 20,000 ministers of the gospel; more than 1,000 college presidents and professors; 3,500 trained nurses; over 1,000 dentists, and nearly 300 artists and teachers of art. Roland Hayes has sung before royalty, Dr. Carver has become a recognized authority on chemistry, and Booker T. Washington has won a place among the immortals of the United States. In the best universities Negro students are receiving their higher degrees, and they already have a telling representation in Phi Beta Kappa.

For a number of years the education of the Negro was a national problem. This was never shown more forcibly than in report of a conversation held between President Theodore Roosevelt and Dr. Buttrick, who was then seceretary of the General Education Board. Dr. Buttrick had come to consult President Roosevelt on the policy of Negro Education.

Said Roosevelt, "I believe in giving the Negro eight grades of schooling and then an industrial education.

"Yes," replied Dr. Buttrick, "that is good; but who will teach the eight grades?"

"That's so," said Mr. Roosevelt, "if you are to have eight grades, you must have twelve grades to train teachers who will teach the eight."

Dr. Buttrick continued, "But, Mr. President, if you are to have twelve grades, who will teach the twelve?"

In characteristic manner the President slapped his leg, saying, "By George, Buttrick, there is no end to this thing, is there?"

To which Dr. Buttrick replied, "No, sir; no more end to it than there is to the education of white boys and girls."

The Presbyterian Church, along with other denominations, has long had a policy of Negro education. It is hoped to fit Negroes for complete living and to take their place in making the contributions to life that God may grant them. Mr. Rosenwald, who died recently, has been the Negro's loyal builder of public schools. In the year preceding Mr. Rosenwald's death, the fund established by him had expended almost $2,500,000 on schools, medical welfare, and research. He provided for a continuance of this work in his will.

Surely the achievements of this race cannot be taken lightly. The abominable and unchristian prejudice with which a majority race often looks upon the minority cannot be sanctioned in the face of the facts. When the later history of our commonwealth has been put into the chronicles of men, the Negro will certainly have earned a right to share in the glories of accomplishment. The Church that knows these facts will undergird the Board of National Missions and the Board of Christian Education in their work with the Negro.

ATLANTA UNIVERSITY

A demonstration school of some of the methods of progressive education will be held at Atlanta University this summer in connection with the Atlanta University Summer School according to an announcement made by President John Hope.

Miss Jessie Stanton of the Bureau of Education Experiments in New York and Miss Helen Garrett, Director of the Mount Kemble School in Morristown, New Jersey will direct the work with the assistance of Mrs. Helen A. Whiting, Director of the Oglethrope School. They will be assisted by members of the teaching staff of the Oglethorpe School. The demonstration school will be held in connection with work of the kindergarten and the first grade and also of two upper grades.

Miss Stanton and Miss Garrett have come from long experience in progressive schools and their classes will demonstrate not only methods of teaching the academic skill subjects, but also integrated activity curricula. The programs of the two lower groups will center around the inherent interests of small children; the content will be developed from trips explaining familiar neighborhood situations. The classrooms will be equipped with the kinds of materials with which the children can play out these experiences.

The programs of the older children, in a like manner, will demonstrate activity programs centered around maturer content, including history and the social sciences and will be developed through trips and source materials which naturally lead from the immediate environment to more distant fields.

In connection with the school, Miss Stanton and Miss Garrett will give a course in the methods in the school. Mrs. Whiting will supplement this course with one on the academic skill subjects, reading, writing and arithmetic.

The topics discussed in the course by Miss Stanton and Miss Garrett will include the interests of children of different maturity levels, teachers' attitudes, the use of the environment as curriculum content and how this develops into the social sciences, including history and geography. The development of the programs through the 6 weeks will be followed in order to show how the curriculum content is used by the children in different forms of creative expression from block building through language and painting perhaps to the development of a play.

Paul Robeson is creating a new Ashor, a German-American Jew, in "All Gods Children Got Wings." Critics say his acting is great because, unlike white actors who work regularly, Paul has the leisure to develop his art.

IMPORTANT NOTICE TO EVERY READER

If you have moved from one address to another please send a written notice to your postmaster; write it out plainly and give it to your letter carrier if you live in the city, or your rural route carrier, if you live on a rural free delivery route. If you fail to do this the publisher of this paper will have to pay two cents on every paper going to your old address. This is a new postal law and regulation.

It is unfair to the publisher of this paper to have to pay the government two cents every week merely because you do not send a written notice to your post office. Not only should you notify the post master at once, even when you know you are going to move, but you should send a written notice to this newspaper so that they could change your address on the mailing list. Do not overlook these instructions.

THE MODERN FARMER

THE
NATIONAL BAPTIST PUBLISHING BOARD
Recommends some of
THE POPULAR SONG BOOKS
Listed below for use in Churches, Sunday Schools and B. Y. P. U. Meetings:

National Baptist Hymnal—Price, $1.00 per copy, $11.50 per doz.

National Baptist Old Style Hymn Book (words only)—Price, 70c per copy, $8.40 per doz.

Lasting Hymns—Price, 40c per copy, $4.80 per doz.

National Gospel Voice Hymnals—50c per copy, $6.00 per doz.

New Songs of the Gospel—Price 50 per copy, $6.00 per doz.

Victory Song Books, 40c per copy, $4.80 per dozen.

National Anthems—Price 50c per copy, $6.00 per dozen.

Steal Away To Jesus Anthem—Price 25c per copy, $3.00 per dozen.

Metoka and Galeda Anthems—Price 10c per copy, $1.00 per dozen.

National Jubilee Melody—Price, 50c per copy, $5.50 per doz.

If you are interested in congregational singing as well as choir music, send in for some of these books.

Send all orders to

HENRY A. BOYD, Secretary

NATIONAL BAPTIST PUBLISHING BOARD,

523 Second Avenue, North,

NASHVILLE, TENNESSEE.

IDENTIFICATION CERTIFICATES ORDERED

Congress Secretary Says Early Delivery Assured

Thousands of Identification Certificates have been ordered printed for distribution by the Secretary of the Sunday School Congress. They will be issued by Mr. J. E. Hannegan, the chairman of the Southwestern Passenger Association Territory Bureau at St. Louis, after which they will be forwarded here to the Congress Secretary's office in Nashville. He in turn will dispatch them to the "Key People" throughout the Convention, to be distributed to Congress messengers only and dependent members of their families, as provided by the regulation promulgated from the Association Bureau provided for the use of these certificates. Each one will bear a fac simile signature of the Congress Secretary.

It was expressed in his office this week that within the next fifteen or twenty days those desiring the certificates might secure them by writing directly here to Nashville.

For the past few years the rate has been passed on the certificate plan, and railroad ticket agents are required to sell a Congress round-trip ticket upon presentation of this certificate by the messengers and the accredited representatives of the various religious organizations who contemplate attending this annual gathering.

GUADALUPE COLLEGE SUMMER SCHOOL.

PRESIDENT J. R. LOCKETT SAYS FIRST TERM BEGINS JUNE FIFTH, SECOND TERM, JULY SEVENTEENTH

Seguin, Texas—(Special)—Guadalupe College will have a summer session for 1933 in various courses and studies. The president of the institution, J. R. Lockett, announced this past week that the first term would be from June 5th to July 15th, while the second term would start July 17th and conclude August 26th. They will offer the following courses: English, Education History, Economics Sociology, Mathematics, Spanish, Chemistry, Bible, Home Economics

The president further stated that a quarter's work is offered for credits toward the A. B. or B. S. degree. The extension of certificates, higher certificates, self-development, culture, professional efficiency are some of the things, he declared, that will be stressed.

In discussing the cost for students in summer school he said that the expenses will be astonishingly small. The total for both terms which include twelve weeks, will not exceed fifty-two dollars for tuition, board, room rent and incidentals. He added further: "Among the faculty members there will be not less than five who hold the M. A. of M. S. degree.

This institution is located in one of the most fertile spots of Texas, being partially a health resort, as there are hot sulphur baths free throughout the summer.

A STRANGE WILL

The Rev. Percy B. Prior, Marrickville. Sydney. Australia

An American lawyer who was in a lunatic asylum at the time of making his will, was rather poetic in his treatment of his gifts and, indeed, his imagination was rather that of a poet than a lunatic. His ideas were fantastic, but decidedly pretty. He made his disposition as follows:

To the Children

Item: I leave to children inclusively, not only for the term of their childhood, all and every, the flowers of the fields, and the blossoms of the woods, with the right to play among them freely, according to the customs of children, warning them at the same time against thistles and thorns. And I devise to children the banks of the brooks, and the golden sand beneath the waters therefore, and the odors of the willows that dip therein, and the white clouds that float high over the giant trees. And I leave the children the long, long days to be merry in a thousand ways, and the night and the moon and the train of the Milky Way to wonder at, but subject, nevertheless, to the rights hereinafter given to lovers.

To the Boys

Item: I devise to boys, jointly, all the useful idle fields and commons where ball may be played; all pleasant waters where one may swim; all snow-clad hills where one may coast; and all streams and ponds where one may fish, or where, when grim winter comes, one may skate, to have and hold these same for the period of their boyhood.

And also all the meadows, with the clover and butterflies thereof, the woods with their appurtenances the squirrels and the birds and echoes and strange noises, and all distant places which may be visited, together with the adventures there found.

And I give said boys each his place at the fireside at night, with all the pictures that may be seen in the burning wood, to enjoy it without let or hindrance, and without any encumbrance of care.

To All Lovers

Item: To lovers I devise their imaginary world, with whatever they may need, as the stars of the sky, the red roses by the wall, the bloom of the hawthorn, the sweet strains of music, and aught else that may require to figure to each othe lastingness and beauty of their love.

—The Homiletic Review.

PUZZLED

Most men are puzzled today. A writer in a British journal, The New Statesman, says: "We are probably living in the most puzzled age in the world's history..... We are puzzled in our politics, we are puzzled in our theology, and even the sciences and the arts are puzzling us as mortals were never puzzled before .....I have ceased to know, and am now merely puzzled ....I cannot for the life of me understand why, if the civilized world can produce more than it can consume, everybody has not a reasonable share of food, clothes, and shelter. I am puzzled as to the cause of unemployment, and I am puzzled as to its cure. I am puzzled as to whether great reserves of gold in America and France are hampering international trade, and if so, why? .... I am puzzled about India. I am puzzled about Russia....., Amid all my uncertainties, however, I am certain of one thing, and that is that uncertainties such as mine are more general today than they used to be .....The chief puzzle of the present age, it seems to me, is how long the general puzzlement will last, and whether the puzzle will be solved by a man who knows or by a man who only thinks he knows."

It may be said, humbly but truthfully, that the only people on earth today not puzzled are those who, born again from above by faith in Christ as Saviour, find in these staggering puzzles in current events the most convincing fulfillment of God's Word. The Scriptures have so plainly foretold these manifold puzzles as certain to occur in the end of the age, and heralding the Lord's return, that those who "love His appearing" recognized all this confusion as a sure sign, among many others, of his early return.

The Lord Jesus Himself said that, just before he comes again, there should be "upon the earth distress of nations, with perplexity" (Luke 21:25). The divinity predicted preplexity is certainly here, with "men hearts failing them for fear."

The Scriptures also tell us that this world-wide puzzlement will be temporarily sodier for a while by a world-ruller supernaturally empowered by Satan, a "man of sin ....the son of perdition; who opposeth and exalteth himself above all that is called God, or that is worshipped; ....showing himself that he is God" (2 Thess. 2:4). But under his reign the world will be plunged into worse tribulation, as a result of God's judgments, that has yet been known; and then the perplexity will be ended by Him who alone can solve all the world's problems and bring permanent peace and eternal blessing. For "then shall they see the Son of man coming in a cloud with power and great glory. And when these things begin to come to pass then look up; and lift up your heads; for your redemption draweth nigh." (Luke 21:27, 28. —Sunday School Times.

WOODMEN OF UNION LAUNCHES ECONOMY PROGRAM

Hot Springs, Ark., May—(By the Associated Negro Press)—In what was considered a very important move in the direction of a complete rehabilitation of the Woodmen of Union, local fraternal organization, the executive board in session Tuesday afternoon, launched a vigorous program of economy and set in motion plans to rebuild the membership to its former standing.

In order to get within its present income and at the same build up a surplus for the liquidation of its outstanding indebtedness and for the development of its field activities, the board unanimously adopted an economy program which calls for the temporary closing of its hotel and bath house during the summer and the maintenance of its hospital on a smaller scale in keeping with its present membership. With its overhead expenses thus out down to a minimum, it is the opinion of the Board that the Order will be in a better position to fulfill its obligation of service to its membership and at the same time keep up with its current expenses.

One member of the board, in discussing the measures of the "new deal" adopted by that body Tuesday afternoon stated that the reaction to those measures will mean the dawn of a new day for the Woodmen of Union. All the members of the board and the entire official staff pledged themselves to renew their efforts and work hard for an immediate increase of the membership.

After the adoption of the above economy program, plans were worked out for the immediate launching of a gigantic membership campaign. Five thousand new members is the goal set to be reached within the next ninety days or by the time the Supreme Lodge meets here in August.

Members of the Board present at the meeting were: William H. Falconer, chairman, E. A. Kendall, M. D.; Jno. L. Webb, Jno. E. Evo, M. D., and Mrs. Mary F. Horton.

ARKANSAS A. AND M. COLLEGE MAY SEEK R. F. C. LOAN

Pine Bluff, Ark., April—(By the Associated Negro Press)—At a meeting of the board of trustees of the A. & M. college here, attended by Gov. Futrell, the possibility of applying to the Reconstruction Finance Corporation for a loan of $30,000 was discussed. J. B. Watson was re-elected president of the college.

THE MODERN FARMER

Official organ of the National Federation of Colored Farmers, Inc.

Leon R. Harris - - Editor

Published monthly by the Modern Farmer at Nashville, Tennessee, and Chicago, Ill.

Nashville, Tenn., Office, 447 4th Avenue, North.

Devoted to the interests of the Farmer, Truck Gardner, Livestock and Poultry Breeder, the Home and the People.

Entered as Second Class Matter, April 10, 1929, at the Post Office at Nashville, Tenn., under act of March 3, 1879.

All contributions for publication in the Modern Farmer should be addressed to The Modern Farmer, 447 4th Avenue, North, Nashville, Tenn.

No libelous matter will be published. Unsigned articles or letters, and those written on both sides of the paper will not be used.

Subscription price $1.00 per year, 75c for six months, payable in advance. Personal checks must be certified. Make all checks or money orders payable to The Modern Farmer.

Advertising rates and sworn circulation figures presented upon application.

"OUR SLOGAN"

STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT.

THE LAW

"It is hereby declared to be the policy of Congress to promote the effective merchandising of agricultural commodities by encouraging the organization of producers into effective associations under their own control.

The Board is authorized and directed—to promote education in the principles and practices of cooperative marketing—to encourage the organization, improvement in methods, and development of effective cooperative associations. (Public—No. 10—71st Congress. Sec. 1-5.)

THE GOSPEL

"This law is predicated upon the ability of the farmer to manage his own business, once he is organized to do so. Cooperation is the key to it and only in exceptional cases can the Federal Farm Board have any dealings with a farmer who is not a member of a producer-owned and producer-controloled marketing unit."
Hon. Sam'l R. McKelvie, Former Member, Federal Farm Board.

SIGNIFICANCE OF THE BIBLE IN YOUR OWN LANGUAGE

American Bible Society, New York City

For the first time in many years Turkish men and women have been openly confessing Jesus to their scandalized neighbors. They have been haled before minor Government officials and severely dealt with according to a recent report from the American Bible Society's agency in Turkey. But those officials later have been rebuked from the capital for their failure to respect the liberty of conscience which the laws of the Republic guarantee to every citizen. Though God has used many means to awaken the hearts of these men and women, the American Bible Society gives special thanks that its new Turkish Scriptures are having definite part in this significant work.

In the closing days of 1932 a new location is Lima, Peru, was occupied by the American Bible Society. The depot is located on a busy street and the window display is proving attractive to passers-by.

One gentleman after looking at a set of pictures illustrating Bible stories walked back and forth several times, looking in through the glass door, evidently hesitating to enter. Presently he went in and asked for a copy of Proverbs which he had seen in the window. When he had examined it he asked about other Scripture volumes and wad shown a New Testament and a Bible. But surely the Testament was very cheap! It was explained to him that certain editions are sold by the American Bible Society below cost price so as to make them available to even the poor.

He decided to take the Testament. And the Bible? What did it contain? He was surprised to discover that it contained both the proverbs and the New Testament and so he bought the Bible and left the other two. He evidently knew little about the Holy Scriptures but went away very much interested in his purchase.

SOWING AND REAPING

"As we sow so shall we surely reap,"
Reads a Scripture Law we cannot break.
Co we forth to sow and oft' to weep
And for harvest time patiently wait.
Do you ask me, "What will harvest yield?"
That depends on sowing seed, you know.
If we bountifully now our field,
Then will great increase the harvest show.

If we, in our sowing, seed withhold,
And but sparingly there falls the rain,
Then in harvest we shall sore behold
Very small increased output of grain.

We should watch the kind of seed we sow,
Should select it with painstaking care;
For both bad and good will surely grow,
Whether planted it be wheat or tare.
If, instead of good, we sow the bad,
Then the fault is surely all our own.
Then the harvest time shall make us sad,
For we must reap that which we have sown.

Sowing season period lasts so brief,
But the reaping season runs for aye.
Would we know the joy and not the grief.
Best to spirit sow while morn is nigh.

Have we sown seed good for us to reap?
Then there'll come to us no sad dischord;
For we'll come rejoicing— not to weep—
When we lay our sheaves before the Lord.

T. B. Rouse.
1104 Madison, Paducah, Ky.

GEORGIA'S 6,000 TEACHERS APPEAL TO "UNCLE SAM"

Discrimination Against Negro Laborers in Government Cited

Savannah. Ga., May—(By the Associated Negro Press)—Following an address delivered by Jesse O. Thomas, southern field director of the National Urban League, before the Georgia Teachers and Educational Association, in session here. a resolution was adopted urging Secretary of Labor, Frances Perkins to discourage discrimination in the distribution of federal relief.

Mr. Thomas whose speech was the keynote address of the occasion spoke on the "Unemployment among Negroes in the South." He related some of the experiences he had in company with T. Arnold Hill, another official of the National Urban League, in traveling by automobile through parts of seven of the southern states, and visiting some forty odd cities. The speaker stated that in every community visited there was unwarranted, unexplainable and unsocial discrimination practiced on the basis of race in the allocation of both food and work relief.

The Association representing six thousand teachers in the State of Georgia adopted and forwarded a resolution to Secretary Perkins urging that she use her influence and powers delegated to her to the end that Negroes be included in the reforestation proect and other measures of relief over which the government has control, on equal footing and participation with other race elements.

DR. MARY F. WARING CAMPAIGNS IN SOUTHERN ILLINOIS

Mounds, Ill., May—(By the Associated Negro Press)—Dr. Mary F. Waring, vice president of the National Association of Colored Women in company with Mrs. Annette Officer of E. St. Louis, vice president of the Illinois State Association; Mrs. Jeanette Smith, state organizer; Mrs. Nannie Mae Williams, state recording secretary; Mrs. Nannie Reed; Mrs. Ruth Steele, Mrs. Cora Patton, all of Chicago were guests of the Southern District Association last Friday and Saturday which convened at St. Paul A. M. E. church. Mrs. Alice J. Charlton of Madison is president.

The session opened Friday with a local program, Mrs. Hannah A. Woods of Carbondale presiding. The large delegation was welcomed to the city by Mayor J. B. Jones.

Dr. Waring who is a candidate for national president made two addresses during the session. She is a pleasing and forceful speaker. The Southern District voted unanimously to support her candidacy in the National election at Chicago in July.

Mesdames Nannie Mae Williams, Nannie Reed, and Ruth Steele took part in a skit showing the progress of the National Association during the past three years.

The next meeting will be held in Marion, Illinois.

THE FAITHFUL PASTOR

He held the lamp each Sabbath day
So low that none could miss the way,
And yet so high to keep in sight
The picture fair of Christ the light
The handle coming thus between
The hand that held it was not seen.

He held the pitcher stooping low.
To the lips of little ones below
Then lifted to the weary saint
And bade him drink when sick and faint
The pitcher coming thus between
The hand that held it was not seen.

He blew the trumpet loud and bold
To storm the fort of Satan's hold
Then with a tender note and clear
That trembling sinners need not fear
The trumpet coming thus between
The hand that held it was not seen.

But when the Master said "Well done
Thou good and faithful servant, come,
Lay down the pitcher and the lamp,
Lay down the trumpet, leave the camp,"
Thy hand is now most clearly seen
Clasped in His pierced one, naught between.

—The Baptist.

WITHOUT MONEY AND WITHOUT PRICE

Earth gets its price for what Earth gives us;
The beggar is taxed for a corner to die in,
The priest has his fee who comes and shrives us,
We bargain for the graves we lie in;
At the devil's booth are all things sold,
Each ounce of dross costs its ounce of gold;
For a cap and bells our lives we pay,
Bubbles we buy with a whole soul's tasking:
'Tis Heaven alone that is given away,
'Tis only God may be had for the asking;
No price is set on the lavish summer;
June may be had by the poorest comer.

—By James Russell Lowell.

KINDNESS

"What is the greatest good?" I asked in musing mood.
"Order," said the Law Court.
"Knowledge," said the School.
"Peace," said the Wise Man.
"Pleasure," said the Fool.
"Love," said the Maiden.
"Beauty," said the Page.
"Freedom," said the Dreamer.
"Home," said the Sage.
"Glory," said the Soldier.
"Equity," said the Seer.
Spake my heart full sadly,
The answer is not here,
Then deep in my bosom
Softly this I heard:
"Each heart knows the secret, kindness is the word."

LONELY SERPENT

Whoever sees serpents go together in bands? A serpent goes alone. And what is more, he never means any good. So it is with a person who slides off to the side, forsaking his fellow Christians in the village. He means no good! Evil he plans, and evil he will do. Forsake not the assembling of yourselves together! Keep within the fellowship.

—Record of Christian Work.

Big jobs usually go to men who prove their ability to outgrow smaller ones.

Clipped.

NEGRO PRESS RESPONSIBLE FOR RACE'S MANY CIVIL VICTORIES SAYS BUSINESS SPECIALIST OF UNITED STATES COMMERCE DEPARTMENT

Jackson Cites Power of Colored Papers in Directing Purchases of Masses

Baltimore, Md., May By the Associated Negro Press)—"The purchasing power of the Negro, as expressed in the five-cent pieces that buy more than 800,000 Negro newspapers each week, is the foundation upon which all our efforts in the Scottsboro case and the Crawford case—these race challenges to full citizenship rights—has been built," declared James A. Jackson, Business Specialist of the United States Department of Commerce, in an address with which the Negro Trade Week sponsored by the Association for the promotion of Negro Business was opened last Monday night.

Explaining his declaration, Mr. Jackson said that within the past twenty years the growing Negro press had awakened white commercial Americans to the value of the Negro as a market and to regarding the race in terms of dollars and cents. This changed idea of race value has been responsible for millions of dollars of advertising from white sources in Negro publications. This has greatly assisted the growth of the size and influence of the Negro press; and this income made possible the coverage of the Scottsboro trials by representatives of the Associated Negro Press and the Cooperative Publishers Association.

Without the publicity eid rendered by the more than 244 Negro publications, the arousing of public sentiment, the collection of funds and the assembly of indignation meetings would have been difficult. if not impossible.

"Thus," said he, "one business proves its direct and indirect benefit to the people who sustain it. This value is quite supplement to the 6,000 Negroes who today are supported by employment with Negro owned newspapers and magazines. Those men and women are useful members of society, skilled artisans or academically degreed people who would not be absorbed in American businesses by others.

"As it has been in journalism, just so with all businesses, Education and the depression has helped us realize that business development is not an individual interest; and that the interests of the race group are interdependent. It is the medium through which our earning capacity and purchasing power is translated into the powers and prerogatives of citizenship. That's why 35 per cent of all Americans of other groups are engaged in business.

"With 142,100 Negroes constituting 14.8 per cent of the population, Baltimore, to be equal to other peoples of the city, should have 2,446 retail stores with 5,663 clerks if the whole $53,000,000 earned annually were spent with race businesses. Instead the state has but 515 Negro businesses who employ 195 clerks, 142 of whom are in Baltimore.

"Don't quarrel with our merchants," he concluded. "But help teach them to become better merchants. Don't worry what they don't have, but buy what they do have that meets your needs, and like others they will soon be able to expand their stock to compare with any.

The week's program included visiting Negro owned stores throughout the day and a series of meetings at Odd Fellows hall each evening. T. Wallis Lansey is president of the association; C. Henry Jenkins, executive secretary, Wm. Fitzgerald, vice president and Josiah Diggs, treasurer.

STEPIN FETCHIT STOPS IN TOWN.

Stepin Fetchet, famous stage and screen star, stopped in the city last Monday afternoon en route from Florida to Chicago where he will begin work for his parts in the World's Fair.

The famous comedian stopped at Charles H. Thorn's Roof Garden Cafeteria in the Morris Memorial Building for dinner, and continued his motor trip towards the "Windy City" after having consumed a heavy dinner which included two large orders or cabbage.

PRAIRIE VIEW STATE COLLEGE FORMULATES PLANS FOR COMMENCEMENT EXERCISES

By Napoleon B. Edward

Plans for commencement at Prairie View State College have been formulated. Dr. Edward Bertram Evans, chairman of the committee on graduation, has announced the following committees to provide every phase of commencement procedure, programs and special announcements, awards and prizes, alumni and visitors, decorations, ushers and arrangements, traffic and parking, transportation and baggage.

Alumni Day is May 27. On that day graduates and former students from all sections of Texas will gather in annual session. The Local Alumni Club under the direction of President Roby W. Hilliard is making special arrangements to entertain the alumni and former students.

The baccalaureate sermon will be preached Sunday, May 28th, by Dr. Charles C. Selecman. president of the Southern Methodist University, Dallas, Texas.

The commencement address will be delivered by Dr. J. Newton Jenkins, pastor of New Hope Baptist Church, Waco, Texas: and degrees will be conferred and prizes and awards will be presented May 29. Registrar John B. Cade reports that there are forty candidates for the bachelor's degree and thirteen andidates for the diploma in nursing education.

In speaking to the faculty recently assembled in general session. Principal W. R. Banks said: "Soon the regular session of 1932-1933 will pass into history. From many angles this has been a most successful and fruitful year. There is evry evidence of definite progress. The achievements of this year are attributable to the training and fine spirit of cooperation on the part of everyone. Therefore, may I express to each of you my deep feeling of gratitude for your contributions to the success of this noble enterprise?"

Prairie View State College continues to grow in usefulness to the masses and in recognition by the standardizing and rating agencies of the country. This is largely due to the wisdom and industry of Principal Banks, ably assisted at all times by a cooperative and outstanding faculty.

FALLING TREE KILLS AGED WOODCHOPPER IN ARKANSAS

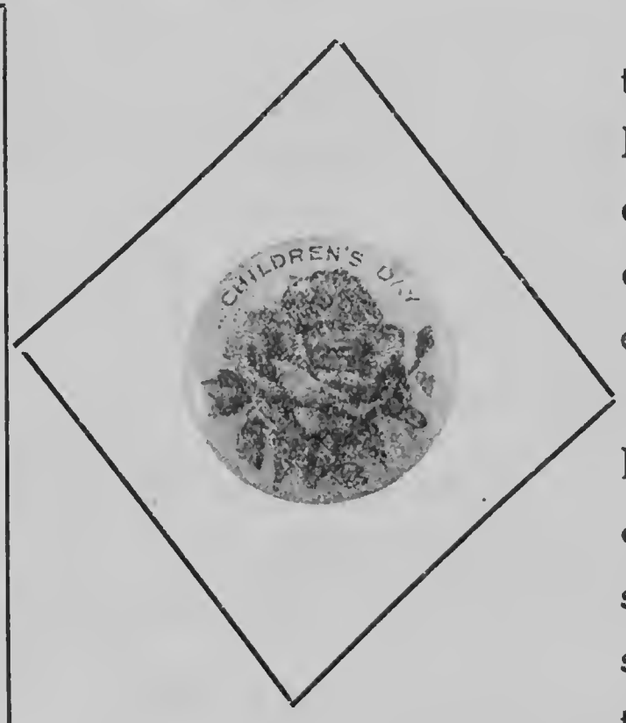
Camden, Ark., May—(By the Associated Negro Press)—Joseph Curry, 85, was killed when he had his back broken when a tree he had chopped down fell on him last Saturday.

The aged man had been missing from his home when his body was found by a searching party in the woods a half mile from his home.

CHILDREN'S DAY PROGRAMS READY

Music-Recitations-Dialogues With Good Ceremonies

This Brown skin Baby Button for Children's Day would be a joy to every child in Sunday School. Price 60 cents per dozen. They work well with Children's Day Programs.



Children's Day Programs for 1933 are just from the presses of the National Baptist Publishing Board Plant. They are ten cents per copy. People with discriminating taste who have seen the publication declare that it is a superior article to any of its predecessors.

Send $1.00 for one dozen copies, or if you want less than this number send at the rate of ten cents each. Do not ask for C. O. D. shipments. Every school desiring assistance in preparing for the observance of Children's Day would do well to order the Children's Day Programs. Send all orders to the

NATIONAL BAPTIST PUBLISHING BOARD

TUSKEGEE TRACK AND FIELD TEAM BEAT FIVE HUNDRED CRAMTON BOWL

Montgomery, Ala., May 4—The Tuskegee Institute track and field team descended upon Cramton Bowl Thursday afternoon, May 4th and captured thirteen first places, eight second, and three third places in a dual encounter with State Teachers College and won the thrilling and spectacular meeet with 97 points. The local team won a representative assortment of awards and rolled up 77 points. The Teachers flashed superior form in the college men's section and ran away with the races. The upset of the afternoon competition was the 100 yard dash in which Hayward Henry of State Teachers College raced ahead to win over James H. McCarthy, Tuskegee's cinder path ace and Olympic qualifier, in the splendid time of 9.6 seconds. Henry, whose home is in Birmingham, Ala., appears to be a real dash threat and his triumph over McCarthy, conceded winner of the dash event, marks him as a man to be watched in the century at the Tuskegee Relay Carnival, which will be held in the Alumni Bowl at the Institute, May 12 and 13.

James Fields of State Teachers College won the javelin throw with a heave of 151 feet and 3 inches. James Martin also of Teachers College was second, with an even 151 feet, while third place went to Geo. L. Smith of Tuskegee. His distance was 140 feet.

Leroy Lazenberry, Tuskegee Freshmen of St. Paul, Minnesota, won the discus. Lazenberry heaved the platter for a distance of 106 feet. Second and third place in this event went to Patrick Wesley (Teachers College) and Morelee Singleton (Tuskegee) respectively.

Thelma Earl, a Tuskegee junior, from Kalamazoo, Mich., won the girls' shot put with a distance of 32 feet, 9 inches. Florence Wright of State Teachers College won second place.

John Martin (Teachers College) won the boys' shot put with a distance of 38 feet, six inches; Thaddeus Green (Tuskegee) was second with a distance of 37 feet, 9 inches and Patrick Wesley (Teachers College) won third place. His distance was 37 feet, 6 inches.

Tuskegee and the Teachers divided the honors in the boys' high jump. Raymong Johnson, Tuskegee, and Edward Morris for the Hornet team, sailed over the bar for a height of 5 feet, 10 inches.

Mamie Hardnett of the Tuskegee Institute High School Department, an Opelika, Ala., girl, outjumped her competitor, Kate Griffin of State Teachers College, and captured this event with a height of 4 feet, 4 inches.

In the running broad jump, Vesta Crayten and Frances Ary, her lithe running mate from Chicago, Ill., took both the first and second places in this event. The distance was 15 feet, 3 1-2 inches. Mattie Paige (Teachers College) won third place with a distance of 12 feet, 7 inches.

Estella Pearson (Tuskegee) won the javelin throw with a distance of 77 feet. Second place went to Florence Wright of Teachers College.

Ruth Kidd (Tuskegee) threw the baseball 185 feet. Dollie Adamson (Teachers College) was second with 145 feet. Florence Wright won third place. Her distance was 126 feet.

Florence Wright (Teachers College) won the girls' discus. She heaved the saucer for a distance of 104 feet, 2 inches. Estella Pearson (Tuskegee) former Tuskegee Relay title holder won second place.

In the college men's section, State Teachers College won the 100 yard dash, the shot put, the 440 yard relay, the broad jump, the javelin throw and the 880 yard relay.

Tuskegee won the discus throw, the one mile relay and the two mile relay.

In the high school section the Tuskegee Institute boys won handily and garnered the 440 yard relay and the 880 yard relay.

In the girls' section the young dianas from Tuskegee Institute completely outclassed their friendly rivals of State Teachers College by winning eight of the nine events contested: Mary Ashford, Tuskegee Freshmen from Millsboro, Ala., won the fifty yard dash. The gem of the girls' afternoon performance was the one-fourth mile relay which Tuskegee's fast traveling foursome composed of Hattie Clark, Frances Ary, Marie Ferguson and Vesta Crayten showed saddling speed on the rain-soaked track, turning in the remarkable good time of 55.1 seconds.

The meet was well handled and the indications are that the cinder season followers in this region may look forward annually to a growing gallery.

The officials were: H. C. Trenholm, referee; C. L. Abbott and G. F. Lewis, starters; R. S. Darnaby and Franklin W. Taylor, timers; Benjamin F. Stevenson, R. A. Mundy, John H. Brown, G. H. Lockhart, Van Dyke, Lewis and Elisha Campbell, judges.

THE HAPPIEST HEART

Who drives the horses of the sun
Shall lord it but a day;
Better the lowly deed were done.
And kept the humble way.

The rust will find the sword of fame,
The dust will hide the crown;
Aye, none shall nail so high his name
Time will not tear it down.
The hapiest heart that ever beat
Was in some quiet breast
That found the common daylight sweet,
And left the heaven the rest.

—John Vance Cheney.

MESSENGERS

Mississippi Will Send Increased Number in June

Shreveport, La.—(Special)—Five hundred men and women representing every church and every denomination greeted Henry Allen Boyd, secretary of the Sunday School Congress, and Prof. H. B. P. Johnson, the chorister, here Monday night. It was the first organization and set-up meeting of the mammoth chorus that will be trained from now until the curtain is lifted on the 1933 session of this religious Summer School of Methods. Interest has been at fever here ever since it was announced that the secretary, the musician and the national chorister would come down to starte their work for May 8th.

Ministers from North Louisiana motored over to join with those here, so that Monday during the day they could hear this national worker further expose his plans for the rousing, intensive and yet helpful session which will be the twenty-eighth in its history.

Sunday was a busy day with him. He arrived Sunday morning over the Cottonbelt Railroad at 7:45, was met by a reception committee and taken at once to the home of Dr. Harris. But they say that Henry Allen Boyd will not stay in, that it is the nature to go; so by nine o'clock he was ready. They visited nearly every school in the city with a flying squadron, and then wound up at the Galilee Baptist Church for the eleven o'clock hour. Hence, on Monday night Shreveport was a beehive of activity. The organization work having been completed, the Baptist leaders here are predicting that this will be an epoch-making occasion, a historical setting, and that more and better Sunday Schools will be the result.

Unless I had the spirit of Prayer, I could do nothing. If even for a day or an hour I lost the spirit of grace and supplication I found myself unable to preach with power and efficiency, or to win souls by personal conversation. In this respect my experience is what it always has been—Charles G. Finney.

IMPORTANT MESSAGE!

PRIZES OFFERED!

"WHAT'S THE MATTER WITH THE AVERAGE NEGRO FARMER?"

Some question, is it not? Well, we want to know and nearly everyone wants to know. We want you to tell us in your own way and in your own words.

We want to know so badly that we are offering three cash prizes for the best letters received as an answer to the question. Any man, woman or child may write. The contest closes September 1, 1933. Write 'em long or short, just answer the question. You may win a prize.

FIRST PRIZE—Five Dollars in Gold.
SECOND PRIZE—Three Dollars.
THIRD PRIZE—Two Dollars.

The best letters will be published throughout the year. All letters become the property of the Modern Farmer, when received. Judges are the editor and one representative from each state in which the National Federation of Colored Farmers, Inc., has chartered Units. These representatives will be chosen by the Executive Committee of the organization. Prizes will be awarded during the 1933 N. F. C. F. Convention.

Mail all letters written for this contest to

LEON R. HARRIS, Editor,
Box 209 Moline, Illinois

As a sample, we publish below a little sketch about? "What's The Matter With the Average Georgia Farmer." Don't copy from this, it won't count. We just want to give you an idea.

"What's the Matter With the Average Georgia Farmer?

"The average Georgia Farmer gets up in the morning by the alarm of an Illinois clock (Big Ben), buttons his Chicago suspenders to a Detroit overall, washes his face with Cincinnati soap in a Pennsylvania pan, sets down to a Grand Rapids table and eats Chicago meat, Indiana hominy, fried in Kansas lard, on a St. Louis stove.

"He then lights his New York lantern and goes out to the barn and puts an Indianapolis bridle on a mule fed by Iowa corn and plows the farm covered by an Ohio Mortgage with a South Bend plow, and when bed time comes he reads a chapter in the Bible printed in Boston and says a prayer written in Jerusalem. Crawls under a blanket made in New Jersey only to be kept awake all night by the barks and wails of a Georgia yellow hound dog, the only home product on the place, and then wonders why he cannot make money."

Now Get Busy And Answer The Question And Win One Of The Prizes

FISK UNIVERSITY OFFERS SUMMER SCHOOL OPPORTUNITIES

Nashville, Tenn., April 28, 1933—In 1932 summer school was held at Fisk University for the first time since 1928. So successful was it that a summer quarter is being offered again this year beginning on June 16 and ending August 18. While the summer school is intended primarily for high school teachers and administrators seeking a Masters' Degree and for advanced students and workers in Sociology, it offers also Graduate and Senior courses leading to the Degree of Bachelor of Arts and Master of Arts in Education, English, History, Mathematics, Psychology and Sociology.

Summer school will be taught by present members of the faculty. Miss Belle Parmenter is working with Dr. Harold F. Smith, head of the Department of Education and in charge of the summer school; Prof. Theodore Currier is in charge of the Department of History; Prof. Bertram Doyle is working with Dr. Charles S. Johnson in the Department of Sociology; Prof. Lillian Cashin is in charge of the English Department and Prof. Alto Snell is in charge of Psychology.

All work offered in summer school is equivalent in method, quality and credit to that of the rest of the academic year, and is accepted by state boards for certification purposes.

WILL HONOR DEAD COMRADES WITH SERVICE

Calanthes, Juveniles, Uniform Ranks and Omars Get Proclamation

"Memorial Day" is designated as next Sunday, according to a proclamation just issued by Sir N. N. Reynolds, the Grand Chancellor, from his headquarters at Pulaski. Every Pythian in the Grand Jurisdiction is urged to have services for their departed ones. This takes not only the parent body of Brave Knights, but provides for the members of the Court of Calanthe, the Juveniles, the Cadet Groups, the Knights of Omar and the Uniform Rank Division.

In the Proclamation just released, which is No. 6, Series H, the Grand Chancellor said:

"To All Grand Lodge Officers, Deputy Grand Chancellors, Supreme Representatives, Chancellor Commanders, Officers and Members of the Subordinate Lodges, N. A., S. A., E., A. A. & A., Jurisdiction of Tennessee, Greetings:

If ever a people deserved commendation or praise, that recognition belongs to the members of one of the greatest orders that ever existed, namely the Knights of Pythias of Tennessee. We all know that this has been an exceedingly hard year with everybody, the climax of the Depression which has been gradually creeping upon the world for years, the full force of which has been felt keenly for the past few months, with thousands of men idle, many times with large families dependent upon them and no means of supporting them, so that it is not surprising that hundreds of Knights with bleeding hearts have been compelled through force of circumstances to drop by the wayside. But realizing anew the fact that this Order is founded upon brotherly love, bound by the obligations taken at the sacred altar, to cleave together in times of need and distress for the protection of each other, these men, hundreds of them said, "We are down but not out", and at the first sound of the bugle of returning prosperity, they returned to their allegiance and are again trudging side by side under the triplicate banner of Friendship, Charity and Benevolence, determined to stick to the end. We thank you for your loyalty and commend you for your foresight, and pledge anew that we shall also continue to abide by these principles for the advancement and upbuilding of the Brotherhood.

Memorial Day

Many of our faithful Knights have fallen asleep in death, and we mourn their passing. One of our Deputy Grand Chancellors, Dr. J. L. McGowan of Knoxville; and Sir M. F. Burke, his predecessor for many years, and husband of our own Grand Worthy Counsellor, also of Knoxville, were called from labor to reward, and scores of others who were dear to us. Therefore in accord with the laws of the Grand Lodge, I, N. N. Reynolds, Grand Chancellor, do hereby declare Sunday, May 14th, as Memorial Day for the Jurisdiction of Tennessee, and each Lodge, Court and Juvenile in the State will assemble themselves together in some hall or church and hold memorial services in honor of our deceased Brother Knights, Sister Calanthes and Juveniles.

"One by One like dead leaves they fall ,
Returning to the Mother Dust,
We mourn our loss and promise each
To meet them, for in God we trust."

Consecrating our lives anew to the service of humanity, and praying with you that our Order, our State, our Country may prosper and reap the blessings in store for those who do the will of the Great Ruler of the Universe, and again with thanks and best wishes, I am

Yours in F. C. & B.,
N. N. REYNOLDS, G. C."

Attest:
F. J. EWING, G. K. R. S."

THE IMPORTANCE OF THE YOKE

"What is a yoke?" In a Sunday school class of tiny girls this question was asked after the teacher had tried to explain that a yoke was something placed on the neck of oxen which enabled them to draw great weights.

One little girl shyly answered, "It is God putting His arms around our necks." What a lovely thought, and how much truth it contains.

We are so often inclined to look on a yoke as something to be dreaded. This ought not to be, for Jesus said: "Take my yoke upon you and learn of me ....for my yoke is easy and my burden is light."

Jesus knows how to fit and adjust our yoke so that it will not rub or irritate, so that it will enable us to draw burdens without feeling the weight of them.

An ox can pull three times as much when its yoke fits properly, and at the same time pull the load with only a fraction of the fatigue that it would have to endure were it to have to pull the load without the yoke, or with a yoke that did not fit perfectly.

A yoke signifies that the wearer does not have to work alone, he is coupled with another in order that together they may do a great amount of work in the best and easiest manner.

In choosing our yokefellow, we must see to it that he or she is a true Christian. We are warned against being unequally yoked with unbelievers.

—Young People.

WHITE AND NEGRO

(Continued from Page 1).

were made by leaders living in the communities.

In the study of thirty plantations many cases showing conditions in the relations of landlords and share tenants and croppers were recorded the estimated net incomes for 1930 and 1931 were considerably lower than even the low incomes of the preceding year. In both years a large number reported new losses, large number reported new losses. The highest new income in 1930 was less than $500.00 and in 1931 less than $650.0. The Conference yesterday was called by Dr. Robert R Moton, of Tuskegee Institute, and Dr. L. N. Duncan, Director of Agriculture and Extensions of Alabama Dr. Duncan presided at both afternoon and morning sessions. The survey was made with the advice of a committee of which Dr. Duncan and Prof. R. C. Atkins of Tuskegee Institute were co-chairmen. This committee was formed at a preceeding Conference which planned the survey in 1931. After a full day of thorough discussion of the report the Conference adopted some concrete recommendations on further study and practical steps for land purchase and settlement by Negro farmers and practical steps to improve landlord and tenant relationship, improvement of credit facilities and operations, especially better rates and terms for short time loans. The conference authorized the committee, with Dr. Duncan and Prof. Atkins as co-chairmen, to continue and enlarge its membership to carry out the plans approved by the Conference.

Persons attending the Conference:—Miss Helen Kennedy, Extension Nutritionist, Auburn, Ala. Dr. C. C. Ferguson, County Health Officer, Dadeville, Ala. Mr. Arthur Raper, Atlanta, Georgia, Prof. L. N. Duncan, Chairman, Auburn, Ala., Extension Service, Mr. R. C. Atkins, Director of Agriculture, Tuskegee Institute, Ala., Mrs. V. C. Turner, Extension Service, Tuskegee Institute, Ala., Mr. C. J. Calloway, Director, Extension Department, Tuskegee Institute, Ala., Miss Bess Fleming, Girl's Club Work, Auburn, Ala., Mrs. Lida Jones, County Home Demonstration Agent, Tuskegee, Ala., Mrs. Marvin Taylor, Macon County Nurse, Tuskegee, Ala., Dr. E. MORE ABOUT

(Continued from page 1)

relegated to the rear. They looked upon the Negro as a peasant class destined to till the soil and perform hand work as their fixed place in the social and industrial scheme. Through industrial education, they would make him industrial, thrifty, well behaved, helpful, and not harmful to their white fellow citizens, and comfortable in his circumscribed sphere of life. Their program fitted this objective. They also died in the faith. But the World War, the mass production by machinery and the inevitable rise of technocracy frustrated their ideal and confused their program. Although the whole scheme of education must needs be reformed in light of changing conditions, it certainly cannot be fairly called "miseducation" but rather education which became outgrown by the shifting demands of the age.

After the seeming failure of the religious objective and the collapse of the industrial inter regnum, came the last stage of higher education under manipulation and control of the great foundations, whose chief objective is to keep things going so as to uphold and perpetuate the existing order. The Negro is encouraged to the higher education mainly to serve his own people on the professional level and to keep the peace between the races. They have no abstract ideal. They do not profess to know what is to be the black man's place in the final scheme of things. They have no ideology but would keep the Negro satisfied and happy as the days go by. To this end Howard, Fisk, Atlanta and Dillard have been smothered with millions of donations to help sustain in his present status the Negro rather than to direct him to any definite goal.

Call this not "miseducation" but rather pro[illegible] education. Booker T. Washington is the only Negro who has impressed any dominant influence on the educational program for his race. Neither under the old philanthropy dominated by Northern missionaries, nor under the new dispensation dominated by the Northern boards has the Negro any decisive voice as to the educational policy for his people. Although Negroes have been largely put in charge to man these institutions, yet they have little more to do with general policies than the captain of a ship is permitted to dictate the policy of the company which operates the line.

I purposely did not mention the upper level of public education in state schools and colleges. This must needs be under supervision and control of Southern white educationalists who fix the programs to adjust the Negro to his alloted sphere and placement in the general social scheme. Nor yet can this properly be called "miseducation" when we consider the means and method calculated to reach the end in view.

The fallaciousness of most educational theories—a fallacy under which, I fear, Mr. Woodson also labors, is that they look upon educational process as an end in itself rather than as a means to an end. Education is not a primary, but a secondary process. After the objective has been fixed education tells you how to reach it. It does not tell you where to go, but how to reach your avowed goal.

It requires genius, philosophy and statesmanship to find and posit the ideology. The great difficulty today with Negro education is that the race has no ideology. We still await the genius, the philosopher or the statesman to tell whither before we may expect and the requisite pedagogy to tell us how. Till then our higher education will flounder in a sea of uncertainty, justifying such startling titles as "The Miseducation of the Negro."

KELLY MILLER.

HAMPTON GLEE CLUB SINGS FOR ROOSEVELT AT DINNER

Washington, April—(By the Associated Negro Press)—Forty male students from Hampton institute, composing the school's Glee club, sang at the White House Wednesday night during the course of a dinner given in honor of M. Edouard Herriot, former premier of France, who is visiting this country for an economic conference with President Roosevelt.

The Glee Club was directed by Clarence Cameron White, director of music at Hampton, who was in this city upon attendance at the festival of Chamber Music, promoted in the Library of Congress under the auspices of the Elizabeth Sprague Coolidge Foundation.

This marks the second time a Negro singing group has been presented in the White House this year, the first being upon the occasion of the return of the Tuskegee choir from its engagement at Radio City, New York.

workers was graphically portrayed by these Urban League. officials They requested of the Secretary that the Negro be represented in all phases of the proposed program of reconstruction and they were assured by Miss Perkins that the Department of Labor would not condone race discrimination in work opportunities made possible by the government for the unemployed.

TRUE INTERNATIONALISM

It was a Jew who brought the Gospel to Rome, a Doman who took it to France, a Frenchman who took it to Scandinavia, a Scandinavian who took it to Scotland, a Scotchman who evangelized Ire- the missionary conquest of Scotland. No people have ever received the Gospel except at the hands of an alien.— From The Sunday School Times.

Application for Membership

NATIONAL FEDERATION OF COLORED FARMERS (Inc.)

Vincennes Hotel, Chicago

As a farmer, I believe the time has arrived when the Colored Farmers should form a National Organization devoted to diversified production, grading, packing, shipping and marketing of farm products and to the purchase of needed farm supplies through co-operative methods, to the end that a more prosperous financial condition may result from their efforts as producers.
I hereby subscribe $5.00 for membership in the National Federation of Colored Farmers for a period of 12 months from date. Also $1.00 for an Annual Subscription to the Modern Farmer.

Plea For Backing Started For Unemployed

GUY HOUSLEY SENDS DAILY NEWS ARTICLE

On Road to Self-Support Is Fully Explained To All

(In Chicago Daily News)
Editor's Note

This interesting account of how the unemployed of Dayton, Ohio are helping themselves out of the misery of depression and poverty should be of special interest to colored farmers. First,— the idea originated with us. A colored group first started the movement. It was so good the white folks adopted it. Secondly, —it has been a success. Unity and cooperation have made it so. There are no logical reasons why communities of Negro farmers should not be successful if they would get together and establish small industrial plants to provide sparetime employment and much needed surplus funds. The Negro community that does this will have no trouble keeping its young people at home and on the farms.

Dayton, O., A group of Negroes representing thirty unemployed families called on Dr. Elizabeth Nutting, executive secretary of the Dayton Council of Social Agencies. The spokesman explained that the families were on the relief rolls.

"But we don't want to be treated as useless dependents," he pleaded. "With just a little backing— if just given a chance— we can pay our way."

That conference was nine months ago. It was the start of a madework campaign which today is supporting 700 of the 9,000 unemployed families of Dayton. The first unit was formed among Negroes. Shortly afterward two more Negro units and ten white units were formed.

"Those people stressed that tney were not helpless, did not want to be placed on a shelf," said Dr. Nutting, "and through the aid of the community chest we gave them a chance. Through their own efforts and under our supervision each unit has a building of its own, either donated by the city, loaned by the owner as rent free or is being paid for by the unit itself.

Accumulating Capital

"Not only have they become self-supporting, but they are accumulating capital. One unit, for instance, has broadened its activities so much that it has purchased a farm for the production of raw materials. Another unit, using reclaimed brick and lumber, is constructing a $25,000 factory on land purchased out of its savings.

"Today the units, in addition to being self-supporting, have accumulated of $5,000. Certainly the experiment has proved a success."

The made-work enters almost every activity. For in the units

Constructive Organization And Cooperation Urged

"Why Can In Tin," Says Expert

DEPARTMENT OF AGRICULTURE INQUIRES

Farmer's Bulletin Number Fourteen Seventy-One's Question

Washington, D. C.—The following statistical data with regard to Henry A. Wallace, President Roosevelt's new Secretary of Agriculture, was recently released by the Department of Agriculture.

Henry Agard Wallace was born October 7, 1888, on a farm in Adair county, Iowa. He is the son of Henry Cantwell Wallace, Secretary of Agriculture under Harding and grandson of Henry Wallace, member of Roosevelt's Country Life Commission. All three Wallaces have served as editor of Wallace's Farmer. Henry Wallace and his sons, Henry C. Wallace and John P. Wallace, founded the magazine in 1895. Henry C. Wallace succeeded his father as editor when the latter died in 1916; Henry A. Wallace succeeded Henry C. Wallace when the latter took the position as Secretary of Agriculture in 1921. Since 1929, when Wallace's Farmer and the Iowa Homestead were consolidated, Henry A. Wallace has served as editor of the consolidated magazine.

Three major influences impressed Henry A. Wallace during his childhood. First was the influence of the Adair county farm; second, the influence of Iowa State College, where his father served on the faculty of the dairy department for some time; third was the influence of the family paper, started when he was only seven years old. He has always retained his intimate connection with farm affairs; has owned and supervised the operation of a Polk county farm for years. He was graduated from Iowa State College in 1910. He began work on the editorial staff of Wallace's Farmer immediately after graduation.

He married Ilo Browne of Indianola, Ia., in 1914. Children, Henry B., aged 17: Robert B., aged 14 and Jean B., aged 12. His mother, Mrs. Henry C. Wallace is living in Des Moines. His brother, James W., is connected with Wallace's Farmer and Iowa Homestead; another brother, John B., is in business in St. Petersburg, Fla.; a sister, Ruth, lives in Des Moines; another sister, Mrs. Angus McLay, in Detroit, and another sister, Mrs. Charles Bruggmann, in Prague, Czechoslovakia.

Mr. Wallace has had wide experience in three major fields: Agricultural economic, breeding experiments, especially in corn, and editorial work. The first two, of course, are in a sense a part of the third.

(Continued on Page 8, Col. 1).

REV. B. W. BYRUM'S POSITION

Chairman of Bolivar Co., Mississippi Unit

Rev. B. W. Byrum, Chairman of Bolivar Unit, has issued his regular spring advice to members of his Unit and all farmers of his community. Bro. Byrum is energetic, faithful and loyal. His advice was published in the local paper at Mound Bayou and reads as follows:

I am speaking to the N. F. C. F. members of the State. I am sure we have had a hard winter, many have been without food and some have even been without shoes and clothes but; in spite of all that hard times God has cared for us. We must not put all of our trust in men. We must trust in the Lord— Who can do all things well. Now brother N. F. C. E. will you begin this crop year by raising more at home to live, by raising more potatoes, more meat and more molasses and a better garden, more corn and pigs and when business begins just buy what you really need.

The N. F. C. F. is just a sign board to teach our people how to live at home and be better citizens. When we learn how to treat each other and say something good about each other, rather than slander every thing the colored man undertakers then we will become a great race.

Rev. B. W. Byrum, Chairman of N. F. C. F.

Sees Oriental Daisy as a Colorado Field Crop

Fort Collins, Colo.—An oriental cousin of the common field daisy has disclosed to chemists secrets which may prove valuable to Colorado farmers.

This far-eastern flower, L. E. Evans, assistant in horticulture for the Colorado agricultural college experiment station, in a collaborative report this week to the American Chemical Society convention in Washington, D. C., declared, is the source of one of the world's most important insecticides.

Known by the name of phyrethrum, the oriental relative of the ordinary American daisy, Mr. Evans said, possesses the remarkable faculty of being extremely poisonous to insects but harmless to man. It offers fine possibilities as a field crop for Colorado, Mr. Evans believes.

A miser grows rich by seeming poor; an extravagant man grows poor by seeming rich.

—Shenstone.

F. E. CALDWELL OF DUBUQUE, IA., WRITES

Says Negroes of Nation Should First Become Race Conscious

Writing in the Chicago Defender, Mr. F. E. Caldwell of Dubuque, Iowa, says that the Negroes of the Nation should organize constructively and cooperate if we expect to obtain all rights and privileges that belong to us. His interesting letter follows:

"I have been reading in recent months quite a bit about the essential needs of the Negro race in your paper, as well as several others, and also magazines. Now I do not style myself as a Moses nor as a legal adviser to the Negro race, or to remind them of their shortcomings, as I have plenty of them myself, but I am now mending most of them.

In my opinion, the Negro should first get himself race conscious before he can expect to acquire all the privileges which are rightfully his. But he will have to organize himself if he expects to obtain these rights.

The Negro has before him daily examples of how other races stand by each other. The Jews, Irish, German, Jap and many other races co-operate with the rest of the world, but their race comes first, because they have race pride, and that's why they are successful.

I am a firm believer in the old adage, "Charity begins at home," and I think that we need reconstruction throughout the race. We have in my opinion, too many worthless fraternal organizations which have proven to be destructive of their purpose. If we organize more constructively, then take inventory of our work and be sure we have the products that the world demands, we can make a vast change in our economic life. We have got to establish an agency and learn to sell our products to prove that in organization is strength. Note the power of the National Association for the Advancement of Colored People, which has only a membership of some 150,000 Negroes or thereabout.

Suppose 1,000,000 or more Negroes were members of the organization, then we could do miracles. We don't teach enough race pride to our children, but seem to be satisfied to have our sons and daughters drag in the same old ditch that we have traveled.

We know too little about topics of the day, we are carried away on folly. I hope to live to see the Race begin to think wisely and act accordingly."

PRESIDENT ROOSEVELT'S NEW SECRETARY COMPETENT

Has Been Connected With Industry Virtually All Of His Life

The U. S. Department of Agriculture in "Farmers' Bulletin No. 1471," has this to say about tin cans:

"They have certain advantages over glass. There is no danger of breakage, either during canning or afterwards during storage and transportation, and they are easier to handle than glass when processing under pressure. Tin cans also heat through more quickly and may be plunged into cold water immediately after processing, which, of course, is impossible with glass jars. This rapid cooling checks the cooking and produces a more desirable product. The larger opening in the newer type of can makes it easier to pack some products in cans than in jars. * * * The top is entirely open and is sealed by a double seaming of the cover onto its edge.

With the Burpee Home Can Sealer, the method above endorsed by the government, can now be employed by every one.

The Dixie Canner Co., of Little Rock, Ark., will be glad to send readers of the MODERN FARMER information about the Sealer and their pressure Cooker. Let's beat the depression by canning everything possible this summer.

Farmers See Display Of Five-Horse Hitch

An interested group attended the big team hitch demonstration on the W. M. Wilson farm in Rural township yesterday afternoon. Five horses were hitched to the two-bottom gang plow and were driven with two lines. The principle of the big team hitch is a proper set of eveners and the driving of the lead team only. The back three horses are led by the front team and are tied back to the traces with buck ropes. Mr. Wilson and others attending the demonstration expressed themselves as highly pleased with learning this new method of hitching a five-horse team, and a number indicated their intention of rigging up similar outfits.

In fact, over the state as a whole an extra acre a day is plowed by farmers who have discarded the old four-abreast hitch for gang plows and now work two horses in front of the other team. The new plan saves about 20 percent of power which was previously lost in side draft; it is easier on the horses, and the plow does better work, as well as more work. Where horses are strung out in pairs, they walk straighter and work more quietly, with less crowding and worry and they keep cooler than horses hitched abreast.

—Moline Dispatch

INTERESTING NEWS AND NOTES

Prominent business and professional men of New York City observed the birthday anniversary of Booker T. Washington. One of the main speakers was Albon Holsey, secretary of the National Negro Business League and former secretary of Tuskegee Institute. Mr. Holsey said that the late educator had faith in the masses of the Race and that his life was an inspiration to all who came in contact with him. Booker T. Washington was born in a log cabin on a Virginia plantation April 5, 1856. Colored farmers should remember this day and observe it each year. Booker T. Washington was the colored farmer's firm and true friend.

There are 941 colored farmers in the state of Kansas, a decrease of 194 since 1920. Owners number 540, there are ten managers of farms and 391 tenants. Negro farmers of Kansas own some of the richest soil in the state, especially in the Kaw valley, famous for Irish potatoes. Grove, the Negro "Potato King," owned several fine farms in this section during his lifetime. His home farm is now owned by the Missouri K. of P.'s. Land and buildings owned by Kansas colored farmers is valued at $3,538,885.

Premiums paid by colored insurance policy holders to the Metropolitan Life Insurance Co. of New York in 1930 amounted to $64,810,119 and this company does not employ any colored help at all. Premiums paid to the Supreme Liberty Life Insurance Co., of Chicago by colored people the same year amounted to $624,112. This is a Negro company and employs 458 Race people as agents, managers, etc. It would be profitable for colored people to insure with their own companies,— with the companies that will employ them.

Storm King, grand champion Hampshire boar, and half-brother of Will Roger's Blue Boy which starred in the movie, "State Fair," died recently in Kewanee, Ill. He was owned by Dr. John H. Oliver, president of the Hampshire Breeders' Association. This boar had sired more prize winners than any other of the Hampshire breed. His progeny has been shipped all over the country and to some foreign countries as foundation for stock. Last year he was grand champion in five western states.

Colored farmers from all sections of Virginia attended the annual Farmers' Conference at the Petersburg, Virginia State College last month. The chief agricultural problems and needs of the times were discussed.

Baby refrigerator cars, 22 feet long, have been developed for handling less than carlots of fruits and vegetables. The new car was built to win back some of the business railroads have been losing to the trucks.

Hundreds of Arkansas citizens of both races paid tribute to Scott Bond, one of the best known colored farmers of that state, who died in Little Rock last month as a result of injuries received when he was attacked by a bull. Bond was an ex-slave, born in Mississippi in 1852. In 1920 his estate was estimated to be worth near a million dollars.

Plans have been approved for the construction of a one and a half million dollars group of buildings for Dillard University, in New Orleans. Dillard is a Race institution and Dr. Will Alexander, prominent in southern interracial movements, is its president.

Many rural ministers are being paid for their services in food, shelter and clothing during the depression. They receive very little cash. They are living better than ever before but have no money.

COLORED FARMERS, BUY A HOME!

Some Reasons Why You Should

"The home owner has a constructive aim in life; he spends his leisure more profitably and he and his family live a finer life and enjoy more of the comforts and cultivating influences of our modern civilization.

"A husband and wife who own their home are more likely to save. They have an interest in the advancement of a social system that permits the individual to store up the fruits of his labor. As direct taxpayers, they take a more active part in local government. Above all, the love of home is one of the finest instincts and greatest inspirations of our people."

Motherhood demands settled life. A woman's lot in life makes permanent living conditions her only safety. The duties and difficulties of motherhood are cruelly multiplied by the roving life. Mother draws a breath of deep relief on the day that she sees the family settled in a home of its own. The considerate husband will never be satisfied until that home is obtained.

Do not rent— own your home. You owe it to yourself, to your wife, to your children, to your State and to your Nation, and as a representative of a civilized community and a believer in justice and right you cannot afford to delay, nor to spare any effort to protect you and yours from the ignominy, distress and suffering from a penniless old age.

VOCATIONAL OPPORTUNITY CAMPAIGN, MAY 7-14

National Urban League Would Improve Status of Negro Workers

T. Arnold Hill, Director of the Department of Industrial Relations of the National Urban League, in announcing plans of the fourth vocational opportunity campaign to improve the status of Negro workers, states that considerable emphasis will be put this year on student participation in the campaign because they have race pride, and young people are beclouded by low occupational visibility." A pamphlet has been issued giving pertinent suggestions for college and high school programs during the campaign.

In explaining the campaign, Mr. Hill says:

"The immediate objective of the Campaign is not to get jobs. Its purpose is two-fold: First, we would acquaint Negroes with the trends in occupation and the influences that are impelling these trends. And, second, we would arouse their awareness of the occupational changes taking place within the race, and what might be done individually and collectively to insure larger opportunity in the work processes of the country. (An analysis of occupational classifications will show interesting parallels between Negro and white wage-earners at some points and wide disparity at others.)

This is the fourth year of our unfortunate business crisis. But unemployment is not occasion for despair, rather it is an opportunity to observe mistakes of the past and chart new distances for the future. The loss of traditional types of employment—the so-called "Negro jobs'—automatically forces the Negro to find new fields for his labor. Just as the boll weevil emphasized the necessity for diversified farming in the South, so is unemployment proving the necessity for variety in occupations among Negroes.

And, too, there are graduates who are coming out of schools with little hope of employment unless the racial barriers in industry are broken down. For the varied talents and the lofty ideals of Negro youth, who, despite unemployment, have not lost their hope and cheer, we need a larger assortment of jobs.

The Urban League will continue to urge public and private employers to grant employment opportunities to Negroes on the basis of personal capacity. But it likewise will insist that individual Negroes improve their talents, fortify themselves with occupational information, and follow recognized practices that make for success."

WE ARE ALL RIGHT

Charleston News and Courier: Crack-brained fools talk about a "redistribution of wealth." What "wealth?" Where is the "gang that could make a living out of a factory if it were given them?

In the last four years there has been in this country the mightiest "redistribution of wealth" that has taken place since Columbus made his discovery. If anyone be skeptical about it, let him read the figures of decrease in income taxes.

As for you farmers, if you had land worth $10,000 in 1929 and still have it, would you be willing to swap it for railroad or factory stock then worth $10,000? If so, you will have no trouble in finding a trader.

Men who have strong arms, fifty or a hundred acres, and are willing to dig food out of them are about the only class who are comparatively free from anxiety in this country. If the legislature taxes them too highly, whose legislature is it? It is composed of their representatives.

In a democracy government will be no better than the people make. They make it.

To the South Carolinans is no danger of famine or widespread distress. The proportion of people actually suffering is smaller, smaller by far, than it was forty years ago.

It is the belief of the News and Courier that before the year ends "times will be better." That is not saying that we shall have the high living of a dozen years ago.

Here and there in South Carolina is a man with a family who is "doing well." In the forty-six counties are some thousands of them. They are at work and their heads are cool.

If one able-bodied man can support a family in South Carolina in these times, so can 400,000— and the number of families is not much larger than that.

There is fear in South Carolina, but it is not that people will starve. The fear of the people is that they will not be so rich as they were, that they may have to give up their cars and some of their other luxuries.

If our people were in a really dreadful condition, pestilence would stalk. It always does when a country is in dire poverty. The plain truth is that the average, of health has scarcely been lower than usual the last four years. If the whole population, white and black, 1,738,765 men, women and children, could be placed on the scales our guess is that they would weigh as many pounds as in 1928.

We call ourselves a "Christian people." How much faith have we? We are murmuring much as the children of Israel murmured when Moses was away on the mount.

We, a healthy, strong people, with abundance of land in a blessed climate, are bleating and bellowing like calves and bulls.

YES, HE'S A "WATCH" DOG

Brown: Is that a good watch dog?

White: Well, he spends his time watching my neighbor's chickens dig up my garden.

It is becoming increasingly difficult to grow red clover on many Iowa farms due to the depletion of soil fertility, soil acidity and reduction of humus supply.

Farm poultry records kept in Tennessee indicated that 75 percent of the income from poultry was from egg sales.

LEAD ARSENATE SPRAY FOR CROPS CONDEMNED

Recent rulings by the federal department of agriculture place restructions on the interestate shipment of certain truck crops such as cucumbers, tomatoes, cauliflower, lettuce, Brussels sprouts and others which have been sprayed with lead arsenate.

Truck growers are urged to keep these restrictions in mind and avoid the use of this insecticide on any truck crops that may carry a slight residue when marketed. Calcium arsenate can in most cases be substituted for lead arsenate and in some cases Paris Green can be used in place of lead arsenate. Certain of the newer plant poisons may also be used to advantage on these crops.

What a magic word is "Home!" What memories cluster around it! From our earliest childhood to our dying day there is perhaps no single word that is used more often by every one so fortunate as to be born and reared in a civilized land. The word itself embraces the concentrated memories of father, mother, son and daughter— of comfort, peace and happiness.

IMPORTANT MESSAGE!

PRIZES OFFERED!

"WHAT'S THE MATTER WITH THE AVERAGE NEGRO FARMER?"

Some question, is it not? Well, we want to know and nearly everyone wants to know. We want you to tell us in your own way and in your own words.

We want to know so badly that we are offering three cash prizes for the best letters received as an answer to the question. Any man, woman or child may write. The contest closes September 1, 1933. Write 'em long or short, just answer the question. You may win a prize.

FIRST PRIZE—Five Dollars in Gold.
SECOND PRIZE—Three Dollars.
THIRD PRIZE—Two Dollars.

The best letters will be published throughout the year. All letters become the property of the Modern Farmer, when received. Judges are the editor and one representative from each state in which the National Federation of Colored Farmers, Inc., has chartered Units. These representatives will be chosen by the Executive Committee of the organization. Prizes will be awarded during the 1933 N. F. C. F. Convention.

Mail all letters written for this contest to

LEON R. HARRIS, Editor,
Box 209 Moline, Illinois

As a sample, we publish below a little sketch about? "What's The Matter With the Average Georgia Farmer." Don't copy from this, it won't count. We just want to give you an idea.

"What's the Matter With the Average Georgia Farmer?

"The average Georgia Farmer gets up in the morning by the alarm of an Illinois clock (Big Ben), buttons his Chicago suspenders to a Detroit overall, washes his face with Cincinnati soap in a Pennsylvania pan, sets down to a Grand Rapids table and eats Chicago meat, Indiana hominy, fried in Kansas lard, on a St. Louis stove.

"He then lights his New York lantern and goes out to the barn and puts an Indianapolis bridle on a mule fed by Iowa corn and plows the farm covered by an Ohio Mortgage with a South Bend plow, and when bed time comes he reads a chapter in the Bible printed in Boston and says a prayer written in Jerusalem. Crawls under a blanket made in New Jersey only to be kept awake all night by the barks and wails of a Georgia yellow hound dog, the only home product on the place, and then wonders why he cannot make money."

Now Get Busy And Answer The Question And Win One Of The Prizes

IT'S DIFFERENT! IT'S RELIABLE! IT'S PROGRESSIVE!

THE MODERN FARMER

The Only Publication For The 900,000 Colored Farmers In The United States

ISSUED MONTHLY! EIGHT PAGES! FORTY COLUMNS!

AND ONLY ONE DOLLAR A YEAR!

The MODERN FARMER is read by colored farmers in every state and by many white farmers as well...It preaches to colored farmers the gospel of CO-OPERATION; of buying, producing and selling together, that all may receive more from their efforts as producers.

The MODERN FARMER is read by progressive leaders and friends of the Negro racial group who desire to know our problems and our progress...The MODERN FARMER publishes reliable information...It is not afraid to tell the truth.

The MODERN FARMER is read by religious and welfare workers who are interested in rural problems...These leaders know that the United States cannot be "right" as long as three million Negro Ruralists are in a condition of poverty, ignorance and debt-slavery.

The MODERN FARMER is read by business and industrial leaders who are interested in the potential "Negro Farm Market."

"I have been reading the Modern Farmer two years and I have learned more in the two years than I have in my whole life before. It's a wonderful paper. I wish all colored farmers would read it and learn what's being done."

E. W. Williams,
Vaughn, Miss.

"The Modern Farmer is so gratifying that we regard it as a God-send to the colored farmers of the southern states. Its instructions and information have caused our members here to be in a prosperous condition. We are not making much money but we are raising our living and feel sure that we will be better rewarded next fall. There is nothing too good for us to do or say for the Modern Farmer."

T. T. Brown,
Auguilla, Miss.

"It is indeed a newsy little sheet and well gotten up."

Geo. R. Arthur,
Associate for Negro Welfare,
Julius Rosenwald Fund.

"Negro farmers should organize. They should be informed what the world is doing. They should become more and more the owners of the farms they cultivate, and they need a paper which will give to them the latest developments along all phases of agricultural life. I wish for the MODERN FARMER the largest possible success.

Dr. James E. Shepherd,
President North Carolina College for Negroes.

"The Modern Farmer gives us more light than any other farm paper. I intend to work until I have everyone of our 180 members a subscriber."

Fred Williams,
Choctaw Unit, Shaw, Miss.

"I am always glad to receive my Modern Farmer."

R. W. Griffin, Chairman,
Gages Spring Unit, N.F.C.F.

THE MODERN FARMER

Official organ of the National Federation of Colored Farmers, Inc.

Leon R. Harris - - Editor

Published monthly by the Modern Farmer at Nashville, Tennessee, and Chicago, Ill.

Nashville, Tenn., Office, 447 4th Avenue, North.

Devoted to the interests of the Farmer, Truck Gardner, Livestock and Poultry Breeder, the Home and the People.

Entered as Second Class Matter, April 10, 1929, at the Post Office at Nashville, Tenn., under act of March 3, 1879.

All contributions for publication in the Modern Farmer should be addressed to The Modern Farmer, 447 4th Avenue, North, Nashville Tenn.

No libelous matter will be published. Unsigned articles or letters, and those written on both sides of the paper will not be used.

Subscription price $1.00 per year, 75c for six months, payable in advance. Personal checks must be certified. Make all checks or money orders payable to The Modern Farmer.

Advertising rates and sworn circulation figures presented upon application.

"OUR SLOGAN"

STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT.

THE LAW

"It is hereby declared to be the policy of Congress to promote the effective merchandising of agricultural commodities by encouraging the organization of producers into effective associations under their own control.

The Board is authorized and directed—to promote education in the principles and practices of cooperative marketing—to encourage the organization, improvement in methods, and develojment of effective cooperative associations. (Public—No. 10—71st Congress. Sec. 1-5.)

THE GOSPEL

"This law is predicated upon the ability of the farmer to manage his own business, once he is organized to do so. Cooperation is the key to it and only in exceptional cases can the Federal Farm Board have any dealings with a farmer who is not a member of a producer-owned and producer-controloled marketing unit." Hon. Sam'l R. McKelvie, Former Member, Federal Farm Board.

Count that day lost
Whose low descending sun,
Views from thy hands
No worthy action done.
—Longfellow.

ORGANIZE OR STAY POOR

The farm community of Villa Ridge is in the southern part of Illinois,—not in Mississippi or anywhere else in the South. The land is fertile and this portion of the state has become noted as a fruit and vegetable producing section. Several hundred colored farmers live within a radius of forty miles of Villa Ridge section got together are good vegetable and fruit growers. Many are farm owners.

The other day the white farmers of Villa Ridge section got together and organized a cooperative shipper's association. Five directors were elected and a manager employed. The organization has lined up the following acreage: 100 acres asparagus, 300 acres Klondyke strawberries, 150 acres Latham Red raspberries, 300 acres string beans, 250 acres Elberta and Hale peaches and 150 acres Nancy Hall sweet potatoes. Several cars of apples will also be handled. These white farmers are going to produce and ship cooperatively and they will make a good profit this year. Chicago is the main market and Chicago will consume everything they can grow and ship. By getting together as they have they are certain to get the best market prices.

The colored farmers of this community have organized two or three Units of the National Federation of Colored Farmers and then have forgotten WHY THEY ORGANIZED. They have the same opportunity to make money that the white farmers have but are letting the opportunity slip by. Their national office is located in Chicago, the marketing center of the country, and would be glad to handle their products, if enough of them would cooperate in producing and shipping. It seems that they would rather stay apart and stay poor.

Colored farmers have got to get out of that old every-man-for-himself way of living and working. Let's organize, and after we organize let's do something sensible and profitable. The officers and leaders of the N. F. C. F. are not satisfied in only organizing a lot of Units. They want the Units to do something. They want the Units to practice cooperative buying, producing and marketing, to establish small processing and industrial plants, to capitalize credit unions and building and loan associations so that every member will become a farm and home owner, prosperous, contented and happy. When you organize your Unit you have just started on the road. Keep busy,—keep going, and GET SOMEWHERE! You can do it if you try hard enough.

THE SMALL FARMER'S FATE

The late Dr. W. J. Spillman, distinguished agricultural economist, told the world that "this depression has sealed the fate of the small farmer." About the time the depression started, students of agricultural problems were saying that farm machinery and the violent break in world commodity prices would drive eight million small farmers and laborers from the farms to industrial centers. The truth is, that within the past two years, nearly a million former farmers and farm laborers have returned to the farms.

We believe there is plenty of room yet in this old world for the small farmer. And it is not absolutely necessary for him to be debt-ridden, poor and persecuted, simply because he is a small farmer. He is suffering now because he has not received a square-deal from the big fellows, within and without the government, and no kind of firm relief legislation or aid from large industrial interests will ever do him much good until he learns to look out for himself first. His fate is largely in his own hands. He must become a good thinker as well as a good worker. He must become willing to accept sound advice and endure sound doctrine.

CLEAN UP YOUR BURYING-GROUNDS

Thousands of our burying-grounds are eye-sores to our communities and a disgrace to civilization. Our dead are due more respect than we give them. We forget too soon.

May 30th is Decoration Day. No matter how busy we are that day, let us take some time off,— gather at the burying-ground, and give it a good cleaning up. Cut down the weeds and briers,—fix the fence, — mark the graves and plant some flowers. And finally, arrange a "time-about plan" so you can keep it clean, pretty and decent always. We may not be able to buy fine tombstones but we certainly can keep our burying-grounds from becoming brier patches and stock pastures.

BE PATIENT

Every colored farmer should read the Book of Job. Job was a farmer who had a hard time. But he endured to the end and his patience was abundantly rewarded.

These hard times have taught us many bitter lessons. Things have changed much and will never be the same again. We are beginning a new day and a new age. We must get "new" with it. We must get new ideas,—discover new thoughts—make new plans,—be new men and women. But we must not forget the old virtues. Patience, industry, honesty and foresight are needed now more than ever.

Many of us are kicking because our loans are not large enough,—because the landlord can't carry us,— because conditions are worse than they have ever been. Be patient. Learn to labor and wait. A new day and a better day is dawning.

VOLUNTEERS TO GET N. F. C. F. MEMBERS

Plans to develop a large membership in the National Federation of Colored Farmers have been announced by the Executive Committee. Five picked men from every chartered Unit are to be selected who will agree to volunteer to give time and attention to building up the membership during the next five months or until the meeting of the 1933 convention. These men will meet regularly at their several homes and discuss the Federation program. They will attempt to get at least six new members each. Members secured will have their names recorded on a separate membership roll until yearly dues are paid.

The Committee believes the organization's membership can be greatly increased in every state if the need for organization and the advantages of membership can be made plain to colored farmers. The ones to do the work are those members who have been helped by the organization. Secretaries are requested to send the names of the five chosen to do this volunteer work to the national office immediately. The Unit securing the largest increase in membership during this five month period will receive the best reward given at our Convention this year.

PROTEST AGAINST INSULTS

Not long ago the American Junior Red Cross News, a publication of the American Red Cross, carried a cartoon which showed a priest administrating the sacrament of communion to a donkey. The Board of Education of the city of Somerville, Massachusetts termed the cartoon an "insult to 20,000,000 Americans" because it ridiculed the great central act of worship of the Catholic religious denomination. They promptly discontinued all junior Red Cross activities in the public schools and demanded an apology of the publishers.

Newspapers and magazines are constantly insulting and ridiculing twelve million American Negroes and we grin and bear it all just as though we had to do so. At least half of our American publications never capitalize the proper name "Negro." They also refer to colored women as "negresses," just as they call animals like the female lion a "lioness." We should take a lesson from the Somerville folks and protest against such insults.

Colored farmers should stop supporting insulting publications and should not let their children read them. We can't prevent the insulters from insulting but we certainly can keep our subscription money out of their pockets.

Many colored farmers have applied for larger loans than they can repay or at the present market situation warrants. Because such large loans were refused they feel that they were discriminated against on account of their color and condition. This is not so. Government money is taken from all of us and must be handled carefully. We must learn to be careful and stop depending on the government and the other man. Plant large gardens. Increase your chickens, hogs and cows. Live at home. Don't buy what you can do without until you have plenty of extra cash. But a farm and home first of all. And if you have a landlord who refuses to let you raise enough garden truck and meat to support yourself and family, leave him right now, even if you have to walk away with nothing but your clothes on your back. You might as well starve on the road somewhere as to work for such a man all summer long and then starve where you are now next winter. — L. R. H.

Observe Farmers Sunday. If you did not do this on April 30th, do it the first Sunday you can. Make it a great day for your Unit and community.

"WHAT'S THE MATTER WITH THE AVERAGE NEGRO FARMER?"

ANOTHER PRIZE LETTER

Here is another prize letter. This one comes from a Mississippi dirt farmer. Have you written yours yet? You may win one of the prizes.

Dear Editor:

The trouble with the average Negro farmer is that he is a debt-slave because he does not look out for his own welfare in business matters. He works after the plans of other men and those plans are how to get all the proceeds of his labor and keep him in the dark from year to year. If the Negro farmers would unite and stand by the National Federation of Colored Farmers and their leaders, like other farmers do, they would get their rights. The Negro farmer fails to school his children as he should, but he does not fail to send them to the fields. And about all he ever gets at the end of the year is a Due Bill. These things have kept the Negro farmers down. Other races and nationalities have become great and wealthy by keeping the Negro in debt and his children out of school.

—E. W. Nelson,
Pace, Mississippi

TALKS TO COLORED FARMERS ABOUT "STAYING ON THE FARM"

By Leon R. Harris, Secretary National Federation of Colored Farmers, Inc.

The MODERN FARMER has a slogan, Brother Farmers, which is printed in large type at the head of the editorial columns on page four every month. This is the Colored farmers' war-cry, and it should be the war-cry of every colored farmer in America. "STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT!

Well I picked up the paper the other day and read that the Bureau of Agricultural Economics, a government bureau in Washington, estimates that more than one million people returned to our farms last year. This is the largest number of people who have ever gone back to farming in this country in any one year. More people are living on our farms today than ever before.

Of course, many of this million were men, women and children of our Race. They went back home where they could get something to eat. I believe that most of them are going to be thoughtful enough to stay there. You can say what you please,—but farm life is the best life for most of us yet, and if you are not getting any "kick" or happiness out of it, Brother Farmer, you want to be certain that the fault's not in you, before you give the old farm a bad name. A big Supreme Court judge said one time that "the thinking people of the country are the tobacco chewers," and I am firmly convinced that the thinking people of the Negro group in this country are the colored farmers. We are going to think harder, bigger, and better from now on and are not going to be pulled off the farms by promises of five dollar-a-day jobs in big cities where it costs us six-dollars-a-day to live.

But we might as well be real frank and plain-spoken about this staying-on-the-farm business right now. If you've never gotten anything out of farming except hard work and debt and poverty, there is something wrong somewhere. Let's find it.

Perhaps you are not located where you should be. Then move. There are thousands of acres of land in this country that should be given a fifty years' rest. No one can make any more than a living on them and it's foolish for you to try to do the impossible. If you own the land and know you can't build it up in a few years and make it better than you found it,—better sell it for what you can get and buy half as much better land somewhere else. It may be the "home place",—and I know it's hard to leave the old home and kinsfolk, but what's the use of you working and starving on it just because your father did?

Perhaps you are a tenant or sharecropper, working on a plantation that is getting poorer and poorer every year. The landlord may be doing pretty well yet for he is getting profit from the work of ten or more families. All he has to do is see that you work and take his share. By the time he gets his share from the ten or more families on his plantation he is sitting pretty. But where are you? You've done the work,—made the crops,—made him money,—but you're no better off in the fall than you were in the spring.

Even if you have to go a hundred miles, find a farm to work on where you can make more than just a living. Colored sharecroppers and tenants move too much but the trouble is THEY DON'T CHANGE ENOUGH! They jump out of the frying pan into the fire, then back in the frying pan again. Investigate! Watch what you're doing! Find out if the fellow who left the house where you are thinking of moving made anything before he left.

I know a lot of farm owners who are staying in the hole simply because they are thoughtless and lazy. They may work their arms and legs and stock well enough but they don't work their heads enough. They know it all and no one can give them any advice. They don't even believe what they read in good farm papers. They are afraid to experiment and take a chance. They won't join a good farm organization because they don't like the chairman or some neighbor farmer. No wonder such a farmer gets along so poorly. He is asleep and if he doesn't wake up and change his ways he will always be in the hole.

The National Federation of Colored Farmers helps its members find better farms and better landlords. It is beginning to discover just about where most of the bad farms,—bad landlords,—and bad farm communities are,—and it wants its members to stay away from them. It wants its members to be better farmers and more prosperous and happy farmers. It doing ago od work,—slowly, because it is receiving little support, and the job is a mighty big one, but it is doing its best and a lot of colored farmers have been helped much by joining it.

Stay on the farm,—but for your own sake and for the sake of your family,—become an organized, modern, sensible farmer.

IMPORTANT NOTICE TO EVERY READER

If you have moved from one address to another please send a written notice to your postmaster; write it out plainly and give it to your letter carrier if you live in the city, or your rural route carrier, if you live on a rural free delivery route. If you fail to do this the publisher of this paper will have to pay two cents on every paper going to your old address. This is a new postal law and regulation.

It is unfair to the publisher of this paper to have to pay the government two cents every week merely because you do not send a written notice to your post office. Not only should you notify the post master at once, even when you know you are going to move, but you should send a written notice to this newspaper so that they could change your address on the mailing list. Do not overlook these instructions.

THE MODERN FARMER

WHEN IN CHICAGO STOP AT AMERICA'S LARGEST NEGRO HOTEL—VINCENNES

VINCENNES HOTEL—Chicago, Illinois, located at 36th Street and Vincennes Ave. The most modern and up-to-date Hotel owned and operated by Negroes in America. Mrs. E. Barnett-Lewis, is Proprietress. Write for Prices and Rates.

WE SURPASS IN KINDNESS AND MERCY

Southern Planter Tells of Race As He Knows It.

Writing in the Reader's Digest Mr. Archibald Rutledge, a southern planter, says that the "milk of human kindness" is a more natural product of the Negro's heart than it is of the white man's. His article in part follows:

"In downright kindness and mercy to one another, Negroes surely surpass all other races in America. I am thinkng of them as I have always known them in their joyous primitive state in the deep rural South of today. My observations of their ready compassion toward members of their own race have extended over a period of nearly 50 years, since boyhood days in the lonely hinterlands beyond Charleston.

On the borders of my plantation is a village of some 60 Negroes. But for the little medicine I dole out, these humble people, from birth until death, have no care from a physician. If one is injured or taken sick, he immediately becomes the care and the concern of the whole community. That the assistance is rarely effective in no way impairs the beauty of the compassion. Sympathy is the great prescription all of them use. And I can testify that any trouble which comes to any member of a Negro community never fails to produce an outpouring of sympathy and help that is the very flowering of the human spirit.

Sue, my cook, came late to breakfast. "You see, Cap'n," she explained, "I was sittin' up all night with Sister Anne." Sister Anne had typhoid.

Negroes make it a point never to leave a sick friend solitary. Perhaps no other people realize so clearly that life with its varied joys and griefs, is distinctly a mutual thing. In the more remote rural districts, smallpox is not uncommon among them. While none of them are ever vaccinated against this plague, they are fully aware of its dread character. Yet I have never known an afflicted patient to lack volunteer nurses, both men and women. Their disregard of danger is not due to igorance, but rather to the noble positive virtue of self-sacrifice.

While it is not my purpose to draw any invidious comparisons between the relations of whites among themselves, I believe the among the Negroes of whom I Negro's philosophy of life makes "the milk of human kindness" a more natural product of his heart than it is of ours. For example, among the Negroes of whom I write rivalry is practically unknown. On the contrary there is a sense of mutual dependence, of fellowship, that directs them not so much to share their worldly possessions—of which they have pitifully few—as to share their hearts, and to spend their spirits for one another. Their constant use of the words "brother" and "sister" connotes a conscious racial rather than family relationship."

RESEARCH SHOWS CHICKS NEED VITAMIN A VARIETY

Durham, N. H.,— Vitamin A becomes increasingly important in the ration of chicks as they approached maturity. It can be supplied most effectively from several sources such as yellow corn meal and alfalfa leaf meal rather than from cod-liver oil alone, says the the University of New Hampshire. This is the indication of several years of research on Vitamin A requirements of developing chicks up to 16 weeks of age, according to a report issued by the poultry department of the University experiment station.

Several groups of chicks were used in the work in 1932, one getting the New England college-conference ration only, five others the conference ration plus 1 to 5 per cent cod-liver oil in addition to daily exposure to ultra-violet light to insure plenty of Vitamin D, and three control pens receiving the light treatment plus a basal ration entirely lacking in Vitamin A.

The conference ration led all others in putting weight on the birds, turning them out at 16 weeks averaging 4.211 pounds apiece as compared with 4.031 pounds for the 3 per cent oil ration, which ranged second. Birds on this standard ration never showed evidence of lack of Vitamin A; all other chickens did. No other ration made a better record for livability. Mortality on this ration and on the 1 per cent cod-liver oil was only 3 per cent; on a ration entirely lacking in Vitamin A, the mortality was 63 per cent the first 12 weeks.

The conference ration produced one pound of gain for every 5.32 pounds of feed, while the basal ration plus 3 per cent cod-liver oil gave a pound of gain on 4.48 pounds of feed.

Another fact developed in the experiment was that the larger the amount of oil fed, the greater the mortality. One conclusion is that healthy baby chicks apparently do not need Vitamin A in the the feed for the first two weeks..

SWEET POTATO DISEASE

Valdosta, Ga.,—A disease referred to as "black spot" is said to be responsible for considerable losses in seed sweet potatoes this season in this area. Thousands of bushels of sweet potatoes banked for seed beds this spring are reported to have been attacked by the disease, making it necessary to throw them away as utterly worthless. The disease appears in the shape of a black spot which affects the whole potato.

Although the total indebtedness of agriculture in Hungary is $35,000,000, three-fifths of the farmers of the country are free from debt.

Lady: "But Sonny, dear, what do you expect to raise from that light bulb you've planted?"

Youthful gardner: "Aw, get wise, lady Ain'tcha never heard o' currents?"

TOBACCO IS GOOD SOURCE OF FUNDS FOR GOVERNMENT

No other article is so highly taxed as tobacco, says Howard Florence in Review of Reviews and World's Work. When you pay 10 cents for a package of cigaretts these days more than half of your money goes to Uncle Sam.

Four cents represents cost and profit to the farmer, transportation to the factory, cost of manufacturing (including such things, as machinery, labor, tinfoil and cellophane), profit for the manufacturer, transportation to the retailer, and overhead and profit for the storekeeper.

Four cents for all those things, including risk; and 6 cents for the government. Similiarly there is a heavy tax on cigars, varying with the price grade, and on all other forms of tobacco.

It is, indeed, the country's most stable source of revenue in this period of depression, passing customs duties to become the second largest items in Uncle Sam's income budget.

HORSE MANAGEMENT

GOOD HORSES WORK BEST. Horses of good draft type, fine quality and energetic, kindly dispositions do the most work, endure heat well and sell for highest prices. Sour-headed, coarse, rough, long-legged stallions do not sire good colts. The good sire has a clearn-cut head, bright eyes, deep chest, round ribs, muscular thighs, smooth, hard, shapely legs, large, round, deep, tough feet and free, straight action. Quality is more important than size. A pair of good mares can keep an average farm supplied with good colts that are a pleasure to work and profitable when when sold. Well-bred horses often sell twice as high as common ones.

HEALTH EASILY MAINTAINED

Horses which have good pasture when idle, plenty of water and feed when at work, salt at will and kind treatment usually keep healthy. Annual winter treatment to remove bots has resulted in better health and thrift and quieter working in summer. Farmers made favorable reports on 129,109 horses treated on 20,851 Illinois farms in sixty-six counties last winter.

HELPS FOR HOT WEATHER

Horses endure the work better in hot weather if they are turned out on pasture at night with water available. It also pays to take water to the field and water the horses several times during very hot days. When enough horses can be included in a team so that the pull is reduced they can keep going in very hot weather. In hot weather, when a horse refuses to eat, that is a danger signal, and the horse should be turned on pasture to rest.

REMOVE THE GRAIN SURPLUS. Home-raised horses fed home-grown feed furnish power at first cost. A horse eats the pasture, hay and grain from about three acres of land and can do the work on twenty-five and thirty acres. Thus the crop from about one-tenth of the farm is eaten by the horses and can not swell the surplus of crops for sales. At the same time, accounts show that horses properly hitched and handled do field work cheaply and well. The general use of horses for farm work would help to keep farm cash at home and would remove so much grain from market channels that prices would be higher.

LEGUME HAY ROUGHAGE helps to keep horses in good health and flesh. Legume pasture and legume hay are fine for growing colts. These nutritious roughages make it unnecessary to feed much grain to colts. Short crowded old pastures tend to get horses and colts infested with worms.

Consider the fish....If he didn't open his mouth, he wouldn't get caught.

OLD CORN FOR TURKEYS

Lexington, Ky.,—A statement from the poultry department at the experiment station and college of Agriculture, University of Kentucky says that new corn should not be fed turkeys until it is dried out thoroughly. Turkeys should be fed and fattened in the fall on old corn. If it is impossible to keep turkeys away from new corn then they should be fed early in the morning a mixture of whole oats and old corn, so their appetite for grain will be satisfied before they roam to the cornfield. When a turkey becomes sick from eating new corn it should be given a table-spoonful of castor oil.

BUILDING UP BUYING POWER

Peoria Star:—James D. Tew, president of the B. F. Goodrich Rubber company, has issued a statement declaring that as an industrialist he is heartily supporting President Roosevelt's farm bill and the interesting thing about this is that Mr. Tew's rubber company uses vast quantities of cotton, and will find its manufacturing expenses greatly increased if the bill boots the price of cotton as the administration expects it to do.

"We feel very strongly," says Mr. Tew, "that in the interest of the farmers and the welfare of the country as a whole, it is our duty to forget selfish interests and back up whole-heartedly the efforts of our president in restoring stability to the economic life of the nation."

For this project cuts both ways. It might boost the prices of raw materials, but if it did it would also add greatly to the farmer's purchasing power; and Mr. Tew and his brother industrialists might discover that if their operating expenses rose their sales would rise even more rapidly.

Experiments have shown that soybeans are at least equal in feeding valne to linseed meal or cottonseed meal. A good legume roughage should be fed with the grain ration.

THE HARDEST CHORE

Teacher: "What is the hardest thing to learn about farming?"

Student: "Getting up at 5 a. m."
—M. I. T. Voo Doo.

ST. LOUIS N. A. A. C. P RAISES $1,000

St. Louis, Mo., June 2.— A total of slightly more than $1,000 was raised in the recent membership drive here of the St. Louis branch N. A. A. C. P. under the general chairmanship of Sidney R. Redmond, Jr. Editor J. E. Mitchell is president of the branch and Robert P. Watts is secretary. William Pickens, field secretary of the N. A. A. C. P. directed the campaign.

Save More! Earn More! Have More! Be More!

EVERY COLORED FARMER

SHOULD BE A MEMBER OF

The National Federation of Colored Farmers, Inc.

ORGANIZED JUNE 5, 1922
PROGRESSIVE, Not Radical!

INCORPORATED NOVEMBER 19, 1930.
SANE, NOT VISIONARY!

IF A FARM OWNER, TENANT, SHARECROPPER OR FARM HAND, YOU SHOULD JOIN THIS ORGANIZATION

It is the only national organization of colored farmers in America.
Its growth has been steady and substantial.
Its officers and leaders are men of experience and foresight.
It is non-partisan and non-secret.
Its actions speak louder than its words.
Its policies are sane, sound and progressive.

It teaches co-operative buying, production and marketing.
It is a builder of Negro farm communities.
It promotes the general interest of all its members.
It studies and investigates all agricultural problems.
It fosters the improvement of rural homes and rural life.
Its members work together to accomplish what cannot be done individually.
It makes farm business more profitable.

Delegates to 1932 Annual Convention, N. F. C. F., Memphis, Tenn.

The following are excerpts from letters on file in the national office.

"Through the N.F.C.F. we have been able to grow crops in Wisconsin that none thought could be grown here. We are planning for group cooperative farming next year since that is the only way we can get our people out of these northern cities back on the farms."

David Bassett,
Wisconsin Dirt Farmer.

"I have been with the N.F.C.F more than five years, have traveled in every county in the Delta and have made a host of friends among both white and colored farmers. The N.F.C.F. makes colored farmers better farmers, better Christians, better citizens."

Rev. B. W. Byram,
Mississippi Farmer-Minister.

"The N.F.C.F. inspires the young Negro to turn back to the soil and again become a part of the backbone of the industries of the world, the industry of farming."

Grace Wilson Evans,
Indiana Clubwoman.

"Nothing is needed among colored farmers in the state of Oklahoma as much as such an organization as the N.F.C.F."

Rev. J. D. Brown,
Oklahoma Farmer-Preacher.

"I joined the N.F.C.F. when we were having trouble trying to save our farm. Our national officers got busy and saved it for us. The N. F.C.F. is the greatest organization in the country for colored farmers."

R. H. Sanders,
Missouri Farmer and Stockman.

"Since joining the N.F.C.F. we have saved in our community from 25 to 40 per cent on the purchase price of farm and home supplies."

J. H. Tenholme,
Alabama Dirt Farmer.

"We have asked our field representatives to make a special investigation regarding the distribution of relief in counties where there have been complaints."

National Officers, The American
Red Cross, Washington, D. C.

"Today I'm holding the deeds to 86 acres of land, one mile from railroad station, on good road, with good house, water and a fine growing crop. For this I am indebted to the N.F.C.F.

J. L. Lebeaux,
Louisiana Dirt Farmer.

"The N.F.C. F. has safe and sane leaders. There is nothing we will not do for the organization that has done so much for us."

L. T. Gartside,
Georgia Dirt Farmer.

"The N.F.C.F. is worth much to humanity in general and to our group in particular. Your officers are some of the most beneficial leaders of the times."

President of a Georgia Agricultural
College.

"You may have the complete assurance that the Bank wishes to encourage the sale of its land to any of the members of your Federation who are in a position to properly take care of farms and handle them in a workmanlike manner."

W. E. Clark, Land Dept.,
Federal Land Bank of
New Orleans, La.

"I am favorably impressed with the objectives of your Federation and I sincerely hope that you will be successful in cultivating among the colored people the mind to cultivate the soil and thus insure a happier existence than that which accompanies them in the overcrowded cities especially in periods like that through which we are passing."

Hon. Daniel C. Roper,
Secretary of Commerce.

"We expect to produce several cars of sweet potatoes cooperatively this year. We have received more help from the N.F.C.F. in two years than from any other organization in the past twenty years."

John Thomas,
North Carolina Dirt Farmer.

"By following our leader's instructions and raising less tobacco and more something to eat, I have kept out of debt during these hard times and am better off than I have ever been before."

William Millson,
Virginia Dirt Farmer.

"I am tired of talking organizations. The N. F. C. F. is a sure enough DOING organization."

T. L. Brackenburg,
Florida Dirt Farmer.

What the American Farm Bureau, the Grange and the Farmers' Union have done for the white farmers of this country, the National Federation of Colored Farmers can do for you. Your membership in the N. F. C. F. tells the world how good a farmer you really are. Join today! Join the local unit in your community. If you have no unit, organize one. Write to the national office for all information.

(Continued from Page 1)

are workmen from virtually every walk of life. The only care in watching the expansion of the units' development is to see that in their efforts they do not encroach on the fields of those already employed.

In case the units successfully solicit outside work prevailing prices are charged, so as not to run afoul union rules or to ruin the man already in business.

Among the activities carried on by the units are baking of bread and pastry, barbering, classes in beauty culture, bookkeeping and typing, broom making, carpentry and cabinet work, manufacturing of brooders and incubators, files, furniture, looms and ovens, electrical work, repairing and building houses, gardening canning, grinding corn and wheat, making maple sirup, motor repairing and the conducting of nursery schools, paper hanging and interior decorating, plumbing and printing, rabbit and poultry raising, tailoring and sewing, knitting, shoe and boot repairing, soap manufacture, weaving of rugs and cloth and wood cutting.

Sap for the maple sirup is obtained from the marginal woodlands around Dayton, where the wood cutting activities is carried on.

One unit even has opened an undertaking establishment, while others are finding profitable work in basket and cement work.

Each unit is ruled by a council of its own members, supervised by a committee from the Dayton council of social agencies. And in addition to the work-a-day activities the groups also serve as centers for social activities.

Each of them regularly conducts dances, musicales, discussion groups and general forums.

Similar to Illinois Plan

These activities on a smaller scale are comparable with the activities which a group of philanthropists in Chicago headed by Alfred Stern, son-in-law of the late Julius Rosenwald, is trying to father. The group is sponsoring a series of housing corporation bills in the Illinois legislature at Springfield, through which they hope to rebuild a portion of the slums in Chicago.

The bills, introduced by Representative Thomas Sinnett of Rock Island, democratic whip, are now before a house committee. They are designed to give the philanthropists' corporation right of eminent domain to condemn certain sections of the slums through personal subscriptions and rebuild them with modern dwelling places.

Included in the benefits of the plan is the creation of work for Chicago's unemployed and better housing conditions for residents of the poorer districts. The bills are carefully safeguarded against increased rentals and segregation

Department of Agriture

(Continued from Page 1).

In the field of experimental work in production, Mr. Wallace in 1913 began experiments toward the development of a higher yielding strain of corn. The principle of inbreeding and crossing the in-breds had been developed as a botanical experiment, but Mr. Wallace went on to apply it to the practical task of creating better yielding strains. He worked for years on this, and in 1926 was ready to test his hybrid seed in the Iowa Corn Yield Test, conducted by the Iowa State College. In that year and in every year since, his hybrids have outyielded ordinary open-pollinated corn and other hybrids also. Corn produced according to his plan is being used extensively by Iowa farmers. Paul De Kruif's "Hunger Fighter's" gives a detailed account of Mr. Wallace's work in corn breeding. Mr. Wallace's own textbook, "Corn and Corn Growing," (1923) also outlines his methods. Mr. Wallace has done similar experimental work with hogs and chickens.

As an editor, Mr. Wallace has profited from his work in these other fields. His work as an economist for years made it possible for him to give an expert market advisory service to his readers; he was able to predict the crash of 1920 in editorials written the year before; he was able, in 1922, to predict that another crash was due when the American loans to Europe stopped, unless the United States cut the tariff or reduced production of exportable surpluses. As an experimental worker in the field of production, he has been able to select with unusual discrimination the fruits of experimental work in general that are applicable to corn belt conditions.

ITS HARD TO DESTROY THE CUCUMBER BEETLE

Geneva, N. Y.,—Controlling cucumber beetles is largely a matter of "chasing" the bugs out of one field into another, for no dust or spray mixture or method of application has yet been perfected that will permanently reduce the number of beetles, declares Dr. H. C. Huckett, entomologist at the state experiment station here. Dr. Huckett made a number of experiments on Long Island where cucumber beetles are often troublesome, and the results of his tests are believed to be generally applicable wherever these insects are abundant.

The beetles appear soon after the plants are above the ground, and the period of greatest danger extends from the time the seedlings break through until they are four to six weeks old, or until the plants are well established, says Dr. Huckett. Hand spraying or hand dusting are the only effective means of applying insecticides for the cucumber beetles, he says, because the application must be so thorough. Sprays are less harmful to the plants than dusts, but to offset this hand dusting is so much more quickly done than hand spraying that dusting will probably be resorted to in large plantings.

The most effective spray mixture used in the tests contained three pounds of calcium arsenate, three pounds of kayso, and 50 gallons of water. The best dust mixture was composed of one pound calcium arsenate and 15 pounds of gypsum or land plaster. Hydrated lime may be used instead of gypsum, but its use increases the danger of plant injury. Whether dusts or sprays are used, the plants must be thoroughly covered, especially around the base of the stems and at the tender shoots, he says.

An effective means of destroying large numbers of cucumber beetles tried out in the tests was to provide a supply of squash seedlings in the cucumber field as "trap" plants. The squash seedlings were not sprayed or dusted and the beetles tended to congregate on them in large numbers as they were driven from the cucumber plants. By the judicious application of a blow torch large numbers of the beetles were then easily destroyed on the trap plants, he says.

QUICK FROZEN VEGETABLES CALLED NEW FARM OUTLET

Geneva, N. Y.,—Belief that an important outlet for farm products may be opened up through development of quick freezing is expressed by Prof. C. B. Sayre, of the New York state experiment station here, in a partial report on experiments during recent years.

With frozen foods rapidly assuming importance, station officials are studying all angles of the new industry and have tested a large variety of fruits and vegetables for their suitability to the process. As a result of these tests, Professor Sayre says, several hundred acres of peas were grown in New York last season for quick freezing.

The tests have revealed that the variety of peas commonly grown for canning is not as suitable for commercial freezing as are the market garden varieties, said Professor Sayre. The chief objection to the canning varieties for freezing is their pale gray-green color. The large-seeded market garden peas with their bright emerald green color such as Thomas Laxton, Gradus and Telephone, have proved especially well suited for quick freezing, he declares.

Among the corn varieties tested, good strains of Evergreen, Crossgreen, Red Evergreen, and Golden Bantam made attractive frozen packs, both as cut corn and on the cob. Work is to be continued at the experiment station on various other problems encountered in the quick freezing process, including chemical, bacteriological and physiological phases.

SULPHUR AND MOLASSES, SASSAFRAS AND TARTAR

Small bundles of sassafras bark are for sale in the markets. It is used in making tea, considered an ideal spring tonic when the country was new. Prevalent ideas then were that the blood was made thick and heavy by eating the rich food of winter and liberal portions of sassafras tea were needed to thin and purify the contents of the blood stream.

A companion spring tonic was sarsaparilla extract, a tea made from the small roots of the vine. If members of the family had a regular course of these two teas, and then used a dozen doses of sulphur, cream of tartar and molasses, mothers and grandmothers were confident there would be no spring fevers and health would be preserved.

Sassafras tea still is popular with many. With a little sugar it is an acceptable drink. Whether or not it has a tonic value, one loses nothing by drinking it. An early day custom was to use sugar water from the trees in the maple camp in making the tea and any who have tasted it will not forget the delightful qualities of the drink as prepared.—Ohio State Journal..

ADVISES GROWERS TO BED SWEET POTATOES FOR EARLY SETTING

Raleigh, N. C.,—It will take about eight to ten bushels of average-sized sweet potatoes to produce enough slips to set one acre of land at the first pulling but if two or three successive pullings can be made, five bushels of seed will be sufficient, says E. B. Morrow, extension horticulturist at State College.

"A good rule to follow is to plant the beds at least six to seven weeks before the plants are wanted for setting in the field. For eastern Carolina, this means planting the beds during the first week in April and for the Peidmont and mountain sections a few days later. By all means use seed that is free from blemishes and rotten spots. Treat the seed with a solution of mercuric chloride to kill any disease spores that may be present."

"The mercuric chloride solution is made by mixing one ounce of the chemical to 24 gallons of water. This will give better results than the formaldehyde solution.

"In preparing the solution, mix the mercuric chloride with a small amount of warm water and then add the additional cold water. It is best to use a wooden container and after 15 bushels of seed have been treated, make up a fresh solution."

Mr. Morrow says the potatoes should not be bedded until they are dry. "Then place them about three-fourths of an inch apart in the bed to prevent crowding of the slips. Cover with two to three inches of clean sand. If the bed is dry at the time of bedding, water moderately but never soak the bed until it is water-logged.

"When potatoes are bedded as late as the first week in April, protection is not absolutely needed though a layer of pine straw about four to six inches deep will protect from the cold and conserve the moisture," he adds.

FARMERS START SEASON WITH REDUCED PRODUCTION OUTLOOK

Washington, D. C.,—Further retrenchment in farm production programs is in evidence this spring says the Bureau of Agricultural Economics in its April 1 report on the agricultural situation.

Farmers have reported to the Bureau intentions to reduce corn acreage by 3.5 per cent or nearly 4,000,000 acres; to decrease the acreage of spring wheat and oats by 3 per cent, sweet potatoes 13 per cent and potatoes 5.4 per cent. The principal increase is one of 22 per cent in tobacco acreage.

The eastern and central corn belt apparently is planning to shift about 2,000,000 acres out of crops into asture, says the Bureau; and the acreage of crops harvested in the central and northern great plains area and in portions of the Pacific coast states will show a reduction of about 4,000,000 acres, it is expected. West of the Mississippi in the south, it is stated, farmers are planning a decrease of about 2,000,000 acres in food and feed crops, "although this does not mean necessarily that much reduction in total crop acreage."

The livestock industries, says the Bureau, are struggling with varying phases of the price depression. Hog prices have improved slightly but are still lower than a year ago; lamb prices have moved up slightly, and the sheep industry appears to be heading toward lessened production. Milk is so cheap that many dairymen are letting the calves do part of the milking. Eggs, during the last two months, have returned to producers an average of about 1c. apiece; in consequence, farmers have sold their hens until flocks are now down to about the same size as a year ago.

WATER IS IMPORTANT FOR THE LAYING HEN

Lexington, Ky.,—Poultry farmers who get best results supply their hens with plenty of clean fresh water, points out a statement from the College of Agriculture, University of Kentucky, here. Since the egg is nearly two-thirds water, production will be limited unless the hens have access to good water. Slightly warmed water is appreciated by the layer in winter. Flocks that have all the milk they can drink do not need water. More care is needed to keep the containers clean where milk is used. It is highly important that utensils holding water or milk be kept thoroughly clean, and that the water also be clean and fresh, says the statement.

In seeking opportunities, don't look "soft snaps" and easy places. Rather look for problems that need to be solved. Look for situations that you can improve. Look for chances to make things better— and remember this, that "A man's judgment is never better than his information."

Application for Membership

NATIONAL FEDERATION OF COLORED FARMERS (Inc.)

Vincennes Hotel, Chicago

As a farmer, I believe the time has arrived when the Colored Farmers should form a National Organization devoted to diversified production, grading, packing, shipping and marketing of farm products and to the purchase of needed farm supplies through co-operative methods, to the end that a more prosperous financial condition may result from their efforts as producers.
I hereby subscribe $5.00 for membership in the National Federation of Colored Farmers for a period of 12 months from date. Also $1.00 for an Annual Subscription to the Modern Farmer.

THE MODERN FARMER

Vol. VI. NASHVILLE, TENN., JULY 15, 1933. No. 3.

NEW DRYING MACHINE

Joiner, Arkansas, Gin Owner Reports

Memphis Appeal
By W. H. Swiggins, Jr.

A cotton drying process which the inventor claims will enhance the value of the staple from $2.50 to $7.50 a bale will be installed shortly in his gin in Joiner, Ark., by G. A. Newton, designer of the device.

Mr. Newton was in Memphis yesterday to consult with sheet metal constructionists regarding the building of the apparatus. He has secured a patent on the device.

Much cotton goes to the gins in a damp or wet condition, Mr. Newton said, due to rains or picking after a heavy dew. If damp cotton is fed directly into the gin for cleaning its treatment there results in a shortened fibre. Mr. Newton claims his dryer by turnovers in a heated chamber will sift much dirt, loosen the staple and resnlt in a fluffier and whiter product reaching the ginning machinery proper. As a result, he pointed out, longer staple will come out with consequent higher classification and an increased price for the farmer.

The device is in the form of an adjunct to the gin and, after initial cost of installation, operation does not call for further expenditure. The dryer can be used at either steam or oil engine operated gins. It consists of a sheath encircling the smoke stack or enclosing the exhaust pipe. In this baffle boards are may be.

The sheath provides a chamber nine inches around the stack or exhaust pipe. In this baffle boards are regularly spaced inclining at an angle of 26 degrees. The cotton instead of being drawn directly into the gin first moves through this passage where it contacts heat from the smoke stack or exhaust and through function of the baffle boards is forced in rotary fashion around the warm interior.

A small chamber, one inch in depth, separates this carrier chamber from the stack or exhaust itself. This eliminates possibility of too close contact with the heat and resultant fires.

Mr. Newton, a cotton grower and gin man of long experience, said the device can be installed at a first cost of $1,000. No further expense even in the suction of the cotton through the passage is entailed, he said, as the regular gins fans already in use are employed and the heat costs nothing.

Temperatures maintained in the dryer range from 180 degrees to 200 degrees. Mr. Newton said, with the lower preferable for all purpose.

Only one other device for drying

(Continued on Page 8)

RAIN WORTH MILLION TO COTTON FARMERS

Memphis, Tenn., July 10—(AP)—W. M. Landess, Shelby County agricultural agent, estimated today that Sunday's heavy rain was worth at least $1,000,000 to cotton and truck farmers in the Memphis territory alone.

Reports from North Mississippi and Arkansas indicated rain also benefitted that territory. Helena Ark., reported 3.93 inches precipitation.

"Cotton will get more growth now," Landess said. Pastures, lawns and truck gardens also will benefit."

PRIZE HENS FOR 1933

Poultry World Heading Toward Exposition

High-bred biddies, the aristocratic cacklers of the poultry world, are heading toward the world's fair from most of the states and a half-dozen foreign lands. The first six carloads of houses, in which they will live for five months, reached the grounds this morning.

Under the direction of Harvey Woods, who is the executive manager of what will be the biggest poultry show ever shown, workmen began immediately to prepare the area in the south end of the exposition grounds for the international egg-laying contest under the auspices of the National Poultry Association, an organization of poultry breeders and allied industries.

Harvey Woods expects 1950 hens and 150 roosters to greet President Roosevelt with exuberant chicken noises when he passes the exhibit May 27 on his rounds of the grounds. The feathered ladies by that time will be getting into their strides in the egg-laying contest, which will begin May 15 and last until Oct. 1, the day the exposition closes. All during that time not one fowl will set foot on common soil.

There will be a village of 150 contest houses, each 12 by 12 feet in size, made by the James Manufacturing Company of Atkinson, Wis. The wooden floors will be covered with oat litter, for hens must scratch around to keep well, and the floors of the sun parlors will be like suspended popcorn poppers they will be made of woven wire fabric, hung about eight inches above the ground for hygienic and cooling purposes.

The modern hen village will consist of 150 "coops," each made up of thirteen hens and one lordy rooster.

Every bird must be physically examined before it is permitted to move into a house. A hospital 14 by 20 feet in size, with two rooms will be kept open day and night.

When an entry of birds comes in they will be taken to the clinical room of the hospital and will be examined, inspected and otherwise gone over by E. S. Weisner, lent to the big show by the Michigan State college. He is the superintendent of the contest and will live on the grounds. Dr. Little B. Brown, Angola, Ind., will be the physican of the hospital.

NEW YELLOW-FLESHED POTATO A HEAVY YIELDER

Moorhead, Minn.—A new yellow-fleshed potato developed by the United States Agricultural Department is being tested in South Dakota, North Dakota, Iowa, Kansas, Michigan and several other states this year, according to word received in Moorhead.

In preliminary trials it has produced heavy yields. It is a hybrid of northern and native South American types, and produced more than 500 bushels per acre when tried out in Maine. Federal plant testers report it contains an abundance of the growth-producing vitamin A.

The Department of Agriculture has no seedstock of the new potato available for distribution. It places small lots with state experiment stations for cooperative testing and the states are choosing the farmers for the experiment. Before receiving final approval of the Department, the tuber must undergo rigid trials and cooking tests.

OKOLONA, MISSISSIPPI UNIT

Executive Officers Report Increased Numbers

Okolona, Miss (Special)—Farmers of this section are redoubling their effort to maintain their national organization through the several Units. Here in Okolona one of the liveliest of the local organization called Farm Unites in maintained throughout the entire nation. Mr. Jno. Brandon, the chairman, J. F. Walker, the president, Chas. Adair, the secretary, and Mr. M. Jenkins, the market agent, have reported progress all along. Their membership is increasing, they are taking advantage of the reports on market conditions and are lining themselves up to secure such benefits as will be given to the farmers on the recent national laws enacted by the special session of Congress.

More than that, they are in touch with representatives in both houses at Washington so that they will familiarize themselves with the small home loan funds, with the joint live stock bank fund as well as with the seed loans and the loans on farms by the Farm Board.

Mr. James P. Davis, the national president, who is constantly in communication with the various Units, is giving the Okolona Unit the benefit of first-hand information just as he secures it. At a recent special meeting the Unit made a donation of $5.20 sending it direct this time to The Modern Farmer's headquarters and office of publication up at Nashville, Tenn.

A resolution endorsing this farm publication as a periodical and journal helpful to farmers of every class, was introduced and passed at a recent meeting of the Unit.

MOUNTAINEERS OF SOUTH PORTRAYED AS INTELLECTUALS

Laziness and inertia, due to inbreeding, have been used by commentators to explain the habits of the southern mountaineer. The hill people I know are neither inert nor lazy. Nor are they lacking in a really high degree of intelligence, says Endora Ramsay in the Forum and Century.

Not a single parent of the children I taught was an illiterate. All subscribed to some sort of paper, and the daily that came to me was passed around among my constituents and read threadbare.

It is not ignorance of what is going on in the world that keeps the mountainers content with their simple living, for all of them knew twenty years ago what was going on beyond the hills, but merely seemed to lack the curiosity that would send them inquiring into its workings.

Nor has the stock been depleted by the inbreeding about which so much has been written. Women who can hoe and plow and fell trees are no weaklings. Mountain girls, reared to work in the fields beside their brothers, are not conscious of any disabilities imposed by their sex. Like healthy animals, they bear children without the aid of doctor or midwife and are soon about the rest of life's buisness.

TO OUST DEPRESSION

Louisiana Farmers to Cooperate In Plans

Mansfield, La. With the same spirit that characterizes the singing of their hallelujahs, the colored people of De Soto and Red River parishes are participating in the agricultural extension program and are eagerly looking toward it as a means for providing them with green pastures, well-stocked pantries and well-fed bodies. They are not content to sit by and hum "All God's Chullen's Got Shoes," but are cooperating and concentrating on "driving that old depression hog down the road," so expressed by Henry H. Scott, a local leader of the St. John's Demonstration club at Pelican.

Organizing themselves into groups designated as Self-Help leagues, the colored men and women of seven communities have pledged their support to agricultural projects sponsored by Stazzie Hudson, colored demonstration agent, and it is safe to prophesy that better agricultural practices will soon be under way in Keatchie, Stonewall, Shiloh, Kingston, Pelican, of De Soto parish, and in Gahagan and Hannah, Red River Parish.

At Shiloh ten men bought better seed corn in sufficient quantity to plant five acres each. They will endeavor to improve the corn that is being grown in that section and will pass on to their neighbors these improved seed so as to eliminate the poor quality of corn that customarily is found on their places.

Occupying the center of the stage just now is a big canning program that Stazzie Hudson has under way throughout Red River and De Soto. The various adult and 4-H demonstration clubs are holding community canning days and the members are learning the best methods of food preservation and the use of the steam pressure canners and the sealers. The average home conditions are not ignored as Stazzie Hudson shows the people how to can the hot bath way. There are six community-owned cookers and two parish-owned ones and with the assistance of local leaders, Stazzie Hudson has these in operation both night and day.

They are canning lima and string beans, beats, okra and fruit, and members of the Funston community demonstration club report

(Continued on Page 8)

BULLETIN GIVES WAYS TO KILL PLANT PESTS

Stillwater, Okla.,—A vegetable spray calendar which tells how and when to kill the various pests that destroy vegetable plants is now being distributed by the extension division, Oklahoma A. and M. College.

The "calendar," in bulletin form, has a chart telling the appearance of the insect, how it affects the plant, and what remedy to use. In addition there are directions for making and using the various kinds of poisons recommended, and discussions of the pests of the more common vegetables and means of controlling them.

The bulletin may be obtained from county agents or direct from the extension division, Oklahoma A. and M. College, Stillwater, Okla.

STILL HAS FAITH

Agriculture no Economic Experiment says Leader

Ames, Ia.,—In what direction, should agriculture look?

Our program is concerned with six master objectives: (1) Recognition of interdependence of rural and urban interests. (2) A favorable economic environment. (3) Efficient management and production methods. (4) Effective group action through organization. (5) A satisfactory social environment and standard of living, and (6) Adequate rural educational opportunities.

The committee at Iowa State college responsible for the formulation of these objectives for agriculture believes that Dr. F. D. Farrell, president of Kansas State college, has splendidly presented the essence of some of the social aspects without ignoring the economie, as follows:

"It seems certain that we have been giving too much prominence to the purely commercial aspects of farming. We have emphasized the value of the farm as a business at the expense of its value as a home. As a mere business enterprise with only commercial objectives, farming in most individual instances is likely to be disappointing.

"So many people like to farm that the business of farming usually tends to be overdone. For most people the chief attainable rewards of farming are not economic but social.

"Social values must not be sacrificed for economic values—one of the greatest futilities is to progress economically and retrogress socially. We all need to recognize that we work and strive so that we live better, rather than we live solely that we may work and strive. If we live badly we are poor no matter how much money we have.

"Adversity is impressing large numbers of farm people with the fact. Thus, it is laying the foundations for the acceptance of a rural philosophy that seems likely in the end to prevail.

"People who do not honestly prefer simple living should not live on farms. People who do prefer it usually are able, in the long run, through the practice of good farming, to provide that type of living with corresponding happiness and security.

"Adversity is teaching many of us to enjoy the non monetary wealth with which we are surrounded. This wealth includes an endless variety of things from which happiness and satisfaction may be extracted; things ranging all the way from gorgeous sunsets to the companionship of children."

KINDNESS TO HORSE YIELDS A GOLD MEDAL

L. H. Hansen, manager of the Alamito Dairy company, received a gold medal from the Nebraska Humane society for "conspicuous service and kindness to horses" on the part of the dairy company. Barney, 25-year-old horse, who had delivered milk in Omaha for 17 years, is now retired "to work no more" but to live the life of Barney in clover on the Henry Mundt farm, seven miles southwest of Papillion. The medal awarded by the Humane society was provided by Jessie Millard who for years has been the horses' guardian angel in Omaha.

DRIVE ON TO CUT COTTON CROP

Chicago American—An intensive drive was launched today in the cotton belt to obtain signatures of cotton producers to contracts leasing a definite amount of their cotton acreage to the Secretary of Agriculture.

If a sufficient number of offers are received by the secretary, he will accept them. An effort is to be made to act on the offers within a week or ten days.

OFFER TWO PLANS

The consideration to be given the cotton planter for his land is contained in two alternative plans as follows:

1. A cash payment ranging from $6 an acre for land yielding an average of around 100 pounds lint cotton per acre to $12 for land yielding on the average 275 pounds or more, plus an option at 6 cents a pound on government-held-cotton in an amount equal to that which the producer agrees to retire from production.

2. A cash payment without the cotton option, the payment to range from $7 an acre on land yielding from 100 to 124 pounds an acre to $20 for land yielding 275 pounds or more an acre.

If a sufficient number of offers are received to insure an effective reduction of cotton production and the secretary announces his intention to pay cash benefits, a processing tax must be in effect as of the beginning of the marketing year, which is about August 1, it is stated.

SEEK TO REDUCE CROP

The amount of the tax, under the law, will be the difference between the current average farm price and the fair exchange value. The current average farm price is to be determined from available statistics in the Department of Agriculture.

The amount of acreage to be retired from production will be determined by the secretary after the offers have been received. While no definite amount of acreage has been determined, the aim will be to retire a sufficient amount to eliminate effectively a substantial portion of this year's crop and reduce excessive supplies.

—Chicago American

PEEK'S ASSISTANT WELL ACQUAINTED WITH HIS DUTIES

Chester C. Davis, for many years active in various agricultural organizations in the middlewest and northwest and formerly commissioner of agriculture in Montana, has been selected as production administrator of the new agricultural adjustment administration. The appointment was announced today by Secretary of Agriculture Wallace and George N. Peek, chief administrator of the agricultural adjustment act. He is a native of Iowa and has been well acquainted with Secretary Wallace for many years. He has been associated with Mr. Peek recently in a company concerned with the industrial use of cornstalks and other farm waste and the development of methods originated at Iowa State College. He was also associated with Mr. Peek from 1925 to 1928 when both were working for the passage of the McNary-Haugen bill. In 1928 he was vice chairman and secretary of the Smith independent organization committee.

Davis was born on a farm in Dallas county, Iowa, in 1887, and spent his early years there. Until he was 20 he worked on the home farm and also worked as a hand on farms in the corn and hog and winter and spring wheat sections. Later he became a farm owner and operator. He is a graduate of Grinnell college, Grinnell, Ia.

Following his farm experience, Mr. Davis engaged in newspaper work in South Dakota and Montana. For seven years he edited papers in Redfield, S. D., and Bozeman, Mont. After that he became editor and manager of the Montana Farmer at Great Falls.

In 1921 he was appointed to organize the Montana state department of agriculture and was commissioner of agriculture until 1925. He left his work with the state department of agriculture to become director of grain marketing of the Illinois Agricultural association at Chicago and then become actively interested in farm legislative work. In addition to his associations with Mr. Peek, he worked with Walton Peteet, secretary of the national council of the Cooperative Marketing associating. In their legislative activities they represented a number of large farm commodity groups.

THE SONG OF THE CRICKETS

Listen to the crickets as they chirp in the trees,
Singing us their song on their bending knees,
While the stars peek in and the moon is low.
What are the words, my dear, do you know?
Chirip! Chirip! Chirip!

The people in the cities don't have this kind of treat,
They only hear the noise of the cars in the street,
The people in the country get this music every night,
As the crickets chirp in the country moonlight.
Chirip! Chirip! Chirip!

Lovers sit and talk under a tall pine tree
Sometimes my sweetheart, my pal and me
Like to hear the song they sing so well,
What the words are nobody can tell—but
Chirip! Chirip! Chirip!

When I'm sleepy and must go to bed
I hear the crickets (seemingly) over my head.
All of a sudden in slumberland I'm gone,
But I'm sure they continue to sing their song,
Chirip! Chirip! Chirip!

Piney Woods, Miss.
CLAUDE WESLEY PHIFER.

HOUSEHOLD HINTS

By Mrs. Mary Morton

MENU HINT

Salmon Loaf

Baked Potatoes or Potato Chips
Green Peas Molden Tomato Salad
Baked Brown Bread
Fresh Berries Iced Tea

Salmon loaf is a good hot weather supper dish. This recipe will serve six.

Recipes

Salmon Loaf—Three cups flaked salmon, two eggs slightly beaten, one tablespoon chopped parsley, one teaspoon minced onion, two tablespoons lemon juice, one tablespoon prepared mustard, one cup milk, two tablespoons butter melted, salt and pepper, fourteen soda crackers crush the crackers and soak in the milk with the beaten eggs. Add the salmon and seasoning and bake in a greased loaf pan 375 degrees for thirty to forty minutes.

Baked Brown Bread—This is an easily made brown bread and delicious; baked in oven instead of steamed. Two cups graham flour, one-fourth cup granulated sugar, one teaspoon baking soda in one and one-fourth cups sour milk, one-fourth cup molasses, one-half cup seeded raisins, eight walnuts. Mix seeded raisins, eight walnuts. Mix dry ingredients, raisins and nuts. Add sour milk and molasses. Put in greased tall one-pound coffee can. Let rise in can forty-five minutes before baking. Bake in very slow oven one hour. Let cool before removing from can.

BAPTIST MINISTER FINDS BIBLE PAYS HONOR TO FATHERS

Fathers' day was appropriately observed at the First Baptist church yesterday with special music and a special sermon last night. Speaking in Father's Honor, the Rev. J. R. Hastings said in part: "I shall never forget the first time I ever attempted to celebrate Fathers' day. A good woman of my church suggested that inasmuch as we had made so much of Mother's day, with beautiful flowers, special music and an appropriate sermon, we ought to give some recognition to Fathers' day. I found that to put on a real, worth-while service for father was indeed no easy task. When I began to search for appropriate songs, they simply could not be found.

"The only popular songs that I could think of that centered around father were two songs that ran like this: 'Everybody works but father, and he sits 'round all day; feet in front of the fire, smoking his pipe of clay. Mother takes in washings and so does Sister Ann; everybody works 'round our house, but my old man.' The other was this: 'Dad, dad, dad, the dear old patience teaser. The fusses I have had with that old worthless geezer. He lacks the spirit of a mouse, most any one can down him. We let him hang around the house, 'Tis cheaper than to drown him.'

"In the field of sacred music I found little more encouragement. Faith of our Fathers, a militant song of the church, was all that I could find in the hymn book of the church that paid any tribute to father, and that was more or less indirect and indefinite.

I would not minimize the honor and glory given to mother, that dearest of all earthly friends. We can not honor mother too much; but is it not most unfortunate that we are so short in our honor to father? Even the poets, who sing the praises of mother in lines which are beautiful and true have overlooked poor old dad.

Honored in Bible

"There is one literature, however, where father is given his rightful place of honor; that is the Bible. God said of Abraham: I know him, that he will command his children and his household after him, and they shall keep the way of the Lord, to do justice and judgment.

"It is a great honor to a father to be a man of God and to direct his children in the paths of righteousness. The responsibilities of fatherhood ought to be enough to bring every non-christian father to the foot of the cross. If there is nothing in the appeal of the church and the Gospel to bring a man to faith in Christ in itself, then the fact that God has entrusted him with a child who looks to him for inspiration and guidance should bring him to Christ."

EEL FROM ON HIGH

Fairhaven, N. J.—Charles O. Britton is a fish seller.

It was therefore a matter of no little surprise to him when he found a two and one-half pound eel the piece de resistance of his dinner.

Mrs. Britton said it fell into the yard from the beak of a fishhawk attacked by another hawk.

LUMBER PLANT REOPENED

Columbus, Miss., July 10—(AP)—Reopening of the Kentucky Lumber Company plant here, which has been inactive for the past two years, has furnished employment to 150 laborers. The mill is now operating on a fulltime schedule.

BREAD GOES UP

Knoxville, July 10—(AP)—Housewives today were paying six cents instead of five for 16-ounce loaves of bread in most Knoxville groceries. Grocers attributed the advance to the administration's tax of 30 cents a bushel on wheat.

Chairs for Comfort and Designed to Keep the Pulpit Neat and Clean in Appearance

No. 4—GOTHIC CHAIR

Price $15.50

No. 4—GOTHIC CHAIR

Price $15.50

Easy to keep clean and hard to wear out. Highly polished, upholstered in plush or leather.

The most reasonably priced set of chairs that we sell. These three chairs only cost

$49.00

No. 5—GOTHIC CHAIR. **Price $18.00** Antique or Golden Oak. Polished.

Autumn Flowering Bulbs Must Be Planted at the Right Time To Produce Quality—Use a Soil Rich in Decay Vegetable Matter—Dig Tuberoses Before Frost

It will not be time to plant autumn flowering bulbs for weeks yet. But, it is time to begin to make preparations. Many who have grown tulips and daffodils and various kinds of bulbs for years have never really grown high class stock because they have never gone to the trouble to do so. Possibly, they did not know how. No florist can grow as fine quality of tulips in a green house as can be grown in the open field. Neither is it possible for him to equal the best out-door grown daffodils. But if we are going to produce quality we must begin at the right time and actually give the matter some attention.

Many people like to grow bulbons flowers simply because they feel that they can be grown without effort, and while this is true to a limited extent. Real quality is not produced in this way. The requirements for all autumn bulbs does not differ greatly with the exception that narcissus will matter. Growing as they do in the stand a greatly richer ground and more manure than will other bulbs. All bulbs like a soil that is very rich in decayed vegetable wild state in the woods—usually in the shade of trees where leaves fall and decay year by year, it can readily be seen that their native soil is almost pure humus. It also means that while the drainage is about as nearly perfect as it can be, yet the bulbs are never actually dry, for humus holds more moisture than does any other known substance.

Bulbs root more deeply than most of us have any idea. If we will take the trouble to actually trace the roots of either narcissus or tulips to their extreme tips, we will find that they usually root twelve or fourteen inches deep. Of course, this means that if we are going to prepare a soil to the best advantage for bulbs, it must be prepared at least sixteen or eighteen inches deep. Of course, we are talking now of bulbs that are intended to produce strictly high class flowers. First, select the location. Preferably on a slope, although level ground is all right unless it is at the bottom of a hill where it would be too wet.

Remove all soil to a depth of eighteen inches. Throw the surface five or six inches in on pile and the remainder in another. Now, cut weeds enough to put a layer four or five inches deep at the bottom of the hole and on this throw the top five or six inches of soil thoroughly mixed with lawn clippings and one-tenth of its own bulk of ordinary stable manure. This will assure good drainage, plenty of moisture, and fertilizer at the bottom of the bed.

It is well to discard the lower eight or ten inches of soil that was dug from the bed—scatter it anywhere convenient where it will gradually mingle with the other soil. It is seldom of value in filling in the bed. Now secure plenty of thoroughly decayed manure, well-watered leaves or similar material. If stable manure is used it should be at least two years old for this purpose. Mix two parts of the soil, one part of sand or sifted coal ashes—rejecting any that will not pass through ordinary screen wire, and one part of manure. See that these are thoroughly mixed. The coal ashes are not a fertilizer, but are a good soil conditioner, and will furnish materials that will heighten the color of the flowers that grow in it. When thoroughly mixed, add one pound of cottonseed meal to each wheelbarrow of mixture and fill in the bed to within two inches of the top. It will always be an advantage to add weeds, lawn clippings, or similar material to this soil as it goes into the bed.

The upper four inches should consist of equal parts of well-decayed manure, well-decayed leaves and the soil you took from your bed. Fill this in until your bed stands about two inches above the level. Now water them thoroughly and sow rye over it and let it grow until planting time. Many feel that bulbs require shady soil to do their best, but sandy soil is not their natural habitat for most cultivated flowering bulbs.

Narcissus are wild in Spain, Greece, the Holy Land, and adjoining districts in natural clay soil. Tulips are wild in the Holy Land, Asia Minor, and adjoining regions, also in soil that has a clay base. But, they do domand an abudance of humus—decayed vegetable matter. When the bed has been sown and the ryo comes up, water it from time to time in order to keep it growing freely. If we can get the rye to be eight or ten inches tall by the middle of September, so much the better. The roots will penetrate deeply and will take up the crudest of the fertilizers. Somewhere between the middle and the last of September, spade this rye under, being sure that it is all well covered.

Try to get it under the ground four or five inches deep. Now water the soil. As soon as it begins to dry a bit, rake it loose mulch over the surface to hold the water and let it stand for two or three weeks, when it will be ready for planting Tulips, hyacinths, or daffodils planted in such soil will do their best. It is usully an advantage to scatter a pound of acid phosphate over each square rod of space before spading the rye.

Acid phosphate is one of the necessary elements in the production of plants of good blooms. Cover all bulbs planted in such soil three inches deep. By this we mean soil should be three inches above the top of the bulb. Tulips, hyacinths, Dutch and Spanish iris, and numerous other bulbs require no further care. It will be an advantage to any of the narcissus to mulch this bed two inches deep with good stable manure within a week or two of the time the bulbs have been planted. This would mean too much fertilizer for the other bulbs, but it is almost impossible to over-fertilize narcissus as long as the fertilizer does not come in actual contact with the bulbs. We are not recommending all of this labor for the general planting of bulbs where we have no desire to get superior quality. But, if we want really high-class blooms or if we want a rapid increase of bulbs, or both, some preparation similar to this is necessary.

Mrs. C. H. G. asks when to dig tuberoses and how to care for them through the winter so they will bloom again next year. When is the best time, and what is the best method, of rooting roses from cuttings? Tuberoses must be dug, or at least the foliage must be cut off level with the top of the ground just before the first frost. The bulb is fairly hard and may live over the winter in the open ground and while it will grow plenty of foliage the next year, it will have chilled enough so that it will not bloom. In other words, the bloom kills even though the bulb itself apparently is not injured. One should watch very closely for symptoms of the first frost, for the longer the tuberose grows, the bigger and better the bulb will be for the next year. When we grow tuberoses by the thousands, we always had an arrangement with the local weather bureau to call us on the telephone as early as possible to tell us when the first frost was to come, and many times we have cut tops off of tuberoses at midnight to make sure that no tops would be frosted.

Dig the bulbs, shake off most of the dirt, put them in a box or crate and set them in a reasonably dry storage room where the temperature will never go above 50 and never down to freezing point. As planting time comes in the spring, break all the new offsets of the division off of the old bulb and you are ready to plant. The small offsets can be planted in rows like onions and will mostly make blooming sized bulbs the first year. If your question had been of a bulb that has bloomed ever blooming again, the question of varieties would arise. If your tuberoses are of the old Excelsior Double pearl variety, the old bloom is worthless as soon as it has bloomed, except to make new offsets. Most of the single varieties—certainly the ones grown in our district now—are ever-blooming, which in this case does not mean that they bloom all the year around, but that the old bulb will bloom over and over again year after year.

The best time to root roses from cuttings is in March, or early April but that is out of the question now. As soon as we begin to have cold nights— say the middle of September—select a partly shaded location, make a frame the desired size, and fill it with as sharp, pure sand as you can get. It is well to wash this sand until the water comes from it clear, which will mean that there is no heavy infestion of dirt or disease in it. Now, make your cuttings from wood that has grown this season. The shoot that has bloomed is in ideal condition to make cuttings the day the flower withers and falls. Although there is quite a range in time which cuttings may be taken. Make your cuttings four or five inches long—six or seven is all right provided your sand is deep enough. Make the lower cut just under a bud. The upper cut should be an inch or more above the bed. Stick the cuttings in the sand and stamp the sand very tightly around them. Water freely and keep thoroughly moist at all times, but never sopping wet.

One usually has better success if he can put either a cloth like tobacco cloth or a glass sash over these cuttings. Where glass is used, it is always well to powder it well with air-slaked lime so that too much light will not get through. The purpose of the glass is to keep moisture from evaporating.

Most roses will root in from three to five weeks. As soon as a good top growth starts—and be pretty sure that the roses have rooted, they may be either potted or transplanted into good moist soil, or a fruit jar may be turned over them to keep them from drying out until the roots take hold in a new place. A great many people who just root cuttings for their own use stick them in rather thinly and when they have rooted and new growth has started, mix good, rich soil in among the sand and allow them to grow where they are until early next spring when they are transplanted. The easier varieties of roses may be rooted in the open ground in ordinary soil, but it takes a longer time and this is never so sure of success as where sand is used.

WHEN IN CHICAGO STOP AT AMERICA'S LARGEST NEGRO HOTEL—VINCENNES

SOVIET GOVERNMENT AWARDS PRIZE TO ROBINSON, NEGRO ENGINEER

New York — (CNA) — Robert Robinson, Negro engineer and inventor, has been awarded a premium by the Central of the All-Union Inventors Society of the Soviet Union for his active work and splendid contributions to the rapid progress as Socialism in the U. S. S. R.

Robinson was one of several workers invited to the Soviet Union. Before leaving the United States, Robinson had been employed by the Ford Motor Company of Detroit, Mich. The bars set up by the U. S. ruling class to prevent promotion of Negroes, promoted Robinson to accept invitation of the Soviet Union where race prejudice has been abolished by the Revolution along with unemployment and mass misery.

Before going to Moscow, Robinson had studied at the Stalingrad Tractor Plant for several months. In 1930 he was attacked by a white American, Lewis, in a collective restaurant. Lewis was found guiltu of white chauvinism in a mass trial and deported from the Soviet Union, after Soviet workers declared they would not tolerate American race hatred on their soil.

PRAYING ALWAYS

The very fact that prayer is so important a factor in our spiritnal conflict makes it certain that the great adversary will try to hinder and defeat this weapon of attack. Therefore, we need all perseverance as well as all sincerity and devoutness. It is not enough to find access to God in prayer and be conscious of the answering witness of the Holy Ghost. We I trifle with my Master. I ask Him for toys, for pretty things, while all the time He is waiting to give me "unsearchable wealth," "sight, riches, healing of the mind." "The Lord is great;" and shall I add, "and greatly to be prayed!"

And how delicately gracious it is that our Lord should attribute the miracle to Bartimaeus himself. "Thy faith hath made thee whole!" As though the Lord had had no share in the ministry! He makes so much of our faith and our endeavor, and our obedience. "If ye had faith as a grain of mustard-seed!" That's all He wants, and miracles are accomplished.

J. H. Jowett.

THE MODERN FARMER

Official organ of the National Federation of Colored Farmers, Inc.

Leon R. Harris - - Editor

Published monthly by the Modern Farmer at Nashville, Tennessee, and Chicago, Ill.

Nashville, Tenn., Office, 447 4th Avenue, North.

Devoted to the interests of the Farmer, Truck Gardner, Livestock and Poultry Breeder, the Home and the People.

"OUR SLOGAN"

STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT.

THE LAW

"It is hereby declared to be the policy of Congress to promote the effective merchandising of agricultural commodities by encouraging the organization of producers into effective associations under their own control.

The Board is authorized and directed—to promote education in the principles and practices of cooperative marketing—to encourage the organization, improvement in methods, and developjment of effective cooperative associations. (Public—No. 10—71st Congress. Sec. 1-5.)

THE GOSPEL

"This law is predicated upon the ability of the farmer to manage his own business, once he is organized to do so. Cooperation is the key to it and only in exceptional cases can the Federal Farm Board have any dealings with a farmer who is not a member of a producer-owned and producer-contrloled marketing unit." Hon. Sam'l R. McKelvie, Former Member, Federal Farm Board.

The little cares that fretted me,
I lost them yesterday,
Among the fields above the sea,
Among the winds at play,
Among the clover-scanted grass,
The rustling of the trees,
Among the singing of the birds,
The humming of the bees.

The foolish fears of what might come,
I cast them all away,
Among the clover-scanted grass,
Among the new-mown hay,
Among the husking of the corn,
Where drowsy poppies nod,
Where ill thoughts die and good are born,
Out in the fields with God.

—From "Mortality"

SOMETHING ELSE THAT'S COMING

Most of the automobile tires manufactured in the U. S. are made in Akron, Ohio. The tire factories are very large, they employ thousands of workers, and the overhead is high. It is rumored now that smaller plants, located in smaller cities, have been cutting under the prices of the large factories and as a result, the large factories may have to decentralize.

Many industrialists claim that small plants, located on the edge of farming regions, are the ones that have beat the depression and have the brightest future. This claim should be of interest to Negro farmers everywhere. If the claim is true, farmers will be able to get factory employment during slack seasons, their sons and daughters will be able to find steady employment near home, and living on the farm will look rosier in the future than in the past.

But why should colored farmers wait until these factories are built and equipped in their communities? Why don't they build them and run them cooperatively? When every colored farm community has a cooperative industrial plant we will be progressing sure enough. And the good thing about it is this: we are expecting at least two such plants to be erected and in operation in less time than one year. One will be in North Carolina and the others in Mississippi.

YOUR MEMBERSHIP PAYS WELL

The National Federation of Colored Farmers is not a very old organization but many members realize that for every nickle they pay in membership dues they receive full value and much more. No farmer-member has ever lost a penny by joining his organization. The organization's bulletin service alone is worth much to the farmer. Advice relative to buying and selling cooperatively, marketing service, publicity service, information about purchasing farms and homes, seed, fertilizer and livestock, information about government relief, all this is available to members and enables them to save more and have more.

All really progressive and modern farmers are good organization farmers. The time is here now when the colored farmer who is not a member of a farm organization is looked upon as a mighty poor farmer and is treated as such. Join your organization, the National Federation of Colored Farmers, Inc., pay your dues, and get the benefits of organization now.

OPPORTUNITY TO BUY FARMS

The better and most progressive class of white people of the southern states are getting sick and tired of the tenant and sharecropping system of farming, wich has enslaved thousands of poor colored and white farmers of the South for fifty years, and are demanding that opportunities be given tenants to become owners of the land they cultivate. The tenant system is doomed, it is going, and we believe it will be gone within the next twenty years. Those tenants who seize the opportunity now to purchase small farms will get first choice and will be much better off than those who delay and live in hopes.

The N. F. C. F. has announced that information about buying small farms on the best of terms may be had by members for the asking. This land is for sale in most of the southern states and the owners want to sell it to colored farmers If you are able to make money farming for some one else it is a cinch that you can make it for yourself. Start now and prepare to secure a farm and home of your own. Write to your national office, say where you want to live as a homeowner and get the information you want. Now is the time to decide and to act. Stop being a tenant. Become a farm owner.

THE PRESIDENT BELIEVES IN HOME MARKETS

It is evident that Mr. Roosevelt believes in putting less emphasis on foreign markets and more on the markets at home. He wants to raise farm prices and wages so the people can have more money here to purchase goods manufactured at home. He wants Americans to live as Americans should live. He wants them to have all the necessities of life and as many luxuries as possible. He wants farmers to be able to wear good clothes, eat good food, own good automobiles, have electricity and gas and other conveniences in their homes and have some time for recreation and rest and to enjoy themselves as they should.

About a million colored American farmers and their families would like to have all that Mr. Roosevelt wants them to have. They have been living pretty shabbily for many years, just a little better than Chinese coolies, Mexican peons, or Russian peasants. They do not deserve such a living and it is not their fault that they have been compelled to live like this. They are ready to buy as soon as they can get the money to buy with. The colored farm market should not be overlooked or forgotten. We hope prosperity will not pass us by when it passes the corner. The colored farmer has gotten plenty of special persecution in the past. We hope Mr. Roosevelt will give us a little special consideration. We believe we deserve it.

THOSE CITY FARMERS

We often poke fun at the city farmers who are so willing to give the dirt farmers advice, but some of them are putting it over in a big way and it would pay us to do some imitating. Up near Peekshill, N. Y., Crosby Gaige, a theatrical producer, owns a farm of several hundred acres. He specializes in raising spices and condiments and grows nearly everything in that line except salt and sugar. He grows tomatoes for flavor. It is reported that he has experimented with some fifty species, red and yellow, their exposure to sunlight and growth in various soils.

He has a laboratory on his farm and distills oil from flower petals and manufactures perfumes, cold creams and etc. But he is not a farmer. He is a theatre man. We wonder what all he would do if he farmer millionaire.

We have often said that the colored farmer should experiment and specialize more. He should be able to grow one thing better than anyone else. We are really the best farmers in the world but we are so meek we won't let anyone know it. Its time to toot the horn a little. The rest have been doing it for years. The colored farmer who becomes the mustard greens' king of the nation is apt to become the first colored farmer millionaire.

DESCRIBES SEVERAL NEWER VEGETABLES

Columbia, Mo.—Additional profit, food value and variety may be obtained by using some of the vegetables that are not now grown to any great extent in this state, says Miss Essie M. Heyle, in charge of the home economic extension work of the Missouri College of Agriculture. The newer vegetables that she especially recommends are chives, kohl-rabi, broccoli, Swiss chard, celeriac, summer spinach and Chinese cabbage.

"Chives belong to the onion family, but the grasslike tops are used with foods when a delicate onion flavor and a bit of color are desired. They contain less of the strong aromatic oil than do onions.

"Kohl-rabi is coming to be a favorite with many gardeners. It tastes like a turnip, but is sweeter. It is a pale green bulb that grows above the ground. It is cooked and served like turnips. For summer use early planting is desirable.

Broccoli is a member of the cauliflower family and has a delicate cabbage flavor. It thrives in Missouri but only enough should be planted for immediate use since it has a concentrated cabbage flavor when canned. It is a cool weather crop so must be planted early, or late for fall use.

"Swiss chard is a favorite for summer greens, because the leaves are broad and easily washed. If the outer leaves are cut, the plant will continue growing and putting on new leaves.

"Celerica is a turnip-rooted celery which has a rich, meaty, celery flavor and may be used cooked in salads, or cook and served alone.

LET'ER GO

Youngstown Vindicator: A manufacturer says that some morning we'll wake up and wonder where the depression has gone. Well, we won't summon any bloodhounds to try and bring it back.

BIG FEATURES COMING TOO!

Topeka Capital: Senator Glass terms the Morgan inquiry a "circus stunt." The government in its New Deal gives the country a thrill a day, so the movies will have to look out for their laurels.

HELPING

Special to the Christian Science Monitor
Coleman, Texas

A young Negro who does odd jobs by hauling with a wagon and a team was asked by a woman if he was getting much work to do during the time of banking difficulties.

He answered cheerfully, "Yes, ma'am, I'm getting a good deal of work to do."

Thereupon the woman replied, "Well, I'm glad to know that somebody is making money these days!"

"Oh, no," he replied, "I'm not making any money, because nobody has any money to pay with now. I'm just working on a credit."

"You don't mean that white people are asking you to do your little 25 and 50-cent jobs on credit, do you?"

"Yessum," he answered. "They will pay all right—and besides," he meditated, "these are times when I think we all ought to help each other all we can."

Truly, this was a beautiful and helpful spirit, more commendable coming from one who, from a material viewpoint, was not so fortunate as those whom he served.

BLAST OF BIG WHISTLE CALLS STEEL MEN TO WORK

Birmingham, Ala., July 10—(AP)—The blast of the big whistle over the Ensley works of the Tennessee Coal, Iron & Railroad Co., this morning called 1,500 men to work in the rail mill, which has sufficient orders for a three weeks' run.

The operation of the rail mill followed by one week production of steel ingots in the Ensley blast furnaces, and this afternoon the Woodward Iron Company will blow in its No. 2 blast furnace.

A conservative estimate of the number of men employed in steel and iron production, including those in the coal and ore mines, fixed the number at 20,000, or about 60 per cent of those normally employed in this industry.

Blowing in of the Woodward No. 2 will bring to mind the number of blast furnaces in operation in the district, with the Republic Steel Coporation expected to add another to the list at an early date.

Eighteen open hearth furnaces were in operation producing steel ingots today, keeping the production of the district at 75 per cent of capacity.

THIS IS SILLY

Cannaan, Conn—A gander on the Krause farm refused to be outdone by the females of his species. Finding two geese setting, waiting for their eggs to hatch, the followed suit—taking his post on an empty coffee can.

Application for Membership

NATIONAL FEDERATION OF COLORED FARMERS (Inc.)

Vincennes Hotel, Chicago

As a farmer, I believe the time has arrived when the Colored Farmers should form a National Organization devoted to diversified production, grading, packing, shipping and marketing of farm products and to the purchase of needed farm supplies through co-operative methods, to the end that a more prosperous financial condition may result from their efforts as producers.
I hereby subscribe $5.00 for membership in the National Federation of Colored Farmers for a period of 12 months from date. Also $1.00 for an Annual Subscription to the Modern Farmer.

MRS. F. D. SMITH OF BETHEL UNIT WRITES

Tchula, Miss,
R. 1. Box 136,
Mr. Leon R. Harris,
June 7, 1933,

Hon. Editor:—I've intended to write a piece to be printed in The "Modern Farmer," the best paper I know of or have read. Entitled—Our Paper—A Mouth Piece and its work. I have not found words of praise good enough to exalt our "little" instructor, The Modern Farmer. It keeps us informed in the leading ways and walks of life; it tells us of the past, present, and future day. The part we ought to know and want to know. It helps the officers of all units of the N. F. C. F., to show the members and to teach them the value of organization. I am indeed glad that the very executive head of this N. F. C. F., reached this state, county, and section as early as he did. We have the happiest hearts to know that this much needed organization was brought to us just before the depression hit us hardest. I do believe in diversified farming, grading, packing and shipping of farm products cooperatively and to purchase farm needs cooperatively. Our Modern Farmer even outlines a program for our National Farmer's Day.

A Sunday, I especially enjoy. May our National President, Mr. J. P. Davis and good editor, and secretary, Leon R. Harris, live long and carry on this good and much-needed work; because the "New" day has come with the New Deal and Colored Farmers must march forward.

MRS. F. D. SMITH,
Chairman, Bethel Unit

BACK FARM BILL, IS ADVICE GIVEN BY STATE UNION

A warning to farmers to be on their guard against propaganda being widely disseminated by private handlers and processors of farm products against the Roosevelt administration farm program has been issued by the Illinois Agricultural association.

The only serious opposition to the new farm bill," said the association's statement, "is coming from the handlers and processors of farm products whose sole interest in the farmer is to keep him producing a large volume of produce, from every unit of which they may collect tolls and commissions.

"The Roosevelt farm program provides first that an orderly retreat in production of certain commodities may be initiated if necessary so as to remove burdensome surpluses and eventually to establish prices that will give the farmer the same purchasing power he had in the period from 1909 to 1914. This is what is meant by parity prices.

"The new farm bill provides further that the secretary of agriculture be empowered to levy an excise tax on the processing of the commodity benefited which will go to the farmers who retire land from production.

"The bill is flexible, and necessarily so, that the administration may apply different principles to different crops without the restrictions of previous legislation. It would give the secretary board powers to do everything and anything within the constitution to bring about a long overdue rise in commodity prices.

"The opposition to the measure by processors and other middlemen," said the association's statement, "is prompted purely from selfish motives. These people are not interested apparently in the farmer getting a better price for his products so long as they can collect the same commissions and percentages they have been accustomed to taking in the past. They are particularly opposed to the farmer reducing his production even though he produces at a loss for a market which has ceased to exist.

"Enemies of the farmers' best interests," continues the I. A. A., "are reading things into the bill that are not there. Their admonition to farmers to oppose the bill so as to preserve their independence has a hollow sound. Too much individualism among farmers is largely responsible for their present plight. It's time farmers worked together for their own welfare. The administration farm program points the way.

"Planned production, orderly marketing, reciprocal trade agreements with foreign countries, and other measures are all provided for in the new bill. That kind of program certainly is more promising than the one we have been following.

"The processors come with poor grace in opposing this legislaton on the ground that it will raise the price to the consumer when under present conditions farmers are receiving only 25 percent of the consumer's pork dollar and a smaller percentaage of the consumer's bread dollar. Let them first show their interest in the producer by offering something constructive to raise prices, and by doing something to reduce the tremendous spread between the price the farmer gets and the price the consumer pays."

BEES AND DROUTH

Decatur Review: A group vitally concerned with one of the minor creations of God is the beekeepers. One thing can be said for these enthusiasts: they do not bore laymen in telling about their hobbies. An account of the habits of bees is about the easiest thing to which one can listen.

We note from the report of the most recent meeting of the Macon County Beekeepers' association that hives are weak this spring due to stoppage of the honey flow last summer by heat and drouth. The summer was not particularly dry, though it may be that the blooms on some of the plants favored by bees were unfavorably affected. Bees that could stand the terrible drouth in 1930 should have been able to do well in the summer of 1932.

8 MILLION MORE HORSES, EXPERT'S IDEA TO BRING BETTER GRAIN PRICES

Urbana, Ill.,—That joke about the old gray mare isn't what it used to be.

It has assumed a serious complexion—involving the whole problem of farm prices.

The decline of the horse has continued to such an extent, according to studies made by C. W. Crawford, horse husbandry expert at the University of Illinois that his conclusion is this:

Restoration of the 8,500,000 horses which have disappeared off American farms in the last 17 years would do "more than anything else" to wipe out under-consumption of grains and bring back the 68-cent corn and 43-cent oats of 1915.

If there were 21,195,000 horses on United States farms—as there were in 1915—Crawford says:

"They would eat more oats than are now marketed and 85 per cent of the corn which was shipped out of producing counties in 1932."

Crawford discounts the idea that low grain prices are results of increased production.

"Quite the contrary," he contends. "We have been producing about the same amount of corn and oats in recent years as we did before the war."

INTERESTING NEWS AND NOTES

A letter submitted by the National Federation of Colored Farmers, Inc., through its secretary, Leon R. Harris, to Hon. George N. Peek adjustment administrator of the United States department of agriculture, has been widely published by the white and colored press of the country. Editorial comment has been very favorable. The letter offered three suggestions for the benefit of colored farmers: First, that not less than fifty per cent of cotton acreage reduced be included in the two states of Oklahoma and Texas, second: that any planter who asks for option on cotton on which the government has made loans be refused said option unless he is willing to agree that each tenant family on his plantation be given opportunity to provide for self-sustenance, third: that Negro tenants and lessees be given proper encouragement to remain on the farms and eventually become land and home owners.

There are 807 colored farmers in the state of Delaware, a decrease of 65 since 1920. There are 273 full owners, an increase of 18 for the past ten years. Total acreage owned is 13,781 and value of land and buildings is $804,240. There are many colored gardeners in Delaware.

Total value of by-products of American meat packing houses has been estimated at $350,000,000. From a 1,000 pound steer 550 pounds of meat and 450 pounds of by-products are obtained. From the beef carcass many articles are manufactured, including violin strings and tennis rackets from the intestines, glue from the hoofs, pipe mouthpieces and buttons from the bones, knife handles and combs from the horns, bristles for paint brushes from the back, and shoes, belts, bags and etc., from the hide after it has been tanned and made into leather.

Mississippi and South Carolina donates less to the American Red Cross than any states of the eastern area. More colored farmers of these states should join the organization.

The Hopewell home for Col. and Mrs. Chas. A. Lindbergh, from which their son was kidnapped and slain has been given to the public to become a children's welfare center. The object is "to provide for the welfare of children, including their education, training, hospitalization, or other allied purposes, without discrimination in regard to race or creed."

Beauty, the world's champion milk cow, is dead. The cow had given milk continuously for eighteen years and nine months. She belonged to N. J. Johnson, of Emmet county, Iowa.

The department of agriculture reports an increase of 3 per cent in this year's spring pig crop and an increase of 8 per cent in the number of sows to farrow this fall compared with 1932.

A brood mare can do nearly a full years work and also raise a foal. She should have light work and liberal feeding, or else a rest on pasture while suckling her foal. Weaning colts should be fed oats during the first winter to insure good growth.

Odorless garlic has been put on the market in New York. The cooks are happy. But who wants an odorless onion?

European women are reducing and the potato demand has so decreased in Belgium that farmers are planting other crops. American women are wiser and are eating more sweet potatoes.

Chicago has become the "peanut capitol" of the nation on account of the candy and nut processing factories. North Carolina and Virginia members of the N. F. C. F. have made inquiries recently relative to selling carlots of peanuts on the Chicago market.

Farmers who are using governmental seed and fertilizer loans this year are not required to purchase any particular brands or manufacture. Borrowers are free to use the proceeds of their loans for any needed supplies and should endeavor to get the best possible values for the money spent. Colored farmers, who have reported that certain merchants and dealers are attempting to compel them to trade at their stores, should realize that they do not have to do so.

The auction system for selling truck crops has been started in South Carolina.

A Chinese, Li Ching-Yun, died recently in the Province of Szechwan, at the age of 197 years.

Watermelon growers of Hoke county, North Carolina, are selling their melons according to grade this year. The variety and name of grower is labelled on each melon. The county has 575 acres of melons for commercial purposes.

It is reported that 30,000 acres of crops in the province of Saskatchewan, Canada, have been destroyed by grasshoppers.

NEW BROOM FOR PRESIDENT

Following are some of the main points of the farm bill in three sections covering direct agricultural relief, farm mortgage relief and inflation:

Authorizes President to increase Federal Reserve credit by a maximum of $3,000,000,000.

To cut gold dollar in half.

To accept $200,000,000 in silver at 50 cents an ounce during next six months for war debt payments.

To issue maximum of $3,000,000,000 Treasury notes with which to buy back Government obligations; secured not by gold but solely by credit of the United States.

To fix a ratio of gold to silver and to permit free coinage of silver at the stipulated ratio.

Authorizes President and Secretary of Agriculture to license producers and processors of staples, such as wheat, cotton and hogs and to limit the domestic market to domestic consumption demands, at fixed prices based on the 1909-1914 average.

Guarantee cost of production to farmers.

To cut production of agricultural crops to domestic needs by leasing marginal lands and withdrawing specified acreage.

To refinance farm mortgages at 4 1-2 per cent interest by federal bonds with only interest guaranteed.

WE ARE RICH AND BETTER

Los Angeles Times: It is often said that the depression is good for character, but few appreciate the fact that it is equally good for cows.

Among other worthless things the hard times have been thinning out are cows that do not produce the requisite amount of butter fat. They are being slaughtered and better bovines are being installed, literally.

Also orange trees that have been yielding small, sour fruit are being yanked out by the roots and better varieties substituted. The depression is putting the squeeze on the inefficient in many lines of life.

When we reach normalcy again, we shall have bigger and better oranges, richer milk and finer strains among animals and fruits in general. Already California dairymen have increased the butter fat rating by 2.2 pounds per cow in a group of 970 animals tested. These cows produced an average of 938 pounds of milk with an average butter fat content of 39.4 pounds Santa Ana, the southern California cow center, reports better herds.

What holds true in cattle, likely holds true in all kinds of live creatures and manufactured goods. With better grades in everything even in politicians and bankers things ought to go better.

We need a depression every now and then to squeeze out the water and wind from promotion and to scrape off the parasitical from our institutions in general. This is nature's way of disposing of the vicious and inefficient.

We are all richer and we thought we were poorer.

RADIO WAVE MAY BE USED TO SLAY PESTS ON CROPS

Several years ago the writer made some preliminary tests on small quantities of infested wheat with a view to determining if radio methods could be effectively used to exterminate the eggs and larval forms which may be concealed within the material, as well as the adult insects, says J. H. Davis in Scientific American.

Thirty and 5-meter waves were used, the former of low capacity and the latter of high capacity. The 30-meter low capacity waves were effective in exterminating adult insects in small quantities of wheat within a period of about ninety seconds, but the eggs later hatched out. With the 20 kilowatt, 6 meter waves, as exposure of six second was sufficient to exterminate eggs, larvae and adults.

The testing plant has been in operation for a year and many kinds of infested material have been successfully treated, including wheat, corn flowers and garden seeds, tobacco, spices, nuts, beans, peas, cocoa beans, packaged and bulk milled cereals, and so on.

Results of the writer's research work indicate definitely that weevils in all stages of their development, from eggs to adults, can be exterminated without injury to the germinating properties of grain, or appreciably affecting the moisture content, and without adversely affecting the food value. There are indications that the germinating properties of wheat and other seeds treated may be enhanced.

Worms, mites and other infestations of cocoa beans, spices, tobacco, nuts, packaged cereals, and so on, can be exterminated without injury to the products treated. Where the equipment is properly installed there are no adverse effects upon persons working or stationed in the vicinity of the apparatus.

Three-fourths of the nation's forest area is east of the Rockies.

SHE WASN'T TACTFUL

Detroit Free Press: Secretary Frances Perkins believes, it appears, that a "social revolution will take place if you put shoes on the people of the south." Evidently Miss Frances has more fixed "ideas" than common sense. Already she has brought from a former governor of Georgia, a half satirical, half angry assurance that people below the Mason and Dixon line do sometimes wear shoes, and from Senator Glass, a tart remark that when he was a boy, "we didn't care a thinker's dam for a boy who wore shoes, and he was regarded as a sissy."

We are afraid Miss Perkins isn't going to be much of a hit in Dixie. After all, the people of this country are not clinical subjects for social workers, and they don't really care to be managed, even by a lady in high position in Washington. If the secretary of labor remembers this, she may increase her general usefulness as a public official.

Elixcie—Castoria, Whaffor yo' goin' in dat beauty parlor?

Castoria—Big boy, Ah's goin' git me a puhmanent straight.

By lighting and heating a beehive by electricity in Europe recently the production of honey was increased seventeen pounds.

PRESIDENT EXHIBITS COURAGE IN ADDRESS

(New York World-Telegram)

President Roosevelt has great courage. Last night he resisted the temptation to boast of his achievements and to make big promises for the future. As for the remarkable record of the last two months, he simply recounted the facts and let them speak for themselves.

He even went to the extent of warning the country against over-confidence, saying:

"Industry has picked up, railroads are carrying more freight, farm prices are better, but I am not going to indulge in issuing proclamations of over-enthusiastic assurance. We cannot ballyhoo ourselves back to prosperity."

Here is the answer to those who are afraid that the president is losing his head about this inflation business. Unlike the cure-all inflationists, he is not having pipe dreams.

He said definitely that he would stop inflation at the point where debtors can pay back at prices they borrowed, that is an honest dollar.

He said definitely that gold is a good basis for currency, and that is why he "decided not to let any of the gold now in the country go out of it." With the nation that extreme inflation as such can bring prosperity, the president has no traffic.

Instead, he soberly turned to the bigger job yet to be done. A return to an honest dollar and to the type of prosperity we had before the crash is not enough. That kind of so-called prosperity was the cause of the depression. Hence the president's warning:

"I do not want the people to believe that because of unjustified optimism we can resume the ruinous practice of increasing our crop output and our factory output in the hope that a kind providence will find buyers at high prices. Such a course may bring us immediate and false prosperity, but it will be the kind of prosperity that will lead us into another tail spin."

As an alternative the president proposed national economic planning. Not a government dictatorship over industry, "but rather a partnership in planning and partnership to see that the plans are carried out."

From his address last night, as from his Thursday speech to the Chamber of Commerce of the United States, it is clear that the president considers one issue more important than any other in this depression, one reform more necessary than any other.

That is the need for the government to help industry to achieve a basis of order; permitting planned production, eliminating unfair competition by pirates and sweatshops, abolishing child labor, apportioning shorter hours and higher wages.

This goal has many names—sustained purchasing power, a mass market, justice for labor, redistribution of wealth—but whatever the name, it is the common goal of the economists and the wisest business leaders, who see that prosperity is not possible with low wages and concentration of wealth.

The president pledged a governmental message "to give to the industrial workers of the country a more fair wage return, prevent cut-throat competition and unduly long hours for labor, and at the same time to encourage each industry to prevent over-production."

Industry has proved that it cannot bring this reform working alone. For exemple, the president cited the cotton goods industry in which perhaps 90 per cent of the manufacturers would agree to eliminate starvation wages, long hours, child labor and over-production, but would be powerless to act because of the unfair competition of 10 per cent.

The president is going to smash that system, which once paraded under the title of rugged individualism but is now unmasked as chaos and national suicide.

Mr. Roosevelt's declaration of national economic planning follows:

"Government ought to have the right, and will have the right, after surveying and planning for an industry, to prevent, with assistance of the overwhelming majority of that industry, unfair practice and to enforce this agreement by the authority of government.

"The so-called anti trust laws were intended to prevent the creation of monopolies and to forbid unreasonable profits to those monopolies. That purpose of the anti-trust laws must be continued, but these laws were never intended to encourage the kind of unfair competition that results in long hours, starvation wages and over- production."

We shall not be as modest as the president regarding his program. We believe it is safe to predict not only a return to prosperity, but to a better prosperity, if the Roosevelt foreign policy is accepted abroad and if at home the president receives the full cooperation of congress, industry and labor in his pledge for government enforcement of economic planning.

OPPORTUNITY

Christian Science Monitor: Men do not need more opportunities so much as they need to learn how to take advantage of present opportunities. An opportunity neglected constitutes a rebuke. The human so-called mind often seems so blind that it does not perceive a genuine opportunity. This was illustrated in the case of Hagar, who, with her child, was thirsting for drink in the wilderness. To Hagar's material thought death seemed inevitable. But when an angel, God's message, corrected her thinking by uplifting her vision, Hagar found her need supplied. This is but one illustration of how the claim of evil, if heeded, would blind mortals to their God-bestowed opportunities.

What is an opportunity? It sometimes seems as though this question needed specific definition. It is defined in part in a dictionary as "a time or occasion attended with propitious or favoring circumstances." Have we ever found ourselves in a position where it was impossible to do good—where there was no occasion to go good, for ourselves or others, in the service of God, Surely the opportunity for service is ever available, and is the spirit and essence of all employment. Our main trouble has been in measuring opportunity in terms of self-profit, forgetting that our own need can really be supplied only as we bless others. True service is designed to benefit and bless our fellowmen. If this sense of opportunity were grasped and utilized, unemployment would be as impossible as an amalgamation of light and darkness.

We always have one opportunity of employment that we seem prone to overlook. It is the opportunity of improving our thinking. When we realize the connection between our thinking and our enivronment, and discern the true meaning of cause and effect, we shall vigilantly increate our efforts to be faithful to truth by thinking constructive and spiritual thoughts.

From 25 to 35 good healthy leaves are required on a tree to build a good-sized apple.

FARM POPULATION GROWS; MOVEMENT TO CITIES DROPS

For better or worse, between one and two million Americans have quit cities and villages during the last three years, leaving the shadow of the bread line for the seeming plenty of our farms, as the bureau of census defines "farms," according to Arthur Pond, writing in the Atlantic Monthly.

As many more have moved from industrial centers, not to farm, but to small semirural holdings on the outskirts of cities, in the hope of establishing a two-way grip on life by growing part of their food while continuing to work for wages as they can find work.

These folk have left cities and towns quietly, usually on their own resources, but in many instances with the encouragement and even the help of employers, communities, states and of the federal government itself. Their initiative and daring have received little recognition, yet this migration, insistently increasing while the counter movement from the farm to the city has slackened, has brought the once-declining farm population to 32,242,000 as of Jan. 1, 1933.

This is the peak for farm population in our history, the previous high being 32,076,960 in 1910. The latest estimate of the department of agriculture, on April 20, 1933, indicates that the farm population gained more than a million in 1932 alone, but part of this gain is represented by surplus of farm births over deaths. With this item eliminated, the net farm gain from migrations to and from town was 553,000 for the year.

Practically all the habitable farms among the 200,000 abandoned during the five years between 1925 and 1930 have been or are being reoccupied, in many cases by experienched farmers returning from city life.

NEGRO PRINCIPALS TO HOLD CONFERENCE HERE

The annual State-wide principals' conference under the driection of W. A. Turner, State agent supervising high schools for the State Department of Education, will bring together all the Negro principals and high schools teachers of the State in the two-day program to be held Tuesday and Wednesday at the A. and I. State College.

Among the outstanding speakers to address the group on the first day are Dr. Joseph Roemer, professor of secondary education and director of instruction in the Junior College Demonstration School, George Peabody College for Teachers; Fred McCuistion, executive agent for Southern Association of Colleges and Secondary Schools, Nashville; Dr. Charles W. Knudsen, professor of secondary education, George Peabody College for Teachers, and Dr. Walter D. Cocking. State Commissioner of Education, Nashville. President W. J. Hale of the A. and I. College will give the welcome address.

Addresses by the principals of the various high schools of the State will feature the second day's session. The body will attend the special seminary which has been conducted the summer for principals, supervisors, and teachers under the direction of R. E. Clay, State Rosenwald agent.

A NEW METHOD FOR SHELL TREATING EGGS

College Park, Md.—According to a market news letter from the state department of markets and the University extension service, treating the shells of eggs by oil is not a new process.

"We are told that Benjamin Franklin supplied eggs which had been treated with oil to vessels on their journey to Europe which took two or three months.

"Shell treatment of eggs consists of coating the shell of the egg with a thin film of clear, odorless, and flavorless mineral oil, and allowing this oil to soak down into the pores of the shell," says the letter.

Ohio State Journal: It would be great if President Roosevelt could put the unemployed to work removing mortages from farms.

OUT IN THE OPEN

Louisville Courier-Journal: One of the best signs of the times that the depression no longer is referred to in a roundabout way as if it were sinful to entertain the idea of its existence, and is mentioned casually as a current, passing event.

GREAT AMERICAN HOME

Ohio State Journal: While there may not be a chicken in every pot, there is a jigsaw puzzle on every table.

Farm wages in Alabama, averaged 45 cents a day, or $8 a month, with board on January 1, 1933, says F. W. Gist, federal and state agricultural statistician.

PINEAPPLES AID IN PREVENTING GOITRE, SCIENTISTS ASSERT

Pineapples are being drafted by the armies of science to fight goiter, which now afflicts 50 per cent of the school children in some parts of the United States, according to Dr. Earl M. Bilger of the University of Hawaii in Honolulu.

"Pineapples contain more iodine than any other fruit or vegetable grown in the United States of which we have record," said Bilger. "Iodine is important in the diet because it is a constituent of a secretion called thyroxn, the lack of which causes goiter and other ailments. In certain areas in Canada practically 100 per cent of the women and children have goiter.

"On a dry basis Hawaiian pineapples contain approximately three times as much iodine as peaches grown in South Carolina, where the iodine content of the air and soil is considered high. In all instances where we have comparable information, Hawaiian vegetables outrank Pacific coast vegetables in iodine content.

"Hawaiian string beans have 1426 parts of iodine for every billion parts of dry matter, whereas California string beans have only eight. Island carrots include 548 parts of iodine as compared with 2.3 parts in Oregon carrots and 8:5 parts in California carrots."

TO OUST DEPRESSION

(Continued from Page 1).

that since March 1 the families there have put up 700 jars of fruits and vegetables. Their total will be greatly increased at the end of the season. Maggie Barnes, an energetic worker in this community, canned enough vegetables and fruits for her family composed of seven members, and then she turned around and canned beef and vegetables for her neighbors, including two white families. Such cooperation as this is of significant value.

Hard times and the absence of things to work with do not seem to atrophy these colored people; on the contrary, they are seemingly stimulated by such a situation. The 4-H club girls at Logansport-70 of them—each planted one row of okra and one row of tomatoes for the purpose of turning the vegetables over to the club to be canned and sold so as to raise money to equip a canning kitchen in their community. This kitchen will be used by the adults as well as the juveniles.

At Pelican, Henry Scott and his wife put on an entertainment called the old folks' concert, which had as its main feature the wearing of old-fashioned clothes. The school house was crowded with both whites and colored and when all expenses were deducted they had $?? to add to their fund for the purchase of canning equipment.

But the canning story is just part of the big program that these good citizens have under way. Ophelia Anderson over in Red River parish, has seven Jersey cows from which she sells butter and milk to her neighbors. Her income is about $17 a month which does not include the home consumption of the dairy products. She has her own pastures and her feed bill is not very costly, but she is in need of better equipment. Practically every colored demonstration member has one cow and so Stazzie Hudson is urging the use of more milk in the daily diet and an improvement in dairy sanitation.

An effort is being made by the agent to have a small poultry flock on every yard in the parish to take care of individual family needs. This the agent is striving to place on the same basis as the gardening program where she has had a 100 per cent response from her club members. She boasts that there is not a family without a home garden.

And then there is the aesthetic side. The agent is appealing to her people to make their homes more attractive and livable by planting flowers and shrubs that may be gathered from the woods. One demonstrator from Mansfield gave to the agent more than one thousand plants of larkspur and petunia and then an exchange was formulated at which neighbors swapped flowers.

With such practices as the demonstration program fosters it is not surprising that Stazzie Hudson reports a small percentage of pellagra among her people. It has almost become an unheard of thing among the children of demostration club members. Her aim now is to reach more of the people in the parish, she says.

This program is going a long way toward the solution of the great economic problem confronting our colored neighbors. They are becoming better citizens; they are contributing something else besides their delightful songs and, how much more lustily and harmoniously will their hallelujahs be sung when they are well fed and well cared for.

—Shreveport Journal.

NEW DRYING MACHINE

(Continued from page One)

at the gin is a government apparatus, Mr. Newton said. This machine costs $2,200 for installation and there is a continued expense in operating, Mr. Newton declared. Expense of this latter is passed on by the ginner to the farmer in instances running 5 cents per 100 pounds, it is estimated.

GOOD GARDENING

By Dan Halliday

How can one raise asters successfully? This is a perennial question, and well it may be for, unfortunately, asters are one of the most difficult annuals to raise successfully, although they are so lovely that they will repay any extra trouble. One thing is absolutely necessary in order to have good, healthy plants; they must be raised in a different place each year. If they are raised in the same soil successively, it becomes infected, and the plants die. If you have only one spot for a garden and want to raise asters it will be necessary either to bring in fresh soil every year, or else you will have to grow them on alternate years. Asters like loose, rich soil, Any garden soil that has been under cultivation for some time should be suitable, but a hard clay soil should be mixed with humus and hard coal ashes, or slag. Aster plants should be started early in a cold frame in the house. After hardening them off, transplant them to the garden after the soil becomes well warmed up, and danger from frost is past. Tobacco dust or shredded tobacco used as a mulch around the roots will keep them from being attacked by root lice and a preventive spraying with arsenate of lead or Paris green will help to keep away any chewing insects. See that the plants are well cultivated and they should repay for this care with plentiful bloom.

COTTON COMMENTS

New - York, July 10—(AP)—While somewhat conflicting operations were expressed, most of the commission house comment here today favored the constructive side of the market.

Extracts from letters follow:

E. J. Schwabach and Company: "The bullish features including dollar depreciation to date, seem to be losing much of their force, now that prices are within striking distance of 1926 levels, and we feel that profits should be taken on long commitments and that hedge sales at present prices and on any further advances are advisable."

Jenks, Gwynne and Co.; "Developments at Washington will continue of major importance and with the critical period of the crop just ahead we believe a further good advance will be recorded."

Orvis Brothers and Co.: "With the administration apparently committed to a policy of advancing commodity prices still further, it would seem advisable to take advantage of periods of weakness to make purchases."

Mayden, Stone and Co.: "Whether bullish views of prospective distribution would prove strong enough to sustain prices should official returns from the acreage curtailment campaign be disappointing may be questioned. Pending developments in this connection think caution advisable in following advances."

Post and Flagg: "It has been expected that some sort of announcement be forthcoming from the department of agriculture over the week-end concerning results thus far had in the acreage reduction campaign, and the trade will await such announcement with considerable anxiety. Forecasts thus far have been mixed, but newspaper articles coming from Washington today are somewhat more encouraging than those at the beginning of the week."

Fenner, Beane and Ungerleider.: "These (acreage) figures were perhaps somewhat larger than generally expected though, in the light of the acreage reduction campaign now in progress, we consider them as of little market import. We therefore continue to advise accumulation of contracts whenever the market, for any reason, is under pressure."

ADVISES TREATMENT FOR TOMATO SEED

Fayetteville, Ark.,—At least three serious diseases of the tomato are carried on tomato seed and attack the young seedlings as they emerge from the seed, according to Dr. V. H. Young of the Arkansas College of Agriculture. For this reason, he says, it is good economy to treat all tomato seed before planting. The solution used is mercuric chloride (corrosive sublimate) in a one to 1,000 solution. Only glass, wooden or earthenware vessels should be used as the solution is corrosive to metals. It is also extremely poisonous and must be kept away from children and animals, states Dr. Young.

"The seed is disinfected by placing it in a cheesecloth bag and immersing it in the mercuric chloride solution for seven or eight minutes. The bag should be pressed and stirred with a paddle to see that all seeds are wetted by the solution. The bag is then removed and the seed thoroughly rinsed in several changes of pure water. After the seed is thoroughly rinsed, spread it out in a thin layer in the shade to dry."

SPOTLIGHT IS HELD BY COTTON MARKET

New York, July 10, (AP)—The cotton market held the speculative spotlight today by soaring $2.50 a bale in the active contracts.

Gossip in trading quarters attributed the rise to a change in sentiment on the acreage curtailment situation.

The official report on acreage published at the close of the market on Saturday left traders a bit disappointed because the figures were unexpectedly high, but a later announcement viewing the acreage retirement plan as making substantial progress and unofficial forecasts that it would achieve the results sought by the Government gave the market strong support. An early rise of about $1 a bale, was later extended another $1.50 or so.

The market derived little encouragement from the stock market which was rather soggy in tone, but was bullishly influenced by the strength in grains.

At the high levels the market was back to or slightly above the year's peak prices touched early last week.

THE MODERN FARMER

Vol. VI. NASHVILLE, TENN., AUGUST 15, 1933. No. 4.

MEMPHIS TO ENTERTAIN N.F.C.F. ANNUAL CONVENTION

CROP EXPERT'S PREDICTION

Smaller Wheat Harvest Seen by B. W. Snow

Intense heat and drought during July cut down the prospective grain crops of the United States around 25,000,000 bushels, as indicated by the estimates of leading Chicago statisticians given to the trade yesterday. This reduction was shown a comparison with the private returns of a month ago, which were somewhat above the government figures.

Aggregate wheat and oats crops were the smallest since 1893, with corn smallest, with one exception, since 1903. The wheat crop of 480,000,000 bushels was about equal to the actual bread requirement of the country, with no allowance made for seed, feed or other use. The average disappearance for all purposes during the last five years, as given by B. W. Snow, was 682,000,000 bushels.

Grasshopper Plague In West Canada Keeps Poisoning Army Busy

(Chicago Tribune Press Service)

Winnipeg,—Section after section of growing grain crops in western Canada are being destroyed. A sudden appearance of millions of grasshoppers advancing steadily has turned potentialy fine crops into waste acreage.

So severe are the pests that farmers state that if they are not halted within a day or two there will be no crops this fall in southern areas of the provinces.

An impromptu poison plant, established in Limerick, Sask., has been running 24 hours a day, keeping six men busy mixing poison.

Wagons, trucks, buggies —even bull teams and every other conveyance —line up outside the poison plant day and night. Many have to wait as long as ten hours for their share, and of late difficulty has been experienced owing to a shortage of bran. Two large trucks operated from the plant constantly.

Intensification of the poison campaign of the Alberta department of agriculture was announced on 1,500,000 acres and these became serious affected by the grasshopper pleague now at its peak.

The Hon. George Hoadley, Alberta minister of agriculture, announced 400 tons bait to destroy the hoppers was being distributed daily from 60 stations in the southern section of the province with favorable results.

Total quanities of material used to date in one of the heaviest campaigns in the history of Alberta has been 2,600,000 pounds of bran, 3,600,000 pounds of sawdust, 15,000 gallons of arsenite and 16,000 gallons of molasses.

An area producing between 25,000,000 and 50,000,000 bushels of grain each year is affected to more or less degree.

15 MILLION BALES PROMISED

Cotton Crop Figures Compiled by States

A cotton crop of 15 million bales is estimated by the Clement, Curtis-Murray report. Condition on July 25 was 72.5 normal, compared with a ten year average of 68.8 per cent. Production forecast on the basis of acreage planted is 15 million bales, an improvement equal to about 265,000 bales the last month. Last year's crop was 13,200,000 bales, and average for the preceding years was 14,657,000 bales. Production and condition by states, with the last three ciphers omitted, follows:

	Cond.	Forecast bales	Crop 1932
North Carolina	78	795	660
South Carolina	78	930	716
Georgia	77	1,237	854
Alabama	77	1,324	947
Mississippi	70	1,598	1,180
Louisiana	62	682	611
Texas	72	4,711	4,500
Oklahoma	72	1,246	1,084
Arkansas	66	1,322	1,327
Missouri	64	205	307
Tennessee	76	497	480
Other states	86	453	336
All U. S.	72.5	15,000	13,002

Pace, Mississippi Unit Makes Donation

In keeping with the request of the National Federation of Colored Farmers, the Pace, Miss., Unit of which Mr. N. A. Ward is the secretary, sent a donation to the publication to assist in the circulation of their official organ. When Mr. Ward wrote the letter he said the donation was not as large as they had expected it, because of inclement weather and present economic conditions caused by the depression.

They pledged their support, and promised to use their influence in seeing that every farmer gets on the mailing list and subscription books.

Sweet Corn Higher

Washington, Aug. 21— (AP)— The farm administration announced today that sweet corn canners in 15 states will take concerted action for the revision of contracts to pay higher prices to the growers.

In most instances the contracts were made last spring when prices were very low.

Farmers have complained they were not getting the benefit of advances which have taken place since and were having to pay higher prices for everything they bought.

The farm administration said contracts would be increased on an average more than 25 per cent raising the purchasing power of sweet corn growers by approximately $750,000. A sliding scale of prosposed increases was adopted because of varying conditions in the different producing areas.

WILL HELP FARMERS' LANDS

Millions to be Spent For Erosion Curb

(Chicago Tribune Press Service)

Washington, D. C.,— (Special).— Uncle Sam, spending many millions of taxpayers' dollars to take cotton and wheat land out of production, today shelled out $5,000,000 to put other lands into production.

The sum was included in a list of projects announced by Secretary of the Interior Ickes, under the public works program. A total of $19,851, 648 in easy money was allotted under today's orders.

To Lessen Soil Erosion

The $5,000,000 will be spent in efforts to control soil erosion. Mr. Ickes announced that the department of agriculture, the same agency which is levying taxes by the hundreds of millions for reduction of wheat and cotton crops, will supply engineers to assist land owners in counteracting soil erosion. This will be done by terracing the land, it was stated, with the government supplying the technical direction and terracing equipment, and the land owners the power and labor.

The department of agriculture has projected a one year program for the terracing of approximately 4,752000 acres of land. The department engineers stated that 17,000,000 acres of formerly cultivated land has been destroyed by erosion; that erosion removes 126 billion ponnds of plant food material from fields and pastures every year, and that the annual loss to farmers is 200 million dollars.

Methods of Combatting Caterpillars On Walnut and Fruit Trees— Kind of Soil for Columbine — Keeping Myrtle Bush Through Winter — Worms on Grape Vines.

At this season of the year caterpillars are apt to begin to appear in great numbers on walnut trees. If we look out for them and find them when they first begin to work while they are still very small, and spray the clusters of leaves where they are feeding with a little arsenate of lead, we will soon end the matter for the season. If we pay no attention to them, in the matter of five or six days after they stop feeding these caterpillars will be worms from one to two inches long covered with white wool-like hair and may consume almost all of the leaves on a tree. There will be great cries about what to do about this later on when the damage is done. Now is the time to prevent the thing by the use of a little timely spray. Tent caterpillars and web worms will be appearing in frult trees and a few other varieties at any time now in large numbers. These caterpillars do

FARM PROFITS DISCUSSED

John Hertz Says It's A Key to Revival

(Chicago Tribune)

By Philip Hampson

America is on the road to recovery a recovery that's real because it is based on an enhancement in values of fundamentals. The purchasing power of the producers in our country— the farmers who grow wheat in the west, corn in the middle west or cotton and tobacco in the south— is the most important factor making for prosperity.

This is the view of one of the leading financial figures in Chicago, and who occasionally is found in the role of farmer philosopher— John Hertz.

Mr. Hertz was interviewed yesterday in the clubhouse at the Arlington race track. Tanned by the sun and of robust figure, Mr. Hertz has the appearance of one who spends a large part of his time on the soil. As he discussed the prospects of the nation, he looked across the track to the rich fields just beyond.

Sees Dependence on Farmer

"The wealth of the country comes from the dirt." he remarked. "When the farmer is able to make a profit on what he grows or raises, the rest of us prosper. The farmer is now able to raise his products at a profit.

"Every since President Roosevelt went into office things have been better in this country. His plan for farm-relief was bound to help the farmer. And industry appears certain to be helped by the President's recovery plans.

"Some days ago I told a friend who was somewhat pessimistic about conditions that I would make him a written guarantee that a month's time would see prices sharply up. Well, they're headed up all right.

"I am by nature a conservative,

FARMERS CALLED TO ATTEND 1933 SESSION

More Prizes Listed Than Ever, Prominent Speakers Programmed

Chicago, Ill. — The Executive Committee of the National Federation of colored Farmers, Inc., announced today, through its secretary, Leon R. Harris, that the 1933 convention of the organzation will be held in Memphis, Tenn. The exact date was not given but will probably be during the last week of October.

Relative to the choice of Memphis for this year's meeting, Mr. Harris issued the following statement:

"The Executive Committee of the N. F. C. F. believes that in choosing Memphis it has acted in the interest of a vast majority of members and delegates. This city is centrally located,— transportation facilities are excellent, — and the local committee and citizens have assured us that we will be royal entertained. We regret the necessity of having to decline invitations received from Little Rock, Ark., Houston, Tex., Chicago and Greensboro, N. C."

Prizes Listed

Aproximately fifteen hundred dollars worth of prizes will be distributed. Many of these prizes will be donated by leading manu-

From Far Away Republic of Chile

Farmer From Down In South America Sends Communication To This Newspaper.

To the Readers of The Modern Farmer:— We submit this communication to the farmers who make up a Federation, who are supporting its policy and who believe in its principles, merely to show that the influence and reputation of this publication is not confined to any particular state or country.

The Republic of Chile is down in South America. It is known for its stockraising, agriculture, mining and other industries. This letter comes from Mr. Faure Petit, Valparaiso, Chile, South America. It says:

"To The Modern Farmer:— I am a Chilian Seed Dealer and Grower of Chilian native seeds, and I wish to advertise some items of interest to American farmers, especially adapted to the climate of your state.

"Enclosed please find copy of advertisement for which please run in your publication for two times on one double columnar inch. If you let me have your bill I will make remittance by return mail.

"Also please send rates for advertisement, as there are in Chile and Peru many English-speaking farmers who would be interested in your paper, and I shall be glad to act as your subscription agent.

Yours truly,
Faure Petit,
Republic Seed Store,
Valapraiso Chile, S. A."

GARDEN TOPICS

(Continued from Page 1)

a great deal of damage if not destroyed promptly.

Two methods of combatting these worms are: one, by burning the web and caterpillars with a torch as soon as they appear the second is by thoroughly spraying the leaves adjacent to the web so that as the caterpillars extend their web over the new leaves they will eat the poison. The web is so thick that is acts as a viel to screen the caterpillars from sprays, but as fast as the leaves inside the web are consumed hunger forces the creatures to extend their work to leaves that have been poisoned. The yellow billed cuckoo— the bird that is commonly called the rain crow— is a great friend because it prefers these wooly caterpillars to any other food and will eat an unbelievably large number at a single meal.

We wish to emphasize again the fact that any insect that feeds on leaves, actually swallowing the leaf material, is easily destroyed by spraying that material with arsenate of lead or some similar poison. Arsenate of lead or its counterpart arsenate of lime are cheap. While there are various strengths of these poisons on the market the package in which they are purchased will always give this information on it. One doesn't need an expensive spray with which to apply this poison. Fifty or 75 cents will be what it will cost for a spray that will hold a pint or more of material that will do the work perfectly. Of course this would not be satisfactry for spraying large trees or for orchard work but it is all that the ordinary person needs to fight insects in his garden and on his lawn. Such a spray gun in also effective in applying any of the remedies for mildew, rust, and similar fungus diseases, but we would remember always to thoroughly cleanse the spray gun washing it out most carefully with water when through spraying. Otherwise it will become clogged by the drying of the spray material and will be worthless. Such a spray gun is even effective in fighting red spider on evergreens often being more effective even than a larger spray gun, for the simple fact that it can be pushed up into the inside of the trees and every part can be reached easily.

Mrs. C. A. R., Fayetteville, wishes to know the best soil for columbine. She has had lovely plants but for the past month they have turned brown or black and have died —some of them rotting off at the top of the ground. They show no signs of new growth but are absolutely dead. She asks if it is a condition of the soil or due to disease. Columbine is a wild flower that has only been partly domesticated as yet. They will grow in almost any kind of soil that contains plenty of leaf mold or decayed leaves. They are not a longlived plant. Most vines live only three or four years, and they are subject to the ravages of dry rot which affects them just where they grow out of the ground. The best thing to do is to grow new seedings every year or two and work abundance of humus into your soil so that each year it is more adapted to this plant. If you would get surface soil from the woods and fill it into your bed five or six inches deep you will have very little trouble in keeping columbine five or six years.

Mrs. R. G. F., Nashville, says 'Please tell me through your column in THE BANNER, how to keep a crepe myrtle bush from killing down every winter. I have one that killed to the ground every winter, and though it grows well each summer, it never gets large enough or strong enough to go through the winter. Perhaps there is some sort of protection that Ioc uold give it. Also please tell me when is the best time to sow crimson clover, to be turned under next spring." Crimson is best sown the first half of August but if there is enough moisture in the soil to bring the seed up it may be sown at any time until the middle or September. We are just about on the borderline of hardiness for crepe myrtle. Some plants are hardier than others and you may be unfortunate enough to have an unusually tender variety. However, if you will withhold water from this just as much as possible after the latter part of September and if you will see to it that it is not fertilized from the time you read this article or until fall, then if you will mulch the soil about the roots with two or three inches of leaves or similar material about Christmas, then your plant will go through the winter if there is any chance of its ever doing so. Crepe myrtle comes in leaf very late in the spring and often the tops are cut back under the impression that they are dead when they would have come out all right if allowed two or three weeks' time. It is almost impossible to tell from the looks of the wood whether it is dead or alive in the spring.

E. M. W. wishes to know why his grape vine leaves— predominately in the shade—are reduced to lacework. He asks the cause and the remedy. On close examination you will find a creature that looks similar to a caterpiller is doing this work. It feeds only on the underside of the leaf and eats the green part of the leaf without destroying the veins. Spray with arsenate of lead making sure that the spray goes on the underside of the leaf.

FARMERS CALLED

(Continued from Page One)

facturers and corporations. The tentative list announced includes Best quilt,— a sewing machine,— best sample cotton,— men's suit or ladies dress,— best turnips and peanuts,—cartons of washing powder,— best corn,— cases of soap,—best wheat and oats,— set of dishes,— best loaf of bread and home-made cake,—set of aluminum cooking ware,—best home cured ham,— set of silver ware, — best display canned fruit and vegetables,— fruit jars, assorted sizes,— best peck sweet potatoes,—barrell of flour,—best ladies dress, 1 bolt apron checks,— best man's shirt, one bolt fruit-of-the-loom bleaching,— Sewing Club having best exhibition,— one bolt bleaching,— best display children's ware,— ladies dress pattern— member securing paid up membership,— pair registered pigs,— secretary sending in most prompt and best reports,— one Aladdin lamp,— member securing most subscriptions to Modern Farmer,— one pen purebread chickens, chairman of most progressive Unit, —one cultivator— best gallon cane syrup,— five dollars in cash, —best gallon sorghum, — five dollars in cash. Valuable prizes will be given for best stalk sugar cane,— best peck field peas, — and best sample hay. Numerous smaller prizes will also be distributed.

Perishable exhibits will be kept in good condition. No member will be eligible for prize who has not paid his yearly dues.

Prominent Speakers Invited

Governors of twenty-one states have been requested to commission out-standing farmers and leaders of our group to attend as their representatives. In addition, some of the prominent speakers invited are Dr. Henry Allen Boyd, of Nashville, secretary of the National Baptist Sunday School Congress, president of the Citizens Saving Bank and noted leader of our group,— Dr. J. C. Austin, of Chicago,— Madame Annie E. Malone, president of Poro College, —Hon. Oscar DePriest, —only colored representative in Congress,— representative from the Ill. Central R. R. Agricultural Department, one from the Agricultural Department of Tennessee, and a representative of the U. S. Agricultural Department.

A unique feature of the Convention will be a banquet, given the first day in honor of all visiting ministers. The public banquet will be held the last night of the session.

FARM PROFITS

(Continued from Page 1)

but what this country needed was something a bit radical. We needed something that would start us moving. President Roosevelt has given us the impetus with his leadership.

"Most depressions in the past have been ended by some great event— a war, a famine, or a catastrophe. Now we have mother nature coming along with a drought to assist the President's farm plans.

Finds Optimism Prevails

"It has been marvelous the way things have gone under Roosevelt. He has changed the psychology of every one. The old feeling of pessimism has been swept away —every one is now willing to try again.

"You couldn't expect this country to enjoy prosperity when 20 per cent of its buying power was swept away. That's what happened when the farmers were unable to produce at a profit. Now all that is changed. Land is increasing in value. Farms near mine have gone up. Farms in other parts of the country have increased in value which could mean that a holder of mortage on property isn't going to push the farmer as much as he did formerly. The mortage holder knows that the farmer will be able to produce at a profit a year hence if his crops fail from weather conditions now. This helps the life insurance companies and the banks. It makes for confidence all around.

Cites Improving Employment

"We can see it. It is reported that people are going back to work at the rate of about 2,000,000 a month, and we hope that by next winter there'll only he four of five million idle. The automobile business is helping the steel and rubber industries. And all three are helping chemicals. We can't make anything more without chemicals and that's the reason we are seeing great activity among producers of these commodies."

Mr. Hertz wanted it made plain that he is not attempting to tell any one about his business, that he was just describing conditions as he saw them— his point of view is that of a farmer.

"If you don't think things are better, how about this?" he concluded. "We have just elected three new members to the Post and Paddock club here, and each membership cost $10,000."

Five Scotland Neck Citizens Drowned In Chowan River

Ahoskie, N. C.— (CNS) — by the over turning of a boat in the Chowan River near here on August 16, five persons all resident of Scotland Nock were drowned. There were six in a small row-boat when it capsized. Reginald Ethengane clung to the boat and was rescued

Those drowned were: Grant Smith, 45; Topsy Scott, 25: Susie Randolph, 14, Evelyn Johnson, 15 and Lillian Johnson, 13. The bodies of Grant Smith and Susie Randolph were recovered.

Negro Spirituals Sung In London, England For Charity

New York City—(CNS)— The lyric voice of an American society leader of London, singing old Georgia Negro spirituals, has been "lent" to the League of Mercy, an English charity in which the Prince of Wales is interested.

Mrs. John Ormond Lawson-Johnston, once a great favorite in Washington society, is recording several old songs of the Southland for phonograph records which are to be sold for the benefit of the league.

This charity was founded by King Edward VII. to raise funds for British hospitals. The Prince of Wales, a friend of the Lawson-Johnstons, is the grand president.

S. W. GREEN AGAIN HEADS PYTHIANS OF NATION

Dr. E. E. Underwood and Other Officers Re-elected at Supreme Lodge

Chicago, Aug.—(By the Associated Negro Press)—The Supreme Lodge of the Knights of Pythias moved quietly into the World's Fair city Tuesday and opened its 27th Biennial session at its magnificent building, the National Pythian Temple, and closed as quietly Thursday evening. All officers were unanimously re-elected. The closing night of the convention was climaxed with a brilliant military ball at the 8th Infantry Armory building. It was indeed a "Century of Progress" for the American Negro.

The Pythian Temple Commission met Monday to insure the preparations for housing the meet of the progressive fraternity. Tuesday morning the majestic building was gaily decorated with flags and bunting. The very building itself was inspiring. It represented a racial achievement.

The business sessions of the order began Tuesday morning and continued until Thursday. At the opening of the conference Hon. S. W. Green, supreme chancellor, presided.

The bi-ennial report of the secretary of the endowment department read in part for the fiscal year which ended June 30, 1933:

"Like every business enterprise in this country, this Department of the Order has felt very keenly the heavy hand of the nation-wide depression.

"Many members have fallen out of the Order, not from lack of love and interest, but because they could not carry on. Members have died in this time of depression as they did in days of prosperity.

"In the face of these facts the Endowment department has striven earnestly to maintain its integrity, protect its members and justify their continued confidence."

The total credits for the Endowment department are $168,795.40. Total death claims filed aggregated a sum of $10,090.

The names of the officers elected by a unanimous vote and installed were: Hon. S. W. Green, supreme chancellor, La.; Dr. C. B. Wickham of Oklahoma, supreme vice chancellor; the Rev. J. H. Nabrit of Ga., supreme prelate; Dr. E. Underwood of Ky., keeper of the seal; T. G. Nutter of W. Va., supreme master of Exchequer; J. Allen Reese of Calif., Supreme Lecturer; George A. Watty of Md., Past Supreme Chancellor; Dr. W. O. Taylor of Mass., Supreme Master at Arms; Dr. C. P. McClendon of N. Y., supreme medical registrar; S. A. T. Watkins of Illinois, supreme attorney; Robert R. Jackson, major general of the Uniform Rank department; J. E. Smith of Texas, supreme inner guard; H. A. White of Iowa, Outer Guard; F. B. Smith of La., assistant supreme keeper of records.

The members of the commission elected for the Pythian Temple and the $400,000 Sanitarium in Hot Springs, Ark., are Lee Crawford of N. Y.; W. H. Randolph of Miss., J. R. Jefferson of W. Va., S. D. McGill of Fla., H. M. St. Clair, Md., W. H. Porter of Indiana. Edward D Green of Illinois is secretary of that body.

The members of the finance committee elected were: Robt. Zeno of New York and W. F. Cozart of N. J.

OFFICERS OF NEGRO INDUSTRIAL LEAGUE TO ADDRESS CONFERENCES

Washington—(CNS)—In order to facilitate the cooperation of all the Negro organizations in the fight for recognition of Negroes under the National Recovery Administration, John P. Davis, Executive Secretary of the Negro Industrial League, and Dr. Robert C. Weaver, Director of Research of the organization, left the city last week to attend the Elks Convention and the meeting of the Negro Business League. Mr. Davis went to the Elks' Convention at Indianapolis, where he will discuss the position of Negro workers and business men under the President's program for Recovery. Plans for the future cooperation of the Elks with the other fraternal and church bodies belonging to the joint committee of National Recovery will be perfected at the convention. Dr. Weaver is at Durham to the meeting of the National Business League. He will discuss the general problems of the Negro under the National Recovery Program, and the particular problems that face the Negro business man under the codes of fair competition. The program for joint action under the committee for this purpose will also be perfected at Durham.

These activities of the executives of the Negro Industrial League are a part of the League's program for the maintenance of a united front in the fight for the Negroes' equal treatment in all phases of recovery. Already a joint committee of National Recovery has been established with its office at Washington. The committee will continue the fight for the Negro workers and business men initiated at the capital by the Negro Industrial League in July.

Leaders in all phases of Negro life have expressed their conviction of the fact that it is imperative at this time for all Negro organizations to present a united front in this critical battle. It was out of such an attitude that the Committee on National Recovery grew.

Committee to See Miss Perkins, Secretary of Labor

Dr. George E. Haynes of the Federal Council of Churches of Christ of America, chairman of the committee, has announced that there will be a meeting of the Committee on National Recovery in Washington on the 30th of August. Mr. John P. Davis, secretary of the committee, has arranged for a conference with the Secretary of Labor, Miss Perkins, on the first of September. Thus, one of the chief purposes of the meeting the last of this month is to form the plans for this important conference with Miss Perkins. The department of research of the Negro Industrial League has already drawn up a preliminary statement of the problems of the Negro under the Recovery program.

CHILIAN WINTER POULTRY RABBIT LETTUCE

Best winter green feed. It is economical to grow, can be cut again and again—Yield extremely heavy. Grows 4 feet high loaded with large nutritive leaves. Slip a dollar bill with your address for special seed packet with cultural instruction and to feed 500 hens during winter season.

All contributions for publication in the Modern Farmer should be addressed to The Modern Farmer, 447 4th Avenue, North, Nashville, Tenn.

No libelous matter will be published. Unsigned articles or letters, and those written on both sides of the paper will not be used.

Subscription price $1.00 per year, 75c for six months, payable in advance. Personal checks must be certified. Make all checks or money orders payable to The Modern Farmer.

Advertising rates and sworn circulation figures presented upon application.

"OUR SLOGAN"

STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT.

THE LAW

"It is hereby declared to be the policy of Congress to promote the effective merchandising of agricultural commodities by encouraging the organization of producers into effective associations under their own control.

The Board is authorized and directed—to promote education in the principles and practices of cooperative marketing—to encourage the organization, improvement in methods, and develojment of effective cooperative associations. (Public—No. 10—71st Congress. Sec. 1-5.)

THE GOSPEL

"This law is predicated upon the ability of the farmer to manage his own business, once he is organized to do so. Cooperation is the key to it and only in exceptional cases can the Federal Farm Board have any dealings with a farmer who is not a member of a producer-owned and producer-contrloled marketing unit." Hon. Sam'l R. McKelvie, Former Member, Federal Farm Board.

Help the weak when you are strong
Love the old when you are young
Own a fault when you are wrong
It you are angry, hold your tongue.
—Unknowa.

"GO TO THE ANT—"

The wise king, Solomon, advised the lazy man to go to the ant and consider her ways and be wise. We know few farmers are lazy but many of us are thoughtless. We forget winter is coming until we feel the cold wind blowing. Then it is too late to prepare for winter.

We should all lay in a good, big supply of food for next winter. It is a good plan to can, dry and preserve at least fifty per cent more food products than we know we can consume. We have seldom heard of a family that had much left over when the next spring came, no matter how large a supply they had. It just goes, somehow, and when it is gone we have to begin buying and for many that means "going in debt."

We should not expect aid from the Red Cross next winter unless some terrible catastrophe comes upon us. The good Lord is giving us a good season. Let us prepare for winter now. Let us take care of everything we have that can be preserved and eaten next winter.

There is another excellent reason why colored farmers should be saving and sensible. Many of us want to get farms and homes of our own. We have some fine opportunities now to purchase on easy terms. But no landowner nor the government will be willing to help a farmer buy a farm on time if he has to be furnished. The day of "furnish" is about over. We must learn to stand on our own feet and support ourselves. The farmer who proves he is able to do this will be favored. The farmer who is so trifling that he will not save enough in one season to feed his family and his stock through till the next season is a "no good farmer" and would not pay for a farm or take care of one if the had a chance to purchase it.

We must get out of the habit of depending on the other man. There is no "other man" any more. From now on, YOU ARE THE OTHER MAN. Learn to depend on yourself. Work hard, think hard, and save something so you can be a real man and a modern farmer all around.

THE "SKIN GAME" GOES ON

Letters received from members of the N. F. C. F. in Mississippi inform us that some landlords are taking advantage of cash and share croppers in the plowing up of surplus cotton by wanting to give croppers forty per cent of the bonus money paid instead of the fifty per cent they are entitled to receive.

It is unfortunate that some landlords just will not be fair and square. By hook or crook, in some way they are constantly attempting to take from their tenants what they should not have. This injustice must not continue. A fight is going to be made to see that Negro tenants farmers get all that is coming to them and every case where landlords are trying to cheat or take advantage of Negro tenants will be reported to the federal Department of Justice.

IT'S TO THE FARMER

Senator Thomas, of Oklahoma, who is one of the best friends of the farmer in Congress, has little faith in government relief. He does not believe that the farmer will get justice and equality until he is organized so strongly that none will dare mistreat him. United, he will stand, but in spite of all the government's relief plans, he is going to keep on being the under-dog just as long as he fails to organize and co-operate with his brother farmers.

We believe Senator Thomas is right. No class in this country has ever gotten very far or very much by depending on the government. Farmers must organize and stick together and then, all farm organizations must co-operate and work for those things that will be of benefit to all farmers, colored and white, east or west.

The National Federation of Colored Farmers is well organized, — it has existed during these trying times,— it is the only national organization of colored farmers in existence and all colored farmers should join and help support it. We will not get very far as a class or group until we are organized and able to demand justice and opportunity to progress and prosper.

THE 1933 CONVENTION

We believe delegates to the 1933 N. F. C. F. convention will come to Memphis with the determination to do all within their power to back up their officers and leaders in plans proposed to make the organization a hundred per cent stronger and bigger during the next twelve months. These plans have been well worked out and the program can be put over if everyone will do his or her duty. Every member who can possibly do so, should attend this year's meeting. It is going to be the biggest and the best meeting of Negro farmers every held in the United States.

TO THE EDITOR OF THE MODERN FARMER

I have just been a week on the question: "What is the matter with the Negro Farmer?" The question seems easy, in my judgment it is deeper than the deepest sea, it is almost inexpressable.

I heard a wonderful sermon once preached from the Bible subject, 'Use what you have." That is one great thing to master. He will not use what he has in many instances, he does not know and will not be learned.

I know that is one thing the matter with him, the greatest hinderance of all, there is no cooperation, among them, or not enough. It seems hard to learn Southern Negro the lesson of co operation, that is one of the greatest backsetting; he is trying to live alone.

Failing to recognize God's Word— how can two walk together unless they first agree? Organizing is the first thing, cooperation the second, and success the third. This lesson teaches Union, Love and Friendship, and too, I would not like to make criticism because it is ignorance. Of course, he hasn't the money, nor ten chances with due respect without criticism on one side or deceit on the other.

The majority of the Negroes of the South do not stand for anything. One of the great hitches is, God is not respected as the General Owner of the whole world, and General Boss as well as being the Supreme Ruler.

The farmers failure is, he fails to recognize Him as such. They are trying to live on an independent scale, but I say all for lack of cooperation. The farmers and all others have gone from God. He is now calling words like this "O, Israel return unto me, and I will return unto you. I will be your God and ye shall be my people."

Faithfully Yours,
Rev. H. H. Ingram.

Prairie View State College Closes Annual Session

By Napoleon B. Edward

Saturday, August 12, following the final term examinatons, the annual session of Prairie View State Normal and Industrial College came gradually to a harmonious and successful closing.

The enrollment for the year, regular and summer sessions, according to reports from the Registrar's Office, is 1,303, including the enrollment in the extension schools. For the two sessions there were graduated 91 students from the five divisions of the college as follows:

—Regular Session—

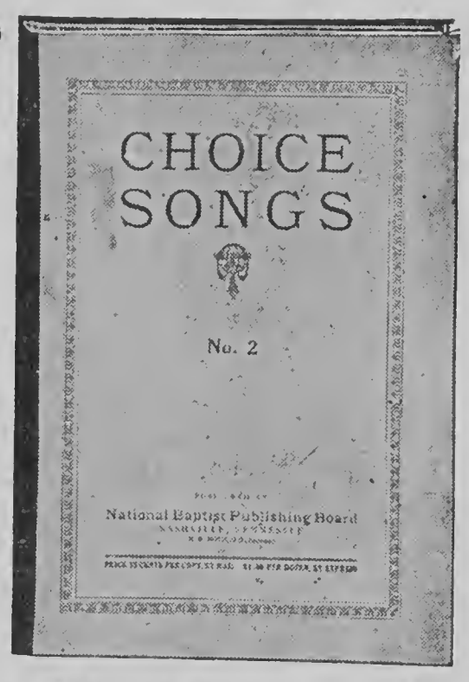
Agriculture	5
Arts and Sciences	16
Home Economics	6
Mechanic Arts	2
Nursing Education	10

—Regular Session—

Agriculture	15
Arts and Sciences	29
Home Economics	8
Mechanic Arts	0
Nursing Education	0

Records disclose that hundreds of students were denied the privilege of attending college because of unfavorable economic conditions. But the wave of depression is ow passing and it is anticipated that the enrollment for the fall term beginning September 20 will be larger than either session of the past two years.

Dr. Edward Evans, acting-principal, assisted by an able and cooperative faculty during the absence of the Principal, has wielded the gavel of principalship with unquestionable executive ability. Easy of aproach annd of a refined congenial disposition, Dr. Evans has been able to render the fullest service to the college and its constituency.



Choice Songs

NO. 2.

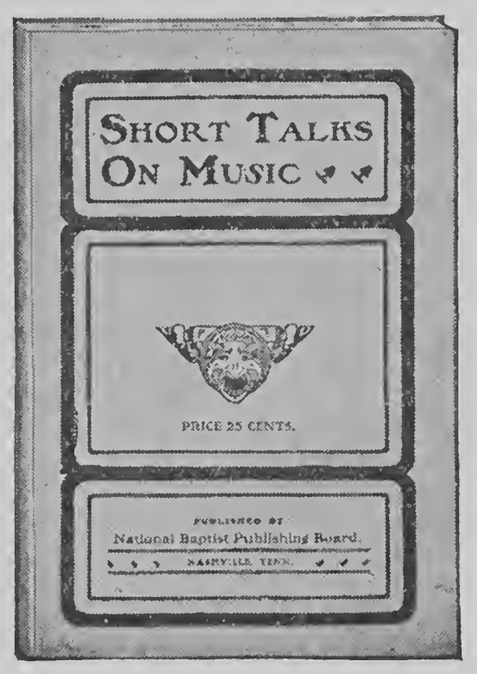
Exceedingly popular, worth twice the money. Millions of folks have sung from this book, fitted for use in all meetings of an evangelistic nature and well adapted for any other religious use.

Price 20 cts. per copy. $2.40 per dozen. By the hundred, $15.00, express charges not paid.

SHORT TALKS

ON

MUSIC



This book contains the simple instructions for those who want to learn vocal music. It is almost a self instructor. No greater help can be found for the anxious student.

Price 30 cts. per copy, $3.60 per dozen.

DRYING IS EASY, CHEAP WAY TO PRESERVE FOOD

(In Chicago Tribune)

B. Mary Meade

You've certainly jammed, preserved, and pickled all your cookery life— but have you yet learned the knack of preserving foods by drying? So many letters have come in lately asking all about it that this seems to be the time for us to do a bit of explaining and for you— if you'd like to save an interesting penny— to do a bit of adventurning. And by the way, because these writers-in were the first to rouse the drying spirit within us, we dedicate this piece to Mrs. M. S. and Mrs. J. T.

Drying is one of the oldest, simplest, and cheapest ways of preserving perishable fruit and vegetables. Dried foods keep well, refresh and cook easily, require small storage space, and retain a good texture and flavor.

The equipment for drying may vary all the way from the simplest screen for sun drying to the many-shelved cupboardlike arrangements using artificial heat. A drier may consist of a series of trays hung from the ceiling over the kitchen stove. Or the oven may be used. Spread the prepared foods on baking pans pie pans and place in the oven with the door open and the temperature not higher than 150 degrees F. Whichever plan you follow and whatever type of equipment you select, consider the protection of the foods from dust and insects and the free circulation of dry air.

Vegetables and fruits that are fairly mature and those with a high sugar content are easier to dry that the quick growing, immature kind. They should be fresh products and of first class quality. The vegetables that can be dried most successfully are sweet corn, beans, and peas. The fruits are apples, pears, and peaches.

The prearation of the food products is simple.

Vegetables, for instance, are cleaned thoroughly and then blanched with hot water or steam. Fruit, like apples and peaches, are peeled and sliced and then dipped for one minute in a cold salt bath (two and one-half tablespoons salt to one gallon of water) to prevent discoloration.

When ready to submit them to the drying process, remove the surface moisture, then spread them in a single layer on the screens you have provided with netting covering the top to keep off insects. Stir them frequently while drying. Fruits are dry enough when a handful of the slices is elastic to the pressure of the hand, when the slices separate promptly on the release of pressure, and when they leave no moisture on the hand. This stage will be reached after a period of two or three days in the sun.

Store the dried foods in pasteboard boxes or paper bags which will be free from insects and dust.

All of this general information is boiled down and crystalized for you in the following recipe. The same directions hold for other fruits:

Dried Apples

Select apples that are firm and in good condition. Peel them, remove the core, and slice in eighths or in crosswise slices forming rings one-eighth inch. Discoloration will be prevented if the apples are dipped in a salt and water solution as we directed above. Do not allow the fruit to stand long before drying. Remove the fruit from the salt, dry the surface moisture, and spread out in a single layer on the screen. If you dry them outside in the sun see that a net covers the fruit to protect it from insects and dust. When thoroughly dried store the fruit in bags or boxes for delectation next fall and winter.

THE BIBLE AND SOCIAL MORALITY

In 1789 a ship of the British Navy was cruizing in the Pacific. The crew were rough and harshly treated, and there were many privations. They mutinied, put the captain adrift in a boat, and seized the ship. Afraid to return to a civilized port, they took up their abode on a lonely island named Pitcairn. That was a bad day for the island. Drink, lust, violence and murder held sway. One after another the mutineers died or were killed, until a single survivor remained, Alexander Smith. In a seaman's chest he found a book. He read it, and his life was wholly changed. He became pious, God-fearing, generous and sober-living, and taught the islanders the same. A friend of mine, visiting the island, was charmed to hear them singing in the sunset glow as they paddled their canoes from the ship back to the beach,

In the sweet bye-and-bye,
We shall meet on that beautiful shore.

A conclusive evidence of the moral value of the Bible is furnished by the experience of countries which have banished it from the schools. A daily paper sets forth the evil consequences of this policy. In a leading Australian city, after ten years of exclusion of the Bible from the schools, crime advanced by leaps and bounds. Convicted criminals doubled in the period. Yet education overflowed, 99.56 per cent of the population being educated.

In America the Presidents of Harvard, Clark and Chicago Universities testified that the results of eliminating the Bible had been disasterous to morals. Crime steadily increased. Out of 10,000 boys in Denver, 2,000 had been in jail.

In France the Chief of Paris Police wrote that young criminals were springing up like weeds between the cracks of the pavement. He added: "If the philosophers are conscientious, they must confess that modern education has not been without disastrous effect. The materialistic school is gaining ground, and the intelligence cultivated at the expense of the heart is producing startling results."

Compare those countries where the Bible has been circulated and studied with lands where its reading has been forbidden. Consider the difference between North and S. America the land of freedom and progress, South America until lately a land of gross immorality, most of the time plunged in revolution. According to the laws of inductive logic, thoughtful men who see these facts, have the strongest reason to assume that we have here cause and effect as between the Bible and morals.—A. R. Short in "Bible and Modern Research."

—Western Recorder.

BASE BALL IN AFRICA

Washington, Aug. 21—Introduction of baseball in the British African colony of Kenya was noted today by the commerce department.

Its official reports told of adoption of the game by the colony's leading athletic club, with the possibility of formation of a league in East Africa and development of the game in competition with such British sports as cricket and rugby.

BIG BOOM IN SOVIET COUNTRY

Robert J. Cromie, Editor of Vancouver Sun Sends Missive

New York—(CNS)—A contrast between increasing prosperity under the Soviet system and growing mass misery under decaying capitalism was made yesterday by Robert J. Cromie, white editor of the Vancouver Sun, upon his return from he Soviet Union.

Mr. Cromie declared "there is under way in Russia one of the world's greatest booms". The Soviet Union's policy of constantly raising the living standards of the toiling masses, Mr. Cromie told the Associated Press, "will for years keep her people's desires ahead of their ability to supply these increasing appetites.

"That is why Russia is to be envied; that is why her business and growth are bound to boom, while we in North America, in England and other parts of the world retrogress or stand still."

The Canadian journalist admitted he went to the Soviet Union "expecting to see depressed and starving people," and found instead a "tempo and enjoyment and aliveness" that "are a revelation to most people."

"However much one may disagree with part of their technique no fair-minded person could visit Russia and come away without feeling deep respect for the conception and directness of the government policy and without being impressed with the enthusiasm and pride which the Russian people show in putting their plans into effect."

Himself a capitalist, Mr. Cromie attempted to defend the dying system with its sentence of death upon millions of toilers, declaring he felt the principle of capitalism was sound, albeit admitting that capitalism "curtails production and distribution and thereby prevents the growth of appetites and desires.

Prairie View State College Opens Sept. 20th

By Napoieon B. Edward

The regular session of Prairie View State Normal and Industrial College will begin September 20. At that time class work will be resumed in all five divisions of the college, Agriculture, Arts and Sciences, Home Economics, Mechanic Orts, annd Nursing Education.

Reports and inquires coming from all sections of the state make it practically certain that a new day has come, economically, and that the enrollment in September will be considerably greater than it was for the same time last year.

Board and lodging has been reduced more than eight per cent and the total cost per year for each student will compare most favorably with any other higher standardized institution of learning in the country.

Prairie View State Normal and Industrial College is the largest Land Grant College for Negroes. It is recognized by the American Medical Association and the Southern Association of Colleges and Secondary Schools, enabling its graduates to continue their advanced education in the graduate schools of leading colleges and universities.

During the incumbency of Prof. W. R. Banks as principal, the ablest faculty has been employed; the status of the college has been raised, and added prestige has been given to its grauduates in every secttion of the country.

"Prairie View State Normal and Industrial Colege has three separate and distinct functions clearly set forth in State and Federal Acts, as follows:

1. "It is a normal school for the preparation of colored teachers.

2. "It is to maintain a four-year college course of classical and scientific studies.

3. "It shall without excluding other scientific and claassical studies and including military tactics, teach such branches of learning as are related to agriculture and mechanic arts, in such manner as the legislature of the state may respectively prescribe in order to promote the liberal and practical education of the industrial classes in the several pursuits and professions of life.

4. "In addition to the foregoing it shall offer such training inhealth education as will provide the state with professionally trained nurses while at the same time providing opporunity for observation and practice to newly graduated students of medical colleges."

John Pride Horse "Doper" Gets Two Years in Prison

Chicago— (CNS) —Among the five convictions for "doping" race horses was John Pride who was sentenced to two years in Leavenworth penitentiary.

'YEAH MAN' REVUE GOES OVER AT LOEW'S STATE THEATRE IN NEW YORK

New York City—(NCS)—"Yeah Man," headed by the Mills Brothers and Don Redman and his orchestra, assisted by Myra Johnson, Harlan Lattimore, Pete, Peaches and Duke, and a chorus of twelve put on a fine show at Loew's State Theatre in New York last week. Red and Struggie dancing comics, were featured in this presentation.

The Mills Brothers offered a combination of spirituals and popular music in closing the show in a most satisfactory manner. Don Redman and his orchestra, replacing Ruby Zwerling and his Loew's State Senators, provided Harlem interpretations of current airs.

RETAIL STORES OPERATED BY NEGRO PROPRIETORS IN 1929 IN PRINCIPAL CITIES

Washington—(CNS)—The Bureau of the Census announces the number of retail stores operated by Negro proprietors in each of the fifteen cities having a Negro population of 50,000 or more, as shown by the Fifteenth Census. The city of Chicago ranked first in the number of stores, in the number of employees and the amount of the pay roll, and also in the amount of net sales. Detroit occupies first rank in the average per capita net sales based on the Negro population, and New York leads with the highest average value of sales per store. Of the $27,862,020, the total amount of net sales in these fifteen cities, 17.3 per cent was reported by the Chicago stors, followed by 11.9 per cent for New York, and 11.3 per cent for Philadelphia. Although having a larger Negro population than seven of the other cities in this group, Birmingham reported the lowest amount of net sales.

Of the 25,701 retail stores operated by Negro proprietors in the United States, 22.3 per cent of them were located in these fifteen cities, and of the total $101,146,043 reported as the total amount of net sales for the United States 27.5 per cent was reported by these principal cities.

Application for Membership

NATIONAL FEDERATION OF COLORED FARMERS (Inc.)

Vincennes Hotel, Chicago

As a farmer, I believe the time has arrived when the Colored Farmers should form a National Organization devoted to diversified production, grading, packing, shipping and marketing of farm products and to the purchase of needed farm supplies through co-operative methods, to the end that a more prosperous financial condition may result from their efforts as producers.
I hereby subscribe $5.00 for membership in the National Federation of Colored Farmers for a period of 12 months from date. Also $1.00 for an Annual Subscription to the Modern Farmer.

WRITER DEFENDS SORORITIES, NAMES FINE WOMEN IN GROUP

Chicago, Aug.—(By Jeanette Triplette Jones for the Associated Negro Press)—The annual and biennial conclaves of Greek Letter organizations held in Chicago during the current month, focus public attention upon the program activities of these societies. Much discussion usually centers around the question as to whether or not fraternities and sororities are worthwhile contributors to community life, or whether they are useless apendages. The answer to this question and others of similar nature is to be found in the personnel of these groups For example, taking just one sorority for this resume, Delta Sigma Theta women justifiably view with pride those within their group who have made and are making definite contributions in the fields of education, the professions and the arts.

In any survey of the field of education Mary McLeod Bethune's achievements at her experimental school in Daytona Beach, Florida, are conspicuous and significant. In Chicago the notable efforts of Mme. Mason Higgins, M. A. in Education from the University of Chicago, to make available the Negro children type of instruction usually enjoyed by the children enrolled in the University Elementary School only, are of like significance. Delta claims also as aids to these great at pioneers those artists of the school-room who make real contribution to school-room practice. Bessie Burke and Pauline Slater are principal and head assistant respectively of one of the public schools in Los Angeles, California. Ethel Calimese is cooperating teacher on the teacher training staff of the University of Cincinnati.

Though education is not their chosen field, Delta counts among her numbers many young women whose distinguished scholastic achievement won Phi Beta Kappa keys. There come to mind, among others, the names of Jessie Fauset, at Cornell; Esther Pepol Shaw, at Dickerson; Carol Carsen, at Michigan; Lillian Alexander, at the University of Minnesota; Mae Wright Adams, Augusta Emanuel, at Syracuse; and of Josephine Matson, at the University of Chicago. Among those who have earned the degree of Doctor of Philosophy are Eva Dykes and Sadie Mossell Alexander.

Because they seem to hear a call to serve their kind, we see numbers of Delta women in the field of medicine. In Chicago, Dr. Helen Dickens, first Negro girl to graduate from a medical school in the city, is now an interne at the Greater Provident hospital. Other physicians of note are Dr. Virginia Alexander of Philadelphia, Dr. Mae Chinn of New York, and Dr. Mary Fitzbutler Waring and Dr. Fannie Emanuel (honorary members) of this city. Gwendolyn Covington Lee, in the allied field, bacteriology, is now on the staff of the Greater Provident Hospital.

Another group educated by the urge to serve humanity is enrolled in social and medical social service. Zephyr Holman is head assistant in the Medical Social Service Department at Greater Provident. While some of the staffs of the city's various social service agencies are manned chiefly by Delat women, there is none which does not include at least one of the sisterhood.

Again responding to the impulse to aid one's kind, Delta women are leaders before the bar. Among these women privileged to do so are Elsie Austin, youngest woman to pass the Ohio bar, and Sophia Boaz Pitts of this city.

It is with great pride that her sorors regard the unusual accomplishments of Esther Tibbs Mann, of Michigan. Choosing as her field a science left heretofore to men, she is the only Negro woman actuary in the United States.

The gifts of Delta women are rich and varied. From the number who have earned distinction in the field, music would appear to be their forte. The brilliance of the work of Shirley Graham, composer won the acclaim of all the critics who witnessed her startling opera, "Tom-Tom.", in Cleveland. Another composer is Camille Nickerson, noted for her "Creole Sketches." Internationally known in her own right as a pianist, in addition to her work as accompanist for her celebrated husband, George R Garner, Jr., is Netta Paullyn Garner, one of the first Negro artists to appear as soloist with the Chicago Symphony Orchestra. Among other pianists and vocalists of first rank are Eloise Lowe, Jessie Covington Dent, Roena Muckleroy Savage and Cecilia Irwin, while Florence Cole Talbert and Charlotte Wallace Murray are vocalists of national fame.

LINCOLN LETTER STOLEN FROM EXHIBIT AT CHICAGO FAIR

Chicago —(CNS)— The wigwam exhibit at the Century of Progress Fair is minus a 13 word letter taken from the Lincoln group. The letter was written by President Lincoln and dated February 25, 1865. It read "Will the Secretary of the Navy please see and hear this Connecticut gentleman?"

As the case containing the letter did not appear to have been forced open— there is an air of mystery attached to the report of theeft.

NATIONAL "MEDICS" DIVORCE "DENTS" AND PHARMACISTS

Chicago, Aug.—(By P. M. Carter for the A. N. P.)—Reorganization of the National Medical Association which will make it an organization more nearly like the American Medical Association was prepared this week at the annual N. M. A. convention here. It is expected that the body will reorganize itself into a federation of local associations and that delegates to the convention hereafter will be chosen from these member organizations. This change in policy, according to the president, Dr. Hamilton Francis, Virginia, will result in a more efficient body and will seek to eliminate the unnecessary waste of time and effort which is prevalent in the present society.

Another drastic change that is contemplated, will result in the severence of relations of the organized medical men from the pharmacists and dentists, all of whom have heretofore been affiliated under the one banner. The National Medical Association. Dr. Francis stated that this change will be made in order that the activities of the physicians might become more centralized, thus enabling them to create a more efficient fraternal organization.

The officers of the new body will be: president, vice-president, treasurer, speaker, vice speaker of the house of delegates and seven trustees. All officers will be elected annually.

THE NEGRO AND THE NATIONAL RECOVERY ACT

II. Hearing on Bituminious Coal Codes

By George Edmund Hayes, Ph. D., Executive Secretary. Department of Race Relations Federal Council of Churches

Washington, D. C.—Leaders of capital and labor in the bituminous coal industry scattered over thirty states hurried to Washington last Wednesday at the urgent call of Col. Hugh S. Johnson. National Recovery Administrator, following the end brought to the Pennsylvania coal strike. They remained for the rest of the week discussing codes or parts of codes of fair competition submitted by operators and owners. The attendance was greater than that at the steel hearing the preceding week. The auditorium of the Department of Commerce, which seats about 1,000 was full when the first session opened.

Corporal's Guard of Negroes Present

Again ,as at the preceding hearings, Negro workers were represented by only a corporal's guard. Dr. Robert P. Weaver and John P. Davis of the Negro Industrial League and this writer were there at the opening as at the steel code hearing, although we had worked and conferred until after the preceding midnight on a brief to be presented in behalf of Negro mine workers. Bishop E. W. D. Jones and Rev. Wallace of the A. M. E. Zion Church soon joined us. Bishop Reverdy C. Ramsom sent a telegram asking us to speak for the wage-earners of the A. M. E. Church; Miss Nannie Burroughs had endorsed our plans; and Dr. R. R. Moton sent a telegram urging no discrimination in wages for Negro workers. Two Negro mine workers with a left-wing union group from Pennsylvania were present.

INTERESTS OF NEGRO WORKER TO BE STRESSED ON LABOR SUNDAY

New York, August—The observance of Labor Sunday, September 3, offers a most opportune occasion this year for the Negro churches to interpret and give emphasis to the National Recovery Act and to make plans that will ensure a new deal to Negro labor. The Department of Race Relations of the Federal Council of Churches joins with the Department of Social Service in calling special attention of churches throughout the Nation to the significance of this observance, and urges Negro churchmen to arouse themselves to this crisis in their economic life.

It is urged that a full and clear interpretation of the new economic and social program be made to congregations at all service on this Day in order that intelligent light may be shed upon the full meaning of the new day in industry as it affects the Negro worker in matters of wages, hours and general working conditions. Every Negro within and without the churches is vitally affected by these codes of fair competition being set up for industry; and is urged to seek information and counsel about his relation to them thru his local church leaders.

In the Labor Sunday Message recently made public the churches are challenged "in this period of long continued hardship and human suffering" not to forget "to lift high the ideals and principles of their faith upon which a better world must now be built." The Message suggests that clergymen preach special sermons on the relation of Christianity to industrial problems and the ideals of a Christian social order; that union services be arranged for a number of churches with speakers representing labor officials, employees and social workers. The Church is called upon to "teach, inspire, and provide the moral and spiritual dynamic as the Nation moves forward in its economic life to the realization of the ideals of justice and human brotherhood."

MORRIS HUNTER'S ARTIST

Zulu Youth Conquers Odds—World's Model

Levon Horton in Special Article to Central Press Association

New York — The first germ of a desire was planted nineteen years ago, just at the time when the first sinister clouds of the World War began to threaten the civilized universe.

A savage little Negro chore boy crept wild-eyed to the bedside of a fever-stricken American in a hospital in the wilds of Dutch Guiana. In his delirium the American talked much of his native heath. The chore boy listened with eager ears and alert mind to the tales of the land of golden opportunity and its many wonders.

Two years later that boy left his savage parents and his mud hut and embarked on a freighter, with America as his dim, distant goal. Two more years passed before he sighted the towering skyscrapers of New York, a land of mystery and glory to him—two years which he passed sailing on the treacherous Caribbean, slaving silently with only one thought in mind.

In Front Rank.

The remainder is a story of his rapid rise against terrific odds. Today he is heralded, as the world's foremost artist's model. He has posed for almost all of the contemporary masters and is in demand from one coast of the United States to the other.

Morris Hunter, for that is his name, is not satisfied yet, however. Today he is reaching out for new worlds to conquer. He is seeking now to create a niche for himself in a new art, the realm of pantomime. Already he has appeared at many of the larger universities, including Yale and has given recitals at Town Hall and Carnegie auditorium in New York.

Hunter's rise to prominence reads like a fairy tale. When, as a boy bred of pure Zulu stock, a race of tribal chieftains, he landed in New York, he obtained a job as waiter in a Harlem restaurant. Later he became an elevator boy in an apartment house. It was while working there that he was induced by a woman of his own race, in artist's model, to try her field of endeavor.

An Early Success.

Hunter first posed for a class of ten at the Art Students' League. He was an instantaneous success and soon he was widely sought by prominent artists.

He is five feet eleven inches tall and weighs 165 pounds, possessing what is considered a perfect physique, although he violates every feature of the Greek figure. The eloquence of his body and his keen sense of the dramatic, more than anything else, have raised him to the high place that he now holds, however.

During the fifteen years that he has been posing—he is now 31—Hunter has served as a model for Boardman Robinson, Charles Dana Gibson, George B. Bridgman, Walter Briggs, V. E. Pyles, Herbert Stoopes, Eugene Savage, Leslie Thresher, Dean Cromwell, Cyrus LeRoy, Baldridge, Mead Schaeffer, Joseph C. Keyendecker, Frank Godwin, Leon Gordon, Lawrence Herndon, Harry Burne, Charles H. Baumann and dozens of others.

His figure was used in three places in the murals done by Ezra Winters for the Bank of Manhattan Trust Company in New York. He has been transferred to wood. Stone and copper many times. He posed for Onorio Ruololo and John Flanagan and for Leonard Chester French for his famous World War statue at Milton, Mass., depicting the poem, "In Flanders Fields."

Many Characters

He has posed for the sketches done for Roark Bradford's Negro stories, assuming as many as a dozen characters, including several women. His face and his figure have appeared as illustrations in and on the cover of almost all of the popular fiction magazines. Many times he has been the model for covers for adventure and action publications, one time as an Arab chieftain of solemn mien, another time as a laughing, carefree Spanish bull fighter with glistening teeth.

Artists agree that Hunter is capable of myriad facial expressions and is able to stay in the same character for hours. At times he has posed for twelve to sixteen hours at a stretch. He transcends the usual efforts of an artist's model. A painter need only hint to him the charaeter he is seeking in a pose and Hunter expands on the artist's version of his subject, affording an uncanny insight into the character.

MY SEVENTIETH BIRTHDAY

Prof. Kelly Miller in Special Article to Press

Howard University Professor Gives Readers Inside of His Life

My seventieth birthday has come and gone. I am made aware of the flight of time by consulting the calendar rather than by indication of physical or mental infirmities. I have filled out the Scriptural allotment of three score years and ten with every hope and expectation of extending the margin of four score and more. My father died at 97 and was working in the field the morning of the day he died. I fully anticipate another decade of active and effective service. The Trustees of Howard University have granted me one year's extension before retirement after which I will be free to follow the bent of my own inclination along lines of literary work and public discussion.

My seventieth birthday was like any other Summer vacation day and was spent in the usual way. I arose at six o'clock, strolled through my garden, gathered vegetables for dinner, cut a bouquet for the breakfast table, read the morning paper, and then answered the summons of the breakfast bell. After breakfast I went to the University Post Office for my morning mail, chatted some time with the professors and instructors gathered for the same purpose. I then came home, read the mail, including the newspapers and magazines, then wrote for an hour or so at my typewriter. The mid-day dinner was then announced. There were timely feliciations, after that a mid day siesta, then for another hour or so in the library. Towards the cool of the evening I must paddle about the garden and inspected my trees, shrubbery, grasses and flowers to see what further care they needed. There is no delight known to the sons of men comparable to a stroll in the garden early in the morning or in the cool of the evening. The only work while vocation or avocation is cultivating the soil and cultivating the soul. I am called from the garden again by the tea bell. Now for an auto spin about the surburbs winding up at the movies which brings me to the end of a perfect day.

Seventy years is but as a day—a watch in the night—when it passed. It might well be seized upon as a poin tof reflection. If it were not for the knowledge that all men must die, sooner or later, I would feel as if I might live forever. The end of the road has no terrors for me.

I was sent into the world perhaps at the most dynamic period of human history. Abraham Lincoln and I were living at the same time. More progress in mastering lines and transforming discoveries have taken place in my day than had been achieved from Adam to me. I was born in the back part of a backwoods county in South Carolina amidst very crude country surroundings, and did not have a chance to observe movements and events till well in my middle teens. The electric light, the telephone, the electric car, the automobile, the linotype, the radio, and the moving picture have all come into existence since my time. Subtract from civilization what such inventions and discoveries have contributed and the subtrahend would be greater than the remainder. No less striking has been the transformation in the domain of human thinking. Darwin's Origin of the Species was issued just four years before I was born. It did not get under way till a quarter of a century later. Its universal acceptance has revolutionized the whole fabric of human thought and action The basis has been shifted from heaven to earth. Before the dissemination of Darwinism, religion was a ruling passion, since then it has become a ceremonial formula. Democracy was the ideal form of government; but even within the last two decades democracy is yielding to dictatorship in all parts of the civilized world. In industry and economics, competition has given way to combination, and individualism to social control. Roosevelt and Mark Hanna are as far apart in their economic philosophy as Cardinal Gibbons and Clarence Darrow in their religious belief. I have seen this old world of ours standing, as it were, on its head, spinning down the ringing grove of change. It is great to live in such an era as this, even if only as a more or less passive spectator. I still expect to see ushered in a new order of things, the consummation of the progress of the past seventy years. The time of its fulfilment is at hand and the reign of technocracy is near. Like Moses, I shall hope to get a glimpse of the Promised Land, but shall not probably enter into its full fruition. The inevitable Nebo will frustrate such hope.

Now as to the advancement of the Negro. My life is an adequate yard stick by which its progress may be measured. The story of my life, if it is worth the telling, would be a complete history of the Negro race since emancipation. I cannot boast, like father Aeneas, "Magna pars quarun fui"— "I have played a large hand in these things." I have taken very little part in the dynamic movements—in politics, business or religion. Whatever influence I may have exerted has been of the influencing thinking along sane and constructive channels. I have known, with a greater or less degree of closeness, every distinguished Negro who has figured in the racial equation from Frederick Douglass to Marcus Garvey. I have assumed the role, not of a leader but as an analyst, not of an agitator, but an expositor. I shall hope during the next ten years to be of still more efficient service in guiding the race in the way it should go.

KELLY MILLER

AUTHOR OF THE PLANTATION NEGRO AS A FREEDMAN DIES

Baltimore, Md.,—(CNS)— Philip Alexander Bruce, historian and biographer and brother of former United States Senator William Cabell Bruce of Maryland, died on Wednesday night at his home in Charlottesville, Va., near the University of Virginia, after a long illness.

He was the anthor of many publications that appeared over a period of more than forty years, from "The Plantation Negro as a Freeman," 1888, to "The Virginia Plutarch," which was issued in two volumes by the University of North Carolina Press in 1929.

FISK FACULTY MEMBER BUYS "CHEV" SEDAN

The popularity of Chevrolet car in Nashville received another boost the past week when Miss Lillian Cashin, teacher of English on the Fisk faculty purchased through J. Wesley maney, colored salesman of the Jim Reed Chevrolet company a 1933 sedan. Both buyer and salesman, it is announced are proud of the deal.

EDUCATORS OF SOUTH SUGGESTIONS

Would Put Study of Negro History in Schools

Say Goals Should be Interracial Good Will—Urge Efforts Toward Ends

—That " a textbook giving a faithful account of the contribution of the American Negro to the life of our country" should be prepared and studied in all public schools, white and colored, was the unanimous recommendation of a conference representing the state departments of education of all the Southern states, meeting last week at George Peabody College, this city. This recommendation was made by the Committee on Findings and was adopted by the entire group without a dissenting word.

Further setting forth its viewpoint, the conference said: "There should be taught in both white and colored schools those things that will build up in the lives of the people of both races such a knowledge of the factors involved in a hi-racial civilization and such mutual understanding as will promote good will, fair play, and a spirit of cooperation that will enable us all to work together as one for a safer, a saner , and a more fruitful civilization."

It was further recommended that each state department of education make a careful study of the treatment of the Negro and of interracial questions in its public school textbooks, with a view to such eliminations and additions as may be needed for the building of intelligent, fair-minded attitudes on the part of teachers and pupils. In conclusion the conference urged that each state department of education take immediate steps to put these suggestions into effect.

Sponsored by Interracial Commission

The meeting was called by a number of well-known educators, at the suggestion of the Commission on Interracial Cooperation, and was for the purpose of considering the duty of public schools to better prepare the future citizens of the South for the persoral and civic obligations involved in a bi-racial civilization. Five state superintendents of education were present in person and eight by proxy, representing al the states from Virginia to Missouri and Texas. The committee formuating the recommendations quoted above was headed by Supt. W F. Bond, of Mississippi, and incuded in its membership the state superintendents of Forida, Louisiana and Texas.

This move is regarded as one of the most important and hopeful ever undertaken for the improvement of interracial attitudes and conditions, and everything possible will be done to realize its goals as rapidly as possible. The follow-up was left by the conference in the hands of its executive committee, which is composed of W. C. Jackson, of the University of North Carolina; J. L. Clark, of State Teachers College, Huntsville, Texas; N. C. Newbold, of the North Carolina State Department of Education; Dennis H. Cooke and U. W. Leavell, of Peabody College; State Superintendent W. F. Bond, of Mississippi; State Superintendent T. H. Harris, of Louisiana; W. W. Alexander, Jessie Daniel Amos, and R. B. Eleazer, of the Commission on Interracial Cooperation.

Colored Colleges Represented

Attending the conference as invited guests were President W. J. Hale, Professor Epps and Robert E. Clay, of State A. & I. College and Dr. Thomas E. Jones and Prof. Horace M. Bond of Fisk University. Dr. Ambrose Caliver, of the Federal Department of Education, was one of the speakers.

Findings and Recommendations Conference on Education and Race Relations George Peabody College for Teachers, Nashville, Tennessee, August 3-4, 1933.

Your Committee on Findings submits the following statement as representing the combined judgment of those attending the Conference, in reference to the question of "Education for Citizenship in a Biracial Civilization."

1. Since the fate of a nation is determined by the character of its citizenship, and training for citizenship of the highest order is the main purpose of the American public school, good schools must be provided for the children of all people, irrespective of race, color, or other condition of life, if the nation is to attain its greatest possibilities.

2. By "good schools" is meant schools with strong men and women of noble purpose as teachers well trained for their work, with adequate buildings and equipment and term of sufficient length to give every child a chance to develop fully its powers of soul, mind, and body.

3. Injustice, whether legal, industrial, educational, or otherwise, to any person, however poor and helpless he may be, places a penalty upon all the people, since there is a kind of eternal justice that cannot and will not be denied.

4. Since pride of race is one of the most powerful incentives to noble effort, the good deeds of individual Negroes and the contributions to civilization of the race as a whole should be taught in every school for Negroes. A book giving a faithful account of the contribution of the American Negro to the life of our country should be prepared under proper guidance for use in all our schools.

5. There should be taught in both white and colored schools those things that will build up in the lives of the people of both races such a knowledge of the factors involved in a bi-racial civilization and such mutual understanding as will promote good will, fair play, and a spirit of cooperation that will enable us all to work together as one for a safer, a saner, and a more fruitful civilization.

As a first step in the direction we recommend that each State Department of Education make a careful study of the public school textbooks in use in that state, with a view to such eliminations and additions as may be necessary to the above end. The details of this study should be arranged and the results correlated by a committee of this Conference.

6. Substantial improvement has been made during the last decade in educational facilities for both white and Negro children, the improvement being more marked in some states than others. Every state should have a definite program of education for children of all races.

7. The State Superintendents of Education, with their staffs, are urged to take immediate necessary steps, in cooperation with their higher institutions of learning and other educational and social agencies of their respective states, to put into effect the suggestions outlined in these findings.

8. It is strongly recommended that this Conference be made an annual affair at Peabody College.

Respectfully submitted:

W. F. Bond Chair, Mississippi.
Jno. W. Abercrombie, Alabama.
Nolen M. Irby, Arkansas.
W. S. Cawthon, Florida.
J. C. Dixon, Georgia.
T. H. Harris, Louisiana.
N. C. Newbold, N. Carolina.
D. L. Lewis, S. Carolina.
L. A. Woods, Texas.
Committee.

WHEN IN CHICAGO STOP AT AMERICA'S LARGEST NEGRO HOTEL—VINCENNES

VINCENNES HOTEL—Chicago, Illinois, located at 36th Street and Vincennes Ave. The most modern and up-to-date Hotel owned and operated by Negroes in America. Mrs. E. Barnett-Lewis, is Proprietress. Write for Prices and Rates.

LOUISVILLE HAS ANOTHER NEWSPAPER

There has reached this city volume 1, number 15, of The Louisville Defender. Although a child in the journalistic field, having only been born fifteen weeks ago, it seems never to have worn swaddling clothes, it comes full grown, eight pages, eight columns to the page, filled with news and illustrations, with a goodly line of advertisements from commercial concerns, with many features and a lot of national news.

It is being published by the Alvin H. Bowan Publishing Company, with the following members of the offieial family: A. H. Bowman, president, H. D. Bowman, secretary, L. H. Bowman, treasurer, Chester Brendrant circulating manager, Arthus P. Evans, Sr. staff photographer.

The office of the new publication is at 623 West Walnut Street. The date of publication is Saturday of each week.

LENIOR COUNTY FARMER MAY ACQUIRE AIRPLANE

Kingston, N. C. (NCS)— County authorities today said Lenoir County will have its first Negro airplane owner this fall if tobacco prices are good. They reported a colored farmer with a bumper crop of the weed is planning to purchase a plane if he gets enough money for the crop. Neighbors are trying to dissuade him, fearing accident, but the man was said to be determined to own "one of them things that 'zips' and goes streaking for the clouds."

It is reported that the air-minded man has never been in a plane.

DEPRIEST AND SON LISTED AS OWING $12,600 TO DEFUNCT BANK

Chicago— (CNS) — Edward H. Morris, the reeeiver for the defunct Binga State Bank will soon take legal steps to collect amounts equal to the amount of stock owned by numerous stock holders in the closed bank. Congressman DePriest and his son Stanton DePriest are listed in the decree as liable for $6,300 each. Jesse Binga, the former president is scheduled for $119,426.14.

Among others named in the decree are:

Robert S. Abbott, proprietor of the Chicago Defender, $5,000; George R. A. Arthur, $200; Charles D. Bentley, $200; Dr. W. A. Buckner, $100; O. Calloway, $500; C. H. Clark and Marie Clark, $1,200; Charles H. Clark, $5,100; LeRoy Clark, $4,000; Mrs. Marie Clark, $400; U. G. Dailey, $6,500; Harry Garnes, $200; R. C. Giles, $100; T. Arnold Hill, $100; Edward Hudson, $400; W. C. Hueston, $1,000.

Edwin A. Jeltz, $300; Mrs. Eva Jennifer, $7,000; George T. Kersey, David A. McGowan and William J. Morsell $300; Carey B. Lewis, Jr. $200; James L. Mundy, $100; V. Plummer, $200; Provident Hospital and Training School Assoeiation, $500; Adlebert H. Roberts, Sr. $1,000; Carl G. Roberts, $1,000; Dr. Troy Smith, $1,500; H. E. Westbrook, $100; and Dr. R. A. Williams $2,000.

INJURED WHEN CAR OVERTURNS

Birmingham, Ala., Aug.—(By the Associated Negro Press)—Amos Sanders was critically injured Sunday when a car in which he was a passenger overturned down an embankment on the highway. The five-year-old son of his employer was crushed to death in the smash-up.

GEORGE ARTHUR OF CHICAGO APPOINTED ADVISOR FOR FEDERAL EMPLOYMENT SERVICE

Washington—(CNS)—George R. Arthur, of Chicago, the Negro major-domo in charge of Negro welfare of the Rosenwald Fund, has been appointed a member of the Advisory Committee of the United States Employment Servile The council, appointed by Secretary Perkins, is composed of fifty men and women prominent in industrial, labor and civic circles Mr. Arthur is the only Negro member of the Advisory Committee which will formulate policies and help solve problems relating to employment.

The council was named under the Wagner-Peyser law croating the new employment service, which sets out its duties as "formulating policies and discussing problems relating to employment and insuring impartiality, neutrality and freedom from political influence in the solution of such problems."

The group is headed by Robeert M. Hutchins, president of the University of Chicago. At a meeting held here Monday, Aug. 14, William Green, President of the American Federation of Labor; Henry I. Harriman, president of the United States Chamber of Commerce, and Senator Wagner were named vice chairman. Fredric A. Delano, president of the American Civic Association, was chosen treasurer, and W. Frank Persons, director of the Unted States Employment Service, was named Secretary.

It is distinctly stated that this advisory set-up is not to be confused wth the NRA program in anyway.

THRIFTY FARMERS WILL RAISE THEIR OWN FOOD

Cut Store Bills

ECONOMIST SHOWS HOW THIS CAN BE DONE DAILY

M. L. Mosher at University of Illinois Urges Prompt Action

This study made by an economist of illinois University shows that the farmers of that state who feed themselves and families off the farms they cultivate are much better off than the thoughtless and lazy ones who live out of the store. Colored farmers should take a lesson from this and resolve to raise their own food first of all. And after you raise it, preserve it. Learn to eat some things you don't like—or think you don't like. As a rule, we colored farmers do not eat enough butter, milk, buttermilk and fruits and vegetables. We subsist too much on bacon, fatback, cornbread and molasses. It is a poor farmer who cannot have a table loaded with a choice variety of good things to eat the year round. Learn to eat right, and learn to eat right off your own farm.—The Editor.

Rather than sell all his marketable produce, the thrifty farmer saves plenty to supply his own table, M. L. Mosher, agricultural economist at the University of Illinois, asserts.

No longer does it hold true that Illinois farmers should take to town markets everything that can be sold; it is more economical to cut down grocery bills by reserving sufficient home-grown food for family consumption. The saving for each person, Mosher said, is about $50 a year.

A survey made by the university's college of agriculture showed that farms which used abundant supplies of their own produce were operated more profitably than those which did not.

The department of agricultural economics collected records from about 200 north central Illinois farms in reaching its conclusions.

"The families using the most farm-raised produce used an average of 365 gallons of whole milk a year as compared with 305 gallons on the other farms," Mosher said. "Furthermore, they used 268 pints of cream as compared with only 67 pints on the other farms. Home-made butter consumption on the farms using the most home-raised products averaged 137 pounds as compared with only 44 pounds on the other farms.

"Other ways in which the one group of families lived better than the other were 259 dozen eggs as compared with 151 dozen, 56 chickens as compared with 34, 135 pounds (liveweight) of beef as compared with only 30 pounds, 1403 pounds of pork as compared with 429 pounds, 23 pounds of mutton as compared with none, 14 pounds of honey as compared with 5 pounds, 22 bushels of potatoes as compared with 10 bushels, 5 bushels of fresh fruits as compared with 1.5 bushels,

SECRETARY OF AGRICULTURE TELLS ABOUT FARM ORGANIZATION

AID PROMISED THE SOUTH

Governor O'Neal Believes New Day is Coming

Edward A. O'Neal, president of the American Farm Bureau Federation, and a former governor of Alabama says, that the South will get more aid from the new deal for agriculture than any other section of the country.

Gov. O'Neal is himself a southern planter, owning a 2600 acre cotton plantation. As reported in the Chicago Tribune, he says wealth for the southern farmer and says:

"Planned agriculture for the south, where 54 per cent of the nation's farm population exists, will bring new wealth to the south, and will bring governmental aid to the task of curtailing cotton acreage, rejuvenation of worn out soils, combatting soil erosion and the production of crops which heretofore were being purchased by southern farmers.

There are two million families in ten southern states which have been producing two-thirds of the world's cotton supply, he pointed out. Together with tobacco producers and the industries depending upon these two major crops, governmental aid is being given to correct a "system that has penalized producers to the extent that cotton and tobacco farmers' incomes are the lowest of any farmers in the United States."

Reverses Old Fee Scheme

O'Neal pointed out that the new federal scheme is a reversal of the old equalization fee principle fought for by the farm bureau and twice passed by congress to be vetoed by Coolidge. In that plan, he pointed out, the fee was to be collected from producers, while the new processing tax will be borne by the entire nation. The new plan rewards members of cooperative marketing whereas the cooperative farmer has in the past been penalized.

O'Neal said it would be difficult for farmers to realize the necessity for curtailing their production, having had no check upon it for generations. But he believed this would be overcome since the federal program of planned production would not become operative until farmers have subscribed to it in large numbers."

"Bokays" For Modern Farmer and N. F. C. F.

To let our readers and members of the N. F. C. F. know that our organization and paper is being well received and well liked by the public in all sections of the country, we publish below an editorial clipped from a recent issue of the Dairymen's League News, a sixteen-page weekly paper published by the largest dairymen's cooperative in the nation. It is published in New York The magazine, "FORTUNE" one of the biggest and best magazines published, also gave us some pretty boquets in the August edition. We

NEGRO'S GREAT OPPORTUNITY

Dr. Crawford of Georgia Makes Predictions

We are publishing below a letter written by Dr. Crawford, Secretary of the Baptist Convention of Georgia, to the Atlanta Constitution. We are also publishing an editorial from the Constitution commenting on his letter. This is mighty big proof that at last, the South is waking up. The Constitution is a big paper. It has influence. It has vision. It depicts the ideal colored farm community, the very thing the N. F. C. F. is striving to establish. Such communities are bound to come. The wise colored farmer will realize this and will do all he can do to hasten the day. We should buy homes and farms in colored farm communities. It is our only hope and chance to thrive as a group here in the United States.—The Editor.

The Editorial Follows:

The Negro and the Farm

An urgent plea that the great mass of Negroes now idle in the cities of the south be sent to agricultural sections, from which many of them came, is voiced in a communication, appearing on another page, from

(Continued on page 8)

When A Great Man Dieth

We have received a copy of the obituary and account of the funeral of Bro. R. B. Banks, chairman of Sandy Bayou Unit, N. F. C. F., near Webb, Miss.

We were impressed with the simple story of his life and departing. We can understand why his friends, neighbors and relatives gave him due honor at his funeral exercises. Bro. Banks was a real man. He did not waste the sixty-seven years the Master permitted him to live in this vale of tears. He gave the people honest advice. He showed his faith by his works. He reared a respected family. He did his duty.

He was one of the oldest members of the N. F. C. F. and his heart was in the work of the great farm organization. He knew that the farmers could get no place on the road of progress if every man lived for himself alone. So he talked and advised organization. He led the people of his community in building up his Unit. He was successful and had a right to be proud of his success.

Bro. Banks died as he lived, a great man. He told his wife and children before the passing, "I have lived the life. I have nothing to condem me." No man could have said anything more noble than that, no matter what his station, wealth or color.

May those who knew him and loved him profit by his example. May they so live that they may meet him in the Great Beyond and enjoy the bliss of the eternity promised to all men and women who live so well that nothing can condemn them.

NOW "KING VEGETABLE"

Cotton No Longer in the Lead, Says Writer

"King Cotton" has gone back to fourth place, according to Everett Swingle, writing in the Chicago Tribune. This should be very interesting to colored farmers, many of whom believe that the one crop, cotton, is the only crop they can get any money out of. Read this article, Bro. Farmer, and you will be convinced that "raising something to eat" is mighty good business and resolve to get into this business next year.

"Vegetables as "big business" would have seemed absurd a decade ago, yet the value of the 1932 vegetable crop in the United States was exceeded only by that of dairying and livestock.

"King Cotton" has fallen from first to fourth place, and below that are the grain crops, and poultry and eggs. Much of the increase in the value of the vegetable crop has been due to the increase as year round products that once were purely seasonal. These include spinach, carrots, beets, green onions, radishes, peas and others that the average family can now afford practically every month of the year.

517,655 Carloads of Vegetables

American railroads and boat lines delivering fresh vegetables and fresh fruits to 66 large city markets in 1932 reported hauling 517,656 carlots. The amount hauled by trucks is not reported, but estimates place the tonnage at a high figure, especially where cities are near large production areas.

Food shipped into Chicago in 1932 by rail and boat amounted to 117,083 carloads, according to W. T. Hall, in charge of the fruit and vegetable market news service of the United States department of agriculture at this point. He had no figures on the amount of produce brought here by trucks.

For the nation and for Chicago as well the commodity having the greatest volume in 1932 was the potato. Fully one-fifth of the fruit and vegetable trade in Chicago consists of

COOPERATION NECESSARY HE SAYS TO TILLERS OF SOIL

Article Written for Federal Agricultural Department Magazine

Writing in the Country Home, Sec. Wallace, head of the federal agricultural department, says that farmers must organize and cooperate or they will never get any lasting benefit from government relief. If it is necessary for white farmers to organize then it is doubly necessary for colored farmers to get together. We publish here an excerpt from his article and hope our readers will enjoy what he has written.

In every industry, including agriculture, there is a stubborn and resolute minority who want nothing less than complete rugged individualism, with full opportunity to wreck themselves and their neighbors and anyone else who dares to stand in the way of their unfettered will. I have seen that element in all groups, but I have also seen in all groups a desire for fairness. Out of our common confusion and misery we shall come, I hope to recognize that we all are facing the same mountain, and we must climb it together if we are to arrive as a people at the better land beyond. That land is America made over in the light of modern knowledge, with a just distribution of goods and wealth.

We live in a changed world. If we are to survive as a nation we must be smart enough and brave enough to change our minds and ways. That, I take it, is the pioneer attitude. I have little patience with men and women who brag of a pioneer ancestry, yet look back longingly for an escape from complexity, and seek to lead a sort of dream-life in the past. The real pioneer was tough-minded and adaptable. He — and she — took things as they were found and made adjustments. Readjustment to things as we find them now is the essence, and the challenge, of the farm act.

We have conquered famine. We have invented means of release from drudgery and of protection against flood and plague. We have created superabundance of goods and services, yet millions of blameless men and women have lost the savings of a lifetime; they have lost their jobs or their farms, they have lost their faith and their self-respect and they live in the shadow of want. This is because we know as yet little about controlling the flood of plenty, and the plague of unfair distribution. The task is plain. We must learn how to live with abundance. Sometimes I think it requires stronger characters, greater hearts, and keener minds to endure abundance than it does to endure scarcity. Certainly it requires a new degree of tolerance among competing groups. We must

(Continued on Page 8.)

GARDEN TOPICS

By Dr. Floyd Bralliar

Many classes of wild flowers are worthly of cultivation— Daisies, asters, golden rod, and wild phlox may be found now— Garden club programs for the whole year are listed.

At this time there are abundances of strictly high-class plants blooming in the wild, many of which are not only worthy of cultivation but are much superior to many of the plants we buy from the nursery trade. We are very strong for the preservation of the wild flowers but we also believe that the final preservation of wild flowers is dependent to quite a degree on the introduction and cultivation of the very best specimens that can be found.

Along the roadsides and in the fields at present can often be found Michaelmas daisies, asters, and goldenrod of unusual beauty. It is well worth the efforts of anyone to move a few clumps of the very best of these into his garden and grow them in the hardy border where they will not only thrive but if given good soil and the benefit of culture will be of very superior quality.

It is altogether possible to grow good goldenrod to a height of seven or eight feet and secure heads of bloom of mammoth size and proportion. It is doubtful whether asters have been very much improved over the best wild specimens in spite of years of cultivation and growing seedlings in the nursery. These plants all have shallow spreading roots and if carefully dug the clump can be lifted in such a way that much of the soil will cling to the roots. The clump should be kept moist and carried to its new quarters where it is planted and well watered. The tops should be cut off to within three or four inches of the ground. True, we will lose this year's bloom but we will have a good strong clump for next year as a result. The large clumps may be divided at this time and if well set and kept thoroughly moist for three or four weeks after they are transplanted will thrive well. One who is able to recognize the foilage of our wild phlox in the autumn can select good clumps at this season of the year and transplant them where they will bloom very freely next year.

There are very few flowers that grow that are more satisfactory for early spring than are pink and blue wild phlox. We can scarcely get too many of them. Plant them in the forefront of the shrubbery border, plant them in the rock garden, plant them in the cut flower garden. There is only one thing to remember, the blue variety will not really thrive in full sunshine but demands plenty of light but partial shade.

Another plant of rare value and wonderful beauty is our common butterfly weed. This is one of the milkweed Asclepias tuberosa) which however, does not have the milky juice. If dug in midsummer when blooming the most freely these plants are difficult to transplant. If, however, they are dug at any time from now on until winter, with a spade so that we can dig out all of the roots without breaking them —which usually means to dig a foot and a half deep —and if the tops are cut back to within four or five inches of the ground and the roots rolled upon some wet material as soon as dug they can be set with every assurance of success. If we search a little we can get this flower in all shades of color from rich golden yellow through all the shades of orange, into the brilliant scarlet. It blooms for weeks and even months in the middle of the summer when gay-colored flowers are scarce, and will thrive either in the boiling hot sun or in the shade. Seed will be ripening soon and if we care to gather a few pods of seed and sow them everyone will come up next spring and if transplanted next fall will produce bloom when they have their second year.

Mrs. J. A. M. wishes to know some good subjects for garden club programs that would help them in learning better how to do their work in this climate. The following would be a good list of topics for a year's work if well studies and properly presented:

1. Soils; their improvement and the types of soil adapted to particular plants.
2. Elements necessary for plant growth and nutrition and the particular work each does in the plant.
3. Plants that thrive in wide variation of soil and climates.
4. Some plants that are worth growing even though they require particular treatment, and what this treatment is as applied to each plant mentioned.
5. What things should be planted in the fall and why.
6. Things we should plant in the spring and why.
7. The cut flower garden; where and how to plant it and what to use in it in order to have cut flowers throughout the season.
8. How and when to cut flowers for best results. How to care for them after they have been cut and how to combine them into bouquets.
9. How to grow plants from seed.
10. How and when to transplant seedlings.
11. Insect pests in the flower garden and how to control them.
12. Rusts, mildews, and other diseases in the flower garden and how to control them.

Mr. P. E. W. has a Marchanell climbing rose about three years old that does not seem to thrive very well. It is in a clay soil and he put bone meal, cow manure and Peruvian guano around it at different times but they do not seem to stimulate it.

This rose either has disease on the roots or has not been given enough good fertilizer. There is one other possibility and that is that it has not had a sufficient supply of water. I would not stimulate growth any more this fall for if you do the new growth is almost sure to be so tender that it will kill back badly. It may even cause the wood that is already on the vine to winter kill. In the early spring spade plenty of stable manure, cotton seed hulls and cotten seed meal or some other good fertilizer into the soil about this bush, being sure not to cut the roots in doing so. When this is done mulch the surface of the soil two inches deep with lawn clippings, cotton seed hulls or some similar material and keep watered well. Be careful not to soak the plant in such a way as to kill it. If new growth does not start vigorously by the middle of April dissolve one ounce of nitrate of soda on a gallon of water and water the plant with it. Unless your plant has so much disease on the root that it cannot possibly grow, this treatment will give the desired results.

Miss L. McL., Nashville, wishes to know whether she should use slacked or unslacked lime on soil that needs liming and how much to use. Asks the best time to plant cuttings of Spirea Van Hootie and also best time to prune a private hedge so that the cuttings can be used to start another hedge. Also asks the best time to root rose cuttings, and whether it injures the lawn to rake the leaves off it; and if it is true that blue grass seed does better if sown on the snow.

In farm work where large areas are to be limed we recommended using finely ground limestone at the rate of two pounds per acre. However for use on the lawn one can usually use air slacked lime equally as well as it is much more difficult to secure the ground limestone dust in small quantities than it is to secure the airslacked lime. Air-slacked lime acts much more quickly, therefore, if we use too much of it we are apt to burn out the fertility of the soil quickly, for limestone causes vegetable matter to decay much more rapidly than would be the case if they had no lime. If the measurements you give for your lawn are correct— about two rods by four making an area of eight rods or one-twentieth of an acre, would advise the use of fifty pounds of airslacked lime which is the equivalent of a thousand pounds to the acre. This should be spread as evenly as possible. Then water the lot thoroughly so as to wash the lime down to the roots of the grass and surface of the soil. There is no particular time when it is better to apply lime, so why not do it now?

If you wish to root either Spirea Van Hootie or privet cuttings, cut them form the first to the middle of December. Make cuttings six or eight inches long and plant them so that only an inch of the top sticks out. You can prune your privet hedge at the present time, however, to make up cuttings. Remove all leaves but the top one or two, plant them where you can keep them thoroughly moist, and practically all of them will live. Thoroughly decayed leaves are a benefit to any lawn and if they are well enough covered with the grass that they do not show I would leave them. Of course, if they are lying on the surface and so injure the appearance of the lawn, rake them up and put them in a pile somewhere and let them decay for future use. If you will fertilize your lawn three or four times a year with nitrate of soda you will soon have nothing but blue grass on it. First application should be very soon now so as to get the lawn in good condition to go through the winter. The next one should come about the first of March, the third one about a month later. Sow thoroughly pulverized nitrate of soda on your lawn, using ten pounds at a time and you will get good results.

Miss M. P. R. says she has a lot of hardy asters that bloom well but when cut and put in water they close up. Many of the Michaelimas daisies close when they go in the shade. You undoubtedly cut yours, put them in water, and took them into the house where they received no sunshine. Asters are usually best cut in the early morning as they will usually keep better if cut at this time. If you dip the tips of the stems say an inch or two in boiling water for one or two minutes it will soften the tissue and cause it to take up water much more rapidly thus resulting in the flowers being gorged so that they do not fade. This is true of many plants that for some reason or other take water slowly.

You also mention having a hydrangea that was sent by a florist. It comes up every spring but does not bloom. Most florist varieties of hydrangeas are not quite hardy here. If you will bend the top over and keep it covered with an inch or two of soil in the late fall and leave it until spring you will have no trouble, for this covering will keep the tops from winter killing and so they will bloom freely. Do not uncover them too early in the spring, or until about the middle of March.

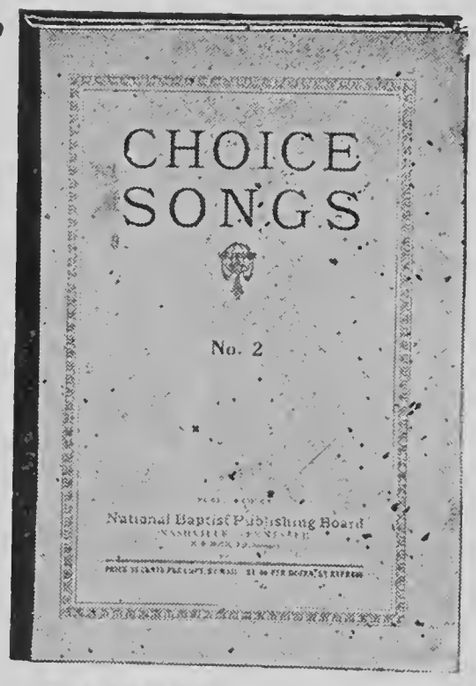
Mrs. B. G. says she has a Beauty Bush (Kolwitzia Amabilis) which was purchased three years ago, but has never bloomed. It is perfectly thrifty and hardy. Grows in a sunny place. She wants to know what to do with this so it will bloom.

This plant has behaved no differently with you than it usually does. Very seldom do plants of this variety bloom before they have been set three or four years. After this they are very free in blooming. There is no reason to believe that the plant lacks anything only age. This plant is closely related to the Deiglias

CHILIAN WINTER POULTRY RABBIT LETTUCE

Best winter green feed. It is economical to grow, can be cut again and again— Yield extremely heavy. Grows 4 feet high loaded with large nutritive leaves. Slip a dollar bill with your address for special seed packet with cultural instruction and to feed 500 hens during winter season.

FAURE PETIT SEEDMEN, VALPARAISO, CHILE, S. A.



Choice Songs

NO. 2.

Exceedingly popular, worth twice the money. Millions of folks have sung from this book, fitted for use in all meetings of an evangelistic nature and well adapted for any other religious use.

Price 20 cts. per copy. $2.40 per dozen. By the hundred, $15.00. express charges not paid.

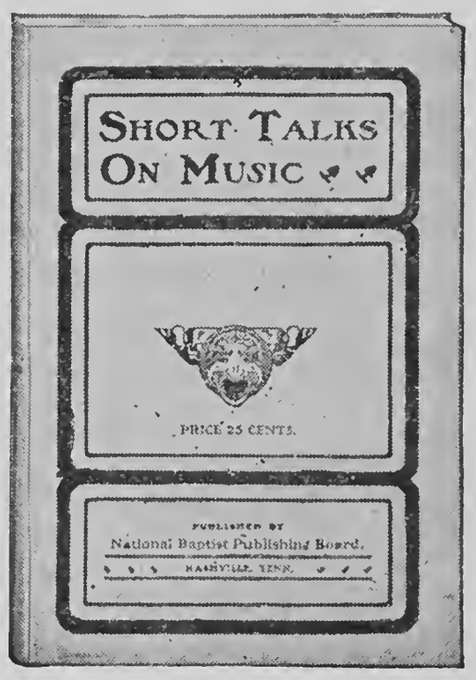
SHORT TALKS

ON

MUSIC

This book contains the simple instructions for those who want to learn vocal music. It is almost a self instructor. No greater help can be found for the anxious student.

Price 30 cts. per copy, $3.60 per dozen.



NATIONAL BAPTIST PUBLISHING BOARD

Henry A. Boyd, Secretary,

523 2nd Ave., North, Nashville, Tenn.

and where they are at their best they are decidedly more satisfactory than is the Beauty Bush. However, you will like this plant very much when it gets into full blooming. It will probably bloom next year.

NEGRO GIRL WINS PRIZE FOR DANCING AT IRISH FETE

New York City— (CNS) —Miss Inez Emptage, an 18 year old colored girl, danced her way to three first places in the three hand reel, the double jig and reel. The other girls who danced with Miss Emptage in the three reel were both white. The dances were typical Irish steps.

Miss Emptage, was born in Dublin, Ireland, and came to this country at the age of one year. She graduated in June from the St. Joseph's High School and was the only colored contestant in the dancing events. She was entered by her dance instructor James McKenna.

The event was sponsored by a white organization, the United Irish Counties Association.

CLING TO FAITH

Cleave ever to the sunnier side of doubt,
And cling to faith beyond the forms of faith;
She reels not at the storms of warring words;
She brightens at the clash of "Yes" and "No;"
She sees the best that glimmers through the worst;
She feels the sun is hid but for the night;
She spies the summer thorugh the winter bud;
She tastes the fruit before the blossom falls;
She hears the lark within the songless egg;
She finds the fountain where they wailed "Mirage."

—Alfred Tennyson.

FETAQUE TAKES HIS BAG OF TRICKS TO "CHI"

Home Boy Is Headliner Up the Country Same As "Down Home"

Fetaque Sanders, son of the well known Wm. N. Sanders, City Probation Officer and a student in A. and I. State College is back from Chicago where he went over big with his hobby as an amateur magician. He is reported as having "knocked 'em cold" with his bag of tricks with as much success up the country as he does "down home." He went to Chicago a month ago. and made the grade quickly among many unemployed "magicians" who were still working for work. With his baton he was able to make much money out of thin air, caused cigarettes to disappear and do many other acts that made the folks marvel at the "Thrill" and "Hollywood" theatres where he was greeted by thousands, it is reported. He was the only Negro entertainer at the Enchanted Island theatre for children and is proud of the distinction of having appeared at the Regal Theatre with Cab Calloway.

Young Sanders made a neat sum with which to help him in school he says. He is reported as being so good with his magic that mother and "dad" are bewildered with his tricks.

HILL ATTACKS PROPOSED WAGE DIFFERENTIAL FOR NEGROES

New York City.—In a devastating statement published today in the September issue of Opportunity, T. Arnold Hill, Director of the Department of Industrial Relations of the National Urban League, attacks the proposal for Negroes to receive a lower wage than whites in order to keep their jobs, in the following caustic language:

"If a correlation were established between the wages paid Negro workers and the minimum wage level for all workers, it would undoubtedly show that the starvation wages received by Negroes have been directly responsible for limiting the economic security of all workers as well as for contracting the market for consumer goods. Thus, Mississippi and South Carolina must forever be backward states as long as one-half the members of their population are not allowed sufficient livelihood to purchase their normal share of their nation's products.

"If employers are unwilling to pay Negroes wages equal to those paid whites, then let them be discharged. There should be no wage distinction based upon race in the NRA codes. To the extent that people are unemployed, to that same extent will those who work have to take care of them. This fits Negroes as well as whites. If all Negroes are discharged in the South, so that whites may work, then the employed whites will have to support the idle Negroes. It is unfair, of course, that the race should be forced into mendicancy, but it is better that Negro workers insist upon wages equal to those paid whites, even if it means their ultimate discharge, than to accept smaller wages and thereby perpetuate the class distinctions that now exist."

Mr. Hill said:

"Is the New Deal departing from the conventional in all important national issues, to be listless to the plight of twelve million persons, merely because they are darker than the other 110,000,000? Are we to have a New Deal for whites and an old deal for Negroes? If the 2,500,000 Negroes in the North and the 9,500,000 in the South earned more they would buy more. The masses of Negroes have never purchased food, clothing, furniture, transportation, hospitalization, and the like. Twelve million people would greatly expand production if they were employed and paid according to their economic value rather than their social status."

Wants to Know Where to Buy Stamps

Washington — (CNS) — A puzzled subscriber to the NRA pledge has written to Washington newspapers an inquiry which has been referred to General Hugh S. Johnson for answer:

It reads as follows:

"Will you kindly enlighten a puzzled subscriber? If I sign the pledge to deal only with concerns which have "signed up" and display the NRA insignia, where am I to get my postage stamps? I can't buy them, as heretofore, from the Government, for the Government hasn't signed up."

THE MODERN FARMER

Official organ of the National Federation of Colored Farmers, Inc.

Leon R. Harris - - Editor

Published monthly by the Modern Farmer at Nashville, Tennessee, and Chicago, Ill.

Nashville, Tenn., Office, 447 4th Avenue, North.

Devoted to the interests of the Farmer, Truck Gardner, Livestock and Poultry Breeder, the Home and the People.

Entered as Second Class Matter, April 10, 1929, at the Post Office at Nashville, Tenn., under act of March 3, 1879.

All contributions for publication in the Modern Farmer should be addressed to The Modern Farmer, 447 4th Avenue, North, Nashville, Tenn.

No libelous matter will be published. Unsigned articles or letters, and those written on both sides of the paper will not be used.

Subscription price $1.00 per year, 75c for six months, payable in advance. Personal checks must be certified. Make all checks or money orders payable to The Modern Farmer.

Advertising rates and sworn circulation figures presented upon application.

"OUR SLOGAN"

STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT.

THE LAW

"It is hereby declared to be the policy of Congress to promote the effective merchandising of agricultural commodities by encouraging the organization of producers into effective associations under their own control.

The Board is authorized and directed—to promote education in the principles and practices of cooperative marketing—to encourage the organization, improvement in methods, and develojment of effective cooperative associations. (Public—No. 10—71st Congress. Sec. 1-5.)

THE GOSPEL

"This law is predicated upon the ability of the farmer to manage his own business, once he is organized to do so. Cooperation is the key to it and only in exceptional cases can the Federal Farm Board have any dealings with a farmer who is not a member of a producer-owned and producer-contrloled marketing unit." Hon. Sam'l R. McKelvie, Former Member, Federal Farm Board.

PRES. DAVIS TALKS TO COLORED FARMERS

Excerpts From Recent Bulletin

Farming is an industry in which over half the people of this country are engaged—either directly or indirectly. It is the only profession by which Negroes are able to maintain a direct connection with the raw materials of the earth. Nature is no respector of persons—either creeds or color. Land will yield as much to the intelligence and brawn of a Negro farmer as it will to any other.

During the past few years most farm products have been selling at prices less than what it actually cost to produce them. This was due to many causes, but mainly over-production. In all other lines of activity when business goes bad. these places can be closed up. A farmer cannot shut down. The cow does not know how to quit giving milk when prices are low.

The Negro farmer—land owner, tenant, share cropper and day hand has in most instances been so badly mistreated during this recent period of low prices, by those we will term "technical law observers" (who are in our opinion nothing more than moral and ethical violators) until many have become discouraged.

The most hopeful and encouraging sign is the fact that we are about to see a new deal. The fear of punishment gives birth to good character and perfect morals.

The pioneers who built this nation, Bible in hand, respected the laws of the land, and they gave to their share croppers and tenants a square deal. Their axiom of barter and trade was "Do unto thy neighbor as thou wouldst have thy neighbor do unto thee." With this sterling character they built the most powerful and richest nation on earth. After their passing came disregard for law, and lack of respect for government. Men became diseased by the unethical use of another's property. When it reached the point of saturation there came a public awakening, and power sufficient to clean and cure. This is the beginning of a new deal for Negro farmers.

Doctor Henry Allen Boyd, distinguished Divine, banker and head of the big Baptist publishing house in Nashville, Tenn., who has in our opinion led the fight for Negro farmers, says:

"HAVE FAITH IN GOD AND CONFIDENCE IN THE PEOPLE is my admonition in these times of stress and economic uncertainty. I have read in my Bible this statement, 'Yet have I not seen the righteous forsaken, nor his seed begging bread.' America has worked itself out of every reverse, has come through with flying colors, every embarrassing situation that it has found itself in, and let us as a people at this time put on the whole armour of faith, do our individual duty, observe the golden rule and then wait on the salvation of the Lord."

Disregard the persons who strew poison, for the man or woman who is guilty of destroying faith in God, man and society is undermining every essential necessary to their future welfare and the promotion of the entire race.

United State Government Announces Farm Loans.

Farmers whose lands are not already mortgaged too heavily and who wish to secure an additional loan, can do so now under the new farm relief law which has just been passed by Congress and signed by the President of the United States. Interest on this type of loan is 5 per cent. Members who wish to apply for additional loans should write this office for information.

Refinancing Your Present Debts

The new farm relief measure will permit farmers to redeem their land they have lost thru foreclosure and sale for taxes, provided the time limit has not expired.

Farmers About to be Foreclosed

Farmers who have mortgages on their land that are now past due and who are unable to meet payments and interest on their debts, can apply for a government loan to take up such indebtedness and transfer the mortgage to the government provided the indebtedness is not over fifty per cent of the normal value of the land and 20 per cent of the insured improvements on said land. On these loans the farmer will not be required to make any payments on the principal for three years.

Reduced Rate of Interest on Federal Land Bank Loans

In about 60 days the new rate of 4 1-2 per cent on federal land bank loans will become effective, and remain in force for a period of five years. If you have a federal land bank loan and unable to meet your payments, it is our understanding that you will not be required to make any payments on the principal of this debt for a five year period, but we urge all of our members who have loans and can manage to keep up their payments, do so.

Cotton

At the time of issuing this bulletin cotton is twenty dollars per bale higher than it was this same time last year, and some of the futures trading months are now over ten cents per pound basis middling. It is being predicted by some of the leading authorities in cotton, that prices will be around twelve and one-half cents per pound basis middling by the time cotton is ready for the market this fall. This would make long staple sell at old time prices. From now on it will be our purpose to keep you well advised what the market is doing, and do not sell your crop now. That is your growing crop.

Groceries and Supplies

The markets are gradually rising. Good patent flour is now around four dollars per barrell and will be higher. Corn meal $2.40 per barrel and will be higher. Granulated sugar $4.73 per hundred. Rice $1.95 per hundred. Pure lard in 50-pound cans $3.62. Boiling meat 6 cents pound. Wheat shorts $1.05 per hundred pound bag. White feeding oats 47 cents per bu. Five string brooms $1.65 per dozen. Lamp chimneys $1.55 for a case of 3 doz. In order to hold down living expenses and make this crop net you something in the fall, stay out of debt just as much as you possibly can. Have more hogs and chickens than you have ever had before, and make your garden twice as large as you have ever had it. Plant something every week, and stand behind your wife in her efforts to put up at least two hundred jars or cans of fruit and vegetables for next winter. If you do this we will have something very interesting to tell you in another issue. Those that don't heed must continue to go on in that same old way. If you have ambition to forge ahead, then carry out these instructions.

Mississippi state plant board inspectors report 22 per cent boll weevil infestation in Holmes county, the highest in the state. 20 per cent is reported in Lauderdale county.

"WHAT'S THE MATTER WITH THE AVERAGE NEGRO FARMER?"

More Interesting Prize Letters

(NOTE—A First Prize of Five Dollars; second of Three Dollars; and a third prize of Two Dollars will be awarded at the Annual Convention in Memphis, to the writers of the best letters answering the above question.)

From Tchula, Miss.

Dear Editor:

The average Negro farmer does not make money because he is not organized and has not a chance to sell his products. He has to take the other fellows' word and that is: "I'll allow you this or that." He can't make money that way. He doesn't know what he buys costs him, he doesn't know what he owes, and he doesn't know how much interest is charged him on the money he borrows to furnish himself and family.

We will have to buy farms of our own, go to work on them, sell our own crops and get out from under the other man. Then we will make some money but not before. We must organize and co-operate and get homes of our own. But as long as we stay like we are, we will be like we are now. As long as we work and let the other man sell what we produce we will never be even able to bury ourselves. Most of us are ragged now, without even money enough to get a dress for our backs.

Mrs. Lucy Hall,
Wife of Market Agent, Bethel Unit, N. F. C. F.

From Tutwiler, Miss.

Dear Editor:

Lack of privilege and lack of faith in God is what's the matter with average Negro farmer.

J. H. Savage.
Sunflower Unit, N. F. C. F.

From Pace, Miss.

Dear Editor:

The trouble with the average Negro farmer is that he is a debt-slave. He depends on the other man for his living. He should depend on himself. A slave must use what his master gives him. We fight every good plan that comes up and we will not co-operate.

The Negro farmer does not look out for his own welfare in business matters. He has nothing of his own. Everything he uses belongs to some one else. He will not educate his children.

If Negro farmers would unite and stand by the National Federation of Colored Farmers and their leaders, as other farmers stand by their leaders, they would get their rights. Negro farmers fail to buy homes as they should. The other race gets great and wealthy by keeping Negro farmers in debt and his children out of school. We should stand together and pray to the Lord. If we would do this we would come out more than conquerors.

N. A. Ward,
Secretary Pace Unit, N. F. C. F.

From Blackhawk, Miss.

Dear Editor:

The average Negro farmer is mostly working by the rule of "Boss". He has to go and come as the boss says. He is mostly found working for someone else, not for himself and family.

The Negro farmer works hard but he does not raise much of anything except the so-called "money-making product," cotton. When that is ready to be harvested, Boss sells and collects. The farmer who has raised the cotton usually comes out in debt, though he has bought nothing except common food and clothing.

Negro farmers are not organized and disorganization is a curse to them. If the average Negro farmer would organize, own his home and farm and raise most of his food products he would become an independent farmer.

Clementine Fluker.

From Tchula. Miss

Dear Editor:

What is the matter with the average Negro farmer is lack of organization through a perfect co-operative spirit. The Negro farmer believes what the other man, who has taken the most from him, says. He likes for some one to put everything near and handy so he will not have to put forth much effort, if any, to get his hands on it. He does not want to be responsible for anything.

He needs to help himself more for the more he helps himself the more he can help others.

Mrs. F. D. Smith.

From Tunica, Miss.

Dear Editor:

The trouble with the average Negro farmer is that he put all of his trust in himself and in the white man. I believe if he would put more of his trust in the Lord and have faith, he would thrive better.

The Negro farmer believes he will starve for want of bread if he is not on "Boss's place." He is afraid to put forth any effort for himself.

A great deal of the fault is ignorance.

The Negro farmer looks for the man to carry on his business for him. He ought to help his neighbors and his neighbors help him.

We don't have enough home economics. We work too much for the benefit of the other man. The Negro farmer ought to look up—get up—and be a Race.

Susie Fowler.

We will publish more of these interesting letters from time to time. We thank the writers for them. Let them roll in.

AID PROMISED THE SOUTH

(Continued from page 1)

potatoes. They were from 32 states, including Illinois.

Represent Many Sections

There is scarcely an agricultural section that is not represented by commodities carried home on the arm of the good shopper. Food markets of many large consuming centers rely upon supplies which are first shipped to Chicago and then reshipped to other points.

Here are some of the commodities which continue to gain in volume because of the increased demand. An even dozen serve to illustrate the trend:

Apricots and artichokes lead the list alphabetically. Blackberries, raspberries, plums, and strawberries are illustrations of the gain in popularity of fruit. Cauliflowers, garlic, kale, green peas, and rhubarb show a gain. And peanuts comprise a new "high" for the last four years. Chicago, incidentally, is the peanut capital of the nation, principally because of the candy and nut processing factories here.

"BOKAYS" FOR MODERN FARMER AND N. F. C. F.

(Continued from Page 1)

will publish the Fortune comments later. We thank our friends for their interest and faith in us. Probably no other Negro paper or organization has ever been given more consideration by such large and influential publications. The News' editorial follows:

970,000 Negro Farmers

"There are 970,000 Negro farmers in the United States, according to the Modern Farmer, official weekly newspaper of the National Federation of Colored Farmers, Inc. The paper is edited by Leon R. Harris of Moline, Ill., and is published in Nashville, Tenn.

The paper is well edited, free from controversial matter and literally sticks to the soil. It is five years old. How many of its readers are dairymen, Mr. Harris does not definitely know, but believes the majority residing in the southern states are engaged in this industry on a modest scale. That both he and his readers are alert to what is progressive in agricultural promotion is patent from his editorial pen and from letters sent in from readers, especially from the south, where 181,016 Negroes own their farms.

Of the 118 Negro farmers in New York state, 112 own the acres they till. In Pennsylvania there are 353, of which 224 own their land and 25 of the 33 in Connecticut are owners. The greatest number of Negro farmers live in Mississippi, the total being 182,000."

There are 5,264 Negro farmers in the state of Maryland, a decrease of nearly a thousand since 1920. Three thousand are full owners. Tenantry in this state decreased during the past ten years. Value of land and buildings owned by colored Maryland farmers is $6,695,319.

N. F. C. F. CONVENTION FLASHES

Interesting News For Colored Farmers

The 1933 Annual Convention will meet in Memphis, Tenn. Time of meeting,— October 25-26-27.

You are invited to attend all sessions. Members of the N. F. C. F. and their families should not fail to attend. All colored farmers and friends of colored farmers should be a member.

Thursday will be Women's Day. There will be prominent speakers and interesting discussions. Members of auxiliaries and Sewing Clubs will report the progress they have made this year.

Notify our general office if you plan on exhibiting anything. Prizes this year will be bigger and better than ever. Prize list will appear in an early bulletin. Let us have double the number of exhibits we had last year.

Our annual banquet will be held Friday night. The public is invited. Dr. Henry Allen Boyd and Editor Leon R. Harris will deliver the main addresses. Be sure to be on hand and hear them.

Representatives of state and Federal agricultural departments will be present to explain the "New Deal" for farmers. This is a momentous subject and we should not fail to hear about it. We will not go wrong if we know the way to go.

See the model of the new cotton chopping and bunching machine invented by a Negro dirt farmer,—a member of the N. F. C. F. The machine is patented and will soon be on the market. The greatest invention since the cotton gin. It will be on display at the convention.

Be sure and attend the convention. Get all the farmers in your community to attend. You need the recreation and instruction and you only get the opportunity once a year. If possible, bring the whole family.

Remember—On to Memphis: To the Annual Convention of the National Federation of Colored Farmers, Inc.

HENS IN LAYING RACE FASCINATE CROWDS AT FAIR

White Leghorn Flock Leads Rhode Island Reds

By Paul Potter
(In Chicago Tribune)

Despite the summer heat and current governmental moves to curtail farm production, 122 flocks of American and Canadian poultry are proceeding to set new records in egg laying in the international contest housed in the southernmost point of the World's Fair grounds.

The contest, which has drawn together what poultry authorities declare to be the finest collection of pedigreed laying stock ever assembled, is seeking to better the world's record in which a hen lacked only a few eggs of laying one for each day of the year.

Of unusual interest to the crowds in daily attendance at "Poultryville" in the Exposition is Lady Dixiana, five year old white leghorn from Clinton, Mo. Lady Dixiana has laid 342 eggs in 365 days in a previous contest. Now she is continuing to stay near the head of the class in which her grand-daughter is competing.

Visitors from Every State

Residents of every state in the Union and many foreign countries have visited the exhibition, according to Prof. F. H. Stoneburn, poultry authority from Storrs, Conn., in charge of the educational features. Delegations of officials interested in securing American poultry stock and the most modern American methods of poultry production have been sent from the Philippines, Hawaii, Japan, China, Mexico, Czechoslovakia, Brazil, and Panama. Shipments of fine fowls and equipment have been made to several of these countries from the Fair grounds in recent weeks.

Included in the exhibition are the latest types of poultry equipment, ventilating equipment, feeders, automatic trap nesting to record each hen's production, and the ultra modern laying batteries in which chickens are confined under ideal conditions all their life. City folk seem as much interested in the exhibit as those from the rural sections.

Contest Goes on Till October

The laying contest itself started May 29 and does not end until late in October. Each breeder has entered 13 hens and a rooster, the latter being on hand to show visitors true types for each breed and variety. Fertile eggs are hatched in incubators on the grounds and the young chicks are shipped to distant points. Other types of fowl are on exhibition, including bantams, peafowl, wild turkeys, wild geese and ducks, pheasants, and pigeons.

Thus far the contest is a close race between a white leghorn pen from New York and three pens of Rhode Island Reds from Maine, Massachusetts, and Michigan. The records depend upon a scoring system in which credit is given for total productions of eggs per pen and per ten best hens in each flock. A premium is given those hens producing eggs weighing 2 ounces each and thus far the total production in the contest is averaging eggs weighing above the standard of 24 ounces per dozen eggs. Heavy birds are competing in a separate class from the light birds.

A HARRASSED FARMER'S ADDRESS TO HAPPY MULE

(Contributed by Dr. I. Cohen, Prominent Dentist of Shotwell Building)

"Bill, you are a mule, the son of a jackass, and I am a man supposed to be made in the image of God. Yet here we work hitched together year in and out. I often wonder if you work for me or I work for you. Sometimes I think this is a partnership between a mule and a fool. For surely I work harder than you do. In plowing this piece of ground we cover the same distance, but you have four legs to walk on and I have only two. So mathematically speaking, I do twice as much work per leg as you do.

"We are now preparing for a corn crop. When the corn is harvested I must give one-third of it to the landlord for being kind enough to let me use this corner of God's universe. Another third goes to you, and what is left is my share. But while you consume all your third with the exception of a few cobs, I have to divide my third among a woman and several children and two hogs.

"Bill, you are getting the best of me. It ain't fair for a mule, the son of a jackass, to rob a man, the lord of creation, of his substance. And come to think of it you only help cultivate the ground. After that I have to cut the corn and shock and husk it, while you look over the fence and 'he-haw' at me.

"All the fall and part of the winter the whole family, from me and the old woman down to the baby, have to pick cotton to help raise money to buy you a new set of harness and pay interest on the mortgage! It doesn't worry you any. Not a darn bit. You leave all the worrying to me, you ungrateful, ornery cuss.

"About the only time I seem to have the advantage of you is on election day, for I can vote and you can't. But if I ever get any more out of politics than you do, I can't see where it is."

From "The Fool Killer."

The first car of watermelons shipped out of Florida in 1933 left Naples April 27th. It brought $750.00.

INTERESTING NEWS AND NOTES

The tallest farmer, the fattest farmer and the farmer with the largest family were awarded prizes at the Chicago World's Fair during "Farmers' Week." Henry A. Wallace, secretary of agriculture, spoke on "Corn and Hogs."

Lee Chrisman, a Kentucky farmer living near Danville, recently won a championship for shouting. His voice was heard a distance of eight miles and in three states, Kentucky, Virginia and Tennessee.

23,000 bales of cotton were burned recently in the largest cotton warehouse in Europe which is located at Lille, France. The loss was $2,000,000.

An Indian woman, Hannah Anderson, of Tulsa, Okla., recently won a lawsuit and was awarded oil funds totalling $1,050,000. The suit was to quiet title to land she had inherited from her grandmother.

Illinois farmers are planting alfalfa and red clover on land where chinch bugs have ruined corn and barley crops. The bugs have played havoc this year in some areas.

A Pennsylvania bricklayer dropped dead fifteen minutes after he was stung on the forehead by a bee.

Farmers are warned not to pay fees to anyone for information or aid in securing loans from the Federal Land Banks. The government will prosecute anyone who attempts to charge farmers for this aid.

Corn belt farmers are holding much corn for higher prices. Corn that is now bringing farmers fifty cents is the same corn that he was offered ten cents per bushel for last spring.

Ras Desta Demtu, special ambassador of the king of Ethiopia, visited Washington recently to repay the visit of the American special mission which attended the coronation of the king in October, 1930. He was royally entertained and had luncheon with the president at the White House Although called by white people, non-Negroes, any sensible person can tell by looking at the Ethiopians that they are more Negro than white.

Believing that the plan will increase prices at least 30 per cent, the government plans to buy up five million hogs, slaughter them and give the meat to the needy. A processing tax on hogs will pay the bill.

At a sheriff's sale of a farmer's personal property held in Pennsylvania, pigs were sold for three for a nickle and horses and bulls at five cents each. The property was sold to satisfy a judgement of $1800. Farm organization members, who sympathized with the debtor, bid in the property and returned it to him. The courts afterwards declared the sale illegal.

Henry Morgenthau Jr., head of the firm credit administration, estimates that the government lost $350,000,000 of the money the farm board spent in its wheat and cotton stablization venture.

A Negro preacher in South Carolina refused to sign to plow up his cotton in accordance with the government's acreage reduction campaign. A few day's later, lightening struck in the middle of his prized cotton patch and killed a large part of his best stand. He accepted this as a sign from heaven and sent word to the committee he was ready to sign up and plow up.

No home will be foreclosed in the state of Wisconsin for ninety days. This will give debt ridden homeowners a chance to apply for aid from the federal government

Seven million dollars will be spent for flood control on the Mississippi river. Work will continue in tne Memphis, Vicksburg and New Orleans districts and will provide employment for approximately four thousand men until next July.

The world supply of American cotton was reported the middle of August to be two million bales below last season, the first reduction since 1929.

An interesting depression story comes from New York. An artist who sold many cover designs to magazines for as much as $500 to $1,500 apiece was dead broke. He lived in a fine apartment house. The management knew he was broke but would not put him out for they knew he might make all he owed in one afternoon if the job came to him. But the truth was that he and his family had been missing meals,— had not had enough to eat for a long time The people who lived on the floor of the apartment where the artist lived began to miss their bottles of milk every morning. They complained and would not pay the milk man. The milkman watched. One morning he saw the artist's colored maid scoop up all the bottles and carry them to her master's door. He called the police. They discovered that the milk was all that was keeping the family of five alive. The maid was working out of loyalty and was risking a jail sentence just to keep the family alive.

The police of a western city were called by a motorist who thought he heard some one yelling for aid. When they arrived on the scene they discovered some calves were being loaded into trucks to be taken to market. The calves were bawling loudly.

The first shipment of agricultural products on the new Illinois water way was a barge of 100 tons of alfala and timothy hay.

Mr. Wood Stroud, a pioneer Arkansas producer of Nancy Hall sweet potatoes, died recently at the age of 75. Mr. Stroud was the first commercial produced of Nancy Halls in the state.

$135,000,000 will be paid to wheat farmers of the nation who agree to cut acreage this fall. It is estimated that the 1934 crop will be kept to about 60 per cent of the average production af the 1928-32 five year period.

A Pennsylvania farmer died of grief over the sale of his horses. The farmer, 70 years old, was retiring. All went well at his sale until his six horses were about to be auctioned off when he broke down and a short time later died.

INDUSTRIAL CODES MUST INCLUDE NEGRO WORKERS ROOSEVELT TOLD

New York, July 7—President Franklin D. Roosevelt was warned this week that he proposed industrial code of the cotton textile industry does not benefit the Negro workers in that industry and, in fact, specifically omits benefits from the classes of work which have the most Negro employes.

In a telegram to the president, Walter White, secretary of the National Association for the Advancement of Colored People, pointed out that the minimum wage provision and the hours of labor are not guaranteed to "outside crews and cleaners" in the textile code and that these two classes of workers contain many Negroes. The telegram urged the president, who has the final say in the adoption of the various codes, to insist on the inclusion of these classes in the benefits of the National Recovery Act.

In addition, the N. A. A. C. P. urged the president to see that there was included in the textile code and all other codes a specific clause prohibiting discrimination against any group because of race, creed or color.

ATTORNEYS BATTLE OVER OWNERSHIP OF MULE AFTER IT DIES

Memphis, Tenn., Sept. (ANP)—Real life humor oftimes supercedes that extolled by such geniuses as Roark Bradford and Octavious Roy Cohen.

Mrs. Mattie Smith and Will Ford both employed high powered white counsel to represent them in a suit Wednesday in court over the recovery of a mule. The attorneys argued heatedly, long and went to bat several times on technical points over the legality of ownership of the stubborn species of the quadrapedes.

Finally Mrs. Smith in a witty manner introduced the corpus delecti angle and ended the legal controversy. She declared:

"Gentlemen," she said, "I don't like to hear you white folks fuss about nothing. Cause that mule done took and died last week."

HE LAUGHED

He laughed when his foreman urged greater care
As he carelessly cleaned the machine.
The doctor remarked as he bound up the wound,
"It's the very worst mangling I've seen."

He laughed when they told him the ladder was weak,
And remarked it would hold half a ton.
It cost him a hundred to settle the bill
When the doctor and nurses were done

He laughed when the doctor ordered him home
For a couple of days with a cold.
In a ward for consumptives he thinks of the past;
It's too late now to help him he's told.

He laughed when told that infection might come
From leaving a cut undressed.
'Tis said he looked natural as if asleep;
His headstone says he's "At Rest."
—"Walworth Wewanee Craftsman."

"DOING GOOD"

At the funeral of a prominent physician in Columbus, his family was not a little startled by and perplexed at the number of floral offerings received from persons unknown to them, and also by the presence of a large group of evidently poverty-ridden men and women who came unobstrusively and left in the same way.

The deceased had built up a modest fortune and, it was believed, had given up active practice some time previously. Yet, in spite of failing health, he had always appeared busy and had been away from his home a great deal. All this remained unexplained until a shabbily dressed woman, sobbing her grief, halted a moment at his bier and said: "The poor will miss him."

In his declining years, he had turned a large and lucrative practice over to others and had built up a larger one from which he could never hope to gain a cent financially. No one but himself and those he aided knew about it. This, we believe, was the true spirit of Him who "went about, doing good."

—Columbus Dispatch.

UNCLE REMUS STORIES TO BE REVIVED WITH ACTING DOLLS

Atlanta, Ga.—(CNS)—The Uncle Remus stories created by Joel Chandler Harris—The Tar Baby, Br'er Fox, Br'er Rabbit and other "critters" are to walk and talk again as marionettes.

Lucian Harris, son of the Georgia author, states that Tony Sarg plan a reincarnation of the famous characters as acting dolls in his New York studio and will take them on tour this winter.

"Miss Meaders and de gals," who lived in "de big house" also are to be recreated as puppets in the dramatization in miniature of old plantation life.

Harris said Sarg had arranged for production with permission of the author's widow, who is to get a royalty. Joel Chandler Harris' quaint tales told through Uncle Remus have entertained youngsters for ye rs 'n book form and the characters now are to find expression by a modern medium.

BIG GOLD RUSH BEGINS WHEN YOUTH FINDS ENOUGH COINS TO BUY CAR

Wewoka, Okla., Sept., (ANP)—This city noted for its oil and frequently referred to as "Wewoka, built by Oil," is now having what is termed "A Gold Rush" and a Negro youth whose name is being withheld has proved the star player of the "gold rush." Here's how it all happened: A Negro youth found a large quanity of gold coins of sufficient amount to purchase an automobile—and the mad rush began.

The gold coins found by the boy are believed to be a part of the $14,500 loot which Floyd Rice is purported to have hid near here in 1926. At that time Rich was only 16 years old, and related how he stole the money from a man named Campbell, but claimed he buried the money and could not find it. Rice was given a suspended sentenced when no one appeared against him.

THE GREEN PASTURES COMPANY TO OPEN FOURTH SEASON

New York City. — (CNS)—Richard B. Harrison and "The Green Pastures" Company will start a tour of the South, opening in Richmond, Va., Monday, October 2. The opening performance this season will be the 31st for the play which opened at the Mansfield theatre in this city. February 2, 1930. Thirty or more southern cities are scheduled to see the show.

A decision to revive the famous stage production was reached only after much discussion by its producer who had originally planned to have Delawd and his gang invade Europe. It however was decided that those sections that had been denied the chance to see the show (the Southland), should be favored before going abroad.

Application for Membership

NATIONAL FEDERATION OF COLORED FARMERS (Inc.)

Vincennes Hotel, Chicago

As a farmer, I believe the time has arrived when the Colored Farmers should form a National Organization devoted to diversified production, grading, packing, shipping and marketing of farm products and to the purchase of needed farm supplies through co-operative methods, to the end that a more prosperous financial condition may result from their efforts as producers.
I hereby subscribe $5.00 for membership in the National Federation of Colored Farmers for a period of 12 months from date. Also $1.00 for an Annual Subscription to the Modern Farmer.

Name .... Address .....

City ..... County .....

State ..... Date .....

SAVE MORE! EARN MORE! HAVE MORE! BE MORE!

Every Colored Farmer

SHOULD BE A MEMBER OF THE

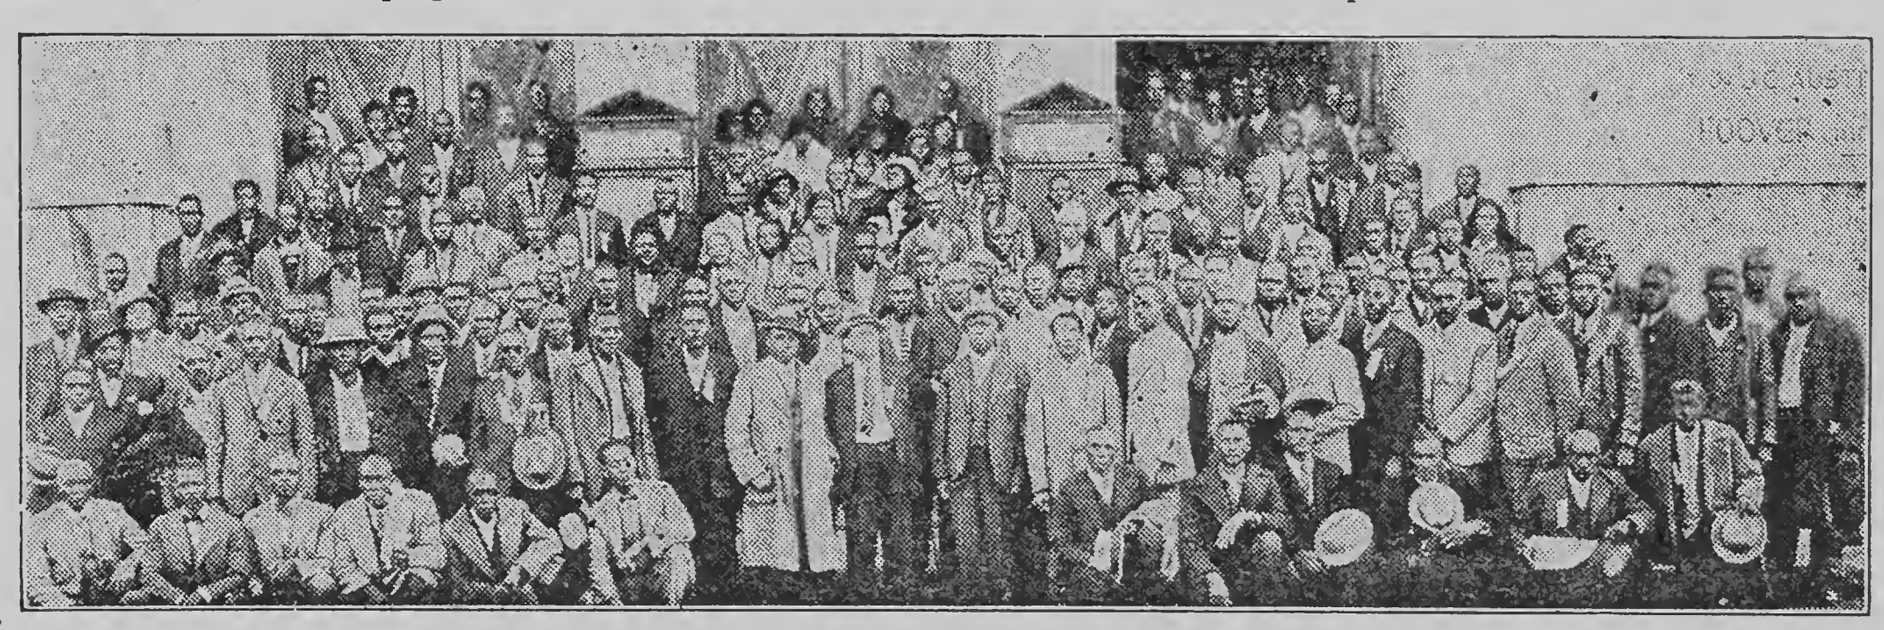
The National Federation of Colored Farmers

ORGANIZED, JUNE 5, 1922
PROGRESSIVE, Not Radical!

INCORPORATED, NOVEMBER 19, 1930
SANE, NOT VISIONARY!

IF A FARM OWNER, TENANT, SHARECROPPER OR FARM HAND, YOU SHOULD JOIN THIS ORGANIZATION

It is the only national organization of colored farmers in America.
Its growth has been steady and substantial.
Its officers and leaders are men of experience and foresight.
It is non-partisan and non-secret.
Its actions speak louder than its words.
Its policies are sane, sound and progressive.
It teaches co-operative buying, production and marketing.
It is a builder of Negro farm communities.
It promotes the general interest of all its members.
It studies and investigates all agricultural problems.
It fosters the improvement of rural homes, and rural life.
Its members work together to accomplish what cannot be done individually.
It makes farm business more profitable.



Delegates to 1932 Annual Convention, N. F. C. F., Memphis, Tennessee.

The following are excerpts from letters on file in the national office:

"Through the N.F.C.F. we have been able to grow crops in Wisconsin that none thought could be grown here. We are planning for group cooperative farming next year since that is the only way we can get our people out of these northern cities back on the farms."

David Bassett,
Wisconsin Dirt Farmer.

"I have been with the N.F.C.F. more than five years, have traveled in every county in the Delta and have made a host of friends among both white and colored farmers. The N.F.C.F. makes colored farmers better farmers, better Christians, better citizens."

Rev. B. W. Byram.
Mississippi Farmer-Minister.

"The N.F.C.F. inspires the young Negro to turn back to the soil and again become a part of the backbone of the industries of the world, the industry of farming."

Grace Wilson Evans,
Indiana Clubwoman.

"Nothing is needed among colored farmers in the state of Oklahoma as much as such an organization as the N.F.C.F."

Rev. J. D. Brown,
Oklahoma Farmer-Preacher.

"I joined the N.F.C.F. when we were having trouble trying to save our farm. Our National officers got busy and saved it for us. The N.F.C.F. is the greatest organization in the country for colored farmers."

R. H. Sanders,
Missouri Farmer and Stockman.

"Since joining the N.F.C.F. we have saved in our community from 25 to 40 per cent on the purchase price of farm and home supplies."

J. H. Tenholme,
Alabama Dirt Farmer.

"We have asked our field representative to make a special investigation regarding the distribution of relief in counties where there have been complaints."

National Officers, The American
Red Cross, Washington, D. C.

"Today I'm holding the deeds to 86 acres of land, one mile from railroad station, on good road, with good house, water and a fine growing crop. For this I am indebted to the N.F.C.F.

J. L. Lebeaux,
Louisiana Dirt Farmer.

"The N.F.C.F. has safe and sane leaders. There is nothing we will not do for the organization that has done so much for us."

L. T. Gartside,
Georgia Dirt Farmer.

"The N.F.C.F. is worth much to humanity in general and to our group in particular. Your officers are some of the most beneficial leaders of the times."

President of a Georgia Agricultural College.

"You may have the complete assurance that the bank wishes to encourage the sale of its land to any of the members of your Federation who are in a position to properly take care of farms and handle them in a workmanlike manner."

W. E. Clark, Land Dept.
Federal Land Bank of
New Orleans, La.

"I am favorably impressed with the objective of your Federation and I sincerely hope that you will be successful in cultivating among the colored people the mind to cultivate the soil and thus insure a happier existence than that which accompanies them in the overcrowded cities especially in periods like that through which we are passing."

Hon. Daniel C. Roper,
Secretary of Commerce.

"We expect to produce several cars of sweet potatoes cooperatively this year. We have received more help from the N.F.C.F. in two years than from any other organization in the past twenty years."

John Thomas,
North Carolina Dirt Farmer.

"By following our leader's instructions and raising less tobacco and more something to eat, I have kept out of debt during these hard times and am better off than I have ever been before."

William Millson,
Virginia Dirt Farmer.

"I am tired of talking organizations. The N. F. C. F. is a sure enough DOING organization."

T. L. Brackenburg,
Florida Dirt Farmer.

What the American Farm Bureau, the Grange and the Farmer's Unionhave done for the white farmers of this country, the National Federation of Colored Farmers can do for you. Your membership in the N.F.C.F. tells the world how good a farmer you really are. Join today! Join thelocal unit in your community. If you have no unit, organize one. Write to the national office for all information.

THE NATIONAL FEDERATION OF COLORED FARMERS, INC.

C. R. RICHARDSON, Chm. Board of Directors.

CO-OPERATION NECESSARY

(Continued from page 1)

unite and set going new measures by which this nation may live in a balanced abundance, at peace with self.

Cooperation is Necessary

I am hoping that the farm act can be operated in that spirit. A bill is mere machinery. A bill in and of itself can not have a soul. It is up to the men representing the farm organizations, to the rank and file of the farmers, to the men in the distributing trades, and to the consuming public to furnish such aid and understanding as will provide this farm emergency act, and all the industrial adjustment measures which have grown out of it, with a soul. If our present great effort to set things right is furnished with a soul fraught with bitterness, the act and all the machinery we set up will fail. If we approach it in a spirit of cooperation, it can succeed.

I confess that I am sometimes irritated when people try to put a tag on this effort, and say that it is a communist scheme, or fascist, or socialist. Those are all old tags. The farm act is something new. It is an American invention. The proposal is not to scrap capitalistic individualism, but to protect it from self-destruction, and to preserve that part of it which contributes to the security and the self-respect of the ordinary American. The proposal is not to destroy initiative but to guard against the abuse which lead to general destruction.

Can we not become as efficient in our social experimenting as we have already proved ourselves in scientific experimenting? The great trouble with us now, as I see it, is that we have used nearly all our knowledge and nearly all of our restless native ingenuity in setting up machinery and then turning it loose to fight. We have created dragons of steel and endowed them with the strength of coal and gasoline or with the power of waterfalls. And now these machines fight one another, ungoverned; and millions of human beings are crushed or driven against the wall.

Not only that: We have set up terrifying machines of flesh and blood, commercial machines, political machines, class machines; contending aggregations of human lives "sold" as we say, to the same purpose, harnessed, and in some mysterious way dehumanized. These machines also we have left for the most part ungoverned; and they rule us, and have all but wrecked us. We must turn that situation around. We must govern both the mechanical machinery which has made our social machinery so out of date; and we must also in building our new social machinery take care to see that it is endowed with a soul, and not run to serve the selfish interests of any group.

The farm emergency adjustment act is our first great adventure in the direction of social inventiveness. Our children, looking back, may smile at it, just as today we smile when we remember models of the first automobile. Everyone who is 30 years old can remember those first crude models, snorting along the roads. Compare those models with 1933 models and you will see how fast we can make progress, once we put our minds to it.

Lift the hood of your car sometime when the engine is running. Even if it is rather an old car now, you will have before you a marvel. Discordant elements of earth, assembled and ordered by the power of human intelligence, have here been made to function harmoniously, with swiftness and power. It is unthinkable that a people with brains enough to make such engines will fail to harmonize the discordant human elements which now divide and impoverish us.

NEGRO'S OPPORTUNITY

(Continued from Page 1).

Rev. D. D. Crawford, general secretary of the General Missionary Baptist Convention of Georgia.

This wise Negro leader points out that the Negro occupies a secondary position to the skilled labor of the cities, and that on the farm he will find his best opportunity for independence, prosperity and contentment.

The soundness of this position is proven by such Negro colonies as the one in Hancock county which last year opened a community center, with a handsome community house offering many educational and entertainment feature which are available to few Negroes living in the cities.

In such colonies the Negro can find the ultimate in freedom of acfor improvement— things he can tion, contentment and opportunity hope to achieve in the city only after long years of endeavor, if ever. As Rev. Crawford says, in the city skilled labor has "bested the Negro as a mass, but nobody can beat them on the farm."

Not only the Negroes, but the communities from which they would go and the sections to which they would move, would be benefited by such a mass movement as that suggested in the Crawford communication. It would mean more jobs for those left in the cities and more taxes and more patrons for the stores in their new surroundings.

Editor Constitution: I am thoroughly convinced that our country and practically all groups of our people are in need of a rejuvenated leadership, whose thinking will be straight and whose actions will be right. This is especially true as it relates to the Negro population of this country.

An ot our groups are making a sad mistake by trying to live in city or town and to leave the farms to grow up in weeds. We are also making a mistake by trying to cure all our economic ills with construction and public works. We should take a holiday from such efforts and with the money locate the people on the farms and give them a push-off toward self-support and an independent livelihood. The unemployed must go back to the farm, it matters not how bad they may hate to do so.

As to my people, under the present trend, the rural life is their very best hope for the future, especially the immediate future, and I would like to see a mass movement in that direction. In the cities, skilled labor has them bested as a mass. Nobody can beat them on the farm. Then why not encourage them to do well that which their training best fits them for until they become competent and efficient in that and the few who may choose the trades and profession will have a larger clientele from which to draw support.

The masses of no people will ever become professionals and specialists. That is the lot of the few. It is therefore wrong to hold up phantoms before the masses and cause them to aspire for the impossible rather than to be content in doing that which their ability enables them to do best.

I wish for my people the highest possible measure of development and success, but I know the masses cannot attain these in leaps and bounds. Like all others, the group must take time to lay a firm foundation and they should build on that with care and much deliberation. The position I take here is subject to criticism by those who only have an immature knowledge of the problems here involved and the ends to be attained, but to those I answer, that I have given more than 50 years to development efforts among my people and I have studied the situation from every angle prayerfully.

In my opinion, the government could use some of its money to a most profitable end by colonizing Negroes on farms in independent Negro communities and give them a chance to think and work out their salvation independent of the white man. He seems to be embarrassed by the white man's presence because his dependence upon the white man for centuries. At the same time, I think the white man's attitude toward the Negro should be of constructive sympathy and encouragement. The white authorities should give the colony good roads and ample protection, and encourage the building of good homes, churches and schoolhouses and also see that they get a just share of the public school funds to successfully run their schools. Here in the south and Georgia, it seems to me, is the best place in the world to make such an experiment. All countries seem to be experimenting now, and this to my mind, strikes me as being practical.

Our money investments to my thinking should go into productive enterprises and industry, from which we should receive returns and you cannot get this from public works. Money investments should reproduce itself.

D. D. CRAWFORD,
Executive Secretary, General Missionary Baptist Convention of Georgia (Colored).
Atlanta, Ga., May 4, 1933.

ECONOMIST SHOWS

(Continued from page 1)

and 148 quarts of home-canned fruits and vegetables as compared with 86 quarts.

"While its is unlikely that the families that used the smaller amounts of home-raised products bought as much other foodstuffs as the differences indicate, it is undoubtedly true that they did buy much more than the families using the most home-raised products. Certainly they did not live as well."

THE NRA AND THE NEGRO

(Continued from Page One)

eral in their spending. Very often they spend too much. Again, they spend all they earn among the people where they are employed. That they spend too freely and save too little is one of their most serious faults. If the people at large want to make sure that the money being paid in the form of wages is put back into circulation, they should see to it that colored people are given employment, and that they are paid a reasonable wage for their work. If the merchants want their goods to move off the shelves and counters, if real estate agents want their rent houses reoccupied, if motion picture operators want their shows better attended, they should see to it that colored people are employed about their places of business, and they can rest assured that every ounce of their purchasing power will be used in pulling the country out of this depression. Secretary Perkins is exactly right when she said that the south is greatly in error when it insists on paying a low wage to any part of its citizenry. Labor unions in exercising their right of collective bargaining in insisting on colored workers being denied membership in their brotherhoods are making the same serious mistake.

In the execution of the National Industrial Recovery Act, it is reported that where the code requires shorter hours and a higher wage, colored workers not only here in Jackson and Memphis, but in many places, are peremptorily discharged. They do not want to pay colored workers a higher wage. This procedure is not only unfair and unjust, but it operates directly against the effectiveness of the act,

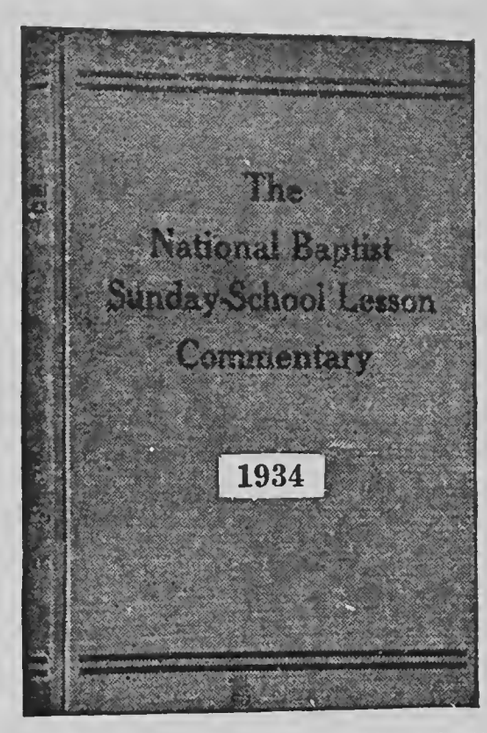
I am making this appeal or plea and makes its success impossible. not on the basis of race, but in the larger interest of the people. "A new deal"—a square deal—requires it.

We all must remember that our country, and in fact the whole world, is in trouble. We have a common enemy to fight, and it is going to require the united effort of all to win. Let us not dissipate out strength by antagonizing the interest of the other."

J. F. LANE.
Jackson, Tenn.

Believing that the plan will increase at least 30 per cent, the government plans to buy five million hogs, slaughter them and give the meat to the needy. A processing tax on hogs will pay the bill.

Feed crops in the west and Canada have been hard hit by drought this summer and corn, oats, hay and mill feed is apt to be high this winter. Colored farmers are warned to save plenty of feed. Any surplus will bring a good price.



SUNDAY SCHOOL LESSON Commentary

For 1934

Every Sunday School Teacher Should Have It

SIX REASONS WHY YOU SHOULD USE IT:

First: It is the production of your own National Baptist Publishing Board which gives employment to more of our people than any similar concern in the United States.

Second: It is purely baptistic and orthodox in every particular.

Third: Its doctrines are unquestioned, and the Biblical requirements are stressed in a manner to make it absolutely dependable.

Fourth: None of the modern theories leading to skepticism are admitted.

Fifth: It aims to be true to the teachings of Jesus and whatever there is presented which has not the "Thus saith the Lord" is discarded as unsafe and destructive of the best interests of mankind.

Sixth: Thoroughly adapted to the uses of our Sunday school constituency, it stands as a beacon light to all those who would like to rise in the scale of intelligence and demonstrate the qualification necessary for the accomplishment of the "Great Work" devolving upon us as a people.

COLLEGE GRADUATES AS FARMERS

Carrolton College Editor Of Northfield Minn., Writes

The plan of Carleton college at Northfield, Minn., to allow seniors receiving degrees this spring to return to college next fall for further study without paying tuition or fees should commend itself to college and university authorities throughout the country, according to the St. Paul Dispatch. Thousands of men and women who will finish college work this spring will be unable to find suitable employment under present economic conditions. Even if the economic trend is definitely upward it is extremely unlikely that revived industry and business will be able to absorb the supply of workers available within the next year.

Many graduates and society would benefit if these young people might return to school and continue their work of preparation a little longer. The Carleton plan will make such a course possible for many graduates who will be able to maintain themselves at college when the bar of tuition and other fees is removed.

Ultimately it may be desirable to prolong the period of preparation for work as a regular thing. Such a practice would not only improve professional standards, but it would have the effect, if applied on a large scale, of making a significant cut in the supply of trained men. Whether it is advisable as a permanent policy, however, certainly in the present emergency it would be a good thing if, instead of turning their students onto the "market," colleges would induce many of them to continue their work until a year later, when by all available signs the prospects of employment will be brighter. If adopted widely the Carleton plan should be of immense help.

When Farm Aid Doesn't Aid

Bloomington Pantagraph: Senator Arthur Capper of Kansas is among the veterans of the farm relief movement in the United States. He had been working along that line for many years. Although a republican, he has given earnest support to the proposals by which the Roosevelt administration was trying to give the farmers a better break.

But Senator Capper is "amazed" to find that plans for farm aid through government agencies are not working in his state, however they may be functioning in other states. The senator has lately completed a tour of Kansas, following his return to his home state after the special session of congress. He was hoping to find substantial progress in putting the government plan for refinancing mortgages on the farms. But his summary of what he found was thus stated:

"Frankly, I am amazed at the difficulties being encountered. Numerous cases have been brought to my attention in Kansas and other middlewestern states, in which relief was not obtained although they seemed to constitute just such situations as the new law was intended to alleviate. In one county only five out of 112 applications for farm loans were approved by the federal land bank."

MORE PEOPLE ON FARMS

Report from U. S. Department of Agriculture

Events affecting agriculture have moved swiftly during the past month. The abandonment of the gold standard by this country, the depreciation of the dollar in foreign exchange, the bursting forth of the inflation sentiment into legislative action, the coincident rise in stocks and in many basic commodity prices, all present a picture of forces in motion whose ultimate effects may far-reaching .

So far, the effect has been good for farmers. Wheat and other grains, hides, butter, and cotton prices have advanced 10 to 40 per cent.

In the case of wheat, the so-called inflation buying has been accompanied by bullish developments in the actual crop situation in this country. The report issued last month showed winter wheat in the poorest condition ever recorded, drought still wide-spread, winter-killing heavy in the Northwest, nearly a third of the acreage likely to be abandoned, and probability of the smallest crop in 29 years. Assuming an average spring wheat crop, the indications suggest that we will not raise enough wheat this year to meet domestic requirements and consequently that the surplus carried over will be further reduced.

The improvement in prices, as would be expected, occurs selectively, not only between enterprises but within given lines of production. Livestock has not yet felt the inflaence of rising prices as have the important cash crops which are sensitive to world markets. Yet butter, one of the principal livestock products, advanced about one-third at New York. This marked rise in butter occurred in the face of a milk situation so serious that it has led to "strikes" and disturbances in Wisconsin and New York and even to the fixing of milk prices by legislation.

Spring work is going forward everywhere, though bad weather has delayed grain and cotton preparations in some areas. The movement of fruits and vegetables has now become quite heavy, averaging recently about 2,500 cars a day. This is not quite up to last year, however.

Farm wages this pring average the lowest in 33 years. The average wage paid to hired men last month over the country as a whole was $1.05 a day without board or $22.98 a month without board. The farm wage index of 72 contrasts with an industrial wage index of 164 (pre-war considered as 100).

Our farm population (estimated at 32,242,000) is now the largest in history, according to the estimates compiled last month. The gain last year was a million persons. The great migration away from farms which went on from 1920 to 1930 has slackened. The movement from town to farm also has slowed up somewhat.—**U. S. Department of Agriculture.**

LARGE COTTON CROP

Ginning to Date Exceeds That of 1930

Ginning of cotton is being rushed, and the figure to date is the largest since 1930. The Bennett-Miller cotton report estimates that 5,657,231 bales of cotton were ginned this season to Otober 1, compared with 4,835,990 bales for the same time las year, and 5,409,657 bales in 1931.

For the period from Sept. 16 to Oct. 7 gins turned out 2,556,530 bales, while in the same time last year the aggregate was 1,190,416 bales. In some southern sections the entire crop has been ginned and plants closed.

In Texas ginning aggregates 2,266,496 bales, suggesting a crop of 3,620,000 bales. In Mississippi ginning was 524,520 bales, and the crop is estimated at 1,150,000 bales. In Georgia ginning was 634,625 bales, indicating production of 1,030 bales.

$40,199,041 GIVEN BY U. S. TO COTTON GROWERS

Rental payments totaling $40,199,041 have been distributed to cotton producers of the South who participated in the 1933 acreage adjustment program, it was announced today by the Agricultural Adjustment Administration. This amount, the total of 345,034 checks, has so far been sent out. Checks are now being sent out at a rapid rate and it is expected this speed will be maintained until all of the approximately 1,037,000 contracting producers have received their checks.

Tendency To Accept Women In Business Has Complications

Under present conditions, it is becoming more and more difficult for men to fulfill their traditional roles. Women will work for less, and therefore, are getting the jobs that are available, says a writer in Harper's Magazine.

That this trend is cutting down purchasing power and intensifying our economic collapse, does not, apparently, make enough difference to employers to convince them that they should employ men at men's wages.

In very many homes the problem is being met by a complete transposition of roles between husband and wife. While the wife earns the living, the man ponders the problem of budgets, meals and outgoing laundry.

The writer heard of one woman who gave up her job when she married, expecting to be a homemaker the rest of her life. When her husband lost his job last year she went to his office, applied for his job, and got it—at half the salary.

She asked why her husband had not been kept on at the lower rate and was told that the organization would not offer a man such a salary. So she took the job, and her husband took over the household.

What A Man!

"Mother," said a little boy after coming from a walk, "I've seen a man who makes horses."

"Are you sure?" asked the mother.

"Yes," he replied. "He had a horse nearly finished when I saw him; he was just nailing on his back feet."—Vancouver Province.

MAKING THE FARM ATTRACTIVE

PUBLIC SPIRITED INDIANS

Tribe Showed the American People's Thrift

Topeka Capital: It remained for a tribe of Indians to show the American people what real patriotism is in these trying times, by refusing an allotment of federal funds for work on their reservation on the grounds that others are in greater need of the money.

In Wisconsin is a tribe of Indians called Menominee. They had been alloted $30,000 for road building from the fund of $50,000,000 set apart for public works on Indian reservations and government lands.

Following a tribal council two delegates traveled to Washington to notify the "great white father" that the tribe preferred to maintain its 80-year record of self-sustaining independence; and they respectfully requested other tribes be aided.

Secretary Ickes was decently appreciative. He spoke out of a trying personal experience since he was appointed public work administrator in sending this message to the tribe: "With thousands of people using every artifice to seek allotments from the public works fund—many with utterly unqualified projects—the Menominees show the way with true public spirit."

In commenting on the incident the Springfield Republican well says:

"The Menominees are setting an example to their white civilizers that is really embarrassing. Who are the civilized and who are the uncivilized?

Onions Grown In Two Types, Three Colors

Two general types of onions are grown in America for use in the ripe state. They are usually spoken of as the American type and the foreign or European type. As a class, the American onions produce bulbs of smallers size, denser texture, sharper flavor and better keeping quality. They also ripen earlier and are surer to mature properly in the north.

Three distinct colors are recognized in the markets: red, yellow and white. Each of the large markets has its preferences, but in general white onions are in greater demand in the east, yellow in the central west and red in some parts of the north.

Chlorate sprays for nettles and thistles should be applied after rains.

Poultry of State Eats Million Tons Of Feed Annually

Champaign, Sept. 28—Illinois poultrymen attending the 4th annual school for hatchery operators here this week were told that the state's chicken population of 26,000,000 consumes 3250 tons of feed each day, or more than a million tons a year.

Lucius Smith's Article In the Chicago Defender

The amount of publicity given to "The Negro Should Return to the Farm" is interesting, and it would be amusing were it not for the many whose future well-being it involves. From all sections there has been much in the press advising the return of Negroes to the farm. Only two or three, however, of these many advisers have had any extensive, practical experience on a farm.

If Negroes have abandoned the farms for city life in deplorable numbers since 1920, there must be some outstanding reasons or causes. Before any one can make an intelligent approach to the subject, "The Negro Should Return to the Farm," one should know why the Negro left the farm, and under what conditions he should return, if his social and economic status are assured of a new beginning that shall make for permanent improvement.

I, too, would be happy to see a healthy back-to-the-farm movement for a large number of our unfortunate city dwellers. But, should they be "coerced" to return under conditions similar to or worse than those existing before they gave up farming?

When one talks "Back to the Farm for Negroes," one speaks chiefly of the farms south of the Mason and Dixon line, but, apparently one forgets the condition of life and environment which were the farmer's lot even in the good old days of bygone years when Negro farm life was primarily one of dread, despair and fear. If, as a farmer, he did poorly, he feared the heavy hand of the "night rider." If he was progressive, he stood in greater danger.

Not all landlords were wicked and cruel, certainly not. In many communities and counties, one finds the cordial and helpful relations existing between white landlords and landlords and tenants. Too often, however, the life and property of these splendid farmers were in danger, and their crops showed no profit because of competition with "slave" labor.

As I see it, the success of getting

(Continued on page 8)

Regulating, Building And Fuel Foods

Regulating foods are those which keep the body machinery in good running order. They are the foods which contain laxative material minerals, and vitamins. This is the group most often neglected in meal planning. Special care should be taken to include one or more of them in every meal. These foods are cereals, fruits, milk and vegetables.

The building foods are those which keep body in repair and which build the new tissues of the growing child and include cheese, eggs, fish, meats, milk and vegetables.

The fuel foods provide the body with heat and energy. There is little danger of having enough foods from this group, provided the family income is adequate. They include cereals, fats, fruits, sweets, and vegetables.

NEGRO PROBLEM PRESSING FOR SOLUTION; RECOVERY PROGRAM HITS STATUS OF COLORED FOLK

By Paul R. Leach

Special Dispatch from a Staff Correspondent

Washington, D. C., Oct. 12—For the first time since reconstruction days following the civil war the United States government is seriously concerning itself with the social and economic status of the nation's twelve million Negroes.

Jobs for Uncle Tom and his nephews and nieces in constructing their own industrial communities is one solution advocated.

It is just about imperative that the Roosevelt administration go into that grave American social problem. Its 1933 recovery program has displaced hundreds of thousands of Negroes from their jobs and plantation livelihoods while attempting to recreate employment and restore the nation's nine million unemployed to pay rolls. As a consequence there has grown in recent weeks a serious unrest among the colored people, one which has been by no means ignored by the press of the colored folk.

Million Concerned

Upward of 1,000,000 Negro tenants, according to estimates prepared by racial leaders in the south, are losing what little means of independent livelihood remains to them as tenants on southern cotton plantations through application of the agricultural adjustment administration's campaign for a 25 per cent reduction of 1934 acreage. The A. A. A. contends that a white plantation owner with, say, four Negro tenants living and working on his land on a share basis, should reduce each tenant's acreage a fourth. It is not working out that way, however, for one of the four tenant families gets walking papers, the spokesmen say.

To a lesser degree, but seriously enough to bring repeated protests from the Negro newspapers, the Blue Eagle drive for the national recovery administration, which in theory and in Gen. Hugh S. Johnson's ardent desire has been expected to create jobs for all colors and classes at better pay and shorter hours, has also affected the Negro industrial workman. Jobs usually held by Negroes but now paying better wages, are going in some instances to white men.

Objective Of Ickes.

Under the public work administration, headed by the secretary of the interior, Harold L. Ickes, with its $3,300,000,000 fund for creating construction jobs on a basis of $1,800 a year, the objective is to create some 4,000,000 man-year jobs. There have been complaints from the colored press that in work created by P. W. A. funds, too, jobs which Negro laborers have regarded as their own, have been going to white men.

It is to correct these things, correlate employment activities of the various departments of the government, and with the president's wholehearted approval, the Mr. Ickes has taken into his department youthful, enthusiastic, well-equipped Clark Howell Foreman, who has the title of adviser to the secretary of the interior on the economic status of the Negro.

That a democratic administration should go into national planning for the Negro—jobs as well as housing—and try to correct a wrong which application of its recovery activities have aggravated is not the only paradoz in this picture.

Paradox to Northerners.

Mr. Foreman, who, as his Christian name implies, is a nephew of Clark Howell, who helped to make the Atlanta Constitution one of the great newspapers of the country, and upon whose willing shoulders rests responsibility for finding and planning Negro construction, is a paradox himself. That is, Mr. Foreman is a paradox to northerners, who do not know that among the most serious and constructive white thinkers on the Negro problem are many southerners.

Back of Mr. Foreman are ten generations of southern ancestry. Gen. Sherman's troops burned his greatgrandfather's home. Born and reared in Atlanta and educated there and at the University of Georgia, with a Ph. D. from Columbia, he has served with the Rosenwald Fund of Chicago, the Phelps-Stokes Fund of New York, and the interracial commission of Atlanta, all designed to study and find ways of solving Negro racial problems.

In his office, which is situated near that of Mr. Ickes in the interior building, he has a colored girl as his secretary. She is Miss Lucia Pitts of Chicago, who was recommended for the job by Mrs. Ickes, for whom, as a member of the Illinois house of representatives, Miss Pitts had worked when a shorthand reporter of house activities.

Eager for Constructive Work

"I am sick and tired of being a complainer," Mr. Foreman said today when he was asked to tell what he is doing. "I mean that, instead of going to various departments of the government and complaining that Negroes are being discriminated against in the nation's reconstruction I want to see plans worked out whereby constructive work can be done for them."

Those plans, as is Mr. Foreman's idea of the Negro's capabilities, are unusual in a white man.

"W. E. B. Dubois, the famous Negro leader," Mr. Foreman went on, 'says that the only way the Negro can develop is through group effort He is quite right. I propose that the public works administration help him get started in building his own self-sufficient communities."

"You mean Negro cities, built from the group up?" he was asked.

"Yes. Start with the subsistence homestead plan, so that they can have little plots of ground to sustain themselves, with a beginning on housing. With that as a municipal start, financed by their own people—there are many wealthy Negroes you know—and by the public works administration, they would construct their own public utilities. With power and fuel and water developed by their own activities they could next turn to industry."

"Would not that be placing the Negro industry in severe competition with white-controlled industry?"

"Not if it were properly planned, with careful discovery of what is needed, what materials are at hand. The Negro is the first to be let go when depression comes, the last to get his job back when hard times end. The greatest problem the Negroes have is finding employment for the leaders they have developed.

"You have no doubt about the ability of Negroes to do this for themselves?

"Not at all. There is no reason to say that a Negro can not do anything. I do not recognize any limitation upon him and his ability. Reared with an inferiority complex because of the great handicap under which he has always labored in a mixed community, he makes his own limitations."

"This plan would provide segregation of the colored folk in their own communities, would it not?

"I do not advocate segregation, but their communities should be Negro-built, Negro-controlled, so that the colored people would have freedom for exercise of their own abilities, an outlet for the leadership which has been developed."

"What do you believe would be the social result of application of your Negro community?"

"It would solve the economic problem of 12,000,000 people," was the simple reply.

Preliminary Steps

Preliminary steps toward surveying conditions among the colored people were started some time ago by the secretary of commerce, Daniel C. Roper, when he named a committee of investigation. On that committee he placed Harry H. Pace, president of the Supreme Liberty Life Insurance Company, and Dr. Mary F. Waring, president of the National Association of Colored Women, both of Chicago, as members under the chairmanship of Robert L. Vann, Pittsburgh, colored assistant United States attorney-general in Washington.

Establishment in a separate bureau in Mr. Roper's depa tment for handling racial problems is now under consideration.

—The Chicago Daily News.

COMMEND MAJOR R. R. WRIGHT ON BIG ANNIVERSARY MEET

Major R. R. Wright, Sr., has been widely commended for originating and conducting the 70th Anniversary Celebration of Negro Progress held here recently.

He was personally commended Monday of the celebration week when Mayor J. Hampton Moore, before a large group gathered in the richly furnished mayor's reception room at City Hall, praised Major Wright during his speech. Prominent national figures gathered at Convention Hall the final night of the celebration added their praise.

Excerpts from letters received from any local leaders commending Major Wright follow:

Rev. E. D. Caffee, acting editor of the Christian Review of Philadelphia, offered at the mass meeting the following resolution, which was unanimously adopted as an expression of the highest appreciation of the services of Major R. R. Wright.

"It was moved that this audience of thousands of citizens here assembled give to Major R. R. Wright, president of the Citizens & Southern Bank and Trust Company, most hearty commendation for the preparation and rendition of this 70th Anniversary Celebration of Negro Progress and we pledge him anew our group support in the efficient conduct of the Citizens and Southern Bank and Trust Company with this matchless record of solvency."

The resolution was adopted by raising of hands and by a viva vote of nearly 13,000 people crowded in the convention hall.

Rev. I. N. Patterson, pastor of Mt. Pisgah A. M. E. Church, says: "As the originator and director of the whole affair, you did a great work."

Mr. Eustace Gay: "I want to congratulate you upon the program Friday last."

Mr. J. Robert Saxon, secretary-manager of the Union Mutual Association of Philadelphia, says: "Kindly accept my congratulations."

Mr. C. Alfred Anderson, of aviation service, Ardmore, Pa., says: "The responsibility of making this affair a success must have rested largely upon your shoulders."

Rev. J. Campbell Beckett, says: "Permit me to heartily and sincerely congratulate you upon the splendid success of 70th Anniversary of Negro Progress, September 17th to 22nd."

Rev. J. E. A. Johns, pastor of James A. M. E. Church, Germantown, Pa., says: "I am delighted over the great victory your hard labor has produced."

Mr. John M. Marquess, exalted ruler of Quaker City Lodge No. 730, I. B. P. O. E. of W., says: "You are to be congratulated upon the splendid work you did."

Dr. A. Mark Harris, president of the National Benevolent Brotherhood of Men and Women, says: "Never in the history of the city of Philadelphia has so many of our group been gathered together at one time."

Magistrate Edward W. Henry says: "I want to offer my congratulations, together with other thousands of your friends and acquaintances, who like me were amazed at the remarkable demonstration at convention hall on Friday, September 22nd, last, which was the product of your fertile brain,"

Mr. William E. Sweet of the Bureau of Public Relations, National Recovery Act, says: "Your celebration last Friday night was a very great success."

Mr. C. C. Spaulding, president of the North Carolina Mutual Life Insurance Company, says: "Really, I was taken off my feet at your meeting last week."

Rev. J. E. East, corresponding secretary of the Foreign Mission Board, says: "I am sending you my congratulations on the wonderful gathering you had and the fine program you brought us."

Rev. Robert S. Jackson, president of Berean B. & L. Association, and the Model Storage Company, says: "Please accept my congratulations, master mind."

Dr. J. H. Dwelle, president of hte State Baptist Convention, writes: "The ecclesiastical, fraternal, professional and business leaders of Philadelphia urge me as chairman of the co-ordinating committee, to extend to Major R. R. Wright, a sincere vote of thanks and congratulations upon having gotten together the greatest crowd of people of color ever assembled in this city. The whole great celebration was the thought-child of a truly grand old man of the Negro race."

One of the most gratifying letters of commendation was that of Mr. Walter C. Beckett, Pennsylvania grand master of the Masons and grand marshal of the parades.

Dr. John P. Turner, police surgeon, writes as follows: "Please permit me to join with the thousands of people of Philadelphia who wish to express their admiration and appreciation of you for the overwhelming success of our recently celebrated "Seventy Years of Progress."

—Philadelphia Independent.

IMPORTANT MESSAGE!

PRIZES OFFERED!

"WHAT'S THE MATTER WITH THE AVERAGE NEGRO FARMER?"

Some question, is it not? Well, we want to know and nearly everyone wants to know. We want you to tell us in your own way and in your own words.

We want to know so badly that we are offering three cash prizes for the best letters received as an answer to the question. Any man, woman or child may write. The contest closes September 1, 1933. Write 'em long or short, just answer the question. You may win a prize.

FIRST PRIZE—Five Dollars in Gold.
SECOND PRIZE—Three Dollars.
THIRD PRIZE—Two Dollars.

The best letters will be published throughout the year. All letters become the property of the Modern Farmer, when received. Judges are the editor and one representative from each state in which the National Federation of Colored Farmers, Inc., has chartered Units. These representatives will be chosen by the Executive Committee of the organization. Prizes will be awarded during the 1933 N. F. C. F. Convention.

Mail all letters written for this contest to

LEON R. HARRIS, Editor,
Box 209 Moline, Illinois

As a sample, we publish below a little sketch about? "What's The Matter With the Average Georgia Farmer." Don't copy from this, it won't count. We just want to give you an idea.

"What's the Matter With the Average Georgia Farmer?

"The average Georgia Farmer gets up in the morning by the alarm of an Illinois clock (Big Ben), buttons his Chicago suspenders to a Detroit overall, washes his face with Cincinnati soap in a Pennsylvania pan, sets down to a Grand Rapids table and eats Chicago meat, Indiana hominy, fried in Kansas lard, on a St. Louis stove.

"He then lights his New York lantern and goes out to the barn and puts an Indianapolis bridle on a mule fed by Iowa corn and plows the farm covered by an Ohio Mortgage with a South Bend plow, and when bed time comes he reads a chapter in the Bible printed in Boston and says a prayer written in Jerusalem. Crawls under a blanket made in New Jersey only to be kept awake all night by the barks and wails of a Georgia yellow hound dog, the only home product on the place, and then wonders why he cannot make money."

Now Get Busy And Answer The Question And Win One Of The Prizes

TRANSPORTATION PROHIBITIVE

San Francisco Chronicle: The reason a lot of men don't go to the devil is because they're too lazy. The devil would have to call for them in his car.

It's Different! I'ts Reliable! It's Progressive!

THE MODERN FARMER

The Only Publication For The 900,000 Colored Farmers In The United States

ISSUED MONTHLY! EIGHT PAGES! FORTY COLUMNS!

And Only One Dollar a Year!

The MODERN FARMER is read by colored farmers in every state and by many white farmers as well. It preaches to colored farmers the gospel of CO-OPERATION; of buying, producing and selling together, that all may receive more from their efforts as producers.

The MODERN FARMER is read by progressive leaders and friends of the Negro racial group who desire to know our problems and our progress. The MODERN FARMER publishes reliable information. It is not afraid to tell the truth.

The MODERN FARMER is read by religious and welfare workers who are interested in rural problems. These leaders know that the United States cannot be "right" as long as three million Negro Ruralists are in a condition of poverty, ignorance and debt-slavery.

The MODERN FARMER is read by business and industrial leaders who are interested in the potential "Negro Farm Market."

"I have been reading the Modern Farmer two years and I have learned more in the two years than I have in my whole life before. It's a wonderful paper. I wish all colored farmers would read it and learn what's being done."

E. W. WILLIAMS,
Vaughn, Miss.

"The Modern Farmer is so gratifying that we regard it as a God-send to the colored farmers of the southern states. Its instructions and information have caused our members here to be in a prosperous condition. We are not making much money but we are raising our living and feel sure that we will be better rewarded next fall. There is nothing too good for us to do or say for the Modern Farmer."

T. T. BROWN,
Auguilla, Miss.

"It is indeed a newsy little sheet and well gotten up."

GEO. R. ARTHUR,
Associate for Negro Welfare,
Julius Rosenwald Fund.

"Negro farmers should organize. They should be informed what the world is doing. They should become more and more the owners of the farms they cultivate, and they need a paper which will give to them the latest developments along all phases of agricultural life. I wish for the MODERN FARMER the largest possible success.

DR. JAMES E. SHEPHERD,
President North Carolina College for Negroes.

"The Modern Farmer gives us more light than any other farm paper. I intend to work until I have everyone of our 180 members a subscriber."

FRED WILLIAMS,
Choctaw Unit, Shaw, Miss.

"I am always glad to receive my MODERN FARMER."

R. W. GRIFFIN, Chairman,
Gages Spring Unit, N.F.C.F.

THE MODERN FARMER

THE COLORED FARMER'S MOUTHPIECE! THE COLORED FARMER'S CHAMPION!

ADDRESS

THE MODERN FARMER

447 Fourth Avenue, North. Nashville, Tennessee

THE MODERN FARMER

Official organ of the National Federation of Colored Farmers, Inc.

Leon R. Harris - - Editor

Published monthly by the Modern Farmer at Nashville, Tennessee, and Chicago, Ill.

Nashville, Tenn., Office, 447 4th Avenue, North.

Devoted to the interests of the Farmer, Truck Gardner, Livestock and Poultry Breeder, the Home and the People.

Entered as Second Class Matter, April 10, 1929, at the Post Office at Nashville, Tenn., under act of March 3, 1879.

All contributions for publication in the Modern Farmer should be addressed to The Modern Farmer, 447 4th Avenue, North, Nashville, Tenn.

No libelous matter will be published. Unsigned articles or letters, and those written on both sides of the paper will not be used.

Subscription price $1.00 per year, 75c for six months, payable in advance. Personal checks must be certified. Make all checks or money orders payable to The Modern Farmer.

Advertising rates and sworn circulation figures presented upon application.

"OUR SLOGAN"

STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT.

THE LAW

"It is hereby declared to be the policy of Congress to promote the effective merchandising of agricultural commodities by encouraging the organization of producers into effective associations under their own control.

The Board is authorized and directed—to promote education in the principles and practices of cooperative marketing—to encourage the organization, improvement in methods, and development of effective cooperative associations. (Public—No. 10—71st Congress. Sec. 1-5.)

THE GOSPEL

"This law is predicated upon the ability of the farmer to manage his own business, once he is organized to do so. Cooperation is the key to it and only in exceptional cases can the Federal Farm Board have any dealings with a farmer who is not a member of a producer-owned and producer-controloled marketing unit." Hon. Sam'l R. McKelvie, Former Member, Federal Farm Board.

"The six best doctors anywhere
And no one can deny it,
Are sunshine, water, rest, and air
Exercise and diet.
These six will gladly you attend
If you are only willing,
Your mind they'll cheer, your ills they'll mend
And charge you not a shilling."

SECRETARY WALLACE'S ADVICE TO FARMERS

In an address at St. Paul, Minn., Secretary Wallace, head of the U. S. Department of Agriculture, told farmers to pull together, to stop working against each other and cooperate with the government to make the new farm legislation successful. He warned them that if they did not do this, wealthy interests would place money in the hands of radicals and everything would fail. He criticized greed, selfishness, ignorance and prejudice, the main evils that destroy farm organizations.

The Secretary was not speaking to colored farmers but he said one thing all colored farmers should notice. He said: "We must transcend those things that creep in such as hurt feelings, ignorance and prejudice."

Units of the N. F. C. F. would get along much better if officers and members would not carry their "feelings" under their feet, would stop following ignorant people who cannot possibly tell them which way to go, and would stop tattling and telling all their business to outsiders. We must learn to be tolerant. No one knows it all. No one is so well educated that he cannot make a mistake. We all can't see things alike. It is best to let the majority rule and to accept the wishes of the majority willingly. The farmer-member who gets mad every time he cannot have his own way will never make a good organization man.

We should also learn to accept the advice of our officers and leaders and stop running to Mr. Tom or Mr. John and asking them whether it is good advice or not. We should think with our own heads and stand on our own feet.

MR. O'NEAL SHOULD SELL SOME ACRES

It is reported that Mr. Edward A. O'Neal, president of the American Farm Bureau Federation, is jubilant because he believes the new farm relief program will aid the South more than any other section of the country. Mr. O'Neal hails from Alabama, where he owns a 2600 acre cotton plantation.

We are wondering how much "aid" the tenants and share-croppers on Mr. O'Neal's plantation will receive. Mr. O'Neal belongs to the absentee landlord class. Tenants of such landlords, especially on large plantations, usually get a misdeal instead of a square deal.

Mr. O'Neal does not need a 2600 acre cotton plantation. He would set his followers a mighty fine example if he would cut most of it up into small farms and sell them to his best tenants. He is certainly old enough and wise enough to know that Negro tenants and sharecroppers are more than just "hands" A majority of them are pretty good farmers. They can certainly raise cotton and corn better than Mr. O'Neal, who probably has not handled a plow in his life. Why not give them a chance to cultivate farms of their own? What's the sense of one man having 2600 acres of land anyhow?

LET US SEE YOU IN MEMPHIS

We hope to meet many readers and subscribers of the MODERN FARMER in Memphis during the N. F. C. F. Convention, October 25-28. Come, and bring your family along, if possible. The recreation will do you good. The instruction you will receive will enable you to become a better farmer and a more prosperous farmer. If you are a member of the Federation your association with your fellow-members during the four days will do you a world of good. You should be so proud of your organization and of your membership that you would not miss the chance to attend your convention and do your part to help make it a success.

The annual convention of the National Federation of Colored Farmers, Inc., is not a farmers' conference. It is a meeting of the only lawfully organized national body of farmers in America of the Negro racial group. Yours is an independent organization. It is not subsidized by the government nor by the federal or any state department of agriculture. Neither is it backed up or "bossed" or promoted by any agricultural institution or philanthropic foundation. Its your own big meeting. Organized farmers support it and you organized Race farmers have the right to run it yourselves. You can also speak right out and say what you want to say. You don't have to be "mealy-mouthed."

Show your faith in your organization and your love for your organization by attending your convention and association with your brother and sister-farmers. Let us prove to the whole country, to our friends and our enemies, that we are advanced enough, wise enough and tolerant enough to build an organization that cannot be crippled or halted, that is determined to endure and prosper and progress. The independent colored farmers of our nation can do this if they try.

DON'T BE UNGRATEFUL

A lot of people in this old world expect something for nothing. They have a mouth full of "gimme" or "helpme" and when they badly want and need a favor they are willing to beg and plead for it. But the moment they get what they want they forget those who have favored them. Many of them even forget to say "Thank you."

Of course many farmers are in this class. The National office of the N. F. C. F. has helped hundreds of colored farmers out of very tight places and situation during the past three years. Requests for assistance have poured in. Some farmers have wanted advice on federal loan applications. Many have wanted help to enable them to purchase or rent better farms. Some have wanted legal advice and assistance. Some have wanted protection. Members and non-members have taken advantage of the ability of the Federation and its officers to assist them.

We are sorry to say that we have been informed, and the records prove that ninety per cent of those who have received the assistance they desired have proven ungrateful. They have not been appreciative enough to even thank those who have helped them. They have put themselves in the class of those who expect to get something for nothing.

Don't be ungrateful. It's a bad, careless habit. The ungrateful person soon finds himself in the place where he can't get anyone to help him no matter how badly he needs help.

EDITORIAL OF THE DAY

THE "BENEFITS" OF INFLATION

(Arizona Star, Tucson.)

Who will benefit by inflation? Certainly not the salary worker, the wage earner, or the individual with a fixed income. Those of this class who are in debt will reap no benefit, for it will take every cent they own to pay for their bare existence. Whence will come their funds to pay old debts?

Who will benefit by this policy? The great industrialists will reap a benefit, because prices for their products will rise much faster than their wage costs and other fixed charges. They will reap money with which to pay off their debts, reap it from the salary worker, the wage earner, and the individual with a fixed income. Is it any wonder they are using their pressure to bring inflation?

Who will benefit by this policy? The astute speculator will reap a gigantic unearned profit. In fact, the astute speculators already have reaped wonderful profits. Those who were wise enough to take their money in February and March and buy English pounds sterling or French francs have splendid profits. They were able to buy the pound then for $3.30. Now they can use the same money to buy dollars and get $4.79 for what they paid $3.30. The same proportion applies to those who bought francs. Likewise the astute speculators who bought equities, common stocks, have made handsome profits. The astute speculator will be able to pay off his debts all right, but how many small salaried workers and wage earners are astute speculators? How many have funds for speculation?

Who will benefit by this policy? The farmer will reap a temporary benefit, but he, too, will find that much of his benefit will be lost in the increase in prices he will have to pay for what he buys. Those farmers who are in debt will find their debt burden easier. But this small advantage the farmer will reap will have been exacted from those frugal and thrifty people who in times of prosperity denied themselves things in order to lay by some savings for old age or a rainy day and from the salaried worker and the wage earner.

Inflation will not bring prosperity. It will not create employment. Right today one of the great evils, merely fear of inflation, is blocking the road to recovery. Those who have money to invest will not loan it on a long time basis because of fear of future value of the dollar. Three years from now, they fear, they might be paid off in 20 cent

STATEMENT OF OWNERSHIP

The Modern Farmer as required by the Act of Congress, August 24, 1912

State of Tennessee, County of Davidson:

Personally appeared before me, a Notary Public in and for the State of Tennessee, County of Davidson, S. B. Wilson, who having been duly sworn according to law deposes and says that she is the Business Manager of the Modern Farmer, and the following is to her knowledge and belief, a true statement of the Ownership, Management, etc., of the said publication for the date sworn above caption requested in section 443 Post Office laws and regulations.

1. That the name and address of the publisher and business manager of the Modern Farmer, Nashville, Tenn., S. B. Wilson, Business Manager.

2. That the owners are Henry Allen Boyd and S. B. Wilson, both of Nashville, Tennessee.

3. That there are no known bonds, mortgages or other security holders holding one per cent or more and that there are no bonds, mortgages or other securities on the corporation.

(Signed) M. G. FERGUSON, N. P.

Sworn before me this 1st day of October, 1933.

My commission expires January 10, 1939.

SPECIAL MEMBERSHIP APPLICATION BLANK

THE NATIONAL FEDERATION OF COLORED FARMERS, Inc.
Vincennes Hotel, Chicago, Illinois.

I hereby apply for membership in your organization for myself—

(Membership dues: $5.00 annually. $2.50 for six months.)

or 10 cent dollars. The result is no money is available for mortgages or capital expenditures or other new enterprises. Building is at a standstill. Those unemployed millions of the building and allied trades find no work to do. This condition will continue as long as there is fear of inflation or the future value of the dollar, as long as the dollar is not redeemable on a gold basis. Eventually it will bring about both a financial and social crisis which will make the troubles of the last years appear small and insignificant.

Finally the most lamentable result of all is that inflation will make the rich richer and the poor poorer. Whenever and wherever it has been tried from the time of Solon in Greece down to present day Germany and Austria that has been the inevitable result. The pinch felt already by salaried workers, wage earners, and those individuals with fixed incomes is but a pin prick as compared with what they will feel later if present governmental plans are followed to their logical conclusion.

—**The Chicago Tribune, Oct. 11, 1933.**

"WHAT'S THE MATTER WITH THE AVERAGE NEGRO FARMER?"

More Interesting Prize Letters

(Note:—Prizes will be awarded at the annual convention in Memphis to the writers of the best letters answering the above question.)

From Egypt, Miss.

Dear Editor:

You want to know what is the matter with the average Negro farmer? This is their trouble. They need the power to demand what is right for them to have. They will grow fast when this right is given them. He knows he should live at home and wants to do it, he is powerless. He cannot demand his rights.

C. A. Collins.

FROM CRUGER, MISS.

Dear Editor:—

In answer to your question I will tell you that in 1917 the farmer was in fine shape. They nearly all had their homes clear, —they had some stock and money in the bank. Then everybody thought they were rich. They got ride of their buggies and bought cars. Those who could not buy them were willing to pay others $1 or $2 to take them 15 miles. A horse or mule could not carry them fast enough. They had to go to every picnic and speaking. They stopped raising their food and said it was cheaper to buy it. They got in debt. Then Old Boss stopped giving them "limit money" each month. They found themselves in bad shape and they are going to stay that way until they learn to raise their food, save and stop begging the other man.

Mrs. Louisa Thomas,
Member Holly Grove Unit.

FROM TCHULA, MISS.

Dear Editor:—

What is the matter with the average Negro farmer is lack of organization and a co-operative spirit. He believes what the other man, who has taken the most from him, says. The Negro farmer likes for someone to put everything near and handy so he will not have to put forth much effort to get his hands on it. He does not want to be responsible for anything. He needs to help himself more. The more he helps himself, the more he can help others.

Mrs. F. D. Smith.

FROM PACE, MISS.

Dear Editor:—

The trouble with the average Negro is that he is a debt-slave. He will not look for his own welfare in business matters. He works by the plans of the other man and the other man's plan is how to get the profits from the Negro farmer's labor and keep him in the dark year after year. If Negro farmers would unite and stand by the N. F. C. F. and their leaders as other people stand by their leaders they would soon get their rights. Negro farmers fail to school their children as they should but they do not fail to send them to the fields. At the end of the year's hard work, he gets a due bill. This has kept the Negro farmer down. The other race has become great and wealthy by keeping the Negro in debt and his children out of school.

E. W. Nelson.

FROM MARKS, MISS.

Dear Editor:—

I am glad to say a word for the farmers. I have little education but all of my life I have been a farmer and most of my life I have lived a Christian. The way I see it, the farmer has lost self-control. The farmer has forgotten his home and what it really takes to be a real farmer. The Negro farmer is also afraid to speak up for his rights. It seems like they are all boys. God wants MEN. God wants men who will stand for something. Men who will not give up the ship as long as they see timber to float on.

C. A. McQuitter.

FROM CRUGER, MISS

Dear Editor:—

I think our farmers need a God and a Moses to lead them out. I have been in Mississippi 28 years. We all know that no poor people here receive all their earnings. But I have seen our farmers here pay $500 for an old hack rather than buy a home. I have seen them pay as much as a thousand dollars for a car rather than for a home. I have known them to buy a dog when they did not have any hogs. Some of them will feed five dogs and have not got a hog. Some of them will not plant a garden and will not raise any corn or cane.

I think colored farmers ought to stand for something. They are just like children. When the man is not helping him he is lost. He does not know what to do. My answer is that the average Negro farmer is ignorant. He does not know. Some one will have to lead him.

Mrs. Willie A. Woodard.

AGES OF MAN

Farmers will be amused and satisfied with the "Eleven Ages of Man" as they are outlined concisely and systematically by the "Emmett Daily Index" of Emmett, Ia. They stand, milkily, as follows:

1. Milk.
2. Milk and bread.
3. Milk, bread, eggs and spinach.
4. Oatmeal, bread and butter, green apples, all-day suckers.
5. Ice cream, soda, hot-dogs, (and other light diets).
6. Minute steak, fried potatoes, coffee and apple pie.
7. Boullion, roast duck, scalloped potatoes, creamed broccoli, fruit salad, divinity fudge, peanuts and demi-tasse.
8. Pate' de foie gras, weiner schnitzel, potatoes Parisienne, egg plant a l'opera, demi-tasse, various kinds of cheese.
9. Two soft boiled eggs, toast and milk.
10. Crackers and milk.
11. Milk.

THE HARMLESS KITTEN

(In The Chicago Defender)

Among the greatest enemies of wild birds— and so of farmers whose diligent friends these birds constantly prove themselves—are stray housecats. These abandoned animals, which have reverted to the wild and depend upon hunting for their existence, are large, well-fed and muscular. They are seldom seen, hunting mostly at night, but in winter tell-tale tracks on fresh snow betray their presence.

With all the inherent sly cunning and bloodthirstiness of the cat tribe, plus an audacity and intelligent partly due to former intimate contact with civilization and man, these cats hunt silently and relentlessly night after night, taking terrific toll of quail and other ground-nesting birds, as well as those which build in trees.

Sportsmen Can Help.

Hawks, owls and crows also are enemies of songbirds, but none of the arguments which can be advanced to justify their existence will apply to the renegade housecat. Sportsmen, hutning rabbits or other game, can do their farmer hosts a good turn by keeping a wary eye open for the flash of fur which shows the departure of a sly, green-eyed killer.

At the same time, these sportsmen must be exceedingly careful to destroy only cats which are strictly wild. They may be distinguished from domestic housecats and pets by their wild and furtive actions. Cats near occupied houses and farm places are apt to be the cherished property of some farmer, kept for the purpose of destroying rats, mice and moles. To shoot at such cats would be to incur the justified wrath of their owners. Discretion has it place in all kinds of vermin control.

Don't Abandon Pets

Cat owners can show their friendliness toward birds by never abandoning their pets. There are animals lovers who "haven't the heart" to put a swift and painless end to the lives of cats they no longer desire to keep. Instead they take these animals into the country, miles from home, and abandon them. Overnight their "pets" revert to the wild and become cunning killers. Other people, moving to some new location, take the easy course of calmly forgetting about the pet cat which has called their dwelling his home.

SCIENTIST ABLE TO TELL SEX OF DAY-OLD CHICKS

A Japanese scientist recently examined 100-one day old chicks at the International Baby Chick association in Grand Rapids, Mich., and told the sex of each in 61-2 minutes without an error. The chicks were posted after he had examined them to test the accuracy of his determinations.

COLOR OF EGG YOLK IS CHANGED BY HENS' FOOD

Eggs with extremely pale yolks result when hens are fed a mixture of half oats and half bran, with occasional table scraps and no green forage.

Deep orange yolks are produced when the ration is 52 per cent corn, 24 per cent wheat, 14 per cent oats, 10 per cent dried milk and soybean meal, and green grass pasture.

Excessive amounts of cottonseed or linseed meal will cause very dark, or olive-colored yolks, as will various common weeds belonging to the mustard family.

"Without controlled production," says Henry A. Wallace, secretary of agriculture, "no price-lifting effort can possibly work; because if there is no control of production, the better prices increase the next year's plantings, and the greater harvest wrecks the price."

Proof of the longevity of asparagus beds is indicated in North Dakota, where beds have been producing annually for twenty years.

JUST ONE REASON

Atchison Globe: No, we don't practice all we preach. We haven't enough time to do that.

PULPIT AND FAMILY BIBLES

INTERESTING NEWS AND NOTES

A cotton listing and bunching machine, recently invented and patented by a Negro dirt-farmer,--a member of the National Federation of Colored Farmers,—is conceded by manufacturers and implement men who have examined it to be the greatest asset to the cotton raising industry invented since the cotton gin. A model of this machine will be exhibited at the coming N. F. C. F. convention.

Will Bean, a colored farmer of Winona, Texas. planted some coffee seed he procured from a friend and has gathered 35 pounds of good coffee from twelve stocks He parches rolls, grinds and drinks his own coffee. This colored farmer believes in living at home.

Mrs. Nena Hayes. of Olean, N. Y., has grown a tomato this season that weightted one pound and thirteen ounces. tl is believed to be a record breaker.

Peanuts have advanced five dollars a ton on the Moultrie, Ga., market. They are now selling at a figure $20 a ton higher than last season's figure. This is good news for hundreds of colored growers of the Carolinas, Georgia and Virginia.

Checks to pay cotton farmers for plowing under cotton are being mailed out slowly. It will probably be another month before all farmers entitled to them receive them.

Forty per cent of the mosquitoes of southern Illinois have been found to carry malaria fever germs. Farmers should make war on these mosquitoes.

Lavender Lady, a Missouri Jersey cow, was chosen grand champion for the third successive year at the dairy cattle congress in Waterloo, Iowa.

An Oklahoma farmer near Holdenville grew a cucumber thirty-three and a half inches long.

It is reported that farms in Australia are selling for from two to four dollars apiece. This is not very interesting to colored farmers for they are barred by law from settling in that country.

There are eleven colored farmers in the District of Columbia. Eight of them are owners. The value of their farms and buildings is $43,500.

Cut of cotton acreage in this country is expected to aid Egypt and other foreign cotton producing countries.

TIMELY SUGGESTIONS FOR MARKETING EGGS

Produce infertile eggs.

Feed a balanced ration and limit the feeding to that ration.

Gather eggs twice a day.

Keep eggs in cool. moderately dry place (below 60 degrees)

Eliminate dirty eggs by providing nest for every six hens, by keeping flock confined to house until noon on days when it is wet outside, by keeping all broody hens off the nest and by keeping the house clean.

Protect eggs from heat and sun when marketing them.

Sort eggs according to size and color of shell.

Sell to dealers properly equipped to handle eggs.

FALL BEST TIME TO PLANT FRUIT TREES

Lexington, Ky., Oct. 28.— The horticultural department of the College of Agriculture, University of Kentucky, says late fall is the best time to set fruit trees in this state. November 15 to December 15 are about the dates of the best time, in most years.

Fall-set trees often began growth better the following spring and frequently continue to show better growth, even after several years, than trees set in the spring, says the college.

"When trees are set in late fall the tops are dormant, but the soil imperature is high enough so that the growth may continue for a time. Then trees are planted in the spring the buds open soon after they are set and the water loss from transpiration retards root development. Some trees, such as cherries, are rather difficult to transplant and a smaller loss of trees results when they are set in the fall."

5,000 Ohio farmers will receive better than $2,000,000 for their sugar beets this year. The 1933 crop is expected to be considerably larger than 1932.

In San Diego County, California, there is an aged pear tree growing near an old adobe dwelling . It is over 100 years old and still bears a wonderful crop each year. The tree was brought to California by the French Mission Fathers late in the 18th century. Better than this, there is grape vine at San Gabriel Mission in Los Angeles over 200 years old. This was also set out originally by the Mission Fathers.

The best of all shock absorbers is a sense or humor.

When we have nothing to say it's best to say nothing, but few of us can do it.

Most of us all try the wrong ways before we submit to the right way of doing things.

Uncertainty is almost as disturbing as bad news.

7—LEAF CLOVER FOUND

If four-leaf clovers are lucky, Leonard Selden, of Haddam Neck, Conn., believes he's in for a year of extra good fortune. He recently found a clover with seven leaves.

DUCKS GOOD BURGLAR ALARM, ALP ASSERTS

"A flock of ducks is about the best kind of a farm burglar alarm," says H. H. Alp, University of Illinois poultry extension specialist. "They are the first to hear any suspicious noise, and they make plenty of noise."

Too close mowing of the lawn injures the bluegrass. Plants manufacture their food in their leaves. Hence, enough leaf surface must be left to build up food for root development.

MAGNETIC MENU

Los Angeles Times: When President Roosevelt dropped in on a conservation corps camp for luncheon the other day, the menu consisted of fried steak, mashed potatoes, string beans, lettuce and tomato salad and apple cobbler. Perhaps this explains why so few of the boys avail themselves of week-end leaves of absence.

TALKS TO COLORED FARMERS

About "Meeting Trials And Troubles"

National Federation of Colored Farmers, Inc.

By Leon R. Harris, Secretary

I met a young man in Chicago the other day, Brother Farmers, and he told me a very pitiful story. He had just arrived from Georgia. The week before I met him he was a sharecropper on a large plantation. He had a fine crop of cotton, —was expecting at least nine bales,— had the best crop of corn he had ever made,—had three good hogs,— his wife had nearly a hundred chickens and had canned and preserved enough food to last the family during the coming winter. He had five young children, and his conversation led me to believe that the family had been very well contented and happy on the Georgia plantation.

But he was in Chicago because his landlord had ordered him to get on the plantation and get out of the county in two hours. His wife was given two days to get the children and herself out of the community. He had worked hard and "made the crop." The landlord wanted all of it. He forced him to leave so he could get it. I have learned since that this same landlord has forced two other sharecroppers to leave also.

I am not wasting any thoughts on this evil landlord because he is sure to get whats coming to him. Some of these days he will meet a tenant or sharecropper who can t be run off and it will be just too bad for him. But I am wondering what will become of this young farmer . He doesn't know how to do anything but farm and he doesn't know how to farm anywhere but in the South. He is as much out of place in Chicago as he would be were he in Alaska. He asked for advice and I promptly told him to go back South, find another plantation and landlord and try again. Fortunately, as an officer of the National Federation of Colored Farmers, I was able to recommend to him two or three planters either of whom I believe will treat him right.

It takes a mighty strong-willed, cool-headed farmer to buck some of the trials and troubles we meet. Too many of us become so discouraged we give up. We run to the cities, hoping to find justice, liberty and prosperity . But it is simply a case of jumping out of the frying-pan into the fire.

I shudder to think what will be the fate of many Negro farmers in the near future. Changes are being made rapidly in the agricultural field and many of us are going to find ourselves in uncomfortable situations. I believe federal agencies will treat us right and try to help us but we certainly can not depend on that alone. We must learn to depend on ourselves and on each other. There is strength in unity. We must build up our organization, the N. F. C. F., until it is big enough and strong enough to carry us over the rough spots. When we are able to depend on our organization it simply means that we are able to depend on ourselves. It means that we are able to stick together,— to cooperate,— to be friendly—to live in harmony with each other,— look out for each other's interests. It means that all of us together are providing the opportunity for all of us to rise together,— to prosper and be happy.

There is no other way, Brother Farmers, for us to endure as a producing group. We must organize and help each other become independent, decent, enlightened, progressive and prosperous citizens, or we will become wage and debt-slaves, peons and simply so much human stock to be used to cultivate the land and produce mainly for the benefit of greedy and unscrupulous men. For, ever since the beginning of time, some men have tried to live and grow fat off the labor of others. The "others" have always suffered until they had sense enough to get together and to stay together.

Support the N. F. C. F. Stick to your brother farmer. Fight for your own rights and help protect yourself too.

CUBA MAY RAISE BARRIER AGAINST FOREIGN LABOR

Plans to Force Business to Hire Natives

(By Arthur Evans—Chicago Tribune Press Service)

Havana, Cuba, Oct. 10—President Ramon Grau San Martin told a delegation of motormen and conductors of Havana street railrays today that he is considering measures to limit the proportion of foreign labor in Cuban industries and business.

Grau said a decree on the subject might be issued within a few days. The general impression is that the decree may specify that 75 per cent of the labor employed must be native.

Recall Previous Attempt.

The proposal is a revival of a measure which Cuban labor has tried to pass for years without success. Former President Machado in 1926 tried to pass a 75 per cent native labor bill, but congress thwarted him with the argument that Cuban industries require technical men from outside and that 25 per cent limitation on foreigners would impair business.

In the sugar industry a large quantity of labor has had to be imported in normal times from Jamaica, Haiti and San Domingo, as the ordinary Cuban is said to have a distaste for cutting cane. Conditions have changed since the depression, however, and native labor is now clamoring for work.

Among foreigners in Cuba, the largest proportions are Spaniards, with Chinese and West Indians second and third. The Spaniards are the main element in business and merchandise.

Observe War Anniversary.

This morning in commemoration of the 65th "Grito de Yara," an anniversary of the beginning in 1868 of the unsuccessful 10 years' war for independence from Spain, troops passed in review before President Grau and Col. Fulgencio Batista, head of the army.

President Grau in a speech said "I feel extremely optimistic as to the future of Cuba. My government is fully consolidated, with the unanimous support of the national army and navy and various reserve organizations, and has the undivided of support of Cubans."

When the crowds yelled for Col Batista to speak he said:

"Sacrifice and patriotism, words commonly used by former regimes but never interpreted in their real meaning, are now the basis of the acts of the present regime, which is a Cuban government for Cubans and Cuba."

The 1868 revolt was led by Carlos Manuel de Cespedes, father of the recent provisional president whose brief regime gave way to the Grau government. Today the young-De Cespedes was practically forgotten.

Menocal Leaves for U. S.

Gen. Mario G. Menocal, former president of Cuba and one of the leaders of the groups seeking to overthrow the Grau regime, left Havana for Miami by plane today. With him were his son, Mario, Jr., and former Congressman Martinez Fraga.

The understanding is that Menocal is on his way to Washington, D. C., to present the arguments of the counter-revolutionists against recognition of the Grau government by the United States.

After the battle at the National hotel a week ago yesterday word was taken to Menocal to stay in his house and would be well. Reports have been current, however, that he was threatened with death by some of his enemies.

—Chicago Tribune.

MRS. ADA PERRYMAN'S REMITTANCE

From down in Clarksdale, Mississippi, where the National Federation of Colored Farmers has a strong organization and the Modern Farmer a splendid circulation, there comes to the Modern Farmer office a substantial remittance from Mrs. Ada Perryman. She sent in her annual subscription to the Modern Farmer and paid her annual dues in the National Federation of Colored Farmers. This publication acknowledged the receipt of both remittances and notified Mr. James P. Davis, the president, of her qualification for this year's membership. They are preparing down there to send a big delegation to the National Convention to be held in Memphis, Tennessee, where farmers in Mississippi, Arkansas, Kentucky, Southern Missouri and Tennessee have easy access to this city. Mrs. Perryman is deeply interested in the organization of the "tillers of the soil", stock raisers, poultry raisers, fruit growers and in fact every phase of the life known as farmers.

IMPORTANT NOTICE TO EVERY READER

If you have moved from one address to another please send a written notice to your postmaster; write it out plainly and give it to your letter carrier if you live in the city, or your rural route carrier, if you live on a rural free delivery route. If you fail to do this the publisher of this paper will have to pay two cents on every paper going to your old address. This is a new postal law and regulation.

It is unfair to the publisher of this paper to have to pay the government two cents every week merely because you do not send a written notice to your post office. Not only should you notify the post master at once, even when you know you are going to move, but you should send a written notice to this newspaper so that they could change your address on the mailing list. Do not overlook these instructions.

THE MODERN FARMER

CIVIC, RELIGIOUS LEADERS JOIN IN COMMENDING MAJOR R. R. WRIGHT FOR 70th PROGRESS ANNIVERSARY

Philadelphia—Commendations of Major R. R. Wright, Sr., president of the Citizens' and Southern Bank and Trust Company, 19th and South Streets, for originating and for the conduct of the 70th anniversary celebration of Negro Progress are pouring into the office of the aged banker here.

Business, civic, professional and religious leaders have joined in lauding the success of the venture. Included among those who have complimented Major Wright during the past week are:

Dr. John P. Turner, police surgeon,, who wrote as follows:

"Our cause has been greatly advanced by the wonderful meetings held. As a climax, the Convention Hall gathering of over 10,000 people, put to rout our enemies who said it couldn't be done, and cemented more firmly the friendship of our friends."

Dr. Dwelle

Dr. J. H. Dwelle, president of the State Baptist Convention, wrote:

"The ecclesiastical, fraternal, professional and business leaders of Philadelphia urge me as chairman of the Coordinating Committee, to extend to Major R. R. Wright a sincere vote of thanks and congratulations upon having gotten together the greatest crowd of people of color ever assembled in this city. The whole great celebration was the thought-child of a truly grand old man of the Negro race."

Walter Beckett

One of the most gratifying letters of commendation was that of Mr. Walter C. Beckett, Pennsylvania grand master of the Masons and grand marshal of the parades.

Leslie Pinckney Hill, president of Cheyney State College, says: "This is merely my personal word to express my appreciation and thanks for the fine spirit with which you carried the Progress Week forward to last night's outstanding success. The audience was the most magnificent Negro audience I have ever seen."

Rev. R. S. Jackson

The Rev. Robert S. Jackson, president of Berean B. and L. Association and the Model Storage Company, says:

"Please accept my congratulations, master mind, on the success of the 70 Years' Celebration of Emancipation.

"You have successfully gotten together the largest group of our people at one time and in one place in my 48 years' stay in Philadelphia. It is my first time to see so many assembled in one place."

Rev. J. C. East

The Rev. J. C. East, corresponding secretary of the Foreign Mission Board, says:

"I am sending you my congratulations on the wonderful gathering you had and the fine program you brought us. Surely you are immortalizing your name by the service you are rendering to your people."

Dr. H. L. Phillips

Archdeacon Henry L. Phillips, who delivered the prayer at the opening of the meeting Friday night at Convention Hall, wrote that the gathering was the most remarkable one in the history of Negro gatherings in Philadelphia. He congratulated Major Wright heartily.

William E. Sweet

William E. Sweet, of the Bureau of Public Relations, National Recovery Act, says:

"Your elebration last Friday night was a very great success and I congratulate you on the size of the audience. It was a rare privilege for me to address them."

C. C. Spaulding

C. C. Spaulding, president of the North Carolina Mutual Life Insurance Company, says:

"Really, I was taken off my feet' at your meeting last week. You had the largest gathering of Negroes that I have ever seen in any hall. When I accepted your invitation to speak, I was under the impression that it would be a group in a church —about five or six hundred in number. I actually had no idea of the magnitude of the occasion, or I might have 'backed out.'"

Judge Henry

Magistrate Edward W. Henry says:

"I want to offer my congratulations, together with other thousands of your friends and acquaintances who, like I, were amazed at the remarkable demonstration at Convention Hall on Friday, September 22, last, which was the product of your fertile brain.

"Your program was remarkably smooth and even, and the more than 12,000 persons who were present left Convention Hall congratulating themselves that they were permitted to be present on that memorable occasion."

John M. Marquess

John M. Marquess, exalted ruler of Quaker City Lodge, No. 720, I. B. P. O. E. of W., says:

"You are to be congratulated upon the splendid work you did. You may depend upon our co-operation at all times in any worth while, unselfish movement."

Dr. A. Mark Harris

Dr. A. Mark Harris, president of the National Benevolent Brotherhood of Men and Women, says:

"Never in the history of the city of Philadelphia has so many of our group been gathered together at one time, notwithstanding the importance of the occasion. The great Convention Hall on last Friday night was smothered with a black crowd of anxious humanity, anxious to contribute their quota of success to your meeting showing the Negro's accomplishing during seventy years of freedom."

Rev. J. E. A. Johns

The Rev. J. E. A. Johns, pastor tor of James M. E. Church, Germantown, Pa., says:

"I am delighted over the great victory your hard labor has produced, which is profitable to all concerned, and especially to our group.

"The strain endured gives evidence of your fine vitality as well as to your unusual broad sense of direction.

"My sincere wish is that you may be rewarded by long life and success in all your noble work."

Rev. J. C. Beckett

The Rev. J. Campbell Beckett, pastor of Union M. E. Church, says:

"Permit me to heartily and sincerely congratulate you upon the splendid success of the 70th Anniversary of Negro Progress, September 17 to 22.

"The mass meeting Friday night, attended by nearly 12,000 persons, was a fitting climax and I have never seen that number of our folk together before in our city.

"Too much praise cannot be given you for the idea of the celebration, the splendid manner in which the various groups and professions were brought together and the cooperation given under your leadership."

C. Alfred Anderson

C. Alfred Anderson, of Aviation Service, Ardmore, Pa., says:

"I realize you must have had great difficulty in trying to secure the cooperation of the leaders of our race in Philadelphia, and that the responsibility of making this affair a success must have rested largely upon your shoulders.

"From all indications, you were more than successful in making this affair commemorative and it was not an easy task that you accomplished, for the execution of this program required undaunted courage, perseverance and patience. You have done much toward establishing confidence in your leadership and winning the support of the people of our race in Philadelphia and its vicinity."

P. L. Edwoods

Prince L. Edwoods, advertising manager of the Philadelphia Tribune, says:

"I wish to congratulate you for giving the Negroes of Philadelphia the greatest event in the history of the city; namely, the 70th anniversary of the Celebration of Negro Progress. It will long be remembered as one of the most colorful and gigantic occasions that was ever promoted here by any citizen or group of citizens. I personally believe it to be the most outstanding effort of its kind that has ever been given in this country."

Eustace Gay

Eustace Gay, managing editor of the Philadelphia Tribune, says:

"I want to congratulate you upon the program Friday night last."

J. Robert Saxon

J. Robert Saxon, secretary-manager of the Union Mutual Association of Philadelphia, says:

"Kindly accept my congratulations for the successful carrying out of the program of the 70 Years of Progress of the Negro. One needs only superlatives to describe it. It was stupendous, colossal, superb and certainly merits the most praiseworthy consideration of all who witnessed it."

Rev. I. N. Patterson

The Rev. I. N. Patterson, pastor of Mt. Pisgah A. M. E. Church, says:

"I have thought a great deal over the wonderful celebration we had at Convention Hall last week. As the originator and director of the whole affair, you did a great work. It was more than a success; it was marvelous. The most inspiring sight I have ever witnessed and places you in the foremost ranks of America's great organizers and leaders."

W. A. Tooks, funeral supply manufacturer: "To my mind, greatest venture that anyone has taken, and met with unusual success. Feel deeply grateful to you for interest displayed in development of Negro race."

—The Afro-American.

APPEALS COURT FREES LAWYER OF CONTEMPT

The Illinois Appellate court yesterday reversed the decision of Municipal Judge Thomas A. Green who last summer found Attorney W. G. Anderson, colored, guilty of contempt of court and sentenced him to six months in the county jail. In citing Anderson for contempt, Judge Green charged that the attorney falsified court records in taking an appeal for a client, Roy Hall, colored.

Hall was found guilty of larceny of an automobile by Judge Green, but the finding was reversed on the appeal. Anderson, who has been at liberty on bond, denied in the Appellate court that he had falsified the records and also contended that Judge Green had no jurisdiction to sentence him for contempt of court.

Anderson was sustained in the opinion delivered by Appellate Judges Martin M. Gridley, John J. Sullivan and Kickham Sanlan.

—The Chicago Tribune.

THE YEAR DOCTOR

Terre Haute Tribune: Modern medicine owes many remarkable cures to recent inventions and discoveries, but still turns for many cures to drugs and herbs discovered by Indians long before Columbus was born. Not only were the drugs discovered by Indians, but they were used to cure the same diseases that physicians prescribe them for today.

These facts are brought out in striking manner in the display of "American Indian Medicine" in the Hall of Science, World's fair.

Show cases are filled with such drugs as capsicum, peruvian bark, cascara, coca, mandrake, snake root, and black cherries. All were used by Indian medicine men.

Capsicum is used to day for the treatment of neuralgia, pneumonia drugs as capsicum, Peruvian bark, called quinine after it is refined, is used in the cure of tropical fever, Cascara, whose curative properties were known by the Indians of the Pacific coast, is used today as a purgative. Coca, used as a stimulant by the aborigines, is used today as an anaesthetic, as cocaine. Snake root is used in salves as a cure for certain types of irritation.

The present-day doctor has done much with his anti-toxins, his hypodermic injections, his insulins and other modern weapons, but the efficacy of the "Indian medicines" is still attested to by a casual glance at the labels along the compounders' shelves. The familiarity of the Indian with these remedial agencies is one of the interesting studies regarding an interesting race.

KILLS MAN WITH TRACTOR

Clarksdale, Ark., Oct.—(By the Associated Negro Press)—Jack Taylor Tuesday drove a 20-ton tractor over the head of Jack Chaney who was asleep in the field with his head against a stump. Taylor is alleged to have swerved from the course of the tractor, crushed the stump and Chaney's head and then to have backed over it again.

MAKING THE FARM ATTRACTIVE

(Continued from page 1)

the Negro to return to the farm under an improved condition is contigent upon two conditions: First, farming in many sections must become highly syndicalistic, supervised and regulated by the state or national government as other large businesses are, or, second, the state or federal government must take the lead in 'facilitating the return of the Negro to the farm by acquisition of farm land, cutting it into desirable tracts, equipping such tracts for various types of model farms with such necessities as will make for comfort and happiness, sell them on easy, long terms to farmers who wish to return to the country with the hope and purpose of redeeming themselves and family.

The old system has made farming an undesirable risk, not alone to the millions of Negroes and whites who have given up farming in the last 20 years, but also to the big landlords, and worse than all, to the insurance and investment companies who have sunk irretrievable millions in worthless mortgages to be redeemed through high premiums and interest rates charged to the rest of us for their services.

One may assume that the American people are paying millions of dollars annually in unnecessary taxes to offset defaults in interest payments on mortgages and taxes of nonproductive farm property as a consequence of land-poor land barons. It appears that intelligent leadership should see the need of a reorganization of American farm practices in harmony with the trend of progressive social forces. At a time when our various state and national governments are falling over themselves to give the "big fellows" a new deal, why not open a new deck and make a new deal for the back-to-the-farm man?

Yes, we should want that millions of Negroes and even whites return to the farm, but let us wish that they return under conditions which offer hope, peace and a reasonable chance for normal prosperity.

ARGENTINE COWS ONCE SLAIN FOR HITCHING POSTS

For two centuries man's chief occupation among the gauchos, or cattle ranchers of the Argentine pampa was the pursuit of wild cattle. Stupendous numbers were slain merely for hides and tallow, as was true in California when Dana saw it and wrote Two Years Before the Mast. Besides the many hides sent to Spain and smuggled out to other lands, countless thousands were used on the pampa for making clothing, huts, tents, sleds, and even fences, says the National Geographic magazine.

Cattle were so cheap that a rider would kill one merely to cut meat enough for his lunch. One Argentine historian says soldiers used to shoot a beef so that they might tether horses to its horns, there being no trees!

And it was easy to capture them. A band of gauchos simply surrounded a herd. Then each man, armed with a long-handled pica, or lance with a sharp blade like a half-moon, hamstrung as many animals as possible before the herd broke away. This done, the gauchos dismounted, skinned the fallen animals, and abandoned the meat to carrion birds and wild dogs.

Hides took the place of money. When, by the Treaty of Utrecht, England attained the sole right to import slaves into the River Plate country, she stipulated that the blacks should be paid for with hides and tallow.

From hunting cattle mostly for their hides, the folk of the pampa turned by 1830 to the export of dried beef. This went to feed slaves in the West Indies, where their labor was then building up the tobacco and sugar industries. "Jerky" (salt beef) is still made by the ton in the meat-drying shed on the big estancias, and sometimes huge racks of it, like haystacks, are piled in the open air.

AS A NEWS READER SEES IT

"For with the same measure that ye mete withal
It shall be measured to you again."
Luke 6:3.8.

The farmer looked at the grain in the field,
Measured in bushels, 'twas a wonderful yield,
But measured in dollars 'twas scanty and thin;
He would not get back the seed he put in.

He looked at his cans full of milk and rich cream,
Measured in quarts, they would make quite a stream,
But measured in dollars, not even a rill
And who was to pay the miller his bill.

He looked at his barns full of hay to the tip
Measured in tons, it would sink a large ship,
But measured in dollars, 'twas light as the down
And a one hourse wagon could haul it to town.

He looked at his orchards, fine apples hung thick,
Measured in barrels, he had a good pick,
But measured in dollars, it was wormy and small
And the farmer was out spray, baskets and all.

He looked at the cattle, he looked at the sheep,
Measured in pounds, many families they'd keep,
But measured in dollars, he wouldn't refuse
To trade a bull calf for a new pair of shoes.

He looked and he pondered, that with plenty around,
As measured by bushel, the quart or the pound,
That measured in dollars he was worthless and poor
That even his lands were far from secure.

The farmer decided that he saw through the trick,
The whole trouble was with the measuring stick,
And now he requests that the stick we revise
And make all the measures of relative size.

—Anonymous.

FARM LECTURE HELPS

Will Bean Negro farmer, of near Winona, Texas, listened carefully to the county agent's agricultural sermon on "living on home products." eH returned to his little east Texas farm, planted some seed procured from a friend, and already has gathered 35 pounds of coffee from 12 stalks. Bean parches, rolls, grinds and drinks his own coffee.

If a hen stops laying in the summer, sell or eat her at once, for she will not start laying again until late winter or early spring.

Kill weeds while they are small.

3 NEW PROJECTS SWING TO ADD TO U. S. OWNERSHIP

Government Enters Still Newer Fields

(By Arthur Sears Henning—Chicago Tribune Press Service.)

Washington, D. C., Oct. 10—(Special)—Under the guise of measures to promote recovery from the depression, government ownership is growing apace.

Through the creation of corporations it controls and finances, the federal government is engaging in numerous business enterprises hitherto reserved to private initiative.

There is every prospect that as a result of the recovery program the United States government will be left the owner of billions of dollars' worth of farms, city houses, tenements, banks, railroads, factories, insurance companies, grain elevators, ships, docks, warehouses, office buildings, cotton, wheat, live stock and a multitude of other forms of property and private business.

Three More U. S. Corporations.

Secretary of the Interior Ickes, in his role of public works administrator, today disclosed plans for three government corporations to engage in various construction activities financed from the 3 billion 300 million dollar easy money.

This makes six gvernment corporations projected in the last week in addition to those already created, such as the Reconstruction Finance corporation with resources of 4 1-2 billions, the Home Owners' Loan corporation with 2 billions 200 millions, the Home Loan banks with 125 millions, and the Federal Land banks and allied institutions with 2 1-2 billions.

A new device in the President's program and a new unit of government reminiscent of the wartime corporations, the organizations are being formed by the administration when it finds itself blocked by legal or economic barriers from working out its plans through the regular government setup.

Explains Housing Corporation

Mr. Ickes today explained a projected housing corporation as a move to give his 3 billion 300 million dollar easy money fund "more freedom". His assistants added that cities are not offering to take a financial partnership with the public works administration in housing projects as the public works law requires.

The new corporation, by stepping outside this legal requirement, will clear the way for widespread slum clearance and housing on federal funds alone, it was pointed out. Mr. Ickes said the corporation, as suggested in a memorandum now on his desk, will be armed to condemn properties and erect government structures in their place with or without requests from the communities.

Houses built by the corporation may be either bought or leased by citizens. Rents will be paid directly to the federal corporation, which will become a national landlord, holding sway over tenants in many large cities.

Mr. Ickes estimated that the project would take "hundreds of millions" out of the easy money fund. If the houses which are built are sold the money would come back into a revolving fund to finance other construction, he explained.

Subsistence Farm Project.

Similar plans for the buying and leasing or selling of subsistence farms which are to be turned over to unemployed industrial workers are being considered, according to Mr. Ickes.

The third corporation revealed by Mr. Ickes would be one already suggested in connection with the projected 120 million dollar easy money advance to the Chicago sanitary district. It would perform construction work for districts which did not have the collateral to obtain easy money loans, leasing the works back to the districts at rentals sufficient to repay the government outlays.

Bank Liquidating Scheme.

Other plans for expanding purchasing power through still a fourth corporation were being worked on at the treasury today. Governors of the 12 federal reserve banks were called into conference on the proposal for a closed bank liquidating corporation which might release a billion dollars in frozen deposits.

Plans for this corporation were conceived when the resoures, both legal and financial, of the Reconstruction Finance coropration appeared to have been exhausted.

Fifth and sixth in the list of new corporations are the Surplus Relief corporation and the Commodities Credit corporation, the former of which is formed and the latter of which has been announced by the President.

Woman Heads Largest Group in Farm Organization

MRS. F. D. SMITH, PRESIDENT—TCHULA, MISSISSIPPI

Over Four Hundred and Fifty Members on Roll As Reported

Members of the National Federation of Colored Farmers at their annual convention held in Memphis last month, paid their respects to Mrs. F. D. Smith, president of the Tchula, Mississippi Unit. It declared that although this race woman is the only one in the whole group to preside over a Farm Unit Organization, hers is the largest in the long list of local organizations in any of the forty-eight states in the Union.

President Davis and editor Harris in their report showed that from the U. S. Census Bureau there are more than nine hundred thousand Negro farmers in the United States, and while they are not all organized there are organizations in more than twenty states out of the forty-eight. Mrs. Smith became a member of the Tchula, Miss., Unit at its early organization. The farmers in

SENATOR COPELAND'S WARNING

Says Poor Health Can be Traced to Neglect

By Royal S. Copeland, M. D.
U. S. Senator From New York

A recent announcement of the United States public health service is unusually interesting. It states that the majority of cases of poor health and faulty physical development in adult life can be traced to neglect of undernourishment or underweight, so commonly seen in early childhood.

This state of health, known as "malnutrition," is more prevalent than most parents suspect. It is found in the country districts as well as in the city. Contrary to the common belief, it afflicts the children of the rich as well as the poor. It may begin in very early infancy and continue throughout childhood.

The stricken child is below normal weight and does not gain as rapidly as his playmates or children of the same age. The youngster is usually pale, dull and listless, has dark rings under the eyes, tires easily and has no desire for work or play. The sleep is fitful and rarely refreshing.

MALNUTRITION should always be suspected in a child who does not eat well, sleep well and gain weight. Bear in mind that properly nourished children between the ages of 6 and 10 should gain about five pounds a year. A child between 12 and 16 should gain between six and ten pounds a year Of course, there are marked variation sfrom this rule, but it may well be that the child who gains les sthan these figures is suffering from malnutrition.

Malnutrition can be traced to a lack of appetite and a dislike for certain foods. When a child refuses the essential foods, like milk and vegetables, undernourishment is likely to occur.

To avoid dislikes for foods, it is advisable to plan pleasant surroundings at meal times. Above all, never force a child to eat. He should be encouraged to eat and if necessary rewards for good behavior may be tried.

MANY A CHILD learns to dislike certain foods because it is discovered that the parent does not eat it. For this reason never discuss your food in the presence of a child. Children mimic their elders and love to imitate them in every way.

OUTLINES OF NEW PROGRAM FOR NEW DEAL

Will Fight Tenancy and Discrimination. Favors Farm Colinization

Memphis, Tenn., October 28—The National Federation of Colored Farmers, Inc., closed the most important convention it has ever held by awarding approximately seven hundred dollars worth of prizes to exhibitors of farm and home products and passing resolutions condemning farm tenancy, discrimination and debt-slavery and calling on the Agricultural Adjustment Administration to take immediate and practical steps to relieve the grievous condition of more than half a million Race tenant farmers, sharecroppers and their families. For four days, delegates, officials and prominent business and educational leaders discussed matters of vital interest both to the 850,000 Race farmers of the Nation and to the Race in general.

At the closing executive session on October 28th, important resolutions, prepared and presented by the

(Continued on Page 5)

EDITOR LEON HARRIS' ADDRESS AT MEMPHIS

Delivered to National Federation of Colored Farmers in Session

The biggest business carried on by our racial group in the United States is the business of Farming. In 1930, 882,850 of us were engaged in this one business, 882 850 separate farms were owned or operated by Race farmers,—nearly one-fifth of all American farms. The total acreage of these farms we own or operate is 37,597,132 and the value of land and buildings is $1,402 945,-799.

This farming business of ours should be given the important consideration it merits. Nearly one-third of our group live on farms. In some countries the smallest area of land, even an acre or less, is called a farm. If it were so here, we could truthfully say that nearly half of us are farmers. Thousands of our Race live on small parcels of land near towns and cities and raise hogs, fowls and keep a cow. But nearly a million of us are real, sure enough farmers, and this farming business of hours is a real, sure-enough business.

There are Race farmers in every state. We find the smallest number in the state of Nevada, only three. But they are pretty well off. They own 860 acres and the value of their land and buildings is $44,000. We find the largest number in the state of Mississippi, 182,578. Approximately twenty-five thousand are full owners.

HEADS FARMERS UNIT

Mrs. F. D. Smith, president of the Tchula, Miss., Unit of the National Federation of Colored Farmers with a membership of over four hundred.

BE IT RESOLVED

That we express our sincere thanks and appreciation to all who assisted in any way toward making this convention a success. We are especially indebted to governors of states who commissioned special representatives, to the corporations, business firms, associations and individuals that donated prizes and sent letters and telegrams expressing greetings and good will: to Dr. Henry Allen Boyd, president of the Citizens Savings Bank, Nashville, Tenn., and Prof. M. M. Hubbard, Principal, State Normal School, Ft. Valley, Georgia, for their stirring and instructive addresses: to the pastor, officers, choir and members of the First Baptist church, Memphis, Tenn., and to the organizations and citizens of Memphis who entertained us so unselfishly: and to those officials of the Federal and State Governments who expressed an interest in our progress and a desire to encourage our efforts.

Be it further resolved,—that to the Memphis World, the Chicago Defender and Atlanta World, whose co-operation and service was so essential to the success of this convention, we offer our sincere thanks and pledge our support.

COMMITTEE ON RESOLUTIONS

The National Federation of Colored Farmers, Inc. Convention, Memphis, Tenn., Oct. 25-28, 1933.

James P. Davis, President; Maj. R. A. Byrd, Vice President; Leon R. Harris, Secretary; S. B. Wilson, Treasurer; Cornelius R. Richardson, Atty. at Law, Chr. Board of Directors. Main Offices: Vincennes Hotel, Chicago, Ill.

EQUAL PAY FOR TEACHERS FLARES IN NORTH CAROLINA

Many Newspapers Oppose N.A.A.C.P. Raising Issue. Walter White Defends Body

New York, Nov. 10—The efforts of North Carolina whites through daily newspapers to frighten North Carolina colored people to divide them and prevent their following the program of the National Association for the Advancement of Colored People was called "boogey man tactics" by Walter White, N. A. A. C. P., secretary, in a statement here today.

"The hullabaloo which has arisen in North Carolina newspapers since the huge mass meeting in Raleigh, October 29, indicates that the white citizens of the state are not as true blue in their friendship for their colored fellow citizens as they have been trying to make us believe," Mr. White said. "The flood of news stories and editorials warning our North Carolina supporters about 'northern Negroes' and 'peaceful relations between the races' is nothing more than a boogey man' scare. The age of frightening Negroes is over. They aren't children any more. They can see for themselves and think for themselves. The best proof that North Carolina colored people know what they want is that 2.500 of them came to the meeting in Raleigh and at least 1,800 of these were from all parts of the state outside Raleigh.

"The N. A. A. C. P. program is not one of violence; it seeks equality and justice under the law. What are North Carolinians afraid of? Are they afraid the new spirit among North Carolina colored people will find out there has been some cheating going on all these years? The unequal teachers' salaries is the sore point. North Carolina cannot defend that except to come out and say the state believes Negroes should have less pay because they are not whit. We propose to try and adjust this inequality by negotiation if possible and in the courts, if necessary. In this move we have the solid support of the majority of colored North Carolinians, including the school teachers. We have the silent support of many, some of them white, who for many reasons cannot come out into the open. The white people should make no mistake. This movement is not the result of 'outside agitation.' tI is initiated and carried on by North Carolina colored people who believe they are entitled to full rights as citizens, and who have chosen to organize themselves under the banner of the N. A. A. C. P. Judging by the letters we have received the propaganda in the daily papers has only served to unite colored people more; they refuse to be divided by attempts to arouse jealousy and strife between southern and northern Negroes.' In this crusade colored people are a unit."

Farming A Paying Vocation

Raleigh, N. C., Nov.—(By the A. N. P.—According to John W. Mitchell, district agent of the State College Extension Service, North Carolina farmers are making poultry raising and gardening paying enterprises.

POPULARS REPLACE CHESTNUTS

It is reported by the United States forest service that yellow popular trees are rapidly replacing the chestnut trees that were destroyed in the Appalachian mountains a few years ago.

SPELMAN WILL PAY HOMAGE TO MEMORY OF LATE PRESIDENT

Atlanta, Ga., Nov. 11 (Special)—Memorial exercises commemorating the life and services to education of Lucy Hale Tapley, president-emeritus of Spelman College who died last year will be held on the morning of Thanksgiving day in Sisters Chapel on the college campus, it was announced today

In the spirit of the holiday the service will be one of thanksgiving for the life of Miss Tapley who was associated with Spelman College for 37 years, the last eighteen of which she was president. Alumnae of the college and her many friends in Atlanta and elsewhere in the South will participate in the services

Coming to the pioneer school for Negro women in 1890, nine years after its founding she served in turn as teacher of English and mathematics, matron, organizer and director of the teacher training department, and dean of the seminary. In 1909 at the death of President Harriet E. Giles, she became third president of the institution.

During her administration more than a thousand women received degrees or diplomas. Through her influence Spelman was raised from the status as a seminary to that of a Class A college. In recognition of her services the science hall of Spelman College, a gift of John D. Rockefeller, Jr., was named Tapley Hall in her honor. At her resignation in 1927 she returned to her brother's home in McKinley, Maine, her native state, where she died on June 6, 1932 in her seventy-sixth year.

Smallest Book in world half size of Stamp

Worchester, Mass., November 13.—(INS)—Weighing less than a third of a gram, and the twenty-eight pages together scarcely able to cover half a postage stamp, the world's smallest book was printed here, representing the labor of seven patient years.

It measures six-sixteenths by three-sixteenth of an inch and is bound in leather.

THE BOOK was printed from small copper plates. Seven plates, each containing four pages, were made by photoengraving. Two quatrain sappear on each page.

The tiny volume is the work of Hamilton B. Woods and Frederick K. Vroom, local publishers.

Its twenty-eight pages contain forty-six quatrains of the poetry of Omar Khayyam, the Persian bard, translated from the Persian twenty-five years ago by Eben Francis Thompson, widely known student of Persian.

THE SMALLEST book previously known was printed in Cleveland in 1900 by Charles Hardy Meigs This volume also contains Omar's verses, made up from the fourth edition of Fitzgerald's translations. It is approximately an eight of an inch taller than the local volume.

The contents of the new book differ somewhat from the widely rubaiyat of Fitzgerald's translations. More than twenty-five years ago, Thompson completed the translation in that Thompson rewrote the verses in tetrameter and they appear in that form in the book.

—Herald and Examiner

THE NEW FARM STAPLE

"....or the farmers have the opportunity to join the farm holiday movement and raise hell.—— Secretary Wallace.

They used to raise oats down on the farm,
And wheat and corn as well;
But now upon Farm Holiday
They go in for raising hell.

The new crop's easy to cultivate,
It springs up like a dart,
You can sow the darned think any time,
All it needs is a little start.

It's hard to get help on the farm,
To hoe and plow and seed;
But when you harvest a crop of hell
You'll get all the help you need.

They had to kill their little pigs,
And bury their wheat, by thunder!
The farmers say hell's their only crop
They're not made to plow under.

PLAN TWO PAYMENTS FOR TOBACCO CROP REDUCTION

Washington, November 13.—Flue-cured tobacco producers participating in the farm administration's program to reduce production next year by approximately 30 per cent to 500,000,000 pounds will receive rental or adjustment payment, amounting to $17.50 an acre, it was explained here today.

In addition to the rental payments producers will receive, after it has been determined that they complied with their contracts, a payment amounting to 12 1-2 per cent of the net yield from their crop. —Chicago Herald

SECRETARY HULL ASKED TO GIVE HAITI FULL FREEDOM

New York, Nov. 10.— Cordell Hull, secretary of state, was asked to abrogate to recent agreement between the United States and Haiti and remove all American control from Haiti and Haitian finances in a telegram sent yesterday by the National Association for the Advancement of Colored People.

Secretary Hull, about to sail for the Pan American conference in Montevideo, was urged by the N. A. A. C. P. to end all control, of Haiti in 1936 when the treaty expires as was told: "As you well know in Latin America, financial and military control of Haiti is regarded as a crowning example of alleged American imperialist designs. Unequivocal pledge prior to Montevideo conference of complete ending of financial and all other control of Haiti.. dramatically and convincing would demonstrate that America has no imperialist intentions in Latin America and would materially help to assure success of conference.'

The telegram stated further that President Stenio Vincent of Haiti has written Walter White, N. A. A. C. P. secretary, that Haiti sought also to end all control in 1936 and not follow the agreement of August 1933 which would continue American financial "advice" during the life of the Haitian bonds now held by private investors in the United States.

M. Dantes Bellegarde, former Haitian minister in Washington resigned, recently in protest against continued American control.

To Send Farm Teachers To Carolina Counties

Columbia, S. C., Nov.—(By the A. N. P.)—Allotment of 200 colored teachers of agriculture to the various counties in this state, to be paid with funds provided by the federal government as an unemployment relief measure was announced Monday from the office of Verd Peterson, white, state supervisor of vocational agriculture.

These teachers will be given special training for their work during the week beginning Nov. 13. Two hundred white teachers were placed in training this past Monday.

After attending emergency training classes, the teachers will be given jobs instructing farmers in the butchering and curing of meats; terracing, gardening, ditching, shoe repairing, feeding and care of poultry, and kindred subjects. The regular teachers of agriculture employed in the various school districts will direct the work of the emergency teachers.

SUNDAY SCHOOL LESSON Commentary

For 1934

Every Sunday School Teacher Should Have It

SIX REASONS WHY YOU SHOULD USE IT:

First: It is the production of your own National Baptist Publishing Board which gives employment to more of our people than any similar concern in the United States.

Second: It is purely baptistic and orthodox in every particular.

Third: Its doctrines are unquestioned, and the Biblical requirements are stressed in a manner to make it absolutely dependable.

Fourth: None of the modern theories leading to skepticism are admitted.

Fifth: It aims to be true to the teachings of Jesus and whatever there is presented which has not the "Thus saith the Lord" is discarded as unsafe and destructive of the best interests of mankind.

Sixth: Thoroughly adapted to the uses of our Sunday school constituency, it stands as a beacon light to all those who would like to rise in the scale of intelligence and demonstrate the qualification necessary for the accomplishment of the "Great Work" devolving upon us as a people.

A NEW STEP IN NEGRO EDUCATION

By Carter G. Woodson of Washington, D. C. Editor of the Journal of Negro History and the Author of the Negro in our History

In spite of the entertaining musical festival, the profitable evening with Negro poets, and the striking exhibit of Negro Art in connection with the annual meeting of the Association for the study of Negro Life and History, recently held in Washington, D. C., the most important result came out of the conference of modern language teachers. An entire session was devoted to the addresses of Professor V. B. Spratlin of Howard University, and Professor W. Napoleon Rivers, of the Agricultural and Technical College, of Greensboro, North Carolina, and to the general discussion opened by professor John Matheus of West Virginia State College.

These discourses showed very clearly the dereliction of Negro teachers of modern languages in permitting the whole task of textbooks writing to be monopolized zy others. While these speakers did not emphasize unduly the lack of fair-mindedness on the part of the editor of modern language texts they did not fail to show the unusual opportunity awaiting the Negro modern language instructor. The Negro teacher must think and advance his own thought. He has too long restricted himself to popularizing the thought of others.

Modern language texts which are used in Negro schools either ignore the race altogether or hold it up to ridicule.. This is unnecessary for the reason that in most Negro schools where modern language is being taught the teachers themselves have the right to choose their own textbooks. To neglect such an opportunity, then, is a dereliction for which this corps must be blamed. They can select for annetation and adaptation to schoolroom use works of standard authors who have treated the Negro as a human being and at the same time measure up to the standard of the best literature of the world. Among these were Pierre Loti, Voletaire, Lamartine, and Victor Hugo.

As Dr. W. Napoleon Rivers at this conference pointed out, even though it may be true that some authors of the modern langague texts now in use have preceded with their task without bias they are occupying in the mind of the Negro the sphere which the Negro himself should preerupt. Instead of assisting such authors in the extension of the use of works which bear especially upon the history and status of other people the Negro should edit and make use of these which do this very thing for his own race.

One of the speakers, however, took occasion to observe not only the bias of certain authors in the selection of modern language texts but their unscientific treatment of modern European literature from the point of view of the warped minds of most Americans. Some of these biased editors have not only carefully selected these books in which the Negro is not mentioned except to be condemned, but have tried to belittle and disparage the record of certain Europeans of African blood recognized as great figures in European literatures. Juan Latino is ignored or brushed aside, Pushkin is belittled as the father of Russian poetry, and Alexander Dumas is branded as an unintelligent writer. There falsehoods permeate many of the extensively used books in schools and colleges where Negroes are trained in the history of modern European literature. Taught by others to despise his own, the Negro thus trained either loses courage or despairs of the future of his people.

Getting beyond the point of mere talk, these gentlemen at the conference in Washington decided to organize among themselves a circle of modern language teachers who will take more seriously the duty at hand. They are making use of the large collection of European books, French in particular, recently brought over from Europe by Carter G. Woodson. They examined most of the works thus made available and decided upon a series of texts in the French language. The first two productions which will appear will be "Le Chevalier de St. Georges" by Roger de Beauvoir and "Georges" by Alexander Dumas. Negro students of French, then, will not only learn this foreign language and literature but they will have increased stimulus in studying the Negro in the European mind as revealed by these authors a century ago.

"Le Chevalier of Saint Georges" appeared in 1838. This character was a native of the West Indies transplanted to Europe for education. There he soon demonstrated that he was a man of unusual intellect with special aptitude for music. In this field he was thoroughly educated. He developed rapidly as a musician and attained the position of assistant director of the orchestra of the Opera in Paris. He was remembered as an outstanding character of his day and a distinguished man of Europe.

Of Alexander Dumas we have heard much in this country, but few have undertaken to see the man as he really was. Unlike most men of Negro blood who attain distinction in a foreign land, he never lost sight of his beginnings. In 1848 not long after Mery had written a book presenting the Negro only as supernumerary and after Frederic Soulie had justified the maintenance of slavery Dumas produced "Georges." In this there is a story of a struggle and victory of a Negro against race prejudice. Perusing it, then, the Negro cannot fail to find hope that in spite of the clouds which overshadow him today he will triumph over his difficulties and come into the enjoyment of the blessings of modern civilization.

These gentlemen, moreover, will act merely edit these books and have them printed for "of the making of books here is no end." These scholars of the new thought constituted themselves a committee to solicit the support of Negro teachers of modern languages throughout the United States in an effort to extend the circulation of this literature wherever serious thought is being given to the education of the Negro Four outstanding Negro colleges have already filed advance orders for these productions. They consider this a timely step, and instead of censuring somebody else because it has not been done they rather take the censure upon themselves.

EDITOR PUT ON VIRGINIA JURY

Norfolk, Va., November— (By the Associated Negro Press) — Four colored men were summoned for jury duty at the November term of the Federal district court beginning Monday

Two of those summoned, P. B. Young, Sr., editor of the Journal and Guide, and C. J. Fleming, were expected to serve on the grand jury, and the others on the petit jury.

Fleming is a former reporter on Mr. Young's paper, now employed by The Daily Citizen, New York He is a West Indian who attended the University of Wisconsin where he made Phi Beta Kappa and distinguished himself as a speaker.

LOS ANGELES ARCHITECT ON HOUSING COMMISSION

Los Angeles, Cal., Nov.—(By the A. N. P.)—Paul R. Williams, well known architect, was appointed last week by Mayor Frank L. Shaw to a commission of 15 representative citizens to consider municipal housing projects. This action was taken to grasp the advantages of "the provisions of the Public Works Act authorizing government grants and loans for housing purposes."

Mr. Williams is one of the best known architects in the city, and has served on other official bodies, notably on the one named by Presideent Hoover. He was the architect for the Elks Temple and many other buildings in this section.

ISN'T IT SO?

An automobile may be a luxury, but be without one a few days and see if it isn't a necessity

In trying to keep the home fires burning some people keep the fire department busy.

Violent exercise after 40 is especially harmful if you do it with a knife and fork.

Living from hand to mouth is tiresome to the hand. The mouth never suffers from fatigue.

—Herald Examiner

Named Drum Major At Tuskegee

Tuskegee Institute, Ala., Nov.—George L. Smith has been designated drum-major of the Tuskegee Institute Varsity Band for the current academic year by Captain Frank L. Drye, Bandmaster.

Young Smith, a sophomore, whose home is in Madison, Illinois, is a capable track athlete. He is pursuing a business course. Smith succeed to a place formerly held by a long list of drum-majors who gave distinction to the post and he has already demonstrated his fitness for the position. Smith's leadership of the Crimson Pipers at the Century of Progress Exposition in Chicago, October 21, when Tuskegee played Wilberforce, and at Tuskegee on the occasion of the Tuskegee-Morehouse football game, brought memories of William S. Latimer, acclaimed the best drum-major in the American Expeditionary Forces in France. Latimer served as drum-major of the Band of the 317th Engineers, having served as drum-major of the Tuskegee Institute Band before entering the service.

WOUNDED BIRD

She built a wall of grim defense
Around a spirit hurt and shy;
She wore an air of arrogance
For curious minds and glances sly
Words dipped in ink of insolence
Disguised the fear she would deny.

But I have seen a broken bird ,
With dragging wing and frightened eye,
Protest my gentle touch and word
With fluttering fight and futile cry.

PUBLIUS TERENTIUS AFER

African Slave Who Became Roman Citizen Listed Among Great

(Cleveland (O.) News)

Arthur Brisbane, in writing of "559 Great Men," picked out and gave prominent space to Publius Terentius Afer. While Brisbane writes spicy comments, it is the first time that he has delved into the darker country of Africa to pick out one of its satellites who became a world character He was writing from the calendar of "559 Great Men" which was gotten together some years ago and which is now one of the Classics in the library.

This particular character was born in Africa, taken to Rome as a slave, and there became a notable leader. He is accredited with having been so thoroughly educated in the Roman language and literature that one of his productions is now rated as a literary composition, a treat that has seldom been equalled It is said that he was brought from Africa by Terentius Lucanus, who subsequently freed him, but that his slave experience enabled him to write as no other had done about the lives of other slaves

Students of modern history and literature no doubt, will begin to unearth further facts about this, one of the world's greatest characters.

THE MODERN FARMER

Official organ of the National Federation of Colored Farmers, Inc.

Leon R. Harris - - Editor

Published monthly by the Modern Farmer at Nashville, Tennessee, and Chicago, Ill.

Nashville, Tenn., Office, 447 4th Avenue, North.

Devoted to the interests of the Farmer, Truck Gardner, Livestock and Poultry Breeder, the Home and the People.

Entered as Second Class Matter, April 10, 1929, at the Post Office at Nashville, Tenn., under act of March 3, 1879.

All contributions for publication in the Modern Farmer should be addressed to The Modern Farmer, 447 4th Avenue, North, Nashville, Tenn.

No libelous matter will be published. Unsigned articles or letters, and those written on both sides of the paper will not be used.

Subscription price $1.00 per year, 75c for six months, payable in advance. Personal checks must be certified. Make all checks or money orders payable to The Modern Farmer.

Advertising rates and sworn circulation figures presented upon application.

"OUR SLOGAN"

STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT.

THE LAW

"It is hereby declared to be the policy of Congress to promote the effective merchandising of agricultural commodities by encouraging the organization of producers into effective associations under their own control,

The Board is authorized and directed—to promote education in the principles and practices of cooperative marketing—to encourage the organization, improvement in methods, and develojment of effective cooperative associations. (Public—No. 10—71st Congress. Sec. 1-5.)

THE GOSPEL

"This law is predicated upon the ability of the farmer to manage his own business, once he is organized to do so. Cooperation is the key to it and only in exceptional cases can the Federal Farm Board have any dealings with a farmer who is not a member of a producer-owned and producer-contrloled marketing unit." Hon. Sam'l R. McKelvie, Former Member, Federal Farm Board.

LIFE IS A QUEST

Life is a quest. It begins somewhere and goes somewhere. It is not aimless or accidental. "In the beginning God" was spoken of the soul as surely as of the material world. Life starts with God. Out of His love, plan and purpose we came and into the glorious destiny He has prepared for us we are privileged to go. Long before a woman dreams her sweet, mother-dreams for the child, the Heavenly Father has erected her throne. Life arrives at the goal God has given only if it follows divine directions. Gracious girlhood should keep her eye ever on the mark as she presses forward in the queenly quest.

FARMERS TO HOLD STATE WIDE MEET DEC. 9, IN MISS.

Office of National Federation of Colored Farmers,
Chicago, Ill.

Farmers from all parts of the state of Mississippi will stage a big state wide meeting Saturday, Dec. 9, in Mound Bayou, at the Mound Bayou high school. This meeting will be one of the most important meetings ever held in the state of Mississippi. Every farmer in the state is urged to attend this meeting as much information by leaders of both races will be given. Many things of great importance to Negro land owners and tenants have been done in the last few days by the government. And every Negro farmer can benefit greatly by these things if he has the proper information and know when and how to act.

All problems of special interest to Mississippi farmers will be fully discussed. Mr. Davis who met with some of the leaders of the organization in Memphis Nov. 14, is busy these days contacting Government officials and others and it is expected that he will have good and startling news for the loyal members and friends of this organization. He is sparing no expense or pains in his effort to get this information to bring to the organization for which he is making such a great sacrifice. The meeting is called at Mound Bayou because of its unique location and is called at this time because Negro farmers would probably lose thousands of dollars were this information not given at this time.

The following outstanding farmers and leaders in their communities will have charge of the meeting: J. G. Keys, Coahoma, chairman; M. C. Geiger, Shaw; Wash Moore, Shaw; Mrs. F. Smith, Tchula; J. M. Thomas, Cohoama; Mayor B. A. Green, Mound Bayou, and Rev. B. W. Byram, Mound Bayou.

Every Negro farmer in Mississippi is urged and invited to attend this important meeting

WALLACE PREDICTS VAST FARMING SHIFTS

Vast shiftings in the farm population of the United States in a "rational resettlement" of the land may be necessary, Secretary of Agriculture Wallace predicted yesterday, in attaining the sound and permanent American prosperity to which President Roosevelt is committed.

He spoke before the convention of the Association of Land Grant Colleges and Universities in the Stevens Hotel, attended by hundreds of agricultural experts.

The world war and the economic upheavals it caused, disrupting the financial relations of nations and causing erection of trade barriers against the United States, inevitably forced land planning and monetary controls systems upon which the administration is embarked, he said, charging faulty leadership for delaying these projects until 1933

Great Changes Needed

"Things this administration has done may seem spectacular, but are only faint foreshadowings of the things which will ultimately be necessary before the United States takes its true place," Wallace said.

Standing out forcibly in his recital of farm woes and explanation of the solution the government is applying to them was this statement:

"If selfish bitter prejudices enter in too much the nation may find it necessary as a matter of self-preservation to use compulsion."

Aims of Program

Major points in the land planning program are these, he said:

Taking out of production "marginal" farms producing slight, poor crops and burdening the farmers.

Determination of the best uses for land in specific areas.

Selection of areas unsuited for agriculture but desirable for forestation.

Designation of areas undesirable for planting, best suited for recreation and residence.

"Next year it is likely that our acreage of harvested crops will be from 30,000,000 to 35,000,000 acres under the total of recent years," Secretary Wallace said "The immediate results of this drastic surgery should be helpful to the American farmer

Like Chess Board

"We are required to consider the whole of our land as a chess board, on which one move compels another. To alter the proportionate seeding means taking wheat from one square, for example, which cannot be allowed to remain idle. You must sow that land to some non-competing crop, probably grass.

"And that move compels a series of others. For when you increase the acreage of grass, you inaugurate in that locality a tendency toward livestock farming which, unless governed and balanced, will tend to dislocate the present livestock set-up."

Land Interdependent

Encouragement is to be found in the fact that farmers are "compelled to think of their farms as part of all the other land in the country, and to begin to farm it together instead of in blind competition," he said.

Many Farms Poor

Dwelling on the ill effects of marginal land farming, Wallace estimated that in 1929 50 per cent of American farms produced less than $1,000 worth of commodities each; if all lowest income farms, comprising 28 per cent of the total number were taken out of production the farm output of the country would be reduced only 3 per cent; reduction of the number of farms by 50 per cent would cut total production only 11 per cent.

"Readjustment of our land is inherent in the policy announced by President Roosevelt last July," he stated "In time that announcement may be recognized as the most important departure in American land policy since the homestead act. He said that as fast as good new land was brought into cultivation a corresponding productive unit of marginal or submarginal lands will be taken out and kept out, until there is need for it."

FACTS OF TCHULA, MISSISSIPPI UNIT

The Membership Produces On Their Own Farms

Most of the members of the Tchula, Mississippi Unit of the National Federation of Colored Farmers are land owners. Quite a number of them have paid for their farms, and others are purchasing theirs on the installment plan, while the remainder are planning to begin purchasing early next year. The motto of this Unit is "Be a land owner, become a self-respecting farmer, live in your own home, produce what you need to sustain life on your farm first, and then raise the rest to market at reasonable prices."

This Unit has regular meeting dates. They endeavor to come together once each week. They were organized during the month of August, 1930 in the Bethel Church of Tchula. Mrs. F. D. Smith is the chairman, Mr. Sam Diggs is secretary, Mr. Richard Hall is the market agent. Here are some salient facts that have perhaps never been known outside of this section:

Mr. Sam Diggs, with only seven field hands, produced this year 34 bales of cotton. Mr. Richard Hall, with just himself and wife, gathered 9 bales of cotton. Mr. John Smith, another real dirt farmer, with one hired hand working part time, even after ploughing up his 10 acres, gathered 9 bales of cotton.

The majority of the farmers down this way belonging to the Unit raise plenty of corn, lots of hay, Louisiana cane, peas, sorghum, cabbage, sweet and irish potatoes, peanuts, fruits, chickens, ducks, geese and live stock.

A recommendation from the president has urged each member to become readers of The Modern Farmer, and to adopt the thrift and saving plan advocated by the Association.

NEVADA TOWN SHIPS 33 CARS OF GOLD ORE

Tonopah, Nev., Nov. 13.—Thirty-three cars of gold and silver ore, eleven cars of lead-zinc concentrates and one car of precipitates were shipped from here during the month of October. The administration's announcement that the R. F. C. would purchase newly mined gold at a price above the world market is resulting in a speeding up in gold mining operations throughout this section.

—Herald and Examiner.

MRS. F. D. SMITH, PRESIDENT,

(Continued from page 1)

and about that section of the delta. recognized her ability appreciated her work and were guided by her safe counsel and advice. Finally she was elected as president. She took the movement into her own hands, gave it the benefit of her executive ability, handed out inspiration from time to time and got the finest piece of cooperation from the farmers of her section until at the Memphis meeting she reported an enrollment of more than 450 active farmers. Not only do they represent the cotton and corn growers, but the live stock and poultry dealers, the fruit farmers, the truck farmers and others who are handling diversified farm interests. Mrs. Smith was given a great ovation down at Memphis. She expressed herself as being heartily in favor of The Modern Farmer as the official organ not only of her Mississippi Unit, but of the National Federation of Colored Farmers.

She expects to have her family represented in the Unit, become readers of this farm publication, and at their next regular meeting, if the weather permits, it is her purpose to have a photograph made of her organization, so that the readers of The Modern Farmer and other publications might see the personnel, the numerical strength and this group of organized workers.

NEGRO WORKERS MAKE GOOD AS SALESMEN

Los Angeles, Cal., Nov.—(By the Associated Negro Press)—In a letter to Floyd Covington, executive secretary of the Los Angeles Urban League, the general manager of one of the leading food establishments on the Pacific Coast, assures him that the five colored men whom he recently took into his employ have made good. The manager says of the services of these men that they are "extremely orderly in their conduct, respectful in their manner, and as workers, diligent and purposeful Their sales have been constantly mounting and from present indications they are going to rank amongst the top notchers."

Organized Race Farmers Hold Successful Convention

(Continued from page 1)

executive board, were unanimously adopted.

Abolish Farm Tenancy

"Farm tenancy and the sharecropping system of farming are twin evils which are retarding the development and prosperity of the southern states and other sections of our country. These evils are responsible for debt-slavery, peonage, poor housing and living conditions, and a major portion of all the misfortunes colored farmers and their families suffer. As long as these evils exist, so long will Race farmers be deprived of equal opportunity with other farmers to enjoy the privileges of citizenship and the rewards of their labor. We shall continue to combat these evils by persuading and assisting tenant farmers and sharecroppers of our Race to become farm owners. At the present time our members have unlimited opportunities in every state to purchase farm homes on favorable terms. We urge all who possibly can do so, to take advantage of these opportunities and request our national officers to continue giving prospective buyers all information and assistance available."

"Fourth Man" Must Exist

Asserting that one Race tenant farmer or sharecropper out of every four will be deprived of his means of livlihood by the federal government's cotton acreage reduction program, the convention endorsed a resolution which stated in part:

"There are approximately 650,000 colored tenant farmers engaged in cotton production. Reduction of cotton acreage will force 162,500 of these from the cotton fields to find a source of livlihood elsewhere or to join the ranks of the cities' unemployed. Social justice demands that this situation be prevented. We urge the agricultural adjustment administration to further consider the suggestions outlined in the letter addressed to Mr. Peck, written by our national secretary under date of May 15th, 1933. We also urge that these tenants be allowed to occupy farm lands leased by the government and farms owned by federal land banks, and be given encouragement and assistance in producing food and feed crops for support of themselves and families."

Must Practice Cooperation

"The practice of purchasing needed farm and home supplies by following co-operative methods, should be continued. By purchasing cooperatively, Units are able to secure the major portion of their needs at, or near, wholesale prices. Units should patronize local merchants if given courteous treatment and if prices charged do not exceed those quoted on goods offered for sale elsewhere plus transportation charges."

"Because farmers can get better prices by selling many kinds of produce in carlot quantities, Units are urged to plant enough acreage in crops suitable to their soil and climate that will enable them to ship and sell in carlots. By practicing cooperative production Race farmers can prove conclusively that they are better farmers than the average and special markets will be rapidly developed for their benefit."

Leon R. Harris, national secretary, reported that units of the federation had purchased for cash approximately $80,000 worth of farm and home supplies in the last three years. Green beans, hay, watermelons, peanuts, sweet potatoes and mixed cars of vegetables have been profitably marketed cooperatively by units in the states of Mississippi, Alabama, Arkansas, North Carolina and South Carolina.

To Fight Injustice

The Federation will continue to fight large landowners and plantation managers who refuse to give tenants and sharecroppers written contracts or allow them the privilege of raising sufficient food crops for the sustenance of their families. Members will be persuaded to have no dealings with such landlords and will be assisted in finding favorable locations.

President James P. Davis opened the convention Wednesday morning and delivered a plain, practical and sensible address which was warmly received. Meetings were held in the First Baptist Church, Beale Ave., of which the Rev. B. J. Perkins, D. D., is pastor. Welcome addresses were delivered by Dr. Perkins and L. O. Swingler, Editor "Memphis World." Response to welcome addresses was made by Mrs. F. D. Smith, Tchula, Miss. Mrs. Smith is chairman of Bethel Unit, N. F. C. F., which has a membership of 481 Race farmers. It is believed to be the largest local unit of organized farmers in the United States, irrespective of race. Dr. Henry Allen Boyd, secretary of the National Baptist Publishing Board and president of the Citizens Savings Bank, Nashville, Tenn., Dr. M. M. Hubbard, principal State Normal School, Forsyth, Ga., who was commissioned by Gov. Talmadge to attend the convention,—and Leon R. Harris, Moline, Ill., national secretary of the Federation, delivered the principle addresses. George J. Strong, advertising representative, Memphis World, and Mrs. Gertrude B. Harris, had charge of exhibits and prizes. The grand prize, a pair of registered Hampshire pigs, valued at $100, was awarded to Daniel Givens, member of Bethel Unit, Lexington, Miss., for best sample cotton. The convention voted to hold state-wide meetings of the organization in Tennessee, Mississippi, Arkansas, Oklahoma, Texas, Illinois, North Carolina and South Carolina during the coming winter.

WORLD'S FAIR WILL OPEN

(Continued from Page 1)

President Dawes gazing out of the window to watch workman putting the great show to bed for the winter "In the next seven months we shall have to do practically all that we did in years. For we are opening a bigger and a better Exposition on June 1, 1934.

"There are thousands of details and problems before us. And as we are not seeking funds for next year we must practice rigid economy and yet achieve our purpose"

No Time for Vacationing

Asked whether he and his aids would take vacations before attacking their problem, Mr. Dawes snorted "This is no time for vacationing," he declared. "This is a time for work and work harder than we have had. I feel that I cannot play when others are engaged in the task before us. There is no time for vacationing when work must be done under the pressure of time."

Mr. Dawes explained that new contracts must be drawn up with 500 exhibitors and an equal number of concessionaries. In addition applications of new exhibitors and concessionaries must be examined and considered.

To date it is estimated that 90 per cent of the exhibitors have already expressed a desire to return in 1934. Of these 80 per cent have definitely said they will be represented. Of the latter number 25 per cent are asking for more space, which entails architectural and engineering problems.

As Many Changes as Possible

The Fair of 1934, said Mr. Dawes, although it will follow the general outline of that of 1933, will be revamped as completely as possible. Old exhibitors will change exhibits and the new exhibitors will bring additional attractions. The lighting and decorative scheme will be transformed.

How great the change will be is to be decided during the winter. During the period plans will be drawn for stricter control over shows and concessions. All exhibitions which met with objection will be eliminated. It is hoped that exhibits and concessions may be made more compact.

The immediate problem facing the Fair officials at present is one of finance. Within the next few days the personnel of the winter staff must be selected. Provisions must be made for adequate police and fire protection, for a staff to promote the 1934 Fair and for an executive group to carry on the business of opening in June.

With this out of the way officials will then concentrate an architectural and engineering problems to sign from renewal of old contracts and the making of new ones. As the opening of the 1934 Fair approaches the staff of the late Fair will gradually return to resume its duties.

Attendance Total 22,320,456

With the close of the 1933 Fair, M. M. Tveter, controller of the Exposition, announced the total of paid admissions as 22,320,456. In addition he said, there were 245,403 tickets sold, but not used, bringing the total number of tickets sold to 22,565,859

Evacuation of Camp Whistler began in the afternoon. With silver helmets gleaming and spurs jingling Troop A of the 14th cavalry passed in final review for 1933 on their way to Fort Sheridan. The troop was followed by the unit of the 61st artillery and the band of the 3d field artillery. Other units will leave today.

"We take a genuine and lasting pride in the soldiers that represented Uncle Sam at the Fair," said Mr Dawes. "They did themselves proud while they were here. We cannot praise them enough."

The camp will reopen in 1934.

TOOK COW TO SCHOOL AND MILK PAYS WAY

McPherson, Kan.—Charles Hager of Chase, Kan., wanted to go to school, but his finances were low.

He owned a cow, but he could not sell her for enough cash to pay his way in school. After thinking the matter over several days he decided to take the cow with him.

Now the cow is grazing in a vacant lot near his boarding house. He sells the milk to nearby residents, and the proceeds help pay his way in McPherson College here.

RELIEF AGENCIES TOLD TO USE NEGRO DOCTORS

Right of Patient to His Family Physician to be Respected by U. S.

Washington, Nov. — By the Associated Negro Press) — After conferences here between officers of the federal relief administration and leaders of the National Medical Association, assurances has been given that relief officials in all the states will observe the traditional right of the patient to the physician of his choice and that requests for the services of Negro physicians and surgeons will be mandatory.

After the conference, Dr. Peter Marshall Murray, New York chairman of the committee on Medical Economics of the National Medical Association, federal relief administrator, expressing his appreciation of Mr. Hopkins sympathetic and understanding consideration of the problem of the Negro doctor.

"We have every confidence that such problems as may arise will be dealt with swiftly and fairly," wrote Dr. Murray. "The services of our Association, you may be assured are available to you and your staff and we can promise you thorough-going co-operation on behalf of our section of organized medicine."

The National Association moved into the picture when it became apparent that in some stated where Negro practitioners were not accepted in the white medical organizations, they would be stopped from serving relief patients because of the plan of the relief administration to co-operate with organized medicine in selecting its medical aids.

So far the American Medical Association has held aloof from the federal ageney, fearnig that any form of association would provide an entering wedge in some aspect of socialized medicine. The assuranees given Dr. Murray and his committee members, however, gives the Negro doctor his chanee to serve through his connection with the National Medical Association.

Other members of the Committee on Medical Economics are; Dr. Julian Lewis, Chicago; Dr. Clyde Donnell, Durham, N. C.; Dr. W. J. Thompkins, Kansas City, Mo.; Dr. Roscoe C. Brown, Washington; Dr. M. O. Bousfield, Chicago, and Dr. C. A. Lanon, Brownsville, Pa.

SENATOR COPELAND'S WARNING

(Continued from page 1)

Food should always be served in a tempting manner. Avoid serving foods that are improperly prepared, tasteless and gritty. It is a good plan to taste the food before offering it to the child.

Accustom the child early in life to a wide variety of foods. New foods should be offered, but never forced. In this way many new dishes may be added and a properly balanced diet will be the result.

Persistent lack of appetite and lack of interest in food is a serious sign that must not be neglected. Do not resort to the use of so-called "tonic" and health builders." Consult your doctor. A complete physical examination may reveal diseased tonsils or other infection that is the underlying cause of the poor appetite and underweight.

Interesting News Notes

Ten American Negro cotton specialists, who were invited two years ago by the Soviet government to come to Russia to help improve the culture of cotton, have done much for the improvement of cotton culture in South Russia. Each member of the group was given a definite cotton-culture problem to solve. Most members of the group came from cotton-raising states. Chas. Young, Jr., son of Col. Chas. Young, is one of the group. They will remain in Russia indefinitely.

The Bennett-Miller report estimates this years cotton crop at 12,094,000 bales as compared with 12,709,647 bales last year. It is indicated that Texas and Oklahoma have produced nearly one-half of the total crop.

Sherman Henricksen of near Lincoln, Nebraska, won the national corn husking title, by shucking 27.62 bushels in 80 minutes. Harry Brown, another Nebraskan, won second place. We would like to know who the national cotton picking champion is.

The Federal Bureau of Agricultural Economics in its annual "agricultural outlook," published recently, predicts better times for the farmer next year if crop production is held to the 1933 level and if there is a pick-up in industries using non-agricultural products. It also says that higher prices for farm products may be expected but that wise farmers will continue planting large gardens and endeavor to live off the farm and purchase as little food supplies as possible.

There are 11 colored farmers in the District of Columbia. Eight are owners. Value of land and buildings owned is $43,500.

Nearly $90,000,000 of the approximately $111,000,000 to be distributed to cotton growers who plowed up cotton to reduce acreage has been paid out by the Farm Administration.

At the recent Georgia State Exposition held in Macon, what was said to be the "largest barbecue" was given in honor of Gov. Eugene Talmadge. Three hundred hogs were donated and 4,000 loaves of bread. More than 20,000 attended There were 50 barrels of lemonade, two tons of sugar, two truck loads of cabbages for slaw and two freight cars of cord wood. The best Race barbecuers in Georgia prepared the feast.

Three Arkansas farmers were fined at the fall term of Federal Court in Little Rock for making false statements in applying for federal seed loans. F. S. Wilson, a planter of Eudora was fined $1,500, J. W. Bullock, Desha county planter was fined $999, and John A. Green, a colored farmer was given ten days in jail. Green didn't know what he had done that was wrong but the planters confessed.

A story from Hemphill, Texas states that a colored farmer owned a gentle seven year old mule that has walked between the cotton rows for years, careful not to trample the growing crop. When the owner made ready to start plowing up some of his cotton the mule balked. The farmer and his sons tried all day to force the animal to work but not one row of cotton would that faithful mule plow under.

The total income of farmers from dairying in the U. S. in 1932 estimated at nearly one and one-half billion dollars. This is about 27 per cent of the income from all farm products last year.

Thousands of cotton pickers in the San Joaquin valley of California went out on strike recently, demanding $1 a hundred pounds for picking. They agreed to return to work at the old rate of 60 cents a hundred pending adjustment of the trouble. A $50,000,000 cotton crop was waiting to be harvested. Few of the pickers were colored.

Water from the river Jordan was used to baptize a girl by the pastor of the First Methodist church of Hillsboro, Ill

6,200,000 pigs weighing 160 pounds or less were purchased by the government in its recent swine marketing campaign. Geo. N. Peek, farm administrator, estimated farmers would receive more than $30,000,000 for the pigs and that packers would get $5,000,000 for slaughtering them.

The N. F. C. F. has issued a call to the Race farmers of Arkansas to attend an all-day meeting in the Mosaic Temple, Little Rock, Dec 2. This is the first of a number of state-wide meetings to be held this winter. The N. F. C. F. expects to double its membership during the coming year.

BARANCO, LOUISIANA LEADER PASSES

Baton Rouge, La., Nov.—(By the Associated Negro Press)—B. V. Baranco, grandmaster of Louisiana Odd Fellows and president of the People's Industrial Life Insurance Company, passed away at his home here early last Monday morning. Death came at the age of 62 after an illness lasting six days.

Funeral services were held at the home Tuesday afternoon and later at Bethel A. M. E. church with the Rev. J. W. Washington officiating. Burial was made in Magnolia cemetery.

Mr. Baranco was born in Baton Rouge where he reared a family of eight children and became one of the most responsible business leaders of the city. As leader of Odd Fellows in this state, he was the chief influence behind the erection of the Odd Fellows temple here. He was also deputy grand master of the national Body. In politics he was an active Republican and was associated, during the latter's lifetime, with the late Walter R. Cohen.

Mr. Baranco's widow and eight children survive him. Of the three boys, one is a physician and one a dentist in this city; the other is a student. One of the girls is a teacher in this city, one a student at Fisk; two are bookkeepers, and one is the wife of a dentist here.

L. A. Girl Proposes Basketball Game To Build "Y."

Los Angeles, Cal., Nov.—(By A. N. P.)—Miss Madeline Hunt, youthful student and girl athlete here has proposed an interesting plan which the various girl's athletic clubs throughout the city, are accepting with enthusiasm. She proposes a basketball schedule between the girl basketball teams of the city, the proceeds to go toward beginning a fund for a new and modern Y. W. C. A.

LEXINGTON CELEBRATES NEW CENTER OPENING

Officials of "Blue Grass" City to Give Equal Division Of PWA Funds for Two Recreation Buildings

Lexington, Ky., Nov.—(By the Associated Negro Press)—A rather ample three story brick building on a five acre plot at the corner of Fifth and Upper street (formerly occupied as an orphan's home for whites) was the scene of an interesting opening event in connection with the fall and winter program of the colored Playground and Recreation Commission of the City of Lexington last Sunday. The building and grounds, at present owned by the Board of Education, has been transferred to the City to be used as a recreation center under the supervision of T. E. Brown, director of Colored Recreation. Although inclement weather greeted the occasion a crowded assembly hall and the presence of three city commissioners together with the attendance of most of the Negro leadership gave considerable enthusiasm to the exercises which marked the formal beginning of the work of this department of the city's activities. The three city officials present were: Messrs. Charles R. Thompson, Sam H. McCormick, and Steve B. Featherston. The City Manager, Paul Morton, who had planned to be on hand was called to Washington, D. C., in an important rate decision to be argued before the U. S. Supreme Court. Introductory and musical numbers preceded the principal address which was delivered by Ernest T. Attwell, Field Director, Bureau of Colored Work, of the National Recreation Association. Mr. Attwell, an internationally known expert in the recreation movement, complimented the leaders for their inclusion in the local Public Works program the plan to construct two new recreation centers at an approximate cost of forty-five thousand dollars each, one for white and one for colored,—each to cost an equal amount.

He said: "The citizens of Lexington may well pause to emphasize their steps of progress, indicating the recognition of the newer vision in civic administration. This provision for a facility to promote public recreation—a factor in community life which has attained relatively level values with any contribution to social and municipal advancement—marks also a significant spirit of cooperation between the city and its citizens. No government can go far toward providing properly for its citizens' welfare unless it finds high type men and women willing to hold public office and considerate to the human needs of all. Lexington is especially favored with public officials of this type."

Mr. Attwell suggested to his hearers that "the National Recovery Act might fail its purpose if it was not accompanied by National Recreation Activity."

WHEAT BOUGHT BY GOVERNMENT FOR FARM AID

It was not generally made known yesterday that the government was buying cash wheat in various markets throughout the country, but it made purchases in North and South Dakota Kansas City, Oklahoma, and on the north Pacific coast. No statement was given out as to the quantity bought Operations were under the farm relief plan and understood to be part of the program necessiated by the gift of 5,500,000 bushels of wheat to destitute farmers for seed and feed in the southwest.

The government is lending 45 cents a bushel on corn to farmers in the middle west, while at the same time the farmer can only get around 48 cents for his corn in the open market. A large corn handler expressed a belief that under such conditions farmers are not likely to sell corn free.

—Chicago Tribune

OCTOBER GAIN OF CORN REFINING INDUSTRY IS 29 PER CENT

Operations of the corn refining industry increased 29 per cent in October, when the total grind was 5,761,000 bushels, the Corn Industries Research Foundation reports.

This sharp advance was in anticipation of the processing tax of 29 cents a bushel which is scheduled to become effective on December 1, in the opinion of the foundation.

There has been a heavy buying movement in starches, syrups, sugars, dextrins and other corn products during the last week, and leading corn refiners have had to increase their purchases of cash corn and step up plant operations, the foundation states.

The grind of the industry in the first ten months of 1933 was about 59,000,000 bushels, a 20 per cent gain over the like period of 1932.

COLORED STRONGHOLDS IN NEW YORK CITY STICK WITH DEMOCRATS BECAUSE OF PAST FAVORS

Editor of New York Age Defeated for Alderman By Colored Democrat

New York, Nov.—(By the Associated Negro Press)—Harlem again proved a political paradox. Although before the election last Tuesday, there was plenty of shouting for LaGuardia and the Republican Fusion ticket and one would have thought that the voters along Lennox Avenue, Seventh Avenue and "Sugar Hill" were flocking heavily into the LaGuardia fold, when the election day storm had blown over and the ballots were counted, the fusionists counted noses and Harlem was among the missing.

Mayor O'Brien, the Tammany candidate, carried both the 19th and 21st Assembly districts, colored strongholds. With him as running mate Assemblyman James E. Stephens galloped to victory. Alderman John W. Smith was the only Democratic casualty. He was defeated by C. A. Johnson, Republican, for a seat in the city council chambers. Fred R. Moore, editor of the New York Age, lost by less than a thousand to C. W. Bradford, colored Democrat for election to the post he formerly occupied as alderman.

The figures for the assembly districts in which colored people predominate were as follows: O'Brien polled 6,642 and LaGuardia 4603 in the 10. O'Brien received 6,142 and LaGuardia 5,565 in the 21st. J. E. Stephens won his seat in the legislature by 7,120. He beat C. T. H. French who received 5,961. J. Dalmus, popular "Mayor" of Harlem lost to R. Bernstein, white, Steele getting 8,182 and Bernstein 9,733. Mr. Moore received 7,486 votes while his white democratic opponent polled 8,385. Miss Alma Croswaith, a colored girl, runing on the Socialist ticket in this district, received 531 votes.

The results cast something of a pall over the Republican cohorts of Harlem. With LaGuardia in the mayor's chair, it was figured that a clean sweep of the offices in the two important districts would enable the building of a Republican party among colored voters in New York up to a new level. Tammany has had the call on the colored electorate in the past and even the increased registration this year, credited chiefly to Republican activity, failed to turn the tide. Commissioner Morton can chuckle in his lair, at least for two more years, when his term as Civil Service Commissioner expires. He attributed the victory chalked up Tuesday to the even handed patronage policy of Tammany and the fact that it had endeared itself to colored voters through giving them political recognition.

DROUGHT, HEAT, BUGS REDUCE ILLINOIS CROPS

Drought, heat and chinch bugs played havoc with the Illinois corn crop this year. According to the Illinois and federal department of agriculture the yield per acreage of 26.5 bushels is the smallest since 1901, with the exception of 1930, while indications are the harvested acreage will be the smallest in 59 years. The total production of 214,676,000 bushels is expected to be the smallest since 1887, comparing with 387,043,00 bushels last year, and is 28 per cent below average.

Practically all of the corn crop matured without frost damage according to the report. Around 75 per cent of the crop is now in crib in the northern part of the state and husking is about 25 per cent completed elsewhere. Husking returns indicate yields are very uneven by reason of irregularity in rainfall and intensity of chinch bug damage.

Conditions in the important central and eastern part of the state are almost uniformally unfavorable. Abandonment will be somewhat larger than early indications.

BUMPER COTTON CROP SEEN FOR THIS YEAR

Put at 13,100,000 Bales Despite Curbing Move

Washington, Nov. 8 (Ap)—A bumper cotton crop of 13,100,000 bales was forecast as this year's American production today by the Agriculture Department's crop reporting board, despite the Government's $111,000,000 effort to curb output

The board increased its forecast of production as of November 1, by 215,000 bales above the October 1, estimate. The increase of 1.7 per cent in production was largely accounted for by gains for Texas and Oklahoma.

The crop is 98,000 bales above that of last year. The board estimated the Farm Adjustment Administration's campaign to obtain agreements for farmers to plow up cotton in return for government cash reduced the acreage harvested about 10,340,000 acres to 30,036,000 and cut the potential production about 4,200,000 bales.

HONOR AMONG THIEVES

You said I stole your heart—
I heard you with a smile,
Because, you see, I meant
To keep it quite awhile.

But soon you took it back
(And not so gently, either!)
Then I found mine was gone,
And I was left with neither!

I said, "Return my heart!"
You did so very gladly—
Which was fair enough,
Yet I've been treated badly.

Your heart went back quite whole--
Not even any creases—
But, goodness! Look at mine—
It's all in little pieces!

Marion Koppell.

Says Husband Shot Her, Then Killed Self

Washington, N. C., Nov.—(By the A. N. P.)—Near death from three bullet wounds, Mrs. Mary Graham, wife of the Rev. George Graham, told Sheriff William Rumley that her husband shot her three times and then turned the pistol on himself. He died from a bullet in the brain. Two bullets were removed from the body of Mrs. Graham.

NOTED LEADER OF BOYS DIES IN BOLEY

Boley, Okla., Nov.—(By the Associated Negro Press)—James Henry Lilley, 55, and for seventeen years head of the State Training School for Boys, died Tuesday in his residence on the Training Scho l campus. The immediate cause of death was hemorrhage of the brain.

The deceased had been ill for more than a year, and three weeks ago secured permission from the state board of affairs to go to Mayo Brothers, Rochester, N. Y., for a diagnosis of his trouble. He returned last week telling friends he was on the upgrade in health and hoped to be about his work in a few weeks. At Mayo's it was discovered that the deceased was suifering from high blood pressure.

Mr. Lilley was born in Lancaster, Ohio. He was a graduate of Boston University Law School, located at Muskogee in 1910, where he formed a law partnership with Adam E. Patterson, now of Chicago.

In 1916, following the establishment of the Boys Training School at McAlester, Lilley was named as superintendent, a post he had since held.

NEGRO STRIKERS BACK AT WORK

Springfield, Ill., Nov.—(By the Associated Negro Press)—Negro workers who went on strike for 35c an hour and a nine-hour day on the Federal Barge Lines and Oil Mills at Cairo are back to work, the strike having been settled according to advice received from William Ashby, executive secretary of the Urban League here.

Mr. Ashby was brought into the situation when the poor relief station at Cairo was closed with a statement that it would remain closed "as long as people in our community are unwilling to work."

Upon receipt of this information Ashby immediately wrote Governor Horner protesting the closing of the relief station as a coercive stroke intended to deprive working people of their right of collective bargaming. He also conferred with the Negro representatives of the Illinois legislature, William E. King, Charles H. Jenkins, William Warfield and Harris B. Gaines. Mr. King made a speech on the floor of the legislature about this action in closing the relief station and on October 19, Alexander Wilson, administrative assistant to the Governor, informed the Urban League that the strike had been settled and the laborers were back at work.

BRONZE BABY NAMED FOR 'F.D.' GETS PRESENT

Columbia, S. C., Nov.—(By the Associated Negro Press)—A baby was born to Mr. and Mrs. Frank Huggins last week which they named Franklin Roosevelt in honor of the President. Notice of this was sent to the White House and the President mailed to the parents of the child a white silk handkerchief embroidered with the sentence "Happy Days, Franklin D. Roosevelt" along with a letter of congratulations, signed by the President's secretary.

FOR THE SUNDAY SCHOOL LEADER AND CHURCH WORKER

"HOPE"

Twenty-Eight Pages of Inspirational and Practical Material Each Month!

HERE'S WHAT IT CONTAINS:

FOR CHILDREN: Weekly Lessons for Sunshine and Starlight Bands on Missionary and Biblical Subjects. Stories, Puzzles, Games, etc.

FOR YOUNG PEOPLE: Lessons for Young Women's Mission Groups or Young People's Mixed Discussion Groups. Inspirational Accounts of Achievements of Modern Negroes. Devotional Poetry.

FOR ADULTS: Daily Bible Lessons, Editorials, Articles on a Wide Range of Subjects, and Weekly Outlines for Women's Missionary Meetings and Bible Bands. Because of its appeal to all ages it is an ideal paper for the Home.

FOR SUNDAY SCHOOL WORKERS: Six Points on the Sunday School Lesson Each Week Outlined for Daily Reading, Together with a Section of Questions, Suitable for Use in Class and in Sunday Assembly.

Nominally Priced at Fifty Cents Per Year in Single Subscriptions.

SHALL OUR BIGGEST BUSINESS SURVIVE?

(Continued from page 1)

But although this farming business is our biggest business, it is not an organized business. Probably seventy- five per cent of us who farm have never looked on farming as being a business at all. To many of us it has simply meant a livelihood, and hard work and drudgery. Hard working Race farmers are many--happy farmers are few and far scattered.

You farmers are producers. As such, you are constantly adding to the wealth of the Nation. You are making America a better country, a richer country, a happier country. You are giving much, nearly your all to America. What are you getting? As a body of useful, producing citizens you are getting very little from your labor. You are getting nowhere and there is a reason

You are good producers but you are individual producers You are individual producers living in an age of organization and cooperation. You are out of step with the times. You are out of step with life all around you and therefore, you are out of luck. You will remain the Lazarus of American farmers and continue getting only the crumbs from the table until you become well organized and practice cooperation.

The New Deal

We hear much nowadays about the New Deal. The National Federation of Colored Farmers gave a new deal to the Negro farmers of the United States the day it was organized June 5, 1922. On that day the founders of our organization resolved that colored farmers should and would be assisted in a way that would enable them to earn more, save more have more and be more as a result of their labor. We have not failed in our purpose. We cannot afford to fail. The destiny of one-half of our Race group in this Nation depends on the success and fortune of organized colored farmers. And plainly, I have said ORGANIZED FARMERS, for Negro farmers will never get anywhere as a group until they are ORGANIZED. And the group will not get anywhere either.

The Rooseveltian New Deal for American farmers includes us and we must be observant and get our share of its benefits. Our bulletins inform our members what they may expect and what they must do to be able to take advantage of federal relief provided under the New Deal. But no Race farmer shoul dexpect to get something for nothing. The day of "gimme" is over. The day of "furnish" is over also, whether it is landlord "furnish" or government "furnish" This is the DAY OF CO-OPERATION.

The sole aim and purpose of the new farm act is to raise farm prices. Mr. Peek, who is chief of the Agricultural Adiustment Administration, says that the government cannot raise farm prices or restore prosperity to farmers unless they work with each other and with the government. Organized farmers must realize they are a part of the government. We should also learn to work with each other, in one organization, and not against each other.

Negro Farm Tenancy

In connection with the New Deal however, there are some problems of special interest to us. We must let the whole nation know what we think about these problems. They are hard. They are worrisome. They need to be solved and solved right now .

Chief of these problems is that of farm tenancy. Farm tenancy, as it effects our group, must be destroyed. It is an evil and all of us, white and black, north and south, know it is an evil. It is the source of debt-slavery, of peonage, of poverty, oppression and persecution. It is the evil that covers the land, especially the Southland, with two-room shacks. It is the evil that is destroying the happiness of three million Race citizens. It smudges the souls of all who profit by it.

The colored farm tenant and sharecropper must become a farm owner. We should tell all the powers that be, both in government and out of government, that the American Race farmer wants to be a real farmer. That he wants to own the land he plows and plow the land he owns. That he wants the opportunity to possess, occupy and enjoy sixty acres of land will he is alive and young and active, not six feet of land onl yafter he is dead.

I propose that we suggest this New Deal to the administration. "That any farm or plantation containing more than eighty acres of tillahle soil, on which a federal land bank, or any bank partly capitalized by government funds holds a mortgage, and which, during five consecutive years has been cultivated by tenants or sharecroppers, that the government use all legal means available to obtain consent of the owner of said farm or plantation to subdivide it and sell same to its tenants."

I am confident that under the New Deal a way may be found to adopt this suggestion and enforce subdivision and sale of large farms and plantations. This would strike absentee landlordism a death-blow from which it would never recover.

Farm Leases And Contracts

Another problem of special interest to us in the problem of farm leases and contracts. Most leases now in use, especially on cotton-belt farms, are old-fashioned—obselete. A vast majority of the Race farmers of the nation are tenants and sharecroppers. I believe my estimate is conservative when I say that seventy per cent of Negro tenants and sharecroppers are never given a written lease or contract. This refusal or negligence of landlords to provide a legal written lease is a source of much evil and injustice. Human nature is the same everywhere. The tenant may get a square deal in times of high farm prices and prosperity but he is prices are low, or when storm, drought or flood causes under-production.

First of all, a farm lease or contract should provide for a profitable sytsem of farming. I have reports from hundreds of tenant farmers that landlords have refused them the privilege of raising sufficient garden products or corn enough to fatten hogs for meat. Some have reported they were prevented from keeping a cow. The right kind of a written lease will grant these privileges. Any system of farming is not worth a dime that will not permit a farmer to produce his own living. We should lease from landlords who will allow us to live on the farms we lease. We can starve any old place, but he is indeed a dumb farmer who will be content to starve on a farm.

A farm lease should also provide that a fair division of the net proceeds from the farm business be made between the two parties.

In many cases, tenants and sharecroppers are not permitted to sell their products, they never see the bill of sale or weigh-bills, they are told what they have coming to them or, that they have nothing coming to them, they get no share of the net proceeds whatever.

To solve this problem we should go on record as favoring an investigation looking toward revision of existing legal forms of farm leases and contracts. We should insist that laws be enacted and enforced compelling every landlord to give a written lease to every tenant While the New Deal is on, we should see that every Race farmer gets a square deal.

Cotton-Patch Slavery

There will be misery and unhappiness and want and a super-abundance of all other evils will afflict Race farmers as long as their wives and children are cotton-patch slaves. Organized labor wants the six-hour day for pleasant, highly-paid work for healthy men and women. Our wives and children labor in the fields sixteen hours a day. It is unlawful for the child under sixteen to work in the mill, factory, shop or mine. It is lawful for the farmer's six, eight or ten year old tot to work in the fields.

Our women and children deserve the comforts and luxuries of civilized life. They will obtain them, when the present system of cotton production, which has been damning the past fifty years has been rural people the past fifty years, has been destroyed. It will never be destroyed unless we, who suffer the most under the system, determine to destroy it.

Race Farmer As A Consumer

The greatest discovery that has been made in the United States during the past fifty years has been made during this depression. It is the discovery that American Lahor must have the leisure and the money to buy all the things it makes and produces. The Race farmer is a part of American Labor. He produces and consumes. He needs money and leisure. He cannot get either as long as he is a one-crop farmer. He must have the opportunity to earn more, have more and spend more. He will get this opportunity through organization and cooperation.

The Race Farmer's Future

The question is often asked by our city friends: "In the light of changing industrial and agricultural conditions, should the Race citizen be encouraged to remain in the country?" We reply, "Indeed so," and give the following reasons:

1. Because the cost of living will be lower in the country.
2. Because real estate will be lower in the country and the opnortunity to become a home-owner will be more alluring.
3. Because industry will be decentralized and part-time factory employment will become possible.
4. Because tenantry and the sharecropping system of farming is bound to disappear. The evils of the system will disappear also.
5. Because the majority of the group is still a peasant people and further farm discipline is necessary for permanent progress.

But the Race country dweller, the Race farmer, must be encouraged to put forth cooperative effort and action, so he may operate more efficiently. I advocate establishment of the Race farm community, and cooperative buying, producing and marketing. I advocate appointment of Race supervisors of federal relief for colored farmers and Race representatives of the AAA, to promote education in the principles and practices of cooperative endeavor . I advocate appointment of a Race extension agent and home demonstration agent in every county or group of counties having an appreciable Race rural population, same to be wholly under the supervision of the U. S. Department of Agriculture. I advocate bigger and better Race agricultural institutions, organization of Consumer's Leagues, of rural credit unions and building and loan associations.

RACE ISSUE DEFEATS DEMOCRATS IN OHIO

Colored Voters Mass Strength Against Cleveland Mayor, Beat Him. Put Three in City Council, One on Educational Board

Cleveland, Ohio, Nov.—(By Q. M. Forte for the Associated Negro Press)—Mantaining a six year unbroken record, three colored men were again elected to the City Council, Tuesday, when thirty thousand colored voters, stung to the quick by a vicious attempt of the local Democratic organization to disfranchise 12,000 of their number by wholesale challenge of votes, swept Ray T. Miller from office, elected Harry L. Davis mayor for the fourth time, and sent Lawrence O. Payne, Leroy N. Bundy, and John E. Hubbard to Council.

The mayoralty election which was one of the most bitterly contested in local political history, developed in its closing days as a duel between the power of massed colored voters in Wards Eleven, Twelve, Seventeen and Eighteen, and the strongly-entrenched Democratic organization, when the race issue was injected into the campaign speeches of Ray T. Miller, Democratic mayor, candidate for re-election.

The question of keeping the City Hall filled with white faces only; the danger of what Miller termed the ceratin domination of city goverment by Councilmen Payne, Bundy, and former Councilman Claybornе George, if Harry L. Davis were elected mayor, fused the campaign issues to a white-hot heat in the minds of colored voters, and they delivered a smashing blow to Democratic hopes for success when they sent Davis out of the black belt with more than twenty thousand votes to spare in his race with Miller. Davis was elected by a margin of nearly fifteen thousanl votes, thus demonstrating that the real balance in Cleveland politics is in the hands of colored voters.

The brazen attempt at disfranchisement of the big block of colored voters was rendered abortive Monday, when Common Pleas Judge Alva Corlett enjoined the Board of Elections from wholesale challenge of voters in the colored districts, except through public hearings as required by Ohio election laws.

Mary Mary B. Martin, first colored member of the Board of Education, whose candidacy for re-election was sponsored and conducted by a city-wide committee, was an easy winner. Dr. D. Ormand Walker, pastor of St. James A. M. E. Church, also a candidate for the School Board, failed of election, as did former Councilman George, candidate for municipal judge.

CORN TAX REDUCED

Processing tax on field corn has been reduced from 28 cents a bushel of fifty-six pounds to 5 cents a bushel, according to announcement made by C. M. McCabe, collector of internal revenue. This means a lowering of floor tax on articles processed wholly or chiefly from field corn held for sale. Canned hominy and canned field corn have been added to the list of taxable articles, the collector announced. On account of the reduction in the rate per bushel on field corn the bureau at Washington is preparing some new regulations on the processing tax on field corn, displacing to some extent the old rate, and until these are formulated the old rates are for the present to be disregarded, the collector said. Under the new rate the processing tax per 100 pounds of degermed Indian corn meal will be 15 cents, while non-degermed meal will be 10 cents per 100 pounds, McCabe announced

COLORED FARMERS OF ARKANSAS

COME TO YOUR MEETING AT

Mosaic Temple, Little Rock
Saturday, December 2, 1933

Farm Owner, Share-cropper, Tenant or Farm Hand—if you get your living from the soil you will be interested and instructed at this big, all-day meeting. Take a holiday and bring the family.

This meeting is called by the Executive Board of

THE NATIONAL FEDERATION OF COLORED FARMERS, Inc.

The only national organization of Race Farmers in America.

Come and learn what organization is doing for your Brother Farmers. Learn how you can earn more, save more, have more and be more. Forget about the drudgery of farming and learn about the BUSINESS OF FARMING. You will get new and timely information at this meeting.

COME ALL—COME EARLY—AND STAY ALL DAY.

(Farmers of other Southwestern States are also cordially invited.)

Return to The Soil Is Still The Slogan

BACK TO THE FARM ABLY, WISELY ADVOCATED

Chicago Defender's Editorial Takes Lead in Preaching This Gospel

The following editorial from the columns of the Chicago Defender, Robert S. Abbott's famous Race weekly, gives some sound advice to colored farmers and would-be-farmers and should be interesting to all of our readers. The Defender champions the cause of the Race farmer at every opportunity. You should read the Defender every week.

The article follows:

"We have been constantly hammering at the "back to the farm" idea because in the present plight of the nation it appears to hold the salvation of thousands of those who have traveled in metropolitan centers. The idea should be of special interest to that class of citizenry who in the very scheme of America's social life are denied the opportunity of performing highly specialized work, notwithstanding the fact that they may show exceptional fitness for the task involved.

When those who are prepared by reason of training and ability are not allowed by reason of race proscription to secure a livelihood through the exercise of their technical knowledge, then the opportunity is extremely remote for thousands who are forced to depend for their maintenance upon catch-as-catch-can employment. It must be admitted that among the many racial units crowded into the big cities we are the least prepared to measure up to the requirements of our environment.

This is doubly so now because of the fact that those among us who are capable of rendering some aid through the medium of employment have suffered reverses and are now incapacitated to contribute any industrial and economic support to the masses. It is no secret that thousands of women and children in the cities of New York, Philadelphia and Chicago and others are going unfed—not able even to secure the bare necessities of life—yet those

ROOSEVELT TO AID THIS HOME OWNER

Aberdeen, Miss.,— Uncle Jake Smith, who lives in the McCondy neighborhood, is the proud possessor of a letter from President Franklin D. Roosevelt.

Uncle Jake, who owns his little home and farm in Clay County, was about to lose it by foreclosure, so he wrote President and gave him the facts about his home. In just a few days Uncle Jake received a letter from the president, which said: "If they try to foreclose your home, telegraph me."

And Uncle Jake is certainly going to wire the president if they sell his home.

WILLIAM WESLEY'S PAPER

What's the Matter With The Average Negro Farmer

By W. Wesley, Rt. 1, Box 112, Alpine, Ala., Prize Winner

I have been farming for 30 years in the central portion of Alabama I have once operated a farm of seven shareeroppers. They seemed to have prospered under my administration, but as they d'd so, I noticed that they left and became shareeroppers under white landlords. The situation led me to study the Negro s nature in general.

In the outset, I must acknowledge that the fundamental weakness of the average Negro farmer is the lack of an adequate education to meet social and economie everyday problems and needs.

As you know, we have the dual system of edueation in the South, and we get 23 cents out of every dollar paid for publie education, per capita. Hence, the nature of our edueational facilities must be poor, —one and two teacher schools,— and behind this handicap, I found that the average farmer is unwilling to eneourage better provisions,—and if taxed the least amount, they would demand even their own children to stop sheool. Henee, every generation grows up in the same traditional predicament.

From this background, I am able to cite you three prevailing conditions that now exist. First,—he cannot appreciate the value of raeial confidenee and co-operation. Seeond,—he lives on traditional ideas and customs. Third,—he does not appreeiate the value of honesty and self-reliance. I will discuss these in order.

When I had my croppers I noticed that they stayed two or three years at the most. By then they had accumulated an independent living. I tried to give them wise advice and instruction. Then I notieed they wanted to dietate and run the business. Eventually, they seemed to feel that the steps that had brought them out of debt would not keep them out. Finally, they returned to the white landlord and lost the start they had made.

The only solution I can rely on is that the Negro farmer is ignorant of · racial support. He could get racial assistance under his white landlord but he would betray the trust. Thus any plan would fail. He works against his own interests.

The landlord is found favoring one of his croppers that he may keep tab on the group. This practice generates social friction and racial discord. This is a general practice throughout the South.

This traditional plantation system was so embedded in the Negro during slavery that even now, he feels that the landlord should eontrol all of his business activities You will find the landlord dictating the one-crop system, cotton. Often there is no provision made for gardens, hogs,

PRIZE WINNERS ANNOUNCED

Alabama, North Carolina and Mississippi Successful

The Modern Farmer is glad to announce the names of the winners of prizes awarded to those who wrote letters in answer to the question, "WHAT'S THE MATTER WITH THE AVERAGE NEGRO FARMER?" The question proved a very interesting one to hundreds of readers.

First Prize—$5 00 to Mrs Louisa Thomas, Rt. 1, Box 75, Cruger, Miss.

Second Prize—$3.00 to Miss Nancy Wiley, Rt. 1, High Point, N. C.

THIRD Prize—$2.00 to William Wesley, Rt. 1, Box 112, Alpine, Ala.

We congratulate the winners and sincerely thank all competitors. Watch for announcement of another prize offer soon.

HORSE PERFERS WORK TO BEING RETIRED

Noblesboro, Me., —Habits hold horses as well as humans in their grips. Otis G. Oliver, farmer, declared that his faithful nag, named Hannah, had served him well and deserved to spend her declining years on pension. But Hanah demurred. The easy life did not appeal to her, and so each day she goes to the cornfield and walks up and down between the rows, as though cultivating the crops as of old.

MIXTURE OF GAS, ALCOHOL TESTED

Thousand Motorists Said to Be Enthusiastic Over New Fuel

Gasoline and alcohol blended at the ratio of 90 per cent gasoline and 10 per cent anhydrous (dry) grain alcohol, produee a motor fuel superior in every respect not only to ordinary grades of motor fuel now available, but also to the so-called premium grades and "ethyl-gas" mixtures, according to the Illinois Agricultural association. This is the verdict of approximately a thousand Illinois motorists who for the last sixty days have been experimenting with the new fuel in actual use, it was stated.

The information is based on a eareful compilation of opinions by the Illinois Farm Supply Co., which has been distributing the new fuel in cooperation with the county service companies, the federal government and the American Commercial Alcohol eorporation. Those in charge of the experiment believe that it has been demonstrated conclusively that the new product is practical, and further that the general public, once convinced of the superiority of the blended fuel as demonstrated under actual work will use it.

Owning A Home Is Most Important Step

LEGGE'S WILL AIDS FARMERS

Nearly One Million is Left to Encourage Farming

A foundation to aid farmers and farm communities will be made possible by a gift of nearly a million dollars from the late Alexander Legge, former chairman of the Farm Board. Mr. Legge died in Chicago a few weeks ago. Gov. Frank O. Lowden announced the plan for the foundation immediately following Mr. Legge's death.

The purposes of the foundation are:

1. To encourage and develop eooperative effort and community organization and consciousness as means of improving the social, eeonomic, educational, and cultural conditions of rural life.

2. To stimulate and conduet research and experimental work for the study of any economic, social, educational or scientific problem of importance to any substantial portion of the rural population of the country, including problems of production, marketing and purehasing and the sound coordination of the agricultural with the industrial, financial, and mercantile life of the country.

3. To encourage, aid or finanee any university, institution, corporation or persons in the conduct of such research or experimental work.

4. To disseminate educational and useful information developed as a result of any such study, in such a manner as to be of praetical value to the farming population.

5. To promote and enlarge the intelleetual and eultural interests and opportunities of the rural population through eommunity aetion.

RENTERS WARNED TO UNSTAND LEASES

A reeent bulletin issued by the National Federation of Colored Farmers warns colored renters and sharecroppers to watch closely leases and contracts offered them for next year. Leasees are advised to insist that a written lease be given them. Cash renters are told that rent per acre in 1934 should be at least 40 per eent less than was paid for the same land in 1928-29. All leases should give the tenant privilege to raise suffieient garden produce, hogs, ehickens and the opportunity to keep at least one cow. Some landlords refuse to give written leases and there are thousands of colored farmers working year after year on the same plantations on which they were born and all they receive for their labor is a little food, a few clothes, and a few dollars handed them to spend during Christmas.

Roy Wong, a Korean, raises the largest persimmons produced in California. He sells them at a fancy price. Who is the colored farmer who raises the largest watermelons in Georgia?

AMERICANS SHOULD EMBRACE THIS PRIVILEGE

Poets Wrote and Bards Sang, Ministers Preached and Teachers Advocate This

The most important step in the acquisition of a home is the making up of your mind that you intend to have one. The very fact that you can afford to pay rent proves that you can afford to own your own home.

There is no better way to emphasize the fact that every family should own its own home than to quote the words of John Howard Payne, written many years ago and sung all over this broad land, and translated and sung in almost every known language, commonly known as "Home, Sweet Home:"

"Mid pleasures and palaces, though we may roam,
Be it ever so humble, there's no place like home."

The wide and general acceptance of the sentiment expressed in those lines prove conclusively the truth of the statement there is no place like home, and there is no reason why every upstanding citizen should not own his own home. The trouble with too many is, that they do not stop to think, do not realize the importanee, do not have the moral courage or the backbone to shoulder the responsibility of this important step. Too many indulge in wasteful extravagance, live away beyond themselves, thundering along at a speed that is hard to stop. Too many think only of present pleasures and do not consider future happiness.

Permit me to suggest to you, that at once you step on the brakes, hesitate for a moment's serious refleetion, take an inventory of yourself, think of the possibilities of a home of your own—then away deep down in your heart, pass a resolution to save and accumulate funds, so that in the near future you, too, can invest and be the owner of a part of Mother Earth. It has been said that the best investment on earth is the earth itself.

FARM BUREAU ENDORSES NEW DEAL

At its recent annual convention in Chicago the American Farm Bureau Federation,— the largest farm organization in the Nation, endorsed the efforts of the Roosevelt administration to assist farmers and pledge support. Sec. Wallace addressed the Convention. Legislation recommended included extension of the processing tax system; reduction of land taxes; lowering of interest on farm lands; greater use of silver money; abolition of tax-free securities and Phillipine independenee.

WIDE CELEBRATION OF NEGRO HISTORY WEEK PLANNED BY CHURCHES, SCHOOLS AND CLUBS

Carter G. Woodson, Founder and Race's Greatest Historian Prepares Free Programs for Colored and White Groups

Negro History Week literature is now being distributed by Carter G. Woodson, the Director of the Association for the Study of Negro Life and History, 1538 Ninth St., N. W., Washington, D. C. This organization started this movement in 1926. Every club, society, church or school is entitled to the Negro History Week pamphlet free of charge. Persons desiring more than one copy must pay ten cents for each.

The main feature of the PAMPHLET is the report of the Committee on Findings recently appointed at the Annual Meeting of the Association for the Study of Negro Life and History. This Committee was asked to make recommendations with respect to what we should teach the Negro child about himself and about others in relation to himself. The Committee is still active and will work out in concrete fashion suggestions for the correlation of Negro life and history with the curricula now in vogue throughout the United States. When during the celebration of Negro History Week the achievements of the race are sufficiently dramatized the effort should lead to the actual study thereof.

During the celebration teachers often meet with a number of objections. One race leader recently said that it is foolish to have any such celebration as Negro Health Week or Negro History Week. The analogy here is weak, for health is a thing which a person may largely take care of himself, but the matter of teaching the culture of the Negro depends mainly upon the attitude of public authorities. Yet, as one has said, just as the Negro should be taught not to look after his health during one week of the year but throughout the twelve months so should the history of the Negro be thus presented to the children in the schools. This is a most sensible statement, but is no objection to Negro History Week inasmuch as the effort has no such significance as to endorse the study of the Negro one week during the year. The chief aim of the celebration is so to exhibit the works of the Negroes and dramatize their achievements as to induce educational authorities to incorporate into the course of study the same sort of treatment of the Negro that we have of other elements of the American population.

For nineteen years the Association for the Study of Negro Life and History has been fearlessly working to reach this end and can report much progress in this direction not only in Negro schools but in white schools in the North and South. While in Texas during the celebration of Negro History Week in 1933 the Director had to divide his time between white clubs and Negro clubs and between white schools and Negro schools. Other speakers appearing before the public on such occasions have had to do the same. We know also of the increasing number of institutions of both races which are now establishing wide awake courses dealing with every aspect of Negro life and history.

He who regards the celebration of Negro History Week as an effort to crowd into seven days intensive study all that should be learned by the Negro during the year is either uninformed as to what the celebration means or too biased to tell the truth. No school will object to celebrating Lincoln's or Douglass' birthday because some teacher may not mention the achievements of these distinguished men in his work during the year. It should be done, and it is being done by alert teachers and workers throughout the country. The complainant to the contrary is usually the chronic "kicker" or the stumbling block that never amounts to anything but is always preventing progress.

It is urged in the NEGRO HISTORY WEEK PAMPHLET, which is now being distributed by the thousands, that the public take certain definite steps forward. In the first place, the community must be aroused to the point of appreciating the Negro as it appreciates others. In every community the board of education should be approached to secure the adoption of supplementary works and textbooks of Negro history and literature, not to decay on the shelves of some storeroom but to be placed in the hands of the children as working manuals in penetrating the background of their people. These authorities are to be asked also to place in the public libraries adequate collections or at least shelves of scientific works dealing with the Negro in ancient, mediaeval and modern times and to hang upon the walls of these buildings portraits of Negroes who have achieved well in spite of handicaps.

It is requested, moreover, that interest be manifest in saving the records of the Negro that the race may not become a negligible factor in the thought of the world. In the homes of Negroes and of their friends are valuable manuscripts like letters, diaries, wills, deeds, bills of sale, manumission papers and the like in which are hidden the facts of Negro history not mentioned in the books, newspapers, and magazines of our day. To have these data on hand to pass them on to the fair-minded investigators of tomorrow that they may tell the story of the race when this generation is no more—this is the challenge that comes to every Negro and to every friends of the race who has any regard for the future of this people.

Going further, the Negro in America must manifest more interest not only in the collection of such materials but in supporting teachers and investigators who are equipping themselves for such efforts and are giving their lives unselfishly to the production of treatises therefrom. These are the men who are making it impossible for the world to forget what the Negro has thought and felt and attempted and accomplished. We are really beginning to listen to the truth which they have discovered, and thereby we have given increasing stimulus to the struggle for that larger freedom. All promoters of the truth, then, may join wholeheartedly in the exultation from the results already achieved and the success which must come to crown their future efforts.

OUR LANGUAGE

Louisville Courier-Journal: G. B. Shaw prides himself on his knowledge of American slang. After his visit to the United States, he now knows what a flop he is.

WEST VA. COLLEGE WILL AID MASSES

President Davis Puts School on Job of Teaching People NRA Rules

Institute, W. Va., Dec— (By the Associated Negro Press.)— The faculty of West Virginia State College has voted to enter upon a state-wide program to acquaint Negroes with the laws respecting codes, relief, reemployment, mortgage loans and other remedial measures now being promoted by the state and national governments. President John W. Davis pledged renewal activities on the part of the college in helping to carry forward the relief programs of President Franklin D. Roosevelt in the national government and Governor H. G. Kump in our state government. The position taken by the college was one of active cooperation with existing agencies. No effort will be made to duplicate any of the relief machinery now in existence.

As a land-grant institution, the college feels that it cannot do a greater service for the people of the state than to quicken its activities along the line of getting information to the people so that they may be in better position to secure the benefits of the various relief acts. It was pointed out that a great deal of suffering exists among the Negro people of the state and that much of it is due to the fact that information is lacking on methods of relief.

It was agreed that Professor Thomas E. Posey will serve as the College Secretary on Relief. He will have associated with him strong committees on necessary information and state personnel. In this way the college will reach every section of the state in which there is an appreciable number of Negroes.

Children Give Operetta At Washington Community Center

Washington, Dec. —(By the Associated Negro Press) — Monday afternoon was a happy time at Southeast House when the Children's Theatre presented a delightful operetta "Dance of the Thanksgiving Vegetables."

On Tuesday the second group of the Children's Theatre presented "The Thanksgiving Pop Corn Man". The Pilgrims enjoyed their feast, gave thanks with poems, songs and stories while they were enjoying games, "The Pop Corn Man" entered accompanied by other Indians. The Indians gave a merry dance and then introduced the Pilgrims to their first pop corn. The Pop Corn Man then taught the Pilgrims how to pop the corn, after which a rousing three cheers and a big 'Thanks" was given for The Pop Corn Man as the curtain fell.

"DEAN HASKER"

By Mrs. Mattie Williams, Kansas City, Mo.

The advance of civilization has forever discarded the old order of human existence and set forth the imperative need of a reconstruction. Our protracted efforts like the experience of half a century, has led the thoughtful of our day to the conclusion that the scientific and systematic development of the physical, mental and moral factors of the human constitution does not produce educators. For such training that fails to enable men to become independent and logical thinkers, makes victims of deception of its every subject in the field of education.

The time is, that creators must bring forth a new circumstance, conclusive to the production of men and women of real ability and high ambition, such as fruits in profitable and lasting achievements, that count in the welfare of the majority. For he who would live in the happy realization of the fullness of life, must seek his good in the general prosperity of the masses. The person scientifically trained goes to the world in search of a position, while the educated goes forth to add inventions and institutions to the progress of the human race.

The creators needed for the advancement of the Race, must be produced in Negro schools, and to produce the class of persons mentioned, the intelligence of the occident must have the association and service of the wisdom of the orient.

Our comprehensiveness must be broadened, if we find the solution to our educational and other problems.

It is ours to remember, that a century passed, then came the second, and the third, and the fourth is well begun since we began our voyage in this region, and just so old are many of our problems that remain untouched for solution. But through our educational institutions our problems must be solved.

Our professions must be encouraged and assisted in world investigations, that they may return with profitable information for the promotion of the Race.

THE
NATIONAL BAPTIST PUBLISHING BOARD
Recommends some of
THE POPULAR SONG BOOKS
Listed below for use in Churches, Sunday Schools and B. Y. P. U. Meetings:

National Baptist Hymnal—Price, $1.00 per copy, $11.50 per doz.
National Baptist Old Style Hymn Book (words only)—Price, 70c per copy, $8.40 per doz.
Lasting Hymns—Price, 40c per copy, $4.80 per doz.
National Gospel Voice Hymnals—50c per copy, $6.00 per doz.
New Songs of the Gospel—Price 50 per copy, $6.00 per doz.
Victory Song Books, 40c per copy, $4.80 per dozen.
National Anthems—Price 50c per copy, $6.00 per dozen.
Steal Away To Jesus Anthem—Price 25c per copy, $3.00 per dozen.
Metoka and Galeda Anthems—Price 10c per copy, $1.00 per dozen.
National Jubilee Melody—Price, 50c per copy, $5.50 per doz.

If you are interested in congregational singing as well as choir music, send in for some of these books.

Send all orders to

NASHVILLE, TENNESSEE.

FARMER'S CHOICE IS TO ORGANIZE OR DROP OUT

"If the farmer is to overcome the handicap of individualism in a corporate age, he must organize, as the rest of economic America has organized, or be lost in the shuffle." said Dr. Glenn Frank, president of the University of Wisconsin.

"If he wants to survive he has no choice in the matter or organization. If the American farmer turns his back upon a completing and sweeping organization of the agricultural forces of America, nothing under heaven can prevent his going to the wall."

The sharp advance in hog prices in recent weeks is attributed by federal authorities to a change in the general economic situation during the last two months.

Keeping the manure hauled is one of the most effective ways of reducing the number of flies that will be hatche this summer.

A SMILE

The long-eared farm mule driven by an aged Negro pulled a rattling wagon past a red traffic light.

Traffic became paralyzed. Motorists shouted. Horns tooted in swelling bedlam.

"Hey, you," roared the policeman trying bravely to untangle the snarl. "Didn't you see that red light?"

"Yes, shu, boss, I seed it long 'fore I got here," the old Negro replied with a disarming grin. "I been watching it flash red and green as I drove up the street. Ain't no telling what you city folks gwine do next for Christmas decorations."

So saying, the aged one clucked to his mules and was on his way still grinning. The policeman watched him go.

GEORGIA WOMAN DEBATE FEDERAL ANTI-LYNCH LAW

Ask State Legislation Giving Governor Power in Lynching Cases —Commend Roosevelt, Ritchie And Park— Rap Rolfe's Abject Surrender.

Atlanta, Ga., Dec. 8:—Facing a marked increase of mob violence in 1933, the Georgia Council of Southern Women for the Prevention of Lynching, in annual session here today, discussed the wisdom of asking for a federal anti-lynching law, but deferred action until the matter could be more fully studied. The Council requested the South-wide meeting of the Association to be held here on January 9 to give mature consideration to the proposal.

It was reported that twenty-seven lynchings have been recorded this year, as against eight for 1932. In view of the unwillingness of local officials and courts to prosecute in such cases, the Council voted its approval of proposed state legislation giving the governor authority to direct investigation and prosecution in lynching cases.

The following telegram was sent to President Franklin D. Roosevelt "The Georgia Council of the Association of Southern Women for the Prevention of Lynching, assembled at their annual meeting in Atlanta, wish to express their profound gratitude for the unequivocal and courageous denounciation of lynching conveyed in your address before the Federal Council of Churches of Christ in America."

The Council also expressed hearty appreciation of the emphatic condemnation of lynching recently expressed by Attorney General Homer Cummings, and commended the vigorous steps taken in recent lynching cases by Governor Ritchie of Maryland and Governor Park of Missouri. These steps, the Council stated, were "the more notable by contrast with Governor Rolfe's abject surrender to the mob and the official inaction so commonly observed in such cases."

The Georgia Council is a constituent part of the Association of Southern Women for the Prevention of Lynching, an organization of white women fostered by the Commission on Interracial Cooperation and directed by Mrs. Jessie Daniel Ames, of the Commission's staff. The Association has a membership in thirteen southern states of more than 16,000 women each of whom has personally signed a repudiation of lynching and a pledge to do everything possible to eradicate it.

LAUDS TEACHING AS CONSECRATED CALLING

Supt. Says First Trait is Teacher Should "Be Somebody"

Atlanta. Ga., December 9, 1933.—(Special) — The declaration by Atlanta's superintendent of schools Dr. Willis A. Sutton, that the teaching profession is a consecrated calling furnished the key-note of the second annual conference of principals and teachers of the Negro public schools of Atlanta, Fulton County and De Kalb County which opened here last night and was concluded today. Several hundred attended the sessions which included eight discussion group meetings and a luncheon at which the work of the conference was summarized by Dean E. C. Mitchell of Morris Brown College. The general theme of the conference was 'Progressive Teaching Technique."

Doctor Sutton reminded the conference that the greatest man that ever lived delighted to be called a teacher. He declared that it should be said of every one in the teaching profession, as Nicodemus said of Christ: 'Thou are a teacher, sent by God." He set down the three requisites of a real teacher as: first, a person who is somebody, since being is more important than doing: second, a person who knows something and is forever growing both in knowledge and spirit and third, as one who can impart his knowledge to others skillfully and sympathetically.

The visitors were welcomed to Atlanta University which acted as host and sponsor of the occasion, by its registrar, Mr John P Whittaker. Mrs. M. Agnes Jones, supervisor of Negro education in Atlanta, called on all teachers to develop a broader outlook on the profession with the view of helping the community solve the problems that beset society. "The measure of success of a teacher," she stated, "is the kind of children we shall leave behind us."

TURKEY DRESSING

Boil and mash 3 very large potatoes. Add the crumbs from 1 1-2 large loaves of bread (which have been sliced and allowed to dry out for a few days). Melt 1 1-2 cups of butter in an iron pan, and 1 cup chopped onion, 2 cups chopped celery stalks and leaves. When tender add the potato and bread crumbs and salt and pepper to taste. Beat up 3 eggs and blend lightly with this mixture. Stuff turkey with it.

NO SHADOWS AT SUNSET

Milton M. Bales, D. D., Orlando, Fla.

Morning came and passed away!
Silvery locks soon turned to gray.
Steps once firm are feeble now;
Furrows deep have wreathed my brow.

Childhood came and passed away!
Youthful days refused to stay.
Loved ones, all, have said "goodbye!
Soon we'll meet beyond the sky."

Worldly joys and pleasures gay,
Only lasted one brief day.
Hope and faith and love abide,
Unaffected by the tide.

Joys replete—song in the night—
Guarantee that all is right.
My anchor holds the livelong day,
No shadows lie athwart my way.

It's sunset now—almost in sight
Are the hills of fadeless light!
Angel choirs and faces dear,
Await my raptured heart to cheer!

Soon this night will have an end.
Guardian angels He will send.
All is well—my home's in sight;
Eternal day displaces night!
Hallelujah!

NATIONAL 'MEDICS' FAVOR ANTI-LYNCH LAW

Philadelphia, Pa., Dec. — (By the Associated Negro Press)—An informal conference of all the General Officers and members of the Executive Board of the National Medical Association was held in the Directors room of the Douglass Hospital, Lombard St. Philadelphia, Pa., on Wednesday November the 29th, 1933, and presided over by Dr. Geo. W. Bowles as Chr. of the Executive Board from York, Pa. Others in attendance were Doctors M. O. Bousfield, President, J. H. Hale of Nashville Tenn., President Elect; J. A. Kenney of Newark-Editor of the N. M. A. Journal; C. A. Lanon of Brownsville, Pa., Gen'l Sec'y and Ex-Presidents P. M. Murray of N. Y. C., E. S. Burwell, J. P. Turner, N. M. A. State V. President for E. Pa., Dr. P. Edwards and C. A Lewis, E. Pa., Zone Director.

The President and other general officers made their reports and from all indications it is evident that a new interest and enthusiasm is prevalent and that the N. M. A. is going to have one of its best meetings in years in Nashville, Tenn., August 13-18, 1934.

After strengthening their own internal policies of organization discussing plans to strengthen and protect the "Negro" Doctors place and position in American Medicine and against the avalanche of forces that seek to miminize or destroy his influence: the conference went on record as unanimously support the enacting of a Federal Anti-Lynching Law.

In the morning Dr. J. H. Hale of Nashville. Tenn., operated in the Douglass Hospital and in the afternoon at the Mercy Hospital after which an informal conference was held with the officers of the various local Philadelphia Medical societies, their problems and their relation to the N. M A.

4 STARK COUNTY SOWS ADD 52 PIGS TO U. S. SURPLUS

Bloomington, Ill.— Four Hampshire sows owned by Ross Shockley, Goshen township farmer, in Stark county, are not on sympathy with the government's plan to reduce production. The four sows farrowed 52 pigs, averaging 13 pigs in each litter.

FOR THE SUNDAY SCHOOL LEADER AND CHURCH WORKER

"HOPE"

Twenty-Eight Pages of Inspirational and Practical Material Each Month!

HERE'S WHAT IT CONTAINS:

FOR CHILDREN: Weekly Lessons for Sunshine and Starlight Bands on Missionary and Biblical Subjects. Stories, Puzzles, Games, etc.

FOR YOUNG PEOPLE: Lessons for Young Women's Mission Groups or Young People's Mixed Discussion Groups. Inspirational Accounts of Achievements of Modern Negroes. Devotional Poetry.

FOR ADULTS: Daily Bible Lessons, Editorials, Articles on a Wide Range of Subjects, and Weekly Outlines for Women's Missionary Meetings and Bible Bands. Because of its appeal to all ages it is an ideal paper for the Home.

FOR SUNDAY SCHOOL WORKERS: Six Points on the Sunday School Lesson Each Week Outlined for Daily Reading, Together with a Section of Questions, Suitable for Use in Class and in Sunday Assembly.

Nominally Priced at Fifty Cents Per Year in Single Subscriptions.

THE MODERN FARMER

Official organ of the National Federation of Colored Farmers, Inc.

Leon R. Harris - - Editor

Published monthly by the Modern Farmer at Nashville, Tennessee, and Chicago, Ill.

Nashville, Tenn., Office, 447 4th Avenue, North.

Devoted to the interests of the Farmer, Truck Gardner, Livestock and Poultry Breeder, the Home and the People.

Entered as Second Class Matter, April 10, 1929, at the Post Office at Nashville, Tenn., under act of March 3, 1879.

All contributions for publication in the Modern Farmer should be addressed to The Modern Farmer, 447 4th Avenue, North, Nashville, Tenn.

No libelous matter will be published. Unsigned articles or letters, and those written on both sides of the paper will not be used.

Subscription price $1.00 per year, 75c for six months, payable in advance. Personal checks must be certified. Make all checks or money orders payable to The Modern Farmer.

Advertising rates and sworn circulation figures presented upon application.

"OUR SLOGAN"

STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT.

THE LAW

"It is hereby declared to be the policy of Congress to promote the effective merchandising of agricultural commodities by encouraging the organization of producers into effective associations under their own control.

The Board is authorized and directed—to promote education in the principles and practices of cooperative marketing—to encourage the organization, improvement in methods, and develojment of effective cooperative associations. (Public—No. 10—71st Congress. Sec. 1-5.)

THE GOSPEL

"This law is predicated upon the ability of the farmer to manage his own business, once he is organized to do so. Cooperation is the key to it and only in exceptional cases can the Federal Farm Board have any dealings with a farmer who is not a member of a producer-owned and producer-controloled marketing unit." Hon. Sam'l R. McKelvie, Former Member, Federal Farm Board.

CHRISTMAS—1933

TO THE COLORED FARMERS OF AMERICA.—YOUR LOVED ONES AND FRIENDS:—

May you hear the song the Farmer-Shepherds heard. May Peace be yours. May the Good will of your fellowmen encourage you. For you may New Year be crowded with His Goodness.

The Modern Farmer.

NO ORGANIZATION—NO LOANS

The Government wishes to get rid of the seed loan plan and all farmers who need production loans this year will have to become members of crop production corporations. In other words,— to get a loan they must organize.

This will be beneficial to all farmers, especially to colored farmers. Organizations must be started at once in all communities where farmers require loans for next year's crops. Communities already organized,— where there are units of the N. F. C. F.— be in fine shape to perfect their crop production associations and will be first to receive assistance needed. The government is striving mightily to force farmers to do something for themselves,— to cooperate,— and we are foolish to stay out of organizations when our very existence as farmers depends on our becoming organized.

We advise and urge all colored farm communities to immediately organize units of the National Federation of Colored Farmers. If you will not organize now,— you will certainly have to organize in the near future — whether you want to or not. Better get into an organization of your own than be forced into some else's. If you are wise you will accept this advice at once.

November! we are thankful.
For rain and sun and fertile loam,
For planting time and harvest home;
For strength and will to do our part
Courageously,—with honest heart:
Nor criticise His all-wise plans,
Who holds the seasons in His hands.
—November! We are thankful.

THE ANNUAL CONVENTION

We believe the annual convention of the National Federation of Colored Farmers which recently convened in Memphis will be long remembered as the one that cleared the organization's path toward the goal of permanent success. Delegates who attended, came not only for inspiration and instruction, but they came too, to express their faith in their organization and their determination to help it exist and progress.

Colored farmers who have gotten a taste of the benefits of organization and cooperation realize that they are much better off than their brother-farmers who are drifting along in the old way. No matter how rough the sailing, they are going to stay in the boat. They cannot be easily discouraged. The determined delegates who attended the 1933 convention and vowed to pull together and stand by their organization through thick and thin, deserve all the praise that can be given. They are the true farm leaders of our Race group. They are bound to have many followers because faithfulness, industry and perseverance are always rewarded.

BEFARE OF FAKIRS

We have before us a letter from a prominent official of a southern state, a man close to the governor, informing us that certain white and colored men are going about in his state organizing Race farmers in what are termed "colonization projects." These organizers pose as "government men", take one dollar each from Negroes who are foolish enough to listen to them, and promise those who join their secret society farms, implements, stock and money enough to produce the first year's crop. In some instances these fakirs have passed as organizers of the National Federation of Colored Farmers and the American Farm Bureau Federation.

Again we warn colored farmers to beware of the fakirs,—of those who promise you all you need and probably should have,—all just for a dollar or two. The brethren can't keep their promises. No one can give you something for nothing except nothing. Colored farmers have been skinned out of more money by liars and fakes than any group in the nation. It's high time we were getting our eyes open.

No "government men" are going around promising you a farm for a dollar. When such an one comes to see you, put the sheriff on him or give him a boot in the pants. Neither does the Farm Bureau, which is "white", nor the National Federation of Colored Farmers, which is "colored", send strangers among you to get you organized. These organizations rely on progressive farmers who live in your own country or in a neighboring county, to do the organizing.

These are trying times. The nation is full of people who have been used to making an "easy" living and they want to keep on living easy. Don't let them make the "easy" money off you. Beware of these fakirs and when one appears, run him out of your community.

LET US EXPLAIN

The Modern Farmer has been criticised because it has devoted little space to news relative to the government's new plan of cotton control and similar experiments. We know that all "cotton news" is interesting to our readers and would like to publish more. But we cannot do so for two reasons. First, we have not the available space and secondly, we cannot afford to leave out news more interesting and valuable to a majority of our readers.

We are going to have plenty of time to talk about these government agricultural experiments in the future. Experiments are hardly worth talking about anyhow until they have been tested. We know, too, that colored farmers are mighty good Americans and they are not going to knock anything the administration is doing for the benefit of ALL American farmers. They are going to do their part. They will be the last group of American farmers to strike, kick, or even criticise.

The government can depend on us to support it and we believe our national leaders realize this fact. But we will say this:

"It would make us feel a lot better if, some time or other, Mr. Roosevelt, Mr. Wallace or Mr. Peek would speak right out and say, 'Thank you, Colored Farmers, for your interest and support. We realize you are the most forgotten of American farmers but assure you that our New Deal is for you too and you will share in its benefits.'"

Our columns are open, Gentlemen, for your expression, and 900,000 American Negro farmers and their families would like to read it.

"BIG FARMING" IS FOOLISH

Farming is a way of living as well as a business. This is why when farming becomes a big business it ceases to be farming. The big farmer may be a big business it ceases to be farming. The big farmer may be a big business man but he is not a farmer. He can't be both.

Wall Street went big farming crazy a few years ago and financed Thomas D. Campbell, the "Montana Wheat King," and made him the greatest farmer in the world. He was so big that Russia, which had also gone big farming crazy, asked him to come over there and advise them how to do big farming. But in spite of his advice, Russia has less wheat now than ever before. She has not wheat to export and not enough to well feed her own citizens.

In some sections of the United States, coroporation farming is being tried out, but is not proving a success. The corporation farms are hiring the good little farmers to work for them. But the moment the good little farmer becomes the hired hand of the farm factory employee, he ceases to be good. And he won't stick.

Numerous American banks and insurance companies have financed large cotton plantations and are now beginning to realize they have made poor investments. These plantations are cultivated by tenants and share-croppers, who are bossed by managers. The bosses can force them to raise cotton and still more cotton but they can't force them to like it. And they don't. The tenant and share-cropper wants a farm of his own and if he wants it bad enough he will eventually get it.

The tenant and share-cropping system of farming is doomed in this country and it is well that it is. Big farming of all kinds has been tried out in the world for thousands of years and it has always failed. It has failed in the United States. It has failed in the cotton belt.

SPRING WATER TASTES LIKE CHICKEN SOUP

Thompson, Nev. — A bubbling spring is supplying a camp of "Weary Willies" with "soup." If a little pepper and salt is added to the hot, highly mineralized water, its likeness to chicken soup is said to be astounding.

FARMERS TO ORGANIZE

Winston County Growers Plan To Improve Marketing Facilities

Louisville, Miss.,— An organization has been perfected in Winston County with N. W. Dempsey as president: W. J. Humphries, vice president, and Mrs. R. W. Boydstun secretary, to work out a definite plan for a farmers' marketing association here. Interest in this new move here was prompted by the realization that the 1934 cotton program means more idle acres, and in view of the possibility of federal aid being extended for a marketing association project, this is considered an opportune time to promote such a plan.

The projects have been divided into four major heads, namely poultry, canning, syrup mills and a meat curing plant. Each of these projects will be headed by a president and the four presidents will act as a board of directors for the association.

This plan of organization interests the Modern Farmer because it will force co-operative production, something we have been preaching to colored farmers the past five years. Units of the N. F. C. F. would do well to attempt to imitate this plan of organization. Produce co-operatively,— so you can sell in carlots and get better prices. The day of every-man-for-himself is over. We must organize,— work together,—and work in harmony, or we will all become farm hands and dependants.

STOP ACCIDENTS IN THE HOME

Twelve thousand people were killed in the United States in 1931 by falls caused by littered stairways, chairs used as stepladders, rugs on slippery floors and steep stairs without hand rails. There was a $160,000,000 loss in home fires in the same due equally to carelessness with matches, defective chimneys and flues, electricity and carelessness in the use of dry cleaners, such as gasoline. Every home owner should make a tour of the whole house at least once a month to make sure that no fire or accident hazard has developed.

Out of approximately half a million 4-H Club boys, Harry Hege, of West Point, Ind., was named 1933 national meat animal champion. Out of more than 100,000 4-H Club girls, Elena Shoup, of Barlesville, Okla., won national championship canning conest.

Interesting News Notes

Representative Traux, of Ohio, believes that the new deal for agriculture will result in employment of three million men as farm hands. He says that many farmers need help now but cannot pay for it.

There are 39,598 Negro farmers in the state of Virginia, a decrease of near eight thousand during the past ten years. Nearly two-thirds of them are full owners. They own 1,179,824 acres and the value of land and buildings is $41,743,427. Value of land alone is over twenty-three million dollars. Virginia is the only southern state in which Negro farm owners cultivate more land than Negro farm tenants. This speaks mighty well for Virginia Race farmers.

The Department of Agriculture announces that a fine sauerkraut can be made from medium-sized, purple-top turnips. It is made like kraut from cabbage. This should interest our farmers who have luck with turnips but who cannot produce cabbage.

One hundred years ago this month, the first school for slave children in the United States was opened by Prudence Grandall, a Quaker girl of Canterbury, Conn. She was arrested for disturbing the peace. The court did not convict her but a mob sacked the school and chased the pupils aways. Our Race should erect a monument to Prudence Grandall.

It is reported that many farmers are "bootlegging" flour, pork, sausage, sorghum and other products. They are selling to neighbors without paying the processing taxes. Some tobbaco farmers are also selling tobacco. This is against the law. Farmers are permitted to feed employes and members of their families but they are not allowed to sell products taxable unless they pay the amount of taxes due.

Pope Pius XI, head of the Catholic church, owns one of the finest farms in the world. The farm supplies the 700 inhabitants of the papal state with fresh produce daily.

C. Worth Holmes, of Joy, Ill., was named corn king of the world at the International Livestock Exposition, which recently closed in Chicago. Holmes is the first man in history to win with a sample of Krug Utility type corn. He displayed a smooth-kerneled yellow. Previous winners have displayed a rough-kernel type.

Oberlin College is celebrating its 100th anniversary this month. Oberlin was the first American college to take a stand against slavery and to admit students regardless of race, sect or creed.

KING SOLOMON SAID "EAT HONEY"

That honey was an old stand-by in ancient times is proved by the frequent mention of it in historical literature. It seems to have been appreciated even then for its health value as well as its flavor. It was King Solomon who said five thousand years ago, "My son, eat thou honey because it is good, sweet to the taste and health to the bones." The advice is still good today. Honey served instead of sugar on cereals is a real morning treat.

Between 1920 and 1930 colored farmers lost 2,749,419 acres of land they formerly owned. This is bad news. We must lose no more.

MORE MULE NONSENSE

(From A Subscriber)

"Mr. Chairman, Fellow members; I have longed desired to address sueh a distinguished, intelligent audienee as this is upon so important a subjeet. I sineerely thank our Chairman for giving me this opportunity. I have studied the question of why a donkey's tail isn't under his neek for many years, and have after deep thought eome to the conslusion that by the laws of Nature and beauty the tail should have been plaeed under the donkey's neek where it would have given the effect of a flowing beard.

"But, the Bible tells us that the Lord made the Heavens and earth in six days, and rested on the seventh. He made the animals the last day, and my common sense tells me the donkey was the finishing toueh. Now, the Lord was very particular about working on the Sabbath. Ladies, and Gentlemen, absolutely the only reason why the donkey's tail is not under his neek where it belongs is that when the Lord had all of the donkey completed but his tail, it was 11:59 Saturday P. M. and he just didn't have time to reaeh way around and put it under his neck, but had to stiek it on the poor donkey's hind end where it unfortunately remains to this day."

FARM CREDIT PLAN OUTLINED

Crop Production Association Need To Be Speeded Up.

The machinery by which farmers will borrow money for making the 1934 crop was outlined yesterday by C. G. Henry, general manager of the Mid-South Cotton Growers Association at the Memphis Agricultural Club's meeting at Hotel Claridge.

The importanee for speed in setting this machinery in motion was urged by the speaker, who said only a few crop production assoeiations had been formed so far.

"In the past small loans have been made thru the crop production seed loan offices, while larger loans based on collateral have been made thru the Regional Agricultural Credit Corporation under the RFC" Mr. Henry said.

Seek Practical Basis

"The government wishes to get rid of the seed loan plan and put the business on a practical basis. The Farm Credit Administration, now headed by Dr. W. I. Myers at Washington, has complete charge of land banks, loans to co-operatives, management of Federal Intermediate Credit banks and, in order to furnish credit to farmers, is to establish Crop Produetion Corporations with $7,500,000 eapital each."

These eorporations will be in New Orleans for Louisiana and Mississippi farmers, St. Louis for Arkansas planters and Louisville for Tennessee.

Furnish Capital Stock

"It will be the business of the Crop Production Corporations to foster and furnish eapital stock to local Crop Produetion Associations.

"Ten or mare farmers can get together and form a crop produetion assoeiation. The Crop Production Corporation will furnish the original capital. Each farmer who borrows from the loeal association must take 5 per cent of his loan in stock, the purpose being to ultimately places the full control of these loeals in the hands of the farmers themselves.

"It doesn't require any money to start a local. Eaeh assoeiation must pass upon the collateral of eaeh loan. The interest that may be eharged will not exeeed 7 per cent, and must not be more than 3 per cent above the rediseount rate.

Liberal Rediscount

"Local associations eannot loan more than 20 per cent of the eapital stoek of the association to any one farmer.

The association can rediscount five times as mueh paper as the capital stoek of the association, which means that if the eapital stoek of $100,000 it can rediseount paper up to $500,000."

TELL HER SO

Amid the cares of married life,
In spite of toil and business strife,
If you value your sweet wife,
Tell her so!

There was a time you thought it bliss
To get the favor of a kiss;
A dozen now won't come amiss—
Tell her so!

Don't act as if she'd passed her prime,
As though to pleasc her were a crime—
If e'er you loved her, now's the time;
Tell her so!

You are hers and hers alone;
Well you know she's all your own;
Don't wait to carve it on the stone—
Tell her so!

Never let her heart grow cold,
Richer beauties will unfold.
She is worth her weight in gold;
Tell her so!

—Mrs. John H. Whipple.

BACK TO THE FARM

(Continued from page 1)

who assume the responsibility for their support continue through desperation to remain in the big cities.

In the absence of proper employment thousands of young men and girls who were educated to be useful citizens have, since coming to the big cities, found it convenient to form habits both destructive to themselves and to the future of the race because they could not meet the requirements through honest effort.

The battle for existence in a large city is too serious and severe for a large mass of people who themselves represent a racial identity which is unable to furnish them employment. The fact that they are dependent upon other racial groups robs their women of that moral security which they could count upon if their own men occupied a more positive status in the industrial, economic and business world.

We are confronting facts and not theories. Our trouble, at least in part, is that we are attempting to compete with a standard of life in large cities over which we have no economic control. A fact is no less a fact because we try to ignore it. A school teacher without a school to teach is just as hard up as the fellow who cannot teach at all; in addition thereto she is mentally disturbed by a system which prevents her from securing that for which she is qualified.

The educated man and woman who persist in remaining in the big city add nothing to the sum total of our problem but additional weight. It would be much better if they would start a crusade of "back to the soil." They would thereby not only solve their own problems, but would contribute much to the solving of the social and economic difficulties of those they leave behind."

WILLIAM WESLEY'S PAPER

(Continued from Page 1).

but a few chickens, cow or potatoes. In other words, he lives entirely in the present. This system causes him to get all his groceries from the store in limited amounts,—generally on the landlord's account,—with no statement of the amount spent or interest charged. At harvest he never gets a statement of his financial condition or accredited balance. Should the individual have enough intelligence to demand a settlement he gets the statement,—"Moving off is the only settlement you get."

The landlord's program is so planned that little time is left for religious or civil activities. This sets up a second barrier to racial co-operation. The above evils finally terminate in the fact that the average Negro farmer fails to appreciate the value of self-reliance and honesty.

If a colored landlord had several croppers they can be persuaded by external means to dispose of his harvest illegally for little or nothing. Hence, the Negro farmer works against his own interests.

Last, but not least, he does not yet realize that he can shoulder responsibility and accumulate something if he tries.

These are the causes and problems. Can you give me a remedy?

IRON IS NECESSARY

Iron is one of the minerals which is too frequently low in the average diet and only a small amount is needed. A shortage of iron causes secondary anemia. During periods of rapid growth especially a more liberal intake of iron is necessary than at other stages of life.

Some foods rich in iron content are lean beef, oysters, spinach, liver, molasses, wheat brain, oatmeal, peas, beans, raisins, whole milk, beets, carrots and turnips.

BRITISH SEEK LOST FLOWER

$1,000 Plant Stolen in London

London, England—One of the world's rarest flowers, valued at $1,000, has disappeared from the rock garden of its owner, the Rev. J. F. Anderson.

Police are investigating. Thousands of posters proclaim a reward for its return. Flower shows and flower salesmen have been warned to report any attempts to sell the flower.

The plant, a globe-flower, is unique in the respect that it bears a flaming orange flower instead of the gold bloom common to the species.

It was discovered six years ago by the Rev. Anderson's gardener and since that time famous horticulturists have admired it in the rock garden of the vicarage.

It is believed the theft of the plant was the work of an expert as it was carefully uprooted and the earth replaced.

BUGS FOUND IN FLOUR GIVEN COLUMBUS POOR

Columbus, Ga., Nov. 4—Complaining that flour dispensed to the needy of the city is in a decayed condition, Columbus labor officials are conferring with officials of the Muscogee county relief administration. The flour is being given out by the Red Cross.

Samples with weevils and bugs have been exhibited here, as part of that given to the city poor. In some cases, the flour has been used by people ignorant of its conditions, and in other cases, it has been eaten because the people had nothing else to take its place.

The above item is interesting. It is clipped from a prominent southern daily. The N. F. C. F. received many reports from Mississippi and other southern states last winter that the flour distributed through the Red Cross in many cases was not fit for human consumption.

DOG BIRD LOVER FEEDS HIS PETS; PROTECTS THEM

Lansing, Mich.—"Duke,' an Airedale owned by Joe L. Heath, 430 Lathrop street, is probably the only canine bird lover in Lansing. Every morning "Duke" parks himself by the bread can and refuses to leave until his mistress gives him a slice of bread. He takes it in his mouth and strolls proudly out into the yard and sits nearby until the birds come and eat it. According to Mr. Heath this has been a habit of "Duke" for years. The birds know the dog and come in large numbers every morning. Other dogs of the neighborhood and the cats formerly tried to "crash" the party but "Duke" took care of that, his master says.

TUNE CHANGERS

Philadelphia Bulletin:— Science says the mocking bird can change its tune eighty-seven times in seven minutes. There are several birds in politics who will regard this record with envy.

MORE THAN FIFTEEN THOUSAND ORDERS FILLED

National Baptist Publishing Board's Plant Reports Continued Increase in Literature Circulation

More than fifteen thousand orders for Sunday School Literature, B. Y. P. U. Helps and Denominational Supplies were filled this past quarter by the National Baptist Publishing Board's Plant of this city. This statement was released from the office of the secretary on Monday morning, because their official quarter ended on Nov. 30th. Since they did not begin their new record until Monday, Dec. 4th, the reports were not checked up and compiled. "In other words," said the secretary, "we have kept in constant touch with young people of our denomination with their organizations, their Sunday schools and their B. Y. P. U. Societies. We are still insisting, with some success, that a piece of Baptist literature be placed in the hands of the members of every Baptist church, and because of that our denominational forces ordered literature for the October, November and December quarter constantly. The number of orders that came in was exactly fifteen thousand, one hundred and fourteen.

"It will be recalled that in the complication of our report which was made to the National Baptist Convention of America, we not only gave the number of orders filled per quarter, but the pieces of religious literature, tracts and publications mailed out for the end of the fiscal year, which averaged a little more than a million per month. The Sunday School Congress workers in their various departments decided last year at Shreveport, that they would individually see to it that a new record was set for the next fiscal year which will end the last day of August, 1934."

It is understood that the secretary, in giving this out, was not attempting to get the number of Baptist schools that they are supplying, nor the number of Missionary Baptist schools organized in the United States. He declared emphatically that he was not sure just how many there are, that he is not the statistician of his denomination, nor had he received a report from the official statistician since he was elected at the Chicago Convention.

FARMERS BELIEVED TO BE TURNING TO METHODS OF 1893

That failure of the farmers to cooperate wholeheartedly with the agricultural adjustment administration was due chiefly to "incompatibility," according to an article written for the Current History by S. Lubbell and W. D. Everett. The philosophy of the new deal is collectivistic. Farmers are actually more individualistic now than ever before.

In meeting the depression they have turned back to doing as "we did on '93. Greater self-sufficiency has become their aim. Farmers are raising more of their own food and placing less reliance upon cash incomes. Simpler methods of farming have taken the places of the specialized techniques of the 20s.

Tractors are lying idle while horses, mules and farmhands, often working on a barter basis, are toiling in the fields. Social life has become decentralized and centers in the home.

The depression has not inclined the farmer to forsake his traditional habits of thought, his old ways of living, for something new. Rather it has turned the clock back in many farmhouses.

Farmers feel that one of the chief reasons for their sorry plight is that they were too prone to flock to the city in the past. For the future of the American farm they are looking not to collectivistic action but to the training of better farmers — but according to pioneer standards.

SASSAFRAS TEA

(Ohio State Journal)

Small bundles of sassafras bark are for sale in the markets. It is used in making tea, considered an ideal spring tonic when the country was new. Prevalent ideas then were that the blood was made thick and heavy by eating the rich food of winter and liberal portions of sassafras tea were needed to thin and purify the contents of the blood stream.

A companion spring tonic was sarsaparilla extract, a tea made from the small roots of the vine If members of the family had a regular course of these two teas, and then used a dozen doses of sulphur, cream of tartar and molasses, mothers and grandmothers were confident there would be no spring fevers and health would be preserved.

Sassafras tea still is popular with many. With a little sugar it is an acceptable drink. Whether or not it has a tonic value, one loses nothing by drinking it. An early day custom was to use sugar water from the trees in the maple camp in making the tea and any who have tasted it will not forget the delightful qualities of the drink as prepared.

WHY I GO TO SUNDAY SCHOOL

I go to Sunday-school because I get acquainted there with Jesus Christ— the best friend a person ever had.

I go to Sunday school because I study there the best Book in the world.

I go to Sunday-school because it is the best habit a person can form.

I go to Sunday school because it makes me happier all the week.

I go to Sunday school because it enriches my life.

I go to Sunday school because it strengthens my character.

I go to Sunday school because it improves my mind.

I go to Sunday school because I form there the best friendships in the world.

I go to Sunday school because I learn there the finest songs ever sung.

MODERN TRANSLATION

Sunday school teacher— So God sent the flood upon the wicked people and it rained forty days and nights. Do you know what happened then?

Bobby— Then a relief fund was started.— Boston Transcript.

JULIUS G. FRAZIER'S LETTER

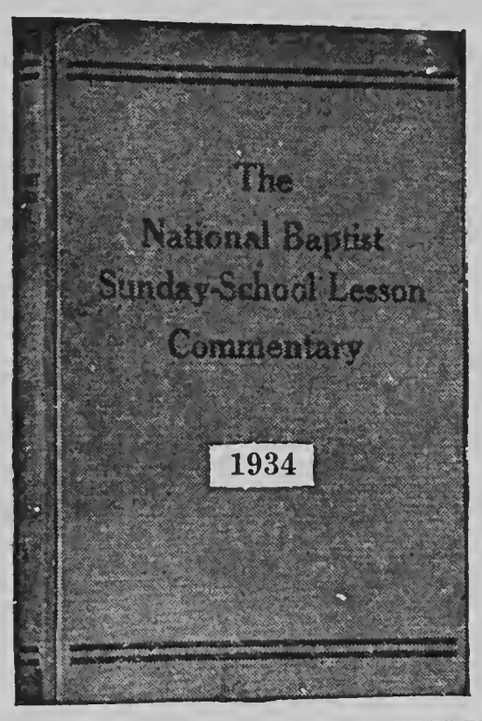
Nashville Boy of United States Ship Wyoming Sends Greetings

Julius G. Frazier, a resident of this city who enlisted in the U. S. Navy some time ago, is now on the United States Ship Wyoming in Cuba. In a letter just received from him to Rev. and Mrs. Henry Allen Boyd, who had a talk with him three weeks ago in Norfolk, Va., when he was preparing to sail, h said:

"Dear Friends:—How are you all? I'm well and hope you all reached the capital dity O. K. I'm in Quantanamo Bay Cuba, arrived Tuesday at ,9:00 A. M. We are sailing for Havana Thurs-

Tell Dr. I enjoyed his speech and was sorry I didn't get to speak to him. I am going to try and get home some time this spring if not it will be two years before I get to make the trip, because I am going to be transferred to the West Coast on a ship that is going to spend two years in China, after that I am arriving out in civilian life again.

I have been everywhere that I cared to see, and all places are about the same. I will close from,—J. G. Fraizer



SUNDAY SCHOOL LESSON Commentary

For 1934

Every Sunday School Teacher Should Have It

SIX REASONS WHY YOU SHOULD USE IT:

First: It is the production of your own National Baptist Publishing Board which gives employment to more of our people than any similar concern in the United States.

Second: It is purely baptistic and orthodox in every particular.

Third: Its doctrines are unquestioned, and the Biblical requirements are stressed in a manner to make it absolutely dependable.

Fourth: None of the modern theories leading to skepticism are admitted.

Fifth: It aims to be true to the teachings of Jesus and whatever there is presented which has not the "Thus saith the Lord" is discarded as unsafe and destructive of the best interests of mankind.

Sixth: Thoroughly adapted to the uses of our Sunday school constituency, it stands as a beacon light to all those who would like to rise in the scale of intelligence and demonstrate the qualification necessary for the accomplishment of the "Great Work" devolving upon us as a people.

Price $1.00 Per Copy.

PROMINENT OFFICIALS REPLY TO RESOLUTION

The following resolution was sent to Hon. Clark Howell Foreman, Adviser on Economic Status of Negroes, U. S. Department of the Interior, Washington, D. C.

RESOLUTION

Adopted by National Federation of Colored Farmers, Inc. in annual Convention, Memphis, Tenn,. Oct. 25-28.

"Negro shareeroppers and tenant farmers are moving from farms in many states by reason of economic and other conditions over which they have no control but which tend to make life for them less tolerable:

Added to conditions which cause these farmers to be discontented and unhappy is the faet that, as a result of leasing of farm acreage by the federal government to reduce cotton production, approximately 150,000 Negro tenants farmers, sharecroppers and their families will be deprived of means of livelihood and made homeless. Reports from units of our organization in widely separated localities verify this fact:

These farmers are willing and ready to occupy small farms on which they may produee diversified crops and sustain themselves and families and eventually own same:

Federal land banks have acquired title to thousands of acres of farm lands through foreclosure suits, resulting in much of this land being withdrawn from production of crops whatever, and the federal government has leased additional thousands of acres and now has absolute control of said lands:

We therefore request the Hon. Clark Howell Foreman to use his good offices to the end that any of said land, located in farm communities predominantly populated by farmers of the Negro racial group, be acquired and subdivided into small farms and sold to thrifty and industrious farmers, — that they may become homeowners and substantial citizens:

We pledge our royal support to Hon. Clark Howell Foreman and to all other government officials and agencies, in any plan or plans adopted whereby constructive work may be done for the benefit of Negro farmers. We instruct our national officers to present to government officials suggestions and plans that may aid them in solving the serious and perplexing problems effecting Negro tenant farmers, shareeroppers and their families."

Mr. Foreman's reply is as follows:

Dear Mr. Harris:

Thank you very much for the resolution adopted by the National Federation of Colored Farmers, Inc., in Memphis, Tenn., I shall endeavor to do everything in my power to justify the confidence which the Federation expresses in me, and hope you will convey to them my sincere thanks for their very splendid resolution.

Yours sincerely,

Clark Foreman.

Copies of the resolution were also sent to Hon. Daniel C. Roper, Secretary of Commerce, and Hon. Geo. N. Peek, chief of the A. A. A.

"Now that's the guy I'm laying for," said the hen as the farmer passed by.

GARDEN GROWING CAMPAIGN A SUCCESS IN IOWA COUNTY

Waterloo, Ia.— Hunger will receive a rebuff in Black Hawk county, Ia., this winter because of the success of the 1933 unemployed garden-growing campaign. More than 25,000 cans of vegetables have been stored through the Welfare League Garden club.

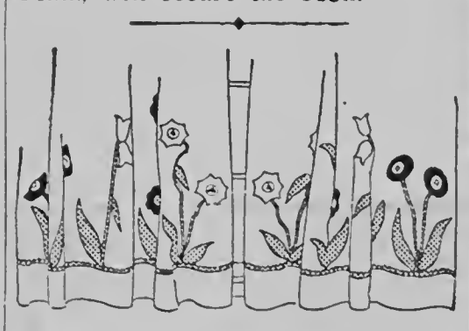
Department That Women Will Like

"Needle Art" New Feature Inaugurated By The National Baptist Publishing Board's Publications Begins This Week.

For the benefit of the thousands of readers, women and girls in particular, there will be a Women's Feature Department connected with these publications of the National Baptist Publishing Board's Plant. It will be known as the "Needle Art Department." There will be articles appearing from week to week, featuring patterns, designs and needle art work.

This new innovation, it is thought, will be welcomed by hundreds of thousands. Every subscriber is offered a ten cent pattern, this pattern to be mailed direct to them; it is full size, but there will be a thirty-two page, highly-colored needle art Vogue Booklet that will sell for 25 cents. In addition to this there are a few special baby quilt patterns with a number of different designs. The complete pattern along this line sells for 50 cents.

It is hoped that the readers of these publications will pass this information, as the service is offered to all of them alike. You will find a full article in another part of the paper. Any woman who sends 25 cents either in stamps, a post office money order, or in coin by registered mail, and address it to the Needle Art Department, S. B. W., National Baptist Publishing Board, 523 2nd Avenue, North, Nashville, Tenn., will secure the book.



NEEDLE ART NOVELTIES
By Nancy Lee

CURTAIN APPLIQUES NO. 28

Springtime! And our thoughts just naturally turn to new curtains and things to make the home attractive during the warm weather—so I'm going to give you heaps of suggestions to help along. Today it's gay tulips, jonquils, and "splotchy" posies that are lovely on crisp theatrical gauze. I mention this gauze for summer curtains because it's not only inexpensive, so our budget will sanction it—but it launders easily and can be obtained in such charming colors—that we'll have to make several pairs. The design itself allows us to cut loose with a vast range of color combinations after we have once decided on the background, and it works out "Gorgeous" in bright felt appliques! Pattern contains complete applique design and instructions. This is pattern No. 28.

We have prepared a wonderful new 32 page Book showing over 90 newest needle work novelties, many in actual colors. The above pattern will be included free with each order for this Book which is 25c. Ask for Book "D." Single patterns are 10c each. Be sure to state pattern number wanted. Send order with coin to.....

Handing It to Meek

New Castle News:— The meek shall inherit the earth. Considering the mess it's in you couldn't wish it on anybody else.

A long-handled dustpan takes much or the drudgery out of sweeping.

BALTIMORE GHETTO STORES BOYCOTTED

Race Leaders Gave Strong Support to Young People's Fight for Jobs

Baltimore, Md., Dec.—(By the Associated Negro Press)—Again, Baltimore, after its recent victorious boycott of the A. & P. Tea Stores which netted thirty-seven jobs, is on the war path in a second boycott of the independent stores that crowd the Negro business section, Pennsylvania Avenue.

These stores have refused to employ colored girls and have been boycotted since December 8.

The movement, led by Kiowa Costonia, young civic leader, again has the backing of the prominent organizations such as the City-wide Young People's Forum, Miss Juanita E. Jackson, president; the Housewives League, Mrs. Elvira Bond, president; the Knights of Pythias, George Watty, grand chancellor; the Elks, Josiah Henry, exalted ruler; the Colored Automobile Owners Association, S. Frazier, president; the Calanthes, Mrs. Elizabeth K. White and such civic leaders as Mrs. Lillie M. Jackson, Mrs. Florence Snowden, Dr. and Mrs. Joseph B. Mason, Mrs. Anna McMechen, Rev. C. Y. Trigg, Rev. R. F. Coates, Rev. F. F. King, Rev. A. J. Payne, Rev. Ward Yerby, Rev. E. H. Beard, Rev. D. E. Rice, Mrs. Bernice Short, Mr. A. J. Gordon, Mr. W. E. Bond, Atty. W. A. C. Hughes, Jr., attorney, Thurgood Marshall, Mr. and Mrs. Josiah Diggs.

Shrewd Merchants

Friday morning, the boycott started with young men carrying the signs and young women talking to the would-be customers. The colored citizens responded magnificently. The stores became more and more empty.

One merchant, Robert Samuelson, owner of twelve stores on Pennsylvania Avenu,e the largest of which was the Tommy Tucker 5 and 10 cent store, 1700 Pennsylvania Avenue, got a colored girl out of the alleys and put her behind the counter. Then the signs went up on the windows—"We Do Employ Colored Help."—Don't Let This Ballyhoo Keep You From These Wonderful Bargains."

But the people laughed and continued to listen to the so-called "Bally-hoo", staying out of the stores.

Gangsters Imported

Friday afternoon, gangsters were seen slipping out of a high powered limousine into the store to confer with Mr. Samuelson.

Getting wind of their plans to pick a fight with the boys carrying the signs, thus starting a race riot which would necessitate the police stopping the boycott—under the direction of Mr. Costonie, the boys took the signs from their backs, placed them on the girls and then hurriedly left the avenue. The gangsters came out to find nothing but the girls picketing; not a boy in sight.

Friday night, six o'clock, Mr. Samuelson got twelve men and women, tough specimens of Negroes, and placed signs on them. Thus they walked up and down the Avenue wearing the signs: "Tommy Tucker Store is O. K." "These Stores Are O. K." "Deal at the Tommy Tucker Store." These had no effect on the people, for they laughed merrily and stayed out of the stores.

Fearing fights, squads of police were sent for. They kept everyone swiftly moving. The police helped picket unthinkingly. For many people seeing the police standing in the doorways of the boycotted stores, having been placed there to protect the property from injury, were afraid to go in the stores.

The great mass of citizens further pledged themselves to boycott at the City-Wide Young People's Forum, Friday night.

Saturday morning, the boycott continued. The people stuck together and it is estimated that the stores in the 1700 block of Pennsylvania Avenue, alone, lost over six thousand dollars.

The boycott has continued Monday and Tuesday. The merchants have told Mr. Costonie they would close up before putting Negroes in their stores. However, they are weakening and have already asked for a meeting that terms might be arranged.

AMERICAN FOREST WORK IMPORTANT

In Point of Employment It Is One of Country's Largest Industries

Articles ranging from telephone poles to clothespins are among the millions of objects made of wood which the present "metal civilization" finds indispensible. Even before the institution of the president's forestry camps, lumbering, measured by the number of persons engaged in it, was one of the largest industries in the United States, according to a bulletin from the Washington, D. C., headquarters of the National Geographic Society.

Forests Prevent Floods

Lumbering and forestry, as they are at present practiced, vary widely in their aims although the cutting of wood is a factor in both, says the bulletin. Lumbering is the term used for the cutting of timber for an immediate financial gain, while forestry carries the conception of long-time planning for continuous income. If trees are stripped carelessly from land, it is frequently left open to alternate floods and drouths. Much of it becomes worthless for agriculture or recreation and can support little animal life.

When white men came to America, it is estimated that there were 1,064,528 square miles of forest between the Atlantic ocean and the prairies. In what is now the west of the United States there were 220,-062 square miles. This million and a quarter square miles of forests had been reduced to 733,554 square miles in 1928. Over half of this remainder had been selectively cut over, leaving the smaller trees for future growth. Of the original forests 126,875 square miles were cut so ruthlessly that the land is now practically useless.

Forests in Thirty-one States

To discourage further devastation of the country by thoughtless lumbering methods, the government organized the forest service. The areas under the supervision of this service are the tree-covered public lands in the west which were not taken up by homesteaders, and forests purchased from private owners in the east. At present there are national forests in thirty-one states. Plans have been made for camps for the unemployed in the national forests of all these states. In states having no national forests, similar camps will be establised in state forests or on private land.

During the last quarter century, the government has emphasized the value of forests for the whole country. For the farmer—and the 1930 census showed over 50 per cent of the population living in rural areas—there are two great problems that are affected by forestry practice. One is erosion, or the washing away of the valuable top soil; the other is the distribution of rain water. If there are no trees or cover crops to slow up the rain water as it runs down the slopes, erosion is unavoidable. Thus water which should seep down to the valleys through a period of weeks, rushes in torrents down the streams beds, causing floods in the valleys followed by long periods of drouth.

Aside from the protection of farm lands and conservation of moisture, national forests bring the government a direct revenue in various ways. Full-grown timber and cord wood are sold; grazing lands are rented; water power concessions are leased; drinking water is furnished large cities, and irrigating systems are provided. These projects have proved so remunerative that even with the expense of seeding new sections, and pruning, thinning and clearing underbrush in the older growth, many of the national forests have been put on self-supporting basis. From their income some national forests contribute to the treasuries of counties and states in which they are situated.

Forest Fires

Perhaps the largest single expenditure for forestry is for fire prevention. The toll of life is not ordinarily great, deaths from forest fires rarely running over fifty persons a year; but the damage to forests and the dependent water districts has been found to amount to millions of dollars. To avoid this loss lookouts are placed on high points of national forests and constant watch is kept for the telltale smoke. Forest rangers now frequently are successful in beating out fires before they have passed the possibility of control. Public education has done much to limit the horror and waste of these fires; but one unavoidable cause, lightning, accounts for more than 25 per cent of the fires.

The forest service has been quick to see the recreational possibilities of the forests, and roads have been built, hiking clubs encouraged, lake shores cleared, trails broken, and camping grounds established, so that tourists, climbing enthusiasts, fishermen and hunters may have an opportunity to indulge in their favorite avocations. Summer home sites have been leased in a number of the forests for those who wish to live a more settled life in the woods. Botanists and zoologists have keenly supported the forestry movement, so that rare plants and animals might be preserved.

The forest service has taken with it roads, telephones, radio, and other instruments of civilization and has brought prospering occupations to formerly isolated spots, many of them of striking scenic beauty. It has given a new vision to many lumbermen, persuading them that ultimate good for the country can be achieved and great harm averted by substituting the ideal of forestry for that of lumbering.

BIRTH CONTROL UNKNOWN TO FLY CONVENTION TOLD

Every mamma fly that isn't swatted or poisoned early in June has 2,000,000 descendants by September, according to an estimate made yesterday at the convention of the National Association of Insecticide and Disinfectant Manufacturers, held at the Edgewater Beach hotel.

Virtually every other branch of the insect tribe is just as averse to birth control, and the exterminating executives asserted that insects outnumber human beings millions to one. A warning was sounded to the effect that human-insect war is at an acute stage and that unless the humans get busy with some effective insecticides pretty soon the results will be disastrous.

"The insects are going on us," said A. G. Grady, chief entomologist of Sinclair Refining company. "They multiply so fast. The big invasion is on."

Ira McNair, secretary of the association, asserted that insect damage in the United States was a billion dollars a year, the moths alone devouring $200,000,000 worth of clothing annually. Others attending the convention declared business was picking up for them.

Having been poor is no shame, but being ashamed of it is.—**Benjamin Franklin.**

Would you live with ease, do what you ought, not what you please. —**Benjamin Franklin.**

The second vice is Lying; the first is running in Debt.—**Benjamin Franklin.**

Colored Women Get C. W. A.

Recognition for colored women under the C. W. A. program has been obtained. It is through the persistent and tireless efforts of Mrs. J. F. Pierce, who has been named the chairman of the work for colored women of Nashville and Davidson County, in taking the matter up with those in charge of the C. W. A. program for Tennessee, and urging the colored women to register for employment, that matters are now taking shape to give a place under the C. W. A.

At the request of Mrs. Pierce a representative group of the women of the city met Miss Ina Scherrebeck, C. W. A. Director of Women's Work for Tennessee, at the Y. W. C. A. on 5th Avenue on Friday, December 1st. To the interested group of twenty or more women the program of the C. W. A. was explained in painstaking detail by Miss Scherrebeck who made clear its purpose and plan of operation, and for more than an hour answered the inquires of the women.

The committee arranged to secure from President Hale of A. and I. State College a room at State College as a sewing center, with all equipment. A committee was selected to formulate the various projects under which our women might be employed, the members being Mrs. J. F. Pierce, superintendent Vocational School, chairman; Miss Estelle Richards, Director of Home Economics, A. and I. State College; Miss Betty Kelly, Juvenile Court Officer; Miss Hulda Little, Supt., Hubbard Hospital, Meharry Medical College; Miss Georgia Cash, Supervisor of Colored Schools. This committee met the following morning at the Vocational School where the various projects were outlined and later turned over to the special committee appointed by Miss Scherrebeck, consisting of Mrs. J. O. Manier and Mrs. Julius Martin, with whom the colored women were to work. These various projects provided for work for a large number of women at the A. and I. State College Sewing Center under the supervision of Miss Richards; an additional worker in the Juvenile Court and a cook at the Detention Home; a professional library worker in the City and various school libraries; a professional group, consisting of a Recreation worker, Nurse and Clerk and Stenographer at the Vocational School and A. and I. State College, and also a cook. Professional nurses have been placed elsewhere in the city, as well as large numbers of teachers holding (or who were entitled to hold) teachers' certificates who were without employment, making in all a very creditable showing, with others being placed just as the registration was closed.

Mrs. Pierce and the Committee were loud in their praises of the courteous treatment received at the erything possible was done by them hands of Miss Scherrebeck and the special committee appointed to work with the colored women. Evto speed the plans for placing women under the work of the C. W. A., and no greater efforts on behalf of any racial group could have been put forth by these ladies than was done for our colored women.

THE HYMN OF HATE

And this I hate— not men, nor flag, nor race,
But only War with its wild, grinning face.
God strike it 'til its eyes be blind as night
And all its members tremble with affright!
Oh, let it hear in its death agony
The wail of mothers for their best-loved ones,
And on its head
Descend the venomed courses of its sons
Who followed her, deluded, where its guns
Had dyed the daisies red.

All these I hate— war and its panoply,
The lie that hides its ghastly mockery,
That makes its glorious out of women's tears,
The toil of peasants through the burdened years,
The legacy of long disease that preys
On bone and body in the after-days.
God's cures pour,
Until it shrivel with its votaries
And die away in its own fiery seas,
That nevermore
Its dreadful call of murder may be be heard; ;
A thing accursed in very deed and word,
From blood-drenched shore to shore!

—Joseph Dana Miller.

THE MODERN FARMER

Vol. VI. NASHVILLE, TENN., JANUARY 15, 1934 No. 9.

Agricultural Census and Annual Review of Rural Life Published

FARMERS MUST STAY ON THE FARM TO SUCCEED

Back to the Soil Will Remain the Slogan—Exodus of Negro From the Farm to the City Shown

The Annual Review of Rural Life, published in January 3, 1931, contained the first comprehensive information reported from the 1930 census on the rural population as compared with urban. This indicated that the urban population (that in cities and in incorporated places of 2,500 or more people) was 56.2 per cent of the total population of 122,775,046, in 1930, as compared with 51.4 per cent in 1920. Other comprehensive information in regard to the rural population and some very important figures in regard to agriculture have meanwhile been published by the Bureau of the Census.

The exodus of the Negro group from country to city is revealed in striking fashion by the fact that, in 1920, 66 per cent of the Negroes were in rural territory, whereas in 1930 the figure was 56.3 per cent. Foreign born white persons formed 4.9 per cent of the rural population in 1930, as contrasted with 15.6 per cent of the urban, both of these representing slight decreases since 1920 In the urban group there were 98.1 males for every 100 females in 1930; in contrast, the rural population shows 108 males for every 100 females. These figures represent slight variations from those in 1920, the main differences having taken place in the urban population where there was a more rapid rate of increase among female population than among male.

The rural population is divided into farm and non-farm groups. Out of a total rural population of 53,820,223, 23,662,710 persons were resident on farms, while 30,157,513 were non-farm, i. e., in villages and in the open county in small trading centers or coal, lumber or oil regions. While the total population of the United States increased 16.1 per cent between 1920 and 1930, the farm group shows a decrease of 3.8 per cent and the rural non-farm population an increase of 18 per cent. (The increase is probably largely accounted for by village growth). It is interesting to note that two-tenths of one per cent of the people in the nation, 290.037 in 1930 were resident on farms in urban territory.

There were roughly 159,000 fewer farms in 1930 than in 1920, but the total land area in farms was larger. There was an average of 148.2 acres per farm in 1920; 145.1 in 1925 (there is a limited agricultural census five years after each complete one); and 156.9 in 1930.

A sharp decline in the total value of farm property is noted. The total value of all land and buildings was reported as $66,316,000,000 in 1920, $49,467,000,000 in 1925, $47,879,000,000 in 1930. The value of land alone declined from $54,829,000,000 in 1920 to $34,929,000,000 in 1930. The average value per farm was $10,284 in 1920, $7,764 in 1925, $7,614 in 1930. Value of land per acre fell from $69.38 in 1920 to $48,52 in 1930. (The last census was taken on April 1, 1930. Since that time there have been further rapid declines in the values of farm property)

Tenantry shows a marked increase. In 1920, about 38 per cent of all the farms in the country were operated by tenants; in 1930 the proportion had risen to over 42 per cent. Previous censuses have revealed striking differences between states and between regions in this

STUDY ATLANTA HOUSING SITES

Atlanta, Ga., Jan.—(By the Associated Negro Press)—Representa- units visited Atlanta to study at tration who are engaged in working out the program of the federal government to eliminate slum conditions by providing model housing units visited Atlanta t study at first hand the problems involved in the proposal to construct model homes for Negroes in the vicinity of Atlanta university, or one of the affiliated colleges. In the course of their stay they inspected sections that are under consideration as sites of the project, and met with a committee representing the board of trustees of Atlanta University.

The delegation consisted of Robert D. Kohn, director of housing for the Public Works Administration; C. E. May of the Public Works Administration legal department, and A. C. Shire, expert and consultant on housing.

Following the inspection and the meeting, Mr. Kohn announced he was cordially in sympathy with the plan to create adequate, low-priced housing for Negroes in Atlanta, and stated that the section in the neighborhood of Atlanta University, Morehouse and Spelman colleges fulfilled certain basic requirements.

FOUR INDICTED FOR LYNCHING IN S. C.

Greenwood, S. C., Jan.—(By the Associated Negro Press)—Four indictments, charging murder, were voted against white men here Tuesday, in connection with the lynching of Bennie Thompson at Ninety-Six October 8.

The true bills struck Burley Leppard, Clarence Bayes, Kennety Morris and Howard Webb. No action was taken on the evidence pointing to J. Calvin Rush, police chief at Ninety-Six at the time of the crime, as an accessory to the "rolphing." He has not been arrested. The other men are out on bond.

Thompson was beaten to death after he had a quarrel with one of the white men.

HOW TO GET FROM BETWEEN THE OTHER FELLOW AND THE FIRE

By Carter G. Woodson of Washington, D. C., Editor of the JOURNAL OF NEGRO HISTORY, and the author of THE NEGRO IN OUR HISTORY, THE MIS-EDUCATION OF THE NEGRO, and THE NEGRO PROFESSIONAL MAN.

It is in vain that we chide the Negro because he has failed to measure up in this crisis. He must be shown the way out of his difficulties. Yet when a man has been going in the wrong direction a long time, thinking that he is pressing forward to a great goal, it is not an easy thing to convince him that he has merely been looking for the end of the rainbow. The pursuit of phantoms is much more fascinating than struggling with the stern realities of life. The Negroes' course in this country is a striking case in evidence.

In the first place, the Negro has taken it for granted that, being impecunious and inferior, he could not by his own thinking add one cubit unto his stature. He has depended altogether on what others have told him to do; and they, so occupied with their own interests, have had no time to give the Negro a serious thought. In this nebulous state of things, then, enemies of the race can easily get control of our affairs and rush us where they will. The program of the Negro, therefore, has too often been merely an effort to restrict, segregate, or get rid of the Negro. And yet Negroes themselves have freely participated in carrying out such a program of their own undoing.

All movements for the so-called uplift of the Negro have shown this makeshift or sinister design. The religion brought the Negroes was the message delivered to them after others had been served; and the Negro system became a rubber stamp copy from others.. When a change in the program came after the general emancipation separate churches to get rid of the Negro as participants who in freedom might want to be the equals of others in that sphere naturally followed. Social welfare agencies organized by so-called Christians have even done worse than the churches in segregating these undesirables.

The colonization movement which claimed occasionally the attention of some of the most noted statesmen a hundred years ago was purely an effort to improve the condition of other elements of the population by getting rid of the Negroes then free and of others who might be manumitted. The institutions of slavery would, then, be secure from a meddlesome class which would also be removed from the sphere of competition with the German and Scotch-Irish elements immigrating into this country at that time to do menial labor. While much was said about the wonderful opportunities that these poverty-stricken Negroes would have to establish a republic of their own in Africa the means to that end were not supplied at that time and are not yet in view.

Even the anti-slavery movement, which apparently was most unselfish could hardly escape from this trend,

DR. R. R. MOTON SKINS NORTHERN WHITE FOLKS OUT OF ALL OF THEIR FISHING TRIP PRIZE MONEY

Albon Holsey Gets Great Glee out of Telling Fine Fish Story in Which Tuskegee Prexy is Hero

By Albon L. Holsey

(For the Associated Negro Press)

New York, Jan. 4—The average white man is so obsessed with a false sense of his superiority where Negroes are concerned, that I get a sort of fiendish delight whenever a Negro does something particularly outstanding or spectacular and I see this straw-man of posed grandeur topple and fall to the ground.

For a long time, this species of the racially antagonistic consoled themselves, when a Negro "stepped out in front" by saying, "That's fine for a Negro." Then, they had no hesitation in boasting even to Negroes of their super-abilities, to which the Negro sometimes agreed with, "yes, sir, that's right." But, nowadays Negroes are doing so many unusual things so frequently that the Negro is beginning to hear these boasts, chuckle and say "Oh Yeah." Now that's awful.

For example, wasn't it graceful the way that Judge and those white lawyers "kicked in" with praise for the manner in which Charley Houston handled the Crawford case in Leesburg, Va.?

I am thinking of another incident along the same line. It happened to Dr. Moton and since it was a personal experience, I hope he will forgive me for telling it.

On Dr. Moton's last trip to New York, he invited Mr. William H. Carter, treasurer of Tuskegee Institute and me to join him on a fishing trip. We left very early in the morning for Sheepshead Bay where passage was engaged on one of the many fishing boats which go down the Jersey coast for deep sea fishing. On the boat were forty-eight (48) white men; all of whom were likewise bent upon a real day's outing and from their conversations, it was apparent that all of them were frequent patrons of the Angler which was the name of our boat.

It is customary, on these fishing parties for one of the ship's officers to invite all of those on the boast to put a minimum of fifty cents each into "the pot." Now the purpose of "the Pot" is that, at the end of the day's fishing, the total amount is divided into two prizes—one for the largest fish caught and the other for the highest poundage caught by an individual. So much for "the pot."

During the morning, I noticed that none of the white men spoke to us. They were not unfriendly in their attitude, but so far as they were concerned, we didn't seem to exist.

It was a clear, crisp day and as we were being piloted to the fishing spot, the laughter and merriment of the anglers vied with the splash of waves as they leapt up the sides of our ship. However, once we were

(Continued on Page 2, Col. 2)

ATTORNEY PLACED ON CLEVELAND C. S. BOARD

Hon. Clayborne George, Former Councilman, Gets High Post Under New Mayor

Cleveland, Ohio, Jan—(By the Associated Negro Press)—Declaring his intention to uphold the "merit" system at all costs, Attorney Clayborne George, former councilman of the Eighteenth Ward, assumed his new duty Tuesday morning as Civil Service Commissioner, a position to which he was appointed Saturday by Mayor Harry L. Davis.

George, who had previously served in the council for six years, resigned last August to run for municipal judge, and being defeated, he was prominently in line for some important post under the newly-elected Republican mayor. He was first talked of as being in the running for a cabinet post, but this talk was short-lived, and his backers began to groom him for the Civil Service vacancy occasioned by the expiration of the term of Harry E. Davis, president of the Commission who was not being considered for re-appointment.

The position is considered one of the richer plums in the gift of the administration. It is for a six year term with a salary of $3,000 per annum, and requires only part-time services.

The new commissioner is a graduate of Howard University, and the law school of Boston University, and is a member of the Alpha Phi Alpha fraternity.

TUSKEGEE STUDENTS AWED BY PAINTING OF HENRY O. TANNER

Tuskegee Institute, Ala., Jan.—(By the Associated Negro Press)—H. O. Tanner's "Flight Into Egypt," the noted painted presented Tuskegee Institute by the artist in 1897, which was placed over the circulation desk in the reading room of the Hollis Burke Frissell Library a few days before Christmas, aroused such enthusiasm among Tuskegee students returning to school at the close of the holidays that efforts to return it to the Art Room met with a storm of protests. The time limit had to be extended.

This work from the brush of a recognized master especially significant at this season of the year be-

(Continued on Page 2, Col. 2)

How To Get From Between The Other

(Continued from Page 1)

for one of the most effective arguments against the system, and the one which finally did more than any other to crush it, was not that slavery was a sin but that it was an economic evil from which the slaveholders would eventually suffer. The attack on the institution never proved effective until a majority of the people of the country could see this point. Many aboitionists neither desired nor dreamed of elevating the freedom to the level of citizenship as Charles Sumner and Thaddeus Stevens endeavored to do during the reconstruction.

Some of the politicians who freely voted for the enfranchisement of the Negro did so without any thought as to whether or not it would benefit him. The main thing they had in view was political control of the nation with the aid of Negro suffrage. When these same politicians reached the position of being able to retain office without the Negro vote they winked at his disfranchisement and left him at the mercy of his former oppressor. The Negro voter, however, still pursuing a phantom, continues to give his ballot a sa sacrifice for the good of these traitors of his people.

What has the Negro organized of hi sown volition? Nothing that is adequately effective in improving his condition. The national bodies now operating among Negroes were worked out by others for the benefit of the Negroes; and the latter have at times had difficulty in doing with these organizations what their experiences may have shown to be wise. Several of these national agencies have had both races connected with them; but, since the Negro has been willing to permit the other fellow to fill the purse while he picked the coin therefrom, the benefactors have ultimately dominated the policy.

At present, then, there is no national organization through which the Negro can express himself and transfer his will to the controlling power. In every thing with which the Negro is connected somebody else is at hand to say which way he must turn, in what direction he Although the Negro may try to think for himself he must have regard for others who believe that they should think for him. The Negro in the United States, then has no program. He has merely consulted the other fellow as to what is the best thing to do; and the other fellow, even when unselfish, has not known because he has never been a Negro.

Ask the Negroes in the foreground what remedy they have, and they are afraid to utter a sentence without consulting some of their guides. When we find them bold enough to speak out they offer nothing constructive. What can they advise Negroes to do which in the light of experience is the thing that will prove beneficial on tomorrow? What can Negroes of today undertake that will get them farther on fifty years from today? At the advice of such leaders we have taken over from others their religion, their politics, and their aimless education; and now we are taking over their communism. These things, in contributing to dissension and strife, have all but hopelessly weakened the ranks.

Unfortunately, too, these movements have been projected on the false assumption that you can unite the miseducated Negroes who have been turned out by our schools. Nothing could be more foolhardy then to undertake to organize our teachers, preachers, and professional men. One will find such a task about as feasible as that of trying to shoot marbles into the holes in the moon. Almost any Negro who gets beyond high school development becomes a leader. His parents sent him to school to make him a leader, and his teachers told him that they were preparing him for leadership. He is spoiled for cooperation. He will never follow anybody. These misguided persons have been taught that they know things, for any Negro who knows how to do what he is told to do knows more than a Negro who does what he thinks should be done. They have been created to serve between the other fellow and the fire. The only hope for the race, then, lies in the organization of the common people for cooperative effort. They are the salt of the earth. I am looking to them to redeem the race from the curse of the law. Our friends themselves cannot be sincere in their superimposed leadership for the Negro when they boast of their greatest leaders as having come from the lower ranks—Socrates, Jesus of Nazareth, Abraham Lincoln Denin and Gandhi.

Farmers Must Stay

(Continued from Page 1)

respect, and probably the detailed figures on this census will do the same, but a noticeable rise in the national trend is significant. There was a slight decline in the proportion of farms operated by managers, which probably means that large scale farming is not making progress for the country as a whole.—Information Service.

Dr. R. R. Moton Skins Northern

(Continued from Page 1)

anchored and the serious business of fishing was started, the groups of friends lined around the sides of the boat were silent except for an occasional exclamation when a catch was made or when a fish was lost after being hooked.

At the end of the fishing day, each fisherman brought his bag of fish—the boat supplied the bags—to the center of the deck where the weighing was done under the personal eye of the ship's captain. Imagine our great surprise and delight when the captain presented Dr. Moten with both prizes. Dr. Moton's first prize was for a nine-pound black fish and the next largest fish which was offered in competition weighed about six pounds.

From that time on until we docked, Dr. Moton was the center of interest and conversation. Everyone on the boat gathered close to hear his words as he related other fishing exploits or told an appropriate story. To that group of white men, Dr. Moton was "just a colored man" for he did not disclose his identity until we were docking at the pier.

On the return trip in the taxi, Dr. Moton admitted to Mr. Carter and me that the prize money had paid the taxi fares, paid for the three boat tickets and left him a neat little sum "to boot."

Tuskegee Students Awed By Painting of

(Continued from Page 1)

cause its subject is the removal of the Infant Christ to a safe Egyptian hide-away when His life was threatened by the irate Herod, was originally scheduled to remain on exhibition until December 31. But the force of the picture's appeal had not been counted in the equation—and the fact became evident when school reopened following the holidays.

Group after group of young men and women formed before the circulating desk, with no intention of securing or returning books. Quietly, reverently, they stood and admired the artistry of a man who was a pupil of Paul Laurens, in Paris, and who has so hidden his identity beneath the magic strokes of his brush that few know he is a Negro. And that he is represented in the Luxembourg, the Wilstach Collection, the Carnegie Art Institute and the Metropolitan Museum in New York City.

NEEDLE ART NOVELTIES

By Nancy Lee

PILLOW DOLL NO. 31.

Little Tabby Tom Cat—I'm sure by the self-satisfied expression on his face—he's either eaten the canary bird—or knocked over Grandmother Ferguson's best glass cake dish! Let's pick him up and squeeze him to see what's inside him! Kapoc! We just knew he was stuffed! He's a pillow doll made of any soft material—and, if he gets too bad, we can sit on him. Do you like him? I can send you his cutting outline and embroidery pattern and you can make him.

The pupils of his eyes are in two shades of stranded floss in a solid satin stitch—then outlined with black—the whiskers also outline with black and the nose and mouth in pink—the ribbon bow and feet are done in a running or darning stitch—the seams are sewed up—leaving an opening thru which to put the Kapoc—when stuffed—slip stitch this small opening together—and he's all finished!

We have prepared a wonderful new Book—32 pages—showing over 90 newest needle work novelties, many in actual colors, the above pattern will be included free with each order for this Book which is 25c. Ask for Book "D". Single patterns are 10c each. Be sure to state pattern number wanted. Send order with coin to

Abandoned White Baby, Left With Colored Woman, Calls For Its Own "Mother"

Detroit, Mich., Jan.—(By the Associated Negro Press)—"I want my muvver!" And that's how David Cruse, 18-month-old baby boy, feels now, having been abandoned by his mother more than one year ago when she left him with Miss Betty Holland, 29, of 505 E Elizabeth St., according to information obtained by the Associated Negro Press from police officials here Thursday.

According to authentic information obtained from those immediately connected in official positions here in Detroit, the following are the facts in the case: .The infant's mother, Mrs. Elsie Cruse, who is reported to have been employed at a roadhouse at Willaimsville, near Buffalo, N. Y., left the child with the young Negro woman when the child was about one month old. Meantime, Miss Holland, with whom the child was left, took the infant to 447 E. Elizabeth street where she left it in the care of Al and Edna Gomez.

The presence of the little 18-month-old white boy in the Negro home was brought to the attention of Miss Violet H. Kidder of the Women's Division of the Detroit Police Department who took the child to St. Mary's hospital to be cared for.

Following the information obtained about the abandonment of the boy police immediately began a search for the deserting mother. It has not been revealed just why the child was abandoned by its mother, nor just how it has been cared for during the intervening months in which the little boy has been in the care of the young woman with whom she is alleged to have left the white child. It is thought, however, charge will be preferred against the mother if she is found; and Miss Holland, Mr. and Mrs. Gomex will be subpoenaed as witnesses for the state against the white woman.

FARMERS OF PRENTISS, MISSISSIPPI

Cedar Grove School House To be Used for Mammoth Occasion

Bassfield, Miss.—(Special)—Announcement was made here this past week that a call had been issued to the officers and members of the Unit that make up the National Federation of Colored Farmers here to meet at the Cedar Grove School House, four miles east of Prentiss, Miss., on February 17th, which happens to be the third Saturday in February. At this coming together of the tillers of the soil, poultry raisers, fruit growers and diversified farmers, a strong effort will be put forth to emphasize the work of the National Federation of Colored Farmers, and to put in a good word about The Modern Farmer, the official organ of the farmers of the United States.

The promoters of the meeting, according to the best obtainable information, are said to be Miss Rosa Roberson, Mrs. Julia D. Barnes, Prof. E. Fountleroy, Mrs. Effie R. Tate, Prof. F. L. Griffith, Mrs. M. E. Booth and Prof. V. W. Booth, who is the deputy down this way, under the National Federation of Colored Farmers.

They are proposed to give prizes to encourage farmers in their activities. Meals will be served on the grounds. Free entertainment has been promised to those who attend from a distance. The business affairs will be attended to on Saturday, the 17th, and then on Sunday the 18th, will be devoted to religious service, says Prof. V. W. Booth, the deputy.

COLORED SOLON PUTS TEETH IN OHIO LAW

Buckeye State Will Not Tolerate Jim Crow Rum Rooms

Cleveland, Ohio, Jan.—(By the Associated Negro Press)—A strategic piece of legislative maneuvering by State Representative Chester K. Gillespie of Cuyahoga county, is responsible for the inclusion of a section in the Ohio State Liquor Control Bill that is veritably loaded with dynamite for purveyors of liquor in this state, who are normally in the habit of practicing race discrimination in their establishments.

In the confusion and rush attendant on passing the bill to satisfy the hysterical demand for legal liquor, Gillespie slipped in a section in the Bill, which provides that "all places granted a permit to sell liquor shall be deemed a place of public accommodation, within the meaning of Section 12940—(familiarly known as the Ohio Civil Rights Bill), and any person, or his employe or agent, who has been determined by a court having jurisdiction, to have violated this section shall forthwith forfeit any liquor permit granted him."

The inclusion of this section thus forces equal accommodation for Negroes as an important part of the conditions to be fulfilled if one wants to sell legal liquor in Ohio.

Opportunity Features

New York, Jan.—(By A. N. P.)—"The Negro Looks at the Alphabet" is the title of Jesse O. Thomas' provoking article on the NRA in the January OPPORTUNITY. Jesse Thomas gives some "inside stuff" on the operation of the NRA in the South. In some cases he mentions the Negro would fare just as well under the K. K. K.

Alain Locke again returns to OPPORTUNITY with a Retrospective Review of Literature of the Negro for 1933.

The Novels of Jessie Fauset are appraised critically by William Stanley Braithwaite, whose opinions of Miss Fauset's work will cause no little discussion among the literati.

Wilhelmina Hamlin, a student at Columbia, contributes a striking a poem.

And the concluding instalment of Eugene Gordon's short story of Communism, "The Agenda," is published in the January issue.

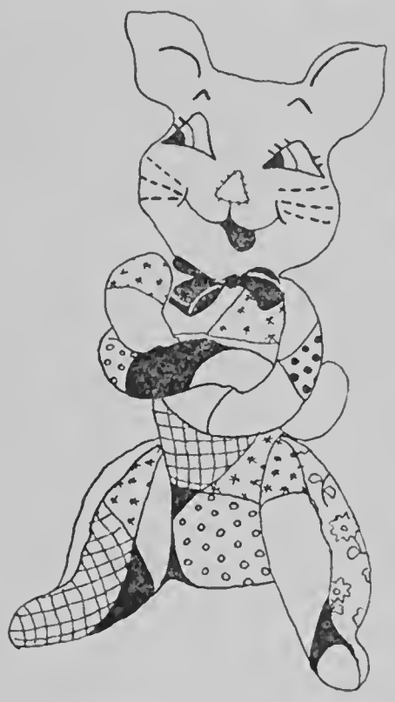
NEEDLE ART NOVELTIES



STUFFED TOY NO. 35-W

A sly old fellow is our nursery doll for today! I call him Crazy Cat, and he'll bear watching. But I'm sure we know of many a mischievous boy and girl who'll want him for their own. He can be very easily made up—we can use those scrap pieces of bright prints we've been saving. He'll be a very charming, though inexpensive gift, and believe me, with all those gifts we must buy—it will pay to get this pattern without delay. Pattern contains cutting chart and complete instructions. This is pattern No. 35-W.

We have prepared a wonderful new 32 page book showing over 90 newest needle work novelties, many in actual colors. The above pattern will be included free with each order for this book which is 25c Ask for Book "D." Single patterns are 10c each. Be sure to state pattern number wanted. Send order with coin to

N. T. S. CLOSES FIRST SIX WEEKS UNDER FERA

The staff of the Nursery Training School has completed the first six weeks of work under the FERA with a real success. Five teachers are doing splendid work at the school; the subjects and courses given are vocal and instrumental music, English, hygiene, sewing, first aid, cooking, all the fundamentals, other subjects may also be secured if wanted. Beginning January 17 through the 19th thrift week will be observed. The various organizations will help to make this event a success. The father of Thrift, Benjamin Franklin's life and the modern late pioneer, Rev. R. H. Boyd's life will be sketched. A children's clinic under the supervision of Dr. O. L. Westbrooks is held each Thursday at the Center, 1112 1st Avenue, South, from two to four p. m. Avail yourself of the advantage of the Center.

Maid Proves Hero

Cleveland, Ohio, Jan.—(By the Associated Negro Press)—Heroism of the sort that drew forth stirring editorial comment from the Cleveland Plain Dealer, was displayed Tuesday night by Mrs. Parry Lee Sullins, maid in the fire-gutted home of Louis Gold, 3409 Cedarbrook road, Cleveland Heights, when after rescuing one child of the family, she rushed back into the burning home after another child, even though her escape was cut off by flames.

Mrs. Sullins, who is now confined to St. Luke's hospital with a broken hip, leg, and internal injuries sustained when she leaped from a second story window ledge, was asleep in her room when awakened by shouts of fire. She rushed into the nursery room of Donald Gould, 3, and snatched him from the crib—handed the child to its grandfather, and rushed back into another room after another child, not knowing that firemen had already effected its rescue. Terror-stricken at not finding the child, the maid leaped through the window narrowly missing a fireman in her leap.

Elected to Vocational Guidance Association

St. Louis, Mo., Jan.—(By A. N. P.)—Charles H. Collier, industrial secretary of the St. Louis Urban League, has been elected a trustee of the Vocational Guidance Association of this city. Mr. Collier's election is said to mark the beginning of further advance of vocational guidance and employment among Negroes. In the organization of the St. Louis Chapter of the Guidance Association Collier played an important role. Members of the chapter include representatives of social agencies, placement executives and industrial managers.

C. M. E. CHURCHMAN HAS MOB ANTIDOTE

Editor George C. Parker of "Christian Index" Suggests Way to Help "Helpless" Sheriffs

Jackson, Tenn., Jan.—(By the Associated Negro Press)—There may be those who advocate quiet and peaceful ways in attempting to stamp out the rule of lynch law and mob violence, but they do not have the support of Dr. George O. Parker, fearless editor of The Christian Index, official organ of the Colored Methodist Episcopal Church which is published here.

This fearless Tennessee minister in a recent editorial in The Christian Index dealing with the lynching evil under the caption, "The Shame of It—Treason", says among other things:

"There has been a deal of talk as to the best way to cure mob violence. The Christian Index suggests the best remedy which is steel-jacketed bullets. We don't argue with mad dogs; we will kill them on the spot. A mob is a mad dog and should be shown the same consideration.

"Fifty Negroes, armed with high powered rifles; fifty men who don't care a whit about dying, and each determined to get one man of a mob can break up any lynching anywhere. Sure, blood will flow but if the Negro must die, let him die like a man. If the states and federal government can't stop this treason of lynching, the Negro can. 1934 should see a stop to it and if moral suasion can't stop these men bent on murder then the strong right arm of the Negro can uphold the majesty of the law by hot lead. The Index would be the last paper to countenance violence in any form, but when the law enforcement officers confess their inability to cope with mad dogs, then self-preservation, which is the first law of nature, comes into play.

Let every red blooded Negro man commit to memory McKay's militant poem and teach it to his boy children:

"If we must die—let it not be like hogs
Hunted and penned in an inglorious spot,
While round us bark the mad and hungry dogs,
Making their mock at our accursed lot.
If we must die—oh, let us nobly die,
So that our precious blood may not be shed
In vain; then even the monsters we defy
Shall be constrained to honor us though dead!

Oh Kinsmen! We must meet the common foe;
Though far outnumbered, let us show, be brave
And for their thousand blows deal one death blow!
What though before us lies the open grave?
Like men we'll face the murderous cowardly pack,
Pressed to the wall, dying, but fighting back!"

BOOKS YOU NEED IN YOUR LIBRARY ORDER TODAY!

THE

THE MODERN FARMER

Official organ of the National Federation of Colored Farmers, Inc.

Leon R. Harris - - Editor

Published monthly by the Modern Farmer at Nashville, Tennessee, and Chicago, Ill.

Nashville, Tenn., Office, 447 4th Avenue, North.

Devoted to the interests of the Farmer, Truck Gardner, Livestock and Poultry Breeder, the Home and the People.

Entered as Second Class Matter, April 10, 1929, at the Post Office at Nashville, Tenn., under act of March 3, 1879.

All contributions for publication in the Modern Farmer should be addressed to The Modern Farmer, 447 4th Avenue, North, Nashville, Tenn.

No libelous matter will be published. Unsigned articles or letters, and those written on both sides of the paper will not be used.

Subscription price $1.00 per year, 75c for six months, payable in advance. Personal checks must be certified. Make all checks or money orders payable to The Modern Farmer.

Advertising rates and sworn circulation figures presented upon application.

"OUR SLOGAN"

STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT.

THE LAW

"It is hereby declared to be the policy of Congress to promote the effective merchandising of agricultural commodities by encouraging the organization of producers into effective associations under their own control.

The Board is authorized and directed—to promote education in the principles and practices of cooperative marketing—to encourage the organization, improvement in methods, and development of effective cooperative associations. (Public—No. 10—71st Congress. Sec. 1-5.)

THE GOSPEL

"This law is predicated upon the ability of the farmer to manage his own business, once he is organized to do so. Cooperation is the key to it and only in exceptional cases can the Federal Farm Board have any dealings with a farmer who is not a member of a producer-owned and producer-controlled marketing unit."
Hon. Sam'l R. McKelvie, Former Member, Federal Farm Board.

It needs not great wealth a kind heart to display,—
If the hand be but willing, it soon finds a way;
And the poorest one yet in the humblest abode
May help a poor brother a step on the road. —Swain.

THE SHARECROPPER SEES "RED"

Members of the Communist party have stirred up two or three quarrels between Negro sharecroppers, and white planters and law officers of the cotton-belt, which have resulted in bloodshed. Investigation by the National Federation of Colored Farmers, Inc., proves beyond doubt that more serious trouble is not far away, and is bound to come unless something is done to prevent it.

All Communists are not radicals but certainly all are revolutionists. They want a change. They are dissatisfied with our social and economic systems. They are diligent propagandists,—hard workers for their principles and party,—and it takes more than boos, ridicule or threats to quiet them. They seem determined to organize Negro sharecroppers and turn their minds against our form of government. In far more than one southern state and community, sharecroppers are seeing "red" right now.

The "higher-ups" of federal and state governments have known for years that the condition of Negro sharecroppers was as bad, if not worse, than that of any class of people in the United States. But no program has been worked out for their betterment. Officials and publicists have been fooling themselves, —believing, or pretending to believe that the sharecropper was contented and happy. The Communists know the truth,—that the sharecropper is not contented,—that he is wallowing in poverty,—a victim of debt-slavery, persecution and injustice,—and what is more important, they know he is tired of his condition and, like a drowning man, is ready to grab any straw that offers freedom and salvation.

The National Federation of Colored Farmers has a practical, workable program for the benefit of the Negro sharecropper and leaders of that organization are going to request the federal and state governments to assist them in carrying it out. This is a duty of government. It cannot be assigned to the churches, the schools or to philanthropy. The way things are now, only government has power to act to change them.

Leaders of the N. F. C. F. see clearly what is coming and desire that a serious situation in the South may be avoided. Their organization is entitled to the support of all progressive and clear-thinking Americans who are not yet ready to embrace all the tenets of Communism. It merits the support of and cooperation of government officials, North and South. It is easier to put out a little fire than a big one,—it is easier to prevent the Negro sharecropper from SEEING RED than to convert him after he has GONE RED.

WHY NOTE RACE COMMUNITIES?

While many Negro leaders are "throwing a fit" about the idea that Race Americans should desire to live in Race communities, we find leading Jews of the world urging their people to change their economic and social structure and settle in Palestine and other countries where they can live in colonies. Jewish colonies in Palestine and Poland are doing well. Individuals are not getting rich quickly,—as everybody wants to do in America, —but they have enough of the comforts of life, and are free from insults, persecution and injustice.

If the Jews can get along better in colonies we see no reason why Negroes cannot. We shall continue to advise Race farmers to purchase farm homes in Negro farm communities. Before the end of time we are going to have to hang together anyhow,—so we might as well be learning to do that thing now.

"WE" ARE FIFTY PERCENTERS

A member of a "back-to-the-farm" rehabilitation committee of a southern industrial center says he can send back to the farms and permanently rehabilitate 12,500 white families at $200 a family, and 25,000 colored families at $100 a family. In other words, it costs twice as much to settle a white family on a farm as it does a colored family.

We don't know how the rule runs but we imagine it goes something like this:—a pair of mules for the white,—a single mule for the black, —or, a young mule for the white,—a poor old worn-out mule for the black—a milk cow for the white,—a suckling calf for the black,—a fat hog for the white,—a runt pig for the black,—a dozen chickens for the white,—a dozen eggs for the black,—and etc.

Perhaps a van is furnished to move the belongings of the white family back to the farm, while the colored farmer and his folks carry theirs on their backs. The white probably gets a stove while the black gets a fire-place. The white gets a sewing machine while the black gets a package of needles and a spool of thread.

At any rate, you colored ex-farmer families of the cities,—who want to go back to the farm,—you know now exactly what you are. You're a fifty-percenter. You are half-folks. You have feet,—but probably no heads,—bodies, but probably no souls. You need water but not bread,—greens, but not pork, and etc. How long, O Lord, how long!

GOVERNMENT ASSISTANCE

Colored farmers who are members of the N. F. C. F. have been informed by letter or bulletin just what they may expect this year from government relief agencies. Hundreds of farmers who are not members write to our office every month, —requesting information, assistance and advice. We try to reply to all correspondents, but every letter we send out costs at least five cents to write and mail and if we do not answer your letter, we tell you frankly, it is apt to be because we have not got the nickle. You should join the N. F. C. F. Pay your dues and learn, act and be a modern farmer. If you are too backward to join your farm organization, or so thoughtless that you will not pay your dues and help support it,—t's a cinch that you belong to the class that expects to help support it,—it's a cinch that you don't deserve advice, assistance or information. You will never have much or be much because you are of "little faith," Snap out of it! Lead the way! Get in your unit or organize a unit. Build it up and support it. Better become a member of your own organization than be forced to become a member of the other fellow's.

CO-OPERATION PAYS

White farmers of northern and middle-western states have been in pretty bad shape the past three years, but few of them have left their farm organizations. They believe that the better prices they are getting now have come as a result of their being organized. They have discovered that they can depend on their organizations for help when they need it. Quite recently 8,700 hog raisers in six western Illinois counties, signed pledges that they would not market any livestock for a period of six months except through their own cooperatives. As we have said,—these farmers all lived in just six counties of one state. As many as eighty-seven hundred colored farmers, nowhere in the whole nation, have ever signed a pledge to do any one thing. The only case we remember of that many colored farmers ever signing anything was two or three years ago when they signed a petition requesting aid from the American Red Cross. If that many would pledge themselves to do any certain thing it is no telling what might happen. Probably an earthquake or Judgment Day!

The N. F. C. F. is requesting all units to engage in some cooperative production activity this year and will probably ask all members to sign pledges that they will do this. We hope at least as many will sign to do something for themselves as signed up to get the Red Cross to do something for them.

If your subscription is due, send one dollar at once to The Modern Farmer, 447 Fourth Avenue, North, Nashville, Tenn. Get your friends and neighbors to subscribe. The Modern Farmer is the best farm paper a Race farmer and his family can read.

Stop shutting both eyes and signing everything you are asked to sign. We are hearing from farmers every month who are in trouble because they signed something they knew nothing about. Some have even signed away their deeds to their farms. Look and read before you sign. Stop being a dunce. If you don't know what you are signing, wait till you find out. This year of all years, it will pay you to know what you are doing.

Ask your landlord for a written contract this year. If he refuses to give you one, write and tell us his name and address. We are listing the names of all the fair,—and all the unfair landlords, of every county in the cotton-belt—peanut and tobacco belts too.

"AND THE BRIDE WORE"— NOTHING BUT A RING

The following account of a wedding held by the "nudists" is pretty good proof that some other races are going back into savagery faster than the Negro race is coming out of savagery. We wonder what would have been said and done if the bride and groom had been "colored" instead of "white." The account follows:

Men reporters are not experts at describing a wedding but there was one held out at Los Angeles last week that would not have been such a difficult task. In fact, it would have read something like this, "and the bride was adorned in a 14 karat gold wedding ring which encircled the ring finger in a most becoming manner. The groom was attired in the conventional grin."

This you see was a 1933 marriage, the very latest of the latest, the minister, the bride, the groom, the attendants all being nudists and attired only in their "birthday suits" for the occasion. The bride's name was Susie Wise and groom's Jimmy Goodman, but the question arises whether Susie is as wise as she was and whether or not Jimmy is as good a man as of yore.

Anyway, as aforestated, the auburn haired bride was adorned only with the wedding ring, and the groom's skin is described as "tawny" he having gone sans clothing for the past several months. A few of the women attendants wore sandals due to the roughness of the ground in the surrounding California hills, but all discarded other clothing as they arrived at the scene of the wedding

MISSOURI UNITS, N. F. C. F., HOLD GREAT MEETING

The following report of the annual meeting of Missouri Units of the National Federation of Colored Farmers, Inc., is clipped from the Enterprise-Courier, Charleston, Missouri. The progressive farmers of southeast Missouri are building up their units rapidly and are beginning to reap the benefits of organization and cooperation in a large way.

The third annual meeting of the Negro farmers of Mississippi, Scott and New Madrid counties was held at the Lincoln school building here Friday and Saturday, under the direction of L. B. Boler, instructor of vocational agriculture in the Lincoln school. More than 200 farmers from the tri-county area were in attendance at the meeting, and at the Friday evening session, James P. Davis of Chicago, president of the National Federation of Colored Farmers, addressed the meeting on the subject of cooperative marketing procedure involved in the securing of available federal aid for the farmer, and the benefits to be obtained by farmers through organization and mutual cooperation.

Davis advised the Negro farmers to beware of agitators, as well as those strangers who appear from time to time making rosy promises of help to the farmer. Davis reminded his listeners that in being a good farmer, a good tenant or a good share-cropper was not only helping the individual but helping to make his community better, which in turn was of a double benefit to the individual himself.

On the Saturday program was Chas. F. McGee, principal of the Lovejoy High School at Mound City, Ill., Mr. Jenkins, president of the Pulaski County, Ill., Farm Federation and others.

Boler has an adult agricultural class of 52 members at this time, and the class has organized a club to help fellow farmers to find land to rent and share-crop. Those in need of renters or share-croppers are asked to notify L. B. Boler at the Lincoln school. The officers of the above class are H. T. Crosby, president; S. D. Sloan, Vice-president; J. E. Coleman, secretary; Oliver Spellers, asst. Secretary; G. Emmanuel, treasurer and L. B. Boler and David Burnett, managers.

From U. S. Department of Agriculture, Washington, D. C.

FOREST EMPLOYMENT RIVALS GOLD RUSH

Because of the activities of the recovery forces in the Black Hills and Harney National Forests of South Dakota, more men are employed there this winter than at any time since the gold rush, according to a report to the United States Forest Service from Regional Forester Allen S. Peck of the Rocky Mountain Region.

"The situation in the Black Hills illustrates the effective use that can be made of national forests in acting as a stabilizer of employment," he says. "Productive work can always be found in forested areas."

Colonel Peck reports that 350 men have been put on pay rolls in the Black Hills country on forest-improvement work under N. I. R. A. allotments during the past month. Besides these men and the regular personnel of the two national forests, there are 15 civilian conservation camps, employing 3,000 men.

INDIAN HELP SAVE PINES

Indians were enlisted last summer in the work of controlling the blister rust disease of white pines in valuable forest areas on Indian reservations. They proved to be particularly effective workers in this branch of the Emergency Conservation Work, according to Dr. J. F. Martin of the United States Department of Agriculture.

"On reservations where white pine is an important forest tree," says Dr. Martin, "the Indians recognize its valce and are keenly interested in proteeting the pines. They understand, probably better than most means no game, no streams, no fish, people, that absence of forests no work in the woods, and no revenue from timber. Because of this instinctive knowledge the Indians are quick to recognize the importance of such enemies as the white pine blister rust."

The Indians also are good woodsmen, and as soon as the connection between the blister rust and the wild eurrant and gooseberry bushes in the forests was made clear to them, they were particularly adept and thorough in finding the bushes, uprooting them, and hanging them up to dry and die.

CULL BROODY HENS

In flocks of farm poultry of breeds such as Rhode Island Reds, Plymouth Rocks, and Wyandottes, in which some hens go broody and others do not, it pays to cull the broody hens and to use in the breeding flock only the hens that do not go broody.

In studies of poultry breeding at the United States Animal Husbandry Experiment Farm, at Beltsville, Md., Department of Agriculture investigators found that in the flock of Rhode Island Reds the pullets that went broody laid on the average of 180 eggs in their first year, in comparison with an average of approximately 205 eggs by the pullets that did not go broody. The difference of two dozen eggs in a year would make a material difference in the profit from a hen. The tendency toward broodiness is, to a considerable degree, hereditary.

Broody hens are likely to have broody daughters. In a few years the culling of broody hens from the breeding flock, even if not from the laying flock, would materially reduce the broodiness of the flock. When broody hens are observed in the laying flock they should be identified by a leg band or other method and sent to market as soon as they ean be sold to advantage.

COOKING PORK WELL PREVENTS TRICHINOSIS

In the winter months the fondness for pork expresses itself in the consumption of various meat food specialties. The United States Department of Agriculture, therefore, again calls attention to the importance of thorough cooking of pork produets. Carelessness in this respect may result in the very painful and sometimes fatal disease known as trichinosis, which is caused by very small parasites known as trichinae sometimes present in the muscles tissues of pork.

The result of a reeent study of trichinosis eases in one large city during a period of 20 months show that the disease affects persons of both sexes and all ages but is most commonly found among those of foreign origin and descent, particularly Italians and Germans who have apparently retained their native fondness for raw or imperfectly cooked pork. However, about one-fourth of the cases reported in the study were Americans which indicates that the custom of eating raw or imperfectly cooked pork products is not limited to those of foreign nationality.

While pork is highly nutritious and one of the most appetizing foods in the human diet, it is important to remember, the Department states, that pork should be well cooked at all times if the danger of trichinosis is to be avoided. Trichinosis is fatal in about 5 per cent of cases, records show. When pork is thoroughly cooked, there is no danger whatever of acquiring trichinosis, since the heat of thorough cooking destroys trichinae.

The Federal meat-inspeetion stamp "U. S. Inspected and Passed", on pork and raw pork products is not a guaranty against trichinosis, except in the case of those produets speeially prepared so that they may safely be eaten raw. Some of the processed products are: Italian style ham, coppa, capicola, cured boneless loins, loins in casings, and forms of dry or summer sausage. When there is any doubt as to the previous treatment of pork products they should be well eooked before being eaten.

RESTORE OREGON PASTURES WITH AN IMPORTED GRASS

(Farm Science State by State—Oregon)

A grass brought to this country from the steppes of Russia by the United States Department of Agriculture is now available for restoring Oregon pastures and ranges broken and planted to wheat during the World War, but later abandoned to weeds and soil erosion. War-time prices for wheat induced ranches in the Great Plains and Mountain States to plow up millions of acres of native sod and sow the land to wheat. With the decline of wheat prices this land dropped out of cultivation. No effort was made to get it back into grass again. As native grasses do not readily re-establish themselves, many years of profits from grazing were sacrificed to a few years of high returns from wheat.

Crested wheatgrass, the Russian relative of the slender wheatgrass and western wheatgrass native to our northern Great Plains, looked promising to Government plant explorers, who introduced it into the United States in 1898. Tests on American soil have shown that this long-lived perennial bunch grass excels all other grasses in eold and drought resistance. It starts growth earlier and continues to grow later in the fall than other grasses.

Crested wheatgrass, the Department of Agriculture says, is especially well adapted to the northern Great Plains, where the cold is severe in winter and the moisture supply limited in summer. It can stand temperatures as low as 50 degrees F. below zero and it remains dormant, with no apparent loss of vigor, during the hot, dry midsummer. Grown in conjunction with a grass that is more productive in summer it prolongs the grazing season. Crested wheatgrass has much better seed habits than other grasses commonly cultivated in the northern Great Plains, producing seed in abudance where conditions are even moderately favorable and offering no particular difficulties in harvesting, threshing, and cleaning the seed. Its remarkable root system completely occupies the soil, preventing weeds and other plans from becoming established.

Livestock relish crested wheatgrass, both for grazing and as hay. Animals grazing on it give higher returns in meat or milk than those pastured on native grasses, and the yields of hay are usually greater from it than from homegrass and slender wheatgrass. The new grass is especially promising as a cover to prevent soil and wind erosion and for controlling weed growths in once cultivated fields and on badly overgrazed range lands.

STUFFED TOY No. 40-W

Ship Ahoy, sailor boy!! And what a chubby sailor lad is he—with puffed up chest and wide trouser legs! Don't you think he's just a dear? He'll be just that, made of white suiting—with appliqued Ascot tie—stripes on one sleeve—and a big star on the other. We'll use the outline stitch for his pockets, his mouth and nose—as well as his blouse line and wide sailor collar. The satin stitch will do for his eyes. And now for the Seven Seas! Pattern contains cutting chart and full instructions. This is pattern No. 40-W.

We have prepared a wonderful new 32 page Book showing over 90 newest needle work novelties, many in actual colors. The above pattern will be included free with each order for this Book which is 25c. Ask for Book "D." Single patterns are 10c each. Be sure to state pattern number wanted. Send order with coin to

WESTERN ILLINOIS FARMERS SIGN PETITIONS AGAINST DIRECT BUYING

Rock Island, Henry Counties Take Part; 8700 Names on Resolution

Aroused over the low price of hogs which they believe due in part to present buying practices of packers, western Illinois farmers are circulating petitions urgently requesting that the secretary of agriculture, Henry A. Wallace, take action in curbing the selling of hogs direct to processors, reports the Illinois Agricultural association.

In Knox, Warren, Henry, Hancock, Rock Island, Henderson and Mercer counties, 8700 producers have signed petitions asking that the government take cognizance of the situation and do something to stabilize hog prices at higher levels. Thousands of hog growers are faced with the situation of feeding 45-cent corn to hogs which at present prices will scarcely return half the government loan prices.

So strong is the feeling among farmers about the direct buying program that many believe the fight should be carried to the halls of congress to make action mandatory if relief can not be obtained through present administrative channels. Recent reports of substantial profits made by big packing companies during the last year, during which farmers sold their hogs and cattle at a loss, have not helped the situation.

The petition circulated pledges the signers not to market any livestock for a period of six months direct to the packers except through open competitive channels. "Present low prices have become intolerable partly through efforts of packers to shift the entire amount of processing tax back on livestock producers," states the petition.

The difference between packer buying in which the packer determines prices, weights, grades and conditions of sale should be clearly distinguished from that method of selling to packers in which prices. weights, grades, etc., are determined by a farmer-owned and controlled cooperative, either at country points or in the terminals, spokesmen for the livestock growers point out.

Organized livestock growers believe they are adequately protected when they sell through their district cooperative associations such as those in operation at Bloomington, Decatur, Galesburg, Macomb and other points.

The American Farm Bureau federation at its recent annual convention adopted a resolution favoring government control and regulation of direct buying of livestock as praeticed by processors and packers, and urged the secretary of agriculture to take such action as may be necessary to remove the disastrous influence such buying has on price levels.

SALT WAS ONCE USED AS MONEY

The salt standard in the history of commerce antedated the gold standard. As a medium of exchange salt was widely used in many ancient countries. The Mogul conquerors of India made decrees thousands of years ago regulating the standard of salt that was used for money. In Asia and Africa cakes of salt were frequently used for money. Up until comparatively recent times salt was used as a medium of exchange in the Shan markets in Indo-China.

Besides being used as money, salt in days gone by was a powerful developer of commerce. Being essential to life, and unavailable to tribes remote from the sea from which the substance was obtained by evaporation, trade routes were early developed to provide the transportation of salt, according to a bulletin of the Worcester Salt institute. For hundreds of years a caravan route was maintained between Palmyra and Syrian ports. Even today much of the caravan traffic in Sahara is largely in this precious commodity. The oldest road in Italy is not the Appian way, but the 'Via Salaria,' the Salt Road along which salt was anciently carried from the evaporating pits at Ostia to the Sabine territory.

Indeed, according to historians, the largest city in the world, London, was first founded because of the salt trade, continues the Worcester Salt institute. During the earliest days of European history salt was sent from England to the continent. Cheshire and Worcestershire provided salt for Britain and Gaul, and the route for its transportation crossed the country in a southeasterly direction, crossing the Thames, then very shallow, at a ford where Westminster now stands. An inn was built to accommodate salt haulers when the river was too swollen to ford. From this humble beginning as a resting place for salt traders the great eity of London resulted.

FLOWERS VARY ON SAME TREE

Mr. Lee Tuck-chi, chief official of Tuck Fa County in Fukien Provinee, recently presented the citizens of Canton with four pots of a rare species of tea-flower plant. These have been placed at the Yuet Sau Garden for exhibition. The natives of Tuck Fa County call these remarkable plants the "eighteen sages." Flowers of different hues grow on one branch. On the same stalk some look like chrysanthemums, some like dahlias, and some l ike wild roses. The shapes and colors of the flowers of a single tree vary each time the flowers bloom.

OPTIMISTIC THOUGHT

Troy Times: Some time it may happen that a woman who has achieved national success will admit that her success was due to her husband.

Florida Times-Union: A wise man asks you a question to learn something. A fool asks you questions to start an argument.

FORTUNES FOUND UNEXPECTEDLY AS NUGGETS BOB UP.

Nothing stirs man's imagination more than tales of huge gold nuggets, according to Frederick Simpich in the National Geographie Magazine. Small ones have appeared in the craws of chickens and turkeys; children at play have found others. A 14-year-old California boy named Perkins, playing with a toy water wheel in a Calaveras county creek picked up a nugget worth $1800.

Near Dutch Flat, in the same state, an old miner, Dan Hill, stooped to wash his hands in a brook and saw in the water a chunk of gold as big as his head. He got $12,300 for it.

North Carolina does not come to mind first as a gold state. Yet reeords in the United States mint show that it mined gold as early as 1793. From its old Reed mine in Cabarrus county came a veritable stream of nuggets that ranged from bean-size up to gold chunks of twenty-eight pounds. A Montgomery county mine belonged to Thomas Faney, a deer hunter, whose favorable pastime was "to go hunting with bullets run from pure gold." Old resident thereabout tell of a buck killed long after Faney's death, in the shoulder of which was found a piece of gold. It was assumed that this was one of Faney's bullets, with which he had wounded the deer some time while hunting.

The Ural mountains of Russia have yielded nuggets up to fifty pounds and over. Three convicts

(Continued on Page 6, Col. 1)

Fortune Found Unexpectedly

(Continued from Page 5)

found one worth $30,000. It is written that the czar freed the convicts but kept the gold!

A strange story attaches to the "Oliver Martin," largest nugget found in California. Two men, Martin and Fowler, were asleep one night in a canyon when a mountain storm sent a sudden flood rushing down upon them. Fowler was drowned. Next morning Oliver Martin took his pick and shovel and started to bury his dead friend. Hardly had he begun the grave when he struck a nugget. It sold for $22,700 after Martin had first earned $10,000 by exhibiting it.

In New South Wales was found a record nugget, measuring 4 feet 9 inches long, which sold for $148,-000.

GUERNSEY MILK HOLDS LARGER FAT GLOBULES

Further evidence that Guernsey milk has larger fat globules than Holstein milk, and that there is a tendency, regardless of breed, for the size of fat globules to be larger at the beginning than at the end of the lactation period has been obtained by studies at the state college of agriculture.

Belief in farmer organization is the first essential of success.

WAR DECLARED ON KING COTTON BY CONFERENCE AT TUSKEGEE

Tuskegee Institute, Ala.—War was formally declared upon King Cotton on December 1, at Tuskegee Institute, by the A. A. A. Conference, consisting of Washington officials: C. A. Cobb chief of the Cotton Section; J. A. Evans, associate chief, Extension service; J. P. Campbell, Replacement Crops A. A. A. and H. A. Hunt, Director Special Service for Negroes Farm Credit Administration; and the representatives from the 12 cotton states in the South. "Cotton must cease to be king" was the slogan.

Mr. Cobb, who directed the efforts of the government this year to reduce both acreage and production of cotton, was the chief speaker. He outlined the steps of the cotton adjustment program for 1934. He read and interpreted the new contract the secretary of Agriculture will ask approximately a million farmers to sign before spring planting begins. Those who sign will retire 40 per cent of all cotton lands so that the production for 1934 will be less than that of 1933.

"This will go down in history as one of the most far-reaching meetings ever held," said the A. A. A. chief, as he explained to the state agents the steps to take to get cooperation from Negroes in the cotton belt who produce most of the 11,000,-000 bales of cotton we now have on hand, which keeps the price in the cellar.

President Moton was present during the morning and afternoon sessions. He spoke in the afternoon. After talking with congressmen and other government officials during the past week, Dr. Moton said with emphasis that he had never been so hopeful as he is now because of the evident determination of those in authority to see that Negroes get a square deal.

Mr. T. A. Campbell, Field Agent, U. S. Department of Agriculture, was responsible for the organization of the meeting. The cotton states were represented as follows: Tennessee, M. M. Brown; South Carolina, M. E. Daniels; Alabama, E. C. Cobbs; Texas, H. S. Estelle; Louisiana, T. J. Jordan; North Carolina, John W. Mitchell; Virginia, Thomas B. Patterson and J. B. Pierce; Arkansas, H. C. Ray; Georgia, P. H. Stone; Florida, A. A. Turner; Oklahoma, J. E. Taylor and C. H. Waller and J. H. Williams of Texas.

From Chicago Defender.

A THOUGHT FOR THE NEW YEAR
(Reprinted by request)

I will start anew this morning with the higher, fairer creed;
I will cease to stand complaining of my greedy neighbor's greed
I will cease to sit repining while my duty's call is clear;
I will haste no moment whining, and my heart shall know no fear.
I will look some times about me for the things that merit praise;
I will search for hidden beauties that elude the grumbler's gaze.
I will try to find contentment in the paths that I must tread;
I will cease to have resentment when another moves ahead.
I will not be swayed by envy when my rival's strength is shown;
I will not deny his merit, but I'll strive to prove my own;
I will try to see the beauty spread before me, rain or shine;
I will cease to talk your duty, and be more concerned with mine.

—Tuskegee Inst. Chapel Bulletin.

Needle Art Novelties

By Nancy Lee

STUFFED TOY NO. 41-W

Today—our little Jap Lady makes her entree. Every little Miss would be delighted with our quaint little Jap Doll—with imposing pom poms—silken gown—and wide striped belt. Her rich black hair and quaint cheery smile makes her a very unusual toy—one easily and cheaply fashioned of white suiting with any suitable bright material. With the use of the outline and satin stitches, we'll soon have our Jap Lady completed! Pattern contains cutting chart and full instructions. This is pattern No. 41-W.

We have prepared a wonderful new 32 page Book showing over 90 newest needle work novelties, many in actual colors. The above pattern will be included with each order for this book which is 25c. Ask for Book "D". Single patterns are 10c each. Be sure to state pattern number wanted. Send order with coin to .....

KING COTTON WILL REGAIN HIS THRONE

The story of cotton in Southeast Missouri is an epic of its rise from a modest beginning as a utility crop of the pioneers of three quarters of a century ago, to a vast financial asset, which, until the late economic upheaval, has always ranked closely with corn, wheat and oats, as leading commercial crops of the State of Missouri.

So, for many years the Missouri cotton crop held its proud place in the category of state resources, and still has it, for no true son or daughter of the southland will ever swerve in allegiance to the snowy cotton field and what it means to the economic life of the region. There is more or less sentiment attached to the industry, too, for the musical drone of the cotton pickers' song as they filled heavy sacks to the bursting point with the soft fluffs of down, are a part of the romance and traditional picturesqueness of the southland.

In the palmy days of cotton growing when the market was in healthy condition—that is, before its acute attacks of indigestion due, so the experts say, to prolonged periods of over-feeding—what better proof could one need as to the sovereignty of King Cotton than the scene at the various banking institutions throughout the cotton growing region? At Gideon, New Madrid County, the bank often remained open until midnight during the cotton season with several clerks busy during the whole time. (We quote from a bulletin of the Stat Board of Agriculture.)

In the early morning hours there would be fifty or sixty wagons waiting at the gin to be unloaded, each load averaging 1800 to 2000 pounds of cotton, the money paid to the growers by that cotton gin averaging $10,000 a day during the big season. And the same scene was being duplicated on an equal or larger scale at a score of other points, particularly at Kennett, Caruthersville, Malden, New Madrid, Portageville, Poplar Bluff, Campbell, Hayti, Parma, Clarkton, Dexter and Hornersville in fact anywhere that a gin existed.

They are still telling in Portageville how in the 1922 cotton marketing season, they loaded one flat car with 120 bales of cotton valued at $15,000, which was the largest car of cotton ever loaded in the United States so far as figures show.

From the Portageville shipping point on the Frisco, cotton was shipped in trainloads of 30 to 40 flat cars and in the year we are discussing it was estimated that New Madrid, Dunklin and Pemiscot County cotton growers averaged at least $100 per acre net profit from their crop. Much cotton was and is still shipped by barge to New Orleans and thence to various markets. And a barge load of cotton in the days prosperity was literally almost worth its weight in gold, for $500,000 worth of the valuable stuff could be loaded on one barge.

So, as we said at the beginning, those of the southland and of the cotton growing region of Missouri, have never relinquished their loyalty to King Cotton. Like the orthodox marriage ceremony, they have taken him for better or for worse, believing that the worst cannot last long. And from here we quote a good friend of this publication, who was asked to give some local phases of the cotton situation at the present time.

"I was born and reared in the lowlands of the south and know less about cotton today than I did on the day of my birth over 46 years ago. In fact, I am about in the same position as the cotton mill representative, whose company sent him to New York to investigate the cotton market and to keep them advised. He wired back, "some think it will go up—some think it will go down—I do too. Whatever you do will be wrong, so act at once!"

About the only excuse any of us have for raising cotton is in order to have something to mortgage to pay the expenses or loss on the last crop. We go on from year to year, planting and mortgaging our next year's crop for the fun we had producing the one the year before, and we like it.

It is sort of like this: We can't live producing cotton and we can't live without it, so we go right on making a little money and a lot of obligations and will continue to do so as long as there is a single "Swamp Angel" left and they will be with us always—you can't starve 'em and they won't quit raising cotton.—Missouri Magazine.

A WORD FOR DOGS

"Dogs have the freedom of steamships and all European hotels. People depending on the public who do not recognize man's love for a dog these days are foolish. It is one of the strongest of human emotions."—O. O. McIntyre.

SOUND MEN

"What we need most today is not 'sound money' but 'sound men'—men who when in power will not lose their sense of proportion and go money mad."—Mary E. Turnbull.

ANY WAY YOU TAKE IT

Rochester Democrat and Chronicle: The department of agriculture issues a bulletin explaining that there are several kinds of noodles. Experience has taught us that already.

LOGIC

Carnegie Puppet: They say that love is blind and that the home is an institution—therefore marriage must be an institution for the blind!

LEST WE FORGET JULIUS ROSENWALD

"Lest we forget" is the thought-provoking spirit in Rudyard Kipling's heart-stirring Recessional. Significant lines giving ballast to that beautiful poem are—

"Lord God, be with us yet,
Lest we forget, lest we forget."

One year ago in this publication we paid a full page tribute to Julius Rosenwald who died January 6, 1932 in Chicago. We repeat and pay that tribute with no less respect for his memory, and with more reverence for his Christian spirit. Schools and Y. M. C. A.'s all over this land are silent testimonies to his real interest in the under-man, the Negro. But shall Rosenwald live only in brick and stone? It is far better that he should live as he does in our hearts.

We must never forget a real friend. His name cannot be mentioned too often even in our churches and Sunday schools, for hundreds of boys and girls, young men and women who read these quarterlies are the beneficiaries of Julius Rosenwald's generous Christian spirit—non-racial and non-colored.

Again, we bow to his memory. Again we repeat—"lest we forget, lest we forget, lest we forget"—A. M. E. Teacher's Quarterly.

HOW SHALL CHRISTIANS TREAT NEGROES?

Of the estimated population of 117,000,000 in the United States today about 12,000,000, or more than one-tenth, are Negroes. In 1929 they operated 1,000,000 farms and conducted 70,000 business enterprises. They provide 21 per cent of the tobacco workers, 14 per cent of the iron and steel laborers, and 89.5 per cent of the saw and planing mill unskilled hands. In work requiring some measure of skill they are 29 per cent of the glass workers, 42 per sent of the fish packing and curing hands, and 31.7 per cent of the longshoremen. On the other hand, in other and more skilled trades, they have fewer than their relative proportion.

About 23 per cent of the Negro population is illiterate as compared with 4 per cent of the white population. Negroes have made remarkable progress in this respect, however, dropping from 90 per cent illiteracy to 23 per cent in the sixty-five years since emancipation. In 1926 there were 3,226,935 Negro children of school age in the southern states. Of these only 68.7 per cent were enrolled in school, leaving 31.3 per cent or about one million out of school. For the United States as a whole the expenditure per capita for Negro schools averages less than one-fourth of that for white schools. In 1916 there were only forty-four high schools for Negroes in the whole country. 592 two-to-four year non-accredited four-year schools for Negro youth in the fourteen southern states, and 592 tko-to-four year non-accredited high schools. Notwithstanding this progress there are still 281 counties in these states without any colored high school either public or private.

Such are some of the facts and some evidences of succeess and iailure in dealing with this phase of the great American Melting Pot. What attitude are what Christians to take? What ideals should control the educational work of Protestant churches on this problem?

We would like to commend in this connection a statement issued by the Commission in Interracial Cooperation of Atlanta. It is entitled "American's Obligation to the Negro" and gives the following six principles which should govern our attitude:

1. A basic Christian emphasis on human values means respect for the Negro's personality—both for what he is and for what he may become.

2. We must cease thinking of Negroes primarily in terms of our the white man's will.

3. As the dominant race we must doomed to perpetual servitude to give the Negro fair opportunity for self-development.

4. We owe it to the Negro and to ourselves to protect his property and his life.

5. Every community owes to the Negro a fair provision of public utilities.

6. Finally, the white man owes to the Negro, as to all other human beings, an attitude of active goodwill.—International Journal of Religious Education.

PROSPECT IS THAT EGG PRODUCTION WILL DROP

Recent reports show that the number of hens and pullets of laying age on farms on October 1 was about 1 per cent smaller than in 1932. Because of late hatching and late maturity of pullets and less abundant supplies of feed, the production of eggs this winter is expected to be somewhat smaller than a year ago.

SCIENTIFIC FARMING

Chicago News: Farmer Morkenthau, new secretary of the treasury, knows how to treat sick apple trees. Can he take the swelling out of a defic?

DUCKS LAPSE FROM VIRTUE

It's Different! It's Reliable! It's Progressive!

THE MODERN FARMER

The Only Publication For The 900,000 Colored Farmers In The United States

ISSUED MONTHLY! EIGHT PAGES! FORTY COLUMNS!

And Only One Dollar a Year!

The MODERN FARMER is read by colored farmers in every state and by many white farmers as well. It preaches to colored farmers the gospel of CO-OPERATION; of buying, producing and selling together, that all may receive more from their efforts as producers.

The MODERN FARMER is read by progressive leaders and friends of the Negro racial group who desire to know our problems and our progress. The MODERN FARMER publishes reliable information. It is not afraid to tell the truth.

The MODERN FARMER is read by religious and welfare workers who are interested in rural problems. These leaders know that the United States cannot be "right" as long as three million Negro Ruralists are in a condition of poverty, ignorance and debt-slavery.

The MODERN FARMER is read by business and industrial leaders who are interested in the potential "Negro Farm Market."

"I have been reading the Modern Farmer two years and I have learned more in the two years than I have in my whole life before. It's a wonderful paper. I wish all colored farmers would read it and learn what's being done."

E. W. WILLIAMS,
Vaughn, Miss.

"The Modern Farmer is so gratifying that we regard it as a God-send to the colored farmers of the southern states. Its instructions and information have caused our members here to be in a prosperous condition. We are not making much money but we are raising our living and feel sure that we will be better rewarded next fall. There is nothing too good for us to do or say for the Modern Farmer."

T. T. BROWN,
Auguilla, Miss.

"It is indeed a newsy little sheet and well gotten up."

GEO. R. ARTHUR,
Associate for Negro Welfare,
Julius Rosenwald Fund.

"Negro farmers should organize. They should be informed what the world is doing. They should become more and more the owners of the farms they cultivate, and they need a paper which will give to them the latest developments along all phases of agricultural life. I wish for the MODERN FARMER the largest possible success.

DR. JAMES E. SHEPHERD,
President North Carolina College for Negroes.

"The Modern Farmer gives us more light than any other farm paper. I intend to work until I have everyone of our 180 members a subscriber."

FRED WILLIAMS,
Choctaw Unit, Shaw, Miss.

"I am always glad to receive my MODERN FARMER."

R. W. GRIFFIN, Chairman,
Gages Spring Unit, N.F.C.F.

THE MODERN FARMER

THE COLORED FARMER'S MOUTHPIECE! THE COLORED FARMER'S CHAMPION!

THE COLORED FARMER'S FRIEND!

Your Children Should Read It! Your Friends Should Read It! Your Neighbors Should Read It!

ADDRESS

THE MODERN FARMER

447 Fourth Avenue, North. Nashville, Tennessee

INTERESTING NEWS AND NOTES

Ten million tons of coal are being distributed to the needy this winter by the Federal Surplus Relief Corporation.

A Merced, Cal., druggist has traded a quart bottle of old, bonded whiskey for twenty acres of land.

Illinois produces less than one-fourth of the potatoes eaten by the residents of the state. More proof that Illinois colored farmers should raise more potatoes.

It is reported that Mississippi will get two homestead subsistence colonies—the Richton farm colony in Perry county and a "garden farm colony near some city in the state.

W. P. Adams, owner of a 6,400 acre Iowa farm, has obtained the largest corn loan granted in the state. He has cribbed 301,320 bushels and the loan on the corn was $135,000. This is probably a larger government loan than will be received by all the Race cotton farmers in the whole state of Georgia.

Alabama, Arkansas, Florida, Louisiana and Tennessee report a decrease in the number of families receiving unemployment relief. Georgia, Mississippi and North and South Carolina report a slight increase.

Anna Lea Poe, an 11 year old Vega, Texas girl, won $150 in cash prizes on her ten seven months' old pigs at three fairs and later sold them at double the market price, realizing altogether $250. She recommends a diet of skimmed milk and milo maize to make pigs grow fast. Has any little colored girl done better with pigs the past season.

There were 490 colored farmers in the state of West Virginia in 1930, a decrease of 14 in ten years. The 372 full owners possessed 18,470 acres and the value of land and building was $832,553.

A South African farmer recently discovered the fourth largest diamond in the world—sold it for $350,000 and bought a farm and a plug hat.

A Salem, Oregon farmer has five different kinds of fruits growing on one tree—three varieties of Japanese plums, one branch of peaches and one branch of almonds.

MEDIUM-TYPE HOG NOW FAVORITE FOR PORK PRODUCTION

The popular "style" of hogs in the future will be the medium-type animal. This is becoming more certain every day as farmers set out to adjust and stabilize their port production, it is pointed out by E. T. Robbins, livestock extension specialist of the University of Illinois. Netiher the stretched-out rangy type of hog nor the chuffy type, with its well-rounded curves and excess lard, can compete with the intermediate type in supplying the present-day demands of the packer and consumer.

Already medium-type hogs seem to be scarce. At least one eastern breeder recently crossed five states in search of hogs of the medium type and reported to Robbins that it was difficult to find suitable animals. He especially did not want the long legs, narrow chests, slim bodies and the slow fattening qualities of rangy hogs. Most of the medium-type hogs that could be found were descended from rangy ancestors.

This breeder's ideas are in line with the trend which swine breeding will take in the future. Packer buyers regularly have preferred medium-type hogs. Experiments at the college of agriculture have shown that medium-type porkers may be produced just as cheaply as any others and that they make the best carcasses. Farmers report that medium-type hogs seem to be thriftier, hardier, more active and more easily fattened at popular market weights than hogs which are long legged, narrow chested and slim bodied.

With the market usually showing a preference for hogs which are fat at a weight of 225 pounds or less, there is every inducement to raise hogs of medium type

EXTRAVAGANCE OF RACE FLAYED IN SUNDAY SERMON

Rome, Ga., (Special)—A majority of the colored people of Atlanta and Fulton county have spent enough money in less than a year buying whisky, which makes no contribution to health, to operate the colored churches and schools in Atlanta for two years according to a close check up on the sale," declared Rev. B. R. Holmes, president of the Holmes Institute, in the prelude of a sermon at the First A. M. E. and Baptist churches of Rome, Ga.

Negroes are too poor to spend their meager earnings for that which brings them no return," continued Dr. Holmes. As a race we must spend more time training our children to be righteous and live better lives. The most serious mistake made among the majority of the colored people, the most of them do not live the proper life before their children. No children can be impressed with parents who do not set the right example in their actions."

HEAT AND LIGHT FROM CORNSTALKS ARE LATEST 'PRODUCE' OF THE FARM

Special to the Christian Science Monitor

Ames, Iowa—Heating and lighting from gas produced on the farm from cornstlaks may become a reality for farmers in the future, it is indicated by experiments now under way by the Ames field station of the United States Department of Agriculture and the Iowa State College.

Laboratory studies have led to the erection of a plant on a farm near the college where gas is manufactured. Cornstalks are used among the raw materials of fermentation.

Engineers under the direction of Mr. P. Burke Jacobs, chief of the station, hope to develop a farm plant capable of producing 200 cubic feet of gas a day from 40 to 50 pounds of shredded stalks. The cost of such a unit, it is thought, would be between $300 and $500 exclusive of distribution equipment within the house.

"Such a plant would be of great value in rural sections where coal is expensive and illuminating gas cannot be obtained. It also would provide a home outlet for six to eight or more tons of 'farm waste materials' each year, at the same time it saved cash outlay for other fuel," said Mr. Jacobs.

Considerable study also has been given by the Bureau of Chemistry and Soils of the United States Department of Agriculture to establishment of central plants to serve an entire community with gas. In these larger plants destructive distillation would be used, a process not practical for the individual farm. If the volume were great enough, trained chemists could be hired to regulate the manufacture of gas, continuous operation could be maintained and large quantities of waste materials used. Such a plan would save the individual from caring for his own plant, explained Mr. Jacobs.

THE HIGHLY EDUCATED NEGRO 'GRADUATES' FROM CHURCHES OF THE MASSES

"One of the most striking evidences of the failure of higher education among Negroes," says Dr. Carter G. Woodson, "is their 'graduation' from the popular churches, largely Baptist and Methodist. The masses of the Negroes still belong to these churches, but the more education the Negroes get the less comfort they seem to find in these evangelical groups. These churches do not measure up to the standard set by the university preachers at Harvard, Yale, Columbia or Chicago. The large majority of Negroes returning as finished products from such institutions, then, are lost to the popular Negro churches forever. Most of the unchurched of this class do not become members of such congregations and those who have tend to continue as communicants in name only

"This is sad indeed, for the Negro church is the only institution the race controls. With the exception of the feeble efforts of a few all but starved-out institutions, the education of the Negroes is controlled by the whites, and save the dramatization of practical education by Booker T. Washington, Negroes have not influenced it at all in America. In business, the lack of capital, credit, and experience have prevented large undertakings to accumulate the wealth necessary for the ease and comfort essential to higher culture.

"In the church, however, the Negro has had sufficient freedom to develop this institution in his own way. It is not perfect. It is in many respects corrupt, but it can be improved; and those Negroes who desert it in the struggle upward are unwise even if they are infidels. They are throwing away what they have to get something which they think they need.

"The Negro church is the great asset of the race. It is a part of the capital that the race must invest to make its future. The Negro church has taken the lead in education in the schools of the race, it has supplied a forum for the thought of the 'highly educated Negro, it has originated a large portion of the business controlled by Negroes, and in many cases it has made it possible for Negro professional men to exist. It is unfortunate, then, that these classes do not do more to develop the institution.

"I attended in Washington last Sunday, one of the popular Negro churches with a membership of several thousands. While sitting there I thought of what a power this group could become under the honest leadership of intelligent men and women. Social uplift, business, public welfare — all have their possibilities there if a score or more of our 'highly educated' Negroes would work with these people at that center. Looking carefully throughout the audience for such persons, however, I recognized only two college graduates, Kelly Miller and myself; but he had come to receive from the church a donation to the Community Chest which he represents, and I had come according to appointment to make an appeal in behlaf of Miss Nannie H. Burroughs' school Neither one of us had manifested any interest in that particular church, and this is the way most of them seceive attention from our talented tenth.

"The 'highly educated' Negroes will say that they have not lost their interest in religion, that they have gone into churches with a more intellectual atmosphere in keeping with their new thoughts and aspirations And then there is a sort of contagious fever which takes away from the churches of their youth others of less formal education. Talking with a friend from Alabama, the other day, I find that after her father died and she moved to Washington she forsook the Baptist church in which he was a prominent worker and joined the Episcopal church which is more fashionable.

I would not dare to make an argument in favor of any particular religion. Religion is but religion if the people live up to the faith they profess. I would say the same in respect to the Catholic and Episcopalians if the large majority of Negroes belonged to those churches. The point I want to make is that the ritualistic churches into which these Negroes have gone do not touch the masses, and they show no promising future for the intelligent Negroes since such institutions are controlled by whites who offer the Negroes only limited opportunity and then sometimes on the condition that they be segregated in the court of the gentiles almost outside of the temple of Jehovah.

"How an 'educated Negro' can thus leave the church of his people and accept such jumcrowism has always puzzled me. He cannot be a thinking man. It may be a sort of slave psychology which causes this preference for the leadership of the white man Only last evening I heard Captain Clayton, one of the Negro officers of the World War, say that the troubles in France, recently mentioned by Pershing, resulted in a large measure from their making unfavorable reports on one another, their failure to respect one another and coordinate their movements, but as soon as a white officer took charge everybody fell in line and things moved on harmoniously.

"The excuse given for seeking the religious leadership of the whites is that the Negro evangelical churches are 'fogy,' but I would rather be behind the times and have my self-respect than compromise my manhood by accepting segregation. They say that in some of the Negro churches bishoprics are actually bought, but I would rather belong to a church where I can secure a bishopric by purchase than be a member of one which would deny met the promotion on account of my color.

"And such is the history of the Negro in this country. The gap between the masses and the talented tenth is rapidly widening. I was only four years old in 1880 when the Negroes had begun to make themselves felt in teaching and consequently do not remember the conditions then obtaining, but I have read the record of the times and have talked with persons who participated in that effort. Invariably they say that the attitude of the leaders was quite different from what it is today. At that time men went off to school not to make money, but to prepare themselves for the uplift of a downtrodden people. In our time too many Negroes go to school to memorize certain facts to pass examinations for jobs. After they get these positions they pay little attention to humanity The attitude of the 'educated Negro' toward the masses results partly from the general trend of all persons toward selfishness, but it works out more disastrously among the Negroes than among the whites because the lower classes of latter have had so much more opportunity.

"For some time I have been making a special study of the Negroes in Washington, and I try to compare their condition of today with that of the past. Now although the few 'highly educated' Negroes of the District of Columbia have multiplied and are in better circumstances than ever, the masses show almost as much backwardness as they did in 1880. I find here sometimes as many as two or three storefront churches in a single block where Negroes indulge in heathen-like practices which could hardly be equalled in the jungle. The Negroes in Africa have not descended to such depth. Although born and brought up in the Black Belt of the South I never saw there such idolatrous tendencies as I have seen under the dome of the Capitol.

"Such conditions show that the undeveloped Negro has been abandoned by those who should help him. This is the outstanding shortcoming of the 'highly educated' Negro. In this respect our talented tenth has proved faltering to a sacred trust. The community taxes itself to educate the youth not that they may live selfishly but that they may lift as they climb.

"This very thought came out not long ago when I was talking with my friend, George E. Hamilton, a prominent lawyer and business man of Washington, who is very much interested in the uplift of the masses. 'The educated white man,' said he, 'differs from the 'educated Negro' who so readily forsakes the belated element of his race. When a white man sees persons of his own race tending downward to a level of disgrace he does not rest until he works out some plan to lift such unfortunates to higher ground, but the Negro forgets the delinquents of his race and goes his way to feather his own nest.'

"But never mind, my 'highly educated' Negro friend. The social order in this country is so constructed that the washerwoman, the hodcarrier and the teamseer will get their rights the same time you will. You are your brother's keeper, and you will have to give an account of your stewardship at the bar of public opinion. I am not pointing a finger of scorn at you. I am speaking also of my own shortcomings I have been guilty of some of these very things about which I am complaining, but I have seen the error of my ways, and I am now trying to do better"

Loans For Rebuilding Farm Homes is Planned By U.S. Gov't

CENSUS WILL BE TAKEN TO LIST PROSPECTS

Wide Range Is Covered—Object Is Outlined and Full Information Given

(Chicago Tribune Press Service).

Washington, D. C. —(Special)— The new farm deal will shortly find the federal government extending easy money loans to farmers throughout the country who desire to rebuild or modernize their homes.

A gigantic federal corporation to finance farm home renovation and rehabilitation on the most liberal credit terms is being worked out by experts of the department of agriculture, it was learned today. A census of farm dwellers to ascertain the prospects of the proposed corporation is to be undertaken by the civil works administration.

Wide Range Is Covered

The project, sponsored originally by the agriculture department, contemplates the extension of our federal credit for every type of the home reconditioning, or for completion of building. The project sheet, outlining the nature of the information to be gathered by the census enumerators, together with a detailed blank for recording the information, discloses that loans are contemplated for the addition of rooms, and for the repair, replacement, or installation of such facilities as electric refrigeration, electric lights, new plumbing, and landscaping.

The census workers, of whom 5,000 are expected to be recruited under the CWA, are instructed in the project sheet to obtain "some idea of willingness to have any or all of these facilities installed, if needed on liberal credit with amortization."

Under the plan, as outlined in the project sheet, the government would buy material necessary for prosecution of the program and contract with private concerns for the work.

Object Is Outlined

"The object" of the census of farm dwellers, is outlined as follows:

"To measure the potential demand for improved facilities, to determine cost of providing such facilities, to develop plans for installation adapted to needs of typical sections, and to develop plans for financing their provisions, as preliminary step in developing a public works program for improvement of the farm home and its equipment"

The nature of the project corporation was revealed in the following questions which the census workers are instructed to ask farm dwellers:

'Is money available from local credit sources to finance house construction, repairs, or improvements?"

"Would you be interested in borrowing money to finance construc-

Food Products As Public Utility Will Be Asked

VALUABLE INFORMATION

Cotton Farmers Can Now Understand A. A. A.

For the benefit of cotton farmers especially, we are publishing excerpts from a bulletin issued last month by the national office of the National Federation of Colored Farmers, Inc. All cotton farmers should read the following carefully that they may know how to manage their business this season.

Hon. Oscar Johnson, Finance Administrator of the Agricultural Adjustment Administration, Washington, D. C., in a speech a few days ago explained the new government ruling on farming for 1934, and among the more important announcements regarding cotton reduction acreage, said "Cash renters, as distinguished from ordinary share-cropper tenants will sign acreage, contracts in their own name and receive the rental payments and parity premiums themselves.

Landlords who supervise their own plantations will get all rental payments, however, there is a provision in the contract about division of rentals between landlord and a managing share tenant.

Renters who manage their own tracts and pay a definite number of bales in rent are considered cash renters. A managing share tenant is entitled to half the acreage rentals and must sign the contract with the landlord.

The claims for acreage rentals and premiums under these new contracts are not transferable and are not subject to garnishment or attachment, or in other words no one can take the advantage of you by claiming a back debt and at-

FINDS HARDY ENGLISH WALNUT IN MICHIGAN

East Lansing, Mich.— Prof. J. A. Neilsen, nut specialist at Michigan State College, announced this week that he had discovered a hardy strain of English walnut that produces nuts in Michigan comparable to the best quality of the California crop. He found the tree growing on a farm near Ionia. The tree was brought to Michigan more than 50 years ago and has produced annual crops of nuts, except in springs when late frosts blast the blossoms. Professor Neilsen said the college will co-operate in caring for the tree and in propagating trees for extensive planting in the state.

DOLLAR A WEEK—

Domestic help, for which a wage of $2.50 to $3 weekly was about standard in the average American home a generation ago, is now reported available at $1 in many sections.

CHALLENGE TO EDUCATED NEGRO

Article Reprinted For Benefit of the Youth

By Amiel G. Hall, Attorney at Law

Each year millions of dollars are spent for the education of our youth, and thousands are graduated from the various schools, colleges and universities scattered throughout the United States. As he leaves the portals of these educational institutions, the question which naturally presents itself to him is, "what is my aim in life?" The vocation he chooses is but the means, behind the choice lies inevitably one of the two ends, self or service.

There is a challenge to the young educated Negro to develop a new type of leadership. A leadership that is earnest; a leadership that is nuselfish; a leadership that is dedicated to service to his fellowman.

We boast about our Christianity, but where there is no service rendered to others there is no Christianity. Charity, which means love of one's fellowman is one of the greatest virtues of Christianity which needs application in our everyday life.

The world is calling for newness in every line of endeavor. The demand for a change is incessant. Last years production no longer satisfies this year's need. Men are constantly striving to harness more effective the so called forces of nature. To protect themselves from the raging storm and floods, to discover remedies that will cure ew diseases, to peer into the veil that hides the source of so called life in matter and thus prolong it. The youth of today is challenged to seek new truths and discoveries in the field of geology, chemistry and other sciences. We need more Carvers in the field of science. The youth of today has the capacity, the education and the training. What then is the solution, in order that the youth of today may be able to keep in stey with the progress of the world? The answer is Cooperation and encouragement.

Our greatest need today is leaders in the field of economics. It is a challenge to the young educated Negro to develop that leadership.

Our elder leaders have made rapid strides in the fields of education, political and religious and much credit is due them for their accomplishments, yet we are facing new issues in the present economic crisis that calls for adjustment.

After months of careful study and observing the conditions as they really exist, how the doors of economic opportunity are being continually closed in his face, I have come to the conclusion that the very existence of the Negro is at stake.

TERMED AS "BOLD EXPERIMENT"

Columbia University Prof. On 1933 Farm Legislation

Special from The Christian Science Monitor Bureau

New York— The Farm Act of 1933 is characterized as a "bold experiment in voluntary social control" by Dr. Edmund de S. Brnner, professor of education at Teachers College, Columbia University, in a pamphlet analyzing the new farm law.

The publication is one of a series which will be published by Teachers College. They are the result of surveys of important legislative acts passed in Washington since March and aim to describe the measures in an impartial and understandable way, so that President Roosevelt's recovery legislation will be comprehensible to high school and college students, as well as to adult study groups.

"The intent of the new farm law," Dr. Bruner says in his survey, "is to restore the farm group's purchasing power to the levels of August, 1909, to July 1914, the period during which the exchange of agricultural and industrial goods took place on a stable basis, and by so doing to benefit the entire nation. This act proposes a new type of cooperation far more extensive than the well-known farmers' cooperatives that have gained fivefold in membership during the last two decades and now include one-third of the farmers of the nation.

"To be successful, this new type of cooperation must include all major economic interests that have to do with putting on the dinner tables of the country.

According to Dr. Bruner, agriculture's difficulties began in 1920-

COLD-PACKING OF MEAT REPLACING OLD SMOKEHOUSE

Farmers of Coe township are in the midst of the annual task of killing and butchering hogs and cattle to store away a summer's supply of meat. While many still use the old-fashioned method of salting and smoking, an equal number has turned to the more modern and comparatively simple cold-packing method. This insures keeping of the meat, and offers a change from the proverbial "salt pork."

RHUBARB PIE

"What a very long pie!" exclaimed the young husband when the dessert was served. "It's really too big for us."

"I can't help it," replied the bride "I shopped all over town, and that was the shortest rhubarb I could find anywhere."

AGRICULTURAL INDIVIDUALISM WOULD SINK

Congress Will Be Asked To So Class and Construe Growths From Soil

Congress shortly will be asked to consider putting all food products under "public utility" control, according to a forecast of probable agricultural legislation prepared by Wheeler McMillen and published today in The Country Home, national farm magazine.

Demand for this particular method of regulation comes from farm groups which have already received an encouraging era from the higher-ups of the department of aggriculture, Mr. McMillen states. He explains the basis for the demand as follows:

Competition Restrained

"The theory behind all public utility regulation is that the public interest comes first. Competition is restrained, production limited. You can't start a new telephone company, build a railroad, or launch a new bus line nowadays without a certificate of public necessity. This is the theory which it is proposed to apply to American agriculture.

"Utilities must give good service in return for permission to operate in their monopolized fields. The price must be fixed high enough to permit the utility to give good service and make a profit. At the same time the price must be low enough so that the public can buy the service. These are the principles that may serve to clear up our agricultural difficulties. They mean compulsory control of marketing, licensing of plowed fields, and base-and surplus quotas for every farmer for each month of the year.

"Two years ago Walter B. Pitkin of Columbia wrote an article for us in which he suggested that food ought to be regarded as a public utility and that farmers should operate just as electric light and gas companies do. The professor received a few mild cheers and a lot of criticism. Most of the comment called his idea either a professor's dream or a wild notion.

"But it doesn't look so wild today. Milk has just been declared a public utility in one big metropolitan area, and seems likely to meet a similar fate elsewhere.

"Secretary Wallace has taken up Pitkin's idea, and is likely to refer it to congress for debate and possibly for preliminary legislation.

"The plan is eventually to put all agriculture under public utility control. Obviously this threatens the most radical and stunning

(Continued on page 8)

AIRPLANE USED TO SCATTER FOOD FOR SNOWBOUND BIRDS

Missouri birddom, or at any rate that portion of its dwelling within St. Louis county, is all a-flutter, relates The Christian Science Monitor. On a recent day, when snow and low temperature had combined to turn the customary winter food supply of feathered denizens into a frozen asset, one of those huge flying creatures with man—made wings which are sharing the air with the birds in ever increasing numbers, soared overhead leaving in its wake 500 pounds of well scattered wheat, ground corn and kaffir corn, emergency rations sufficient to serve until thawing weather should render nature's granaries accessible.

The airplane already has been pressed into service to drop food to persons who, at the time could be reached in no other manner. It has also been utilized for the broadcast sowing of small grains, for feeding marooned deer in mountainous regions of national parks and wild ducks in areas where ponds and feeding grounds were dried up and incrusted with alkali. But apparently, the Missouri Humane Society is the first to employ it for the large-scale feeding of birds during a critical winter period. Here is a thought for Audubon societies, bird lovers in general, the officials and pilots of air transport lines and private owners.

Nonmigratory birds take the winter weather as a matter of course, well knowing that seeds are to be found in the dried grasses, and berries on the now denuded bushes. But when crusted snow covers the ground, and shrubs bend beneath a coating of ice, the food situation in birdland becomes acute, and men must come to the rescue. City and suburban dwelling birds fare better than their country cousins, for newspapers, alert to the emergency, print reminders which bring a quick response of crumbs, nutmeats and bits of suet. But in regions remote even from hospitable farmsteads, donated grains, scattered by high flying planes, would mean lengthened days: a winter sowing that will return a rich summer crop of song.

A. and I. State College Announces Honor Roll

The following students comprise the honor roll of A. and I. State College as a basis of grades earned for the Fall Quarter, 1933-34:

Ranking Students in the Institution:

Watson, Jewell E., Nashville, College Special; Hawkins, Dorothy, Nashville, Sophomore; Wilkes, Alma L., Columbia, Freshman; Kinley, Allie M., South Pittsburg, Freshman; Patrick, Audrey J., Chicago, Illinois.

Ranking Students in the Senior Class:

Watson, Allyce, Nashville; Bate, Charles R., Castalian Springs; Dozier, Mae Charles, Nashville; Fletcher, Theodore, Chattanooga.

Ranking Students in the Junior Class:

Dixon, Arnette F., Nashville; Fowlkes, William, Union City; Dunn, Lillian, Dickson; Lee, Damon, Birmingham, Alabama; Owen, Jessie, Nashville; James, Albert B., Nashville.

Ranking Students in the Sophomore Class:

Hawkins, Dorothy, Nashville; Quarles, Arnold E., Clarksville; Menzies, Sarah, Nashville; Howell, Gerald, Mt. Pleasant.

Ranking Students in the Freshman Class:

Wilkes, Alma, Columbia; Kinley, Allie M., South Pittsburg; Patrick, Audrey J., Chicago, Illinois; Leavelle, Margaret, Clarksville; Guess, Mildred, Coal Creek; Officer, Arizona, Algood; Woodard, Charles R., Nashville; Haswell, James H., Nashville; Smiht, Oswald, Mound Bayou, Mississippi; Meals, Claude, Tiptonville; Gosey, Annie P., Franklin.

Miss Jewell E. Watson was the ranking student among the college specials.

The N. F. C. F. is requesting all units to engage in some cooperative production activity this year and will probably ask all members to sign pledges that they will do this. We hope at least as many will sign to do something for themselves as signed up to get the Red Cross to do something for them.

"You will never know what you can do until you try."

DUST CLOTH HOLDER No. 67-W

Ker-Choo! Did you sneeze too? Not exactly fair play letting little Lizzie Tish shake that dirty dust cloth right under our noses! If we make one of these holders and sew her on there, she'll have to stay 'put," and we'll always know where to find a clean duster quickly! Using this embroidery design on any plain container we make up let's use appliqued "patches" for her dress, shoes, and bows—(not forgetting the spot on Fido)— and finish it up in an outline stitch for the figure, solid satin stitch for the pupils of the eyes and mouth— and run a darning stitch around that pup! Pattern contains cutting chart and full instructions. This is pattern Number 67 W. We have prepared a wonderful 32 page Book showing over 90 newest needle work novelties, many in actual colors. The above pattern will be included free with each order for this Book which is 25c. Ask for Book "D." Single patterns are 10c each. Be sure to state pattern number wanted. Send order with coin to

Wilberforce Tops Kentucky 34-37

(By Bystander)

Frankfort, Ky. — In the game tonight tremendously ripping for the first half, Wilberforce tripped Coach Kean's Thoroughbreds to the tune of 34-27.

The initial fighting Blue-grass boys actually out-gamed the "Forceans for the first half. The work of Kentucky's Reed here was outstanding. The score however at the end of this period stood 14-16 Wilberforce.

Came the second half. The Green Wave mounted to a crest sweeping along the over-scrapping Keanmen. The long arms of Matthews and Singer plus the stout work of White made the efforts of Kentucky's Captain Livisay and the well known Wilmer West futile. There seemed little doubt of the final result following the third quarter though the Frosh quintet featuring William White, Shipp, and Moody added a final flush of excitement.

Wilberforce 34

SUNDAY SCHOOL LESSON Commentary

For 1934

Every Sunday School Teacher Should Have It

SIX REASONS WHY YOU SHOULD USE IT:

First: It is the production of your own National Baptist Publishing Board which gives employment to more of our people than any similar concern in the United States.

Second: It is purely baptistic and orthodox in every particular.

Third: Its doctrines are unquestioned, and the Biblical requirements are stressed in a manner to make it absolutely dependable.

Fourth: None of the modern theories leading to skepticism are admitted.

Fifth: It aims to be true to the teachings of Jesus and whatever there is presented which has not the "Thus saith the Lord" is discarded as unsafe and destructive of the best interests of mankind.

Sixth: Thoroughly adapted to the uses of our Sunday school constituency, it stands as a beacon light to all those who would like to rise in the scale of intelligence and demonstrate the qualification necessary for the accomplishment of the "Great Work" devolving upon us as a people

FOREMAN TELLS HIGH SCHOOL STUDENTS TO APPRECIATE COMMON PEOPLE

Roosevelt Aide Says Uneducated Members of Race Are Most Loyal Supporters of our Business Places

Washington, Feb.—(By the Associated Negro Press)—Clark Foreman, Advisor on the Economic Status of Negroes in the Recovery Administration, told the graduating class at Cardoza High School in his commencement address last week, that despite the depressed conditions of the country which they were emerging from school to face, the outlook was brighter for them because of the "New Deal."

"In the years of depression we have learned a lot" he told the graduates. We found that the system of rugged individualism simply did not work. In the simplest interpretation the New Deal can be said to mean that the government assumes responsibility to see to it that the people of the country are taken care of in proportion to the national wealth. All of you may leave the Cardoza High School with the feeling that you are not being set adrift on an indifferent and hostile world. You may feel that so long as President Roosevelt's policies prevail, the whole population will be the charge of the government.

"You have a definite part in the system. You have received exceptional opportunities and your graduation indicates that you have lived up to them. But do not lose sight of, or look down upon those who have been less fortunate. If you go into business you will soon find out that your success is closely linked up with the uneducated, common laborer who forms the basis for all economic life. His welfare and prosperity will be closely reflected in your own.

"If you are impatient with uneducated people, consider the great difficulties that have confronted them and the tremendous progress that has been made in the last seven years. Don't forget that at the time of the Civil War there was just about as large a percentage of illiteracy among white people of this country as there is now among the colored. Too often we are apt to think that we are the only people who suffer. In reality most people have a hard time of one sort or another and get enjoyment through overcoming those hardships.

In conclusion enjoy your life but remember always that what you do affects others and without others your efforts are in vain.

The New Yorker: By sliding off the gold standard, the United States gets itself in a position to look the world in the face and tell it to go to hell. Our money is as bad as anybody's.

STOCKHOLDERS OF CITIZENS SAVINGS BANK HOLD ANNUAL MEETING

THIRTY YEARS OF BANKING SUCCESS

Out-of-Town Stockholders Present—Report From Officers and Directors Received and Adopted

Stockholders of the Citizens Savings Bank held their annual meeting on Tuesday night, January 30th. Every stockholder of record was uregd to be present. When the president called the meeting to order it was shown that a quorum was present. He then called upon Rev. M. W. Tyler of Clarksville, Tenn., to offer invocation. The official call was read and accepted. More than 90 per cent of all the stock of record was reported present either in person or by proxy, and verified by A. G. Price, the assistant cashier.

On behalf of the board of directors and officers, J. C. Napier, the cashier, made the report and stated that for thirty years the Citizens Savings Bank, the oldest Negro bank in the United States, had continued to function, had met every obligation. He brought the official information to the stockholders that the bank had qualified under the new United States Law, and had been given a certificate as a member of the Federal Deposits Insurance Corporation as provided by the Act of Congress. This was met with applause.

The routine matter coming before the stockholders was submitted for their consideration. In keeping with the well defined policy of this institution, it was the concensus of opinion of those present that Nashville's need for an institution conducting a banking business was more apparent now than ever before.

While gathered together in their annual capacity as owners, the men and women who hold the stock and to whom the institution belongs, listened to these reports, passed upon each and every one, and then proceeded to elect seventeen directors who will guide the Citizens Savings Bank & Trust Company for the ensuing year. The following are the directors who were chosen: C. V. Roman, Mrs. Preston Taylor, W. C. Sheffield, W. R. Walker, A. G. Price, J. L. Harding, J. T. Patton, E. L. Price, Henry A. Boyd, J. C. Napier, C. D. Gordon, Miss S. B. Wilson, D. W. Crutcher, W. J. Hale, Mrs. S. F. Watkins, C. A. Dickson, W. D. Laws.

It was noticeable that no change was made in the personnel of the board. At the adjournment of the stockholders' meeting an announcement was made that the board of directors would meet the latter part of the week, select the president, vice presidents, cashier, assistant cashier, chairman of the executive committee and an executive committee personnel whose duty it will be to pass upon all applications for loans, and to work in conjunction with the officers of this institution.

VIOLENT END IN STORE

Greensboro (Ga.) Journal: When posterity inherits all of the debts we imagine it is going to be the end of ancestor worship.

SOUND MEN

"What we need most today is not 'sound money' but 'sound men'—men who when in power will not lose their sense of proportion and go money mad.'—Mary E. Turnbull.

GUADALUPE COLLEGE NEWS

Seguin, Tex. —Two African girls Maude and Ceeilia George as now in school here. They are the children of Eliza Davis George, an African missionary.

The Sophomore class entertained last evening with a dinner. The affair was enjoyed by all the school. Dean Mosley was the principal speaker.

Last Friday night a debate was held during Lyeeum meeting. The question debated was: Resolved, That Inter-school Athletics should be abolished."

Tarold Taylor and H. Robinson represented the negative. Mr. Myers and Mr. Whitby, the affirmative. The debate was well received.

All students have begun the second semesters work and are studying hard trying to make a good start.

CLOTHESPIN BAG NO. 65

Who ever mentioned "Wash Day Blues"? We can't even think of them when we take one look at this new clothespin bag and see **Perky Ann Prim** way ahead of us—hanging out her clothes before ten o'clock in the morning! Bet she washed them out Sunday night. Of course she didn't have to waste any time hunting for her clothespins—they are always there together in the fat pocket—but we're not going to waste any more time either—we'll have a clothespin bag, too—and show her real speed. And that completes the set I promised you—didn't they help a lot—and save you time and backaches—and they helped our dispositions, too—and weren't they easy to make—because our pattern showed us just how to cut them out of any plain washable fabric—and our embroidery design was traced so quickly—I guess we had better not tell anyone it only took us a couple of hours to finish it all up—they might think we didn't do our work very well. Pattern contains cutting chart and embroidery design.

We have prepared a wonderful new 32-page Book showing over 90 newest needle work novelties, many in actual colors. The above pattern will be included free with each order for this Book which is 25c. Ask for "Book D". Single patterns are 10c each. Be sure to state pattern number wanted. Send order with coin.....

Advertising rates and sworn circulation figures presented upon application.

"OUR SLOGAN"

STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT.

THE LAW

"It is hereby declared to be the policy of Congress to promote the effective merchandising of agricultural commodities by encouraging the organization of producers into effective associations under their own control.

The Board is authorized and directed—to promote education in the principles and practices of cooperative marketing—to encourage the organization, improvement in methods, and develojment of effective cooperative associations. (Public—No. 10—71st Congress. Sec. 1-5.)

THE GOSPEL

"This law is predicated upon the ability of the farmer to manage his own business, once he is organized to do so. Cooperation is the key to it and only in exceptional cases can the Federal Farm Board have any dealings with a farmer who is not a member of a producer-owned and producer-controlled marketing unit."
Hon. Sam'l R. McKelvie, Former Member, Federal Farm Board.

If things don't go to suit you,
Why, it ain't no use to fret;
Just hustle 'round an' do your best,
You're bound to win out yet.
Remember, when your troubles come,
Your life is what you make it;
What happens to you ain't what counts,
Instead, it's how you take it.
Unknown.

LAZARUS AT THE GATE

The Negro sharecropper, the Lazarus of the American farming class, is still stretched out at the planter's gate, begging for the crumbs from the table. In spite of the millions of the "New Deal" has poured into the cotton, tobacco and peanut belts, Lazarus remains a beggar. The landlord and merchant took his plow-up "checks" for his debts. Although he produces two-thirds or more of all cotton, he is not called a "producer" and will get no rent for the land not planted in cotton this year, as he will have no voice in the proceedings of the county Cotton production Control Association and certainly cannot be a member of his community committee, he is sure to get little or nothing as parity payment for acres left uncultivated.

The sharecropper seems to be getting a taste of that kind of justice that gives still more to the fellow who fares "sumptuously every day" and only "crumbs" to the one really in need. The sharecropper may be a a good farmer but he is a dependant farmer. He has nothing he can call his own except his wife, children and the clothes on his back. He will have some faith in the New Deal when it frees him from debt-slavery and gives him an opportunity to own the land he plows and pay the land he owns.

A LESSON FOR RURAL CHURCHES

When a rural church of any denomination can expand its congregation and become more prosperous, the entire community is benefitted. On the other hand, when the church splits up into factions, each faction attempting to out-do the other, the community is the loser.

Not long ago a small church congregation in North Carolina was soliciting funds for a new edifice. A wealthy friend told them if they would unite with three other churches of the same denomination in adjacent communities, he would provide fifty per cent of the fund required to erect a church building large enough to house the united congregation. The union was accomplished and a modern church is now being erected in a central location, which, when completed, will be the finest and best rural church in the state.

Quarrels and division are killing off hundreds of rural Negro churches. We cannot understand how Christians expect to get along in heaven who are unable to agree here on earth. Surely the time has come when the small churches of the same denomination in a community should unite under one leader and carry on as all modern, progressive churches do.

LACK OF WILL POWER

Far too many colored farmers lack will-power. They are always expecting some one to do for them. They have not the courage to do for themselves.

Every day there comes to the national office of the N. F. C. F. dozens of requests from farmers for service and information they could easily find if they would open their eyes wider. The N. F. C. F. issues bulletins full of valuable information. Farmers can get this information if they attend unit meetings and keep awake while the secretary or market agent reads it to them. About all the information requested has already been given in the bulletins.

Many members also request the national office to get application blanks for loans for them. These blanks can be gotten by these members themselves if they will apply to their county agent or county committees. We must get into the habit of doing for ourselves more Its a good idea never to ask someone else to do for us what we can do ourselves.

OUR UNITS CARRY ON

It is gratifying to note that units of the National Federation of Colored Farmers, Inc., in most sections seem to be determined to carry on Many are holding special meetings this month in preparation for this year's program. Money is scarce but faith and hope is strong. Success is bound to come to those who have faith and determine to work for it.

National leaders of the organization are doing all they can to make the N. F. C. F. bigger and better. It is a trying task. All must cooperate and help out.

Don't forget to send in a dollar to renew your subscription to the MODERN FARMER the moment it is due. Also have your neighbor subscribe. Every colored farmer should read the MODERN FARMER.

Every Unit of the N. F. C. F. has been insrtucted to engage in some cooperative production activity this season. Plant a Unit Garden, a Unit Cotton Patch, a Unit Pea Patch, or raise some Unit Hogs or chickens. Better still, if possible, plant acreage sufficient to enable your Unit to ship several cars to market. Units should buy, produce, and market cooperatively.

WHAT'S THE MATTER WITH THE AVERAGE NEGRO FARMER?

More Contest Letters

Editor's Note: — We have published the best letters received in answer to the above question and the letter have been very interesting. Certainly all of us have seen some of our faults and have been advised how to remedy them. We should be better farmers,— much better farmers than the AVERAGE.

In a few weeks we plan to announce another contest. Look for it and get ready to enter.

Dear Editor:—

In writing a few words about "What's the Matter With the Average Negro Farmer," I will say first,— that the planters have all the land in their hands. They ride the roads in their cars and sit in the streets and play big and won't let the Negro farmer raise anything but cotton and still more cotton. They give him land enough to raise corn to fatten a hog or two but that's all. He can't keep a cow for the landlord won't let him graze the cow on his land. He gets hardly any room for garden or potatoes to live on. So how can the Negro farmer climb? We are paying $1.60 for poor flour, 60 cents for meal. We can get nothing at all for our cotton. When it is sold the landlord gets everything The government ought to take some of this land out of the hands of the few who own it all and give the Negro farmer who farms it a chance to live and be somebody.

Eugene Noel, Buelah (Miss.) Unit.

Dear Editor: —

"What's the matter with the average Negro farmer?" He is dishonest with his neighbor farmer and does not love his fellowman. He has got into the habit of not wanting anything and is too easily bluffed and is afraid to venture where things look dangerous. He wants some white person to come and tell him what to do. If some one else tells him something he says that the other person doesn't know what he is talking about. He may read in a paper that all Negroes have certain rights but he will not take his rights unless he asks some white person can he do this or that. Honesty will make a man strong and love will make him brave and if he will exercise his muscles for wealth he will never crave.

S. M. Ross, Market Agent, Webb, Miss. Unit.

Dear Editor:

I want to tell you what's the matter with the average Negro farmer. I know what's the matter and I know I know. Ever since the Emancipation of the race the merchants and landlords taught our grandfathers, — our grandfathers taught our fathers, and our fathers taught us, and we have taught our children, "TO RAISE ALL THE COTTON WE COULD RAISE AND BUY EVERYTHING WE WANTED REGARDLESS OF COST." So we made too much cotton and sold it for what we could get, then we bought too many perishable things and paid too much for them. So the depression came on.— yet we could not understand.— until the sunlight of knowledge bursted forth through the National Federation of Colored Farmers, and through the MODERN FARMER, to lead us into the promised land. So lead us on! I am your follower.

R. W. Griffin, Durant, Miss.

St. Louis C. W. A. Makes 400 Workers Happy and Gives Slave-Driving Boss A Heart

St. Louis, Mo., Feb.—(By the Associated Negro Press)—Drafted from his regular work as quarry boss, to superintend 400 CWA men, 90 per cent Negroes, Tom Bush, veteran hard-rock foreman, told last Friday, how in five-weeks these men had changed his viewpoint and their own outlook on life.

Lesson He Learned

"They were the sorriest looking lot I ever saw," Bush recalled, but today they are different men—and I realize for the first time you can get more out of a man working with him than cussing at him.

Six-feet-two, a 200-pounder, Bush admittedly "hard-boiled slave-driver," at first viewed with misgivings the crew that reported for work at Big Bend quarry, on Laclede Station road. His misgivings were immediately fulfilled.

"Why, this last month has been more of an experience for me than nine years in Alaska, some of the time within the Artic Circle."

When the men first reported Bush said they "just stood around-dumbly, looking in space—figured they were in another charity line."

"And when it came to going down into the hole," he continued, surveying men who looked like puppets loading toy trucks far below, they just balked. Only 30 went down. The others developed everything from heart trouble to creeping paralysis."

Many of the men, he related, were thinly clad, some had no soles on their shoes, all showed effects of undernourishment and weeks of discouragement.

Transition of Workers

But today, all the men went down laughing, joking—even doing work they weren't told to do. Most of them wore new shoes, all were warmly dressed, they looked in sharp contrast to the flabbiness of five weeks ago.

"It's quite a sight," the superintendent conceded, and it's hard to believe they were the same men who acted like a bunch of whipped dogs.

"Well, it's due largely to the fact they've been able to put good food in their stomachs, clothes on their backs and maybe have a little spare cash left at the end of the week.

INTERESTING NEWS AND NOTES

The Atlantic and Pacific Tea Co., through its thousands of stores, sold approximately $150,000,000 worth of fresh fruits and vegetables last year. About half of these supplies were furnished by one commission company.

A starchless potato has been developed by professors of McGill University, Canada. It will be beneficial to those affected with diabetes.

German scientists have developed a potato plant that is immune to attacks of the potato bug. The new strain is expected to be sought by potato raisers all over the world.

Miss Edna B. Reed, of Portland, Ore., directs one of the largest farmers' cooperatives in the country. This is the Pacific Poultry Products cooperative. She manages the receiving, storage and distribution of 100,000,000 eggs a year.

PRAISE BAMA GOVERNOR AND SHERIFF

Birmingham, Ala., Feb.—(By the Associated Negro Press)—Officials of the Civic League of Pratt City, said to represent more than 5,000 persons, have sent letters to Gov. B. M. Miller and Sheriff Hawkins of Jefferson county, commending them for the consideration they have given Willie Peterson, condemned to die Feb. 16.

Peterson was convicted of the murder of two white girls at a second trial. His second trial was supported by the N. A. A. C. P. Last week, the United States Supreme court refused to review the records in the case.

Sheriff Hawkins has expressed the belief that Peterson is not guilty.

Peterson's only chance for life now is in a clemency hearing which will shortly be held before Gov. Miller.

Dies From Policeman's Bullet

Sanford, N. C, Feb.—(By the Associated Negro Press)—John Ford, who was shot Saturday morning by Wesley Phelps, Jonesboro policeman, died Saturday morning. Emanuel Burnett was shot by the same officer at the same time. Phelps is alleged to have come upon the two men seated in a car near a filling station. He opened the door of the car and ordered them to hold their hands up. Phelps said he shot when it looked like one of the men was going to draw a pistol.

Revolt In The Congo

Brussels, Belgium, Feb.—(By the Associated Negro Press). Wires from the Belgian Congo brought news here this week of a recent revolt among members of the Nono tribe, who are regarded as cannibals. The trouble is said to have begun in the village of Duna and to have been fomented by witch doctors after a tax collection. An African soldier was wounded by the rebels. The troops put their arms to use and killed three of the natives.

Needle Art Novelties

By Nancy Lee

FROCK WITH HAT TO MATCH
NO. 45

The small daughter will simply adore this "ducky" frock—with hat to match! If she's a brunette, let's choose pale yellows—handkerchief linen or dotted Swiss would be lovely embroidered in orange shades with a dash of bright blue—but really, there's no end to the many charming color combinations that can be worked out from this dainty embroidery design illustrated. If we use an outline stitch in making the little figure, it would be well to employ more solid stitches in flowers to give balance to the design—falling back on the familiar "lazy daisy" for our leaves. Pattern applique and embroidery design. This pattern is No. 45.

We have prepared a wonderful new 32 page Book showing over 90 newest needle work novelties, many in actual colors. The above pattern will be included free with each order for this Book which is 25c. Ask for Book "D". Single patterns are 10c each. Be sure to state pattern number wanted. Send order with coin to....

CELEBRATION OF EMANCIPATION DAY AT PULASKI WAS STIRRING EVENT

Pulaski, Tenn., (Special)—The Seventieth Anniversary of the signing of the Emancipation Proclamation by Abraham Lincoln, was celebrated the first day of January, 1934, in conjunction with the Annual Old Folks' Day, a meeting held each year in Pulaski by its loyal citizens, at which time a Free Will Contribution is taken and distributed to the aged and decrepit citizens. This year the meeting was held at St. James Baptist church, Mr. N. N. Reynolds, Grand Chancellor of the Knights of Pythias of Tennessee, being Master of Ceremonies. The congregation gathered promptly, and an interesting and inspiring program was rendered of speech and song, which was enjoyed by the entire audience from many walks of life, who listened attentively, and each played his part to make the occasion a grand one.

Among the speakers present were Revs. J. T. Bridgeforth, Buchanan, Trance Johnson, L. B. Douglass, John Mayo; Prof. F. T. Coleman, Mrs. Alice Coleman, Mrs. Priscilla Dangherty, Mrs. M. A. Bridgeforth, Mrs. S. B. Lewis, Mrs. Thelma Douglass, Bro. Wm. Davis, Mr. N. N. Reynold and others. Mrs. Mary L. Burch read Lincoln's Speech at Gettysburg.

Mr. Emerson Davis, a young man of Pulaski, and a graduate of Pulaski High school had prepared and delivered the principal address as follows:

"Master of Ceremonies and Fellow Citizens: We give thanks today to Almighty God for His goodness, and rejoice that we are here today to enjoy this 70th anniversary of the signing of the Emancipation Proclamation by Abraham Lincoln. As we look back over the long train of Providence, and see the depth from which we have climbed, and behold the progress we have made, our hearts swell with pride and gratitude to Him who enabled us to reach this place, especially when we think that just seventy years ago today we were declared freemen, turned loose in the world without a dollar, without education, without leadership, without churches, without schools, without teachers, nothing but chattel, a mass of ignorance turned loose to be preyed upon by the crafty and cunning of other races.

"Just how we have as a race, been able to live and thrive under the many hardships, handicaps and perplexities we have had to meet and during these seventy years we have not been without our friends. Many have helped and encouraged us in our efforts, and we are proud to realize that many of our white friends are waking up to the knowledge that the Negro is not the bugbear that many have pictured him to be.

"That there are some fools in our race, just as there are in other races, is a fact that we cannot deny. We cannot control all the Negroes any more than other races can control all their members. There are horny-headed folk in all races, there are criminals in all races, and we are not making any apology for the undesirable in ours. We are just what the white people have made us. They set the example and we have simply followed, often to our detriment. The fact that there are some of us who say and do unwise things, should be no reason for condemning the entire race. To those who do well, speak an encouraging word. Give credit to whom credit is due. Unfortunately for the Negro, he has drifted away from politics, not from choice, but from force of circumstances. Politics is a great school, and the Negro learned much through politicians. He learned much about the government of the people, for the people and by the people. He has learned much about the laws, legislation, men and measures, and consequently he learned to love his country, to be loyal as a citizen and a faithful defender of the flag. But having been forced out of politics to a great extent, he turned his attention from this splendid training school to education, industrialism and property owning, and the progress he had made along all lines has astonished his friends, to say nothing of his critics.

"The Negro in his struggle to rise, is not demanding anything that belongs to others. He is not trying, nor does he wish to deprive anyone else of their rights and privileges, he is only demanding his rights to enjoy his own freedom, his rights as an American citizen. He asks only for an opportunity to develop himself by his own labor. No, the Negro asks no favors nor gifts, but does ask for a man's chance.

"The Negro does not want to mingle socially with the white race, he is not seeking social equality. That is a mistaken idea, and really but few entertain it. That is the least of our desires or expectations, but we are anxious to develop our brain in the arts and sciences. The colored boys and girls want to prepare themselves so they may be able to take their places and help to develop the world in which they live. Our aspirations are as high as the sky. We want to be men. We want to enjoy every right to the limit of our ability. No, we do not want social mingling with the whites, but what we do want is equal accommodations when we have to pay for service. And when we are charged with crime, we want the same protection you would give any other American Citizen, and not as Negroes.

"What we need more of now, is racial cooperation. This mighty conflict because of race hatred, race friction and the color question cannot much longer exist, for it has no foundation and no merit. We have reached a new day, and are writing a new chapter in history. The Negro of yesterday left his imprint upon our hearts. his worth, his honesty, his loyalty will not be forgotten. He was true to every American interest; he helped to care for his master's interests during the bloody conflict, and his devotion to duty, to his master and to his country will ever be remembered by the sons. The heritage left us and the sacrificing work of the fathers will ever linger in our souls and in the spirit of the future. We shall continue our work, trusting God and doing the right, and this new dispensation of liberty and enfranchisement toward which we are looking in the future, with the hope that God in His way will bring forth some stalwart statesmen, men of courage who will see to it that the Negro will be regarded as a man, and accorded every right and privilege that any other American citizen has, will shed its benign influence, and we will be able to work out for ourselves to the limit of our abilities, a place among the nations of the earth. We have forged ahead and wrought well with what we had to work with. If the Anglo-Saxons have struggled for over a thousand years to reach the top, and are yet far from it, what can a liberated race expect in seventy years? No, the white man has not yet reached true manhood, so let us cultivate a spirit of patience, of tolerance, of good will, and learn to labor and to wait, and the God of all nations, whose eye is on the sparrow, will watch over us and will not withhold any good thing from those who diligently serve Him."

The celebration adjourned after many gratifying comments, and a healthy collection had been handed over to the committee for distribution. This meeting will be held each year on January 1, for the benefit and success of the needy and aged of the community.

AN OVERRATED CEREAL

Quincy Herald-Whig: Decidedly too much emphasis is being placed on wheat prices as factor in taking the country back to normal times.

As the New York Times gives the figures, 1,250,000 of our population are dependent upon wheat for their prosperity, 1,900,000 on cotton, 2,000,000 on dairy products 4,500,000 on corn and 4,850,000 on hogs. The figures do not list cattle but good tobacco prices can bring prosperity to only 400,000 souls.

What makes wheat the darling of our eyes when we discuss prosperity? One and a half times as many people make a living out of cotton and nearly twice as many gain their bread and butter from dairying.

Better hog prices mean more wealth for four times as many persons as better wheat prices. And combining corn and hogs, which is natural, there is eight times as much financial betterment bound up in hog prices than in wheat prices. Cotton has been said to be king and wheat is generally placed to outrank every other cereal, including the despised maize the Indians were raising when the white men invaded America. But corn and hogs, so far as this country is concerned, outstrip either or both of them as factors in material prosperity.

This may help explain the concern that is shown when wheat and corn prices move forward rapidly and hogs seem reluctant to advance. We are far from being a nation of corn and hog raisers but the figures indicate the important bearing they have on our welfare. Why longer bestow the kingly crown on wheat? Isn't it time wheat and cotton moved back-stage and permitted genuine prosperity-rousers to play the principal part?

SECRETARY STEWART GETS NEW HOME

40 Acre Homestead Costs Less than $20

Around two years ago, Tom Stewart, at that time a Mississippi sharecropper, applied for and received a homestead entry on forty acres of government land in Holmes county, near Mileston. Final ownership papers have just been received by Mr. Stewart and the entire cost to him was less than twenty dollars.

Tom Stewart was one of the first to join the National Federation of Colored Farmers and has always been a loyal industrious servant of the organization. In 1930 he was elected secretary of the Mississippi State Federation, which office he holds now. The national office first advised him to apply for his homestead and has assisted him in every way necessary. He has attended every convention of the Federation and last year won a valuable Planet Jr., plow as a premium for his exhibition of sorghum.

Mr. Stewart is planning on building a modern farm home on his acres. He has been a farmer all his life and he is a good one. He lives at home and boards at the same place. He told the convention last year that his total store bill for twelve months was less than five dollars. He has five cows, 14 hogs, and keeps plenty of chickens and a large garden growing winter and summer. His good wife is a sure-enough stand-by and they have lived happily ever afterwards. The proudest words he can say are "I owe no one anything, except friendship and goodwill.

The Modern Farmer congratulates Mr. and Mrs. Stewart and wish for them many years of comfort and happiness.

FAMOUS WRITER SPEAKS FOR SCOTTSBORO BOYS

George Antheil, who startled America by having a Negro orchestra with thirteen pianos, play his music at Carnegie Hall, several seasons ago, recently sent the following letter to the artists and writers Scottsboro committee at Carmel, Calif.

Mr. Antheil wrote:

"The Scottsboro case is a shameful and horrible thing!

Poetically, the Negro is among the highest of our citizens. It so happened that Puskin, the great Russian poet, was half Negro, and Russia has not wiped out his memory as we have wiped out the memory of Louis Moreau Gottschalk, mulatto, one of the greatest pianists of his age, and friend of Chopin .....and as it so happens one of our greatest composers of the last century. And so we continue with our imbecillic juries, prejudiced maron judges and if we so continue God help us...God help poetry....in these U. S. A.

"I pledge myself to contribute one score to the cause of this case."

GIVE MONEY FOR WARM SPRINGS

Chicago, Jan., (By the Associated Negro Press)—Chicago school children joined with their white classmates in contributing a small sum of their spare money for a collection that is to go for the betterment of the sanitarium in Warm Springs, Georgia, which President Roosevelt sponsors. This offering was taken up as sort of a present for the President's birthday.

WILL EMPLOY COLORED

Postal Telegraph Company's New Move

Race men and women are to be employed by the Postal Telegraph Company in Chicago, Illinois This statement reached Nashville last week from James E. Stamps, Commercial Representative of the Company, in which he said:

"As a representative of the Postal Telegraph-Cable Company, I am writing you soliciting your telegraph business

The Postal Telegraph-Cable Company has responded to a request that colored people be given employment by appointing me as a commercial representative. We are now at work building sufficient business to justify a branch office to be manned completely by colored men and women. You are, I am certain, sympathetic with this use of our buying power.

The liberal attitude of the officials of the Postal Telegraph on this matter leads me to feel that what we do in Chicago can be duplicated in many cities Will you not cooperate with us by using Postal Telegraph for your incoming and outgoing messages?

Thanking you for your interest in this connection, I am,

Yours very truly,

POSTAL TELEGRAPH-CABLE COMPANY.
J. E. STAMPS,
Commercial Representative.

A TALE OF TWO CITIES

(By The Associated Negro Press)

Atlanta, Ga, Feb.—Receiving the maximum sentence for robbery, Eugene Williamson, Negro purse-snatcher who is charged with having victimized 11 Atlanta women, was given 20 years on the chain gang on one indictment in Superior court Tuesday. Judge C. W. Worrill, presiding in the emergency division, gave the Negro a stern lecture when pronouncing sentence.—THE CONSTITUTION.

Chicago, Feb.—Howard S. Duncan of Hammond, former assistant treasurer of the Northern Indiana Public Service company who pleaded guilty at Crown Point to embezzling $132,000 from the company over a period of five years, Thursday received his sentence from Circuit Judge William J. Murray. He was ordered to pay a fine of $1 and costs, a total of $19.75. Judge Murray also sentenced Duncan to 2 to 14 years in the state penitentiary, but ordered the sentence suspended and paroled the defendant to the court bailiff. Duncan borrowed the $19.75 with which his defalcation was punished from his attorney, Joseph H. Conroy, and paid in full.

***Judge Murray said that he took full responsibility for granting the light sentence.—THE TRIBUNE.

OPTIMISTIC THOUGHT

Carnegie Puppet: They say that love is blind and that the home is an institution—therefore marriage must be an institution for the blind!

Kills Man Over Lead Pencil

St. Louis, Mo., Feb.—(By the Associated Negro Press)—An argument over a lead pencil caused the fatal shooting here of Sterling Fitzgerald, 45, by Will Davis, 35, who police say admitted the shooting when arrested about an hour later. Davis said he fired when Fitzgerald made several attempts to stab him. Witneses said the two quarreled over a lead pencil and Fitzgerald followed Davis to the back porch in answer to a challenge to "settle it outside." As Fitzgerald stepped out on the porch he was shot, witnesses said.

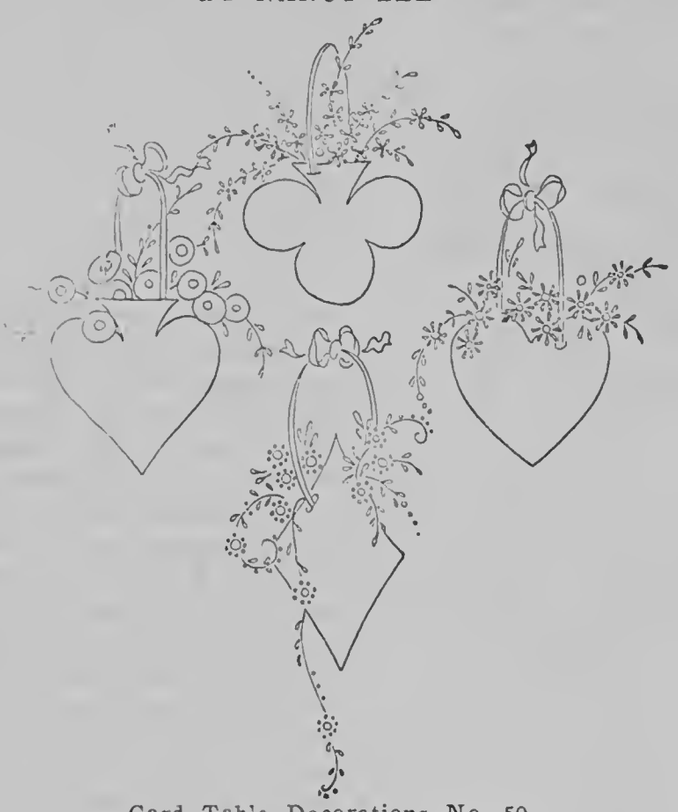
Head of Elementary Education Dept. Attends Hampton Conference

Mrs. Frances A. Sanders, head of the Elementary Education Department of A. and I. State College is one of ten persons attending a special conference at Hampton Institute to work out a series of summer courses to be given to rural elementary teachers in Southern States and teacher training institutions. The conference is being sponsored by the General Education Board and will consider a five-year program of teacher training work to be given in summer sessions

Representatives from seven Southern States will be in attendance from February 3-10.

NEEDLE ART NOVELTIES

BY NANCY LEE



Card Table Decorations No. 50

With summer entertaining ahead of us and those afternoon parties let's make some new "fix-in's" These designs are lovely for luncheon sets, bridge table covers, napkins and individual prizes, and they are suitable using any kind of materials, a card table cover being especially beautiful in black sateen embroidered in glossy silk floss in french knots and lazy daisy stitch for the flowers and an outline stitch for the card symbols.

An if we are clever with a paint brush, let's make up some things in oilcloth, and paint on our decorations—it's heaps of fun. Pattern contains this and several other suitable designs. This is pattern No. 50.

We have prepared a wonderful new 32 page Book showing over 90 newest needle work novelties, many in actual colors. The above pattern will be included free with each order for this Book which is 25c. Ask for Book "D" Single patterns are 10c each. Be sure to state pattern number wanted. Send order with coin to

Every Colored Farmer

SHOULD BE A MEMBER OF THE

The National Federation of Colored Farmers

ORGANIZED, JUNE 5, 1922
PROGRESSIVE, Not Radical!

INCORPORATED, NOVEMBER 19, 1930
SANE, NOT VISIONARY!

IF A FARM OWNER, TENANT, SHARECROPPER OR FARM HAND, YOU SHOULD JOIN THIS ORGANIZATION

It is the only national organization of colored farmers in America.
Its growth has been steady and substantial.
Its officers and leaders are men of experience and foresight.
It is non-partisan and non-secret.
Its actions speak louder than its words.
Its policies are sane, sound and progressive.
It teaches co-operative buying, production and marketing.
It is a builder of Negro farm communities.
It promotes the general interest of all its members.
It studies and investigates all agricultural problems.
It fosters the improvement of rural homes, and rural life.
Its members work together to accomplish what cannot be done individually.
It makes farm business more profitable.

Delegates to 1932 Annual Convention, N. F. C. F., Memphis, Tennessee.

The following are excerpts from letters on file in the national office:

"Through the N.F.C.F. we have been able to grow crops in Wisconsin that none thought could be grown here. We are planning for group cooperative farming next year since that is the only way we can get our people out of these northern cities back on the farms."

David Bassett,
Wisconsin Dirt Farmer.

"I have been with the N.F.C.F. more than five years, have traveled in every county in the Delta and have made a host of friends among both white and colored farmers. The N.F.C.F. makes colored farmers better farmers, better Christians, better citizens."

Rev. B. W. Byram.
Mississippi Farmer-Minister.

"The N.F.C.F. inspires the young Negro to turn back to the soil and again become a part of the backbone of the industries of the world, the industry of farming.'

Grace Wilson Evans,
Indiana Clubwoman.

"Nothing is needed among colored farmers in the state of Oklahoma as much as such an organization as the N.F.C.F."

Rev. J. D. Brown,
Oklahoma Farmer-Preacher.

"I joined the N.F.C.F. when we were having trouble trying to save our farm. Our National officers got busy and saved it for us. The N.F.C.F. is the greatest organization in the country for colored farmers."

R. H. Sanders,
Missouri Farmer and Stockman.

"Since joining the N.F.C.F. we have saved in our community from 25 to 40 per cent on the purchase price of farm and home supplies."

J. H. Tenholme,
Alabama Dirt Farmer.

"We have asked our field representative to make a special investigation regarding the distribution of relief in counties where there have been complaints.

National Officers, The American
Red Cross, Washington, D. C.

"Today I'm holding the deeds to 86 acres of land, one mile from railroad station, on good road, with good house, water and a fine growing crop. For this I am indebted to the N.F.C.F.

J. L. Lebeaux,
Louisiana Dirt Farmer.

"The N.F.C.F. has safe and sane leaders. There is nothing we will not do for the organization that has done so much for us."

L. T. Gartside,
Georgia Dirt Farmer.

"The N.F.C.F. is worth much to humanity in general and to our group in particular. Your officers are some of the most beneficial leaders of the times."

President of a Georgia Agricultural College.

"You may have the complete assurance that the bank wishes to encourage the sale of its land to any of the members of your Federation who are in a position to properly take care of farms and handle them in a workmanlike manner."

W. E. Clark, Land Dept.
Federal Land Bank of
New Orleans, La.

"I am favorably impressed with the objective of your Federation and I sincerely hope that you will be successful in cultivating among the colored people the mind to cultivate the soil and thus insure a happier existence than that which accompanies them in the overcrowded cities especially in periods like that through which we are passing."

Hon. Daniel C. Roper,
Secretary of Commerce.

"We expect to produce several cars of sweet potatoes cooperatively this year. We have received more help from the N.F.C.F. in two years than from any other organization in the past twenty years."

John Thomas,
North Carolina Dirt Farmer.

"By following our leader's instructions and raising less tobacco and more something to eat, I have kept out of debt during these hard times and am better off than I have ever been before."

William Millson,
Virginia Dirt Farmer.

"I am tired of talking organizations. The N. F. C. F. is a sure enough DOING organization."

T. L. Brackenburg,
Florida Dirt Farmer.

What the American Farm Bureau, the Grange and the Farmer's Union have done for the white farmers of this country, the National Federation of Colored Farmers can do for you. Your membership in the N.F.C.F. tells the world how good a farmer you really are. Join today!

A local unit in your community. If you have no unit, organize one. Write to the national office for all information.

CHALLENGE TO EDUCATED

(Continued from Page 1)

Hardship, depression and disadvantages are being met constantly with much fortitude, yet he seems to be losing ground in the single handed battle. The paramount issue which will illuminate his dismal future, is to organize for economic independence. The only way by which an unfortunate race may take its place and be recognized by other races is to organize intelligently for a definite purpose. It is up to the young educated Negro to contribute his share to perfect such an organization. Organization will not only open new doors of opportunity, but will brighten every walk of human activity. It will lend a helping hand to our boys and girls, men and women to become more useful citizens, so they will be qualified to render efficient service to their city, state and nation. Thusly developing a strong organization of citizens with understanding minds and co-operative in spirit, that they may achieve recognition in keeping with their ability and accomplishments . Three essentials which are necessary in putting this program over are, Faith, Courage and Perseverance.

CENSUS WILL BE TAKEN

(Continued from Page 1)

tion, repairs, or improvements provided interest rate is satisfactory and repayments can be distributed over a period of ten years?

"How much would you desire to borrow?

"What would you consider a satisfactory rate of interest?"

Improvements Are Listed

The nature of the work which the federal government contemplates financing was indicated by the following list, contained in the census questionnarie:

"House repairs and improvements, water system, sanitary facilities, lighting system, heating system, bathroom equipment, laundry facilities, cooking facilties, landscaping, electricity, built-in equipment and furnishings."

The questionnaire included a request for information as to which of these items the farmer would use the money on if he had $500, $250 or $100.

AGRICULTURAL INDIVIDUALISM

(Continued from Page 1)

set of agricultural customs that ever has been proposed seriously. No farmer could plant an acre of grain, buy a cow, or sell a pig without permission of a governmental agency.

Dairyman First

"The dairyman is likely to be the first dog on which public utility schemes will be tried. As everyone knows, cows have been making a vast deal of trouble in the United States lately. More cows are being milked than ever before. Too many cows and too much milk have been at the bottom of all sorts of turbulence. Milk marketing agreements have been undergoing violent attacks. The suggestion now is that some city, very likely Washington itself, should be made a testing ground for public utility milk control.

"With the secretary of agriculture himself bringing up the question, with three or four states experimenting with quashi, regulation, it begins to look as though ragged individualism in the industry might one of these days sink into history, and give way to the iron hand of right control on the public utility basis."

TERMED AS "BOLD EXPERIMENT"

(Continued from Page 1)

21 with the post-war depression. Industry recovered in 1922-23, but agriculture did not, partly because of the falling off of the export market and the high fixed charges, such as interest and taxes.

"But there were other reasons," he says. "The food habits of the nation were changing. Our annual consumption of cereals, for instance, declined nearly 100 pounds per capita between 1909 and 1930. Our rate of population increase had also slowed down. The number of months to feed was not increasing as fast as formerly.

"Moreover, farmers used more machine, less animal power. We have approximately 11,000,000 fewer horses and mules than we used 20 years ago. These vanished animals ate the product of about 15,000,000 acres of corn land, not to mention 20,000,000 acres of hay and oats land."

Agricultural adjustment for all these reasons, the survey states, has been a difficult process. Powerful forces let loose in agriculture can not be changed as easily as a factory can be shut down. Its production problems are unique Plant and animal biology and the care of the soil are involved. However, the farmers almost seemed to be succeeding in their quest for readjustment to the new situation when in 1929, the world-wide depression broke and agriculture suffered tremendously, its problems still unsolved.

"In the years before the World War," Dr. Bruner declares "the prices the farmer received and those he paid maintained a remarkably stable relationship. This relationship is referred to as pre-war parity, upon which much emphasis is laid in the Farm Act.

VALUABLE INFORMATION

(Continued from Page 1)

taching your part. However, if you wish to borrow from your banker or merchant on your claim you can do so.

These new government contracts require the signer to agree to rent to the government about forty per cent of his land and that all rented acres must be tillable land and represent a fair average of the acreage of any of the basic crops, such as corn, tobacco and etc., but you can increase your acreage for any crops and plant them on rented acres only for your own use on the farm.

Mr. Johnson further stated that farmers may use the rented land for soil improving crops or for food crops for own use on the farm and for feed crops for farm livestock.

Rental checks for the land will be mailed out in two payments—the first checks about April first and the remainding half by September 1st.

The new government contract also promises you a domestic allotment parity price premium of at least 1 cent per pound. This is to be in addition to the rental price. It is paid on cotton production and goes to the person who actually makes the cotton.

On a share-cropping agreement it goes to the tenant and landlord on the same basis on which the tenant pays his rent. This 1 cent per pound or more is to be paid next December. If you are a share cropper on a half basis you are entitled to and must receive one half and if you are share-cropping on a third, then you get two thirds of the domestic allotment money

The contracts for the 1933 cotton option pool plow-up cotton are now ready. The cotton which goes in the pool will give the farmer an advantage of four cents per pound. The contract also says that landlords must agree to allow those tenants who they cannot give cotton lands, to remain rent free in tenant houses, unless the tenant is a nuisance and said tenants must be allowed land free to make a family garden and in reason allow him the use of farming tools and work animals, and also fire wood. However the tenant is expected to pay in labor for tho use of the tools and stock but not for the land or house.

For signing these contracts the government agrees to pay 3 1-2 cents per pound average lint cotton on the rented acres which they sing up to be rented next year. Be sure to read this over carefully, and then not sign any contract unless you fully understand it. It is also wise for you not to begin work for 1934 unless you have a contract. If you are refused a contract, then write this office.

NEW METHOD FOR SECURING SEED LOANS, 1934

In the past small loans have been made through the crop production seed loan offices. It is said that the government wishes to get rid of this plan and put it on a different basis, and have all loans come through an association or organization. For full information along this line, write the home office and we will endeavor to explain fully.

If you plan applying for a seed and production loan in 1934 remember you must be in some kind of an association or organization.

APPLYING FOR LOANS TO PREVENT FORECLOSURE

All members who need loans on their farm lands or other property should apply to the representative in their county for a blank. If you are refused, write this office. If you have applied for a loan and was turned down, write all facts to this office at once and we will endeavor to help you get reconsideration. This is very important.

BE A MILLIONAIRE

Wrig'ey said—

"Tell 'em quick and tell 'em often. You must have a good product in the first place and something that people want, for it's easier to row downstream than up. Explain to folks plainly and sincerely what you have to sell, do it in as few words as possible, and keep everlastingly coming at them.

Application of from four to a dozen loads of manure an acre as top dressing on clover seeding will help hold moisture and may save a stand which otherwise would be lost, says J. A. Slipher of Ohio State university. The grain crop usually takes a good part of the available plant food, and the manure will give the clover some readily available plant food which also adds to the chances of getting through the first season. In the winter the manure will serve as a mulch to prevent winter killing. The chief causes of clover failures are lack of moisture and available plant food.

"Advertising is pretty much like running a furnace. You've got to keep on shoveling coal. Once you stop stoking the fire goes out."

BRAZIL'S COTTON

Brazil produces more cotton than any other Latin-American country, with an annual output of about 200,000,000 pounds.

A BIBLE STUDY COURSE

It is highly desirable to read the Bible through from Genesis to Revelation.

A cumulative knowledge of the Scriptures, so valuable in education, is secured and a true perspective of religious history and truth is obtained.

The portions that consist entirely of names and subject matter, wholly devoid of interest to the average reader, are omitted from the Study Course.

The Course is divided into thirty-six lessons and gives both the beginning and ending of each lesson; also the beginning and ending of passages or portions to be read.

Best Quality Thin Bible PAPER *Clear Black Superior* PRINTING *Durable Flexible* BINDING

THIS COMPLETE TEACHER'S BIBLE

Also contains the following 400 pages of New Copyrighted Helps by the most reliable Authorities

Treasury of Biblical Information

The latest compendium of essential things which every reader of the Bible needs to know, such as the Chronology of the Old and New Testaments, Tables of Money, Weights and Measures, Jewish Calendar, Table of Easter Days, etc., etc., all arranged in the most usable and attractive forms.

New Comparative Concordance

With nearly Fifty Thousand References.

New Illustrated Bible Dictionary

Self-Pronouncing, with nearly One Hundred and Fifty Pictures, containing more subjects than are given in the bulky Dictionaries.

Four Thousand Questions and Answers on the Bible A valuable help to all Bible readers.

Lincoln Unit of Charleston, Missouri Forges Ahead

MEMBERS PURCHASE OVER 841 ACRES

Plan Co-operative Buying and Production

Charleston, Mo.,—Organized colored farmers of Charleston Mo., Mississippi county, are not the kind who sit around and wait for the government, the banks, or merchants and landlords to do something for them. They believe in launching out and doing something for themselves. They proved this recently by contacting for the purchase of 841 acres of as good farm land as there is in this county, and the whole state of Missouri knows that Mississippi county land is extremely fertile. This acreage has been subdivided,—approximately thirty thrifty families have moved into the empty houses and are now busy repairing, cleaning up land,—opening ditches and getting ready to farm this year with a vengeance. Organization, cooperation and a remarkably fine leadership has revolutionized this community almost over night. These farmers are not singing the "blues." They are holding up their heads,—rolling up their sleeves and going to it.

Another tract of 240 acres is available and more members of Lincoln Unit, National Federation of Colored Farmers, are expecting to take possession of it this month. Members are cooperating in as fine a manner as farmers have ever been known to do in any country. Members who owned work animals have taken in as partners and helpers others who owned no stock so that all might be benefited. This action alone stands out as a shining example of real unselfish cooperation. But this is not all. The members of this unit have agreed

Florida Adds To Exhibit For Fair

Chicago.—Florida is coming back to the World's Fair of 1934 with $40,000 worth of addition to its last year's exhibit in the Hall of States, Earl W. Brown, manager of the exhibit, revealed. He signed the contract with Century of Progress officials February 20 and left immediately for De Land, Fla. to begin arrangements for the augmented displays.

Chief among the changes planned for the Florida exhibit is the conversion of last year's outdoor garden into a glass-covered conservatory of twice the size and fully air conditioned. This will make it possible to display many more growing Florida trees, plants and flowers and keep them in perfect condition regardless of weather conditions.

Tho Florida sponge boat will return to the Fair lagoon with a full cargo of new sea curiosities for the free marine museum, including a giant octopus and rare sea fans

COTTON GROWERS UNEASY

Man Power Being Displaced by Machinery

Reduction of cotton acreage has been far more beneficial to the big machine farmers of Texas and Oklahoma than to the small farmers of southeastern cotton states. Large planters of these states are smiling and their machines are resting and rusting. The machines don't have to eat, think, or provide for the future. In the southeastern states the small planters, tenants and sharecropers have accepted the plans of the Agricultural Adjustment Administration stoically, but are worried nevertheless.

(Continued on page 8)

Protest Inability To Get Farm Loans

Many Applications From Colored Farmers Turned Down

Chicago, Ill.—The National Federation of Colored Farmers, Inc., is receiving many letters daily from farmers and their relatives in both northern and southern sections of the country, complaining, bitterly about the failure of the Farm Administration to grant loans. Colored farmers are losing many farms on account of their inability to get loans for refinancing purposes and to pay taxes. Various reasons are given by officials for turning down applications, some of which appear to be of little importance. Several loans reported refused were applied for on farms in the Mississippi Delta section and were not made because the farms were located in certain drainage districts. The Federation has received that certain white farmers living in these same districts have obtained loans and is now investigating these reports to determine whether or not they are correct.

One letter received telling of a farmer in a northern state, owner of a forty acre fruit farm, who was informed that even if the loan was granted it would be impossible for him to keep up his payments and support his family also. It happens that this farmer is unmarried and has no family to support. A woman who owns a fine 100 acre farm in Georgia, located on a hard road requested a loan of $3,000. The buildings alone on her place are well worth this amount. She was offered $1,000 which was not enough to pay off the first mortgage debt. Scores of Mississippi farmers whose farms are clear of mortgage indebtedness have requested loans to pay their taxes. In nearly all cases, for one reason or another, the loans have been refused.

Colored farmers are beginning to think there is little chance for them to get credit from the farm credit administration and many are now trying to get loans

(Continued on Page 5)

REPORTS PROGRESS

Cotton Bunching and Listing Machine Proving its Worth in Practical Way

Chicago, Ill.,—The National Federation of Colored Farmers announced the latter part of February that a prominent American manufacturer was investigating the possibilities of the cotton bunching and listing machine invented and patented by Milus Sutton of Elko, Georgia, a dirt farmer and member of the Federation. This manufacturer believes that the implement is so well designed that it will practically do away with the labor of cotton chopping and will prove a boon to the cotton and peanut farmer. Engineers are now working on plans and specifications and it is hoped that the first working model will be on exhibition in a few months.

At the last Annual Convention of the National Federation of Colored Farmers a small model of Mr. Sutton's implement was exhibited. Delegates and visitors alike were surprised to note the simplicity of construction and many prophesied that it would prove to be the best and most useful asset to cotton cultivation invention since the cotton gin. The delegates were more than happy when Pres. Davis announced that Mr. Sutton had proposed that the Federation supervise manufacture, sale and distribution of his machine. A committee was immediately appointed and the following resolution was submitted and approved.

"We your Committee on planning for disposal of the Sutton cotton bunching and listing machine, invented by Milus Sutton, Elko, Ga. a loyal member of our Federation, submit this resolution:

Be it

Resolved, by the National Federation of Colored Farmers, Inc., in Convention assembled at Memphis, Tenn., October 27, 1933 that we favor the proposal that this machine be manufactured, sold and distributed directly by our organization.

Resolved further, that we instruct our national officers to take steps immediately to see that this proposal is carried out.

Resolved further, that we express our commendation to Mr. Sutton, inventor, and our appreciation of his offer to give our organization rights and privileges with his patent, which are certain to prove to be very beneficial to our organization and to all colored farmers."

DuBois Unit, N. F. C. F., To Have Supply Store

DuBois Unit, National Federation, located in the Sandusky, Ill., community, held a rousing meeting recently and made plans to open a general supply store for the benefit of members. Farmers will buy cooperatively and expect to save from 30 to 60 per cent on purchase price of home and farm supplies.

The American Red Cross Or Big Bad Wolf

FARMERS' SUNDAY

April Twenty-ninth Set Apart by President

The National Federation of Colored Farmers requests all units of the organization to observe Farmers' Sunday this year and President Davis has issued his proclamation setting apart Sunday, April 29th, as the day. The proclamation and a suggested program appear in this issue.

The N. F. C. F. originated Farmers' Sunday and units of our organization were first to observe it. It is hoped that all units will heed the proclamation and will make the day one long to be remembered. This should be a great day for the cause of organization of colored farmers throughout the nation.

To Help Distressed Rural Families

New Unemployment Program May Help Landless Colored Farmers

President Roosevelt's new unemployment program, made public at the White House the latter part of February, offers some encouragement for the thousands of Negro tenant farmers of the cotton and tobacco belts who will be able to farm this year on account of crop acreage reduction. The program relative to help for distressed rural families is as follows:

"The care of needy persons in rural areas is a problem quite distinct and apart from that of the industrial unemployed. Their security must be identified with agriculture. They must be placed in positions of self-support. In many parts of the country this calls for a change from commercial farming and dependence upon a single cash crop to the raising of the various commodities needed to maintain the families.

For Self-Support

"Relief funds, therefore, will be expended on behalf of rural families in a manner and to an extent that will enable them to achieve self-support. Work for wages from relief funds is not an essential part of this phase of the program and will be provided only insofar as it is necessary to accomplish the primary objectives. No encouragement of an extension of competitive farming is contemplated, but rather the placing of thousands of persons, who have made their living from agriculture, into a relationship with the soil that will provide them a security they do not now enjoy.

"Some of the methods to be employed include building or rebuilding, to provide adequate farm homes; the provision of deed, and of stock for other than commercial purposes, and opportunities to these workers to earn modest cash incomes through part time or seasonal employment in small industrial enterprises. There should also be a planned distribution of

COLORED FARMERS IN MUCH DISTRESS

Claim Being Made that Group is Being Discriminated Against

Chicago, Ill.,—The following letter received from Florence, Miss., is one of many such letters coming to the National Federation of Colored Farmers and to the editor of this paper, complaining about the treatment Race farmers are receiving from the Red Cross and Federal relief agencies in many sections. The letter follows:

"Please send me the address of the Federal Emergency Relief Administrator at Washington, D. C. Do this for me for the sake of the poor colored people in Mississippi are being put behind with everything, the government has given. We can't get any work, neither can we get any meat, flour, butter, eggs or anything that has been appropriated for the needy. The flour is here at Florence, Miss., and some of the colored people have gone every day last week and the white people won't give the Negro work nor flour. The white people are doing the Negro terrible. The white lady comes around to your home to see what the Negro needs and that is all. She gets her eight dollars a day and that is all. And the colored people are just here.

"I WROTE THE RED CROSS LAST YEAR AND THIS HEAD CHAPTER HERE ORDERED ME NOT TO DO SO ANY MORE, SO I WANT TO SEE IF I CAN GET WRITTEN AUTHORITY TO ASK

(Continued on Page 5)

New Fair's Flower Show Surpasses '33

Chicago. — Promising a horticulture exhibit of proportions that will dwarf the flower show at the 1933 World's Fair, the Society of American Florists has contracted for the largest concession on the grounds of A Century of Progress Exposition from a syndicate headed by Samuel A. Ettelson.

With George Asmus, of the Schiller flower shop, Chicago, one of the greatest showmen in the world of flowers, in charge and all of the florists of the country contributing the best of their produce, a continuous flower show larger and better than last year "from the word go," will result .

Something of the same plan was attempted last year, but without the tremendous resources available in 1934 under the new organization. Success shoud be assured this year with all of the country's florists lending a hand.

The gardens outside the Horticulture building will be improved and maintained again this year, but the main attraction will be the continuous horticulture show. As during last year, there will be a cafe for the convenience of visitors to the show.

Interesting News And Notes

Lane College, Jackson, Tenn., is preparing to celebrate the 100th anniversary of its founder, Bishop Isaac Lane. It will also be the 52nd anniversary of the college. Bishop Lane is yet alive and a banquet will be held in his honor. Gov. McAllister, Mayor Taylor, President Tigrett of the G. M. and N. railroad and other prominent individuals will deliver addresses during the celebration.

More than 17,000 southern white women have signed a pledge to fight the lynching evil. Von Sholtz of Florida assured a committee of the Association of Southern Women for the Prevention of Lynching that if given two hours warning he would see to it that no lynching took place in that state.

Salem Tutt Whitney, "Noah," of the Green Pastures,—and one of the most prominent Negro actors in the country, is dead. Some of the most outstanding characters in the nation paid tribute to him. Mr. Whitney was a staunch friend of the Federation of Colored Farmers.

More meat was eaten in the United States in 1933 than any other year on record, according to the American Meat Packers Institute. Meat also sold cheaper than usual and farmers received less for livestock. The meat packing industry is employing more men than in 1929 and payrolls are about 90 per cent of that year's level.

The Bankhead bill to make reduction of cotton acreage compulsory has the support of Pres. Roosevelt and is expected to be passed by Congress. It is believed by many authorities that the courts will declare if unconstitutional.

Frederick C. Blake was sentenced to serve a month in jail in Southampton, England for kicking a pig.

A special Mother's Day stamp will be issued this year by the P. O. Department: Mother's Day is Sunday, May 13th.

Farmers near Morgantown, N. C., have planted 400 acres of raspberries hoping to find a new cash crop. Colored farmers of central North Carolina should plant several hundred acres of dewberries. Dewberries sell well when people discover how good they are.

The first Thanksgiving Day in America was observed February 22, 1631. Invited Indian guests brought the Massachusetts colonists some pop corn. This was the first pop corn ever known to white men.

Tomatoes were once thought to be poisonous and were only raised to look at.

Needy college students will be assisted by federal relief funds. Students assisted will be required to perform work required by the colleges they attend. Assistance will average $15 per month. The money must be evenly divided between boys and girls and only 10 per cent of full time student body in a college can get this aid. Needy colored students should write to the college they desire to attend for information concerning this aid.

Excavations in Indian Mounds near Macon, Georgia, proved that Indians used corncobs for fuel the same as western farmers do today. Log huts, stone fireplaces and charred corncobs were discovered.

The State Forester of Mississippi says that more than a million acres in that state have been ruined by erosion resulting from bad farming practices and forest fires.

In spite of severe weather in the eastern half of the U. S., this winter on the average it has been much warmer than normal. December and January were warm months and February was warm in the western part of the country.

"Lindbergh," a rooster hatched without wings, will be killed soon to be studied by scientists who desire to know how and why he was hatched wingless. He is the first bird on record known to live and grow up in such a condition.

There are 490 colored farmers in the state of West Virginia, a decrease of 14 in the past ten years. 372 are full owners. Value of land and buildings owned is $832,553.

Union labor organizers are determined to organize all workers in southern states, including farm laborers. It is planned to include colored sharecroppers and farm hands in the organizations.

WHITE FRIENDS SAY MISS BYRD DID NOT ACT DISORDERLY IN SENATE

Washington—(CNS)—The story that Miss Mabel Byrd was ejected from the public restaurant of the Senate because she was disorderly has been declared by eye-witnesses as "absolutely untrue."

When Miss Byrd entered the dining room she was accompanied by three white persons, Miss Sears, commissioner of Cook County, Illinois; Trevor Bowen and Mrs. Clara Paul Paige, supervisor of the department of public welfare of Cook County. When the "disorderly conduct" story was read by Miss Sears she at once expressed surprise that it should have been made and more surprised that a colored newspaper should have given any credence to it.

"That is absolutely untrue, she asserted. "Miss Byrd and Mrs. Paige reached the door of the dining room ahead of Mr. Bowen and myself, looking for a table. A waitress approached and asked Mrs. Paige, in the presence of Miss Byrd, if Miss Byrd was colored.

"When told that she was, the waitress said that she could not eat there. We all protested against that. Shortly, a plainclothes man approached and supported the stand taken by the waitress. I asked him who his superior officer was and immediately sought this person in the guardroom. In the meantime, uniformed men came and seized Miss Byrd. She did not curse, but rightfully told them not to touch her inasmuch as she had committed no crime and had created no disturbance, any more than anyone else in the party of four. Miss Sears said that she had explained the incident to Senator Arthur Capper in the presence of Congressman DePriest."

FIFTEEN HUNDRED DOLLARS RAISED

Ninth Street Branch "Y" In Cincinnati, Ohio sets Good Record

Cincinnati, Ohio, (Special)—"Over the top" was the word passed around here last week by the membership drive and financial effort on the part of the leaders of the Ninth Street Branch of the Y. M. C. A. The general chairman, Rev. Wilbur A. Page, D. D., pastor of the Union Baptist church, this city, led his force to their set goal. When the returns were all in it showed that they had enrolled 576 new members to boost the Y. work, and that the cash receipts on the campaign were $1528.00.

They celebrated their closing campaign with a victory dinner at which all of the participants and workers were present.

Professor Lectures on "Nonsense as a Fine Art"

Baltimore, Md.—On Tuesday, Mar 6, Professor P. M. Wheeler, Johns Hopkins University, gave his second lecture on "Nonsense as a Fine Art" at the weekly chapel services. Professor Wheeler traced the history of nonsense in Literature, and rendered excerpts from the best known nonsense poetry.

In conclusion, Professor Wheeler informed the student body that one of nature's greatest gifts is a sense of non-sense, and this trait should be developed in everyone.

NEEDLE ART NOVELTIES

By Nancy Lee

Baby Pillow No. 120

How about that new Baby? Let's make a pillow as a gift for this precious arrival! And every time he wakes up, he will find his little pal looking up at him with his odd smile. It's easily and quickly made of white Lawn for the face, and white or light colored organdy for the ruffles—requiring but a few minutes to cut it out and make the outline stitches required—then sew up the seams—and the problem is solved as to a present for wee Master Paul. Don't you think it's heaps of fun to get together and sew to our heart's content making all these things we are showing you from day to day? This pattern contains cutting chart and full instructions. This is pattern No. 120.

We have prepared a wonderful new 32 page Book showing over 90 newest needle work novelties, many in actual colors. The above pattern will be included free with each order for this Book which is 25c. Ask for Book "D" Single patterns are 10c each. Be sure to state pattern number wanted. Send order with coin to

Sunday School Congress Sessions

NORFOLK, VIRGINIA

June 6th to 11th, 1934

No better education can be had than the one you acquire yourself. We learn to do by doing. Come to Norfolk June sixth to the eleventh and start to work. We are doing our part to indoctrinate this present as well as coming generations. Will you do yours? Here are some of the Departments and Sections of the Congress with daily sessions.

Bible Conference
Home Department
Teacher Training Department
Senior Teachers' Department
Advanced Teachers' Department
Primary Department
Junior Department
B. Y. P. U. Department
Superintendents' Department
Boy Cadet Department
Music Department
Ministerial Department
Missionary Department
Metoka and Galeda Department

Railroad rates to this meeting will be very low.

TRAVEL BY TRAIN TO NORFOLK, VA.

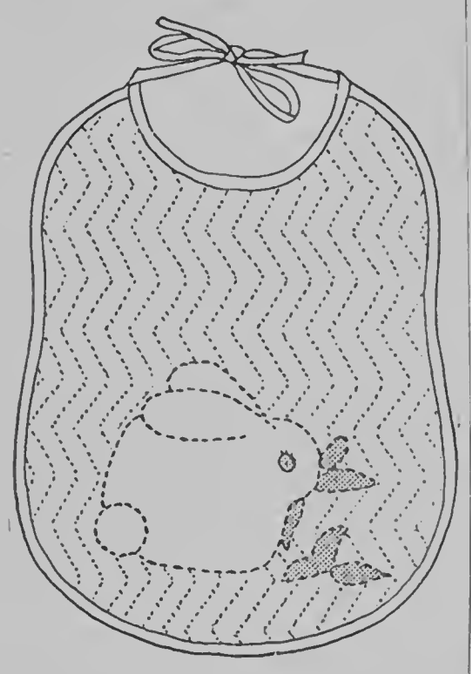
Needle Art Novelties

By Nancy Lee



COVERALL BIB No. 104

A great big "Coverall" Bib! Now that we can purchase this quilted material in all the dainty colors—also white—at our department stores at very small cost per yard—it will be easy to make several of these charming bibs—binding them with either bias binding—or ribbon, using the same material for the ties—trace on our "bunny pattern" and applique his one good eye and his lettuce leaves in any colored patches we desire—and finish the whole design with the darning stitch. Twisted or rope embroidery floss will show up to greater advantage on this padded material—rather than the six stranded flosses we use in most embroidery designs! Pattern contains this and several other suitable designs. This is pattern No. 104.

We have prepared a wonderful new 32-page Book showing over 90 newest needle work novelties, many in actual colors. The above pattern will be included free with each order for this Book which is 25 cents. Ask for Book "D". Single patterns are 10c each. Be sure to state pattern number wanted. Send order with coin to....

NEEDLEART DEPT., S. B. W.

WHEAT SURPLUS IS LOWER; SHIPMENTS ALSO ARE REDUCED

A reduction of about 175,000,000 bushels of wheat available for export or carryover in the United States, Canada, Argentina and Australia, together with United Kingdom port stocks and quantities afloat, as of January 1 this year compared with January 1 a year ago, is estimated by the bureau of agricultural economics in its current report on world wheat prospects. The revised estimate for Jan. 1, 1933, is 1,082,000,000 bushel whereas present estimates of the surplus as of Jan. 1, 1934, indicate a total of 907,000,000 bushels.

The bureau says that "while the estimates of the surplus may be changed by revisions of crop estimates, particularly in southern hemisphere countries the difference is substantial enough to be very significant." The surplus of wheat available for export or for carrying over in the Danube basin was about 35,000,000 bushels on Jan. 1, 1934, whereas practically no wheat was available as of the corresponding date a year earlier.

Total shipments of wheat thus far this season from the principal exporting countries have fallen considerably short of last year's total for the corresponding period says the bureau. From July 1 to January 1, shipments were approximately 260,000,000 bushels compared with 283,000,000 bushels during the corresponding period of last year. Shipments during the second half of the crop year are expected to be somewhat smaller than they were last year.

Preliminary reports from twelve countries which include about 40 percent of the wheat area of the northern hemisphere outside Russia and China, indicate a slight reduction of wheat sowings for the 1934 crop.

CWA IN MISSISSIPPI

Cedar Rapids Gazette: A local man, just back from a southern trip that took him into several states acquired a few stories while on tour that are worth hearing. Here's one of them:

At a railroad station in a Mississippi village he struck up a conversation with the station master, asked him whether conditions were showing any improvement.

"Yeah," was the reply. "A lot of the boys are workin' who never worked befoah in their lives. That is, they're leanin' on picks and shovels for the CWA. Do you see that niggah over theah? His family belonged to mah family befoah the Civil wah.

"Well, he was in heah just a little bit ago, and he asked me, 'Boss, does you-all know what a political job is?' Ah said Ah wasn't right shuah, and he said. 'Well, boss, a political job heah is three white men gettin' a dollah an houah apiece to watch ten niggahs and keep tellin' 'em not to work too hard.' "

$1,000 HOMESTEADS EXEMPTED FROM TAX

MISSISSIPPI HOUSE GIVES RELIEF TO HOME OWNERS

By Kenneth Toler
Commercial Appeal Staff Correspondent.

Jackson, Miss., Feb. 1.—Long delay relief to the home and farm owners was voted by the House today in a bill exempting homesteads of $1,000 assessed valuation or farms containing not more than 40 acres from the state property tax.

While the relief is more or less a "teaser," it furnishes the first property tax reducton to these taxpayers in years, and opens the way for the eventual elimination of the property tax for state purposes.

Approve Sales Tax

With this branch of the Legislature busy voting tax relief, the Senate busied itself with tax matters, approving the two per cent budget balancing sales tax and the 20 per cent tobacco tax.

Senate passage of the sales tax came after proponents of the $5-600,000 tax source agreed to reinstate in the original measure the $1,200 exemption granted to retailers, as proposed by Senator Adams of Corinth. Elimination of this section from the bill when it was considered last week caused its defeat. Mindful of this stumbling block, Chairman Kyle of the finance committee, when he secured reconsideration of the measure, agreed to accept the Adams amendment.

Only a few changes were made in the sales tax bill as compared to its form appproved in 1932. The measurt remains an emergency feature, with automatic repeal June, 1936; person securing their exempt; retail milk dealers are income from personal service are subject to a one per cent instead of two per cent, and feed and feedstuff manufacturers were placed in the one-eighth of one per cent class instead of one-fourth of one per cent group.

Loss of 900,000

Insertion of the $1,200 exemption provision will mean the loss of -900,000 in revenue during the biennium. While the clause does not exempt sales up to this amount from the tax, it permits merchants to retain taxes paid on the first $1,200 as a remuneration for collecting the sales tax.

No changes were made in the $2,000,000 tobacco tax measure, with the proposed committee amendments to tax chewing tobacco and snuff withdrawn for a loss of $275,000 in revenue.

RAILWAY PASSENGER SERVICE IMPROVED; COST IS DECREASED

"In view of the continued dependence of the public on the railways for passenger transportation, in spite of the rapid advances made in highway and air tansportation, it is gratifying to note that steady strides have been and are being made, despite unfavorable business conditions, to accelerate and otherwise improve railway passenger service," says the Railway Age in a current editorial. The extent of the continued improvement in speed is indicated in the following table, which shows the fastest train schedules between important cities chosen at random, January, 1934, being compared with the same month of 1929, before the advent of the depression.

The table shows fastest time schedule in 1929, fastest schedule in 1934 and the reduction in elapsed time:

New York-Boston, 5 hours 10 minutes; 4 hours 45 minutes; 8 per cent.

New York-Pittsburgh, 9 hours 18 minutes: 8 hours 59 minutes; 3 percent.

New York Washington, 4 hours 40 minutes; 4 hours 15 minutes; 9 percent.

New York-Montreal, 10 hours; 9 hours 35 minutes; 4 percent.

New York-Miami, 35 hours 45 minutes; 28 hours; 22 percent.

New York-Chicago, 20 hours; 17 hours 15 minutes; 11 percent.

Chicago-Los Angeles, 63 hours; 56 hours; 11 percent.

Chicago-Seattle, 68 hours; 59 hours 15 minutes; 13 percent.

Chicago-San Francisco, 63 hours; 60 hours 55 minutes; 3 percent.

Chicago-Montreal, 22 hours 25 minutes; 18 hours, 10 minutes; 19 percent.

St. Louis- Dallas, 18 hours 25 minutes; 17 hours 45 minutes; 4 percent.

St. Louis-Kansas City, 7 hours 28 minutes; 7 hours 6 minutes; 5 percent.

Washington-Detroit, 17 hours 50 minutes; 16 hours 15 minutes; 9 percent.

San Francisco-Portland, 21 hours 55 minutes; 21 hours 35 minutes; 2 percent.

Cincinnati-St. Louis, 8 hours 30 minutes; 7 hours 30 minutes; 12 percent.

Richmond-Cincinnati, 17 hours 10 minutes; 14 hours 24 minutes; 16 percent.

FARM PRICES FAR SHORT OF AAA OBJECTIVE

Wheat and corn prices still have to advance about 20 cents a bushel before they will approximate the level desired by the agricultural adjustment administration. It is estimated that another advance of about 1 cent a pound will put cotton about on a parity with the July, 1910'14, price and hog prices will have to be nearly doubled to gain he objective.

According to the bureau of agricultural economics the average price paid farmers for wheat on Jan. 15 was 69.4 cents, or 19 cents below parity. Since the figures for the country were compiled on Jan. 15 there has been relatively little change in grain prices, but cotton has moved up nearly 3-4 cents a pound and hogs are up $1 per 100 pounds at Chicago. Comparative prices representing those paid to farmers at country loading points, which are materially below those prevailing at terminal markets, follow:

	Jan. 15, 1934	Dec. 15, 1933	Jan. 15, 1933	AAA objective
Wheat, bu.	69.4c	7.3c	32.9c	88.4c
Corn bu	..43.9c	42.0c	19.1c	64.2c
Oats, bu	...32.5c	31.4c	13.4c	39.9c
Rye, bu	...53.6c	51.9c	22.7c	72.0c
Barley, bu	.43.7c	40.6c	18.4c	61.9c
Cotton lb	..10.3c	9.6c	5.6c	12.4c
Hogs cwt	..$3.06	$2.92	$2.68	$7.22
Cattle cwt	...3.83	3.12	3.28	5.21

THE MODERN FARMER

Official organ of the National Federation of Colored Farmers, Inc.

Leon R. Harris - - Editor

Published monthly by the Modern Farmer at Nashville, Tennessee.

Office, 447 4th Avenue, North.

Devoted to the interests of the Farmer, Truck Gardener, Livestock and Poultry Breeder, the Home and the People.

Entered as Second Class Matter, April 10, 1929, at the Post Office at Nashville, Tenn., under act of March 3, 1879.

All contributions for publication in the Modern Farmer should be addressed to The Modern Farmer, 447 4th Avenue, North, Nashville, Tenn.

No libelous matter will be published. Unsigned articles or letters, and those written on both sides of the paper will not be used.

Subscription price $1.00 per year, 75c for six months, payable in advance. Personal checks must be certified. Make all checks or money orders payable to The Modern Farmer.

Advertising rates and sworn circulation figures presented upon application.

"OUR SLOGAN"

STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT.

OUR PLATFORM

1. A Unit of the National Federation of Colored Farmers in every community. of colored farmers.
2. Co-operative buying, producing and marketing.
3. Every colored farmer a farm owner.
4. Abolition of debt-slavery, injustice and persecution.
5. A written contract for every colored farm tenant and sharecropper.
6. Better rural churches, schools and homes.

Editorials

FROM THE BIBLE—

"He causeth the grass to grow for the cattle, and herb for the service of man: that he may bring forth food out of the earth."—Psalm 104: 14.

"He prayeth best, who loveth best
All things both great and small;
For the dear God who loveth us,
He made and loveth all,
—Samuel Taylor Coleridge.

THIS MEANS ALL FARMERS

When President Roosevelt signed the bill providing forty million dollars for crop production loans this year he said in substance that he hoped it would be the last one of the kind necessary. Farmers have repaid only 73 per cent of last year's loan and the President thinks it bad business to take government money provided by the tax payers and loan it to farmers who cannot or will not pay it back. It is evident that from now on farmers will have to do a lot of thinking and looking out for themselves.

The President seems to be willing and anxious to do all he can to help the down-and-out but he has little sympathy for those who have something to do with but who are too thoughtless, careless or lazy to make ends meet. We believe farm prosperity is going to return. When we had it before it bred extravagance and waste. When it does return we surely should know how to treat it and take care of it.

Colored farmers who purchased farms between the years 1870 and 1910 were more thrifty, energetic and hard-thinking than those who have bought during the past twenty years. They knew the value of a dollar— believed in paying their debts and in keeping out of debt,—raised plenty of something to eat,—supported their churches and schools,—and did not try to live as well or better than their richer neighbor white farmer. They paid for their farms,—kept them and improved them, and enjoyed living on them. They willed them to their children and grandchildren who, in many instances, have sold them for a song or an antomobile and gone to the cities.

We warn all colored farmers this year to plan well and manage well, get out of debt and save enough to carry them through next year without having to borrow a dollar from the government or from any individual or institution. If you have ever used your head,—this is the year you should use it. Join the unit of the N. F. C. F. in your community. If you have no unit, then organize one, so you and your neighbor farmers can practice cooperation and earn and save together. Raise and preserve plenty of food for yourself and family and plenty of feed for your stock. Have enough cows, hogs and chickens, —not scrubs, but good ones. Read agricultural papers and bulletins and keep informed. When in doubt, seek advice. Imitate the methods of your most successful farmer-neighbors. Be industrious, frugal and careful. If you have a farm and a chance to make a crop, do your best and next year this time you will be able to stand up like a man.— look the world in the face and won't have to be begging the government, the bank or landlord for anything.

LANDLORD AND TENANT COOPEPATION

In a township in northern Iowa all the landlords and tenant farmers got together in a meeting the other day and frankly discussed the question of "Relationship of Farm Owner to Tenant." It was brought out that of the 200 farms in the township, only 60 were operated by their owners. Most of the landlords were present however, although some of them didn't know what it was all about until they got to the meeting.

Some of the points brought out were these:—that tenants were entitled to good honest houses and a living: that landlords should not expect more than the tenant can produce: that the landlord should not think and act like he owned the tenant as well as the farm: that the landlord should forget the tenant idea and should look at it as a partnership affair: that tenants should keep fences and buildings in good repair: that a little praise from the landlord will help the tenant a lot and give him an incentive to do more; that both landlord and tenant should talk things over when difficulties arise and both should follow the Golden Rule.

We have not heard of such a meeting being held anywhere in the cotton belt but believe a few of them would do a lot of good.

SOME NERVE

A letter from Shannon, Miss., informs us that white women in that community are serving lunches to Negro children in the Negro school and are being paid 30 cents an hour for the labor required in cooking and preparing the meals. We suppose all the colored women in Shannon are so wealthy and prosperous they don't have to work and don't need any of the CWA money. Or probably they are serving meals to the white children at 15 cents per hour.

We don't blame the poor women for taking the job,— we suppose they needed it. But we would like to have the photo of the official who hired them to perform such service. He has some nerve.

ABOUT DOGS

One of the best known dog exports in the country says that the market for good dogs has not suffered much during the depression and that there is still plenty of room for good dogs in all sections. He says that small dogs like the Scottie, Pekingese, Cairn and Sealyham are most popular. Some of these dogs are worth hundreds of dollars.

North Carolina farmers are buying mules cooperatively in carload lots. It is reported they are saving about $50 per mule. This is fine. Colored farmers of this state have been slow organizing but are bound to make a big noise when once they get started right. Our farmers in that state are progressive.

Illinois and Missouri units of the N. F. C. F. have completed cooperative production plans for 1934. Some units in Mississippi and Arkansas have also reported.

Ask your neighbor if he reads the MODERN FARMER. If he does not, persuade him to subscribe. The Modern Farmer merits the support of every colored farmer in the nation.

"An old ox makes a straight furrow."

"You can do more with five minutes now than with a thousand years after you are dead."

Prepare for Farmer's Sunday. Prepare a good program and invite your city and town friends."

Has your landlord given you a written contract? If he has not, ask him for it. If he will not,— better watch him.

Hundreds of colored farmers who are surrounded by "no good dogs" had better take this tip and decide to raise a few dogs worth raising. We believe every farm should have its dog but we have never been able to understand how a farmer can afford to feed ten dogs who claims he is too poor to feed enough hogs, cows or chickens.

DON'T WANT "NEW DEAL" AROUND PROCTOR, ARK.

Negro Tenants To Be Robbed as Usual

According to letters received by the National Federation of Colored Farmers from Proctor and other communities in that section of Arkansas, some landlords are refusing to sign contracts designed by the government for reduction of cotton acreage and are telling renters and sharecroppers they will permit them to farm on the old basis. They are opposed to the New Deal.

As usual, renters will not be given written contracts. They will be promised a third or fourth of the crop they make but will receive just what the landlord is disposed to give them. The landlord will handle selling of all cotton and seed. The landlord promised to allow each tenant approximately $80 to make the crop and charges them 25 per cent interest. If they need any extra money to pay for picking the crop they can get this at 10 per cent interest.

Many renters are destitute and will have to accept the landlord's terms unless the federal government intervenes. Many of them are now appealing to the National Federation of Colored Farmers to assist them in getting away from this section and the organization is endeavoring to find favorable locations for the better tenants.

DR. HUNT TO ADVISE NEGRO FARMERS

H. A. Hunt, principal of the Fort Valley Normal and Industrial School of Fort Valley, Georgia, has been employed by the Farm Credit Administration to direct a service of information and advice to Negro farmers. In making this announcement, Henry Morgenthau, Jr., Governor of the Farm Credit Administration said that Mr. Hunt would begin immediately an educational campaign to acquaint Negro farmers with the loan facilities offered by Government credit agencies.

"Negro farmers are equally eligible with white farmers," said Mr. Morgenthau, "to become members of loan and credit associations through which they may obtain individual loans from Government credit agencies, or to join cooperative marketing association which may obtain loans to further their operations. Since a large proportion of Negro farmers in the South are tenants, a major part of Mr. Hunt's work will be in instructing them in how they may obtain production loans through production credit associations. We have just begun organizing this new form of farm credit and we regard it as important in the interest of general progress here as well as from the standpoint of the welfare of the Negro population that a special effort should be carried on to cause the new system to be thoroughly understood by the Negro farmers."

Mr. Hunt's headquarters will be in Washington, but he is expected to devote a large part of his time to field work. A veteran Negro educator, he has been for 29 years principal of the Fort Valley School which he has developed into one of the most widely known of Negro educational institutions. He is a graduate of the University of Atlanta. In the summer of 1931 he made a special study of farm cooperatives in Denmark and the Danish folk high school movement for adult education.

POPULATION ONLY CERTAIN FACTOR

BUT NO INCREASE IN ACREAGE FOR CROPS WILL BE NEEDED, SAYS ECONOMIST

"Of all the factors that influence the future need for farm land, only one can be measured with any precision, and that is the population of this nation," asserts Dr. O. E. Baker, economist of the department of agriculture.

"It is practically certain," says Dr. Baker, "that between now and Jan. 1, 1940, the increase of population will be 3 to 5 million, and between 1940 and 1950 it may increased by as much more.

"At 3 acres of crops harvested per person, this means that 9 to 15 million more acres of crops would be needed by 1940, and 18 to 30 million acres by 1950 than are required for our present population, other factors remaining equal. The present requirement, however, is much less than the acreage now in cultivation. Hence, no net increase in acreage devoted to crops may be necessary.

"Should the diet shift from animal products toward more cereals or sugar, or should exports of farm products decline further," he continued. "less land would be needed than would otherwise be required. However, per capita consumption of farm products considered as a whole, has changed very little during a third of a century, and it appears that a new level in exports of farm products has almost been reached.

"Whatever net change may occur in the crop acreage necessary to supply our requirements for domestic consumption and exports, many millions of acres of land will go out of use for crops in certain regions because of physical and economic disadvantages and many millions of acres of land into use for crops in other regions."

Discussing "the poor land program," Dr. Baker said that "the proposal to purchase poor land, sometimes called submarginal land, is in accord with the trend of declining crop acreage in the originally forested in eastern and southern portions of the United States, during the decade 1920 to 1930." He said: "I believe in the poor or submarginal land program because there are millions of farm people whose land is capable of maintaining only a meager standard of living; because the poor land program will conserve natural as well as human resources: and because the program will in many places help to reduce taxation. The subsistence homesteads policy also deserves support because it will benefit both city people and farmers."

APRIL 29TH IS "FARMERS' SUNDAY"

The National Federation of Colored Farmers, Inc., through its president James P. Davis, has proclaimed Sunday, April 29th, as the annual "Farmers' Sunday" and all local units of the organization are ordered to observe the day with appropriate religious services.

This organization originated "Farmers Sunday" five years ago Hundreds of Race rural communities observed the day last year and quite a few urban communities. The national office has requested that an address on the subject: "How Organization Helps Colored Farmers." be included in every program. In spite of the rapid growth of The National Federation of Colored Farmers, there are still thousands of Race farmers unorganized.

It is hoped that Farmers' Sunday will be more widely observed this year than ever before. A program will be mailed free of charge to clubs, churches or societies in any rural or urban community that request it by writing to the National Office, Chicago, or to the Secretary of the organization, Leon R. Harris, Box 209, Moline, Ill.

FARMERS' INCOME SHRINKS

According to reliable statistics in 1920, the national income was 73 billion dollars, while the farm-

ers' return was 9 billion; in 1925 the national income was 81 billion dollars and the farmers' 7 billion; in 1930 the national income was 85 billion and the farmers' 6 billion 700 million dollars; in 1931 the national income was 71 billion and the farmers' 4 billion 200 million and in 1932 the national income was 38 billion and the farmers' only 1 billion dollars.

SEND FOR THIS BOOK

A farm production record book has been gotten up by the Agricultural Adjustment Administration for the purpose of aiding farmers in planning production and to serve as a basis or assembling information for contract application and proofs of compliance. This book will be furnished free to the farmers who have cooperated with the government in its crop reduction program.

Colored farmers have been very negligent in keeping record of their farming operations. All should send for this book as it will prove to be very helpful.

NEGRO TENANTS THREATENED

Reports from Kerrville, Tenn., state that Negro tenants in that section have been threatened with violence if they attempt to occupy some farms they rented for this year's operation. Solomon Jones, who rented a farm from Miss Kate Preston, found signs on the house when he went to occupy it reading, "No Negroes Allowed to Work This Place This Year. Don't let the Sun go Down on you in this House." Miss Preston told the sheriff that a former white tenant had tried to rent the farm and had been refused. The sheriff is looking for the sign printer.

LINCOLN UNIT

(Continued from Page 1)

to plant the same varieties of vegetables, melons, corn and cotton. This will enable them to market in carlots and get the benefit of best market prices. If it becomes necessary, they have all agreed to aid one another in planting and cultivating the crops. Those who need loans for production purposes will apply for same and hen they plan to purchase home and farm supplies cooperatively, which will enable them to secure a big discount and will lower the cost of operation and production.

The unit is officered by experienced and efficient farmers who have been successful. The General Manager is Prof. L. B. Boler, teacher of vocational agriculture and a man who practices just what he teaches. He is one of those hidden, unsung heroes of the Negro farm organization movement whose name will go down in history. A wide-awake and hustling farmer, Marshall Currin is president of the unit. Other officers are Frank Spellers, Vice-President, —Prof. J. E. Coleman, Secretary, —Oliver Spillers, Asst. Secretary'—J. R. Emanuel, Treasurer—O. H. Whitfield, Chaplain and David Bennett, Market Agent. The latter official is a poultryman who has been quite successful. His wife is considered an authority on poultry raising.

Missouri farmers are uniting with their organization rapidly and say that if they can get a square deal out of the New Deal the depression nor any other misfortune will be able to hold them back. As one of them remarked recently," The heck with government relief. What I want is an American's chance and opportunity. I have the land, good stock and I'm willing to work and I'll get by.

Needle Art Novelties

By Nancy Lee

BEACH PYJAMAS No. 114.

This overall pyjamas is just the thing for a summer day with the wind whipping in off the Lake. It's as youthful as can be with wide trousers and belt—and just notice that "Good Luck" cat prancing across the bib! Don't forget the big dots for the pant legs 'cause they add that "certain something" to this gay outfit! Our pattern contains only the cutting chart for the pajama itself, but we can easily applique the dots on any suitable sun hat. Let's fashion the set of bright colored broadcloth or bright figured print, and applique our circles of a beautiful blue. Pattern contains cutting chart and full instructions for the pyjamas. This is pattern No. 114.

We have prepared a wonderful new 32 page book showing over 90 newest needle work novelties, many in actual colors. The above pattern will be included free with each order for this book which is 25 cents. Ask for Book "D". Single patterns are 10 cents each. Be sure to state pattern number wanted. Send order with coin to,

PROTEST INABILITY TO GET FARM LOANS

(Continued from Page 1)

from private banks and Race insurance companies and fraternal organizations. They and their friends are denouncing what is claimed to be rank discrimination, and are requesting the N. F. C. F. to give the facts to the public through the press. Letters of protest have been received from all southern states and from Indiana Ohio, Missouri, Kentucky, and from relatives of farmers residing in Chicago, New York, Philadelphia and Detroit.

DUBOIS UNIT, N. F. C. F., TO HAVE SUPPLY STORE

(Continued from Page 1)

Sandusky is a thriving Alexander County community of approximately 300 families. These families are now patronizing white merchants and claim they are being charged exorbitant prices for their necessities. It is planned to begin operating the store this spring.

TO HELP DISTRESSED RURAL FAMILIES

(Continued from Page 1)

the regular jobs on highways; in the national and state parks and forests, and other public work prosecuted in agricultural communities.

"The plan calls for complete cooperation with the department of agriculture, and with the state and county agricultural departments throughout the country. It substitutes for direct relief an opportunity to obtain and maintain self-support in an accustomed environment, and completely divorce relief activities in rural areas from those in the cities.

It will be noticed that families in need will be assisted in their efforts to raise food crops so they can live well by producing enough of what is required. They will be furnished seed and stock for milk and meat but not for commercial purposes. They will be given part time employment in small industrial enterprises. Just what these industrial enterprises will be is yet to be discovered.

The National Federation of Colored Farmers has offered suggestions and plans to government officials very much like the plans here announced. The N. F. C. F. has been advising colored farmers for years to stop depending on the single cash crop for a living and to practice diversified farming. It has advised cooperative buying, production and marketing. Colored farmers who have accepted this advice are not in need today unless they are among the unfortunates who can't get any land to farm.

The N. F. C. F. is going to consider this new plan announced by President Roosevelt as a definite promise,—made by his administration to needy colored farmers, that they are to be given an opportunity to become real, sure-enough farmers. If colored farmers "must be placed in positions of self-support" they must be given opportunity to purchase small farms in Negro farm communities. These communities must be made and kept self-sustaining. Industrial cooperative enterprises must be established and encouraged. Colored farmers will earn sufficient cash income if given sufficient opportunity to earn it. The administration has promised this opportunity.

THE AMERICAN RED

(Continued from Page 1

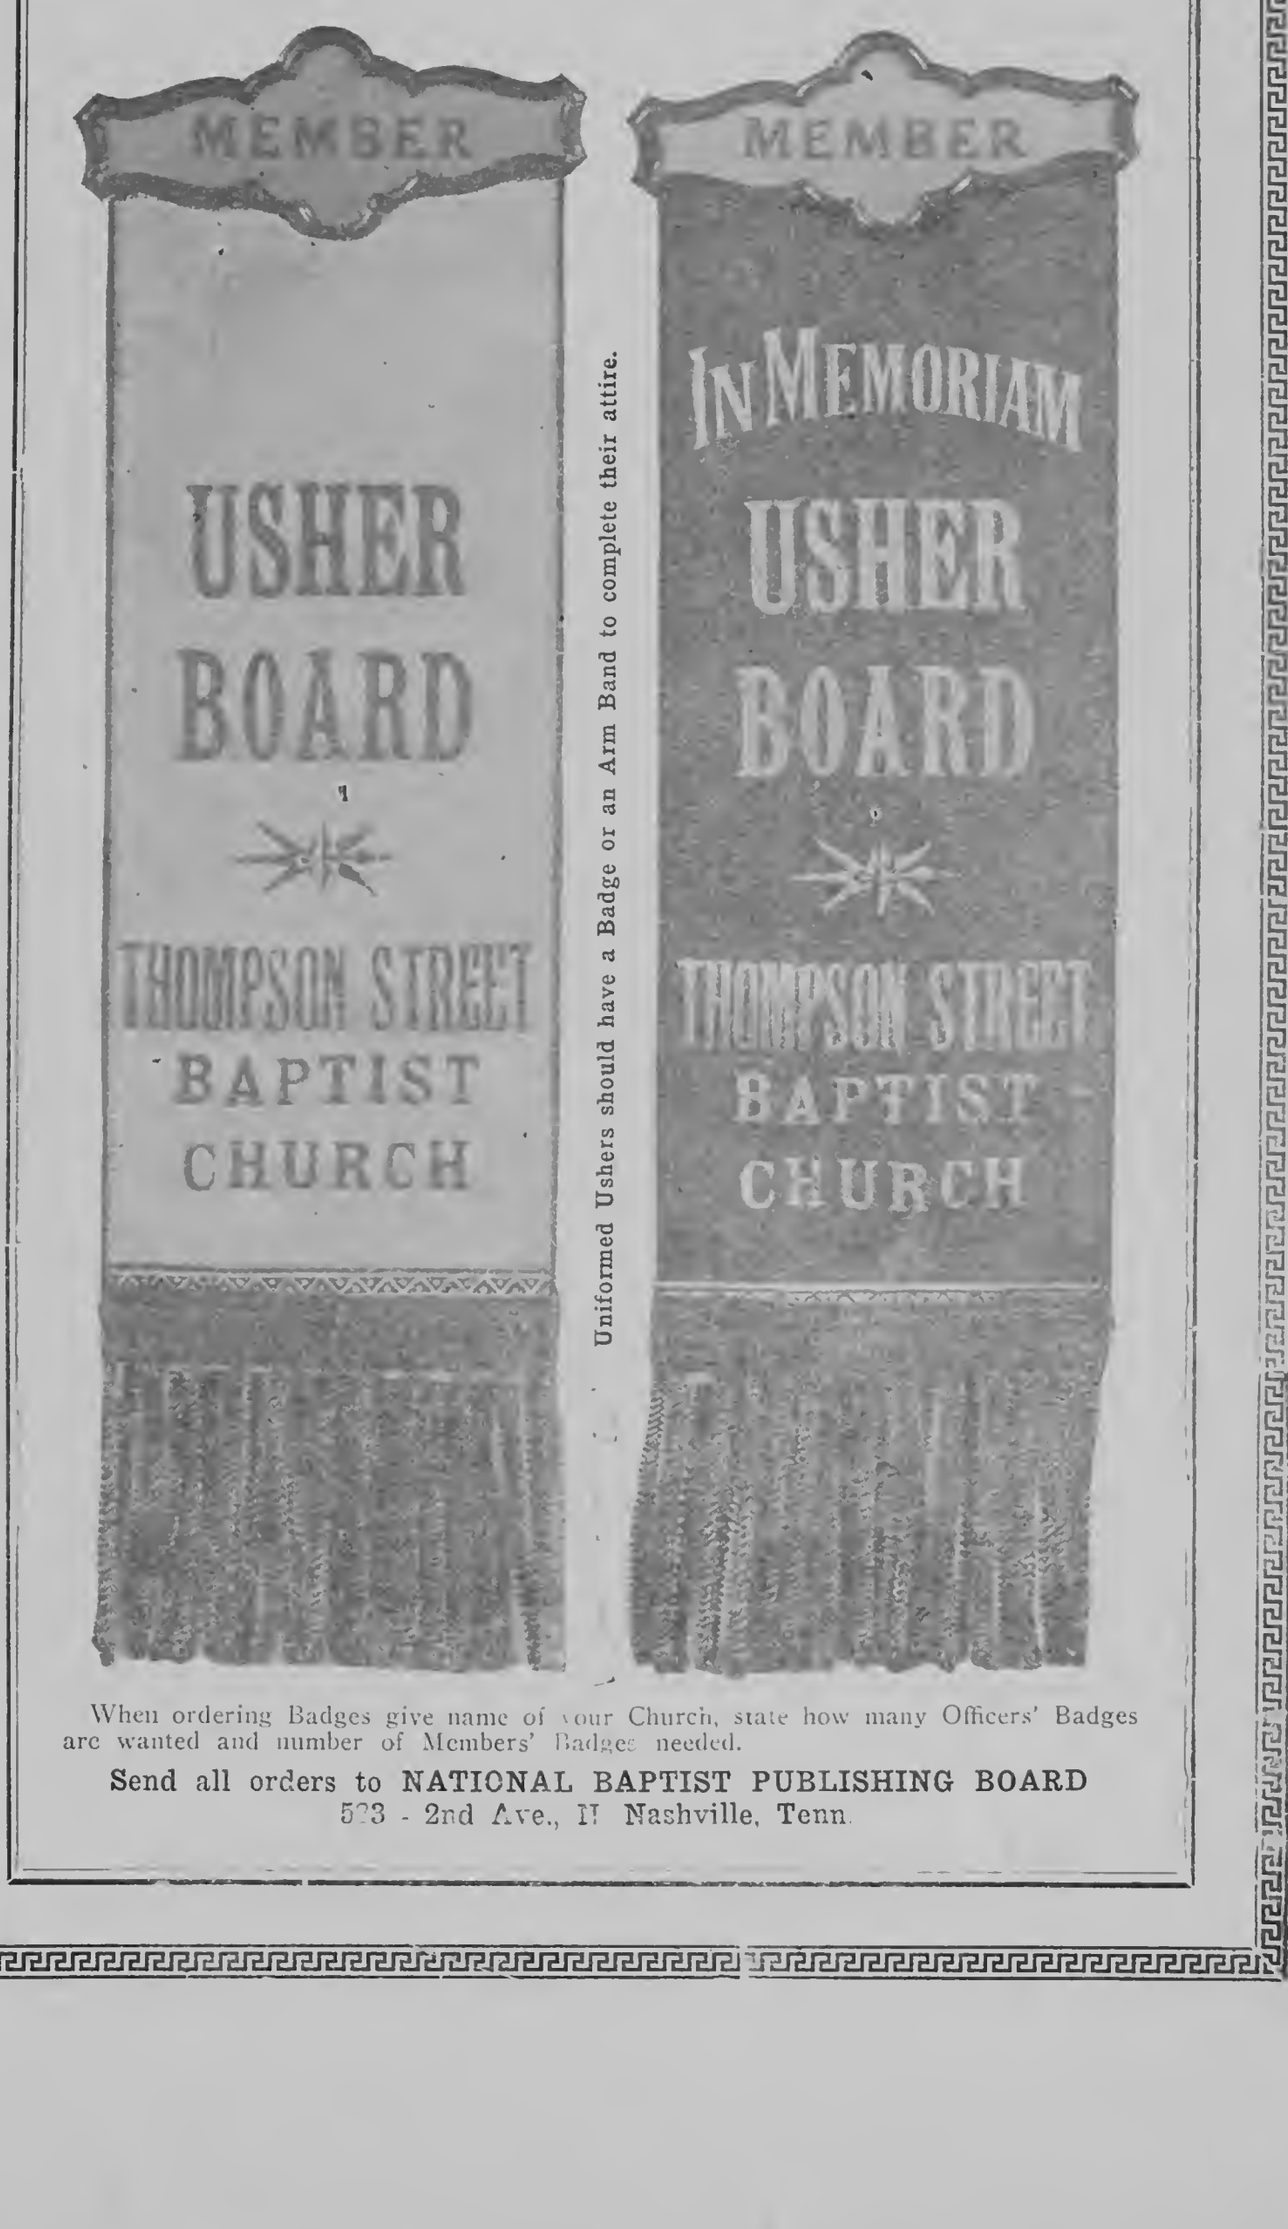
FOR WHAT THE COLORED PEOPLE NEED."

It appears that in some sections the local Red Cross Chapter has become the "big bad wolf" threatening to devour its needy victims. It will not give them relief if they happen to be "colored" and threatens to drive them out of the community if they write to Washington. In these bad cocmunities and counties the National Red Cross organization should see that local chapters are organized by and for colored citizens. There are still plenty of people who will "steal a penny off a dead man's eye." And evidently, some such people control local Red Cross chapters in some American communities.

WEAVER MAKES SURVEY OF CONDITIONS

New Orleans, La., March—(By the Associated Negro Press)—Dr. Robert Weaver of Washington, D. C., recently added to the office of Secretary Ickes of the Interior Department in the capacity of advisor of the economic status of the Negro, was a visitor in New Orleans during the past week, ostensibly for the purpose of checking on the Negro's condition locally.

Dr. Weaver had several conferences while here, and apparently made a thorough study of his four-day stay.



Uniformed Ushers should have a Badge or an Arm Band to complete their attire.

When ordering Badges give name of your Church, state how many Officers' Badges are wanted and number of Members' Badges needed.

THE FARMER'S OPPORTUNITY

The National Federation of Colored Farmers, Inc., operating from Illinois under the direction of James P. Davis, is entitled to the confidence of those who believe that the future of America is essentially involved in agrarian pursuits. This institution was organized in 1922, and has been instrumental in turning the attention of thousands back to the farm. This has been attested through the experience and foresight of men whose leadership stands for sound and progressive action.

The membership of this institution now extends into every state of the South and many eastern and western states. Their work and service to the country deserve recognition from those who are handling the national recovery program of the president of the United States. The farmers throughout the country should further the purpose of this institution by rallying to its support

The federation has assumed the responsibility of teaching co-operative buying, production and marketing. It studies and investigates all agricultural problems, as well as the improvement of rural homes. Such work should commend itself to the consideration of Secretary Henry A. Wallace and Administrator George N. Peek, who are endeavoring to restore the purchasing power of the farmer.—(Editorial) Chicago Defender.

URBAN LEAGUE MOVES TO ORGANIZE ALL NEGRO WORKERS

Federation Will be Formed to Combat Discrimination

New York City, March. (By the Associated Negro Press)—Today the National Urban League set in operation a nation-wide plan to meet the challenge of discrimination in the American labor movement by the organization of the Negro worker. T. Arnold Hill, Acting Executive Secretary of the National Urban League, and Director of the Department of Industrial Relations, advised the Steering Committee of the National Urban League in a special meeting that conditions of the Negro worker and his experience in the Recovery Program as revealed by the activities of the local League branches and the Emergency Advisory Councils had indicated beyond any question of doubt the absolute necessity of creating an effective federation of all Negro workers.

"It is apparent," said Mr. Hill, "that Negro workers have failed to benefit from the Recovery Program because they have not been able to assert their strength." He stated that certain special conditions now made action on the part of the National Urban League imperative these conditions being:

(a) Senator Wagner's bill proposing a National Labor Board, which, if passed, will raise the prestige of labor, and on which there are to be two representatives of labor;

(b) He anticipated changes in the regulations of the NRA which call for labor representatives on Code Authorities;

(c) The President s recent declaration calling for the reallocation of work under the CWA program; and

(d) the continued neglect of the American Federation of Labor with respect to the problems of Negro workers, yet definite evidence that certain locals are unwilling to stand by the prejudicial policies of their nationals.

The principal feature of the League will be the organization of existing labor groups among Negroes into a federation which must inevitably result in the organization of additional units of Negro workers. The federation will be the instrument through which appropriate action on behalf of Negro workers may be obtained. The first objective of the federation will be to awaken the consciousness among Negro workers to their own strength: and the second will be the utilization of this strength to secure recognition which is denied them at the present.

A committee of one hundred Negroes throughout the nation will be organized to assist the Urban League in carrying out this program, and a special staff headed by men familiar with the conditions of Negro labor throughout the country will be created and sent up in the national office of the Urban League, 1133 Broadway, New York City. The personnel of the committee and of the special staff will be announced within a few days.

GEN. LEE COMPARED

Civil War General Dispersed Two Mobs

R. B. Eleazer Tells of Two Incidents From Biography of Hero

It is not commonly known that the noted Confederate leader, Gen. Robert E. Lee, while president of Washington and Lee University just after the Civil War, twice broke up mobs in Lexington, Va., the seat of the university, and saved their intended victims from death. Two stories are told in Riley's biography of Lee, the one by Prof. C. A. Graves of the university faculty and the other by Judge D. G. Tyler of Holdcroft, Va., both alumni of the institution. In brief Prof. Graves' story is as follows:

In the spring of 1866 while he was a student at the university a report reached the campus that a mob had gathered at the county jail, bent on lynching an alleged horse thief. Rushing down to the jail yard, he found it filled with a milling crowd of determined men sursounding the jailer and demanding the keys. Then he became aware of the presence of General Lee, moving quiet among the crowd and urging each group as he passed to let the law take its course. This continued for some time, and then the mob slowly broke up, remounted their horses and rode out of town. Prof. Graves says, "They could not do a deed of lawless violence in the presence of 'Marse Robert,' whose standard they had followed on many a battle field."

Judge Tyler tells as follows of a similar incident which took place during his first year at Washington and Lee:

"A very popular young student, a son of Judge Brockenbrough, professor of law, got into a difficulty with a Negro and was badly shot. His life was despaired of. As soon as the news of the assault reached the college, four hundrd students, with a brother of the wounded boy at their head, searched for and captured the trembling wretch, and with a rope around his neck, marched through the streets of the town to the courthouse square, with intent to wreak their vengeance on the man.

"It was in vain that the college and town authorities sought to calm the frenzied mob and induce them to turn over the Negro to the officers of the law. Just then General Lee appeared. Immediately the tumult was hushed, and the General standing in the midst of the excited throng, simply said: 'Young gentlemen, let the law take its course.' The quiet words had the effect of a military order, and the Negro's life was saved."

The New Yorker: By sliding off the gold standard, the United States gets itself in a position to look the world in the face and tell it to go to hell. Our money is as bad as anybody's.

Needle Art Novelties

By Nancy Lee

PLAY APRON NO. 118

Don't these gay dancing maidens on our Play Apron carry you back to those good old Crinoline days—hoop skirts—lacey pantaloons—big sunbonnets and all. They're all here on this charming little apron—looking true to life—and too chic for words! This apron is just the thing to protect Sue's best dress from "muss and fuss" and can be made up as quick as a wink. White suiting or any plain light colored material could be used for the apron itself—a few outline stitches to shape bonnet—and then applique the gay dresses. Pattern contains cutting chart and full instructions. This is pattern No. 118.

We have prepared a wonderful new 32-page Book showing over 90 newest needle work novelties, many in actual colors. The above pattern will be included free with each order for this Book which is 25c. Ask for Book "D". Single patterns are 10c each. Be sure to state pattern number wanted. Send order with coin to

Scene Will Change At 1934 Fair

As the visitor travels up the Avenue of Flags from the north entrance of A Century of Progress at Chicago, which again opens on June 1 of this year, he is impressed with the magnificent entrance to the building just ahead. It is the north entrance of the Hall of Science. A ramp leads up to it, and this ramp is bordered by symmetrical pine tree. A special effort has been made to make this entrance even more attractive for the 1934 Exposition, and it will be so radically different that visitors of 1933 returning this year will hardly recognize it.

Diced pineapple used as a base for chicken salad gives it a delicious flavor.

Boiled linseed oil rubbed into oak furniture will give it an excellent polish.

Salt and pepper shakers that are filled from the bottom may be sealed with piece of adhesive tape. Remove and renew tape when shakers are washed.

Sour cream makes good pudding sauce, whipped slightly, sweetened and flavored with vanilla.

'ALPHABET' EXPERTS HOLD BIG CONFERENCE

Colored New Deal Leaders Confer With Mr. Ickes On Problems of Negro Workers

Washington—(CNS)—The Inter-Departmental Conference Group, organized at the suggestions of Harold L. Ickes, Secretary of the Interior, to discuss problems concerning activities of the various Federal units represented which are considered of importance to Negro welfare; held its second meeting Friday March 2 in the Department of Commerce. An official release states:

"Problems associated with the participation of Negro skilled and unskilled labor in the set-ups of labor organization, as well as various aspects of the rural situation, particularly in regard to loans and acreage reduction as applied to Negroes, were the principal topics of discussion."

The following subcommittees were set up to study the two problems: LABOR: Eugene Kinckle Jones, Department of Commerce, Chairman; Dr. Charles F. Roos, NRA; Edward F. McGrady, Department of Labor; Dr. Robert C. Weaver, Department of Interior; Forrester B. Washington, FERA and CWA. AGRICULTURE: J. Phil Campbell, AAA, Chairman; Dr. Clark Foreman, Department of Interior; Bruce Melvin, CCC; H. A. Hunt, FCA; Forrester B. Washington, FERA and CWA.

The group was received by Secretary Roper who gave a brief talk of welcome and good will. The Commerce Department meeting was held at the invitation of Eugene Kinckle Jones of that Department, with Robert L. Vann, representing the Department of Justice, acting as Chairman.

The next meeting of the group will be held in the Department of Agriculture when the labor committee is prepared to report.

Meanwhile the Washington Tribune in a current issue editorially 'calls for action, and action now;' and "clamors" for a square deal under the New Deal as follows:

"Advice to Advisors"

"For some reason the various advisors appointed by the administration to look after Negro affairs are strangely silent. We heard a lot about them before they were appointed, but as soon as they were sworn into office, they lost their tongues.

"In the meantime Negroes all over the country as well as those here 'under the advisors' noses' are clamoring for a square deal under the new deal. Segregation is rife, discrimination is rampant, and jim-crowism is raising its head under the dome of the Capitol.

"What has happened to these alleged advisors? What are they doing other than drawing fat salaries? Not one has raised his voice against injustices committed against Negroes all over the country. We hear of these advisors only when they make polite speeches at pink teas. They may as well be in China as for the good they are doing. After all we are of the opinion these advisors do not care to advise as it might disturb the tranquility of their bosses—and the salary of an advisor is not to be sneezed at."

OSCAR DEPRIEST'S CAMPAIGN

Will Enter April Primary In Chicago First District of Illinois To Select Its Candidate Next Month

Congressman Oscar DePriest will enter the Primary in Chicago during the month of April. He is to ask the voters from his First Congressional District to nominate him so that he can stand for election for the fourth consecutive term in Congress. These facts were divulged in Nashville last week. They were confirmed this week by one of his close personal friends who announced that he would go on up to Chicago when the campaign opens to make several addresses in the interest of Mr. DePriest.

While the Primary starts in April, the regular election does not come off until some time in the fall, but according to the Illinois law, this General Primary must be held and all candidates subject to election under any particular banner must enter the Primary to see whether or not the voters endorse their candidacy.

Up to this writing no serious opposition has developed for Congressman DePriest. His friends here believe that his renomination is a certainty, and that his election will be assured. The Republicans of Cook County are already forming a strong organization so as to make an attempt in the coming fall election to reclaim what they lost during the last Presidential landslide.

In speaking of Congressman DePriest's chances, his one strong supporter and very intimate friend here said: "Unless an unprecedented upset results in the Primary Term I have no particular anxiety about Oscar DePriest being renominated and re-elected. He stemmed the tremendous Roosevelt landslide in the general election; he carried the first district by an increased majority; he buried under an avalanche of voters his Democratic opponent and the Independent candidate; His majority over both was a little more than thirteen thousand votes. Although he is busy in Congress at this time trying to help shape the legislature that will dig this country out of the present depression, he will be back in Chicago the latter part of this month to remain throughout the campaign and until the return of the Primary are in.

"The First District Organization in Chicago politically that is supporting Congressman DePriest is one of the best that I have ever known in the forty odd years that I have been in public life."

William Daniel Stephens, son of Mrs. Salome Donnell of 2500 Jefferson Street, Nashville.

Herman Lee Lyles, son of Mr. and Mrs. Marvin Lyles of Gordonsville, Smith County, Tennessee.

Oscar Willard White, of 634 West 10th Street, Chattanooga, Tenn., son of Mr. and Mrs. Oscar White of Adairsville, Georgia.

The April quota of 5 applicants will be enlisted for service in the Messman Branch of the Navy at the local Navy Recruiting Station between April 2nd and April 10th. These men must be 18 to 25 years of age and pass the necessary mental and physical examinations. Examinations are conducted every Wednesday at 8:30 A. M.

A force of 3,654 is employed by the American Bible Society to carry on its world-wide work of translating, publishing, and distributing the Scriptures.

Most of the failures of winter flowering bulbs are due to imperfect root development because of lack of moisture. A little sand placed under hyacinth, tulip and narcissus bulbs when planting them is recommended.

ONE THOUSAND THREE HUNDRED RAISED

San Francisco Leads Way In Money Getting to Help Pay For Appeal

San Francisco, Calif., March—(By Mason Roberson for the Associated Negro Press)—Over thirteen hundred dollars were taken in at an auction held here tonight in the auditorium of the Women's City Club, for the benefit of the Scottsboro Boys. The sale, sponsored by the Society for the protection of Political prisoners, featured contributions from artists and thinkers from all over the world.

James Cagney, the bad boy of the movies, made a special trip to the city in order to act as master of ceremonies. His wife, Victory Jory, and several other motion picture stars were present in the audience, besides millionaires, professors and artists from Carmel, Berkeley and other bay cities.

Contributions poured in from all over the world—so many that only half of them were able to be put up for sale on the one evening. Paintings, sculpture, etchings, manuscripts, typescripts and signed books and photos were donated by men and women whose signature alone makes their products museum pieces.

George Bernard Shaw sent an original manuscript, from one of his famous essays. Anita Loos gave part of the original manuscript of "Gentlemen Prefer Blondes." Jo Davison, the sculptor, gave several drawings. Lord Bertrand Russell, Julian Huxley, Frank Swinnerton, Gertrude Atherton, Kathleen Norris, Charles Caldwell Dobie, Sherwood Anderson, Theodore Dreiser, John Cowper Powys, and Miss Sara Bard Field were among the contributors.

Elmer Rice sent the notes he had made on the play that became the famous "Street Scene." Carl Van Waters. Chas. Erskin S. Wood read a poem he had written and donated especially for the occasion. Poems by George Sterling, and Robinson Jeffers, the signed score of the Saint Louis Blues cartoons by Steig, a book signed by Robinson Jeffers and Clarence Darrow, besides paintings in oil, water color, pen and ink drawings, sculpture, block prints...

Among the Negroes who contributed works, beside the author of the Saint Louis Blues, were Sargent Johnson, famous Berkeley Sculptor who contributed a painting, Claude McKay, and Countee Cullen who contributed poems. Langston Hughes besides taking an active part in the arrangements for the auction, contributed an insight into a poet's workshop by offering three versions of a poem, showing the original and two corrected copies.

THREE NASHVILLE BOYS IN GROUP SENT TO NAVY

The following young men from Tennessee, 3 of whom are from Nashville, enlisted in the Navy at the local Navy Recruiting Station, 404 Custom House Building, this date, and were transferred to the Naval Training Station, Norfolk, Va., for preliminary training prior to being assigned duty on vessels of the U. S. Fleet:

Herman Shirley Ross, son of Mrs. Bettie Ross of 2031 Jefferson Street, Nashville.

Lee Roy Bridgeforth, son of Mrs. Mary Bridgeforth of 1114 Pearl Street, Nashville.

SONG—"Bringing in the Sheaves."

PRAYER—

RESPONSIVE READING—Led by Master of Ceremonies.

Master of Ceremonies:—"Behold how good and how pleasant it is for brethren to dwell together in unity.
Congregation:—"O Lord, how manifold are thy works: in wisdom hast thou made them all: the earth is full of thy riches.
M. of C.:—"Behold, the eye of the Lord is upon them that fear him, upon them that hope in his mercy;
Congregation:—"To deliver their soul from death, and to keep them alive in famine.
M. of C.:—"He loveth righteousness and judgement: the earth is full of the goodness of the Lord.
Congregation:—"The poor man cried and the Lord heard him, and saved him out of all his troubles.
M. of C.:—"A little that a righteous man hath is better than the riches of many wicked.
Congregation:—"He causeth grass to grow for the eattle and herb for the service of men; that he may bring forth food out of the earth.
All:—"Trust in the Lord and do good; so shalt thou dwell in the land, and verily thou shalt be fed."

SONG:—Selected.
READING OF PRESIDENT'S PROCLAMATION.
ADDRESS OF WELCOME—On Behalf of Church.
RESPONSE.
SONG:—"The Farmers' Hymn," Official Hymn, National Federation of Colored Farmers, Inc. (Tune: "My Faith Looks up to Thee.")

God bless us, we who toil
Upon the goodly soil
Which thou hast made;
Uphold us by thy might,
Help us to know the right,
And ever, day and night.
Be thou our aid.

Send plenteous sun and rain
On mountain, hill and plain,
And valley wide:
Grant us prosperity,
Inerease our faith in Thee,
O may we happy be
Whate'er betide.

Unite us heart and hand
In one fraternal band
Unto the end:
That we may praise thy name,
Of all men, Lord, the same,
Our God, whom we proelaim:
"The farmer's Friend."

ADDRESS:—"How Organization Helps Colored Farmers."
SONG:—Selected.
INTRODUCTION OF VISITORS.
THREE MINUTE TALKS:—By Officers and Agent for MODERN FARMER.
Sermon, Offering, Announcements, Benediction.

INSTRUCTIONS

Offieers and members of local Units should strive diligently to make "Farmers' Sunday" a great day for the cause of Organization of Colored Farmers throughout the Nation. Appoint a special committee for this day. Invite the public to attend. Send notices to all the churches in your community. Invite your city friends. Have special music. The Chairman of the local Unit will act as Master of Ceremonies. Seeure your best talent for the addrsss on "How Organization Hlps Colored Farmers." The program may be lengthened or revised if desired. Remember this is "Farmers' Sunday" and an all-day meeting would not be out of place. Let the publie know that you are proud of your organization and that the N.F.C.F. merits any assistance given it.

SPECIAL NOTICE, NUMBER ONE

Offieers of Local Units are instrueted to send one-half of general offering received on this day to the NATIONAL FEDERATION OF COLORED FARMERS, INC., CHICAGO, ILL. This money is for the "Missionary Fund" and is used to carry the gospel of organization and cooperation to the many thousands of American Negro farmers yet not organized. Be liberal. It is a great work and must be carried on. "As ye have received, freely give."

SPECIAL NOTICE, NUMBER TWO

All Units of the N.F.C.F., and affiliated Women's Clubs that have not held their festival for the benefit of the MODERN FARMER, as ordered at 1933 Convention, are instructed to hold this affair the day before Farmer's Sunday, Saturday, April 28. All reeeipts from festival should be sent promptly to MODERN FARMER, 447 Fourth Ave., N., Nashville, Tenn.

SPECIAL NOTICE, NUMBER THREE

Please preserve this issue. You will need it for your serviees. If more copies of this paper are wanted, you may get them for five eents per eopy. Address the MODERN FARMER, 447 FOURTH AVE., N., NASHVILLE, TENN.

COTTON GROWERS

(Continued from Page 1)

About the time the cotton plans of the AAA were made public, a letter approved by the Executive Board of the National Federation of Colored Famers was written to Mr. Peek,—at that time head of the AAA,—suggesting that not less than 50 per cent of cotton acreage reduced be included in the two states, Oklahoma and Texas. It was not dependent on hand labor as was the case in the other cotton states,—that an Oklahoma or Texas planter by using machinery and with the help of five laborers, could produce as much cotton on 2000 acres as would require two hundred workers on an equal area in the Southeast. It was also pointed out that these two states are able to produce more short staple cotton than they are doing now and should be discouraged in their endeavor to do this until social and economic conditions could be regulated and reformed in the Southeastern states so that the million or more Negro farm families in these states might be able to exist and enjoy some of the comforts of farm life.

This suggestion received scant consideration and partly as a result, we find that thousands of small planters must promise to allow more thousands of Negro tenants and sharecroppers opportunity to live on their plantations rent-free and must provide them acreage and facilities to produce enough food for themselves and families.

The situation of these tenants and sharecroppers does not look very good to us. Full stomachs alone cannot satisfy any class of American citizens these days. They are not even guaranteed full stomachs. They can't produce coffee, sugar and some other essential foodstufis on the southeastern plantations. Neither can they raise sufficient clothes. How can they pay for their insurance or support their churches and fraternal societies? The adminstration's new unemployment program promises them some relief but little can be expected.

We still believe the AAA's cotton production program is too easy on the machine-farmer and too hard on the man-farmer. It is too easy on the big farmer and too hard on the little farmer. A way must yet be found to get these thousands of Negro sharecroppers and tenant farmers out of the plantation huts and cabins into decent homes of their own. A way must yet be found to get them off the subsistence lots onto small farms of their own. A way must be found to force absentee landlords,—lawyers, doctors and merchants landlords,—bank and insurance company landlords and others of this stripe,—whose hands have never touched a plow or hoe,—to sell some of their acres to those sharecroppers and tenants who cultivate it.

THE FORGOTTEN MAN

Wheaton (Minn.) Gazette: The PWA and the CWA and other terms of federal relief have in turn entered the field and the man who was down and out is probably in a better position than he has been for years. The man with plenty of money, of course, is sitting pretty now as always. The man in between, the man who owns and operates his own farm or a small business, the man who pays his taxes when they are due and tries to educate his children, the man who has been working hard to keep his credit good by paying and buying only what he can pay for, that man is the Forgotten Man in the present scheme of things.

Take the farmer on a quarter section farm of his own, for example. Relief has been provided for those who do not pay their taxes but he pays his when due even if he does not buy coal for the winter. The NRA raises the price on many things he has to buy but he has to sell his butterfat at the lowest price in years and his hogs for less than the cost of the feed put into them in 90 days. His income is getting smaller every day. His neighbor who rents a farm can get on the CWA job at 55 cents an hour but he can not because he is not on the relief rolls. If he remains the Forgotten Man for many more moons he will be eligible for the relief rolls.

Then take the merchant, for another example. His costs have gone up because of the NRA. Some articles cost him as much as 50 percent more than they did a few months ago, but the buying power of his customers has not increased proportionately. He has to sell higher and his sales fall off. How long will it be before his name is on the relief rolls?

Yes, the government is taking care of the poor. The rich can take care of themselves. The man in between is the Forgotten Man today. The army of middle class people who have fought adversity and have been saving every cent toward a modest competence for the rainy day or old age, the vast majority which comprises the backbone of our American civilization, is in danger today.

Hoosier Named Attorney General

Indianapolis, Ind., March—(By the Associated Negro Press)—Atty. Henry R. Wilson was appointed an assistant attorney general of Indiana last Friday by Attorney General Phillip Lutz. Mr. Wilson has forged ahead rapidly since his admission to the bar in 1929. He was educated at Northwestern university and Kent College of Law.

A chorus of about forty Baptist singers will form part of the Swedish delegation to the World Congress in Berlin next August.

FARMERS' SUNDAY, APRIL 29, 1934

THE PRESIDENT'S PROCLAMATION

Pursuant to the authority vested in me by the Executive Board of The National Federation of Colored Farmers, Inc., I, James P. Davis, president of said organization, do designate Sunday, April 29, 1934, as our annual "Farmers' Sunday." All Loeal Units are hereby ordered to have appropriate religious exercises on that day.

Again we have the happy privilege of assembling together to render thanksgiving and praise and to pray for guidance and help in this hour of need. In spite of all difficulties, we must be patient. We must keep our faith in the God of our fathers and mothers, in our country, and in our fellowmen.

We should be thankful for life and opportunities. We should be thankful that our organization has been able to endure. We should be thankful that we still have a way and a chanee to help others through our organization.

Today, let us pray for more patienee, for more faith, for more knowledge, for more love. Let us pray for our organization, for our officers and brethren, and for the many thousands of our group who need our assistanee but know us not. Let us pray for our enemies. Let us pray for our native land, and for those in authority; that we may have peace and prosperity and that every citizen may have an equal chanee to live and grow therein.

For this purpose therefore, every Unit under the jurisdietion of the National Federation of Colored Farmers, Ine., is instrueted to assemble in some church on this day to render thanks unto Almighty God for the manifold blessings we have been permitted to enjoy, and to pray for Divine guidanee and assistance. Every member is hereby instrueted to take part in the exereises.

May the prineiples of cooperation, of service, and of charity, fill every mind and heart on this day and, united, may we go forth with stronger determination to advance the work and welfare of our organization.

Given under my hand, this, the 1st day of March, 1934.

(Signed) JAMES P. DAVIS, President.

Vol. VI. NASHVILLE, TENN., APRIL 14, 1934 No. 12

SHARE-CROPPER QUOTES FIGURES

Says He Has Gotten Absolutely Nothing For Three Years

The National Federation of Colored Farmers, Inc., releases the following letter received from a sharecropper member of Tallahatchie county, Miss., which refutes some of the many assertions being made recently by the press of that state that the sharecropper is satisfied and contented and well pleased with his lot. This is just a sample of letters received daily. The letter says:

"I have three in my family. I made three crops,—in 1931, 1932 and 1933. I have gotten absolutely nothing from either crop. In 1933 I kept strict account of every penny and here are the figures: I got $18 cash, $36 store order—medicine, feed and incidentals amounted to $30 and interest on the $18 cash was $5.40 for nine months. (Some interest.) I made 1750 pounds of lint cotton which were sold by my boss at ten cents per pound. This was my share of the cotton . Deducting the $89.40 that I owed I was due for my cotton and my part of the plow-up check a total of $93.20. This is due me yet. I have not gotten a dime of it. I got disgusted and moved off. Now he wants me to move back and farm for him again in 1934.

The member was advised to remain away and to seek another landlord.

A LETTER TO A CRITIC

N. F. C. F. Secretary Gives Plain Information About Federation

Chicago, Ill.— The national office of the National Federation of Colored Farmers, Inc., has released the following letter, written the secretary of the organization, in reply to a letter received from a prominent Race leader expressing doubt regarding the usefulness and purpose of the N. F. C. F. The letter follows:

Dear Sir:—

I am writing you this letter hereafter there may be no doubt in your mind regarding the usefulness and purpose of the National Federation of Colored Farmers, Inc.

The National Federation of Colored Farmers, Inc., is a national farm organization incorporated under the laws of the state of Illinois, the membership of which is limited to those farmers, tenants, shareeroppers, farm laborers and dealers in farm produce who are identified with the Negro racial group. It is organized along the lines of the American Farm Bureau Federation and the National Farmers' Union and is attempting to give to the colored farmers of the Nation the same kind of service the American Farm Bureau Federation and the National Farmers Union and other national farm organizations are giving to the white farmers of

FOODS AND AGGRESSIVENESS

Prof. Laurence C. Jones' Article From Defender

Writing in the Chicago Defender, Prof. Laurence C. Jones, founder of Pineywoods Country Life School, Pineywoods, Miss., has something to say about what really makes some people stronger, more forceful and powerful than others. Every once in a while, Prof. Jones comes forth with articles on subjects few people think about. His articles are always interesting and he should write more often. He says this:

"Many white people feel that their group, generally known as the white race, is at the head of civilization today because it is the will of the Almighty. Others accept it as a badge of superiority "because you are whites." Still another faction supposes the white race contains some inherent superiority not possessed by other races. Some claim their brain has made them superior. Others say it is spiritual qualities.

When we look around us at the influences at work here in the United States, not taking into consideration world influences, it is true that we are dazed. World influences are very enlightening in a study of racial superiority.

Civilization really started in the valley of the Nile when people began growing barley. Grain growing drew them into communities in contrast with the nomadic life of hunting and fishing for their food from day to day.

Civilization went from the Nile valley in Egypt to Europe, in a small area around the Baltic sea, and after it had spread to Europe the white race originated. Geograhic influence such as climate and food had more to do with making the white race and creating vigor and aggressivness in them than any other factor. Leave the territory immediately surrounding the Baltic sea and you find people growing darker and darker and with less virility.

Around the Baltic sea the mountains do not come down to the coast; there are vast stretches of level, fertile land. Together with a moist climate this makes a great wheat growing area. Here the people are not subject to famine. Every other party of the world has been subject to famine with the exception of Japan and a part of China near Japan. These are the great rice growing areas.

Viewing these ' circumstances leads us to believe that the white race-is strong, vigorous and aggressive because of food and climate: if this were not so why would not other races of the world be just like them The climate—something in the air or atomsphere around the Baltic sea has had much to do with this white race—its color and characteristics and the food; wheat has had a great deal to do with it. Wheat is the most sustaining food known to man. Wheat is known to be five times as sustaining as meat. And the Chinese or Japanese can eat

DOMESTIC SCIENCE CLUB WRITER

Mrs. William Fairlie Discusses Foods, Fads and Fancies

A paper on "Foods, Fads and Fancies," of special interest to housewives, was recently read before the Northwest Domestic Science club of Geneseo, Ill., by Mrs. William Fairlie. Excerpts from Mrs. Fairlie's paper follow:

Fuel Value

"The thing that counts in food is its fuel value— the food must be adjusted to the eater and the work he has to do. Every hour given to the study of foods in relation to human growth and health is of value in supplying the needs of our bodies, and has a direct bearing upon vitality of our people. It is said that women can save money by the practical use of balanced rations.

"What shall I plan for these three meals a day? That is a question as new each day as the day itself. Instinct guides us somewhat in our selections of foods, but is it easy to be tempted beyond our means and to disregard the simple and wholesome?

"Bread is the master builder of physical and intellectual strength. It is our cheapest food, for it gives us one-third more caloric value at one-tenth the cost of other foods.

"'I can't eat bread; it's too fattening,' says one who overeats and under-exercises. There is no food too fattening if it is used in a balanced ration.

"A good health slogan is 'Eat vegetables three times a day, cooked or raw.' Cheese, fruit and meats also are good. Milk no longer is called a drink, but is rated as a food.

Taste, Not Looks

"Garnishing does much to promote the proper digestive attitude—yet it's better to serve things that taste better than they look, rather than those which look better than they taste. The fine art of cooking is developing the natural flavor of each dish.

"One hundred years ago people had to learn to like tomatoes, which were taken then to thin the blood. Now tomatoes are immensely popular and are among the foods served early in life to babies.

"A few centuries ago the cucumber was a very rare house plant. Later they were used only after careful preparation, for they were considered dangerous. That they contain a poison or an indigestible substance which must be removed by soaking the sliced cucumber in salt water is not true Now they are a general favorite, combined in vegetable salads.

"Many children used to be denied bananas. The speckled yellow fruit is ripe and is easily digested and nourishing. It is worthwhile to include this food in everyone's diet.

Oysters and Typhoid

"There is little connection betweer eating oysters at any season of the year, and typhoid fever. Eggplants do not require soaking in salt water. Fruit juices and milk combined may not be a beautiful combination, but it makes

(Continued on Page 2, Col. 4.)

VEGETABLE SPRAY CALENDAR

Classes of Insects and How to Deal With Then

This calendar should be preserved by all farmers and gardeners as it will be found to be useful year after year. It is the latest information on controlling insects. Study it, use it and don't let the bugs destroy your labor this season.

CLASSES OF INSECTS

There are several classes of insects. Biting insects, like potato bugs and cabbage worms, bite off, chew and swallow a portion of the plants. They are killed by internal or stomach poisons that contain arsenic in some form. Thus poison can be applied directly to the plant or mixed with bran mash and used as a bait. This bait can also be used for cutworms and grasshoppers.

Sucking insects, such as plant lice, are destroyed with nicotine or tobacco insecticides applied as liquid or in dust for.

Mr. D. P. Trent, director of Co-operative Extension Work, state of Oklahoma, gives the following rules for controlling insects:

FOR CABBAGE

Place poison bran mash near the plants to prevent cutworms from cutting off plants near the roots. For cabbage worms use arsenate of lead, Paris green or calcium arsenate.

FOR CORN

Dust as soon as silks begin to appear with powdered arsenate at the rate of two or three pounds to the acre. This will destroy the corn worms.

FOR CUCUMBERS AND MELONS

Plant three times the number of seed you desire plants in the hill. Thin later if necessary. Apply four per cent nicotine dust in fumigation boxes for the young plants and dust with the same preparation later.

FOR LETTUCE

Spray with nicotine sulphate solution or dust with three per cent nicotine dust.

FOR ENGLISH PEAS

Same as lettuce.

FOR FIELD PEAS

Use carbon bisulphide.

FOR IRISH POTATOES AND EGG PLANT

Use arsenate of lead, calcium arsenate or Paris green.

FOR SQUASH

Spray with nicotine sulphate solution or dust with three per cent nicotine dust. For squash bug—which is brown in color and about three-fourths of an inch long,—place shingles or boards among the plants. Bugs go under these at night and can se collected and killed in the morning. Also dust with nicotine, six per cent strength.

FOR TOMATO

Use poison brand mash for cutworms. For eating worms and bugs, such as tobacco worms, use calcium arsenate or Paris green.

Nicotine dust is made by mixing hydrated lime, one pound, with one ounce of nicotine sulphate. If a small quantity of the dust is desired, sprinkle the sulphate on the lime in a container that can be tightly clos-

TALKS TO COLORED FARMERS

Secretary and Editor Leon Harris Communication

BROTHER FARMERS:—I have recently visited Race farmers in eight states—Illinois, Missouri, Kansas, Tennessee, North Carolina, Ohio, Virginia and Iowa. Everywhere I went, our farmers were asking the same question: "What can we do to get along better?" Farm owners, tenants, sharecroppers and grown-up sons and daughters of farmers—all were seeking information and advice.

Few of us have fared well during the past three years. We did not know the depression was coming. We were not ready to meet it. It is still with most of us. We are discouraged. We realize the government is attempting to do something for us but it is hard for us to understand just what we should do ourselves in order to get any benefit from what the government is trying to do.

While visiting our farmers in the states above mentioned, I have learned much. I have tried to give wholesome advice and correct information.

I have found out that farm owners—especially owners of small and medium-sized farms—have gotten along better during the depression than any others. Many of these farmers were out of debt when the depression struck. They have made little more than a living but are well off any way for many of us have not even made a living. Owners of large mortgaged farms are in hot water up to the neck. Many of them will lose their farms, for, aside from the mortgage debt, they owe taxes and store bills. They owe more than they can hope to repay. I have advised several in this condition to give up part of their lands and arrange with their creditors to allow them to keep what they can cultivate without aid of tenants or sharecroppers. Half a loaf is better than none and many of these farmers will discover that the half-loaf was all they needed in the first place.

Many small farmers who specialize in growing certain crops are in fine shape today. I met an Iowa farmer who cleared over a thousand dollars last year raising onions. This farmer came from Tennessee ten years ago and at that time didn't know one variety of onion from another. Last year he employed thirty-five colored boys and girls during harvest time. I met an Ohio farmer who sold $500 worth of pumpkins in Cincinnati last fall. He cultivates only forty acres—has ten acres in pasture. He is out of debt.

In a Tennessee community,—not far from Memphis,—I met a bunch of farmers I really felt sorry for. Owners, tenants and sharecroppers,—all of them were singing the blues and crying "hard luck." It took me less than two days to discover the trouble. It was simply a case of "The Fault's in Me." Here they were,—living in a community close to a good market,—fairly good soil,—and yet they couldn't make a living. They had some of the best marketable sweet potatoes I had ever seen, but claimed they couldn't sell them. They had some fine sor-

(Continued on Page 2, Col. 1.)

TALKS TO COLORED FARMERS

(Continued From Page 1)

ghum too. I asked them had they ever tried to sell cooperatively. Of course they had not. They couldn't get together and get up a decent farm organization because two or three community leaders were enemies and kept the people divided. The same old story,—jealousy, envy, spite,—just plain meanness.

This community was large enough to have two units of the N. F. C. F. in it if they just couldn't get along together in one unit, and I told them so. Those people will never be any better off until they organize and learn and practice cooperation. Probably some day they will, but I doubt it. What such communities need is new blood. They need more births and deaths.

I am convinced that lack of organization is the ONE BIG REASON why Race farmers are progressing so slowly. The government will never do much for farmers who do not think enough of themselves to get together in their home communities and make a start doing something for themselves and their neighbor-farmers. A farmer who is unwilling to do something for himself isn't worth being helped anyway. We must forget this old "me only stuff" and learn to get along with each other,—learn to cooperate. Every Negro farm community can organize and practice cooperative buying, production and marketing if a few of the community leaders get together and start. The N. F. C. F. has shown the way. It can be done. It is being done now in many sections and communities.

I feel sure that all independent colored farmers have cooperated with the government in signing acreage reduction and corn-hog contracts. Be honest and fulfill your contracts.

We feel sorry for you who will have to live from hand-to-mouth this year on account of acreage reduction. If you are industrious and of good character a way will be opened for you to get along. The N. F. C.F. is determined that you shall have a chance to earn more than a mere living somewhere. We are trying now to get some assistance for you,—help you can see and feel. If you need this assistance, let the N. F. C. F. know about it. We want to know how tenants and sharecroppers in all sections of the country are getting along. The more we know about your condition, the more we will be able to help you. Let us have the real facts. Are you getting enough to support yourself and family? Are you getting any work to do? Do you want to move? Could you take possession of a small farm and make a crop if you had a chance to purchase one on easy terms? Let us know your condition,—your prospects,—and what you would like to do. In some way, we may be able to assist you. The federal government has promised aid to distressed rural families and we are determined that it shall keep its promises.

"We feel that your movement is a good one and that if carried through it may he the means of great benefit to both the members of the Federation and to the general territory in which we operate. We are thoroughly convinced that the time has now come when the large plantations of this territory ought to be cut up into smaller farms and owned by the man who will actually work the soil. As your Federation should be the means of doing this we wish you every success. If we can cooperate with you we will be glad to do so."

Hon. C. V. Moore, President
The Mississippi Joint Stock
Land Bank of Memphis, Tenn.

Interesting News And Notes

Sales of lemons, limes, oranges and grapefruit have increased considerably since prohibition.

Open meshed bags are being used to stimulate sales of oranges, potatoes, grapefruits, onions and some other products. Buyers can inspect the produce better for quality and more strict grading has been the result.

Gov. Horner of Illinois has suggested to President Dawes of the Century of Progress exposition that soy bean oil be used in painting and re-painting the buildings on the exposition grounds. This is giving soy bean producers a good hoost.

A bald eagle came down and alighted on the back of a mule being ridden by a 16 year old dairy employee of Nashville, Tenn. The mule tossed the riders and left in a hurry. The employe's dog killed the bird which had a wing spread of more than six feet.

Evidently a Chester White sow, owned by little Billy Hanson, of Victoria, Ill., has never read about crop reduction programs. The sow farrowed nineteen pigs. Billy is a member of a pig club.

Allan Hoover, second son of former Pres. Hoover, has turned to dirt farming for a living. He and some associates have recently purchased a 500 acre California farm which Hoover will manage. He is learning the business from the ground up.

American wheat farmers have are thought to have little chance to secure dollar wheat this year.

Minnesota's farm crop value increased 33 per cent in 1933.

Timmie, a prize Boston bull terrier, was kidnapped in Chicago after taking the honors at three dog shows. The kidnappers demanded $500 ransom. Detectives were following clues.

A hungry cow entered a woodcutter's cabin in Canada and left it in a mess. The cow ate up seven pounds of bacon, 20 pounds of potatoes, a sack of rolled oats, five pounds of prunes, three loaves of bread, two pounds of beef drippings, a half-sack of crushed oats, two bars of soap and part of a sack of salt. She pulled his bed from the wall, turned over his pail of water, broke the plates, cups and saucers and when she left, upset the stove and spread soot and ashes over the wreckage.

North Carolina had 74,636 colored farmers in 1930. 18,978 were owners. Owners have decreased and tenants increased during the past ten years. Land owned is 943,506 acres: Value of land buildings owned is $36,881,352. This state ranks third in the value of land and buildings owned by colored farmers. Texas is first and Virginia second.

Students of a Texas College are making home-spun suits. The wool comes from the college's herd of sheep. It is woven into cloth by the students. Eighteen students are paying their expenses by weaving. The faculty is considering further developing the industry.

VEGETABLE SPRAY CALENDAR

(Continued From Page 1)

ed, such as a bucket, and mix thoroughly. Do not let the dust come in contact with sores you may have on your hand. Keep this dust air-tight when not in use.

POISON BRAN MASH

Take six pounds of wheat bran, five ounces of white arsenate or paris green, one pint of cheap molasses and one orange or lemon. Mix well the poison with the bran,—squeeze out the juice of the orange or lemon in the syrup, add the chopped rind and pulp of the orange or lemon and one-half gallon of water. Mix with the poison bran, adding enough water to make stiff. Scatter this among your plants in the evening. Do not put in piles or heaps. Several applications may be required.

CARBON BISULPHIDE

Use a half ounce of carbon bisulphide to fumigate one bushel of beans or peas. Place a shallow open pan or saucer on top of the seed in an air-tight enclosure. Leave for twenty-four hours. Do not bring fire near it as it is very explosive.

FUMIGATING BOXES

Get small boxes, about ten inches square and twelve inches deep, with the bottom removed and the top hinged. Tack a piece of cheese cloth by the four corners to the upper edge of the box. Stretch it just tightly enough to prevent it from bagging down and touching the plants. Pour half a pint of nicotine dust on the cheese cloth then close the cover. Force the box down over the hills into the soft ground and pull up some dirt around the edges to keep the fumes from escaping. Don't use the box too early in the morning. The temperature should not be lower than 70 degrees. Start early to catch the first of the insects.

BORDEAUX MIXTURE

This is the best remedy for leaf diseases of garden plants but you must apply it as soon as the first signs of disease are seen. The following is the formula called the 4-4-50 formula. It is the best one. Four pounds of bluestone. Four pounds fresh lump lime. Fifty gallons of water. Dissolve bluestone in a wooden or earthenware vessel using hot water. Dilute with half the water, or twenty-five gallons. Slake the lime in a small quantity of water and then dilute with the rest of the water. Pour diluted bluestone and lime together, straining thru a fine cheesecloth or brass wire strainer, and mix well. It will not keep very long so should be made fresh each time used.

DOMESTIC SCIENCE CLUB WRITER

(Continued from Page 1)

little difference in digestion whether or not the milk is curdled.

"The dieting fad to reduce seems to be waning.

"Liver used to be given away, or thrown to the cat. Now in the cities it is worth 90 cents a pound and hard to find. I have seen barrels of sauerkraut and thrown the brine into the alley. Now we pay well for a can of this very liquid."

The Old-Time Cellar

The speaker described foodstuffs and their storage, as they used to appear in the average home. "In the basement was a barrel of home-cured pork, a 10-gallon jar of sweet corn salted down, one of salted cucumbers and one of dill pickles. In another place was a barrel of homemade molasses There was a large keg of sauerkraut, and I don't believe the old butter crock was every empty. Hanging upstairs were two sacks of dried apples, a row of pumpkin rings and two or three pieces of home-dried beef. You can't imagine the collection of root vegetables.

"An old cook book published in 1832 says 'Beware of the water in which vegetables have been cooked. To protect the family health, empty it in the corner of the garden farthest from the house.' Today we cook vegetables in as small amount as possible and save the water so the family won't be deprived by any vitamins.

"As time goes on, our food fads and fancies change along with other things. The present generation is beginning to know that to cook properly is not only an art, but a science as well"

A Summer Sunday School of Methods

IS PROMISED RELIGIOUS FORCES ATTHE

Sunday School Congress Sessions

NORFOLK, VIRGINIA

June 6th to 11th, 1934

No better education can be had than the one you acquire yourself. We learn to do by doing. Come to Norfolk June sixth to the eleventh and start to work. We are doing our part to indoctrinate this present as well as coming generations. Will you do yours? Here are some of the Departments and Sections of the Congress with daily sessions.

Bible Conference
Home Department
Teacher Training Department
Senior Teachers' Department
Advanced Teachers' Department
Primary Department
Junior Department
B. Y. P. U. Department
Superintendents' Department
Boy Cadet Department
Music Department
Ministerial Department

LEADERS SHOULD SIT AROUND THE CRACKER BARRELS

Muncie Press: There is grave danger that agriculture may be led into unwise ways through the militancy of certain of its highly paid leaders. These leaders assume that all farmers are radical in their attitude toward government and willing to take an unjust share of public money, which is far from the truth. Farmers are not fooled much when they are given a little government money for not planting wheat or cotton after they find out they have to pay this money back through processing taxes. Nor is the small farmer who needs to cultivate all his land, since he has no surplus, rendered happy by being told to let some of his sparse acres lie fallow.

The intelligent farmer is as well aware as his leaders of the discomforts and the privations he had had to undergo in the last several years of low prices for products raised upon land that he paid two prices for. He does not have to be reminded of these things nor kept worked up about them by high-salaried agitators.

What congressmen, members of the legislature and representatives of the president need to do if they would get at the actual opinion of the farmers about government relief for them and kindred subjects, is to sit around the hot stoves and cracker barrels in the cross-roads groceries, these winter nights. If they were to do so they would get the surprise of their lives. They would find the reason for the lack of enthusiasm among the rank and file of farmers for the various kinds of relief to which they are being subjected. And the word "subjected" is used advisedly. These investigators would be astonished how often they would hear the remark, "I wish the government would just leave us alone."

Such investigators would discover a belief among many highly intelligent farmers that about all the national government can do for the industry is to provide a sufficiently high protective tariff to prevent the invasion of American markets by the products of foreign countries. They would hear of complaints, here and there, because of the dumping into the American markets of hundreds of thousands of bushels of rye that American farmers are perfectly capable of raising. In some parts of the country the farmers might ask whether hemp is still being imported into this country in as great quantities as formerly. Things like that.

Of course the investigators would find too, some radicals here and there among the farm group, just as among the labor group and even the capitalistic group, who are demanding that Uncle Sam act as wet nurse for the universe, but these would be outnumbered by others who still believe that the business of a government is to govern and the business of the indivdnal is to hew his own path which he is to tread to decent living conditions.

The farmer never has been a charity patient and more and more he is beginning to resent the paternalism of government. He always has been independent and proud of it. All he wants of the government is that it give him an even break by suppressing swindlers who manipulate the market for farm products to their own profit, and then preserve the American market for American farmers.

Given these things, the American farmer will get along, some way or other, and continue to do a good job of feeding the nation and any other nations that require feeding.

NEW RULE MADE ON PROCESS TAX

Producers Get Exemption of 300 Pounds if Total Sale is Under 1000

Regulations issued by the bureau of internal revenue Nov. 22, 1933, said that producer who slaughters his own hogs and sells or otherwise disposes of any part of the products is subject to the processing tax on the portion sold.

The commissioner of internal revenue now calls attention to the fact that that ruling has been changed. Under regulations just issued by the secretary of agriculture, approved by the president, the producer of hogs may sell or exchange during any marketing year not to exceed 300 pounds of products derived from hogs slaughtered by him without payment of any processing tax. The producer in this instance means the owner of the hog at the time of farrowing. If the producer processes hogs and sells or exchanges during any marketing year products derived therefrom in excess of 300 pounds but not in excess of 1000 pounds he shall be entitled to the exemption on 300 pounds, but shall pay the processing tax on the amount in excess of 300 pounds. He is not entitled to any exemption if he, together with his own family, employes or household, processes hogs produced by him and sells or exchanges more than 1000 pounds of the products derived therefrom during any marketing year.

Any person who slaughters hogs and sells all or any part of them should confer with the collector of internal revenue for his district who will advise him as to whether or not he is subject to a tax, and, if so, will assist him in preparing and filing the necessary returns.

NEW YORK CITY SUPPLY OF EGGS NEAR BOTTOM

New York City, Feb. 15.—Egg supplies in New York City are near bottom, as reduced incoming shipments aggravate the condition brought about by exhaustion of storage holdings. To further complicate matters, the Lenten season now is beginning.

PERMIT MUST BE HAD IN SHIPPING ONION AND CABBAGE PLANTS TO ARK.

Rogers, Ark.—All shipments of onion and cabbage plants coming into Arkansas from other states must bear a permit issued by the chief inspector of the State Plant Board, according to orders this week, issued by Paul H. Millar of Little Rock, chief inspector, who advises growers that the ruling was set up last year by the board and becomes effective this season for the first time. Permits, Mr. Millar says, will be issued to growers in other states who have had their fields or beds inspected by the official inspector of their own state and found reasonably free from insect pests and plant diseases.

Chief Inspector Millar states that pink root disease of onions and plant lice or aphids on cabbage are the two sources of the greatest trouble. He says the disease is not known to have occurred in Arkansas except where it has been brought in on plants from other states. For that reason the rules will be rigidly enforced with a fine of not to exceed $100 for transporting onions and cabbage plants into the state without a permit attached to each shipment.

A BIRTHDAY CAKE THAT WAS DIFFERENT

When Neva had a few little friends in to help celebrate her birthday I wanted to make her a birthday cake that was different. So after the cake was baked in layers and put together with white icing, as well as covered with it, I used tiny red and green stieks of candy to represent the proverbial candles. On top of every "candle candy" I placed a tiny orange gumdrop, pressed the right shape to appear like a flame. The effect was very pretty, and when Neva cut her cake each guest was given a "candy candle." As the little guests had always been accustomed to "real birthday candles' they thought this innovation very clever.

TUSKEGEE CO-OP ASSN. STARTS ITS 40th YEAR

Tuskegee, Institute Ala., Feb. 16. The Tuskegee Co-operative Building and Loan association, with an authorized capital of $500.000, and with Warren Logan, retired treasurer of Tuskegee institute, as secretary-treasurer, has begun its 40th year of operation without interruption.

The past few years of economic uncertainty have failed to shake the sound foundation of this co-operative association. At the recent meeting of stockholders and directors, dividends were declared and the new era promised by the apparent uplift of business in various fields was prophesied by Charles H. Gibson, president.

DON'T BE AFRAID OF FAILURE

Better try a dozen ideas that fail, in an attempt to find one that will work, than to sit idle and never do anything, fearing that you might make a mistake.

KILLS ROOSTER IN SELF-DEFENSE

Self-defense was the plea entered by Wallace Reed on a charge of killing a rooster at Henderson, Tex., belonging to Mrs. C. B. Clark. The rooster attacked him while he was doctoring a hen. Reed testified.

FREEZING MAKES ALCOHOL IN APPLES; KILLS COWS

Boston—The twenty cows owned by Lena Finney at Pittsfield, Mass., had a repeal celebration of their own that resulted in the death of two. The cows had eaten apples that had frozen and thawed out again, which caused a chemical change that produced alcohol.

Mose Melonwater went for a ride in an airplane. When he came down he said to the pilot: "Thank yo' boss, fo' dem two rides.'

"Two rides?" said the aviator. "You've only had one!"

"No, sah," exclaimed the Negro. "Ah had two—mah fust and mah last."

WISCONSIN MEN PROFIT BY FUR FROM CAT FARM

The development of a new fur raising industry has been undertaken by Melvin and Orr Brenzier, Wolf Creek, Wis., brothers, says the Milwaukee Journal. Long-haired Angora cats are being raised by the Burnett county pair for furrier purposes.

The raising of cats for the fur industry by the Brenziers is believed to be the first venture of its kind. They have found the marketing of cats a profitable industry.

The ease of raising the cats, the rapidity with which they multiply, favor the venture. Little difficulty is experienced in securing original stock or in raising the young.

WHAT MAKES A MAN!

A man is already of consequence in the world when it is known that we can implicitly rely upon him. Often have I known a man to be preferred in stations of honor and profit because he had this reputation: When he said he knew a thing he knew it, and when he said he would do a thing he did it.—E. Bulwer-Lytton.

THE MODERN FARMER

Official organ of the National Federation of Colored Farmers, Inc.

Leon R. Harris - - Editor

Published monthly by the Modern Farmer at Nashville, Tennessee.

Office, 447 4th Avenue, North.

Devoted to the interests of the Farmer, Truck Gardener, Livestock and Poultry Breeder, the Home and the People.

Entered as Second Class Matter, April 10, 1929, at the Post Office at Nashville, Tenn., under act of March 3, 1879.

All contributions for publication in the Modern Farmer should be addressed to The Modern Farmer, 447 4th Avenue, North, Nashville, Tenn.

No libelous matter will be published. Unsigned articles or letters, and those written on both sides of the paper will not be used.

Subscription price $1.00 per year, 75c for six months, payable in advance. Personal checks must be certified. Make all checks or money orders payable to The Modern Farmer.

Advertising rates and sworn circulation figures presented upon application.

"OUR SLOGAN"

STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT.

OUR PLATFORM

1. A Unit of the National Federation of Colored Farmers in every community, of colored farmers.
2. Co-operative buying, producing and marketing.
3. Every colored farmer a farm owner.
4. Abolition of debt-slavery, injustice and persecution.
5. A written contract for every colored farm tenant and sharecropper.
6. Better rural churches, schools and homes.

Editorials

From the Bible

"Trust in the Lord, and do good; so shalt thou dwell in the land, and verily thou shalt be fed."—Psalm 37:3.

Daily Thought

When things go wrong as they sometimes will,
When the road you're treading seems all up hill,
When the funds are low and the debts are high,
And you want to smile, but you have to sigh,
When care is pressing you down a bit,
Rest, if you must—but don't you quit.

—Anon.

A NEWER DEAL PROPOSED

The landless farmers of the cotton, tobacco and peanut belts of the South are the farmers who need assistance. They number tens of thousands. They are poverty stricken, debt-slaves, unorganized. They have no voice in Washington or elsewhere. They have been victims for generations of an evil system of farming which, as Edwin R. Embree, president of the Julius Rosenwald Foundation says, makes life "not worth living by any group that calls itself human."

A NEWER DEAL than that proposed by the "New Deal" must be planned and carried through for the benefit of these farmers. The objectionable tenancy and sharecropping system must be destroyed, root and branch. It should be destroyed,—it can be destroyed,— and it must be destroyed sooner or later. The present administration, which has more power than any national administration has ever had before,— should take steps immediately to destroy it.

It is a fact well known that the only successfully farming anywhere is done by farmers who own the land they till and till the land they own. The New Deal has insisted upon acreage reduction. Under the terms of the Bankhead bill,— the New Deal also restricts marketing of cotton this year to ten million bales and certainly, thousands of poor white and Negro landless farmers will be prevented from earning a living. The New Deal has also set up locally managed production credit associations which will be dominated by large farmers and planters to the detriment of small farmers. Apparently, large planters and speculators have gotten what they wanted. The landless farmers will not get what they should have until they get the opportunity to own the land they cultivate.

We advocate the NEWER DEAL. These landless farmers are the real farmers of the South. Let their voice be heard. Break up the big plantations. Let the government buy these big estates, —subdivide them, and sell them to their farmer tenants with long time payments and low rates of interest. Let rural life be made attractive for these debt-slaves,— peons,— these hand-to-mouth livers who have never had a chance to live as Americans should live in America. We propose the NEWER DEAL! Let it come!

FUNNY INFORMATION

A member of the N. F. C. F. writes that the local Red Cross chapter received some clothing for distribution to the distressed rural families in his community. He went to the chairman who was distributing the clothing and requested some shirts. The chairman told him he would have to pay the express charges which amounted to fifty cents on each shirt. Such shirts were selling locally at sixty cents each. Some funny information. We wonder how many were foolish enough to pay the local Red Cross chairman the fifty cents "express charges."

Another member writes that his landlord tells him he cannot give him a written contract because he does not own the land. This landlord is probably the manager of the plantation or has rented it and is sub-leasing to sharecroppers. Of course he can give his croppers written contracts if he wants to do so. Unless they do get such contracts they are foolish to work for him. Every tenant or sharecropper should have a written legal contract with the one he rents from whether it is the landlord, the manager or sub-lessee. If he has power and authority to ask you to work then he has authority enough to give you a written legal contract.

Another member writes that his landlord applied for a production loan last spring and that he, as tenant, signed for his landlord to get the money,— and now he has discovered that his landlord charged him twenty-five cents on the dollar for the amount of the loan he let him have to make the crop.

We often wonder where so many scheming, dishonest people come from.

PIG OR PUP

The American Farm Bureau Federation should be either pig or pup,—it should be the real champion of all the farmers of America or it should admit openly that it is the champion of the big farmers of America only. If it desires Race farmer members it should say so and admit them to membership and give them a voice and vote in every State of the Union. If it does not want them, then it should not take their membership dues in some sections and refuse them in other sections.

The Farm Bureau advocates compulsory cooperation. Very well and good if it will work to the advantage of the Race farmer of the South,—to the tenant and sharecropper as well as to the landlord and planters. It will certainly not work to the advantage of sharecroppers however if they have to meet secretly and order groceries and other farm supplies cooperatively, secretly, as some of them have been compelled to do. It's also poor cooperation that lets a group of Bureau farmers buy a car of seed or fertilizer cooperatively and resell a portion of it to non-members at an exorbitant price and profit.

The Farm Bureau also advocates that the federal government set up machinery to buy lands which the farmers may wish to dispose of. We wonder when it is going to advocate that large estates, farms and plantations owned by absentee landlords and cultivated by tenants and sharecroppers be taken over by the government and re-sold to those who cultivate them.

A Good Farmer-Governor

The farmers of Georgia elected the present Governor of that state, —Gov. Eugene Talmadge, — and they elected a good one. It is reported that he did not carry a single city in the state or town large enough to have street cars or paved streets.

Gov. Talmadge has cut taxes, utility rates and auto licenses. He has a fine scheme for farm relief, —one of the most intelligent schemes we have ever heard of. He would have the farmers stop all work every seventh year except production of vegetables, milk, eggs, fruit and other perishable necessities, and give consumers the chance to use up the farm surpluses.

Gov. Talmadge believes that if the farmers are allowed to use their own hard common sense awhile they will come out all right It's a pity more officials have not the same idea.

Observe Farmers' Sunday

Every rural community should observe Farmers' Sunday, April 29th. Farmers should invite their town and city friends and have good church and community programs. The farmers' real business is farming. He should boost his business and his organization. He should show his fellowmen how important a business it is,—how wonderful it is,— how necessary it is. He should prove his love for it by honoring it this one day particularly Make Farmers' Sunday the biggest day in your community this year.

"Flatterers are like cats that lick and then scratch."

"You can manage a bad mule better if you cut off some of his feed."

First of all,—the American Negro should be loyal to his Race,— then to his flag and country,— to his friends and even to his enemies.

"Ere long the greatest of all arts will be the art of obtaining a confortable substance from the smallest area of soil."

—Abraham Lincoln.

"Make up your mind now to not only live from products raised on your farm, but always have surplus to sell."

Dr. G. W. Carver.

GARDEN TOPICS

By Dr. Floyd Brailler

Now that spring has come in real earnest and leaves are appearing in abundance on all the trees and shrubs everywhere, it is well to think of the insect pests and diseases to come. Aphids and other insects seem to be waiting for the first appearance of leaves on roses and flowering shrubs to appear by the tens of thousands. At the same time the spores of rusts, molds, rots and other fungus diseases start growth on the new shoots and soon play havoc. If there is anytime in the year when one ought to spray, it is now, for if we wait until later the injury will have surely gone too far to be remedied.

Possibly ansul sulphur used according to the directions on the package, will come nearer to destroying both insects and diseases producing spores, than any other spray we know. If this is not at hand, some good nicotine spray mixed in soap-suds and properly applied, will get rid of the insects and Bordeaux mixture sprayed on a day or two later will take care of the disease germs.

Dorothy Perkins roses if sprayed with ansul sulphur, will not have aphids and neither will they mildew later on. A good spraying with permanganate of potash will take care of the mildew and this is the time to apply it. Do not wait until you see the diseases appearing on the flower buds.

Now is an excellent time to set out all bedding plants such as petunias and snapdragons. It is especially important that such plants as snapdragons, columbines and delphinums be dipped in some good disinfectant before they are set out. Either bichloride of potash are excellent for this purpose.

We would like to see many of our readers grow some really worthwhile tomatoes this year. In order to do this dig a hole fourteen or fifteen inches deep and fully a foot and a half wide and fill it with well-mixed soil such as you would use in your best flower bed. A mixture of one part well-decayed leaf mold, one part of stable manure, and two parts of good garden loam, is just the thing. Set a good, healthy tomato plant in this hill and immediately drive a strong stake beside it. In fact, it is just as well to drive a strong stake first and set the plant beside the stake. The stake should be at least five feet high above the ground and as thick as a man's wrist. Even six or seven feet high is all right for strong growing varieties of tomatoes. Pinch off all branches of the tomato plant as they appear and tie the main stalk fast to the stake from time to time as it grows taller. This should be done with strips of soft cloth rather than with hard string. When the plant has reached the heighth of five feet it may be all right to allow any branches that might come out to grow. Such a plant if well-watered and cultivated, will bear some fifteen to thirty pounds of tomatoes of a quality that we seldom see. A dozen plants cared for in this way will supply all a family would need. If a heaping teaspoon of any complete fertilizer is dissolved in a gallon of water and the plant is watered with this every two weeks as soon as it begins to bear, it will continue to get tomatoes until frost.

Some growers prefer to use three stakes for each plant, setting them in a triangle about a foot apart and setting the plant in the center. Then, instead of actually tying the plant to the stake, either strings or strips of cloth are tied around these stakes at intervals of six or eight inches and these acts as a support to the tomato plant. We have known plants grown in this way to bear heavier yields than we have given but we may safely count on this yield.

Plant a few good quality, early-growing radish seed in some good location at once. Radishes require very little room and will be out of the way in some three to four weeks. Even though we have nowhere to plant except in the rose bed, between the rose plants, it will pay to do this. A space a yard square will produce hundreds of radishes of such quality as we can seldom buy in any grocery store, within three weeks of the time they were planted.

SCIENTIFIC SHOWS NEW FAIR WONDER

Chicago—Seeming miracles will be performed daily from noon till late at night in a scientific stage revue that will be a free feature of the new World's Fair which opens here May 26.

Ten thousand persons at a time may view the wonders of the show to be presented in the Court of the Hall of Science Fascinating, amazing to the layman, these acts be supplied by the laboratories and research staffs of important industrial organizations exhibiting at the Fair.

Underlying the purpose of the scientific theater is the serious presentation of science at work, but the performing of "stunts" will bring out surprises and thrills in the most dramatic manner. Showmanship has come to be recognized as one of the prime necessities in visual education. The Fair is an immense testing laboratory for these effects, and the results will be seen in the scientific theater.

One of the typical acts, this one developed by the World's Fair amateur radio council, will have a complete radio station wheeled onto the stage, with operators who will be able to reach 60 different countries from the theater. Screens thirty feet square will reprodnce the translations of code message as they are received. The public address system will bring the spoken messages to the audience.

Acts are also planned to demonstrate invisible rays and other scientific marvels.

The Hedo of the Amistad

By Carter G. Woodson, of Washington, D. C., Editor of the Journal of Negro History, and the Author of The Negro In Our Countny, The Mis-Education of The Negro, and The Negro Professional Man

The story of the "Amistad" is almost as romantic as that of the "Creole". Joseph Cinque, the hero of the hour, gave the modern world a new idea of the African's love of freedom. He demonstrated all the elements of leadership and startled the land of slavery. The occasion was that in violation of Spanish laws a slaver undre Portuguese colors landed a cargo of kidnapped Africans near Havana in 1839. A few days after, Ruiz and Montes, Spanish slave dealers, purchasing a number of them, obtained a license to transport fifty-two of them as "legal slaves" from Havana to Principe Confined to the hold of the slaver, these captives could not appeal to the laws of the land, and therefore appealed to natural law.

During the month of August, 1839, the people along the Atlantic Coast were very much excited by reports that a vessel of "suspicious and piratical character" had been seen in these waters. This vessel was described as a "long, low, black schooner," and manned by blacks. The United States steamer "Fulton" and several Revenue Cutters were dispatched to run it down. On the 26th of that month it was reported that while this vessel was sounding between Cardner's and Montauk Points, a schooner was seen lying in shore off Culloden Point, under suspicious circumstances. Seeing a number of people on the beach with carts and horses and a launch passing to and fro, Lieutenant Commander Cedney, in charge of the "Washington", armed and dispatched a boat with an officer to board the strange vessel. On coming along side, they discovered a number of Negroes on the deck and twenty or thirty more were on the beach. Two white men came forward and claimed the protection of the officer.

Five nights after the vessel was out, the captives had risen and murdered the captain and three of the crew. They then took possession of the vessel, with the intention of returning to the coast of Africa. Pedro Montes, passenger, and Jose Ruiz, owner of the slaves and a part of the cargo were saved only to navigate the vessel. "After boxing about for four days in the Bahama Channel, the vessel was steered for the Island of St. Andrews, near New Providence; from thence she went to Green Key, where the blacks laid in a supply of water." The whites, forced to operate the vessel inasmuch as the captives did not understand navigation, steered it to and fro in American waters, while pretending to the self-emancipated Africans that they were directing their course toward Africa. Thus they finally reached the shores near New London.

On the discovery of the "Amistad" Lieutenant Gedney took possession of the vessel. He did not know the language of these captives, however, and they could not understand him. "Joseph Cinque, the leader, having been put on board the 'Washington', the vessel by which they had been captured, displayed much uneasiness, and seemed so very anxious to get on board the 'Amistad,' that his keepers allowed him to return. Once more with their leader the blacks clustered around him, laughing, screaming and making other extravagant demonstrations of joy. When the noise had subsided, Cinque made an address, which raised their excitement to such a pitch, that the officer in command, had him led away by force. Cinque was then returned to the 'Washington' and was menaced to prevent his leaping overboard."

Later Cinque "signified by motions, that if they would take him on board the schooner again, he would show them a handkerchief full of doubloons," Spanish gold coins. He was accordingly sent on board. His fetters were taken off, and he once more went below, where he was received by the Africans in a still more wild and enthusiastic manner than he was the day previous. Instead of finding the doubleoons, he again made an address to the blacks, by which they were very much excited. Dangerous consequences were apprehended; Cinque was seized, taken from the hold, and again fettered. While making his speech, his eye was often turned to the soldiers in charge; the blacks yelled, leaped about, and seemed to be animated with the same spirit and determination of their leader. Cinque, when taken back to the "Washington" evinced little or no emotion, but kept his eye steadily fixed on the schooner.

Preliminary hearings were given by the Federal courts. The captives were finally imprisoned. It was deemed wise, however, to separate Cinque, the leader, from the rest of his companions over whom he exercised much influence. An investigation showed that the captives were brought from the Guines Coast, from what they called the Mendi Country lying to the West of Sierre Leone and somewhat to the North of Liberia. Cinque had been a planter in that land. There he had been captured and sold to the trader who transported him and others to Cuba.

The Spanish minister to the United States requested the return of these captives to Cuba on the grounds that they were charged with murder of citizens of that country; and the pro-slavery element in charge of Van Buren Government in Washington with Forsyth as Secretary of State and Felix Grundy as Attorney General were ready to remand them to their enslavers. The Federal Government had actually ordered a vessel to transport these captives to their doom in Cuba as soon as they could be taken out of the custody of the court. The friends of freedom became busy, however, and worked the matter out to the contrary. S. P. Staples, T. Sedgwick and R. S. Baldwin appeared for the captives. The proslavery interests, thinking that the District Attorney might not be equal to the occasion, employed R. I. Ingersol as special assistant.

The Africans were held for murder. An attachment was also issued from the District Court against the "Amistad" and her cargo in behalf of Ruiz and Montes, and of Lieutenant Gedney for salvage on vessel and cargo "The district attorney, in behalf of the government, claimed possession of the vessel; so that the Negroes if they were slaves could be returned to their Spanish owners, and if they were free, be returned to Africa, according to the provisions of the treaty of 1819. Justice Thompson, of the Circuit Court, decided that the Africans could not be held for trial for murder committed on the seas, on board of a Spanish vessel; but he refused to discharge them, on the ground that they were held in custody by the District Court in consequence of libels and attachments against them."

"The court, however, decided that the papers of Ruiz and Montes were fraudulent; that the Negroes were native Africans illegally imported; that they were not slaves; and that they should be sent back to Africa, according to the treaty of 1819. No

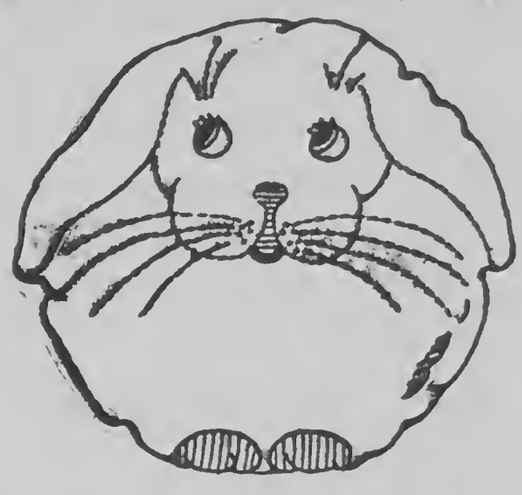
NEEDLE ART NOVELTIES



PILLOW DOLL NO. 121

Still another member of our nursery pillow family is this little doggy—who we can't understand why—has a case of the "blues" today. We could make him into the coziest pillow—soft enough for baby's swing—and cute enough for her stroller. She won't mind taking that afternoon nap with him keeping watch. Let's fashion him of white cambrie or broadcloth, and use the satin stitch for his eyes. We'll outline his whiskers and eyebrows in black as well as his ears. Pattern contains cutting chart and full instruetions. This is pattern No. 121.

We have prepared a wonderful new 32 page Book showing over 90 newest needle work novelties, many in actual colors. The above pattern will be included free with each order for this Book which is 25c. Ask for Book "D." Single patterns are 10c each. Be sure to state pattern number wanted. Send order with coin to.

FORD ANSWERS FARM PROBLEM

TO DISPLAY HIS SOLUTION IN EXHIBIT AT tNEW WORLD'S FAIR

Chicago—Henry Ford has revealed that he is planning to demonstrate what he believes is the way to a lasting solution of the American farm problem in the new World's Fair which opens here May 26. He will use only a soybean patch, an average barn, and machinery he has developed.

"We are going to try to show how any farmer who is so minded may begin, on a scale within his means, the partial industrialization of his farm and the manufac ture of product directly for industrial markets," said Mr. Ford in confirming reports of his plan.

"What we call the farm problem must be solved by each farmer acting for himself" he continued. "Just as soon as the individual farmer can make money, the farm problem will vanish for good and so will most of our other economic problems.

To Plant Soybeans.

"Apart from making motor cars, we are in the farming business at Dearborn, so at Chicago we are going to talk as one farmer to another. We think we've found a way to increase farm income and we are going to pass along what we've learned for the benefit of anybody who cares to make use of it."

Mr. Ford said that a barn is to be built adjacent to the main Ford Exposition building now being erected at the World's Fair. It will be, he promised, a very ordinary type of barn such as is found, often unused, on thousands of American farms.

In this barn will be operated soybean processing machinery with which Mr. Ford has been experimenting for several years. A patch of soybeans will be planted nearby.

Distillation Method New.

"The processing plant will be of the simplest sort," Mr. Ford explained. "Many farmers could build one like it out of odds and ends. It will be steam operated and have a capacity of one-third of a ton of soybeans every eight hours. One man could run it. A single farmer or a group of farmers might own it, according to the acreage planted in the beans.

"We decided on soybeans because they seem at this time to offer the greatest number of uses and markets. Not only are the beans hardy and easily grown but they are also a fine soil builder. Too, they may be harvested and processed during the winter months when the farmer has less work to do. One trouble with farming now is that it is too much concentrated in the summer months.

"We've discovered nothing about soybeans that hasn't been known but we've learned how to get a complete extraction of soybean oil. Old methods of working the beans, in use for centuries, depend solely on pressing and leave about a third of the oil in the mash. Our method, which is distillation, effects a one hundred per cent extraction. The process is continuous too.

Molding Residue.

"The oil-free residue is an excellent food for man. It is fifty per cent protein and ninety-five per cent digestible. Also the farmer may feed it to his livestock with fine results. Or he may put it into another simple machine and from it manufacture plastics, an industry that is just getting under way.

"Today such parts of the Ford car as the horn button and the gearshift knob are pressed out of soybeans. Some day chairs, desks, doors and all sorts of things now made of wood will be produced from the same or similar materials. It's only a matter of getting down the costs.

"At Chicago we will show a machine for molding the soybean residue after the oil is extracted. It will be in actual operation so that farmers may see how simple the whole process is and how readily it could be adapted for farm use."

Mr. Ford pointed out that soy bean oil has a more widely diversified use than any other vegetable oil unless it be linseed oil. Known as a semi-drying oil, it possesses a combination of properties which qualify it for use in a wide variety of manufactured products.

Manufacture Unrestricted

Principal among these are cooking oils and vegetable shortenings, oleomargarine, mayonnaise, salad dressings, soft and liquid soaps, cleansing compounds, paints, varnishes, enamels and lacquers, linoleum and oilcloth, printing inks, grease and lubricating compounds, rubber substitutes, patent and artificial leather, putty, auto top goods and waterproof fabrics.

All Ford cars are now finished in an enamel in which soybean oil is used exclusively. There are about a half bushel of soybeans used in the manufacture of every Ford car, Mr. Ford said.

He emphasized that he is not interested personally in manufacturing any of the machinery he has developed, that anybody who wants to manufacture it may do so without restriction so far as Ford interests are concerned.

COOPERATIVE BUYING OF FARM SUPPLIES POPULAR

Cooperative purchasing of farm supplies has grown more rapidly during the last five years than any other form of cooperative activity, according to studies conducted by the farm credit administration. The studies reveal that the number of such associations is well above 1600, with a total membership of more than 500,000 farmers doing an estimated yearly business of more than $140,000,000.

The cost of the chick and egg-laying mash may be kept low by purchasing only the necessary supplementary feeds to mix with the home-grown grains, extension poultrymen at Iowa State college suggest.

TRAIN SEVERS CAR, MAN SAFE

Crashing through the railway crossing gates near Cullybackey, Ireland, David Hewitt's automobile was struck by the engine of an express train. The car was bisected, half landing on each side of the track. Hewitt climbed from the front seat uninjured, and the rear part of his car was found 150 feet down the rails.

OTHERS SAY THIS: ABOUT THE N. F. C. F. AND MODERN FARMER

"Undoubtedly the efforts and aims of your organization, if carried to a successful conclusion, will be of great benefit to the colored farmers of the nation."—Hon. James C. Stone, Former Chairman Federal Farm Board.

"It was indeed good of you to let me see your editorial describing the deplorable conditions among the membership of your organization. By all means keep on speaking out vigorously about such things"—Hon. Gifford Pinchot,—Governor of Pennsylvania.

MOUND BAYOU FARMER APPOINTED

Mr. John W. Williamson, Jr., of Mound Bayou, Miss., has been appointed to handle applications made by Race farmers for production loans from the Clarksdale Production Credit Ass'n. He is the first colored farmer appointed for this work.

For several weeks the National Federation of Colored Farmers, Inc., worked to have Race farmers in heavily populated colored farm communities appointed for this work. Mr. Williamson is the first named and other appointments have been requested. Colored farmers were unable to organize any Production Credit Ass'n., but there is apparently no logical reasons why representatives should not be appointed to handle their applications for loans in counties where they form the majority of the farm population.

THE HEDO OF THE AMISTAD

(Coninued from Page 5.)

sooner was the decision made than by order of the Secretary of State, the district attorney took an appeal to the Circuit Court. This tribunal, however, affirmed the decision of the lower court. The proslavery interests then appealed to the Supreme Court of the United States. In the meantime the friends of freedoom had taken the precaution to employ the ablest counsel available. The venerable John Quincy Adams made the final argument before that body.

"The Supreme Court held that the Africans were kidnapped and unlawfully transported to Cuba; and they were purchased by Ruiz and Montes with a knowledge of the fact; that they were free; that they did not become pirates and robbers in taking possession of the "Amistad," and in attempting to regain their native country; that there was nothing in the treaty with Spain that justified the claim for their surrender; and that the United States was bound to respect their rights, as much as those of Spanish subjects. This highest tribunal reversed that part of the decision of the lower courts which directed the Negroes to be delivered to the President, to be transported to Africa, and dismissed them from the custody of the court."

As Henry Wilson has well said, "In all acts of slavery's grim tragedy there have been few which presented more elements of interest than that of the 'Amistad' captives. With two continents and the wide Atlantic for its theatre; with the robber chiefs of Africa, the slave-pirates of the ocean, the representatives of a European monarchy, and an American republic for actors, seemingly engaged in a common cause and inspired by a common spirit; it presented contrasts and the most unlooked-for and contradictory combinations. It presents barbarism in its rudest and most repulsive aspects, and Christianity in its most attractive and lovely attitude. It began with the midnight hunt for captives in the wilds of Africa; it closed by Christian men and women sending and accompanying these captives back to Africa; to plant churches and schools among their benighted countrymen. Through the whole, however, the one dark and hideous fact stands out that slavery is essentially the same, its adherents substantially alike. A system of violence, impatient of all restraints, whether of reason or of conscience, humanity or religion, the laws of the heart or the laws of the State, it seems mainly intent on compassing its own ends, by whatever means and at whatever hazards. It was the same in Afric and in America; in the barracoon and in the middle passage; under a monarchy or in a republic; in a Pagan, Catholic, or Protestant country."

BETTER NOT TO PRUNE THAN BUTCHER TREES

Pruning should aid the tree in its natural habit of growth and in its battle against the enemies of disease, insects and adverse weather conditions. However, it is better to allow the tree to go unpruned than to practice some of the popular methods of butchery.

The principal accomplishment in pruning is the modification of the tree from and size, although the practice will affect the color, size and quality of the fruit. The form of the tree should not be changed radically, and its size must not be reduced too much, if maximum yields are to be obtained. On the younger apple, pear and cherry trees, the more wood that is removed by pruning, the smaller the crop produced and the longer it takes the non-bearing trees to come into production.

On older trees, the removal of non-vigorous wood thins out the branches so that resulting fruit is of improved color and size. This thining does not reduce the yield on some varieties, if done carefully, and does permit a more thorough job of spraying for the control of insects and diseases.

When fruit trees are first planted, important training can be accomplishing by pruning and disbudding. During the first two seasons of growth, proper training will produce strong trees that will live a long time. Such trees will require less pruning later on.

THINKING

If you think you are beaten, you are;
If you think you dare not, you don't
If you like to win but you think you can't,
It's almost a cinch you won't.

If you think you'll lose, you're
You've got to think high to rise;
You've got to be sure of yourself before
You can ever win a prize.

Life's battle doesn't always go
To stronger or faster men;
But sooner or late the man who lost,
For out in the world we find,
Success begins with a fellows will—
It's all in the state of the mind.

If you think you are out-classed, you are;
wins,
Is the man who thinks he can.

—Walter D. Wintel.

CENSUS OF AGRICULTURE

The 15th census of the United States issued by the department of commerce and relating to the subject of agriculture, dealing in a large measure with the urban population by sections and divisions, between the years of 1910 and 1930, presents an interesting and exhaustive monograph prepared by Charles E. Hall, an eminent authority on agricultural pursuits.

The report significantly shows that there has been a distinct loss of both Negro and white farm population. The land operated by Race farmers has in the past 10 years decreased nearly four million acres, and this decrease has been mainly in the South. The report also indicates a decrease in acreage operated by white farmers, but not on so large a scale.

Many causes may be mentioned as productive of the rural migration from southern farms. The inclination upon the part of the younger men to invade the cities seeking a larger and greater opportunity for economic freedom has of itself produced a constant drain on farm labor. The greater cause, however, with relation to the Race farmer has been his inability to secure the proper protection for himself and family as well as to be able to compel payment in the courts in the South for both his labor and his goods.

By reason of these twin evils thousands have been forced to leave a semislave agricultural environment for sections of the country where they would at least be assured of receiving their pay for whatever employment they were able to secure. This enforced shifting of Race population to the larger industrial centers of the North and East has had its harmful effect in that it has imposed upon those cities large numbers of people who are unprepared to share the responsibilities of urban life.

Solution of this economic problem can only be accomplished by people returning to cultivation of the soil where they are qualified and more properly fit to meet the requirements than they are the strenuous efforts to live in large cities.

—Chicago Defender.

BLACK ROSE NOW BEING PRODUCED IN AMERICA

Philadelphia—A black rose, budded from the oginrial in Germany, is now being produced in this country. It has a petal that is a deep red at the stem, becomes a deep purple as it widens out and is entirely black at and near the tip

When a farmer gave up his farm near Bagdad, Iraq, crows which had been stealing eggs began to take golf balls from a neighboring links.

GROWERS OF VEGETABLES EARN BILLION A YEAR

The total of farm income from vegetable growing in the United States averages nearly one billion dollars every year. This is more than the farm income of all grains combined or all of the cotton and cotton seed grown in this country. It is also nearly twice as much as all fruits and nuts grown in the United States.

MASS FARM PRODUCTION FELL DOWN

Only a few years back when industry was prospering and mass production was on a pedestal, the farmer was told that he would have to get on a "business basis like the rest of us." Mass production was going to be the solution of his problem and he might as well get ready for it.

While numerous reputations for wisdom and business acumen were being shattered, the big farm and mass production idea was getting a shock in the agricultural area. Montana and Texas had outstanding examples of such undertakings and they toppled with the rest.

Nothing has happened to indicate that there is any better way of farming than by the family unit. As President Hoover wisely said in his address of acceptance in 1928, farming is a manner of living as well as a means of making a living.

—Moline Dispatch.

LIVER REQUIRES LOW HEAT, AND MUST BE DONE, NOT OVERDONE

Pork liver, lamb liver, and beef liver are all much cheaper than calf liver, but their food value is much the same.

Enjoyment of liver depends largely on how it is prepared. Liver should be cooked with a low heat and for as short a time as possible to get it done. Pork liver, like all pork, should be served well done Scalding before cooking will make older and less tender liver more palatable.

For school lunches chopped cooked liver with chopped pickle or chopped onion makes a good sandwich. Liver, scalloped or creamed or creamed with macaroni, is a good hot dish. Liver that is not tender enough for boiling can be used for braising, grinding, or chopping and creaming, for hash, or it can be made into croquettes or a loaf.

BACKS WAGON, TONGUE FLIES UP, HURLS HIM TO DEATH

Bloomington, Ill (Special)—E. S. Carter, 79 years old, of Armintgon, Ill., was killed backing a farm wagon by the tongue. The wagon hit a bump, causing the tongue to fly up, lifting the aged man off his feet. He fell head first to the ground and his neck snapped.

LIGHTNING KILLS PREACHER

While standing beneath the pulpit in the First African Baptist church, East Savannah, Ga., at the beginning of a service which was to be his ordination, Marion M. Moultfie, colored was killed by a bolt of lightning.

RACE WOMAN HOLDS FARM

Mrs. Alice Keaton, 69 years old, and for nearly fifty years servant in the home of the late C. B. Danforth, wealthy white planter in Crittenden county, Arkansas, was given a break in the federal court at Memphis last week, when Judge Anderson issued a temporary injunction against W. M. Garrott, administrator of the Danforth estate.

Mrs. Keaton claims prior to the death of Danforth about two months ago, she was deeded a twelve thousand dollar farm by the deceased. This deed it is said, bears the date of 1926. The administrator attempted to ignore the transaction and sell the farm. Judge Anderson's injunction is to remain in force until the case can be heard.

"THE GOSPEL OF THE DEEPER PLOW"

(Condensed from an article in the "Missionary Herald.")

While the modern missionary is as faithful as his predecessors in stressing the "things of the Spirit," he is, perhaps, more skillful in using the means at hand to make his people realize that Christianity seeks the physical welfare of men as well as their spiritual development. It has remained for Rev. Harry S. Martin of the Charles E. Jefferson Academy to give practical aid to the Chinese farmer and use a variation of the "County Fair" as a real means of grace.

From 40,000 to 50,000 persons were directly reached last autumn by means of the series of rural fairs which Jefferson Academy undertook as one part of a threefold project. These fairs, five in number, exceeded the fondest hopes of their sponsors. By means of them the Chinese farmer saw what he could do to raise better chickens and hogs; how he could improve his vegetable and general farming by using labor-saving machinery, studying seed selections, and exterminating or controlling the Demon Bug.

In addition to giving the Chinese farmers practical aid and information, these fairs aroused in them the spirit of competition and the desire to learn, and showed them how to work together in a convenient effort. To literally thousands of Chinese country families these fairs were the red-letter days of the year. They were what the circus and the county fair rolled into one mean to American farmers. How they examined every exhibit in detail, how they drank in every word, how they looked in awe at the moving pic-

"I have been digging in the ground all these years just according to rote" and a wondering farmer speetator, "without any thought as to improvement. Now I am going to work for better crops and bring some of my produce to the fair next time."

Then came another innovation — some weeks after the fairs—when a group of twenty-five Chinese farmers, ranging from nineteen to forty-six years of age, from five different counties, were brought to Jefferson Academy for a two months' condensed agricultural course. A feast was set before them—an intellectual and practical feast—for they were permitted to select twenty-five hours a week from the following subjects: general agriculture, poultry raising, bee culture, rural education, rural economics, rural hygiene, first steps in government, background of Christianity, Bible study, public speaking, and singing.

There is a highly significant fact connected with this course—a fact that speaks well for the stability and tenacity of the Chinese farmer: every single man who came remained until the last day, and received his certificate for work accomplished. One third of this group were self-supporting, that is, they paid for their board, plus $1 a month room rent. There was no tuition fee.

The moment these farmer students got back to their own villages, they began organizing classes among

A BIBLE STUDY COURSE

It is highly desirable to read the Bible through from Genesis to Revelation.

A cumulative knowledge of the Scriptures, so valuable in education, is secured and a true perspective of religious history and truth is obtained.

The portions that consist entirely of names and subject matter, wholly devoid of interest to the average reader, are omitted from the Study Course.

The Course is divided into thirty-six lessons and gives both the beginning and ending of each lesson; also the beginning and ending of passages or portions to be read.

Best Quality Thin Bible PAPER *Clear Black Superior* PRINTING *Durable Flexible* BINDING

THIS COMPLETE TEACHER'S BIBLE
Also contains the following 400 pages of New Copyrighted Helps by the most reliable Authorities

Treasury of Biblical Information
The latest compendium of essential things which every reader of the Bible needs to know, such as the Chronology of the Old and New Testaments, Tables of Money, Weights and Measures, Jewish Calendar, Table of Easter Days, etc., etc., all arranged in the most usable and attractive forms.

New Comparative Concordance
With nearly Fifty Thousand References.

New Illustrated Bible Dictionary
Self-Pronouncing, with nearly One Hundred and Fifty Pictures, containing more subjects than are given in the bulky Dictionaries.

Four Thousand Questions and Answers on the Bible A valuable help to all Bible readers.

their neighbors. They were told that if they would organize these groups, Jefferson Academy would send instructors to teach them for a ten-day period. The plan met with phenomenal success.

Like the disciples, the teachers went out to these village groups two by two. One gave instruction in general agriculture, poultry raising and bee culture, while the second taught Bible. An ideal arrangement, for, as Mr. Martin expresses it:

"You see, in this way we are trying to illustrate the love of Christ as well as talk about it. The other day I met Mrs. George D. Wilder returning with a group which had been preaching during the week of evangelism to the people of a poor village near by. I asked her how the day went.

"'Well,' she replied, 'they listened attentively, but I always feel that I should go to such villages with a Bible in one hand and a bowl of rice in the other.'

"A few years ago," said a Chinese pastor discussing the matter with Mr. Martin, "I never heard anyone speak of raising better chickens or of improving their crops; but now, since the fiars and these courses, everyone is talking about such subjects."

Mr. Martin has an able corps of Chinese aids. Mr. Fan, a Penn College graduate, is a "radio fan" indeed. He takes his beloved radio with him and sets it up for the townspeople, who flock to hear it. Programs come through from various stations in China and Japan. Mr. Fan has a dream—a marvelous dream. He wants to prepare lectures to be given over the radio on many subjects, religious and scientific, devotional and practical. All this would be done from a broadcasting station at Jefferson Academy.

"The Gospel of the Deeper Plow" is doing great things for North China, not only in the field of agriculture but in all that makes for a better social, physical, economic and religious life of the people.

FOODS AND AGGRESSIVENESS

(Continued from Page 1)

a handful of rice and trot all day on it. These are the great natural foods; they are the mainstay of life where human races are dominating. No people could live on corn as they could live on wheat and rice. Corn is too fattening— we know the results from the study of pellagra. Pellagra takes the life out of people, who eat too much corn.

No people subject to famine at varied periods can ever develop into strong, robust, aggressive people. As nothing else can do it, a famine depletes human vitality. Periodical hunger reduces the vitality, lessens resistance to disease and nullifies aggressive. And almost every race except the Caucasian has been subject to famine from time time."

A LETTER TO A CRITIC

(Continued from Page 1)

America only. It has a national president, secretary, treasurer and a board of directors. The organization is made up of units which are established and are being established in all counties, townships and neighborhoods where as many as ten Negro farmers reside. Membership dues are five dollars per year, one dollar of which remains in the treasury of the local unit.

The National Federation of Colored Farmers was organized in 1922 and incorporated in 1930. Its founders and organizers were honest, experienced, reliable men, who had at heart the interest of the colored farmer and desired to do something for him. All but one were born and reared in the South. All, in some way, or other, had been closely connected with the business of farming. Our organization's main objective is to teach colored farmers the principles of co-operation and to help them practice co-operation. Each unit of the N. F. C. F., when organized, becomes a local farm cooperative association. The members of these local units can buy farm and home supplies co-operatively, produce crops co-operatively and can market and sell co-operatively. Their national office acts as their clearing house and gives them the purchasing and marketing information required.

There was not a cooperative association of colored farmers in America before the first unit of the N. F. C. F. was established. No cooperative, organized and controlled by white farmers, had ever attempted to obtain any Negro members except for selfish and shady purposes, and no Negro farmers were members of any full-fledged co-operative except probably a few who lived in western and northern states. In the South, where ninety per cent of our colored farmers live, very few were members of any of the local cooperative associations. Negro farmers have been coerced into joining some co-operatives,— especially in some of the tobacco and cotton sections,— but they had no voice, vote or power and could not attend local, county or state meetings. In practically every instance where colored farmers have been so-called "members" of white co-operatives, they have been the first to lose and the last to gain anything . Social, racial and economic reasons have always prevented them from joining existing co-operative societies on the same terms as white farmers and this you should know as well as myself.

As far as the "usefulness" of our organization is concerned, I need but cite you a few facts. First of all,— colored farmers knew nothing about the benefits of organization and co-operation until they told of these benefits by the founders and officials of the National Federation of Colored Farmers. No other organization or farm leaders. white or colored, had ever tried to get them to organize and co-operate. It appeared to all that organization and co-operation was essential to the welfare of the farmers of America if they were white, but the colored farmers were scarcely considered. They are receiving little consideration now, and it is evident they would be receiving still less, were it not for the activities of the officials of the N. F. C. F.

Members of the N. F. C. have been taught to buy collectively,— groceries, feed, seed, fertilizer, farm supplies and machinery,— anything the can purchase at, near, wholesale prices and save money by so doing. Colored farmers of Mississippi units alone have purchased approximately $80,000 worth of farm supplies co-operatively during the past five years. They have saved more than 25 per cent on their purchases compared with what these supplies would have cost them if purchased from local merchants and dealers. We have numerous letters from members stating that they have saved more than their yearly membership dues,— more than five dollars, —on their first twenty dollar grocery order. In some instances, members have purchased their needs from local merchants, who were able to quote them good prices because of the size of the order and cash payments being made. Collective buying by members has not injured any honest, intelligent merchants who desired to play fair with their Negro customers. But no one can blame a colored farmer for buying a better grade of rice or sugar at from two to five cents a pound, from an out-of-town merchant, when his local merchant demands from ten to fifteen cents a pound for a much poorer grade of the same products. The colored farmer has a perfect right to save his money if he can, and if he can the N. F. C. stands ready to assist him.

Members of the N. F. C. F. have been advised to plant "unit acreages" of certain crops and varieties of crops which we knew would bring them a larger profit. For instance,— one year we advised our "Delta" members to plant "Weber 49" cotton seed. This variety produced a better grade and those who follow our advice were benefitted. Other units were advised to plant acreages of edible cowpeas and sweet potatoes and seed of the varieties we recomemnded was procured for them. Their crops brought good market prices. Had these farmers not belonged to our organization, this advice, assistance and information would have not been given them from any other source.

We have found good markets for carlots of vegetables, melons, and other products of our members. We have told them how to grade, pack, ship and sell, and they have profited by the information given. For instance, a group of North Carolina farmers were offered $2.75 for their farmer's run peanuts. We prevailed upon them to grade their product and found for them a buyer who paid $7.50 for the first grade. The entire crop averaged around five cents,— almost double what it would have brought if sold as "farmer's run" and the grading was but little expense.

We have discovered instances where local "white" co-operatives have been giving colored producers less than white producers were receiving, whether the colored producers was a so-called "member" or not. Track buyers, especially in the vegetable and melon centers, ofter will not purchase the colored farmer's crop until it is about to perish in his fields. Then they will gobble it up at a ridiculous price. The colored farmer is compelled to sell for what he is offered or lose all. Buyers for "white co-operatives" often follow the same stunt. In these sections, organized colored farmers have been able to market direct through our national offices and have received the consideration and justice they were due.

We have assisted many of our members in obtaining loans from federal land banks and from other sources. We are investigating credit unions and other types of loan associations now to see if such can be a source of service to Negro farmers. We are advising our members to depend on themselves,—not on the government. Colored farmers are victims of certain types of loan-sharks in all sections. The majority are compelled to pay from 25 to 40 per cent interest on the borrowed dollar. We are trying to remedy such conditions.

We assisted thousands of colored farmers in obtaining drouth-loans. We have helped other thousands obtain Red Cross relief and have reported to that organization many cases which came to our notice of colored farmers being charged for relief given.

We have helped many of our tenant and sharecropper members obtain farms on easy payments,— have assisted others in finding good landlords who would treat them fairly and have also helped good landlords get good tenants. Not only have we assisted our members through their local units, but not one inquiry has come to our offices from a colored farmer, whether a member or not, that has not been answered.

Colored farmers have faith in their organization because its officers and leaders have been honest with the man have given them sound, sensible, practical advice that helped them save more and get more. For the assistance they have received, members have been asked to pay to the national office only four dollars per year as membership dues. It might interest you to know that very few have paid this. The founders, officers and directors of the organization have paid out of their own pocket for its support three times as much as has been collected as membership dues. In the state of Mississippi, where we have our largest membership, membership dues received during the past years, would average less than ten cents per member. Our organization has no other source of income except membership dues. We have never received a penny from the government, political parties or politicians, foundations, philanthropists, trade associations or from any source. We owe nobody anything except the colored farmer. The N. F. C. F. is independent. It is a race organization from the top on down. We realize that all farmers are in a desperate financial condition at this time. We know too, that they will support their organization when able to do so. There is not another farm organization in the Nation that gives as much service to its members as ours gives at so little cost to them.

If there is no "special need" for the National Federation of Colored Farmers, which is all "colored," then there is no "special need" for the American Farm Bureau Fedration, which is all "white." The N. F. C. F. was organized because colored farmers cound get no assistance from any of the other national farm organizations — not even the crumbs. We gnow, — and colored farmers know,— they will get little assistance from the "white co-operatives." The N. F. C. F. exists now because it is rendering a unique and valuable service to the colored farmers of the Nation. As long as it does this, it will continue to exist and grow whether it obtains any consideration or recognition from so-called "big Race leaders" or not."

ADVENTURE LAND NEW FAIR FUN FOR CHILDREN

Chicago—Alice's wonderland will become an actual fact for children in the Adventure Land of the Enchanted Island at the new World's Fair which opens in Chicago May 26. The Enchanted Island is being entirely rebuilt, with Adventure Land the most unusual of forty new features designed especially for children.

Here little boys and girls will find the world of Captain Kidd, the Fairy Queen, the Old Witch and Prince Charming. As children leave the world of realities and cross the threshold of Adventure Land, they will find themselves in an enchanted forest. Fairy-book stars will peep at them through thick foliage overhead; owls will hoot and birds will sing to them; there will be a thunder shower, a noisy, tumbling cataract, a babbling brook and, at the end of the path, a gingerbread house.

The chief delight for the children in Adventure Land will be that anything might happen. A child may be looking at a tree, and suddenly discover that it is winking at him; it may even smile broadly and then break out into a hearty, ringing laugh.

One of the surprises planned is a fairy queen who is really alive, yet will appear to be no more than three inches high. Despite her size, she will be a jolly person, full of smiles and happy conversation.

NEEDLE ART NOVELTIES

By Nancy Lee

NOVELTY DOG PILLOW
NO. 123

Introducing, folks, Toby— the champion blue ribbon winner of the Wilkshire Kennels! Let's make him the pride of the campus— the delight of the nursery —or the Master of the House— for he's realy quite "doggy" and sleek in his pitch black coat. He will be the nicest, squeeziest pillow we've had, and the joy of it is, he can be made up in a jiffy! He'd be stunning in black cambric or suiting— and let's applique his jacket of yellow old fashioned chintz. Patters contains cutting chart and full instructions. This is pattern No. 123.

We have prepared a wonderful new 32 page Book showing over 90 newest needle work novelties, many in actual colors. The above pattern will be included free with each order for this Book which is 25c. Ask for Book "D." Single patterns are 10c each. Be sure to state pattern number wanted. Send order with coin to

Secretary Wallace Says Cotton - Share Farmer is Sufferer

SOME LOSE HOMES IN AAA DRIVE

Chicago Tribune Press Service Fro mNation's Capital Quoted

(Chicago Tribune Press Service)

Washington, D. C., May 2.—(Special.)—Secretary of Agriculture Henry A. Wallace today frankly admitted that the elimination of millions of cotton acres from production under the AAA has created a serious social problem in the south.

Thousands of tenant farmers and "share croppers" are being deprived of their livelihood, Mr. Wallace said, when the acres they once worked are abandoned by the land owner under the terms of his reduction contract with the government. Relief rolls in the cotton belt have shown a marked increase since the inauguration of the acreage reduction campaign, it was said.

Shows Results of Study

Mr. Wallace made public the results of a study of the situation undertaken by Calvin B. Hoover, AAA economic adviser and a professor at Duke university. It admitted the serious nature of the dilemma, but attributed much of the difficulty to labor conditions peculiar to the south.

In an effort to halt the displacement of the tenants and share croppers, Mr. Wallace announced, he has summoned all southern county extension agents to Washington for a conference.

Measures to enforce the AAA cotton contract, which prohibits land owners from depriving tenants and share workers of their homes, will be devised at the meeting, the secretary stated.

The social consequences of the government acreage reduction program in the cotton belt have been subjected to widespread criticism. Today's announcement was the AA A's first indication that it had taken cognizance of the situation.

To Enforce Contracts

"The sign up campaign for the 1934 cotton adjustment program has been completed," said Mr. Wallace. "The time has now come when it is the duty of the administration to work out a definite policy of enforcement of the provisions of this contract. We have received a considerable number of complaints of displacement of tenant farmers in violation of the spirit of the contract. The number so dispossessed is not subject to precise determination."

The secretary said, however, that the number of complaints thus far received made it "desirable" for the AAA to work out a mechanism for preventing violation of the reduction contract. He emphasized that there was no disposition on the part of the government to "interfere with the usual and normal rental arrangement between land owners or landlords and their tenants."

May Hold Back Benefits

As one possible method of forcing land owners to refrain from evicting the poorer farmers from abandoned

(Continued on Page 2, Col. 1)

HOG BUTCHERING WEIGHT VARIES SAYS EXPERT

Quick Freezing of Vegetables Now Perfected

METHOD IS EVOLVED AFTER VERY LONG RESEARCH

If and when packages of quickly frozen vegetables and fruits are displayed by the grocer, the consumer may know that this represents extensive experiment and research.

In the first commercial trials of quick freezing methods, most of the vegetables developed hay-like flavors Spinach, alone, retained its natural flavor, and the spinach had been blanched, or scalded, before it was frozen. After that all the vegetable samples were blanched before freezing, and they, too, retained their natural flavors.

Blanched in Boiling Water

The method of quick freezing vegetables which was finally evolved provided that newly harvested vegetables are cleaned and prepared, blanched in boiling water, packed in cellophane-lined containers, and subjected to temperatures of from 30 to 40 degrees below zero Fahrenheit for two or three hours.

The temperature is then raised to the permanent storing temperature of zero, or 32 degrees below the freezing point. Fruits offer more problems to the quick freezing process than do vegetables, because they cannot be blanched, since heating fruits gives them a cooked flavor.

Large Peas Best

The large seeded market garden varieties of peas are better adapted to quick freezing than are the small seeded varieties commonly grown for canning.

The advantage of quick freezing over the former old slow freezing methods comes partly from the fact that quick freezing forms small ice crystals which do not break down the tissues as do the larger, more slowly developed crystals of the former methods.

DEVICE AT FAIR DATES EGG AS HEN LAYS IT

Chicago—A device which, when attached to a baby hen, stamps her new-laid egg with the day, hour and minute, is one of the unusual inventions shown at the patent exhibit in the General Exhibits buildin of the new World's Fair here. The patent exhibit differs this year in that it includes the unique and freakish as well as commercial patents of inventions not yet in use.

Among the curious patents shown are an electrical device to determine the ripeness of fruits accurately, a garlic sauce with no after odor, a non-skid spaghetti and a razor which operates on the principle of a lawn mower.

Farmers Told to Avoid Fake Medicine

REPLENISH SOIL

Farmers Given Opportunity To Use Idle Lands

Wash'ington. — The hundreds of thousands of idle acres which will be left out of production this year because of the crop curtailment program of the department of agriculture offers the farmer an oportunity to replenish his soil at low cost, department officials say.

The department is doing all in its power to encourage this activity. Among steps recommended is the planting of the grain known as lespedeza, which is unusually valuable as a soil restorative. The lespedeza is an annual but reseeds itself without ever assuming the unattractive proportions of a weed. It will grow on poor acid soil as well as on good soil and aids in bringing the lower grade soil back into real predictiveness.

Illustrating the value of lespedeza, the department cites the experience of one North Carolina farmer who seeded it over oats. In 1929 the yield was 9 bushels of oats per acre, in 1930 it was 43 bushels and in 1931 it was 77 bushels.

GEM AWAITS LONG DISTANCE FAIRGOER

Chicago.—Because he himself will have traveled more than 12,000 miles from Kimberley, South Africa to Chicago, to his job as supervisor of the diamond recovery plant in the Diamond exhibit at the new World's Fair here, Joseph F. Sullivan is interested in finding someone who will travel even farther to see the Exposition.

Anyone coming a great distance to see the Fair and calling upon Mr. Sullivan will be entertained by him. The distance each globe trotter has traveled will be recorded and checked. The man or woman who has come the farthest will be awarded a one carat diamond.

The lucky tourist may pick out the diamond in the rough from those on display at the diamond exhibit and have it cut just the way he wants it in the Streets of Amsterdam, the diamond cutting display at the exhibit.

Thomas Cook and Sons and the American Express Company have already announced that they are determined to find a traveler who can excel Mr. 'Sullivan's mark. They report that they are now booking visitors from distances almost as great as Sullivan's and it is quite possible that someone else will travel even farther than half-way around the earth.

POULTRY RAISERS GET TIMELY WARNING

Hatching time and the eight to twelve weeks that follow bring a serious menace to chicks in the form of coccidiosis, one of the most dangerous diseases of young chicks. The disease is spread by contamination of the food, water, and soil with the droppings of infected chicks.

The severity of coccidiosis depends in part on the number of disease-producing organisms which are taken into the body of the young fowl. In non-fatal cases, the chicks recover and the organisms usually disappear within a month's time unless reinfection has taken place. However, reinfection does take place often when the yards and brooder houses are not kept in an extremely clean and sanitary condition. Removal of the droppings and maintaining other sanitary practices generally will prevent reinfection.

"Poultry growers are sometimes led to believe that certain 'medicines' will cure this malady," says Dr. H. E. Moskey, veterinarian of the federal food and drug administration. "The administration, in the enforcement of the pure food and drug law, has removed from the market stocks of so-called 'remedies' for this disease. According to the consensus of opinion of veterinary medical authorities, there is today no drug nor combination of drugs which can be considered a cure for coccidiosis of chicks.

"Chicks infected with the disease frequently recover naturally, and if proper sanitary methods are followed they will not become reinfected. Poultry growers have sometimes attributed natural recovery of their chicks to some nostrum which has been sold to them. There is little or no evidence available at the present that any established veterinary preparation on the market is valuable in the cure of this virulent malady."

1933 COTTON OUTPUT 13,047,000 BALES

Washington, May 22.—(AP)—The crop reporting board's revised figures, made public Tuesday, show United States cotton production last year amounted to 13,047,000 bales of 500 pound each.

Ginnings from the 1933 crop as reported by the census bureau in bales of 500 pounds gross weight totalled 13,047,262. The yield of lint cotton per acre, as revised by the board was 208.5 pound and the area picked was 29,978,000 acres. The area in cultivation on July 1, 1933, was 40,852,000 acres.

AVERAGES 244 1-2 IN ILL. BUT ONLY 163 TO 170 IN THE EAST

There is a wide and striking variation in the weight of hogs purchased by killers in different sections of the United States, a recent corn belt agricultural survey shows.

Representative packers in New England killed approximately one million hogs that averaged nearly 20 pounds in weight. In the adjacent territory of New York and eastern Pennsylvania, the sample of about three million hogs averaged 170 pounds a head. At the same time, the hogs slaughtered in the territory close to Chesapeake bay, including the cities of Baltimore, Washington and Richmond, averaged a little over 163 pounds in weight, according to the sample of a half million head reported by packers there. The Pacific coast killed 187-pound hogs, while hogs killed at the Missouri river points averaged approximately 149 pounds. Hogs going to the Illinois-Indiana packers averaged 244 1-2 pounds, while the interior packers generally preferred a medium weight hog.

It is apparent that corn belt farmers who furnish most of the hogs killed under federal inspection in this country, are-vitally interested in the kinds of meat which consumers want. Producers and sellers therefore need to investigate closely the opportunity to meet the specific demands for hogs. In any other line of production outside of agriculture, the practice is generally for a producer first to find out the **nature** of the demand for his product, and then to carry on production to meet that demand. This is not always true in agriculture. While corn belt farmers are interested in the eastern demand for hogs, it is well to remember that this demand is limited and that strict grading usually is required. The largest part of the nation's hog crop is slaughtered in territory adjacent to where it is produced, and while farmers are to be commended for their interest in distant markets, it is well not to over-emphasize their importance.

BLIGHT AIDS AUSTRALIA IN WAR ON PRICKLY PEAR

Melbourne, Australia —(AP)—Helped by a tiny blight with a long name—cactoblasris cactorum—Australia is winning a war against the deadly prickly pear.

Over an area of 60,000,000 acres the tiny blight has attacked the enemy, and there is definite prospects that the plant will be exterminated in Australia within a comparatively short time.

In the last two years more than 8,000,000 acres of land previously affected by the pear have been opened for permanent settlement in Queensland.

WALLACE SAYS COTTON SHARE FARMERS SUFFER

(Continued from Page 1, Col. 1.)

cotton acres, Mr. Wallace suggested that the AAA might refuse to pay the benefit payments called for under the reduction contract since ejection of the tenants or share croppers would constitute a violation of the contract.

FARM EXPERT NAMED TO HIGH POSITION

Cornelius R. Richardson, chairman of the board of directors of the National Federation of Colored Farmers, Inc., was made prosecuting attorney of the city of Richmond, Ind., on Jan. 1. Mr. Richardson is a prominent attorney of Richmond. He came originally from Athens, Ga. He is an authority on agriculture and was appointed by the late President Calvin Coolidge some years ago as a member of a committee that made a survey of conditions in the Virgin Islands.

Mr. Richardson is from one of the first families of Georgia, long known as fighters. His grandfather, Alfred Richardson, was elected to the state legislature from Oconee county during the reconstruction period. Mr. Richardson says Race farmers should grow their living and not buy it.

WHO MAKES A GARDEN?

Whoever makes a garden
Has never worked alone;
The rain has always found it,
The sun has always known,
The wind has blown across it.
And helped to scatter seeds—
Whoever makes a garden
Has all the help he needs.

Whoever makes a garden
Should surely not complain,
With someone like the sunshine
And someone like the rain,
And someone like the breeze
To aid him at his toil;
And someone like the Father,
Who gave the garden soil.

Whoever makes a garden
Has, oh so many friends!—
The glory of the morning
The dew when daylight ends,
The wind, and rain, and sunshine,
And dew and fertile sod;
For he who makes a garden
Works hand-in-hand with God.

—Douglas Mallock

PLANTING BY THE MOON

According to popular beliefs vegetables that mature under the ground should be planted in the dark of the moon, and all vegetables that mature above the ground must be planted in the light of the moon. Plant root vegetables in the dark of the moon and vegetables for leaves in the new moon.

Vegetables which blossom, such as peas and beans, should be planted in the full moon.

All tuber plans should be planted in the dark of the moon. For large ears of corn, plant in the dark of the moon also.

When flowers are planted in the light of the moon they are said to be large and beautiful.

Melons and cucumbers should be planted when the sign is in the twins.

It has also been said that if you gather apples in the light of the moon they will not rot.

Cabbages planted when the sign is in the head will invariably be large, and if the seed is planted when the moon is new it will not be killed by frost.

If you cut weeds from your yard in the dark of the moon they will hardly come again.

Interesting News And Notes

Drouth and dust storms are playing havoc with crops in America's bread-basket, the mid-western states. In some sections it is reported that average winter wheat yield will be less than 20 bushels per acre. Wells and pastures are drying up and livestock suffering. Planted corn will not sprout. Mother Nature is doing more to reduce crop yields than the AAA ever dreamed of accomplishing.

The administration's cotton reduction program was assailed by a committee of six prominent southerners who said it was unsound in practice and conducive to slavery of workers. Prof. W. R. Amberson, of the University of Tennessee, was chairman of the committee.

The New York World-Telegram reports that since the Roosevelt era began four and one-half million men have been restored to jobs. There are still more than eight million unemployed. Emergency workers are excluded from the number given.

First stand of alfalfa in many Nebraska counties is threatened by plant lice which have invaded the fields by the millions. Unless rain comes shortly it is feared the lice will destroy wheat, oats, and garden crops.

The Illinois Agricultural Association claims a membership of over 60,000. Ten cooperative companies affiliate with it, three of which are insurance companies.

There were 77,331 Negro farm operators in South Carolina in 1930, a decrease in ten years of approximately 32,000. Only 15,975 were owners. Acreage owned was 786,893 and value of land and buildings owned was $22,788,137. Colored farmers of this state should have better opportunities to purchase small farms.

Farmers' cooperative gas and oil companies did a $35,000,000 business in 1933. Nearly all these cooperatives are located in northern state Associations in the three states, Minnesota, Iowa and Wisconsin did a business of around $50,000 each. Cooperation pays well and it is high time all colored farmers were finding this out.

Iowa farm hands are being paid an average of from $20 to $30 a month with room and board this year which is ten dollars more than was paid last year.

Congress has authorized the 1935 farm census. It is proposed that airplanes be used to assist census takers. It is also proposed that the census include facts for the benefit of the AAA about taxes, idle lands, abandoned farms, forest and pasture plots, sizes of farms, ownership and tenure, equipment, membership in cooperatives, acreage, production and value of crops and stock, farmers expenditures and other points of assistance to the New Deal. The Modern Farmer is anxious to know how many colored farmers are members of cooperatives.

There are forty thousand more colored farmers in the state of Mississippi than white farmers.

It is little wonder that the big cotton farmers of the South like the AAA program to curtail production better than the farmers of all other sections of the country. These southern farmers have received nearly seventy per cent of the money paid out by the AAA. Over forty-three million dollars was paid out to cotton farmers in the state of Texas alone. Iowa, the richest farming state in the union has received less than a quarter million. In spite of the money handed out to cotton farmers, the real cotton farmers,—Race tenant farmers, have received very little, and are worse off now than they were last year or the year before.

The dandelion crop this year is larger than ever before.

NATIVES WORK RUBBER PLANTATION AT NEW FAIR

Chicago.—Native tom-toms blend their eerie note with the whir of modern machinery at the Firestone exhibit at the new World's Fair here.

This year an African jungle village, with Liberian natives working in the fields, in addition to the working factory production line shown in 1933, permits the demonstration of rubber treatment from the tapping of the trees to the finished automobile tire.

Animated figures perform the steps in rubber production—tapping, pouring out the latex, and bringing it to the preparation mill on the plantation. In the mill the scientific phases of rubber making, including coagulation, sheeting, smoking and baling are shown with an attendant explaining each step.

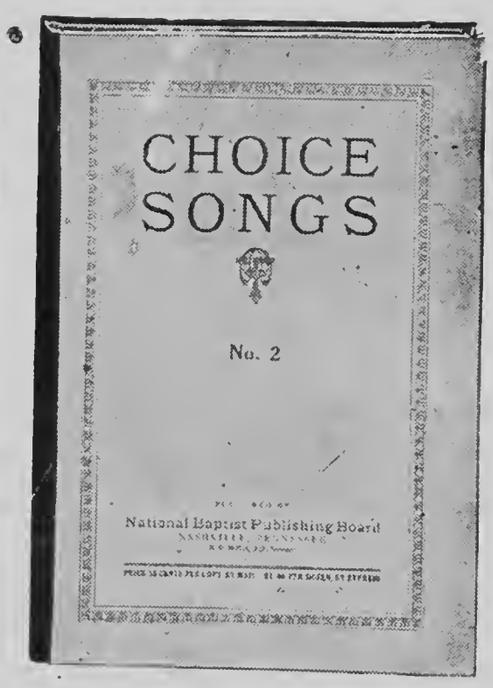
PRESIDENT DAVIS GETS CANE

A beautiful cane, hand-carved from original designs, has been made and presented to President James P. Davis, of the N. F. C. F., by Brother Nat Stokes, of Sidon, Miss. The cane also contains a matchbox located beneath the handle.

Pres. Davis is very proud of his cane and also of Bro. Stokes, who is one of the oldest, most loyal and faithful members of Heard's Chapel Unit.

THE Modern Farmer Should Be In Every Home

Song Books that are in demand



Choice Songs

NO. 2.

Exceedingly popular, worth twice the money. Millions of folks have sung from this book, fitted for use in all meetings of an evangelistic nature and well adapted for any other religious use.

Price 20 cts. per copy. $2.40 per dozen. By the hundred, $15.00. express charges not paid.

SHORT TALKS ON MUSIC

This book contains the simple instructions for those who want to learn vocal music. It is almost a self instructor. No greater help can be found for the anxious student.

Price 30 cts. per copy, $3.60 per dozen.

Others Say This:-

About the N. F. C. F. and Modern Farmer

"I can appreciate the fact that in sections where colored farmers are present in large numbers, an organization such as your own would be unusually effective in promoting their economic interests and in presenting the benefits of cooperation in the most effective manner.

It will be a pleasure for me to be of service to your organization in every possible way. I have always had a warm spot in my heart for the colored race; some of my most loyal employees are colored men, a few of whom have been with me for nearly a quarter of a century. I should be delighted to hear from you at any time with suggestions on how I can be of help."—Hon. Arthur Capper. U. S. Senator, Kansas.

"You may be assured that I have the most sympathetic interest in the economic condition of the Negro upon the American farmer."
—Hon. Geo. Fort Milton, Editor, The Chattanooga (Tenn.) News.

"Sound organization, that would build marketing agencies farmer-owned and farmer-controlled, is the constructive thing for farmers to do at this time. This will result in increased bargaining power to get their fair share of the consumer's dollar, which is the crux of the whole matter." Hon. Sam. H. Thompson, Former President, American Farm Bureau Federation.

"We shall be glad to make use of your releases from time to time because we are greatly interested in the weliare and economic prosperity of the farmers throughout the country."—Rt. Rev. J. Arthur Hamlett. Bishop C. M. E. Church.

GUILD OF PEPPERERS WAS ADJUNCT OF SPICE TRADE

In proof of the great importance of the spice trade, I would point to the fact that one of the earliest of the city guilds was the pepperers, which was first heard of in 1180, says a writer in London Nineteenth Century and After. This guild, with the Ropers and Apothecaries, nominated the officers in charge of the king's beam. In 1345 the Guild of Pepperers was succeeded by a fraternity which in 1373 became the Grocers' company. The word "grocer," to quote from an old work, "was a term distinguishing merchants of this society, in opposition to inferior retailers, for that they usually sold in gross quantities, by great weights."

Since spices constituted the commodities in which they dealt, the word gradually acquired its present meaning of an "inferior retailer" in spices. The weigh-house and public weighing were vested in the Grocers' company, a right which they retained until the Eighteenth century. The privilege of garbling or cleaning spices was also bestowed on the company, whose representatives were empowered to enter any shop or warehouse to view spices and drugs and to garble them.

They were also empowered to confiscate any spices that were being sold without being first cleaned by a garbeller "chosen, accepted and sworn for that purpose." The patron of the company was St. Anthony, in whose honor the fraternity attended a high mass annually.

—The Advance.

COTTON PRICES OFF, SAGGING 8 TO 11 POINTS

Dullness Laid to Holidays Abroad and President's Awaited Silver Message

The cotton market was comparatively quiet yesterday owing to a continuation of the Whitsuntide holidays abroad and a disposition to await the forthcoming Presidential message on silver. The news generally was construed as against values, however, and the market was lower under mill liquidation. The close was steady at a partial rally from the lowest, but with net losses of 8 to 11 points. The July position, which closed at 11.49c on Saturday, declined to 11.34c and closed at 11.39c, and October, after advancing 1 point to 11.67c, declined to 11.53c and closed at 11.58c, or 8 points net lower.

The market opened quiet at unchanged to 1 point decline, but soon sagged. Weather conditions were viewed as generally satisfactory and with the textile market still dull and awaiting developments and the spot demand low traders could see little in the cotton situation to encourage aggressive buying operations.

During the day there was considerable liquidation through commission houses which was credited to mill account, thought to have been prompted by the unsatisfactory conditions in the spinning industry.

Southern hedge selling was of very small volume and despite waves of liquidation at times, which carried prices down, the market seemed to develop a good deal of resistance through New Orleans and local buying as well as more or less trade price fixing.

The possibility of the President's message on silver containing something of a constructive nature pertaining to commodities or the money market served to discourage active or aggressive selling and was thought to have inspired at least part of the buying operations.

The continued holidays abroad undoubtedly served to restrict business during the day as houses with foreign connections had very few orders, although there was further price fixing credited to Japanese mills. The weather over the week end was generally dry and warm over the cotton belt, aside from a few widely scattered showers. These conditions were looked upon as favorable for the growing crop and it was the opinion in some quarters that the weather and crop advices are going to be more and more important as the season advances, as many believe that future price levels will be determined a good deal by the crop prospects.

A Memphis authority said that cotton planting is practically completed except in portions of the Northwest, where completion is not expected before June 1. Germination has been excellent during the last two weeks and stands were said to average better than fair with chopping normally advanced and fields unusually clean.

Washington advices said that the Senate Agricultural Committee had reported favorably the Smith bill authorizing the Secretary of Agriculture to borrow money on cotton with warehouse receipts for cotton as collateral from the Treasury. The bill was said to carry authority to borrow up to $100,000,000.

The Liverpool market, after having been closed since Friday for the Whitsuntide holidays, will reopen today. After the Liverpool close of Friday until yesterday's close the local market lost 8 to 10 points.

The Southern spot markets as officially reported were 9 to 10 points lower, middling quotations ranging from 11.10c to 11.70c, compared with 11.39c, the closing price for the July position in the local contracts market. Total sales at the leading spot markets for the day were 4,127 bales, compared with 10,217 last year.

BIG OPPORTUNITY FOR TENNESSEE FARMERS

Farmers living in the Tennessee valley will soon be able to purchase electric stoves, refrigerators, radios and, in fact, all electrical appliances, through loans. The government has set up what is known as the Electric Home and Farm Authority, Inc., which has been created to advance credit to farmers for puchasing electrical equipment.

This is a mortgage corporation to assist the consumer in making purchases at low prices. It is government owned with a capital of $1,000,000. With the distribution of electric power from Muscle Shoals, farmers living in the Tennessee valley will be able to cut the cost of living and raise their standards.

To Prevent Pellagra

Recent tests of various foods show the following vegetables contain ingredients that are useful in preventing pellagra: Callords, greens, cabbage, mustard greens, kale and English peas.

Fried Chicken

Dr. E. W. Hunter of Sanford, N. C., who has been successful in poultry raising, lost 4,000 chickens in a fire which destroyed his poultry house. The chickens were roasted.

FIRST WEEKS CRITICAL TIME FOR BABY CHICKS

The first six weeks is the tender period of a chick's life. It is usually kept closely confined and must depend entirely upon that which is offered by the poultryman in the way of food. No chances can be taken in having a shortage of vitamin D or an insufficient amount of minerals fed in incorrect proportions. There must be enough protein of a digestible quality to insure rapid growth. A little carelessness in the choice of a baby chick starter can upset the whole growing program by increasing the chances of mortality and slowing up growth. Hence the first step in the plan is to procure a quality starter. Under no condition should any feed be fed in the litter. Always offer it in hoppers.

EBONY

Ebony is the heartwood of several different tropical African and Asiatic trees. The best ebony is a deep black, although other varieties vary in color through several shades of brown. The term, ebony, is also applied to the wood of trees other than true ebonies, including the green ebony of the West Indies and the bastard ebony of Brazil.

ON POSTAGE STAMPS

Of animals portrayed by various countries on their postage stamps, the eagle and the lion predominate. However, birds come in for their share of honor—the cockatoo has his place on the stamps of Australia—the parrot on those of Guatemala—the dove on those of Japan—and the black swan on the stamps of West Australia.

LEOPARD-SKIN SHOES IN PARIS

Leopard-skin high shoes, with long gloves to match, form the last idea for feminine "smart dressers" in Paris. Seal skin and zebra skin also are worn in the same manner. The shoes are tight fitting and have buttons, but are unlike the Russian boots which were vogue a few years ago.

THE PLOW

Above you somber swell of land
Thou seest the dawn's grave orange hue.
With one pale streak like yellow
And over that a vein of blue.

The air is cold above the woods;
All silent is the earth and sky,
Except with his own lonely moods
The blackbird holds a colloquy.

Over the broad hill creeps a beam.
Like hope that gilds a good man's brow;
And now ascends the nostril-steam
Of stalwart horses come to plow.

Ye rigid plowmen, bear in mind
Your labor is for future hours!
Advance—spare not—nor look behind—
Plow deep and straight with all your powers.

—Richard Hengist Horne.

Danville Commercial News: Somebody has figured it out and found that automobile accidents are a sure sign of prosperity. Well, 35,000 Americans died for the cause last year.

WAGES OF FARM HANDS ADVANCE MORE THAN 20%

Wages of farm hands have advanced more than 20 per cent during the past year, from 73 as an index figure on April 1, 1933 to 88 on April 1, 1934, according to the Bureau of Agricultural Economics. A slightly more than seasonal gain is reported since January 1, when the index was 81. The 1909-14 average equals 100.

Day wages without board ranged from 75 cents in South Carolina and Georgia to $2.40 in Massachusetts, on April 1, and averaged $1.27 for the country as compared with $1.05 a year ago. The average on January 1 last was $1.21. The advance in wages during the past year is attributed to increased demand for farm hands and a reduced supply.

Better prices for farm products and increased farm incomes have enabled farmers to hire more hands and pay them better wages, says the bureau, whose crop correspondents report that there were 30 hired workers on every 100 farms this April 1, as contrasted with 64 on January 1, and with 79 a year ago. Also the higher farm wages are believed to reflect increased opportunity for jobs outside of farming.

The supply of farm labor, expressed as a percentage of demand was 154.2 per cent of normal on April 1, against 173.4 in January, and 213.5 a year ago. The April 1 supply-demand ratio is the lowest since July, 1931.

CONSERVATION WORKERS WILL MEET IN CHICAGO

Means of restoring wild life resources and of more effective operation of conservation laws will be subjects before the 2nd annual conservation conference of North America, at Hotel Sherman, Chicago, Saturday. The conference will be under auspices of the Outdoor Minute Men of North America, international conservation organization. The conference has invited Dr P. R. Blodgett, Chicago Heights, to preside

"Two needs are scheduled for emphasis," Dr. Blodgett announced. "One is to give back to the people sole enjoyment of our national forests by ending their commercial exploitation by sheep and cattle growers; the other to find means of stopping bird baiting on our streams and lakes now causing commercial slaughter of public-owned game. The conference will back up forestry activities and effort to prevent soil erosion now destroying thousands of acres of land annually.'

One item of moment to Illinois will be discussion of marsh restoration and bird life protection. A campaign is in prospect looking to restoring public use the basin of Spring lake, comprising 18,000 acres near Pekin, Ill., said to have been drained illegally and now held by private interests.

Gross income from farm production in the United States in 1932 was $5,143,000,000. It is now estimated that it will be approximately $6,360,000,000 for 1933.

BELIEVE IT OR NOT

Washington Post: What has become of the old-fashioned person who used to worry himself sick every spring because the government spent too much money distributing garden seeds?

San Francisco Chronicle: First we modernize the heathen so they will buy our products; then we howl because they imitate the products and undersell us.

The Washington Star: Rumors of news suppression serve to stimulate reportorial alertness. As in the case of hogs and cotton, the way to render news more valuable is to make it scarcer.

BIG INCREASE IS NOTED IN FARM INCOMES

Farmers' cash income in March was $417,000,000 composed of $408,000,000 from the sale of farm products and $9,000,000 from rental and benefit payments by the AAA, according to estimates by the Bureau of Agricultural Economics. Cash income in March of last year was $275,00,000.

The bureau estimates the total cash income for the first quarter of this year at $1,312,000,000 of which $97,000,000 came from the AAA. Income for the first quarter of 1933 was $873,000,000. A year ago both prices and marketings were unusually low.

Strength in the markets for dairy and poultry products contributed importantly to increase the March income, and the income from marketing of cattle largely offset the reduced income from marketings of hogs. Marketings of livestock products have been large in recent months.

MAKES "MULES" OUT OF CONVICTS

Negro convicts at Tucker farm No. 2, in Arkansas, were recently used as mules to pull cotton planters. Eight teams of six men each were pulling the planters down the mile long rows and a seventh man acted as the driver.

Chairman Helms of the prison commission investigated the work for Gov. Futrell and reported it was no harder than other work the men were forced to do. It is reported however, that the governor decided to put a stop to it.

THE MODERN FARMER

Official organ of the National Federation of Colored Farmers, Inc.

Leon R. Harris - - Editor

Published monthly by the Modern Farmer at Nashville, Tennessee.

Office, 447 4th Avenue, North.

Devoted to the interests of the Farmer, Truck Gardener, Livestock and Poultry Breeder, the Home and the People.

Entered as Second Class Matter, April 10, 1929, at the Post Office at Nashville, Tenn., under act of March 3, 1879.

All contributions for publication in the Modern Farmer should be addressed to The Modern Farmer, 447 4th Avenue, North, Nashville, Tenn.

No libelous matter will be published. Unsigned articles or letters, and those written on both sides of the paper will not be used.

Subscription price $1.00 per year, 75c for six months, payable in advance. Personal checks must be certified. Make all checks or money orders payable to The Modern Farmer.

Advertising rates and sworn circulation figures presented upon application.

"OUR SLOGAN"

STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT.

OUR PLATFORM

1. A Unit of the National Federation of Colored Farmers in every community. of colored farmers.
2. Co-operative buying, producing and marketing.
3. Every colored farmer a farm owner.
4. Abolition of debt-slavery, injustice and persecution.
5. A written contract for every colored farm tenant and sharecropper.
6. Better rural churches, schools and homes.

Editorials

FROM THE BIBLE:—

"He that tilleth his land shall have plenty of bread: but he that followeth after vain persons shall have poverty enough." Prov. 28:19.

Life's Lesson

Learn to make the most of life,
Lose no happy day.
Time can never bring thee back
Chances swept away.
Leave no tender word unsaid
Love while life shall last
The mill will never turn again
With waters that are past.

THE COLORED FARMER'S VOICE"

The National Federation of Colored Farmers, Inc., has become the "VOICE" of the American Race farmer and it might be well for all who believe that the future of the nation is essentially involved with the welfare of the tiller of the soil, to hear and heed this "VOICE." The membership of this organization, which extends into nineteen states, is made up of farm owners, tenants, sharecroppers, and farm laborers. These members support it. It has never received a penny of federal or state government funds, nor any financial aid from philanthropic foundations commercial organizations or political parties. It is therefore independent and has no axe to grind except the axe of the American Negro farmer.

The Federation has assumed the responsibility of teaching colored farmers cooperative buying, production and marketing. Its platform demands opportunity for every Race farmer, to become a farm owner, abolition of debt-slavery, injustice and persecution, a legal written contract for every farm tenant and sharecropper, and better rural churches, schools and homes. It is no secret that two of the main objectives of the Federation are TO DESTROY THE SHARECROPPING SYSTEM OF FARMING, prevalent in southern cotton and tobacco belts, and to BREAK THE STRANGLE-HOLD GREEDY AND UNPRINCIPLED LOAN-SHARKS, MERCHANTS AND LANDLORDS HAVE ON THE THROATS OF THOUSANDS OF RACE FARMERS.

It is evident that an organization with such objectives is bound to be villified by those who have been "living easy" off the labor of Race farmers for generations. In many sections, members have been persecuted. Units have been forced to hold secret meetings, cooperative buying has been done secretly, and in two instances, local officers have been arrested and charters confiscated. But in spite of persecution and villification, the FARMERS HAVE KEPT ON ORGANIZING AND THE FEDERATION IS GROWING AND BECOMING MORE POWERFUL EACH YEAR

The Federation has a simple and practical program for the welfare of colored farmers and is demanding that its program be given due consideration by the Agricultural Adjustment Administration and allied federal agencies. The Federation has marketed cooperatively green beans from South Carolina, peanuts and sweet potatoes from North Carolina, the same from Mississippi, strawberries and vegetables from Alabama, and mixed cars of hay, feed and other products from other sections. To aid its members in getting fair prices for products which cannot be sold profitably in local communities, it desires to establish warehouses in central marketing centers, the first to be located in Chicago. It also desires to establish small, cooperative industrial plants in permanent Race farm communities, where farmer-members and their families can find some employment during slack periods. The program also includes purchasing of land in, and adjacent to established Race farm communities, to be resold to thrifty and efficient tenants and sharecroppers on favorable terms.

The Federation is insisting that federal agricultural authorities recognize the real plight of the Negro farmer and do something tangible for his benefit. It has reported numerous cases where, on fllimsy reasons, Race farmers have been denied loans to enable them to hold their farms. Many cases of discrimination practiced by local Red Cross and CWA officials have also been reported.

The Colored farmer's "VOICE" should be heard. The work of the National Federation of Colored Farmers should commend itself to all in authority, and especially to those who have promised a square deal and a New Deal for all American farmers.

WHAT WE KNEW ALREADY

A committee of six southerners who have been investigating conditions of tenants and sharecroppers since the government's acreage reduction program went into effect, reports that "these people are probably the most depressed body of workers in America." We already knew that. Had they said they were also the most OPPRESSED body of workers in America they would have been stating another truth.

Up to now little has been done to remedy conditions for Race tenant farmers and sharecroppers. It seems that those in authority are afraid they may step on the toes of those mainly responsible for such conditions. We wonder why these most depressed and oppressed workers in America should be the last to receive some benefit from the New Deal. We wonder why.

PLANTATION MOTHERS

Thousands of plantation mothers have never heard of Mothers' Day. The rural schools are closed and teachers have returned to the towns and cities. The rural minister reads little and does not know of it. The landlords consider it a day for city folks to observe.

Great mothers live on the plantations and farms. Industrious, patient and kind mothers. Mothers who know the real meaning of the word "sacrifice." Poor, neglected, forgotten mothers.

May we, the sons and daughters of these mothers, resolve here and now, that we will do all we can to make life more pleasant for our mothers, to give them more to live and hope for, to give them more love, more honor, more obedience. Mothers know their duty. We should know ours.

A SUCCESSFUL FARMERS' SUNDAY

The officers and leaders of the National Federation of Colored Farmers are well pleased because Farmers' Sunday was observed this year by more units of the organization and by more communities than ever before. Farmers' Sunday was observed in many city churches also. This is proof positive that our group is beginning to realize that we must all rise together. We are all brothers and sisters. The group cannot progress and prosper as long as thousands of Race farmers are persecuted debt-slaves.

The N. F. C. F. is about to initiate a movement, the object of which is to bring the Race farmer and the Race urbanite closer together. We realize that the one can't get along very well without the active help and sympathy of the other. We trust the movement will be successful.

CONTINUE COOPERATIVE BUYING

Units of the N. F. C. F. that are getting out of the depression kinks should remember that one of the easiest and most sensible ways to save money is to purchase their home and farm supplies cooperatively. Not long ago one unit purchased a supply of blankets cooperatively. These blankets cost them $4.62. The same kind of blankets would have cost $7.00 in their home town. Another unit is saving forty per cent now on their groceries by buying together.

Buy cooperatively. Patronize your home merchants if they will treat you fairly. Many home merchants will quote you good prices too if they know you are wanting a large supply and can pay cash. But no matter who you patronize, remember that it pays to be a bargain hunter. Its your money. Spend it wisely. It is much better for a dozen people to put their money together and buy a barrel of sugar at five cents a pound, than for the same dozen to buy the same barrell of sugar separately and individually and pay ten cents a pound for it.

To those going crazy over the idea of "subsistence farms" we make this observation: a tenant on Uncle Sam's plantation is a tenant just the same. We doubt if he will be any better off than were he a tenant on Mr. Sam's plantation.

Tell your friends about the Modern Farmer. Get them to subscribe. The Modern Farmer has never missed an issue.

"Forgetting a wrong is a mild revenge."

"No really great man ever thought himself so."

So long as we live, we serve; so long as we are loved, I would say, we are indispensable. No man is useless while he is a friend.—Robert Louis Stevenson.

CHAMPION EGG-LAYER

Dereen 10-L, a white Leghorn pullet, wo resides at Vancouver, B. C., in Canada, is said to be the world's champion egg laying hen. She is the product of the Agassiz Experimental farm and has the record of laying an egg every day during 1933, with the exception of eight days, or in other words, 357 eggs in 365 days. Her nest is the last word, so to speak, for it is fitted with every convenience. She is fed from a sanitary hopper and water from a running fountain that is tested daily. Her feed consists of the purest grain, a compound mash and, at times, sprouted oats. At regular intervals she is given powdered charcoal and oyster shell.

The average egg yield for high grade hens is around 200 eggs per year.

NEW VEGETABLES

Among some of the new vegetables in most of the new seed catalogues for 1934 is a new pole lima bean known as "Burpee's Best." The department of agriculture plant breeders have developed a new strain of bean which is claimed will produce a crop in spite of disease. The new variety is a cross between Weds Red kidney and Stringless Refugee snap.

Three catalogs are listing new varieties in watermelons: these are the Wonder-melon, the Klondyke and Wintersweet. There is also new mushmelon this season, known as Chipman's Lake Champlain, which is of the honey dew type. Among some of the new strains of tomato are Oxheart, Tenderloin, Gargo and Yellow Pear.

Government Record Books Free

A Farm record book gotten up by the Agricultural Adjustment Administration for the purpose of aiding farmers in planning production and also to serve as a basis for assembling information for contract application and proofs of compliance will be furnished free to all farmers who have co-operated with the government reduction program. This should be very helpful to Race farmers who in the past have been very negligent in keeping records of their farming operations.

Notes from Michigan

Farmers around Calvin Center hold a mass meeting at the Center building early in April to consider and perfect plans for a cooperative marketing association. This section of southern Michigan is adapted to white potatoes, fruits and poultry, and with the advance in the price of all farm products. Negro farmers should get together and buy what they need at wholesale and lower the cost of producing what they have to sell.

Col. T. H. Harris, for a number of years prominent political figure in Chicago, is now the owner of a very pretty fruit and poultry farm just out from Niles. Mr. Harris has some of the finest and newest varieties of raspberries and peaches, and last season was able to get a premium in price for all that he had to sell. Mr. Harris says farming is far superior to politics.

A few years ago Mr. E G. Murray, wealthy manufacturer and one of the most prominent Negroes in the west, bought a farm in southern Michigan, mainly for the purpose of recreation. He decided to try poultry on his farm and after the first year, he has been able to make his farm net him a handsome return on his investment. He has one of the most up-to-date poultry farms in southern Michigan, and is now operating a truck that makes regular trips to the larger markets with fresh eggs and live and dressed poultry. The buyers are paying him a premium for his products.

Doty Brothers, prominent ice dealers on the south side of Chicago, have recently purchased a 100 acre farm in southern Michigan, near Sawyer. They are now spending quite a sum in repairing buildings, making additions to the barns and other necessary improvements.

Notes From Missouri

Rev. B. J. Franklin and 12 other live, wide awake farmers from the Delta of Mississippi, have acquired a large tract of land near Portageville and are busy getting ready to make a crop. Rev. Franklin was one of the first farmers in Mississippi to subscribe to membership in the National Federation of Colored Farmers. He is thoroughly loyal and dependable.

Robert H. Sanders and his wife Mrs. Legors, are the owners of a fine 160 acre farm in Wright county near Hartsville. They recently closed trade with a large cooperage concern for several thousand feet of oak staves for barrells.

Mrs. Sanders is specializing this year in leghorn chickens. She has one of the latest new brooders.

Marshall Currin, of Charleston, is the owner of a 150 acre farm about 60 miles south of Charleston.

Mr. Currin is also the owner of a large cafe and restanrant in Charleston. Mrs. Currin looks after one end of the business and Mr. Currin is ever on the alert for trades.

At a recent meeting of the Lincoln unit of the National Federation of Colored Farmers Inc., he was elected unanimously to head this big unit of around 100 members.

He has made plans to make it one of the biggest and strongest farm organizations in the southeastern territory.

Scotch Virgin Island Protest

Washington, May (ANP)—The Roosevelt Administration's program for the economic rehabilitation of the Virgin Islands has been approved in a petition signed by 1,021 citizens of St. Croix, Secretary of the Interior Harold L. Ickes announced this week.

The petition, protesting strongly against the action of the St. Croix Colonial Council of the island in rejecting a charter for the Virgin Islands Company, was addressed to President Franklin D. Roosevelt; Secretary Ickes; Dr. Paul M. Pearson, Governor of the Virgin Islands, and Lawrence W. Cramer, Lieutenant Governor of St. Croix. It was forwarded to Washington by James Henry, Secretary of the Citizen's Progressive Union.

The St. Croix Colonial Council acted "against the expressed desire of a majority of the people of St. Croix," the petition declared

The Charter became effective when it received the approval of the Colonial Council of St. Thomas and St. John. The Company will revive and expand basic industries of the islands under a $1,000,000 public works allotment. ...

See Appointment of Colored Chaplains

Washington, May (ANP)—In a resolution asking that President Roosevelt appoint colored chaplains to serve in Federal veterans' homes, was received at the White House this week. The resolution, sent by the A. M. E. Ministers' Conference of Baltimore and vicinity, was presented by the Rev. W. H. Coston, president of the body.

Under the present set-up, it is stated, all religious services for colored veterans are conducted by white Catholic priests, despite the fact that most colored veterans are of other faiths.

THE ADMINISTRATION'S NEXT MAJOR STEP

The next major step in the Administration's recovery program is scheduled to be an attempt to bolster up heavy industries—those producing steel, cement, lumber and similar products which are principally bought by other industries rather than by the ultimate consumer. There has been great business improvement during the last few months, but almost all of it has occurred within consumer industries. Heavy industry is still in the doldrums—and that is serious because these industries normally employ the most workers, and the great bulk of unemployment that still exists can be traced to their lethargy. Practically every business leader, irrespective of what kind of a company he belongs to has sung the same theme-song: We'll never get far so long as heavy industry remains in a state of coma.

The government's answer to industry's request, according to the U. S. News, will have three phases. First will be a program of Federal aid in financing home building and repairing. It is hoped that this will liberate $1,500,000,000 of private capital which is now more or less non-productive.

Second, the government will loan directly to industry through the federal reserve banks and the Reconstruction Finance Corporation, so that basically sound concerns need no longer look vainly around for working capital.

Third, the liability provisions of the securities act—one of the most fought about bits of legislation the Administration has passed—will be softened. The act is so stringent in its present form that it has practically brought an end to the issuance of even the most legitimate securities.

It is believed that this program can be followed at a comparatively small cost to the government. In the matter of home financing, the government will simply guarantee a portion of the loans—from 10 to 20 percent. The experts say that is enough to loosen a vast amount of dammed-up credit. Also, it will make possible long-time financing, with every three years over as many as 20 years, eliminating the type of mortgage which matures every three years or so and must be refinanced at a substantial cost to the borrower.

Funds can easily be made available for the loans to industry. Senator Glass is now sponsoring a law which would permit the federal reserve banks to make loans that regular banking channels are unable to handle under the present set-up.

Generally speaking, the reaction to this program is very favorable inasmuch as it lays all the stress on stimulating private business, and does not involve any great extension of government activity.

TEN CENTS A DAY FOR ELECTRICITY

Recently published figures show that the electric bill of the average American family is $34.40 a year. That is less than ten cents a day.

Between 1929 and 1933 the average cost for domestic current dropped from 8 cents to 6.3 cents per kilowatt hour. Further reductions have been initiated by many large systems this year, and the 1934 cost will be substantially under last year's level.

As a matter of fact, there is nothing remarkable in these reductions when they are looked at in the light of the industry's past history. No commodity or service has held so steadily to a downward cost trend. Ever since pre-war days the annual cost has dropped—and some of the largest drops were made at a time when operating costs of all kinds were steadily rising.

Figures such as these should serve to blast the arguments of those who claim that the electric industry is robbing the public, and that rates should be forced to still lower levels by legislative act. At the moment, the industry is once more confronted with heavier operating expense, largely because of increased taxes and compliance with NRA wage and labor provisions. It is obvious that further rate reductions cannot be made safely if there is no economic justification behind them. Artificial reductions simply imperil jobs and investments, and threaten standards of service. They can be of no permanent public benefit—they can do great public harm.

There are two principal ways in which lower rates are achieved—through increased domestic use of power, which lowers the overhead per residence served, and by higher operating efficiency. The industry is working in both directions at all times—by constantly improving its generating and distributing equipment, and by seeking to broaden the outlets for its service.

EIGHT HUNDRED THOUSAND NEW HOMES A YEAR

According to the Research Department of the NRA, an annual building volumn of 800,000 residential units is required to supply the need for new dwellings. This takes no account of replacement of existing sub-standard homes, and until these are replaced the needed volume could easily be at the rate of 2,000,000 structures a year.

A building revival could fall far below these high limits, and still be the most powerful of factors in fighting depression. No dollar we spend does more work, in stimulating domestic trade and providing employment, than does the building dollar. Surveys show that 37.3 per cent of all the money spent goes to labor at the site—to excavators, graders, carpenters, masons, plumbers, etc. The balance of 62.7 per cent goes to buy needed materials and supplies—and the great bulk of that is paid to workers in the plants and factories manufacturing them. In general, about eighty cents out of each dollar goes to labor, directly or indirectly.

The heavy industries—those supplying such manufactures as steel, lumber, cement—were hit hardest by hard times. They are facing the gravest difficulties in recovering from them. Spurring construction would do much to solve a legion of our most trouble—some problem.

WE CAN DESTROY CAPITAL—BUT!

"Capital can be destroyed through unfair competition,' said W. C. Mullendore, Vice President, the Southern California Edison Company, recently, "but private capital once having experienced such confiscatory treatment by government cannot soon again be induced to invest in such enterprise."

That should be impressed upon every legislator in the land.

It is especially applicable, at this time to electric utilities. Every possible national effort is, theoretically being bent to the purpose of recovery. We are seeking to increase purchasing power, to promote investmenst that will provide new opportunities, to raise wages and shorten working hours and give better jobs to more people.

Yet, at the same time, we are pursuing strange policies that threaten to destroy an industry that is normally one of the greatest employers and taxpayers—and represents billions of dollars of money belonging to millions of ordinary citizens. We are taxing the utilities more heavily than any other comparable business—we are stringently regulating them in every phase of operation—and we are building subsidized, tax-free government utilities to compete with them!

If private capital is frightened and driven out of productive enterprise, recovery will be an idle dream and it will remain an idle dream. Fair treatment for the electric industry, as well as all other industries, is essential if good times are to come back.

THE TRANSPORTATION RATE CHAOS

The Federal government, through the Interstate Commerce Commission, regulates the rates charged by the railroads. It does this in the public interest, to prevent discrimination, and to assure reasonable charges for transportation of goods and persons.

According to the Transportation Conference of 1933-34, which was attended by representatives of 15 national organizations interested in one form or another of transport, the government's rate jurisdiction should be extended to include common, contract and anywhere-for-hire interstate carriers on highways and inland waterways.

It is the belief of the Conference that all transport rates should be fair and non-discriminatory, should be published, should be adhered to with penalties for violation, and should not be changed without adequate notice to the public.

That recommendation represents the view of not only the railroads, but of responsible highway and water carriers who are as anxious as anyone else to eliminate the fly-by-nights in their business. In certain parts of the country, rate-making by bus and truck companies has been little short of scandalous—operators have charged whatever they wished, to and changed schedules and charges daily if they pleased.

Elimination of the rate chaos now prevailing would go a long way toward solving the entire transport problem.

THE CORPORATION PAY

Tax-collecting season has appeared once again—and from all parts of the country come reports of delinquencies, slowness, inability to pay, and in some cases, actual tax-revolt.

The result of that has been that many governmental divisions are without sufficient funds with which to operate, and are faced with the problem of keeping schools open, carrying on road work and other essential functions, with almost empty treasuries.

There is one outstanding exception to the general situation—and that exception is the great corporations. Counties and municipalities which are so fortunate as to have within their limits privately owned utilities, railroads, large manufacturing corporations are in a happy position. The corporations pay, and pay promptly—when individual property owners are unable or refuse to meet tax obligations.

There was never a time when government, in all its branches, was so dependent on business for the revenue with which to finance both ordinary and extraordinary activities. And, consequently, there was never a time when unfriendly business legislation was so detrimental to the interests of the people. Taxes, jobs, opportunities, expansion—the great industries create and provide them.

EDUCATION OF THE NEGROES AS AMERICAN CITIZENS

Address of Honorable Harold L. Ickes, Secretary of the Interior, at the National Conference on Fundamental Problems in the Education of Negroes, Washington, D. C., May 9, 1934, 8:00 P. M.

It would seem that we have come to an age of government by conference. Formerly when a question arose which perplexed an officer of government, he would look wise and say "I'll take that under advisement." Now he smiles sympathetically and says "I'll call a conference about this."

There is a valid reason for this. In these times, the answers to perplexing questions are not to be found in past administrative decisions, records of which may be searched while the matter is under advisement. Decisions today concern many things about which we cannot look to the past for wisdom. Only in the well-stored minds of those who are constantly grappling with particular problems resides the wisdom required to help us decide which road we should take into an uncertain future.

Particularly is this true with respect to problems of education. It is clear that the chief contribution in the field of education today is to be made by those who, while diligent students of the past, follow a clear vision of the future. To make good on this vision, to make sure that what is believed to be a vision is not something merely visionary, constant council of the best equipped minds is required. This is the best assurance of protection against serious mistakes.

Of all the questions in the field of education, none lends itself so well to the conference method as the one which has brought this group together. America boasts that it is the melting pot for all peoples. Here a new race is in the making. The strengths of all races here combine to make the strength of the American. Among all these races, however, one fact is peculiar to the Negroes in whose interest you have come together. They came to this country not of their own choice. The change of their status to free men only seventy years ago was the result of a conflict not of their making. That conflict left a national wound which was long in healing. During that healing process this race of innocent bystanders was in a very difficult position. The industrial and agricultural life which had grown up around their involuntary servitude had to make radical adjustments into which they, as free men could fit. This difficult process has not yet been completed. But, thanks to the statesmanship and tolerance exhibited on every hand, that adjustment is being made so that we can now devote our chief thought to the larger social, economic, and cultural opportunities in which Negroes are entitled to share as citizens of this democracy.

The high native ability of the Negroes as a race has been abundantly shown by their contributions to all phases of American culture. Their saving sense of humor and their optimism have brought them smiling through hardships which would have meant disaster to lesser people. Their lives have felt the mellowing influence of willing self-sacrifice. These qualities are basic. They will assure rich returns whenever opportunities for advancement are made possible to this rapidly rising people.

No longer is the issue essentially one of justice to the Negro, although we must realize that much injustice is still to be overcome before we can really call America a land of equality of opportunity. The issue now is, however, much more than this.

Times have changed for all of us. Conditions which we and our fathers learned how to face in the past no longer exist. If we are to enjoy the rights and privileges of citizenship in the changed world that lies ahead of us we must share its obligations and responsibilities as well. This principle applies to all of us, both Caucasian and Negro. Whoever is to survive in this struggle will have to meet the stern competition of the modern economic and industrial world with an increased intelligence and skill.

But, in order to do this, the Negro must have more and better education than he has received in the past, and a larger proportion of the race must receive the fundamentals of a public school education. Studies made by our Specialist in Negro Education in the Office of Education reveal serious deficiencies and inequalities in the Negroes' educational facilities. For example, it is estimated that in normal times a million, or nearly a third of the Negro children are out of school. This condition is partially due to the inadequacy and inaccessibility of school facilities. These studies show also that 160,000 or one sixth of all Negro pupils of high school age in the States maintaining separate schools for white and colored children have no high schools at all in the 230 counties in which they live. Furthermore, it is

(Continued on Page 8, Col. 1.)

Garden Topics

By Dr. Floyd Bralliar

Now is Proper Time for Dahlia Planting — Thorough Cultivation More Essential Than Rich Soil—Plant Tubers on Side with a Live, Sprouting Bud Pointing Upward.

Questions on Garden Topics will be answered for BANNER readers in these columns by Dr. Brallier. Address Dr. Floyd Brallier, Madison, Tenn.

This is the proper time to plant dahlias. Of course there are those who have dahlias in bloom now but nearly all such plants are never really first class for the weather is getting hotter every day and dahlias are flowers that should come into bloom at a season when the days are growing shorter and cooler if we expect to get good results. Those dahlias that are in bloom now, or nearly so, will get hard and woody when the hot weather comes and will never make really first class blooms at any time.

As this is the time to plant dahlias we think it may be of interest to say something about their culture. The character of soil, whether it is clay or sandy, rich or poor, sour or sweet, is of less importance to this flower than the condition in which it is grown. here is no plant grown that requires more thorough cultivation and more careful conditioning of the soil than the dahlia. The soil should be worked at least a foot deep. However, eighteen inches is better. All clods should be broken up and the soil thoroughly pulverized and treated. Good drainage is necessary for first class blooms. If the soil is a stiff, hard clay, an abundance of humus in some form, preferably leaf mold or old, decaped chips, should be mixed with it. A bit of sand or fine coal ashes, mixed with the soil is often a help.

It is not wise to have the soil too rich for dahlias but there should be an abundance of potash and phosphate. A good level teaspoon is not too much for each plant. A clay soil usually contains plenty of potash without adding any. A cupful or two or good wood ashes that has never been exposed to rain, mixed with the soil will furnish enough potash for each plant in sandy areas.

Plant dahlia tubers on their side with a live, sprouting bud pointing upward. It seldom pays to plant dahlias until a live eye can be seen. If you have some without sprouts, bury them in damp sand or moss for a week and sprouts will appear before new roots are made. Such tubers are in first class condition for planting. Dahlia tubers should be planted five or six inches deep until they are five or six inches high. The ground may then be worked level. Plant the rows five or six feet apart and the tubers three feet apart in the rows.

As soon as the plants are up keep the soil thoroughly cultivated. No plant requires so much hoeing and cultivating as the dahlia. As soon as the shoots are twelve to fourteen inches high, pinch out the tops. This will cause them to branch. If the plants do not seem to be growing well a tablespoon of some good fertilizer can be worked into the surface of the soil when the plants are pinched. This is much better than to enrich the soil before the dahlias are planted.

Mrs. J. E. G. wishes to know how to get rid of ants. Finds nests of them in ground near cultivated flowers and vegetables and feels that they destroy her plants.

Answer—there are several ways to get rid of ants though the ants are probably not destroying your plants. The aphids that they take care of doubtless are, however. If you actually find the holes or dens of these ants, pour either some carbon disulphide or some gasoline in these holes. If the former is true, put a bit of dirt over the holes and it will cause the gas to permeate the entire hole and kill the ants. If gasoline is used, set it on fire and the combination of gasoline and fumes will do the work. Or you can mix up a poison consisting of sugar, syrup, and ipecac, about a teaspoonful of ipecac to a cupful of the syrup, and place this in little vessels where the ants can find it. They will eat this and be poisoned.

Mr. L. D. M., sends leaves from a number of boxwood, also from some ordinary holly. These leaves have turned yellow and are falling and the holly leaves are slightly infested with black rot but not seriously so. These boxwoods were transplanted last year.

Answer: Undoubtedly these boxwoods were dug with too small balls of earth and were not sheared back enough when they were set. Such plants seldom die till the second year. The only thing I can say to do is to shear them back heavily, cutting away all dead wood and pinching off one-third of the wood that bears leaves. Then cultivate the soil good and give it a light dressing of nitrate of soda, say a tablespoonful to each plant, keeping them well scattered. This ought to enable you to save most of them. You ask if these plants should be covered during the summer. I hardly think so for they need the sunshine to help them make new leaves and to develop further.

I notice that you have a snowball that started out with every indication of having a profusion of flowers but the foliage withered before blooming. This is undoubtedly due to a fungus disease. Cut away all blooming shoots and burn them. Fertilize your plants so they will make plenty of new wood for next year's blooms and after the leaves have fallen next winter, spray it heavily with some good dormant spray that is recommended to destroy fungus diseases. I hardly think the trouble is in the weather.

Mrs. E. R W. wishes to know the best soil for petunias. Has had trouble to get the seeds to come up. Wishes to know how to ship cut flowers such as peonies and also how deep to plant tomato plants in specially prepared holes so as to get the best results. Has been told to plant them one foot deep, leaving the holes partly opened and gradually filling them in with soil as the plants grow.

Answer—Petunias do best in a clay loam but there must be enough humus in it to keep it from being hard and sticky. Petunia seed should be sown on the surface of the soil and either not covered at all or covered with a mere sprinkling of soil. Then, place a wet sack or a thick cloth over the box and keep it always moist till the seeds come up, which should be in about a week.

The shipping of cut flowers is rather a complicated process and would take more space to explain then we can give in this column. I would advise that you go to any florist shop and ask them to show you and you can actually learn more in ten minutes this way than you could by reading a complete article on the subject.

If you will place your tomato plants a foot deep and then gradually fill in the holes as they grow, you will get a stronger set of plants that would bear a longer season. Tomato plants make new roots wherever the vine is covered with soil and if planted in this way would certainly have twice the root system they already had. We usually set out tomato plants about six inches deep but, outside of the work involved, there is considerable advantage in setting them deeper.

Mrs. H. D. G. of Clarksville, has snowball in full bloom but recent rains have bent several of the limbs to the breaking point. Would it be a good thing to top this shrub and if so when? Also sends a leaf of bryophyliumm calcinium for identification. Wishes to know the care of the plant and whether it blooms.

Answer—I would cut my snowball freely using the bloom stems for cut flowers, but I would not cut back the entire shrub. Any other necessary pruning such as the shortening of the lighter limbs can be done at once.

Bryophyliumm is a fleshy house plant whose greatest value lies in the fact that it will grow and thrive freely in total shade and so can be used as a house plant even when there is no south window. It does bloom though this is rare and the blooms are of no special beauty. If any one of its mature leaves is laid flat on some damp sand or on the ground, or is buried in a flat position, young plants will start from every notch of the scalloped edge.

Miss I. E. S. has Scotch broom, three splendid looking mimosa trees, and a dozen peonies, all of which seem to be thriving but do not bloom. Wishes to know what can be done to make these bloom.

Answer—The amount of bloom received on any plant is in direct proportion to the amount of phosphate and potash in the soil. If you will dig any good fertilizer into the ground by these plants you should get results the following year, provided your plants are in good health as you say they are. If this is not convenient then work plenty of acid phosphate in the soil and put a gallon or two of ordinary wood ashes around each plant. It will take about a year to get results.

Your peonies will never bloom right if they are in too much shade. Your mimosa trees probably will not bloom until they are two-and-a-half inches or more in diameter. The Scotch broom ought to bloom as soon as it is as much as three feet tall but should have full sunshine.

DOLLAR MIXED IN FOREIGN EXCHANGE

By Associated Press

The dollar lost ground against gold currencies, but improved against sterling units in European exchange markets Tuesday.

In London the dollar opened at 5.11 18 to the pound, the same level as the close on Saturday, the last trading day abroad. It closed at 5.10 7-8 a net gain of 1-4 cent. The pound lost 1-4 cent in New York, selling at $5.11.

The price of gold in London continued to advance, gaining a halfpenny at 136 shillings, 3 pence a fine ounce (equivalent to $34.82 on the basis of the dollar's opening price of 5.11 1-8). At that level, bars valued at $654,240 changed hand, presumably for continental destinations.

The dollar closed weak in Paris, declining to the equivalent of 6.63 cents to the franc, compared with Saturday's final price of 6.61 1-4 cents. Monday was a holiday. The franc gained .01 of a cent in New York, falling off of a cent to 39.53.

German marks declined in New York, falling of .07 of a cent to 39.53 cents. This was in spite of a better official quotation against the dollar in Berlin, where the rate was placed at the equivalent of 40.07 cents to the mark, compared with 40 cents on Friday. Par for the mark is 40.33 cents.

HEMLOCK SPRUCE IS TREE POPULAR ALONG HIGHWAYS

The hemlock, more properly the hemlock spruce, is one of the more beautiful, graceful evergreens of the northeastern United States. It is usually found in moist situations, such as the northern slopes of rock ridges and along the banks of streams, ponds and lakes. It is a somewhat common forest tree. A recently cut Pennsylvania giant was five hundred and sixty years old. There is nothing quite like the beauty of a grove of large hemlocks and, as a roadside tree, it is not without merit.

The hemlock has greater possibilities than suggested by the above. There are some seven recognized species in America, three having been introduced from the Far East, and two growing in the West or Northwest.

The Japanese hemlock is a graceful distinct species which does well in some states. The Chinese hemlock, a handsome, promising species and a closely related tree, is from the Province of Yunnan.

The Carolina hemlock ranges from the mountains of southwest Virginia to Georgia. It is considered a more desirable ornamental tree than our common hemlock. The Western hemlock occurs from southern Alaska to Idaho and California. It grows rapidly in a rich, humid soil, but does not do well in dry Eastern climates. The mountain hemlock is also Western and has much the same range as the preceding, except that it is more boreal in habit.—New York Herald-Tribune.

FISH GROWLS LIKE DOG; ANOTHER GRUNTS LIKE PIG

Though we generally think of fishes as silent creatures, persons who have made an extensive study of their habits have discovered quite a few species that are capable of producing sound, the New York Times relates. Among these are the South American catfish, which growls like a dog, the gunard, which grunts like a pig and the maigre, which not only whistles and bellows but purrs much like a cat. The musical contribution of our own American catfish is a noise which sounds like a person grinding his teeth, while the horse mackerel and the sunfish common to British waters make similar noises. The drummer fish of the Florida coast lives up to its name.

A story from Mexico tells of the remarkable vocal efforts of the so-called Mexican singing fish, or canary fish. These fishes, traveling in bodies several hundred strong at certain times of the year, produce a sound by contraction of their air bladders that is mellowed to a musical note as it filters through the water to a listener in a boat above them. And according to the Fishing Gazette, natives of certain regions in South America declare they can hear the "singing fishes" common to that locality coming from quite a distance, not by splashing or jumping but from the noise which they make under water.

—The Advance.

SELECTIONS FROM SPURGEON

I like to see the old man grow young when he talks of Christ; let him on that point become enthusiastic, even as in his boyhood.

The promises come from a great God, they assure us of great love, they come to great sinners, they work for us great results, and deal with great matters.

If you are very busy, think and pray all the more, or your work will wear and weary you, and drag you away from God. For your work's sake break away from it, and give the soul a breathing time.

We do not hold truth in a true way unless it leads us to a true life.

The wisest course is to keep out of the way of a man who has the complaint called the grumbles.

Much of the fanaticism which comes with religious excitements is not of God. The genuine dew of heaven falls calmy.

I believe in the perseverance of the saints because I believe in the perseverance of the love of God, or else I should not believe in it.

When you are in an argument for the truth, do not grow angry, for this would be to fight the Lord's battles with the devil's weapons.

I am glad to hope that some men are converted to God amid war and earthquakes and pestilence; but I am inclined to be suspicious of that kind of conversion for fear it should die with its cause.

Disease is a trumpet which must be heard. Its echoes reach the miserable garrets where the poor are crowded together and have never heard nor cared for the name of Christ, — they hear the sound, and as one after another died, they tremble. In the darkest cellar, in the most crowded haunt of vice; ay! and in the palaces of kings, in the halls of the rich and great, the sound finds an entrance, and the cry is raised, "Death is come!"

Selfishness is never worse than when it puts on the garb of religion.

The saint in his errors is a star under a cloud but the sinner is darkness itself.

Find, if you can, one occasion in which Jesus inculcated doubt, or bade men dwell in uncertainty

If we look for Christ to come we shall keep our eyes heavenward and our minds occupied with the country from which He cometh If we mind earthly things it will be evidence that the coming of the Lord has no power over us.

—Exchange.

Two High School Boys, First to Become Eagle Scouts, Receive Insignia

Atlanta, Ga., May 13 (Special)—The first two colored boys in the state of Georgia to become eagle scouts today received the insignia of that rank from the hands of E. Stanley Harris, of New York City, national Boy Scout Commissioner in charge of interracial work. The confering of the insignia took place at public exercises at the First congregational church.

The two scouts, Edmund Allen, senior in the Atlanta University Laboratory High school, and Robert Johnson, Jr., senior in the Booker T. Washington High school, are members of Scout Troop 90, of which Andrew J. Lewis, Morehouse College senior, is scoutmaster. This troup, the first colored unit to be organized in Atlanta, last year won the President Roosevelt award and was cited by local headquarters for distinguished service.

The troop was organized March 31, 1931. Its first scoutmaster was Prof. B. T. Harvey of Morehouse College.

Units of the National Federation Send Donations

Results from Sunday Services That Have Come In Thus Far Were Encouraging

At the request of the officers of the National Federation of Colored Farmers, headed by James P. Davis, Farm Units throughout the country held services on Farmers' Sunday, and then exercises on Monday following, as an appreciation of the service rendered these various Units by The Modern Farmer, some of them raised a collection and sent a donation. Among those who sent donations and messages are the following:

Lexington, Miss., To The Modern Farmer, Nashville, Tenn:—We, the Holly Grove Unit of Lexington, Miss., held our festival on April 28, 1934, and it is a pleasure to send you our donation. We enjoy reading the paper, and are doing all we can to help increase the circulation in our section.

As ever your friend,
D. G. Givens, Vice Chairman.

Tylertown, Miss., The Modern Farmer, Nashville, Tenn., Dear Sirs: This is to inform you that the Interprise Unit did remember the festival on Saturday April 28th, when we held our meeting. It was well attended and much enthusiasm was shown. We feel that the paper is worth while, and we want to say that we will do all we can for it to keep it going. You will hear from us later on.

Yours truly,
James R. Ellzey, President.

Pace, Miss., To The Modern Farmer, Nashville, Tenn., Dear Sirs: We, the Women's Club of the National Federation of Colored Farmers had our festival as we had planned, and the effort was a success. We are writing to let you know that we are doing all we can to help the cause.

Faithfully yours,
N. A. Ward, Secretary.

Tchula, Miss., May 2, The Modern Farmer: This comes to bring you the information that our Festival which we, Bethel Unit, held on April 28th was a success. The attendance was not as large as we expected, but we had an enjoyable program, and a nice collection was raised.

We are hoping to do more in boosting our wonderful paper, The Modern Farmer, in the future, and you will hear from us often.

Yours truly,
F. D. Smith, Chairman.

Shaw, Miss., To The Modern Farmer, Nashville, Tenn., Gentlemen:—Please allow space in your paper for me to say we, the Mt. Olive Unit, held a festival on April 28, 1934, and also held a meeting on Sunday in interest of the National Federation of Colored Farmers. We had a wonderful program, at which Choctaw Unit was present and took part. We also had a wonderful sermon preached by Rev. J. B. Price of Mound Bayou, Miss. The words of his text were "Ye believe not Moses, how shall ye believe me?" He made it fully plain to us that we must believe our leaders.

Please let your paper continue to come to us, as we enjoy reading it. I hope to remain,

Yours in Christ Jesus,
Jesse McGrice, Market Agent,
Tom Johnson, Chairman.

Tamms, Ill., May 8, 1934, To The Modern Farmer, Nashville, Tenn., Dear Sirs:—We, the Alexander Unit, who are members of the National Federation of Colored Farmers, are deeply interested in this organization and in the official organ, The Modern Farmer. We in this section who are readers, have discussed the worth of this paper to the race.

We held our festival on the fifth Saturday in April, and had an enjoyable time. Much interest was manifested. We are doing the best we can at present. Please send our Unit some extra copies of the paper. We will write you again soon.

Yours truly,
O. Chambers, Cor. Secretary.

Mound Bayou Unit's Contribution

Among the Units making a contribution as result of their religious exercises, held in the interest of the Modern Farmer and National Federation of Colored Farmers, was the one down at Mound Bayou, represented by Mr. T. S. Morris. They sent in a post office money order in keeping with the request made of all the Units by Mr. James P. Davis, the president of the National Federation. The Modern Farmer acknowledged the receipt of this donation by writing the Unit a letter through Mr. Morris.

Bethel Unit Sends Donation

Mrs. F. D. Smith, who heads the Bethel Unit at Tchula, Miss., and who is a tireless worker in interest of farmers and farm organizations sent in a donation from her unit. Much good has been accomplished by the untiring efforts of Mrs. Smith and those associated with her.

DEAN SLOWE LECTURES TO MORGAN Y. W. C. A.

On May 17, the Morgan College Y. W. C. A. presented Dean Lucy Slowe of Howard University in a lecture on the subject, "Some Old Tasks For Women in a New World."

Miss Slowe spoke at length on the importance of maintaining man's proper relationship to his fellowman. "Finances in human nature is fineness for all time. If we apply the principles of proper ethics we will bring out of this present moral and economic confusion, happiness for all.

MOREHOUSE COLLEGE

Atlanta, Ga.—Dr. James M. Nabritt, secretary of the National Baptist Convention, president of the Georgia State Baptist Convention, and pastor of the Mount Olive Baptist Church in Atlanta, will deliver the commencement address at Morehouse College on Tuesday, June 5. President Archer announced yesterday. The exercises will be held in Sale Hall Chapel at 3 o'clock in the afternoon.

Morehouse College Commencement week will be ushered in with the traditional baccalaureate exercises on Sunday afternoon, June 3 at 3 o'clock, in Sisters Chapel, Spelman College campus, in which Morehouse will unite with Atlanta University and Spelman College. The sermon will be preached by Reverend Wade Hampton McKinney, pastor of the Antioch Baptist Church, of Cleveland, Ohio, a graduate of Morehouse College and Rochester Theological Seminary.

Monday, June 4, will be given over to class day exercises, which will be held in Sale Hall Chapel at 10 o'clock in the morning, a concert by the uniformed Morehouse College band on the campus at noon, and the presentation in the evening of a faculty play, "You're Telling Me" as benefit for the college endowment fund.

A call has been issued for the annual meeting of the alumni association in Sale Hall Chapel for Tuesday morning, June 5, at 10 o'clock. Following this President Archer will entertain the senior class and alumni at a luncheon at the President's residence at one o'clock. The exercises of commencement Tuesday afternoon will conclude the formalities of the commencement season.

ATLANTA UNIVERSITY

Reverend Wade Hampton McKinney, pastor of the Antioch Baptist Church of Cleveland, Ohio, will preach the baccalaureate sermon to the graduates of Atlanta University, Morehouse College, and Spelman College on Sunday afternoon, June 3, at three o'clock it was announced by President John Hope of Atlanta University. The joint services of the three affiliated institutions will be held in Sisters Chapel, Spelman College campus.

The baccalaureate preacher is a graduate of Morehouse College in the class of 1920, and received his theological training at the Rochester Seminary, from which he was graduated in 1923. He has been pastor of the Antioch Baptist church in Cleveland since July 8, 1928. He is recognized as one of the outstanding younger ministers in the Baptist Church.

Preaching of the baccalaureate sermon will inaugurate the commencement week of the three affiliated schools. Each institution will hold separate commencement exercises. On Tuesday afternoon, June 5, at three o'clock Morehouse College will hold its exercises in Sale Hall Chapel with Dr. James M. Nabritt, pastor of the Mount Olive Baptist Church, of Atlanta, as speaker. The Spelman College commencement will take place Wednesday morning, June 6, at 10:30 o'clock in Sisters Chapel. Oswald Garrison Villard, contributing editor of The Nation, will be the commencement speaker. At three o'clock Wednesday afternoon Atlanta Unversity will confer its degrees. Mr. Villard will be the speaker on this occasion.

TUSKEGEE INSTITUTE

Tuskegee Institute, Ala., May—The baccalaureate sermon by Dr. William P. King, of the Methodist Episcopal Church South, editor of the Christian Advocate, at 2:00 P. M., Sunday, May 20, in the Institute chapel, opened the fifty-third annual commencement exercises at Tuskegee Institute. The impressive line of march led by the student cadet regiment, and including faculty members, graduates and a host of friends of the Institute, proceeded from the stately old Carnegie Library along the campus avenue and passed in review before the imposing monument that stands guard close by the chapel doors.

On Sunday evening the last vesper service of the school year featured an address by President Moton, and the Tuskegee choir was presented in a program of special music under the leadership of W. L. Dawson.

Other activities of the week included on Monday the annual college debate; Tuesday night the Trinity Church (Boston) prize contest; and Wednesday evening the college class day exercises.

Commencement exercises were brought to a close on Thursday, May 24, with the presentation of Nannie H. Burroughs, president National Training School for Women and Girls, Washington, who was programmed to deliver the graduating address, the first time in the history of Tuskegee Institute a woman has served in this capacity. Following the address, diplomas were awarded and degrees conferred upon members of one of the largest graduating classes in the history of the school.

BRITISH HOUSE OF LORDS DISCUSSES LIBERIA PRO-CON

English Recognize American Negro Interest in Country

London, England, May (Special Correspondence to the ANP—During the recent extended discussion in the House of Lords on the League of Nation Plan of Assistance for Liberia, the attitude of the American Negro and the influence this group exerts in the Liberian controversy were referred to on several occasions. The political strength of the Negro in the United States as a factor in the present negotations was recognized.

Lord Lugard stated definite information had been received that Liberia is proposing to grant certain Dutch and Danish syndicates concessions of land or minerals. "I imagine," he said, "that the prospect of what the Liberian Government can realize by the sale of these concessions is the real explanation of the defiance by the Liberian Government of America and the league.

Say American Negro Misinformed

"The Negro community in the United States appears to be misinformed regarding the true state of affairs in Liberia. We can understand and even sympathize with their desire to prove to the world that the Negro race is capable not only of self government but of governing a subject people; but the fact that Prof. Chas. S. Johnson, an American Negro, was one of the Christy Commission which exposed the slave-dealing and misrule, should show them that so far as establishing the prestige of the Negro race in the eyes of the world by championing the cause of the Liberian oligarchy, they are seriously injuring it. Their assistance in carrying out the League Plan would be welcomed.

"The American Government which is unhampered by membership of the League, cannot evade the responsibility of her long connection with and support of the Liberian Government in the past, or the share which men claiming American nationality have had, and I believe still have in the conduct of Liberian affairs. It would seem that she is in the best position to issue that ultimatum which would at once produce acceptance of the reforms which this costly discussion for five years have failed to secure. All are agreed that nothing short of the fear that worse may befall will induce the Liberian Government to agree."

Recognize Power of Negro Votes in America

Lord Snell said: "If Liberia persistently and deliberately refuses to accept the plan then her position as a member of the League of Nations should be seriously questioned, with the understanding that if she were excluded from membership of the League, the territory would become suitable for rule by a mandatory power. The noble Lord, Lord Lugard, thought that the United States of America might take steps. Well, so they might; but it is right that as practical politicians we should remember that there are 2,000,000 Negro votes in the United States of America, and that therefore it is not easy to assume that that does not present a problem to the United States Government.

"I feel that the United States Government has a great responsibility; but there is also this, that an appeal to the Negro people of the world might be made. This matter very closely touches their honor, as the noble Lord has suggested. We all know who have been in contact with the Negro people that they are a generously-minded race, and I am sure they would be stricken with horror if they realized all that is happening in Liberia at the present time."

Suggests Liberia be Expelled From League

In advocating that Liberia be expelled from the League of Nations and then made a protectorate, the Earl of Buxton said: "I think it is clear that in the circumstances indicated Liberia ought to be struck off the League. She then becomes an independent country entirely apart from the League. The League ceases to have any jurisdiction over her; and who is then to undertake her protection and suzerainty? Really the only country which is in a position to undertake that is the United States. She was responsible for Liberia's creation, and from the very inception of Liberia she has been responsible both politically and financially for her existence. I do not know, of course, what may be the views of the American Government, but I understand that they take a very serious view of the position, that they are very anxious to cooperate with England and France and other countries concerned, and that if they were pressed and i it were understood that they would have a free hand, they would be prepared to undertake the protectorate of Liberia. So far as I can judge the United States appears to be the only nation who can undertake it."

Earl Stanhope, the Under Secretary of State for Foreign Affairs, said: "I think it is quite obvious that the fact that Liberia is a foundation member of the League will not protect her from the very grave view that I anticipate the members of the League will take as does His Majesty's Government in regard to the situation. This much, however, I can say, that His Majesty's Government will be fully prepared to cooperate with other interested Governments in seeking by other means to insure a more efficient and more humane administration in that unhappy land than exists at present."

Says Gospel Must Touch Schools

Jackson, Miss, May, (ANP)—Speaking as a fraternal delegate from the African Methodist Episcopal church to delegates to the general conference of the Methodist Episcopal church, South, the Rev. Joseph Gomez, pastor of St. Paul church, St. Louis, admonished the white churchmen that the church and the school must be brought closer together.

"We must admit that in recent years, a great wave of secularization has swept over our schools," Dr. Gomez pointed out, "but in some way our children in the schools must be touched by the gospel of Jesus Christ.

"The disciples had a conviction. That was the reason they overcame the conviction of their days. They had a way of life. They had a grand passion and an inflammatory touch. We must rekindle in our hearts the flame that burned in theirs and go forth to set the world afire."

Editor's Note—The above statement by Dr. Gomez might appropriately be used in connection with the similar statement made by Dr. Kelly Miller.

Reflected On Race Gets 15 Years

Memphis, Tenn., (ANP)—Theodore Roosevelt Waddell, after he had pleaded guilty of trying to extort $5,000 from R. R. Beasley, white, was sentenced to 15 years in the penitentiary by Judge Harry B. Anderson, Tuesday.

"Extortion is a crime from which the southern Negro has been singularly free," Judge Anderson said. "You are not only a vicious criminal but you have reflected on your entire race."

African Professor Visits Negro Town

Boley, Okla., May (ANP)—Prof. Ugambei, of Ugambei, Africa is visiting Boley. He finished his education in America and is back on a visit. The professor has given several lectures in various colleges recently. He recently finished a course in civil engineering and hopes to return to his home to harness water power for the different industries.

EDUCATION OF THE NEGROES

(Continued from Page 5, Col. 5.)

revealed that in most of the schools that are provided for colored children, of both elementary and high school grade, the buildings and facilities are inadequate, the courses of study are ill-adapted to the needs of the children or of our times, and the teachers are poorly prepared, over-loaded and underpaid.

Why should we think of a Negro problem? Although history records times and places of a church problem, there is no such problem in America. History discloses many instances when the peoples of European nations snarled at each other across national boundaries, but these people live happily side by side in America. Surely that tolerance which has always been characteristic of America will enfold all races in its generous arms. We can cease to think of any race as a problem and instead, begin to take delight in its achievements. With true generosity of spirit we can come to wish for the success and happiness of every race. Realizing that we will all be the richer because of the diversity of contributions made by all races, we should keep open every road along which any race can advance. Cannot all races become positive in their cooperation and sympathetic in their understanding rather than merely grudgingly responsive to the demands of the situations in which they live? Cannot all races seek to determine what part each can best play in the social drama and each in generous spirit support the other on the stage of American life? For the better each one plays his own part, the richer the reward, not only to himself, but to every other one as well.

If we are to hope that this spirit of positive cooperation will grow and that the Negro problem will be recognized to be individual and not racial, the chief instrumentality ready to our hands is education. This does not mean education of the Negro alone—it means education of all the people. Adequate educational facilities for any group should not be advocated primarily on the grounds of justice for that group, but rather for the reason that only as education is adequate can the group make its proper contribution to American life. Conferences of representatives of the several groups will not be held in the spirit of compromise, but in the spirit of mutual helpfulness; not in the spirit of hitting upon the least that must be done to maintain harmony and good will, but of discovering instead the most that can be done to establish each group in its most effective place in the American scene.

This conference will make progress, I hope, in building broad foundations for the point of view that I have referred to. I welcome you here in a spirit of friendly hospitality and assure you of our desire to make available to you whatever facilities we may have in the Department of the Interior.

INTERRACIAL REPORT AVAILABLE

Atlanta, Ga., May 15— A sixteen-page annual report on interracial conditions and activities in the South, entitled "Along the Interracial Front," has just been issued by the Commission on Interracial Cooperation and is now available to the public. The report covers in a general way last year's work of the Commission and treats among others, the following topics: "Problems Incident to the Depression," "The Recovery Program," Race Relations Study in Schools and Colleges," "The Association of Southern Women for the Prevention of lynching." "Research, Investigation and Legal Aid." Any one interested may receive a copy writing the Commission's headquarters, 703 Standard Building Atlanta, Ga.

THE NEW COTTON CONTROL PLAN

Chicago Tribune

Instead of paying the planter not to raise so much cotton, the Bankhead bill provides that he shall be taxed if he raises too much.

Veteran planters have found that he technique of successfu cotton growing has changed a good deal during the past year and this bill, if passed, will make further changes about which they should inform themselves. It has been approved by Mr. Roosevelt, but a general clause specifies that a further approval must be given—that of "a majority of the owners of farms on which cotton is produced." When the Secretary of Agriculture is "satisfied" that a majority are thus favorable, the machinery of the measure shall begin to operate, though no method is indicated through which that official may be "satisfied."

This optional clause will not be in effect during the 1934-35 cotton season and the bill in explicit terms fixes 9,500,000 bales of 500 pounds each as the amount that may be marketed to advantage, though in future years the Secretary is to designate the maximum. Before August 1, next, that official is to pro rate these 9,500,000 bales to the cotton-raising states and the counties thereof, in the proportion that their average production for five years bears to total production. From the county allotment the permissible quota each farmer in such county may raise is to be figured.

On any cotton in excess of his quota that a planter may bring to the mill to have ginned, a tax is to be imposed which shall not be less than 5 cents a pound, and at least equal to 75 per cent of the "central market for lint cotton." Special exemptions from the tax may be granted in certain cases and provision is made for farmers who have not planted cotton heretofore or have planted it on only a third of their land. On making affidavit that he will hold any excess cotton off the market for a year, a farmer may have it ginned free of tax. Cotton on hand at the beginning of the 1934-35 year is tax exempt, provided certain formalities are complied with.

An elaborate system of undetachable official tags, to be affixed to bales which either have paid the tax or are, for any reason, exempt, is provided for. These tags are to be a sort of passport for the bales and without them no cotton can be exported or sold or even shipped out of the county in which it was raised. A fine of $1000, or imprisonment for a year, may be inflicted for violation of these and other provisions of the bill, including failure to store, tax-free excess cotton. The proceeds of the tax are to be placed in the agricultural adjustment fund.

Producers, ginners, fabricators, transportation companies and others must make full returns to the department on all cotton delivered into their hands and the names of persons delivering it, under penalties for failure. Unauthorized removal, destruction, forgery, improper use of the identifying tags may subject the offender to $5000 fine and to carry out the terms of the act the Secretary may appoint as many persons "as he may find necessary" and without regard to the civil service act and may pay them what he thinks proper and defray the premiums on any personal bonds that may be required of them. He may also utilize any permanent federal employes and, with a state's consent, state and local officials, in this work.

Cotton growing is no longer the simple thing it was in the South when a mule, a plow, a hoe and a colored hired man filled all requirements, but, as we have several times pointed out, to regulate the supply of cotton at the gin promises real control of overproduction, while subsidies to limit acreage only spent money with little definite result.

THE MODERN FARMER

Vol. VII. NASHVILLE, TENN., JUNE 15, 1934 No. 2.

ADVICE GIVEN TO FARMERS

Head of National Federation On Basic Industry

President Jas. P. Davis Sends Bulletin to Tillers of the Soil

In a recent bulletin of the N. F. C. F., Pres. James P. Davis gave the following advice to members of our organization. We pass it on to all readers of the Modern Farmer.

"Agriculture is the most basic industry in the United States, but when any basic industry is in an unbalanced condition, in relationship to other industries, the tendency is for a corrective to set itself in action, and in the course of time it will again be in position to earn a normal profit.

The farmers' position has been in the unbalanced relationship to that of people engaged in other ways of earning a livelihood. A readjustment period has been reached, and we are now experiencing a gradual improvement.

The population of the United States is increasing at the rate of about 2 million per year and this means a steady increase in the food requirements, and this increase means more money to the farmer. In addition, he can always produce for himself and family most of the necessities of life. During these two or three years of depression, the diversified farmer was able to provide the vegetables, eggs, milk and meat that are so costly in cities.

Lots of our members do not fully appreciate the comparative advantages of farm life. In most large cities it is almost impossible for a man past fifty to secure employment. If you operate a farm you are safe against this hazard of having no chance to make a living during the later years of your life.

The main asset in your present life as a farmer is organization and co-operation. The greatest barrier to success through organization and co-operation is jealousy. Jealousy is strong in power. It promotes suspicion and destroys faith. It paints virtue false and friends unkind. Stand together."

SOCIALIST PARTY TO SEEK SUPPORT OF COLORED VOTERS

Detroit, Mich, June—(ANP)—The Socialist Party Convention in session here last week in one of the most important moves of the session amended its constitution so as to enable the executive committee to establish machinery which will enable the party to reach more effectively, women and the Negroes of the country. 150 delegates attended the convention. There were two official Negro delegates. Frank Crosswaith, organizer for the party was one of these. He was the last speaker favoring the resolution which will permit wider latitude in proselyting among colored voters. He was named an alternate to fill vacancies on the national executive committee.

COTTON LOANS EXTENDED

United States Government Gives Further Aid

Notice Received In Chicago Headquarters On Community Credit

News received at the headquarters of the National Federation of Colored Farmers Inc. in Chicago says The Commodity Credit Corporation has extended maturity dates on all 10 cent loans made on cotton from August 1st, 1934 to February 1st, 1935, or in other words, farmers who borrowed 10 cents per pound on their cotton from the government last year and agreed to pay on August the first of this year, can now have until February 1st, 1935 to pay off this indebtedness.

This will give all borrowers the advantage of any rise in cotton between now and February and thereby be able to earn a few dollars extra. Some of the cotton experts are predicting that seven eights inch spot cotton will sell around 14 or 15 cents per pound before the first of January.

The corporation it is said up to April 30th, 1934 had disbursed $60,806,424 upon approximately 1,175,000 bales of cotton. Repayments on the same date amounted to $21,090,086, representing the release of around 407,000 bales, leaving outstanding $39,716,338 secured by approximately 767,000 bales.

ABBOTT AND ROBERTS ON LINCOLN COMMISSION

Robert S. Abbott, valiant editor of that great paper, The Chicago Defender, and State Senator Adelbert H. Roberts, both of Chicago, have been appointed by Gov. Horner of Ill., as members of the new Lincoln Memorial Commission.

Both these gentlemen are recognized leaders of the Race group in Illinois and are real friends of Race farmers.

NEW CONVENTION CITY SUGGESTED

The office of the National Federation of Colored Farmers, Inc., is receiving scores of letters requesting that the 1934 convention of the organization be held in Charleston, Mo.

Charleston is in Mississippi county, in the southeastern part of the state. It is located in a rich cotton and grain district. Some of the largest and strongest units of the Federation are located in this section. The farmers are progressive and practice cooperation. These invitations are receiving serious consideration by the executive board.

TO MAKE OPERA OF "JOHN HENRY"

New York City, June—(By A. N. P.)—Roark Bradford reached this city last week and announced that he had come to see about making his book "John Henry," into an opera. Jacques Wolfe, composer of "Short-'nin' Bread," will write the music, and Dmitriv Crov, playwright and director of "As You Desire Me," will prepare the libretto.

Paul Robeson may be sought to play the role of John Henry.

FARM WILLED TO TENANT

Plantation Given To Columbus Massenberg

The Late Mrs. E. B. Johnson of Clarksdale, Miss., Is the Donor

Columbus Massenberg, for a number of years tenant farmer on the plantation of Mrs. E. B. Johnson, of Clarksdale, Cohoama county, Mississippi, was left a 40-acre farm in the will of Mrs. John who died a few weeks ago. Mr. Massenberg has been with the deceased and her husband for over ten years and was ever faithful. Mrs. Johnson also left $200 in cash to each of the two servants in her home who had been with her for some time.

N. F. C. F. MEMBER CELEBRATES 103RD BIRTHDAY

Rev. Nathan London, a retired Baptist minister of Alexander county, Ill., recently celebrated his 103rd birthday at his home near Olive Branch, Ill. He has been a resident of Alexander county for 55 years. He was born in Tenn. in 1831.

Rev. London is the oldest member of the National Federation of Colored Farmers. He works daily and has one of the most active minds of any man in his county, irrespective of age. He and his children and grandchildren are all boosters, for organization, cooperation and the principles of the N. F. C. F. He is also a Civil War veteran.

Descendants and friends to the number of sixty gathered at the family home for the celebration. These included three daughters, one son, seven grandchildren, including Mrs. Virtus Bonner, of Chicago, three great-grandchildren and a daughter-in-law of East Chicago, Ind. The birthday cake, lighted with the 103 candles, was baked by his daughter, Mrs. Lydia Burris, of Cairo, Ill.

The Modern Farmer congratulates Bro. London and wishes for him many more happy birthdays.

SAM JONES SECURES FINE TRACT OF LAND

Sam Jones, member of the Panola, Miss. Unit of the N. F. C. F., thru the main offices in Chicago has secured a fine tract of land from the state of Miss. and moved on it. This land is not far from Batesville and is well situated for growing cotton, corn or any vegetable crops.

Mr. Jones says he intends planting a little of everything. He is loud in his praise for the Federation and Modern Farmer. He says membership in the Federation is worth $25 and subscription to Modern Farmer $10 per year.

Socialists War For Ballot For Workers

Detroit, Mich., June—(By A. N. P.)—Abolition of the denials of individual rights and liberties in many states which disfranchise unemployed workers on the ground that is advocated by the Socialist national executive committees which will convene here. They are paupers and a consistent and vigorous fight against these injustices will be urged, it was reported.

COTTON BELT DISSATISFACTION

Prediction of Federation Now Fully Vindicated

Editorial From Chicago Daily News Gives Mr. Hopkins' Position

Others are beginning to discover what the National Federation of Colored Farmers has shown for a long time: that federal relief poured into the cotton belt for the benefit of the sufferers,—most of whom are colored farmers,—seldom goes to those for whom it is intended. The following is an editorial from the Chicago Daily News:

Washington is at last discovering the true character of its relief activities in the cotton belt. Harry L. Hopkins, federal relief administrator, complains that the AAA cotton program throws new hordes on the federal relief rolls faster than his organization can take care of them. The AAA retorts that cotton laborers are leaving the fields to get on relief rolls, because they can live better on federal bounty than by the sweat of the brow.

The anomalies and abuses of federal disbursements in the south are an old story to readers of The Daily News, however surprising they may be to the Washington authorities. They were described in this newspaper a month ago by Carroll Binder in a series of dispatches from the cotton belt.

But taxpayers, who must provide the hundreds of millions of dollars being spent for the rehabilitation of the south, are less interested in apportioning the blame for waste and confusion than in the adoption of a more effective future program. It is preposterous that federal subsidies should be permitted to separate southern farm laborers from their traditional means of earning a livelihood, particularly as there is no other employment open to them. We believe that the principle of subsidizing acreage reduction is fundamentally unsound. But even defenders of that principle must admit that something is wrong when the subsidies operate to increase the already large number of jobless farm laborers. While the subsidies continue, the federal authorities should insist that they be paid only to planters who retain on their plantations their full complement of laborers, without recourse to federal relief for the maintenance of these seasonal laborers.

Correction of the abuses in federal relief disbursements in backward southern districts will be even more difficult, but the government owes it to the taxpayers to institute drastic reforms. Southern feudal lords must be disabused of the idea that relief is a form of political patronage to be distributed at their pleasure. Relief is meant to take care of the unemployed who, otherwise, would starve, not to relieve grasping planters of the necessity of feeding their dependent laborers during the long seasons when they are not required on the plantations.

Local communities that refuse to cooperate in the distribution of relief in that spirit, and try to use the funds to benefit favorites of politically influential planters, should be cut off from federal subsidies. The needy in those communities would be no worse off, since they do not receive aid even when the funds come. It will require political fortitude of the first quality to institute such reforms, but failure to do so is making a national scandal.

CORN LOANS HALTED

May First Was the Dead Line Says President

More Than One Hundred Thirteen Million Dollars Distributed

Hon. Lynn P. Tally, President of the Commodity Credit Corporation, Washington, D. C., announced that the corn loan plan under which farmers borrowed 45 cents per bushel on ear corn sealed in cribs, ended May 1st.

Corn loans as of April 30th totalled $113,599,097, of which $87,056,186 was disbursed by the corporation in direct loans to producers. Approximately 252,450,000 bushels of corn have been sealed on the farms as security.

N. F. C. F. MEMBERS OFFERED LARGE TRACT OF LAND

James P. Davis, President N. F. C. F. announces that a large corporation has given authority to offer to Negro farmers any part of a ten thousand acre tract of fine farm land in southeast Missouri, with terms of one tenth down and one tenth per year for nine years. This is one of the finest tracts of farm land in southeastern territory. The climate is ideal, and the soil needs no fertilizer. Farm lands is one of the safest and best investments. Land will not evaporate, and during depressive periods the farmer can grow his living, even if he has no money.

Mr. Davis stated that over three thousand acres of the tract had already been subscribed for, and he felt confident that the entire tract would be taken, and developed into one of the largest Negro farm communities in the United States.

RAYMOND ALEXANDER FIRST OF HIS RACE IN LAW ACADEMY

Philadelphia, Pa., June—(By A. N. P.)—Signal honors were accorded Attorney Raymond Pace Alexander of this city, former president of the National Bar Association, when the Law Academy elected him as a member of that body, the oldest society of its kind in the U. S. Following this distinction accorded him, the first time in history that a Negro has been given that honor, Atty. Alexander in an address on the subject of abolition of the Magistrate Courts of the city and the enlargement of the Municipal Court, pointed out the fact that untrained men and political workers were sitting as jurists in the Magistrate Courts with the accompaniment of social injustice administered to the populace on account of their (the magistrates) ignorance of the law. It was believed that this address, delivered before the Law Academy on May 23, included in its scope, the status of Magistrate Edward T. Henry, only Negro serving as a justice. "Judge" Henry is not of the legal fraternity

6,000 ARE GIVEN 260 TONS OF SEED POTATOES

The Illinois emergency relief commission today began distribution of nearly 260 tons of seed potatoes to about 6,000 relief clients in rural areas. In exact terms, the program calls for furnishing 515,340 pounds of seed potatoes, at an estimated cost of some $15,000.

W. S. Reynolds, executive secretary, estimated that on the basis of last season's market values of about $1.20 a bushel the program should yield a crop worth about $72,000. Each participating family will receive ninety pounds of seed, calculated to yield, from a tract of one-eighth of an acre under intensive cultivation, ten bushels for the family's fall and winter needs.

In addition garden seed is being sent to 8,794 families for whom more than 1,200 acres are available in sixty-three counties. The plan was made possible through the expansion of the subsistence-garden program, which had provided already for the planting of community garden tracts for more than 25,000 families in ninety counties.

Gardens

From Eden's garden to Gethsemane,
And ever on and on, until this day,
Yes even on throughout eternity.
The human soul and gardens link some way;
And all will find a sacred kinship there.
Who seek heart ease beside a lovely rose
Or peace enjoy among the daisies fair—
The sweetest consolation life bestows.

While some love best the cultivated nooks,
The little gardens they have made their own,
And others, out-of-doors with fields and brooks,
The untamed spaces—this one truth is shown;
Each knows the presence here of kindred hearts
With deep serenity that God imparts.

—Evelyn Hornsby Mims.

CROAKING OF BULLFROGS MEANS MONEY ON THIS FARM

Washougal, Wash., July 27—The croaking of bullfrogs means money to Roy F. Bair of Washougal. "And," he says, "what I've done other farmers can do."

Mr. and Mrs. Bair, like most other farm couples the country over, failed to get much profit from their farm during the depression. That is, they failed until Bair decided to put the springs and low, marshy land on his farm to work—raising bullfrogs. Now he and his wife do a little truck gardening, have a few chickens and devote most of their time to frog-leg production. More, they are finding it profitable.

Profitable.

"Any farmer with enough marshy land for one pond will find raising bullfrogs profitable," Bair says. "It utilizes worthless land and the frogs require little care and always are marketable."

For breeding stock the Bairs imported jumbo giant bullfrogs from the west coast of Africa. Brownish green in color, this breed, they believe, surpasses others in sturdiness and particularly in size. Some of the Bair bullfrogs have measured 19 1-4 inches from nose to the end of the hind legs, and some of the females have weighed as much as four pounds.

Legs, of course, are most important from the raiser's standpoint. It is that part of a frog's anatomy which is most delectable. Incidentally, the American appetite for friend frog legs is increasing rapidly.

The bullfrog raiser receives on an average from $7 to $10 a dozen. One pair of legs is more than enough for a meal since they will weigh from one pound to a pound and one-quarter. The meat—all white—has a delicious taste, resembling chicken and fish, with a slight game flavor. Other parts of the frog are utilized, too. The forelegs and part of the back may be made into an appetizing stew, while the skin is used by the manufacturers of leather goods.

Ready for the Table.

"When a giant bullfrog is about 3½ years old he is ready for table use," Bair explains. "He may be used for breeding purposes much younger. Our species may live to a ripe old age, from 35 to 40 years. Regardless of age, however, the female will spawn each spring."

Any time before late autumn is a good time to start raising bullfrogs, the Bairs say. The frogs may be placed in a pool any time, but will go into hibernation if the weather is cold. Generally by the middle of November, the bullfrogs dive into the mud at the pond's bottom and stay there until winter has passed. On the Bair farm, the bullfrogs begin croaking about April 1.

Here's where the bullfrog raiser has the advantage. For nearly five months each year his frogs require no care.

Spring is the mating time in the bullfrog ponds. The frogs are monogamists, to the extent that a pair will remain together for a year. The next season they take new mates. Spawning time begins in June. Attached to submerged stems of sedges near the shore and to plants in the middle of the pond, globular, translucent objects, each with a round black center, can be seen. That is the spawn or bullfrogs eggs that are laid in clusters of 12,000 to 15,000. Under favorable conditions (best when the water is from 60 to 70 degrees Fahrenheit), the tadpole hatches on the fourth day. At first it is a minute, flattened, yellowish object.

Tadpole Stage.

At this stage the tadpole barely can wriggle away from its cast-off envelope, to squirm upward to the surface of the water. The tadpoles instinctively seek the shelter of foliage and shallow water at this age since they are easy prey to small fish and frogs. It is estimated that one out of every 100 tadpoles becomes a frog.

The tadpole begins to nibble at the "scum' of green algae on the ponds a few days after birth. As he grows older he becomes an out-and-out scavenger, eating any scrap of crumbs that he can find. He will thrive on mosquito larvae, insects, bugs, table scraps and water bacteria.

Prospective bullfrog raisers must plan on "protective pools" in addition to the big pond. Long before the tadpole turns into a frog, which takes about 18½ months, he must be moved—out of reach of frogs. The Bairs maintain several small pools. When the tadpoles get big enough to be more than noticeable, they are dipped up and moved. They remain in the small pools until their tails are absorbed and they become full-fledged frogs.

HENS GET BUSY IN FAIR EGG CONTEST

Chicago.—The World's Fair egg laying contest, which created such wide-spread comment among poultry keepers last year, is being repeated at the poultry industry's unit near the south end of the Exposition.

Of especial interest this year is the showing of beautiful bantams, turkeys, pheasants, pigeons and waterfowl. There are two spacious buildings devoted to practical demonstrations of poultry equipment.

Four distinct varieties of milch goats will be exhibited in conjunction with the poultry.

DEPRIEST WILL ADDRESS N. A. A. C. P. ANNUAL CONFERENCE

New York, June 8—Congressman Oscar DePriest will deliver the principal address at the closing Sunday afternoon mass meeting of the 25th annual conference of the National Association for the Advancement of Colored People in Oklahoma City, Okla., July 1, it was announced here today.

Sharing the platform with Mr. DePriest will be Walter White, the association's secretary, who will report upon the year's work and give especially the inside story of the fight for the passage of the Costigan-Wagner anti-lynching bill.

Jess Larsen, ex-mayor of Chickasha, Okla., will address the conference Saturday night, June 30 on the subject, "City Government and Its Interracial Problems." Mr. Larsen has been a member of the N. A. A. C. P., having joined first in 1930.

Miss Juanita Jackson, president of the City-Wide Young People's Forum of Baltimore, will speak also Saturday night on "Youth's Part in the Fight for Race Rights."

FISH GROWLS LIKE DOG; ANOTHER GRUNTS LIKE PIG

Though we generally think of fishes as silent creatures, persons who have made an extensive study of their habits have discovered quite a few species that are capable of producing sound, the New York Times relates. Among these are the South American catfish, which growls like a dog, the gunard, which grunts like a pig and the maigre, which not only whistles and bellows but purrs much like a cat. The musical contribution of our own American catfish is a noise which sounds like a person grinding his teeth, while the horse mackerel and the sunfish common to British waters make similar noises. The drummer fish of the Florida coast lives up to its name.

A story from Mexico tells of the remarkable vocal efforts of the so-called Mexican singing fish, or canary fish. These fishes, traveling in bodies several hundred strong at certain times of the year, produce a sound by contraction of their air bladders that is mellowed to a musical note as it filters through the water to a listener in a boat above them. And according to the Fishing Gazette, natives of certain regions in South America declare they can hear the "singing fishes" common to that locality coming from quite a distance, not by splashing or jumping but from the noise which they make under water.

—The Advance.

Religious Sect Cited In Court as Nuisance

New York City, June—(By A. N. P.)—The newest religious menace, "Sister Rosa Horne's Pentecosal Church," 130th street and Lenox avenue, has run into legal difficulties, according to information emanating from court records indicating that Mrs. Bertie Pierce, proprietor of a rooming house nearby, has filed a complaint against Mother Horne for causing a nuisance.

Attorney Arthur A. Madison, attorney for Mrs. Pierce presented the petition. But Mother Horne refuses to be fazed by the court action, declaring it to be a part of the project of the Divine followers to ruin her mission and "Pentecostal Church."

Every evening, services are conducted at Mother Horne's church, and they consist of a lot of noise, Mrs. Pierce says in her petition, so much so that she has lost most of her boarders. Likening the noise to the wildest savage rites with the beating of tom-toms and such, Mrs. Pierce prays the court to discontinue the nuisance.

THE DARROW REPORT ON THE NRA

The Darrow report on NRA codes has been received with wide divergence of opinion. Opponents of the Administration have been saying that it is the final straw, that it will blow the roof off the recovery program and show it up completely. That isn't true. Defenders of the Administration have been trying to laugh the report off, saying that it dosen't mean a thing, is of no importance whatsoever. That isn't true either.

One thing the Darrow report has done is to concentrate interest on a problem that has been looming larger and larger of late—the influence of the codes on small units within an industry; little stores, little manufacturing plants, little distributors of all kinds of commodities. The report says, briefly, that the codes threaten the small business with extinction, give big business all the breaks, and that monopolies are growing in strength by leaps and bounds. All but one member of the consumer's commission which Mr. Darrow headed, agreed with that. Then Mr. Darrow and one other member filed a separate report, even more sensational than the main report. In it Mr. Darrow says that we have a choice between fascism and socialism—that the suspension of such public safeguards as the anti-trust laws are inimical to the interest of the consumer and the average business man. Mr. Darrow's personal opinion is that there should be government ownership of basic resources; he has always tended strongly to the socialistic viewpoint.

General Johnson made the expected answer—said that the Darrow Board should be disbanded (it was due to automatically expire within two weeks); that the Darrow criticism was carping and unjust. Much more convincing was the answer of the NRA Chief Counsel Richberg, who pointed out that Mr. Darrow had kept to generalizations, had cited few specific items of abuses, and had offered nothing that could be called constructive criticism.

The effect of the report will doubtless be to hasten revision of the NRA set up, particularly in the matter of code price-fixing. It is known that Mr. Roosevelt has been studying changes for some time. Some observers likewise believe that General Johnson is due for oblivion—he is energetic, capable, courageous, but he has offended too many people, including big-shot newspapermen whose friendliness the Administration needs.

SOCIAL EFFECTS OF LIFE INSURANCE

The American public's growing interest in life insurance—which has been vividly demonstrated lately by large increases in sales of policies of all types—promises to produce extraordinarily beneficial social effects.

It wasn't so many years ago that but one of the uses of life insurance was thoroughly understood—to protect dependents in case of the death of the wage earner. As a matter of fact, nowadays other uses are overshadowing that one, and in recent years more money has been paid by the companies to living policyholders than to beneficiaries. Life insurance is being looked upon more and more as an investment. It provides a means of educating one's children, of guarding against business reverses—most important of all, perhaps, of assuring oneself a definite income for old age. And more and more citizens are buying policies to serve those ends.

This means that the American of the future will be a good deal more "solid" than the American of today. He will have less to fear from depressions, from all the hazards of life that can upset the best laid plans. He will be much better prepared to face and conquer adversity. And that, in turn, means a more prosperous, a sounder and a happier nation.

DRAINING THE BLOOD FROM INDUSTRY

Anyone who looks dublously on the argument that taxes stand in the way of business recovery would do well to take a glance at the experience of American industry during the past few years.

Here, for example, is what happened to a concern which has a gross income of about $220,000,000 a year. In 1929, a year of boom prosperity, it paid out 11.17 cents in taxes for each dollar it took in In 1931 it paid out 13.14 cents. In 1933, when conditions were extremely bad, it paid out 16.38 cents. And the proportion will probably be higher still in 1934.

That particular business is a big one—but small industries are in precisely the same position. As a matter of fact, they have had tougher sledding during depression than have larger concerns with great cash reserves—and have seen a rising proportion of hard-earned dollars go to government. Money that could have been used for expansion, for raising wages and shortening working hours, for putting more men to work—the tax collector got.

Every worker and investor has felt the adverse effects of that, and the problem constantly grows greater. Honest tax reduction, that really reduces the cost of government and doesen't simply shift the burden by political slight-of-hand, would be a powerful impetus to industrial expansion, to increase employment, to general recovery. You can't drain the financial blood from industry and expect it to go forward.

THE GUARANTEE OF DEMOCRACY

"The freedom of the press is the sole hope of freedom for the people. A dictatorship cannot endure a free press, for with one it cannot maintain itself continuously. A dictatorship—be it Communist, Fascist, or Nazi—always puts the press under its heel. Then the people know nothing because they can hear only what the dictator chooses t olet them. A free press is the sole guarantee of a free democracy."—San Francisco Chronicle.

—o—

STOP! LOOK!! LISTEN!!!

Between now and 1940, 190,000 people will be killed in automobile accidents . ...

The total of fatalities for the entire decade that began with 1930 will be 315,000, and the injury record will touch 10,000,000. The fatalities will be greater than the total of the soldiers killed in battle in the entire history of this country—and will surpass the battle casualites of the A. E. F. in the World War more than six times.

The number injured will be fifty times the number of A. E. F. soldiers wounded non-fatally in action.

That is what it is estimated will occur if the automobile accident record during the next six years follows the experience of the past four. As a matter of fact, there is an excellent chance that the number of fatalities and injuries will be greater still—the accident curve is tending upward, largely because of increased driving speeds.

There is one way in which this ghastly forecast can be proven wrong. That is by an aggressive campaign on the part of responsible motorists to modernize and strengthen traffic laws, eliminate cars which are defective in brakes, lights, steering and other essential parts, and to pass legislation which enforces adequate examination for drivers. So long as the reckless, the incompetent and the irresponsible rule the highways, as they do now, the lives and property of all other motorists are in constant danger.

WHEN THE MAGIC WIRE GOES "HAYWIRE"

You have read about the magic of Aladdin's lamp, but what can measure up to the "magic wire" of today and the invisible energy that pulses over it, bringing light, heat or power at the snap of a switch? This modern miracle, however, requires careful handling. When it is misused, the magic wire sometims goes "haywire" and when it does, fires may be started or bodily harm done.

Electricity is safe—the safest source of energy yet discovered But like other valuable agencies it is subject to misuse. The National Board of Fire Underwriters reports fire losses amounting to almost $15,000,000 during 1932 because of misuse of electricity.

A few simple precautions will safeguard the use of electrical energy. The very first is the purchase of standard electrical equipment, appliances and wire. When you buy electrical equipment, you can be sure that it meets safety requirements if it bears the label of Underwriter's Laboratories.

The next precaution is to have all wiring done by licensed electricians, and in accordance with the National Electric Code. Less than four per cent of electrical fires occur in buildings where standard equipment has been installed in this manner.

Carelessness in neglecting to disconnect appliances after use has caused numerous fires. Even automatic shut-offs occasionally fail to work. Overheating and fire can result from either cause.

Always remember that the fuse is the safety valve of the circuit. If there is an overload which might develop heat and fire, the correct-size fuse will burn out long before the danger point is reached. Don't tamper with fuses, don't put pennies or nails back of them—that is just as bad as tying down the safety valve of a steam boiler. Instead, ask an electrician what is causing the fuse to burn out.

Although most wiring is safe, there is danger of getting an electrical shock unless certain precautions are taken. Electrical cords or devices should not be within reach of metal objects that are grounded, such as water or gas piping, steam radiators, or hot air registers. Lamps made of metal should be kept

THREE BOOKS IN ONE
An Incomparable Church Record
Price $2.50

The late Dr. R. H. Boyd devised a Church Record, Roll and Minute Book that was serviceable, indispensable and helpful to every church. It is three books combined in one. Aside from a place for the minutes of each session of the church meeting, a place for the enrollment of the members and a place for the financial record of the church, this publication has in it two outstanding ordinances of the Baptist Church, namely:—the ordinance of Baptism and the Articles of Faith, with other splendid helps. Any church clerk or financial secretary of a Baptist Church will be helped greatly in the keeping of his minutes, the preserving of their records and roll and the arranging of its financial side by purchasing one of these books for $2.50.

THE MODERN FARMER

Official organ of the National Federation of Colored Farmers, Inc.

Leon R. Harris - - Editor

Published monthly by the Modern Farmer at Nashville, Tennessee.

Office, 447 4th Avenue, North.

Devoted to the interests of the Farmer, Truck Gardener, Livestock and Poultry Breeder, the Home and the People.

Entered as Second Class Matter, April 10, 1929, at the Post Office at Nashville, Tenn., under act of March 3, 1879.

All contributions for publication in the Modern Farmer should be addressed to The Modern Farmer, 447 4th Avenue, North, Nashville, Tenn.

No libelous matter will be published. Unsigned articles or letters, and those written on both sides of the paper will not be used.

Subscription price $1.00 per year, 75c for six months, payable in advance. Personal checks must be certified. Make all checks or money orders payable to The Modern Farmer.

Advertising rates and sworn circulation figures presented upon application.

"OUR SLOGAN"

STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT.

OUR PLATFORM

1. A Unit of the National Federation of Colored Farmers in every community. of colored farmers.
2. Co-operative buying, producing and marketing.
3. Every colored farmer a farm owner.
4. Abolition of debt-slavery, injustice and persecution.
5. A written contract for every colored farm tenant and sharecropper.
6. Better rural churches, schools and homes.

Editorials

From the Bible:—CO-OPERATION

"The locusts have no king, yet go they forth all of them by bands."—Proverbs 30:27.

In men whom men condemn as ill,
I find so much of goodness still;
In men whom men pronounce divine
I find so much of sin and blot,
I hesitate to draw a line
Between the two, when God has not.

—*Joaquin Miller.*

OUR WORK IS BEARING FRUIT

We quote excerpts from a letter recently received from Mississippi:

"I live in what is known as a very mean settlement. We colored people know the white merchants and landlords, most of them, have no use for the N. F. C. F. A government man came here not long ago and told us that we ought to keep on buying our groceries and farm supplies from..... ....., for we were being charged two prices for everything we bought around here. Our members are going to take his advice. We have to have the goods shipped into..... (a town 20 miles from the member's station) so they won't know just how much we are buying, **but we are going to keep on buying together."**

It is very unfortunate that some members of the N. F. C. F. are being persecuted simply because they desire to save their money and object to being kept in debt-slavery. Probably it cannot be helped. Some of us will have to suffer that our children may be free.

It is certain that debt-slavery, share-crops robbery and other like evils are dying. The N. F. C. F. is helping to destroy these evils. Our work is bearing fruit. The Race farmer and sharecropper who stands up like a man, demands his rights and refuses to be bluffed or bulldozed, may have to run, but the running will be good for him. Trouble and persecution will, in the long run, make us real men quicker than anything else. STAND UP FOR YOUR RIGHTS. RUN IF YOU HAVE TO, BUT DON'T GIVE UP. YOU HAVE MORE FRIENDS THAN ENEMIES.

THEY WOULD IF THEY COULD

Colored farmers are just as anxious to build up their communities as are other groups of American citizens. They can get together and stick together on any project that will benefit them and their community if funds are available to put such projects over. They helped build and pay for the numerous Rosenwald schools scattered over the rural South and this is positive proof that they will do for themselves if **they can.**

There are numerous permanent Race farm communities now in need of assistance. A little capital and a little constructive leadership would change these communities from American disgraces" almost overnight. These communities should have decent and modern homes, schools and churches, modern community halls, small industrial plants and co-operative stores and shipping facilities.

The federal government is loaning vast sum of money to cities for public works and improvements. We have been informed that no funds are available however to finance improvements in Race farm communities,—even in communities where colored farmers have organized units of the N. F. C. F. We would like to know WHY? Who is our nation's most forgotten man? The colored farmer. We wonder just when the big leaders are going to remember and consider him.

WHY WORK

The farmer or any other man who would rather live off "government relief' 'than to work for his living, is a mighty sorry individual. Reports reach us that hundreds of Negro tenant farmers and sharecroppers, unable to exist on the plantations on account of cotton acreage reduction, are going to cities and small towns and going on "relief."

We know that many have been forced to do this. They had to beg or starve. But it is against the nature of our people to do either. We will not starve,—that is certain,—not as long as there is any thing to eat anywhere,—and neither are many of us going to live as beggars the rest of our lives. There has got to be a change made. This is certain.

What can be done about it? Probably colonization would solve the problem but many of us do not favor colonization. Many of our white friends oppose it also. So many have been living off the Negro and his labor for so long they just couldn't possibly live at all without him to live off of.

The attempt of the AAA to compel the owner-acreage-reduction-signers to allow their discharged tenants and sharecroppers to remain **in the cabins and live off** the land was doomed to failure from the beginning. People can't be forced by law to help the other fellow. Some will do so,—out of the goodness of their hearts,—but this is the force of Christianity,—not of law. And landlords of the average kind have never had an over-abundance of Christianity.

Subsistence farms will take care of a few. Breaking up the thousands of too-big farms and plantations in the cotton belt would take care of nearly all. We might as well face the issue and the music now. THE FEDERAL GOVERNMENT MUST COLONIZE NEGRO TENANT FARMERS AND SHARECROPPERS,—OR GIVE THEM THE OPPORTUNITY TO BECOME SMALL FARM OWNERS,—OR, KEEP THEM ON RELIEF FROM NOW ON. THE FEDERAL GOVERNMENT MUST MAKE THEM EITHER REAL CITIZENS OR PERPETUAL BEGGARS.

LET'S CLEAN UP

We urge all farmers to clean up their premises and keep clean during the hot months at least. Flies and mosquitoes are disease carriers and should be fought like all other enemies of the human race. Buy screens and netting. Get some extract of pyrethrum from your drug store, mix one part of pyrethrum to 19 parts of coal oil and use it as a spray. This is instant death to flies and harmless to humans. Dirt, filth and flies are a disgrace. Clean up.

PUERTO RICANS TO INCREASE FOREST ACREAGE RESERVE

Timber products are at a premium in Puerto Rico, according to the United States forest service. Helping to meet local timber requirements is one of the big problems in the administration of the Luquillo National forest, the only tropical-type national forest in the island territory. The federal government is planning to purchase some small additional acreages for the forest, to increase its timber-producing capacity, as well as to improve watershed protection.

In Puerto Rico, the population is 449 to the square mile, or more than ten times the average in the continental United States. Approximately 2,200,000 acres of land support a population of 1,543,913 people, of which 200,000 live within ten miles and 500,000 within twenty-five miles of the Luquillo forest.

Charcoal is the principal or almost the only fuel. It is made from small trees cut from the island's depleted forests. Construction needs for lumber are being met largely by douglas fir from the Pacific northwest, but dependence for termite-resistant wood and cabinet material still rests on the local limited supply.

The areas to be purchased can be expected to produce unusually large quantities of timber in relatively short periods. "Australian pine" plantations 10 years old are as much as fifty-seven feet high, and are estimated to contain a volume of 31.2 standard cords of wood to the acre. Mahogany, cedro, and other trees are expected by the forest service to yield timber crops in thirty-year rotations, and some "fast-growing species" are said to produce crops of cordwood at the rate of 5 cords an acre a year in a five-year rotation.

The wife who drives from the back seat isn't any worse than the husband who cooks from the dining room table.

"OL' MAN RIVER—IN PERSON."

By Alexander Wallcott. (In Hearst's International Cosmopolitan.)

Late on the first night of 1933, I started back to London from the country house in Kent where I had been spending the week-end to see the new year in—started back in a hired Daimler which moved majestically through the fog and was about the size and shape of a small house boat. Clutched in one hand was a spray of priceless orchids from the nursery on the place, and in the other was a 40-inch cutlass of sinister appearance.

My host had heard me innocently admiring them, and to my genuine surprise had pressed them into my hands at parting. As I drove off into the night, I made a note to remember that on my next visit I must be overheard expressing my enthusiasm for several paintings there by Augustus John and the late Mr. Sargent, for a small bronze head by Epstein, for the avenue of immemorial yews which glorifies the drive, for the bride of the younger son of the house, and for a small black spaniel bitch named, if memory serves, Tiny.

But as my car trundled along in the midnight fog my thoughts shifted to the music we had plucked from the air after dinner, and, with that as a start, I found myself from there on reviewing, as one might parade, the long procession of my acquaintance with one who was a groping and perplexed youth when first I met him, and is today a colossus bestriding the world—the wide, wide world which is his home. You see, we had tuned in that evening on the Hilversm station which broadcasts from the Netherlands, and we were the more amused to stumble on some one singing no quaint old Dutch tune at all, but a melody as unmistakably American as "Huckleberry Finn," corn pone, or the late Calvin Coolidge.

"He don't plant 'taters,
He don't plant cotton,
"An' dem dat plants 'em is soon forgotten....."

This, mind you, from Holland, on New Year's night. It was "Ol' Man River," and we realized, too, that it was being sung with a voice of such ripe, rich, moving beauty that it could belong only to him for whose uses that song originally was written.

Wherefore, I fell to thinking of all the times my path had crossed Paul Robeson's in years past, and if Sherlock Holmes had been sharing the car with me and could see in the dark, he might have read the sequence of my recollections just from the way I sighed, chuckled, groaned, snorted, scowled and hummed my way to London. For Paul Robeson and I are old friends and neighbors—neighbors in the sense possible only to those of us whose tent is usually pitched at one or another of the great crossroads of the world. Such a one is a species of innkeeper, and can count the times when this or that person has dropped out of the caravan for a moment and rested under his roof.

Thus Paul Robeson has come my way a dozen times. Often a year or two will go by without seeing him or having a word from him, and then, unannounced, his great bulk will fill my doorway and my heart rejoices, for of the countless people I have known in my wanderings over the world, he is one of the few of whom I would say that they have greatness. I do not mean greatness as a football player or as an actor or as a singer. I am not, I think, confusing his personal quality with his heroic stature. I do not even have in mind what is, I suppose, the indisputable fact, that he is the finest musical instrument wrought by nature in our time. I mean greatness as a person.

In his case I despair of ever putting into convincing words my notion of this quality in him. I can say only that by what he does, thinks and is, by his unassailable dignity, and his serene, incorruptible simplicity, Paul Robeson strikes me as having been made out of the original stuff of the world. In this sense he is coeval with Adam and the redwood trees of California. He is a fresh act, a fresh gesture, a fresh effort of creation. I am proud of belonging to his race. For, of course, we are both members of the one sometimes fulsomely described as human.

"Ol' Man River"! I remember a day in 1926 when Jerome Kern telephoned me in what seemed a state of considerable excitement. That inexhaustible mine of melody had just read a story which he thought would provide him with the libretto for which he had been waiting all his life. It was called "Show Boat" Had I read it? I had. And did I know this Edna Ferber? I did, indeed. Well, then, would I give him a note of introduction to her? This was too much.

"If you were to call her up and say you were Jerome Kern and tell her you wanted to write a score for that story of hers," I said bitingly, "I suppose she would slam down the receiver and barricade the door."

But he wanted a note, so (serving about as useful a function as did the present Theodore Roosevelt when he kindly wrote to the American ambassador in Paris a letter introducing young Captain Lindbergh, in order that the latter might not be cold-shouldered by our embassy) I did as I was bid. And posted it to him. It so happened that that very night I went to the theater with Miss Ferber and that in the lobby between the acts none other than the shrinking Kern drifted in our direction. I assumed, of course, he had done so to scarpe an acquaintance with his favorite authoress, and scarcely bothered to introduce them. It was only a chance word which identified her for him.

"You mean this is Edna Ferber?" he cried, and metaphorically fell into her arms. From then on, neither of them remembered that I was there.

But even then the exit speech had not yet been written for my own modest role. Two weeks later, he was on the wire again. This time he was in too fine a frenzy of creation to bother with mere introductions. That morning he had written a song called "Ol' Man River" and please did I have Paul Robeson's telephone number? A half hour later he was climbing the steps to Paul Robeson's flat in Harlem.

Afterwards I heard all about that first meeting. The song was sung for the first time from a rough manuscript, with Kern himself at the piano and Mrs. Robeson as audience. Then the composer was possessed that Robeson should come right down town with him and sing it for young Oscar Hammerstein, who had written the words.

Paul did not mind, but turned for funds to Mrs. Robeson. She is a flashing, resourceful woman, far lighter in color than her husband, being of mixed Negro and Jewish blood. Hers is the custody of the privy purse. He wanted $2 for taxi fare. But Kern was going to drive them down. She knew he would need only fare for the ride back. One dollar would be plenty.

"Aw, go on," he said; "be all Colored and give me two."

Interesting NEWS Notes

Livestock authorities say that each dairy cow in a herd should be given a yearly allotment of two tons of hay, two acres of pasture, 16 bushels of corn, 16 bushels of oats, and 600 pounds of cottonseed meal.

A Kansas farm hand near Wellington received dangerous slashes in a terrific struggle with a peccary, or wild hog. He finally shot the animal.

A farmer near Temple, Texas, has put the parts of a Model T. automobile at work doing chores around his farm. A windmill, made from auto parts is the main unit in his machinery. A belt from the mill turns a washing machine, another saws wood and another runs a threshing machine and furnishes light.

There were 86,787 colored farmers in Georgia in 1930, a decrease of nearly fifty thousand in ten years. Only 11,080 were full owners. Farms owned comprised 883,284 acres and value of land and buildings owned was $17,528,122.

Drouth, insects and other troubles are menacing grain crops all over the world and a universal upturn in prices is possible. Colored farmers are advised to plant all grain possible and take good care of it. Corn and oats and all feed-stuff is apt to increase in price this fall and winter.

The mercury fell to 55 degrees in Florida May 28th, while at the same time in the middle west it went to over a hundred and caused much suffering. While the west was suffering from drouth the southeast was getting bountiful rains.

A 500 pound hog belonging to a Virginia farmer, fell into a well but kept himself afloat all night. He was rescued the next day.

The sun got so hot in Kansas during the latter part of May that a farmer reports that some matches he was carrying in his hip pocket ignited and burned a hole in his trousers.

A barred Plymouth Rock hen belonging to a Canadian farmer is setting a record in an egg-laying contest. She has laid 192 eggs in 196 days.

It is estimated that beef cattle in Florida number 1,500,000 and that pasture land totals 25 million acres.

A cow, crazed by the extreme heat, gored two persons and stampeded fifty others before it was shot to death by police in Indianapolis. A colored child, two years old was struck in the eye.

Hennery Grammar

Lecturer—"Do you say that your hens 'sit' or 'set?'"

Busy Housewife—"It never matters to me which they do. What I am anxious to learn when I hear a hen cackling is whether she is laying or lying."

Hen

St. Charles, Ill.—I wish to tell you I have a hen who doesn't believe in the NRA. She hatched a batch of chicks and when they were three weeks old she began to lay and still cares for her chicks and lays her eggs. She is a White Rock.

Mrs. John Parker.

RELIGIOUS ART IN FAIR EXHIBIT

Hall of Religion Stresses Spiritual Uplift in Opening Rites.

Chicago.—The place which religion takes in society was stressed at the new World's Fair during opening ceremonies at the Hall of Religion when dignitaries of twenty-five religions and denominations participated.

The impressive rites were presided over by Bshop **Ernest Lynn Waldorf, of the Methodist church. Rufus** C. Dawes, **president of the Fair,** welcomed the religious leaders and spoke briefly of the religious and spiritual advances **that** have been made within the last 100 years. He pointed out that, although the primary theme of the Exposition has been the recording of activities in the field of industry and science, the World's Fair would not be complete without some expression of the developments in the spiritual phase of life.

The Hall of Religion, in bringing together members of all denominations and sects for the uplift and greater spirituality of man, reflects the true spirit of the World's Fair, Mr. Dawes concluded.

Symbolic of Beauty

"The spirit of the Hall of Religion is the spirit of all true religions," Dr. Hugh S. Magill, manager of the exhibit, declared, in closing the ceremony. It is symbolic of that element in life which springs from the worship of a Supreme Being, who is the highest embodiment of man's conception of purity, justice, beauty, love.

"There are two great forces in the world, one leading upward—always striving for the beautiful, the true and the good; and the other leading downward, through selfishness and greed, to the lower and baser purposes. President Dawes and other officials recognize these contending forces, and we of the Hall of Religion assure them that we are back of them in their efforts to preserve the high standards of this great Exposition, and will help them overcome the forces that would seek to debase or degrade it."

Houses Costly Objects

The Hall of Religion houses one of the largest and most costly, and extremely rare collections of religious art ever assembled. Painting, sculpture, carving, architecture, raiment and works in precious metals are among the mediums used to symbolize episodes and developments of the Christian age. Each subject in the exhibit is a masterpiece, itself, and some are attributed to artists whose names are immortal. Many exquisite objects are so ancient that time has hidden the identity of their creators, forever.

It is the history of art that many of its finest works have been inspired by religious motives on the part of the artists. In the Hall of Religion, A Century of Progress visitor sees scores of material examples to confirm this belief, and carries away with him a deepening sense of spiritual understanding.

MONDAYS ARE BATH DAYS FOR LIONS AT FAIR

Monday is bath day for the animals at the lion taming show at the new World's Fair, and Allen King, trainer, gets busy with his long-handled brush and a bucket of creolin, cleaning up the lions and tigers. The animals cannot be washed with water because of the danger of pneumonia.

As a prelude to the bathing, all the lions are turned into one cage where the older animals bathe the two-and-three-year-olds with their tongues. Like big cats with kittens, the lions knock the youngsters around and hold them down while they clean them. The tigers cannot be put together because of their ferocity.

GIRLS' PRETTY TEETH WIN THEM FAIR TRIP

Chicago.—Because they were good little girls and brushed their teeth every morning, noon and night, three fortunate young ladies will visit the new World's Fair next month. They were selected from more than 25,000 candidates in a nation-wide dental charm contest, sponsored by the Bristol-Myers company, and from those **three a queen** will be selected at the Fair.

The winners are Georgia W. Berry, Richmond, Va.; Mildred M. Smith, Wilbur, Wash.; and Mary Elizabeth Bort, Long Beach, Calif.

OTHER USES FOR CORN

"Turning a bushel of corn into hams, chops and sausage is no trick for a hog and no news to the public at large, but turning the same bushel of corn into ten pounds of snow white sugar, a quart of table syrup, a box of fireworks, a pound of salad oil, a cake of soap and enough laundry starch to do the family wash for a month—that's something else again, especially when there is about twenty-five pounds of good stock feed left over that will give the hogs a reasonable meal after all these other things are removed.

And these arc only some of the results chemists can get from corn. Its handy uses in the industrial field are drawing the attention of economists to the possibility that here lies some measure of hope for lessening the big farm surpluses.

Corn has become a raw material for manufacturers in the limitless markets of industry because of the compounds that nature stores in the ripe grain. The processing is done at plants located in eleven states near the great corn-growing districts. These plants are the workshops of the corn refining industry, whose chemists have worked out the intricate series of delicate operations that separate different compounds in the kernel.

From the familiar little flat particle called the "germ," an oil is pressed out and refined into palatable cooking salad and table oil. From the kernel itself, the hull and the glutten are used in stock feed. The starch that is left is the main basic product—the "ore" of the industry.

Starch not only has an impressive number of uses of its own, but also can be converted into dextrins, syrups or sugars, all of which have their own list of uses. The dextrins are mainly adhesivc, such as the gum on stamps and envelopes or the wood veneer glue so widely used in furniture making. Dextrins are also used as a "filler" in paper and textiles or for the body of the popular type of fireworks known as "sparklers."

But perhaps the most impressive products of the starches made from corn are the syrups and sugars. Pure dextrose, a sugar identical with the sugar of the human blood and tissues, is made in large quantities. Dextrose looks like ordinary sugar but does not have the same cloying sweetness. Since it is the same as the sugar of the blood stream it can furnish quick energy with little digestive effort and its superior nutritive qualities are becoming widely recognized.

The syrups, which have long been familiar as table syrups and in candy making and the preparation of jams, jellies and preserves, contain a generous amount of dextrose and are known to be especially suitable for infant feeding, for invalids and as a source of plentiful energy for growing children, athletes and workers in strenuous occupations.

A bushel of corn will make from thirty to thirty-eight pounds of starch, dextrin, syrup or sugar, and will yield about a pound and a half of corn oil and close to twenty-five pounds of corn gluten feed or other stock feeds in addition."

MOSQUITO PREVENTIVE

The following is claimed to be the best mosquito preventive there is. Readers bothered with the insects should keep the mixture handy and use on pillows at night, especially where children are sleeping.

Olive oil, one ounce; pine tar, one-fourth ounce; camphor, one-half ounce; citronella, one-fourth ounce; oil of sassafrass, one-fourth ounce;

AN INTERESTING STORY FROM NEW YORK

Writing about the goings-on in New York City, Sam Love, who contributes to numerous daily papers, tells the following interesting story about the Negro colony in New York before the Revolution. The story follows:

"Greenwich Village, now a place of arty garrets, cellars, tearooms and speakeasies and playground of visiting college boys, once was New York's Negro center. The ghosts of that far-off time, when dark Harlem lurked, menacing the rocky farms where Times square now blazes, were raised recently when workmen dug deep into the debris of the pre-Revolutionary war Negro colony in setting the foundation for a new village dime-and-dance place.

* * *

A row of shacks and stables that once housed colonial Negroes was rudely demolished and carted away. But among the dust that arose must have been the shade of Manuel Gerrit.

* * *

Manuel Gerrit was a giant Negro, who measured seven feet and weighed more than three hundred pounds, and he was twice hanged on that spot. The giant was one of a group of nine slaves imported directly from Africa. One of them was murdered in the night by his companions. The remaining eight embarrassed the authorities by confessing that they were all guilty of the murder. They said they hadn't liked him.

* * *

Too much money was tied up in the slaves to hang the whole bunch and it was decided to let one Negro, chosen by lot, "suffer for all." Manual Gerrit drew the black bean. On his execution day a great crowd collected to see the giant swing, as he was the biggest man ever to be hanged in America and New Yorkers were naturally proud on account of it. But his weight broke the temporary gallows and he fell to the ground unhurt.

* * *

Hasty repairs were made and he was again dropped through the trap. This time he snapped the rope and rolled to the feet of the spectators, purple and choking. The crowd, in a hysterical frenzy, above which could be heard the screams of women and the prayers of a preacher, threatened to riot if a third attempt were made. It was determined to let the man go.

* * *

Gerrit received permission to build a shack on the spot where they tried to hang him. He considered the place lucky. He outlived all his wouldbe hangmen and became the chief of a small group of elderly slaves freed by the settlers as superannuated.

* * *

Those patriarchial Negroes became custodians of New York's cattle, which they grazed and guarded from the Indians. They drove the cows daily along Sand Hill road, across to Broadway and down to the fine pasture which is now Washington Square. This, I firmly believe, is New York's original "when such-and-such a place was away uptown" story.

MILLIONS DEPEND ON RICE HARVEST

India and China Live Largely on White Grain; 4000 Varieties

While the shifting of the world's wheat supply is spectacular—millions of bushels carried thousands of miles across great oceans—the transportation of rice, also a major "staff of life," goes on more quietly in a smaller area, it is pointed out in a bulletin from the Washington, D. C. headquarters of the National Geographic society.

In China, canal boats and the backs of coolies spread the grain into regions close to its growth, says the bulletin. In India, too, the hauls are short, and are made by bullock cart and railway. Barges float their loads down the streams of Indo-China and Siam, and solid rice trains on Siam's modern railway help in the movement toward the coast. Steamers and ocean junks carry their grain cargocs up the coast of Asia to China and Japan.

Leading Producers

Exclusive of China, for which country no accurate statistics are available, more than 63,500,000 tons of cleaned rice are produced annually. Toward this mighty rice bowl India contributes more than 55 per cent of the total amount. Japan contributes 14 percent; French Indo-China, Java and Madura, and Siam follow, each with somewhat less than half of that amount. Estimates indicate that China raises about 25,000,000 tons each ycar, but as rice has been a forbidden item of export from time immemorial, no one worries about statistics as long as his daily portion of rice is forthcoming.

Ricc growing is not confined to continental Asia and its adjacent islands; in Africa, Europe and the United States rice fields also sprawl over many well-watered areas. With the exception of Italy, European countries find the demand greater than their production. But from the fertile fields, especially in the Po Valley, comes sufficient rice to place Italy in the group of rice exporting countries.

In the United States, mainly in Louisiana, Georgia and the Carolinas, there is harvested annually nearly 575,000 tons of rice. About 14,000 tons of the cereal is imported, but fully nine times that amount is sent by the United States into the export market.

American Wild Rice.

In Minnesota in early autumn one can witness the traditional harvesting of wild rice by the Northwest Indians, an activity that originated countless generations before white men ever set foot on American soil. Present-day methods do not enter into the harvest. Two of three persons, usually squaws, paddle the canoes into the beds of ricc which grow in the shallow waters around the edges of lakes. There they pull the heads of the rice over the side of the boat, strike them sharply, and gather the grain in the bottom of the canoe. Modern inventions have been tried, but they destroy the stalks and reduce subsequent crops, so have been abandoned.

Contrary to thc belief of some, all domestic rice is not alike. Indeed, there are some 4000 varieties of rice in Japan. In the museum at Calcutta, India, there are on exhibit 1107 varieties of rice produced in that country, and 1300 varities produced in other countries. Some peoples prefer rice of a high gluten content, while others eat varieties which, when cooked, are less sticky. In north Siam, for instance, the masses eat a highly glutinous rice, while in central and lower Siam an entirely different variety provides the daily diet. River boatmen bringing produce down country often complain that the rice they get down river does not satisfy their hunger, and that they are perpetually hungry until they get back to their local supply.

Wet, Dry, and Red Rice.

In general rice is classed into two groups, "wet" and "dry" rice. It receives these classifications from the manner in which it is grown. The wet rice is grown in flooded fields, whilc the dry variety, sometimes also called hill rice, is grown in uplands where the water supply is limited. Hill tribes usually grow the dry rice in jungle clearings on the mountainsides.

One of the most interesting species of the grain known as red rice, it is a highly glutinous rice, the kernels of which are reddish in color. It is used in French Indo-China and Siam as a breakfast cercal, and when cookcd looks as if raspberries had been mixed with it. And, curiously enough, it seems

To get rid of ants, put oil of cedar on top of hills and on tables and in cupboards.

to have a suggestion of raspberry flavor.

Rice cultivation entails much back-breaking labor throughout the east where most of the grain is first sprouted in nursery beds and grown there to the height of about one foot. It is then transplanted into fields which have been flooded and worked into a deep porridge of oozy mud. The grain is usually harvested by hand with sickles, and eventually threshed by hand or by driving oxen and water buffaloes round and round over piles of rice heads. The husking and polishing for local consumption, too, is often done by hand or foot pounders.

In Japan, Java, and many other places rice fields resemble tiny gardens, rather than fields, so small is the area that is allotted to each farmer.

In China and Japan the area cultivated by one hand laborer is usually about one-half to two acres, while in the United States, where modern, machine methods are employed, one farmer may handle as much as eighty acres. Under the latter system the large, level fields are flooded during growth. Before harvest time, however, the water is drained off. The dried ground becomes firm enough for the use of ordinary reapers which cut and bind the rice as wheat is cut and bound.

Although its use as food is lost in the mists of antiquity, rice is believed to have been utilized first in India, the land which produces far and away the largest rice crop today. As early as 2800 B. C., a ceremony of the first planting was performed in China. The emperor, Son of Heaven, sowed the seeds of rice, the princes the lesser grains. For long centuries heavy barges filled with tribute rice were poled up the Grand canal to the imperial court at Pekins (Peiping). At times wallowing Chinese junks with burdens of tribute grain steered before the monsoon winds from as far away as Siam. In Japan, too, land rentals and the incomes of feudal lords were paid in rice.

In Japan and Siam, today, special religious ceremonies mark the opening of the plowing and rice planting season. Probably no other grain in the world receives the distinction of religious ceremonies, the attention of rulers, and folk celebrations to such an extent as does rice.

Economic Highlights

(Continueed from Page 3)

away from grounded objects. Do not place electrical appliances on a gas or coal stove when connected to the circuit. Do not allow any appliance, switch or heater to be within reach of the bathtub.

It is simply the part of wisdom to take whatever precautions are required to assure the safest employment of man's great servant, electricity.

GOVERNMENT POWER PLANTS AND LABOR

The National Job Saving and Investment Protection Bureau for the Coal Industry—which is made up of representatives of both the mine owners and the very aggressive United Mine Workers organization—recently said that it will fight plans for government hydro-electric projects "to the last ditch."

According to the Bureau, these plans threaten the jobs of 600,000 men—and threaten investments totaling millions in 24 states. Most of the proposed federal hydro plants would duplicate private fuel plants which are now providing satisfactory service in their localities. The Bureau believes that there is no need whatsoever for this duplication—and that all it would do would be to provide temporary jobs, at the expense of an equal number of permanent jobs. In the case of one of the most important federal projects, that on the Loup River in Nebraska the heads of the American Federation of Labor, the Railway Brotherhoods and the coal operators' association protested to the government—and were not even granted the courtesy of a hearing.

The attitute of union labor in this case is especially interesting, inasmuch as one of the arguments used in defense of federal hydro projects is the employment they provide. What their proponents neglect to say is that this new employment would be of comparatively short duration—and that it would be the direct cause of throwing an army of men now employed in coal mines, railroads and existing private utilities, out of work. It's high time the Federal government held open hearing on the power plans—and gave all concerned a fair chance to present their side of the question to the public.

THE TEST OF A MAN

The place to take the true measure of a man is not the forum or the field, not the market place or the amen corner, but at his own fireside.

There he lays aside his mask and you may judge whether he is imp or angel, king or cur, hero or humbug.

I care not what the world says of him; whether it crowns him with laurel or pelts him with bad eggs; I care never a copper what his reputation or religion may be; if his babes dread his homecoming and his better half has to swallow her heart every time she has to ask him for a five dollar bill, he's a fraud of the first water, even though he prays night and morn till he's black in the face, and howls hallelujah till he shakes the eternal hills.

But if his children rush to the front gate to greet him, and love's own sunshine illuminates the face of his wife when she hears his footfall, you may take it for granted that he is true gold, for his home is a heaven, and the humbug never gets that near the great white throne of God.

I can forgive much in that fellow mortal who would rather make men swear than women weep; who would rather have the hate of the whole he-world than the contempt of his wife; who would rather call anger to the eyes of a king than fear to the face of a child.—William Cowper Brann.

SELECTIONS FROM SPURGEON

I like to see the old man grow young when he talks of Christ; let him on that point become enthusiastic, even as in his boyhood.

The promises come from a great God, they assure us of great love, they come to great sinners, they work for us great results, and deal with great matters.

If you are very busy, think and pray all the more, or your work will wear and weary you, and drag you away from God. For your work's sake break away from it, and give the soul a breathing time.

We do not hold truth in a true way unless it leads us to a true life.

The wisest course is to keep out of the way of a man who has the complaint called the grumbles.

Much of the fanaticism which comes with religious excitements is not of God. The genuine dew of heaven falls calmly.

I believe in the perseverance of the saints because I believe in the perseverance of the love of God, or else I should not believe in it.

When you are in an argument for the truth, do not grow angry, for this would be to fight the Lord's battles with the devil's weapons.

I am glad to hope that some men are converted to God amid war and earthquakes and pestilence; but I am inclined to be suspicious of that kind of conversion for fear it should die with its cause.

Disease is a trumpet which must be heard. Its echoes reach the miserable garrets where the poor are crowded together and have never heard nor cared for the name of Christ, — they hear the sound, and as one after another died, they tremble. In the darkest cellar, in the most crowded haunt of vice; ay! and in the places of kings, in the halls of the rich and great, the sound finds an entrance, and the cry is raised. "Death is come!"

Selfishness is never worse than when it puts on the garb of religion.

The saint in his errors is a star under a cloud but the sinner is darkness itself.

Find, if you can, one occasion in which Jesus inculeated doubt, or bade men dwell in uncertainty.

If we look for Christ to come we shall keep our eyes heavenward and our minds occupied with the country from which He cometh. If we mind earthly things it will be evidence that the coming of the Lord has no power over us.

—Exchange.

HEMLOCK SPRUCE IS TREE POPULAR ALONG HIGHWAYS

The hemlock, more properly the hemlock spruce, is one of the more beautiful, graceful evergreens of the northeastern United States. It is usually found in moist situations, such as the northern slopes of rock ridges and along the banks of streams, ponds and lakes. It is a somewhat common forest tree. A recently cut Pennsylvania giant was five hundred and sixty years old. There is nothing quite like the beauty of a grove of large hemlocks and, as a roadside tree, it is not without merit.

The hemlock has greater possibilities than suggested by the above. There are some seven recognized species in America, three having been introduced from the Far East, and two growing in the West or Northwest.

The Japanese hemlock is a graceful distinct species which does well in some states. The Chinese hemlock, a handsome, promising species and a closely related tree, is from the Province of Yunnan.

The Carolina hemlock ranges from the mountains of southwest Virginia to Georgia. It is considered a more desirable ornamental tree than our common hemlock. The Western hemlock occurs from southern Alaska to Idaho and California. It grows rapidly in a rich, humid soil, but does not do well in dry Eastern climates. The mountain hemlock is also Western and has much the same range as the preceding, except that it is more boreal in habit.—New York Herald-Tribune.

TOPEKA BOY MAKES NATIONAL SOCIETY

Topeka, June—(By A. N. P.)—Paul Poston, brilliant Negro student of the Topeka High School and a member of the 1934 Graduating Class, has been named to membership in the National Honor Society.

Young Poston has maintained a most unusual scholastic rating during his entire high school career. He has been an outstanding figure in the school in leadership, deportment, character, scholarship, and extra curricula activities as well.

The Farm Credit Administration reports that farm land prices have increased during the past three months around $2 per acre.

SING A NEW SONG FROM OUR OWN SONG BOOKS

NATIONAL BAPTIST HYMNAL.—A new hymn and tune book, music edition, containing 448 pages and divided into three parts. Adopted by the National Baptist Convention. PRICE: Cloth, lettered in gold, red edges, single copy, $1.00; per doz., $11.50.

NATIONAL BAPTIST HYMN BOOK—Word Edition.—A collection of old meter songs, selected for use in homes, and prayer meetings. 532 pages, 622 hymns; cloth binding, Single copy, 70c by mail; per doz., $8.40 by express.

NATIONAL GOSPEL VOICES, No. 1.—Prepared especially for Baptist churches, Sunday-schools and Young People's meetings, with music, in round notes, 40c per copy; $4.80 per dozen.

NATIONAL GOSPEL VOICES No. 2.—Especially prepared for Baptist Meetings, Round notes. Price 40c per copy; $4.80 per dozen.

NATIONAL GOSPEL VOICES No. 1 and 2 Combined.—Published in shaped notes. Try this one and you will be satisfied. 45c per copy, prepaid; $5.40 per dozen.

NATIONAL G. V. HYMNAL.—Contains 447 songs. New and old selections. Price, muslin, 50c each; $6.00 per dozen.

NATIONAL HYMNS OF VICTORY.—Choice songs for Sunday-schools, church and prayer meetings. Price, muslin, 35c each, $4.20 per dozen.

CELESTIAL SHOWERS No. 1—40c each by mail; $4.80 per dozen by express. Round notes only.

CELESTIAL SHOWERS No. 2—A perfect gem for Sunday-schools. Price, 40c each by mail; $4.80 per dozen by express. Round notes only.

NATIONAL TIDINGS OF JOY.—35c each; $4.20 per dozen. Round notes only.

NATIONAL HARP OF ZION AND B. Y. P. U. HYMNAL.—Full of stirring melodies. Arouses the heart, and quickens devotions. Price 35c each; $4.20 per dozen. Round notes only.

CHOICE SONGS No. 1—Sixty-four select songs with music. 15c per copy; $1.80 per dozen. Shaped notes only.

CHOICE SONGS No. 2—One hundred and twenty-five new songs with musical shaped notes, 20c each. $2.40 per dozen. Shaped notes only.

PEARLS OF PARADISE, Part 1.—20c per copy, $2.40 per dozen. Round notes only.

SHORT TALKS ON MUSIC, or Rudiments of Vocal Music.—Contains 252 talks, 162 examples, 802 questions, and 45 fresh, new songs, never before published. 30c per copy, $3.60 per dozen.

NATIONAL TEMPERANCE SONGS.—A song book to meet the demands of the temperance cause. Price 12c per copy; $1.14 per dozen.

NATIONAL JUBILEE MELODIES—50c per copy, $5.50 per doz.

LASTING HYMNS—40c per copy, $4.80 per doz.

VICTORY SONG BOOKS—40c per copy, $4.50 per doz. $32.50 per 100.

ANTHEMS

NATIONAL ANTHEM SERIES.—A series of anthems for choirs, concerts and young people's meetings, by Wm. Rosborough and J. H. Carter. 50c per copy; $6.00 per dozen. Round notes only.

HAIL THE BAPTIST CONGRESS AND BEATITUDES.—25c per copy, $3.00 per doz.

STEAL AWAY TO JESUS—ANTHEM—25c each, $3.00 per doz.

METOKA AND GALEDA CLASS ANTHEM—10c per copy, $1.00 per doz.

ARE YOU SUPERSTITIOUS?

Does belief in superstitions and signs effect you or your children in any manner? The following, taken from the Journal of American Folk Lore, are some believed in by many people. An old saying has it that "colored folks have all the signs and white folks all the money." But the following "signs" are believed by more white folks than colored folks.

"Rocking an empty cradle causes colic.

"Stepping across child causes it to stop growing.

"A cat will strangle an infant by sucking its breath.

"A child which sees its own image in a mirror before it is one year old will be proud.

"It is unlucky for a child to look in a mirror before he is nine months old.

"A child will receive lofty thoughts if a louse is placed upon its head, and it is carried to the upper story of the house before it is nine days old.

"Paring an infant's finger nails causes it to become a thief.

"Cure slobbering by passing a live fish through the child's mouth.

"Cure pleurisy by passing the baby under the table.

"Sweep the house after supper and you will never be rich.

"Spilling salt indicates a quarrel.

"Make wine in the dark of the moon.

"Make vinegar in the light of the moon.

"Marry in the light of the moon.

"Move in the light of the moon.

"A fence must be made in the waning of the moon or the posts will sink.

"To kill a toad or barn swallows causes cows to give bloody milk.

"Potatoes should be planted in light of moon so they will take root.

"Cucumbers must be planted before sunrise in the morning or bugs will get them.

"Wheat must not be cut before the full moon as it will not be fully ripe.

"Transplanting parsley causes death.

"Cut hair on the first Friday after the new moon.

DROUTH BOOST PRICE OF SEEDS

Continued dry weather and heat, which has been reducing the clover and timothy seed crop outlook has had considerable effect in the market quotations. The wholesale price of red clover seed in Chicago advanced over $1.50 per hundred during the week of May 10th and timothy seed advanced $1.00 per hundred. Field peas such as whippor-wills, clay and crowders have advanced to around three dollars per bushel. Farmers in the south who have a good supply of these peas should keep posted on these prices. There will likely be a good demand for peas during the entire spring and summer months.

RETURNS FROM SCIENCE MEET

Washington, D. C., June—(ANP)—Dr. Montague Cobb, assistant professor of anatomy in the School of Medicine at Howard university, has recently returned from New York where he attended the annual meeting of the American Association of Physical Anthropologists and the American Society of Mammalogists.

Boston Composer Gets Conservatory Degree

Boston, Mass., June—(By A. N. P.)—William Rhodes, only Negro composer to graduate from the New England Conservatory of Music, was roundly applauded here last Wednesday evening at a concert given in Jordan Hall by the chorus and orchestra of the school. David Blair McCloskey, baritone and Carleton Petit organist, assisted in the presentation directed by Francis Findlat, noted conductor and member of the Conservatory faculty. Rhodes' compositions were featured on the program and he was applauded over and over again for his "Prayer of the Crusades" and his "Got-a-My Soul Baptized."

A. K. A'S ORGANIZE NEW CHAPTER IN N. J.

Atlantic City, June—(By A. N. P.)—Beta Theta Omega, the second chapter of Alpha Kappa Alpha Sorority in the state of New Jersey, was set up here on Saturday, June 2, by Mrs. Thelma Berlack-Boozer of New York City, director of the North Atlantic Region, at the home of Miss Mabel C. Hawkins, 721 Adriatic Avenue. Mrs. Ethel H. Lyle of Philadelphia, founder of the sorority, attended and took part in the ceremony. She was accompanied on the motor trip here by her husband, George Lyle, principal of one of the Philadelphia public schools.

Officers elected from among a charter group of seven are as follows: Miss Cecelia C. McLeod, basileus, Miss Grace Nash, first anti-basileus; Miss Charlotte M. Tabbo, through whose efforts the chapter was organized, grammateus; Miss Marion LaCour, epistoleus; Miss Hawkins, tamiouchos; Miss Inez G. Redd, hodegos. Mrs. Elise G. Speedwell is the other charter member. Sorors in this graduate chapter are teachers in various schools of this city.

The other chapter in New Jersey is Beta Alpha Omega in Newark, which was established on January 30 by Mrs. Boozer. There are now fourteen chapters in the North Atlantic Region of the sorority.

TO SHOW RESULTS OF ADULT EDUCATION

New York City, June—(By ANP)—An exhibition of the work done by students in the New York Urban League center under the sponsorship of the teachers of the Adult Education Department of the University of the State of New York will be conducted at the Renaissance Casino Tuesday. The exhibition will consist of trade, technical commercial, art, language units with one act plays by the Dramatic Class presented twice during the day Tuesday and programs by the language classes following. Music will be furnished by the Gotham band. Invitations to the affair are available and admission is by invitation only.

Big Crowd Hears Rev. Thomas S. Harten

Boston, Mass., June—(By A. N. P.)—Packing three of the largest colored churches in the city to capacity with microphonic extensions to lower rooms, the Rev. Dr. Thomas S. Harten, pastor of the Holy Trinity Baptist church, Brooklyn, N. Y., biggest Negro church in that city, electrified Bostonians last Sunday by telling them that there is no law against the group operating and owning large business enterprises, and that the Negro's condition, not his color, serves as his downfall.

ATLANTA LABOR BD. HEARS STRIKE CASE

Atlanta, Ga., June—(By A. N. P.)—The Regional Labor Board here Monday took under advisement the case concerning the strike of the Negro employes of the Britling Cafeterias in Birmingham, Ala., the strike went into effect three weeks ago, after a period of alleged dissatisfaction by the workers over pay and working conditions. It was brought out Monday that the striking workers thought they had obeyed the mandate of the secretary of the Birmingham Trades Council but he denied issuing the order to strike. The places of the striking workers have been taken by students of Birmingham-Southern and Howard College.

WHITE MEMPHIS MINISTER CHALLENGES WAYS OF CITY'S INTERRACIAL GROUP

Dr. Cooke Wants Something Done About Slums, Less Praise of Colored Brethren's Singing

Memphis, Tenn., June—(ANP)—At the inter-racial session of the Goodwill Conference at the Nineteenth Century Club, Wednesday morning, the Rev. Harold G. Cooke, pastor of the Highland Heights Methodist Church electrified an almost evenly divided audience of black and white listeners when he shouted:

"The basis for goodwill depends on doing something about particular things. Complimenting our colored brethren about their singing isn't going to lead to goodwill. What they want is elemental justice.

"I'd like every man and woman in this room to drive his automobile through the slum districts that the Negroes live in all the time. They wouldn't be tolerated one instant for even the poorest class of whites."

The Rev. Cooke told how he had gone through the terrible race riot at Tulsa and chided the conference when it seemed as though it wanted to talk and deal in sweet sounding, poetical generalities. The conferees previously had been talking about the eradication of slum conditions under which Negroes have to live in Memphis and other cities in the south and attacked in a general way the manner in which the Jim Crow Laws are enforced.

President Frank Sweeney of LeMoyne college had made the demand for clearance of the slums as the most immediate of inter-racial objectives and had asked that some permanent organization meet weekly to discuss the work on local inter-racial problems. In an effort to review the old Memphis Inter-racial League, the Rev. Robert A. George appointed Prof. Sweeney, the Rev. John C. Petrie and Father E. M. Wright of Emmanuel Episcopal Church for Negroes on a committee for that purpose.

Revs. Jones and T. O. Fuller then gave the formal papers of the morning session in which they reviewed the historical background of the American Negro's problem and race prejudices in general. Rev. J. E. Grant, pastor of the Avery chapel, attacked low pay given colored school teachers in the south and stated that the white man was cheating himself.

Tipsy Speeder Crashes Into Police Patrol

Los Angeles, June—(By A. N. P.)—Henry James McNiece, 31, took a little toddy made from a special Central avenue vintage and decided to try out his new car on Washington boulevard. Weaving in and out of early morning traffic last week, he landed square into a police patrol at Washington and Union avenue. Three prisoners in the "wagon" escaped injury. Officers O. BeHel and E. S. Anderson were treated for cuts and bruises, McNiece, unhurt was arrested on the charge of drunk driving.

West Virginia Wins Chess Tourney

Xenio, O., June— (By A. N. P.)—The team from West Virginia State Colleges emerged victorious in the fourth annual chess tournament at Masonic Hall sponsored by the Mid-West Chess Assoeiation made up of teams representing the chess clubs of the faculties of Wilberforce university ,West Virginia and Huntington, W. Va., and the Lockland Branch of the Y. M. C. A. held at Springfield, O.

Monroe Thumps Memphis Twice

Memphis, Tenn., June. — (By A. N. P.) —The Memphis Red Sox lost a doubleheader to the Monroe Monarchs, 5 to 6 and 4 to 3 here Sunday before a crowd of 1,200. A bad first inning, replete with errors, spelled defeat for Bill Harvey, star lefthander of the local crew, who fanned 12 men in the opening 10 inning tilt.

THE MODERN FARMER

Vol. VII. NASHVILLE, TENN., JULY 15, 1934. No. 3.

Charleston, Missouri To Get 1934 N. F. C. F. Convention

EXECUTIVE BOARD AWARDS NEXT MEETING

Farmers Will Hold First Session Ever Held on Northern Territory

The Executive Board of the National Federation of Colored Farmers Inc. announces that the annual convention of the organization this year will be held in Charleston, Mo., the last week in October. The exact date will be announced later.

Charleston is located in southeast Missouri, in the heart of the Missouri cotton belt. In this section there are several thousand colored farmers, some of whom are progressive owners of good farms. Many are organized farmers,—members of the N. F. C. F. The city can be easily reached by way of Cairo, or south from St. Louis by way of the Iron Mountain and Missouri Pacific railroads.

Interest in the convention is already evident, as the following excerpts from letters will attest:

From Mrs. Lagora Sanders, Wright Co Mo., "Glad the convention will be held in Charleston and in my state. I will be there."

From Mrs. Carrue Kinlaw, Tulsa, Okla. "I will atend the convention in Charleston, Mo., this fall. The N. F. C. F. is the Negro farmers' salvation."

From Robert Gardner, Three Oakes, Mich., "Please give me the exact convention date. I plan on being in Charleston and you can command me for any service I can render. We are with you."

Letters are coming in from Ohio, Kentucky, Indiana, Texas, Kansas, Arkansas and other states inquiring about rates and accommodations.

This will be the first convention of the organization held outside a southern state, proper, but as Charleston can be easily reached, by way of Memphis from all points in the south, a large southern delegation is expected. The local committee is busy now making plans to receive and entertain all delegates and visitors.

Ordered To Move; Takes Garage With Them

Atlanta, Ga., July—(ANP)—When the Atlanta University Housing Project underwritten by the federal government, was launched, Claude Lester, a tenant in one of the houses on the site bought by Washington, was ordered to move.

Lester did not object to moving, but decided, since nobody objected to tear down and move with him, the garage in the rear of the house.

But government officials objected later and now Lester has been placed under bond by the United States commissioner for stealing government property.

AAA CHIEFS SEE FAILURE

Cotton Program for U. S. Unsatisfactory

Compulsory Control is Doomed Says Report In Chicago Tribune

(Chicago Tribune Press Service.)

Washington, D. C., July 11.—The doctrine of compulsory government control over farm production through such regulatory measures as the Bankhead cotton bill is about to crack upon the rocks of its own ineffectiveness.

This was the prediction today of Oscar Johnston; manager of the AAA cotton option pool.

May Seek Repeal

Returning today from a trip through the south, the former AAA finance director declared that the cotton producers of the nation are just awakening to the consequences of the drastic Bankhead bill, which seeks to limit cotton production through application of a prohibitive tax on excess ginnings. He believed, he said, that President Roosevelt may soon be called upon to seek repeal of the act or to suspend its operation by executive order.

It is becoming increasingly apparent, Mr. Johnston declared, that the tax on excess ginnings will be borne almost solely by the tenant farmer and the share cropper—both of whom are least able to meet the levy. When this circumstance comes home to the majority of southern farmers, he predicted, the clamor for relief from the Bankhead bill will force action to suspend its provisions.

According to Johnston, the bill exercised tremendous weight in

(Continued on Page 8 Col. 2)

Colored Farmers Take Notice

TALLULAH, LOUISIANA. — "The Madison Parish Farmers' Club this week voted to establish AN ASSOCIATION FOR CO-OPERATIVE PURCHASING AND MARKETING."

These white farmers of Louisiana are doing just what units of the National Federation of Colord Farmers in Louisiana and other states are doing. They are going to buy, produce and sell co-operatively. They know thyy can help themselves by doing this. They can make more money and save money.

When the selfish planters and merchants in your community tell you that the N. F. C. F. is no good and that you should not belong to it, ask them why are they organized in farm associations? Ask them if you have not the same right to buy groceries and farm supplies co-operatively as they have?

VICTIMS OF THE NEW DEAL

Writer Says Conditions Worse Than in City

Tenant Farmers Face to Face With Starvation, Writes J. Clark Waldron

New York City— "Cotton may be king, but the folk who produce it are certainly slaves. Driven off the land, destitute, in rags, thousands of share-croppers and tenant farmers are face to face with starvation in the cotton belt," writes J. Clark Waldon in a special article in the Nation. "These share-croppers and their families are scattered over nine states. They are the victims of the AAA acreage reduction progrtm. Many thousands of them have no food or clothing and only the most meager shelter. While their plight becomes worse, Southern plantation owners are industriously imitating their Northern brothers, the industrialists, and are chiseling hard," states Mr. Waldron in his descriptive article on conditions in the cotton belt.

"There is every evidence that on many of the large plantations there will be as much cotton planted this year as last. The number of share-croppers, however, is being reduced; in many instances, share-croppers who are given land are assigned plots that have been taken from others."

"Those permitted to remain on the land and those driven off are virtually in the same desperate plight; the majority own nothing but the tattered clothes they wear. They are being crushed— blotted out. Their very existence is hanging in the balance. No 'act of God,' no cyclone, hurricane, earthquake, or other natural phenomenon could have made their condition more desperate or more pitable. A trip into the cotton belt, which embraces some forty million acres of the richest land that man could want to yield him bountiful crops should convince any one that here is the largest slum in the world."

Life Today Has No Value

"As a newspaperman for more than 18 years I have visited slums in many cities, and nowhere have I seen anything more appalling—not even the fringe of the Barbary Coast of old San Francisco, nor Halstead Street in Chicago— than these Southern slums of the Delta lands. They are taking toll of human life— which seems cheaper than ever now— and having tragic social consequences. They are the shame not alone of the South but of the civilization which scorns the lowly folk who live in them, and exploits their misery for profits. These slums of the cotton belt show rugged individualism at its worst.

"The average sharecropper boasts a family of seven or eight.

PREDICTS SMALLEST HAY CROP

Seventy-year Record for Shortage is Seen

Farmers Urged to Economize For Self-Protection in Future

The smallest hay crop in seventy years will be harvested in this country during 1934, according to Nat C. Murray, local crop statistician. He bases his view on the government's estimate of condition as of May 1, issued Thursday.

The indicated yield per acre, says Mr. Murray, is 1.05 tons, the smallest since 1866. This indicates a total yield of 56,800,000 tons, or 9,052,000 under 1933's small production and 12,600,000 below the average for the preceding five years.

As hay is harvested early in the season and drouth has continued heavily since the date of the report, he feels there is little chance for recovery and that the ultimate outturn may be only 55,000,000 tons.

A scramble to obtain quicker maturing and drouth resisting grass and other fodder seeds has developed in the last two weeks with prices soaring.

We urge colored farmers to save every pound of hay and fodder they can. Feed prices are sure to rise this fall and winter and it will be impossible for our farmers to buy feed. Now is the time to save it. You are making money when you save feed for your stock and food for yourself and family.

Linen and Cotton Popular in Hats

Tailored hats in linens and cottons are being asked for at the varions avenue hat shops. Women like these trim little hats that are youthful, even girlish, without being insipid.

Many shops are copying their staw hats into linen, if the client likes the shape and the design. A large sailor of stiffened white linen has a crown band of tomato red felting finished with a tailored flower ornament.

Another hat also of white starched linen, is stitched in white and has lotus blue ribbon around the crown and lining the large brim.

The hat of fine white felt is also becoming popular, especially for the younger woman. Nice for sports wear, as well as for more formal town use.

The small sailor with upturned brim is ideal for the young pretty face, and no other type should wear it.

HONEY BEES AS WILD

No Difference Today than In Centuries Ago

No Success Attained in Their Domestication Says Expert Writer

The honeybee is often spoken of as domesticated, but this is far from true. Although men and bees have been closely associated since the dawn of history, the honeybee is apparently as wild today as it was centuries ago.

Other wild animals have yielded to man's influence and many of them are now as dependent upon man as man is upon them; but the bees in apiaries are as wild as are their cousins in dense forests.

Bees taken from a bee tree and placed in a modern hive are as much at home there as though they were descended from generations of hiveraised bees. On the other hand, a swarm that has left a modern apiary and settled in a hollow tree fare as well in its new environment as did any of its ancestors in cave forest. Bees are no more domesticated than are the bats in the barn or attic.

Bee specialists of the United States department of agriculture explain this unchanging trait in bees by stating that the queen and the drone that mates with her—the only bees having the power of reproduction have no contact with the outside world and therefore have no new experiences to pass along to their offspring. The worker bees, who are constantly subject to new conditions, have no offspring and no opportunity to pass on to future generations the benefits of their experiences.

Man has been able to control the mating of most plants and animals, but with bees this is impossible because the queen mates only on the wing, while high in the air. Attempts to control mating by confining queens and drones in hives or even in large greenhouses have failed.

In recent years bee specialists in the department of agriculture have been able to impregnate queens by the use of delicate instruments. It is expected that by this method of artificial insemination changes can be brought about in honeybees that will render them still more useful to man. Although bees have not been tamed, the modern beekeeper has adapted their activity to human

PIG GHOSTS

Fairbury Journal: Unless prices of hogs change it is going be embarrassing for a democratic congressman campaigning this fall when he is asked who pays the processing tax. To say nothing of the ghosts of those little dead pigs rising up to haunt him.

HOW TO PREVENT COLOR FADING IN CANNING

Heat Control Stops Fruit Shrinkage

House wives who are disappointed to find that their home-canned cherries, raspberries, and strawberries often lose their red color, shrink, and float to the top of the can, may prevent this damage if they will follow certain safeguards according to a food specialist at the University of Illinois.

Loss of color is caused primarily by oxidation occurring within the fruit. To overcome this, homemakers should bring the fruit to the boiling point very slowly then cook rapidly until the heating process has been completed.

Wraps Jars In Paper

Since "fading" may also occur during storage, fruit canned in glass jars should be wrapped in paper or kept in a dark compartment until used. When preserving in tin, the use of standard or enamel cans will, likewise, aid in retaining the red color.

Shrinkage and floating are caused by too rapid withdrawal of water from the inside of the fruit when heated in the sirup. This is preventable by allowing time for the sugar or sirup to penetrate into the center of the fruit, making the concentration of sirup the same on the inside as that around the fruit. Thus, it is desirable to let the fruit stand in sugar or thick sirup before canning, so that the exchange of fruit juice any sirup may take place.

Remedies For Apples

In the case of peaches, pears and apples which tend to discolor rapidly during the canning process, two remedies are suggested.

First, prepare a small amount of fruit at a time so that it is not exposed to the air any longer than necessary between peeling and canning.

Second, placing the fruit in a weak brine while it is being prepared will tend to prevent discoloration. The brine should consist of one tablespoonful of salt in a quart of cold water.

TUSKEGEE GENERAL ALUMNI GOING TO CHICAGO FOR MEET

Chicago, July—(ANP)— Convention headquarters for the Tuskegee General Alumni Association which will meet in special session here August 16 to 18, will be at the Wabash Avenue Y. M. C. A., 3763 South Wabash Avenue, accordng to Frederic D. Harper, president of the Chicago-Tuskegee Club, which will be host to the Association. Beginning on August 12, and continuing through August 19, a local committee on registration will be on duty at the headquarters to serve Tuskegeeans who may arrive in advance of the regular sessions of the convention. The Chicago-Tuskegee Club is also arranging a program of special entertainment for the visitors aside from the business sessions of the confab. The local committee in charge of arrangements is composed of the following Tuskegeeans: Everett Houser, 450 E. 34th St., chairman, Mrs. Laura W. Cyrus, Alonzo H. Day, Miss Doris H. Tanner, Fred G. Engram, Miss Corinne L. Robinson, Percy R. Hines and Mrs. Sadie Anderson.

In a communication to the Chicago-Tuskegee Club last week Jesse O. Thomas, of Atlanta, president of the Tuskegee General Alumni Association stated that the coming session of the organization will deal with numerous problems affecting graduates and former students of Tuskegee Institute and also take up questions affecting the general welfare of the Negro race.

MULE KICKS BEEHIVE; STUNG TO DEATH

Cowan, Tenn., A mule on the mountain farm of Marshall Miller kicked over a bee hive and thereby lost its life. Hundreds of angry bees covered the animal and stung it to death.

Potatoes cooked with the jackets on retain their nourishment and have a better flavor than those cooked after being peeled.

Member of Tuskegee's First Graduating Class Dies

Tuskegee Institute, Ala., July—Funeral services were held for Miss Cornelia Bowen, member of the class of 1885, Tuskegee Institute's first graduating class, on Friday, July 13, at Mt. Meigs, Alabama, the home of the deceased.

Miss Bowen has for years been active as a social worker in this section of the state. She was at one time president of the Alabama State Federation of Colored Women's Clubs, and the Margaret Murray Washington Hall at the Mt. Meigs Reform School was given by her. Two other members of her class were present at the interment, Miss Ellen McCullough and Mrs. Lewis Adams Driver, of Tuskegee.

Tuskegee Institute, Ala., July—Mr. B. H. Crutcher, for years a member of the faculty of A. and T. College, Greensboro, North Carolina, this month assumed duties as head of the division of dairying at Tuskegee Institute.

He is a graduate of Iowa State College, and holds a B. S. and M. S. degree. Animal nutrition is his specialty. Tuskegee, with its fine herd of purebred, registered dairy herd, offers an unlimited opportunity for development in this agricultural specialty.

Tuskegee Institute, Ala., July—Dr. S. Jesudason, leader of Young India, a social and medical worker, Follow of the Royal College of Surgeons, Edinburgh, Scotland, was a recent three-day guest at Tuskegee Institute, directly following a speaking engagement at the International House, Chicago. The day before his departure he stood uncovered beside the tomb of Booker T. Washington and chanted aloud his tribute to the man who "lifted the veil of ignorance from his people."

Perpetrator of 5-Year -Old Crime Found In Jail

Memphis, Tenn., July—(ANP)—Memphis police learned this week that Charles Adams who fatally shot Tom Lee, white night watchman in 1929, is now serving a term for another murder at Eddyville, Ky. They have been searching for Adams for five years.

In the course of argument with Adams, the white man drew his pistol. Adams scuffled with him and took the pistol away, shooting the watchman.

Adams will be eligible for parole in 1941. Shelby county officials plan to seize him at that time and put him on trial for the slaying of Lee.

"Stevedore" To Continue

New York, July—(ANP)—Announcement was made Wednesd that the hum of "Stevedore" as the Civic Repertory theatre would be continued indefinitely.

Poultryman Advised To Try For Summer Eggs

Summer egg production can be made profitable. All that is necessary is to obtain the eggs. Egg prices are high enough to more than meet feeding costs and, therefore, challenge the poultry feeder to secure good egg production.

Commercial poultrymen have learned that this is always true and so plan their feeding program and management that the July and August production is from 40 to 60 percent. Good results can be procured by doing two things: namely, culling out the unfit and increasing the consumption of mash.

At least every two weeks during the summer months the laying flock should be carefully examined and all birds not laying should be removed and sent to market. Three things then happen: Total feed costs are reduced, hens are sold at higher prices than they are in the fall, and more room is available in the laying quarters for those hens that are kept. When a person puts this plan of culling into practice, it is interesting to note that he usually gives better care to the laying flock.

VALUE OF FARM LANDS GAINS

Washington, May 21.— A small rise in farm real estate values during the last year is reported by the bureau of agricultural economices, which puts the average value for the United States on March 31 at 76 per cent of pre-war value, compared with 73 per cent on March 1, 1933.

The gain is the first to be recorded for the country as a whole since 1920, and is attributed by the bureau primarily to the cessation of the decline of farm incomes in general and to the increase in incomes in substantial sections, particularly cotton, grain and flue-cured tobacco areas; to improved credit facilities tending to remove the pressure for forced liquidation, and in part to the lowering of taxes on farm real estate.

Legislation easing the burden of taxes of the pressure of tax sales or giving some respite against foreclosure, has also tended to give farmers a feeling of greater security, the bureau adds.

CROPS BADLY DAMAGED BY RAIN, BOLL WEEVIL

Boll weevil infestation in south Georgia is the worst since the weevil invaded the state, fully 25 per cent of the cotton crop has been destroyed by excessive rains and the tobacco crop is rotting in the fields from too much moisture, Commissioner of Agriculture G. C. Adams said Saturday after an 800 mile inspection tour of 30 counties.

Commissioner Adams said he had wired federal authorities in Washington asking that the south Georgia sufferers share in relief along with the drouth area of the west.

He said that in sections of south Georgia "many fields were as barren as deserts."

A BIG ITEM

Mother had just finished tucking Mary into bed and was tiptoeing to the door when a small voice stopped her.

"Mummy, when I die will go to heaven."

"Oh, yes, dear".

"When Fido dies, will he go to heaven, mummy?"

"I suppose so, dear."

Similar questions about the cat and the canary were answered, but when the child asked about the cow, the exasperated mother replied:

"No"

She had just reached the door when the same small voice asked:

"Mummy, Who'll go for the milk?"

Chauffeur Killed

Cleveland, Miss., July—(ANP)—Julius Robinson, chauffeur for Joseph K. Graham, young white business man, was killed Sunday when the automobile in which they were riding was struck by a truck. Graham was also killed.

WORSE THAN THE SALOON

We quote the following paragraph from the Baptist Messenger, Oklahoma:

"The advocates of Repeal insisted that they did not want to bring the saloon back. What we have is worse than the old time saloon; for beer and other alcoholic drinks may be secured at drug stores, grocery, stores, cafes, and any other place that secures a license. Moreover, in the saloon days alcoholic beverages could be sold to adults only. Now boys and girls may buy them."

To this we add that every one except those duped by the propaganda issued forth by the millions of Messrs. du Pont Raskob, Harkness, Saben et al., knew that it would be worse, once the 18th Amendment was repealed

More than that the hundreds of lies told by the wet propogandists are now shown to be just what they are—lies and nothing else. Here are some of them:

1. That prohibition was responsible for the depression.

2. That it was responsible for racketeering.

3. That it was the cause of lawlessness.

4. That more liquor was being drank under prohibition.

5. That it was the cause of boot legging.

6. That it had corrupted youth and women.

7. That beer and wine were harmless beverages.

8. That nothing like the saloon would ever come back.

These and a half-dozen other lies were swallowed, hook, line and sinker. They were swallowed, too, by many nominal Christians, all of whom will see the false statement proven utterly false.

Then they will only laugh.

They will laugh because they do not care a fig about the moral and spiritual betterment of the country —Alabama Baptist, June 14.

Man Hangs In California

San Quentin Prison, Aug.—(ANP) —The last of three colored men to die for the slaying of Alex Thompson, elderly Victorville service station operator and relative of Ruth Roland, paid the extreme penalty when Walker Rippy was hung last week.

WISCONSIN WHITES CONDEMN LYNCHING

Oakfield, Wis., July—(ANP)— Four hundred young white men and women, representing Methodist Episcopal churches in the eastern section of Wisconsin, unanimously adopted resolutions last week denouncing the lynching of John Griggs at Kirbyville, Texas.

It was voted to send copies of the resolution to President Roosevelt, the governor of Texas and the authorities of the county in which Griggs was lynched for "associating with white women."

ANOTHER COTTON BLOOM

Blytheville, Ark., June 16.— First cotton blossom of the 1934 season to reach here was shown by F. A. Rogers, of Clear Lake farm, today. The bloom came from field planted April 2. The 1,700-acre farm, southeast of here is owned by Dillard and Coffin Co., of Memphis.

NATIONAL LEADERS JOIN MOVEMENT TO AID COLORED LABOR

Finley Wilson, Mrs. Bethune, Bishop Tookes and Others Enroll in Urban League Plan

New York, July—(ANP)—The National Urban League announces the addition of several distinguished men and women to the Committee of 100 for Negro Workers which is being formed by the National Urban League for the purpose of aiding in the development of Negro Workers' Councils to the end that the Negro worker shall share in whatever benefits accrue to labor in this country. The number who have consented to serve on the Committee at the present time is 75, with the addition of the following names: Miss Mary E. Branch, president, Tilliston College, Austin, Texas; Mr. W. P. Dabney, Editor Cincinnati Union, Cincinnati, Ohio; Mrs. Elvira Bond, 1517 Druid Hill Ave., Baltimore, Md.; Dr. Wallace A. Battle, Field Secretary, American Church Institute, 281 Fourth Ave., New York City; Mr. Stubb C. Pughsley, Pughsley's Funeral Home, 1510 Jefferson St., Tampa, Fla.; Mr. J. Finley Wilson, Grand Exalted Ruler, Improved Benevolent and Protective Order of Elks of the World, 1813 Vernon St., N. W., Washington, D. C.; Bishop H. Y. Tookes, 309 Masonic Temple, Jacksonville, Florida; Mrs Mary McLeod Bethune, principal, Bethune Cookman College, Daytona Beach, Florida.

Membership on this Committee is by invitation to the one hundred leading Negroes in America. Qualification for membership comprehends the payment of $5.00 or more as an earnest of a sincere desire to place behind Negro workers every possible resource in their fight for recognition in American industry and commerce. In the meantime, the Negro Worker's Councils which have been initiated by the Urban League in a score of cities are planning active and intense programs to secure further opportunities for Negroes to work and be recognized in the organized labor bodies of America.

Teacher's BIBLE No. 4409

THIN BIBLE PAPER, 1400 PAGES

The best intrinsic value ever offered in a Bible for Adult Readers, Teachers, Preachers and Students. The durability of materials, mechanical excellence and value of contents are equal to any Bible at double this price.

Holman Edition with Marginal Referenees
Black face type—8 Vo Size 5½ x 8 x 1⅜ inches
Full Helps to Bible Study mentioned below and including

A BIBLE STUDY COURSE

It is highly desirable to read the Bible through from Genesis to Revelation.

A cumulative knowledge of the Scriptures, so valuable in education, is secured and a true perspective of religious history and truth is obtained.

The portions that consist entirely of names and subject matter, wholly devoid of interest to the average reader, are omitted from the Study Course.

The Course is divided into thirty-six lessons and gives both the beginning and ending of each lesson; also the beginning and ending of passages or portions to be read.

Best Quality Thin Bible PAPER *Clear Black Superior* PRINTING *Durable Flexible* BINDING

THIS COMPLETE TEACHER'S BIBLE
Also contains the following 400 pages of New Copyrighted Helps by the most reliable Authorities.

Treasury of Biblical Information
The latest compendium of essential things which every reader of the Bible needs to know, such as the Chronology of the Old and New Testaments, Tables of Money, Weights and Measures, Jewish Calendar, Table of Easter Days, etc., etc., all arranged in the most usable and attractive forms.

New Comparative Concordance
With nearly Fifty Thousand Refcrences.

New Illustrated Bible Dictionary
Self-Pronouncing, with nearly One Hundred and Fifty Pictures, containing more subjects than are given in the bulky Dictionaries.

Four Thousand Questions and Answers on the Bible A valuable help to all Bible readers.

New Biblical Atlas with Index

THE MODERN FARMER

Official organ of the National Federation of Colored Farmers, Inc.

Leon R. Harris - - Editor

Published monthly by the Modern Farmer at Nashville, Tennessee.

Office, 447 4th Avenue, North.

Devoted to the interests of the Farmer, Truck Gardener, Livestock and Poultry Breeder, the Home and the People.

Entered as Second Class Matter, April 10, 1929, at the Post Office at Nashville, Tenn., under act of March 3, 1879.

All contributions for publication in the Modern Farmer should be addressed to The Modern Farmer, 447 4th Avenue, North, Nashville, Tenn.

No libelous matter will be published. Unsigned articles or letters, and those written on both sides of the paper will not be used.

Subscription price $1.00 per year, 75c for six months, payable in advance. Personal checks must be certified. Make all checks or money orders payable to The Modern Farmer.

Advertising rates and sworn circulation figures presented upon application.

"OUR SLOGAN"

STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT.

OUR PLATFORM

1. A Unit of the National Federation of Colored Farmers in every community, of colored farmers.
2. Co-operative buying, producing and marketing.
3. Every colored farmer a farm owner.
4. Abolition of debt-slavery, injustice and persecution.
5. A written contract for every colored farm tenant and sharecropper.
6. Better rural churches, schools and homes.

Editorials

From the Bible

"A righteous man regardeth the life of his beast: but the tender mercies of the wicked are cruel." Prov. 12:10.

TEACH US

By Rudyard Kipling

Teach us the strength that cannot seek,
By deed or thought, to hurt the weak;
That, under Thee, we may possess
Man's strength to comfort man's distress.
Teach us delight in simple things,
And mirth that has no bitter springs;
Forgiveness free of evil done,
And love to all men 'neath the sun.

THAT COMMUNITY SPIRIT

He is a big man,—no matter how poor, — who is willing to do all he can to build up his home community. A man is a fine citizen who is willing to pray and work for his neighbors, even though he knows he will not be paid in money for much of the work he does. Come to think of it, money isn't much of life anyway. It is one of the little things of life,— useful and necessary,— but just a small fraction of what life really is. Faith and service and love,— a desire to do good and useful deeds just for the joy of doing them,— will help us get out of life what money cannot buy.

Colored communities, both city and country, could be made much better if all citizens would go to work, adopt a sensible and progressive community program, and carry it out. Our communities are labelled "slums" and "backward communities" because everyone stays in his own little yard and lets George do the community work. We can't get together to paint the church or schoolhouse, clean up the burying-ground or do any of the other hundred-and-one things we know should be done. We have not the right kind of a community spirit.

When the CWA funds ran out last spring a little Wisconsin village had not completed the useful projects started. But the villagers said,— "We will finish them anyway." They wanted a water system for fire protection and walks for their school children and other things so they kept right on working. The work was worthwhile and they knew it. These farmers had the right kind of spirit,— the kind colored farmers must have to build up their communities.

We must begin to do more for the sake of our neighbors,—for our children,— of our communities. We must get together and stop being "backward people." Because we don't get together is the only reason why we are called 'a backward people." WE'VE HAD THAT KIND OF A REP LONG ENOUGH. LET'S MAKE A NEW ONE.

KEEP THE CHURCH ALIVE

Our churches and what they teach deserve most of the credit for the progress we have made. Our churches are our best character builders. Nearly all of our best men and women are church members, —are more than church members. They are sincere Christians. Of course we have many hypocrites in our churches but they are always known in their communities because their evil doings will come to light. They never have a good name.

Any community is the gainer when the churches are prosperous and their membership is expanding. Some of our farm communities might well take a tip from a little community in Pennsylvania. In this community leading citizens and members of Protestant denominations got together and helped the Catholic church raise a fifty thousand dollar building fund. The Catholic church was needed for the benefit of the entire community. They knew this and difference of doctrine mattered little. The church was needed and all helped raise the fund.

Our churches have about ceased fighting each other about points of doctrine. What we should do next is COOPERATE. Help each other out of the hard spots. This will be a fine example to set for those who will follow,— the coming generation.

ABOUT TROUBLE MAKERS.

Some people seem to like to stir up trouble just for the fun of the thing. One of the dumbest trouble-makers we have ever heard of is a Negro doctor who lives in a small Mississippi city which is the trading center of several hundred colored farmers who are members of the National Federation of Colored Farmers. The doctor takes his pen in hand and writes some letters to his daily paper— about his farmer-neighbors—about the N. F. C. F., —and about himself.

His letters prove one thing well, —that is,— that he is very anxious to let the whilte folks know he is the big leader of his people,— the smartest black man in his county. He is right and the other colored folks are all wrong. They are wrong because they desire to organize. They are wrong because they have purchased their home and farm supplies co-operatively. They are wrong because a group of them left a plantation where they had been robbed and held in debt—slavery for twelve years, and together, rented a plantation where they are their own boss, and today, have more food crops and better cotton and corn crops than they have ever had before in their lives.

Such so-called leaders as this doctor is, should be forced to go some place where none of his Race live,— where he would have to depend on the white folks for his living. We suppose he does not belong to any doctors' organizations because he does not believe in organization. We wonder why he does not tell the white farmers of Mississippi that they are crazy for joining their organizations,— and buying and selling co-operatively. If the N. F. C. F. is so bad for our Race farmers then the American Farm Bureau and the Farmers Union must be bad for the white farmers.

He who gives will surely receive.
"Do not be ashamed to say what you are not ashamed to think."
—Montaigne.

People will talk and dogs will bark at the moon.
'Tis a wicked world, and we make a part of it.

1,010 POUND HOG SELLS $5.05; TAX TOTAL $22.73

A stag hog weighing 1,010 pounds sold at the stockyards yesterday for 50 cents per hundred pounds or total of $5.05. The buyer paid the government $2.25 per hundredweight processing tax on this animal, a total of $22.73.

The animal was much too big for the regular packing house equipment for the handling of hogs and had to be taken into the cattle division for slaughter. It was fully as heavy as an average steer.

This stag at one time was a prize boar, having won first honors at many of the local fairs and shows and weighed 910 pounds when awarded third place at the national swine show. He was 4 years old.

ACCOUNTS FOR IT

Philadelphia Dispatch: The average mental age in America is 16 years, according to the scientists. And life begins at 40. No wonder some fellows are so slow getting under way.

FEEDING FATHER

We know the latest diet rules
And raise the children by them;
They keep ma slim and Susan plump,
But father will not try them.
Man wants but little here below
Nor wants that little long,
But pa wants coffee thrice a day
And wants that coffee strong.
We know that fruits are good for pa,
We steam them, boil them, bake them,
We cook them fifty-seven ways
But can't make father take them.
We served him eggs in many styles
We scramble, poach and beat them;
They must be fried like tough rawhide
Or father will not eat them.
The healthful greens and stringless beans
His palate do not tickle,
But he will shout for sauerkraut
Nine wienies and a pickle.
He's busting all nutrition rules
In spirit and in letter,
He wants fried spuds three times a day,
The greasier the better.
If pa still stubbornly presists
Dame Nature's wrath to brave,
We fear, by gum, that he will come
To an untimely grave
Just how he'll fare when over there
And what he'll chew we know not.
How will he eat celestial meat
Without a soggy doughnut?
Above the choir they'll hear our sire;
Above its loud hosanna.
He'll criticise the lack of pies
And kick about the manna.
—Bob Adams.

I WISH I HAD A KITCHEN

I wish I had a kitchen
All shiny white and green—
A very little kingdom
Where I could reign as queen—

A pair of handy cupboards
Full of glowing pots and pans,
And room for flour and spices
In rows of little cans—

And a broad low window near, with
Ruffled curtains, trim and white
And a glorious red geranium
Stretching upward to the light—

I'd cook our meat and spinach
And make little cakes and such,
And even washing dishes
Wouldn't matter—very much.
—Margaret Cross.

The farm bankruptcy bill passed by the last Congress establishes a six year moratorium on indebtedness of farmers who cannot pay. Under the law a farmer could occupy his mortgage property for six years.

There are said to be more than five hundred million sheep in the world.

Interesting NEWS Notes

Mrs. Lydia Phillips, a farmer's wife near Logansport, Ind., was severely injured when gored by a milk cow.

A Kentucky mountaineer, who was tired and hungry, tried to exchange an old coin in Cincinnati for money is he could spend. A banker gave him two dollars for the coin and discovered later it was 1804 silver dollar, worth $2,500. Only thirteen of these dollars are known to exist.

The New York police force only uses horses of a particular kind. A police horse must be a dark bay gelding, not more than sixteen and a half hands or less than fifteen and a half hands high. He must have a black mane and tail and must be between the ages of four and seven years. Police horses are taught to walk, trot, canter and jump over obstacles.

The last Congress appropriated a million dollars to fight chinch bugs in the eleven corn-belt states.

This year's wheat crop is reported to be the smallest in 41 years. The crop is poor in every wheat raising country in the world.

Drouth in England is drying up streams and cattle are dying for lack of pasture. The churches are praying for rain. The drouth is one of the worst on record.

Eleven little pigs belonging to a lady farmer, Mrs. L. A. Pointer, of Brookfield, Mo., are thriving. After the mother sow was killed in a wind storm Mrs. Pointer took eleven bed springs, fastened a milk bottle to reach and put a soft rubber nipple on each bottle. The pigs can twist and push and get the milk as in the natural way.

Thousands of residents of the Mississippi Delta are enjoying the Fair in Chicago this year. Cotton money has come in handy.

Onion workers near Ada, Ohio, are striking for 35 cents an hour and an eight hour day. At present they are receiving ten cents an hour for a ten hour day and living accommodations. Most of the workers are illiterate.

A cyclone near Danville, Ill., flung a horse in a tree top. The tree had to be cut down to rescue the horse.

Nearly one million head of cattle were slaughtered in June this year. This set a new high mark for this month. The cattle included many killed for the account of the government.

Time Approaches for Planting Fall Gardens— Mexican Corn Recommended as Late Crop— Oriental Turnips Are Desirable— Green Tomatoes May Be Picked and Ripened.

The time for planting our gardens of all kinds is rapidly approaching. It is doubtful if there is any kind of garden that is more profitable than the fall garden. With a few exceptions all vegetables can be planted yet with every expectation of producing a good crop although it is difficult to get germination of such things as carrots and beats. Nevertheless, these vegetables planted within the next two weeks will almost invariably produce better quality than those planted in the early spring. Of course, there are locations where we have extremely hot and dry weather in August and the first half of September where we must be prepared to water but even this pays well. In fact one of the greatest needs of the South is wider use of irrigation. There are thousands of places where just a little labor would make it possible to irrigate fair-sized gardens or even fields and it is highly important that we should learn to do this.

Cabbage cauliflower, both string and dry beans, and a late crop of tomatoes may be planted at any time within the next three weeks with every reason to expect a good yield.

There is another crop that we wish to mention that may be had yet —that is good corn. We wish to recommend to our readers Black Mexican sweet corn for this late crop. If planted within the next ten days it will produce ears almost twice as large as those of Golden Bantam and of equal quality, in fact there is no better sweet corn than Black Mexican and for some reason corn worms do not take to it as they do to most corn. Having had it in abundance for the past few weeks, we realize the unusually high quality of this corn and should there be more than we desire to eat as roasting ears, the surplus should be shelled and used for parching Parched sweet corn is one of the luxuries of our forefathers that any of us who learn to eat it as children have never seen the time that we would be willing to give it up as a luxury for peanuts or any similar food.

Although the seeds of the Black Mexican corn are a deep black, almost all of the ears are white when they are the proper age to eat although an occasional ear will show a stain of purple.

Some of the new turnips introduced from Japan and China in the past few years are very much worth growing. They require two or three more weeks to come to maturity than our American grown varieties, but they have two great advantages. In the first place the tops are fully equal to our own seven top turnips for salad while the turnips themselves are almost as solid and well flavored as rutabaga, but best of all, the little green aphids or plant lice that work such havoc in our gardens of seven top turnips and often destroy our regular turnips entirely, do not seem to like these Japanese varieties and often refuse to eat them at all.

Another vegetable we wish to recommend is the wax bean in its many varieties. We find very many people who have never tasted wax beans, those beans which have a rich butter-yellow color when ready to eat. Having a distinct flavor of their own, some people do not take to them the first time that they eat them, yet a great many people who have been eating the podded varieties all their lives like these the first time they eat them. All the wax beans are more tender than the green podded varieties and are absolutely stringless. Being so tender they are difficult to ship which to a very large degree accounts for the fact that the green podded varieties are universally known while the yellow ones are not. Possibly golden black wax will be easier to secure than the other varieties and as it will be ready for use from forty-two to forty-five days after the seed is planted, it is not a bad variety with which to start.

Tomatoes set now will not only produce a good crop of ripe fruit but will doubtless have a large crop of green tomatoes that may be picked just before the first cold frost. If these tomatoes are laid upon a shelf only one day they will continue to ripen and will produce a most excellent supply for home use until about Christmas. Fall grown tomatoes are less acid and have a better flavor than those that ripen in the summer and furthermore they will keep much longer than those that ripen in the summer.

Spinach, mustard, kale, and similar salads should not be planted before about August 1 and may be planted as late as September 1 in most of our territory but every family that is growing a garden should devote at least part of it to these salads that are so rich in vitamin and go so far toward preserving the health of the family.

TENNESSEAN FIGHTS EXTRADITION FOR ALLEGED MURDER

Chicago, July—(ANP)—An appeal to the United States Circuit court of Appeals has been taken by the local branch of the National Association for the Advancement of Colored People in the case of Leander McCline, sought by the State of Tennessee as the murderer of George Owens, white, on September 9, 1931.

McCline claims not to have been in Tennessee at the time the crime was committed. It is alleged by his attorneys, Irvin Mollison and Oliver E. Clark, that one of the deputies sent to return McCline to Tennessee told the state attorney's office here that McCline was not the murderer, but they wanted to get him in Tennessee, so they could make him give the name of the white man who committed the crime.

The Illinois Supreme court ordered McCline returned to Tennessee. Federal Judge W. E. Woodward declined to overrule the decision of the state court. As a consequence, the local N. A. A. C. P. officers have taken the case to the appellate court.

New York Herald-Tribune: Well there's some consolation in the fact that the inscription on the coins hasn't been changed, yet to read "In Brains We Trust."

Farmers and New Dealers

Enid (Okla.) News: While the agricultural adjustment administration has helped the corn, cotton and wheat farmers by loans and bonuses yet so far as equality or parity of purchasing power is concerned it has thus far been a most disappointing failure.

Farmers know this to be true. They know that the purchasing power of their hogs, cattle, dairy and poultry products comprising three-fourths of their production, has not been increased by the costly experiments of the administration. They know that the bonus payments they have received have been more than absorbed by the monopolistic prices of the NRA for everything they have had to buy; that the prices of farm implements and repairs, lumber, barbed wire, nails, hardware, binding twine, all cotton goods, flour and staple groceries have increased out of all proportion to the below-cost production prices of the products they have to sell.

The farmers know that when they pay their taxes, interest, notes, mortgages and various other bills they are at a hopeless and helpless disadvantage with a purchasing power 63.9 percent below parity. They know also that the rosy promises of the New Dealers in so far as their remedies are concerned have been dismal failures. Their only prospect for price increase lies in the unprecedented drouth-stricken areas of twenty-one midwest and northwest farm states where the grain and feed crops have been almost totally destroyed.

That New Deal farm policies have utterly failed to lift the level of farm prices is shown by the May, 1934, figures:

The price index of farm products in May, based on 1910-1914 as 100, was 74, or 2 points lower than the index of 76 last July. The index of prices paid by the farmer, on the other hand, was 121 in May or 14.1 percent lower in May than in 107 last July. In other words, the farmers' purchasing power, on the basis of these price indexes, was 14.1 percent lower in May than in July last year. The farmer's purchasing power in May, however, was 27.1 percent higher than the low for the depression in June, 1932, but this entire improvement occurred prior to the activity of the agricultural administration. A satisfactory solution of the farm problem calls for a further rise of 63.9 percent of the farmers' purchasing power.

In vie wof the power purchasing ing power of farm products what becomes of the democratic farm promises and Tugwellian theories so loudly broadcast and heralded forth by the professorial staff of the new farm deal? The only result of which thus far has been to turn loose upon the farmer a swarm of monopolies to take what little change he has and a vast army of job holders to regiment him and eat out his substance.

QUALITY

Des Moines Register: Warden Lawes of Sing Sing says that college men make good prisoners. There is another clinching agument for higher education.

How many feathers are there on an average sized hen? Before reading any further stop and make a guess. See how good a gusser you are. A Washington poultry association used this question as the subject of a contest and received thousands of answers, guessing from a few hundred to millions. The winner picked a chicken, counted the feathers, and reported 8120. How far off were you?

Potatoes Seen As Substitute for Grain Food

The white potato, America's old food standby, may reach wartime popularity as a substitute for flour and cereal this winter. Despite the fact that the potato crop has been given a severe setback by the drouth, there is still ample time for the extensive northern plantings to mature.

With the exception of a few potatoes brought into this country from Canada and Estonia, consumers depend almost exclusively upon American grown potatoes. The potato crop is still young in the northern states where 75 percent of the nation's normal crop of 360,000,000 bushels is produced.

Reports to the National Potato institute in Chicago reveal that farmers have discontinued planting potatoes in the dry areas. Rains would encourage the planting of an additional acreage of potatoes in fields where grain and other crops have failed.

If rain falls within the next few days northern and western growers would have an opportunity to produce a crop that would aid in offsetting their losses from last year, when their total yield fell 50,000,000 bushels below normal. Rain is necessary during the next two weeks if the relatively deep planted potato crop is to survive.

The crop has been reduced in Alabama, Texas, Louisiana and Mississippi where early potatoes are produced. This has caused an advance in potato prices during the last two weeks.

SHIP FEDERAL CATTLE SOUTH FOR FATTENING

Several thousand cows were shipped by the Federal Surplus Relief corporation from Chicago yesterday to Tennessee pastures for fattening. These cows were picked from the heavy shipment of drought cattle brought by agents of the corporation in the northwest and sent here for slaughter.

In three days the government has consigned 5,000 cows from Chicago to Memphis where they will be distributed by the state relief agencies in that district. Only those which appear able to stand the trip into the sonth after their long trip here from the northwest dry area will be given a longer lease on life until they are fattened up and more suitable for slaughter.

Some estimate that the freight paid out for the three trips is almost equal to what the farmer is getting for the poorest of these cows. Government veterinarians at Chicago say that they are picking these cows for condition rather than breeds or milking. They are gathering together a large shipment which will leave for Florida pastures within a few days. It is said that many are to be distributed among the Negro race of that state.

HIS SUBSTITUTE

Atchinson Globe: A president of the United States can not "cuss," on account of the dignity that attaches to his position. So Mr. Roosevelt hired General Johnson.

A baby near Bells, Tenn., was blinded probably for life, when attacked by a swarm of red ants while its parents were working in a near-by tomato field.

Tuskegee News

TUSKEGEE GRAD OPENS COMMERCIAL BUSINESS

Tuskegee Institute, Ala., July—With a preliminary training of three years in the colleges of Journalism and Commerce at the University of Nebraska, Mrs. Corinne F. Adams, 1934 Tuskegee Institute graduate, former member of the Norfolk Journal and Guide staff, added another name to the list of business firms in the immediate vicinity of the Institute on July 10, when she formally announced the opening of the Adams Commercial Service Bureau.

Located in Greenwood, the fast-growing community that surrounds the school, this new business venture presents itself as the answer to all "literary, secretarial, documentary, legal and general commercial problems."

Assisting Mrs. Adams are her husband, H. E. Adams, registered notary public and counsellor, and R. W. Adams, legal advisor, both of whom are graduates of the Arts College, University of Nebraska and from the law school of that institution.

Tuskegee Institute, Ala., July—The youngest instructor to stand before a class this term at Tuskegee Institute was John Charles Simon, 15-year-old youth of Montgomery, Alabama, who taught handicrafts to the 200 4-H Club boys and girls who enrolled from twenty-one counties in the state for the annual Short Course, which closed on July 21.

John Charles also has the distinction of being the first and only colored person to teach in the Sidney Lanier High School, Montgomery, the largest and finest in the city. During this past school term he conducted three-hour classes, three days per week, teaching basketry, weaving, chair-bottoming and designing to the children of the Capitol City's powers that be.

The youth loves his work; just "picked up most of the designs, such as crosses, initials and emblems," so he says, and hopes to learn woodworking at Tuskegee beginning this fall. Is in the tenth grade, a Catholic and plays every game but football, and only shuns this because he "might break a finger"

LIVE STOCK VALUE SHOWS GAIN OF $1,640,000,000

The market value of cattle, hogs and sheep on American farms was increased by $1,640,000,000 during the first six months of this year, according to the Institute of American Meat Packers.

The upturn in values was attribnted to improved consumer purchasing power and heavier demand for meat and meat products, along with a reduction in live stock marketings.

Of the total cattle accounted for $1,391,000,000, sheep $75,000,000 and hogs $174,000,000. There was a gain of $2.20 per hundredweight in the average market price of cattle and calves for the week ended June 30 over the week ended Dec. 30, 1933. The institute explained that the figures do not include hog processing taxes of approximately $107,000,000 incurred during the period.

FEDERATION MEETS AT VALLEY FORGE

Philadelphia, July—(ANP)— The Federation of Adult Bible Classes of Philadelphia and vicinity staged a celebration in Valley Forge, the site of the encampment of George Washington's army in the Revolutonary War. The attendants were specially instructed to demonstrate all points of special interest concerning the colored men in that war to the visitors. The National Negro Anthem was played at various intervals during the Lay on National Chimes. Rev. Robert Page it was the orator of the occasion, and the hundreds present sang the National Negro Anthem. The management of Valley Forge welcomes any colored group to come at any time and conduct services from the chapel.

Some farmers in Illinois are installing radios on the tractors cultivators so they can listen to ball games while cultivating their corn.

The bite of a mule killed a farmer carroll county, Illinois. The mule hit the farmer in the throat.

BOSTON CITIZENS STIRRED BY POLICE ACTS OF BRUTALITY

Minions of Law Shoot Down Man Who Had Only Violated Traffic Rules

Boston, Mass., July—(By E. W. Clark for ANP)—Citizens here are stirred over what is regarded as the wanton shooting of George H. Borden, a 29-year-old janitor, who sought last week to escape custody after fleeing from motor vehicle officers who had arrested him for a traffic violation. Borden under arrest had asked permission to use a telephone. The permission granted he sought to run but was halted by three shots fired by Inspector Everett T. Gardner of the registry of motor vehicles. He died Friday from the effects of the shots.

Deputy Register Anthony A. Bonzagni of the motor vehicle department said that his 20 year's experience, this was the first time he had known an inspector to resort to the use of a revolver in making an arrest. Inspectors are licensed by the state to carry revolvers but none are issued with their equipment.

When the case came up in the court to which Borden was taken in his wounded condition, no warrant was sworn out against the officer, but instead the victim was charged with assault and battery upon a policeman, the officers claiming that Borden had reached into his back pocket. No gun was found on the victim however.

Daily newspapers ran condemnatory editorials on the case. Communists led by Eugene Gordon exerted mass influence upon the affair. The Boston branch of the N. A. A. C. P. also took the case up and announced the appointment of two committees, one composed of Dr. Chas. H. Spencer, Emma E. Brinkley and Mr. Wheeler who were to wait on Commissioner Hultman and demand a trial of Patrolman William H. Harmon, who was with Inspector Gardner at the time of the shooting. The other committee composed of Attorney Edwin T. Dorch, Cora B. Reed and Alfred V. Bliss was to call on Registrar Morton Ryan of motor vehicles and ask for the removal of Gardner. The N. A. A. C. P. is to furnish the district attorney with whatever evidence is developed for use before the grand jury. The dead man was a native of Nova Scotia and leaves a wife and three children.

European countries, in general, are having a drouth similar to the one in the United States.

In the recent state election, Mississippi went dry by a vote of two to one.

"Afraid of Lightning" . . .

By Paul W Kearney.

(In the Saturday Evening Post)

Lightning strikes about 2000 persons each year in the United States, of whom about 500 die. Thus an individual's chances of being hit are less than one in 24,000; three times as many people are killed by tripping over rugs, and lightning casualties rate approximately one five-hundredth of the injuries caused by automobiles. And people who fear lightning may get consolation from the physicist's maxim: "If you see the flash, you know it missed you"—It's all over but the thunder, which is simply the sound effect of the explosion and occurs simultaneously with the flash.

The time difference between the two is due to the difference in the speed of light and sound. Light is practically instantaneous while sound travels about 1100 feet per second. Hence, if you count the seconds between the lightning flash and the first result by 1100, you will have the distance in feet between you and the explosion.

All this is interesting enough while lightning remains in its place; when it waxes explorative it takes on a different complexion. Down South a strike in a church went down the chimney, blew off the furnace door and went through the basement Sunday school room like a mob of hoodlums. Heavy furniture was smashed and tossed around in confusion, one chair being driven into the ceiling with such force that the legs stuck in the plaster and held there. But no other part of th building was damaged and, fortunately, the school was not in session.

Fires are often started by lightning in a building which has not been struck at all. A violent electrical disturbance nearby may stir up an induced current between parallel metal fixtures—two pipes, two wires or the metal straps on a cotton bale—causing a spark. Many a hay barn, grain elevator and oil tank has paid tribute to this phenomenon.

The terrific heat generated when lightning does strike directly often causes all the sap in a tree to boil instantaneously and evaporate: in a chimney, the violent expansion of the moisture in the bricks may produce an explosion which blows the bricks to smithereens.

Dr. W. B. Nathan To Study In Russia

Atlanta, Ga., July 13—(Special)—Dr. W. B. Nathan, professor of education at Atlanta University, will attend the Anglo-American Institute of the First Moscow University this summer, according to information received from Doctor Nathan who sailed from New York on July 3 aboard the S. S. Berengaria.

The institute is primarily a summer school for foreign students who are interested in education and social life of the Soviet Union. The group with which Doctor Nathan will be associated will spend four weeks at the University of Moscow, two weeks travelling in the Crimea and one week as the guests of the Russian Students Federation at Leningrad. The institute is associated with the Institute of International Education.

Doctor Nathan in the summer of 1933 was a student at the English universities where he observed the processes of advanced study. Last winter he was for three months a guest professor at Wiley and Bishop Colleges, Marshall, Texas.

FISH BAIT BUSINESS IS HELPED BY DEPRESSION

During the last three years, when most folk have been feeling the effect of the depression, Mrs. Ella Gaston, 77, of Joplin, Mo., has been making a living and putting something by for the time when she must retire, by selling fish worms—those wriggling, slimy creatures that fishermen use to catch fish.

Before Mrs. Gaston went into the fish worm business she had rheumatism and "misery" of various kinds. But since she took over the fish bait stand established by her late brother, J. E. Parker, her health has improved.

"I like the fish worm business," she declares. "It seeme to agree with my health. I'm not going to quit until I have to."

The price of fish worms is 10 cents a dozen, three dozen for 25 cents. White grub worms sell for 25 cents a dozen. Fish worms must be at least four inches long to be of commercial value. All worms shorter than that are put back in rich, black dirt and left to grow.

There are no hard times in the fishing business, according to Mrs. Gaston. Fishermen must have their good times along the banks of Ozark streams, whether they enjoy their work or not. In fact, when a man is not employed he has more time to fish. Worms make the best bait one can have for catfish, perch and crappie, but worms are no good at all for Ozark trout, bass or pike.

As most of the streams of the Ozarks are fairly alive with catfish, perch and crappie, the worms are in demand. Being situated at the gateway to Ozark streams, and with her stand located on a prominent business corner in Joplin where thousands of motorists pass daily, Mrs. Gaston has solved the problem of merchandising. She has placed her wares where they can be easily seen and cheaply acquired.

Mostly Mrs. Gaston buys her worms of boys who go out along the river bottoms and dig them, but she has provided many beds of rich dirt in her back yard in which she puts grass roots an other vegetable material upon which worms live and thrive. When the dirt has been there a few months she has it shoveled out and fresh put in, for worms must have fresh dirt in order to thrive, and so be marketable for bait.

QUICK COMPUTATION

Thayer News: Two small boys eagerly watched the stout woman on the scales. The woman dropped in her penny but the machine was out of order, and only registered 80 pounds. "Golly," gasped one of the youngsters, "she's hollow."

Woman Killed By Train

Magnolia, Miss., Jnly—(ANP)—Mrs. Josephine Fortenberry was killed by a train one mile north of here Wednesday while returning from a fishing trip.

Peacock, Sprinter, Honored with Party

Newark N. J. July—(ANP)—Before he sailed last Saturday night with the American track team for Sweden, Eulace Peacock, nationally known sprinter, was honored at a farewell party at the home of the Rev. M. Russell, Orleans Place, Vaux Hall, N. J., Cornelius Johnson of California, the champion high jumper, Rudy Wheeler physical education director at the Orange Y. M. C. A.; James Peacock, former captain of the tract team at Temple University and Coach Harry Lake athletic director of Union high school were among the guests.

Find Stolen Safe In Field

Thomson, Ga., July—(ANP)— A 600-pound safe, stolen from the office of the Coca-Cola Bottling Works recently, was found in a school house near here Tuesday. Two hundred dollars in cash and some valuable papers, alleged to have been in the safe, were missing.

HERE IS SOME TOMATO HISTORY: FIRST GROWN BY JEFFERSON

Inasmuch as it is National Tomato Week, and we are practically all very fond of these luscious "love apples," a little bit of history and a few of our favorite recipes will no doubt be welcomed by readers.

First in many things in this country, Thomas Jefferson was the first American to mention the tomato. He grew them in his Virginia garden in 1781. This news has been brought to light in connection with Tomato Festival now being held throughout the state of Texas.

Just how popular tomatoes became is proved by the market quotations. As early as 1812 they were quoted in New Orleans. Famous New Orleans cooks are no doubt responsible for some of the best tomato dishes.

SNAKE IN STOMACH FATAL TO COW

Rumford, Me., — A thoroughbred cow died of a strange malady no treatment would cure. Post-mortem examination disclosed that an 11-inch green snake had gone down the cow's throat with its forage.

The Colored Soldiers Monument In Philadelphia

Philadelphia, Pa., July—(ANP)—A curious thing happened. Everybody seemed anxious for the monument to Negro soldiers here to be unveiled, yet not a single complimentary article about the unveiling was seen in any of the colored papers supplying the Philadelphia area. It has puzzled the common people that many of the leaders are speaking against the ceremonies and the commission. The only explanation is that none of the local scribes nor any of the leaders who are now critics were actively part of the dedicatory exercises.

IS THIS CHALLENGED?

Charleston News and Courier:—When a "white collar" man (or woman) can not get and hold a white collar job, it is his (or her) business to find a job following the plow or taking in washing. It is no business of government to tax some of the Amerian people to support other Americans in white collar jobs. That we lay as a basic principle of "Americanism," socalled, and if it is not true and sound, Americanism is humbug.

Will any one challenge this principle of Americanism?

VICTIMS OF THE NEW DEAL

(Continued from Page 1)

They live day in and day out on ground corn and water and a little grease, in a rickety, weatherbeaten, unpainted house with many many cracks for the wind, sand and rain to pour through. The average sharecropper's house is made of boards nailed together; there is no plaster or wall paper. That is all. In such a shelter winter is a nightmare. It is the exception to find magazines or newspapers in the homes; perhaps there is a Bible . The men have one pair of faded overalls with many patches and the women frayed gingham garments. All the household possessions of th average sharecropper family living on five to 20 acress are worth not more than $20, and often less. Perhaps there is one-third of an acre for a garden.

"Spring comes and as the giant cypres tree turns green, the family hopefully looks to the soil, and the field becomes ribboned furrows. Then comes planting time, when the famliy will be momentarily secure from hunger as it may then get furnishings." It will be given a doodle book by the commissary. Then, often lightning strikes — in the form of a notice to move. The owner wants the shack, wretched as it is, for his own purposes. Many thousands of families have received eviction notices this year."

Points out Destitute Cases

After setting out a score or more of individual cases of destitution resulting from the AAA cotton control program, Mr. Waldron states. "Systematic investigation over a large area in Arkansas, Tennessee and Mississippi has brought out the following facts about conditions:

"1 Acreage allotments for some sharecroppers are being increased at the very time that others are being denied access to the land. This is in flagrant violation of the contract authorized hy the government.

"2. Large families are being discriminated against in favor of smaller ones.

"3. Sharecropping is being displaced rapidly by day labor paid fifty to seventy-five cents a day.

"4. 'Furnishings,' or supplies of food doled out by company commissionaries at so much per head per family, are beng cut to a minimum, increase as low as $2 per month, and some families have been refused such furnishings entirely.

"5. In some cases there is evidence that cotton acreage is being increased instead of reduced.

"6 Because of their widespread illiteracy many sharecroppers are taken advantage of and cheated They are charged as much as twenty-five cents on the dollar for credit at commissaries and overcharged for the food they get as well. In many cases sharecroppers never get written statements from the plantation owners.

"Many anti-social forces are at work:

"1 Brutality is in evidence. The 'nigger is still a damned nigger' in the riding boss' eyes, and boss uses the whip he carries, sometimes on white sharecroppers. One educated Negro farther left the plantation so his daughters would not have to suffer indignities at the hands of riding bosses.

"2. The school systems in many places are breaking down. The consolidated schools are often controlled by the politicians and landowners.

"3. Pellagra, malaria, rickets, and venereal diseases are prevalent and on the increase.

HONEY BEES AS WILD

(Continued from Page 1)

needs by placing their hives where honey plants abound.

Records show also that little money is to he made on summer chicks because they reach market weight just when the price is at the lowest point

AAA CHIEFS SEE FAILURE

(Continued from Page 1)

bringing farmers into the voluntary cotton acreage control program this year. Those producers who had been reluctant to sign voluntary agreements did so in many cases, he said, out of fear of the drastic compulsory features of the Bankhead measure. To this extent, he admitted, the bill may have operated for the good of the producer.

Says Plan Won't Work

But in actual operation, he declared, the plan cannot work out. The large landowners and plantation operator, he explained, will escape payment of the so-called prohibitive tax on ginnings, while the levy will fall most heavily on the small farmer, the tenant farmer, and the share cropper.

In addition, he asserted, the tax of 11.34 cents per pound on ginnings in excess of the fixed government qnota will not deter farmers from marketing their cotton. An individual cotton producer, he explained, sets out ordinarily to raise a certain number of bales. Whether he finally produces more or less than that given amount, depends on weather and other conditions. For example, if a farmer sets out to raise an allotment of 10 bales, he might, with favorable weather, raise 15 bales. The ten hales would be tax free under the Bankhead bill, but the remaining five bales the farmer can sell at a profit in most cases despite the tax imposed by the government.

In reality, Johnston said, farmers would have no incentive to abandon cotton raised in excess of their tax exempt allotment since at present prices producers would be able to realize the cost of production, perhaps even a profit, on excess cotton even after paying the federal tax on ginnings over and above their allotment.

Large Growers Exempt

Large plantation operators, such as he is, Johnston pointed out, will have to pay no tax whatever under the provisions of the Bankhead hill. Their entire plantations are farmed by tenants, who pay rent in cotton. The operator will merely accept tax free cotton from his tenants in payment of rent leaving the tenant taxahle cotton to sell for his own uses.

Share croppers and small farmers likewise will be forced to meet obligations with their tax paid cotton. Mr. Johnston pointed out, leaving them only taxable cotton from which to derive an income.

TO GET $15,000,000

LITTLE ROCK.——Around $15,000,000 in rental and benefit payments will be paid to 103,200 Arkansas farmers participating in the wheat, cotton, rice and corn-hog adjustment programs, T. Roy-Reid, assistant director of the extension service, announced today.

Because of the four programs, aimed at curtailing production of drastic commodities, but 1,500,000 acres of land formerly planted to cotton, corn, rice or wheat will be withheld from production, and farmers will be paid the AAA for restricting their acreage.

James Weldon Johnson Writes Another Book

New York, Aug.—(ANP)—James Weldon Johnson, head of the Department of Creative Literature at Fisk University, Nashville, Tenn., has written another book. It is expected to be published in September of this year.

Dr. Johnson's latest book is nonfiction and entitled "'Negro Americans? What Now?" It will be issued by the Viking Press.

Open Tournament At W. Va. State

Institute, W. Va., July—(ANP)—The Tenth Annual open tennis tournament of the West Virginia State college Tennis Association will be held on the State college courts, here July 26, 27 and 28, it was announced this week.

Farmers Easing Up

Taking More Time For Selves

By Myra Gerken

Among outstanding effects of present agricutural mal-adjustment situation is a perceptihle "easing up" in the strenuonsness with which farmers in general sought to accomplish their boundless tasks during the days before the depression.

The hard labor and long hours, with inadequate returns, with which the farmer has had to contend for so long, has given him a "why work myself to death?" attitnde. A slowing-up trend has resulted. The farmer realizes at last the truth of the old adage, "Slow and steady wins the race," especially at this time, when the reward for winning the race is, agriculturally speaking, practically nothing.

Jnst how many acres of ground he can plow in one day, or how much work he can accomplish by sun-up, has ceased to he the deciding factor. To work or not to work, that is the question which many farmers are asking themselves. The general opinion is that work, for work's sake, is good for the soul and helps to keep up the morale of the so-called forgotten farmer.

Who can say but what the easing-up process may not he productive of some good to the farmer, from a social and mental standpoint. It gives him more time to enjoy his fellow men, and perhaps to do some of the reading that he didn't have time to do before. Perhaps that is the compensation for the other disturhiug factors.

Be that as it may, there is a lessening of tenseness among the farmers, as well as an optimism which is evident on every hand.

"Big Boys" Slug Guard And Flee

Atlanta, Ga., July—(ANP)—"Big Boy" Jones and "Big Boy" Campbell, 23-year-old chain gangsters on the state highway at Soperton, escaped Monday after they had slugged a guard and taken his pistol and shotgun.

Both Jones and Camphell were six feet, three inches tall.

Cotton prices have reached the levels since August, 1930.

THE MODERN FARMER

Vol. VII. NASHVILLE, TENN , AUGUST 15, 1934. No. 4.

Relief For Debt-Ridden Farmers

NEW PLAN TO HELP SAVE THEIR PROPERTY

Frazier-Lemke Act Provides Rare Opportunity For Aid

Chicago, Ill.—No bill passed by the last Congress offers more hope to impoverished Race farmers than the Frazier-Lemke Act, which was approved by President Franklin Roosevelt June 28th, 1934.

The National Federation of Colored Farmers Inc. is widely distributing a plain summary of this new law to thousand of members of their organization in 21 states where they have units operating.

This national Race farm organiation is aware of the fact that many farmers threatened by foreclosure are in a desperate condition.

In many instances creditors refuse to grant extension to permit them to hold their property. They likewise refuse to accept reasonable reduction on their indebtedness.

One instance is cited where an 80 year old race farmer owning a fine farm of 160 acres is threatened with foreclosure for a measley 400 dollar debt. Another case is that of a widow, one of the best cotton farmers in the south, owing 80 acres is about to be closed out for a 25 dollar debt contracted during illness of her late husband. Her farm is conservatively valued at six thousand dollars. In this case the debtor seems determined to take it from her.

Another young farmer, highly educated and progressive is about to lose his 100 acre farm on account a small debt contracted by his parents five years ago.

A part of the Act reads as follows;

"(s) Any farmer failing to obtain the acceptance of a majority it necessary. The width, depth ors whose claims are affected by a composition or extension proposal, or if he feels aggrieved by the composition or extension, may amend his petition or answer asking to be adjudged a bankrupt. Such farmer may, at the time of the first hearing, petition the court that all of his property, whether pledged, encumbered , or unencumbered, by leins or otherwise, be appraised, and that his exemptions as prescribed by the State law, subject to any liens thereon, be set aside and that he be allowed to retain possession of any part or parcel or all of the remainder of his property and pay for same under the terms and conditions set forth in this subsection (s).

"(1) Upon such a request being made in the petition or answer, at the time of the first hearing, appraisers shall be designated and

(Continued on Page 8, Column 1)

FRENCH SILO EASY TO BUILD

Will Help Solve the Winter Feed Problem

"The farmer who gets the most out of his fodder turns it into silage," becomes an old truth with a new meaning as many farmers face a discouraging shortage of winter feed. Hay crops of all kinds are much below normal; in some states a complete failure. Much land counted on for winter hay must be pastured for summer feed. Even with good rains for the remainder of the summer, there will be a feed shortage in some states.

In view of the necessity of conserving every bit of feed, the United States department of agriculture points out the ease with which trench silos may be constructed. These are merely large trenches dug in the ground with the ends on an incline so that a team or tractor can be driven through, as practically all the construction work is done with team or tractor power. The side walls are finished smooth and nearly perpendicular with a spade so that the trench is narrower at the bottom than at the top. The walls should be smoothed every year, preferably when they are not too dry. Or they can be dampened if necessary. The width, depth and peculiarly the length vary with the number of animals to be fed. The low cost of trench silos practically puts them within the reach of any farmer who has time to dig one.

Good Drainage Needed

Selection of a site with good drainage is important. Perhaps it may be in the field where the silage is produced, rather than in the barnyard. A soil which is too sandy or one in which the water table is too high is not sat-

(Continued on Page 8, Column 2)

OLD DEAL ACHIEVED MUCH

Something Developed by The Father's Work

Presentation of Facts by Farmers to the New Dealers

Forbes' Magazine: The Old Deal had its faults, admittedly. It did not prove able to save America from the economic tragedy which overtook the world as an aftermath of the World war destruction. Yet, America did achieve something under the now-despised Old Deal. For example:

America became the richest country on the face of the earth.

America attained world leadership in industry.

America paid higher wages than ever before known.

America standards of living became the admiration and envy of other peoples.

America's savings deposits eclipsed even those of France.

American colleges and universities attracted unprecedented numbers of students from all grades of homes.

Americans enjoyed more travel, more recreation, more amusements than any other nationals.

American home owners greatly outnumbered those in any other land.

American families were protected by insurance on a scale not even approached in any other part of the world.

American workers and American employers enjoyed friendly relations unmatched in any other industrial country.

American industrial management attained heights which evoked both the applause and despair of employers elsewhere.

America developed machinery and mechanization eclipsig any thing any everything in other progressive nations.

America rose to leadership in invention.

America built up the greatest transportation system on the face of the globe.

(Continued on Page 8, Column 2)

Race Farmers Ready for Conv.

MAKES FARMERS SERFS

"The Agricultural Situation" Makes Charge

Scorching criticism is directed at the agricultural adjustment administration in the current issue of "The Agricultural Situation," published six times a year by the Corn Belt Farm Dailies.

Farmer independence will be destroyed, it warn. if plans of the AAA are carried through to their present objective of a blanket contract over all crops next year. The publication strikes tinkering without regard for nature. It also aims a shaft at governmental attempt to rule business as if it were a machine.

Secretary of Agriculture Henry A. Wallace is taken to task for "refusing to recognize the possibility of honest convictions counter to his theories" and picturing criticism as founded on "just plain everyday crookedness."

Finds People Fearful

There is no thought of turning back, not even any doubt in the minds of the planners, if their bold front statements are to be taken at their face value," the issue states. "But many people are beginning to doubt, and the future will depend on the trend of public sentiment.

"In spite of the most convincing evidence that man is only a minor factor in crop control; that the weather cannot be made by law; that insects cannot be enjoined by courts; that human nature doesn't change; that a food reserve is a mighty handy thing to have around; that man-made influence or control in production and trade creates uncertainty that gives rise to other uncertainties; that the AAA farm relief program has already shown itself to be a colossal

(Continued on Page 8, Column 3)

LARGE DELEGATION EXPECTED IN CHARLESTON, MO.

Sessions Open October Twenty-ninth to Last For Three Days

Chicago. Ill.— The Executive committee of the National Federation of Colored Farmers, Inc., has announced through its secretary Leon R. Harris, that the 1934 convention will be held in Charleston, Missouri, October 29-31. Delegates representing chartered units and membership in 21 states will attend the convention.

Mr. Harris states that the 1934 convention promises to be the best attended of any since the beginning of the organization, even larger than the great Memphis convention in 1932. More states will also be represented. Leading manufacturers and corporations catering to the farm trade, have representatives on hand with many fine exhibits. Prominent speakers, representing federal and state agricultural departments and noted race leaders have been invited to attend the sessions.

The main subjects for discussion by delegates are announced as follows:

1. How to own the soil you till.
2. How to lift the mortgage hanging over your farm.
3. Purchasing workstock and cattle for another year.
4. Securing loans to improve your home and farm.
5. Buying groceries and farm supplies- co-operatively.
6. Producing and selling your farm products co-operatively.
7. Home canning and sewing.
8. Legal contracts protecting sharecroppers and tenants.
9. Why all colored farmers should be organized.

Milus Sutton of Elko, Ga., loyal member of the N. F. C. F. and dirt-farmer inventor of the cotton bunching machine which promises to revolutionize cotton culture on the average size farm, promises to be on hand with a working model of his machine and will give daily demonstrations. Mr. Sutton has refused large offers for his patent and has made it possible for the N. F. C. F. to supervise the manufacture and sale of his machine. It is expected that all delegates and visiting farmers will be keenly interested in Mr. Sutton's demonstrations.

Charleston is located in southeastern Missouri, easily accessible by bus from Cairo, Ill., and by train from Memphis and St. Louis. All railroads have allowed special fares on the Receipt Certificate Plan.

George Higgins, 21, of Seymour, Mo., was killed while digging a grave in the cemetery. Two others were injured. Lightning struck them.

Eight Mistakes Cut Production of Fall Pullets

Urbana, Ill.—Eight Common errors are largely responsible for the wormy, runty, non-laying pullets found among Illinois' 26 million farm chickens along about October of each year, says H. H. Alp, poultry extension specialist at the college of agriculture, University of Illinois.

During the summer months many farmers are not "egg conscious" and consequently neglect the care of the birds when they may need it the most. As a result of this neglect, the pullets are so stunted that they fail to produce the number of eggs that might ordinarily be expected of them. Pills and worm capsules administered as cure-alls seldom give satisfactory results in these cases, and the poultryman finds that efforts to remedy the mistakes are expensive, difficult and generally disappointing.

Among the common mistakes listed by Alp are: Empty feeders, empty water troughs, dirty brooder houses without roosts, lice and mites in the brooder house, old contaminated range, outdoor feeders seldom moved, no clean shade provided and sick birds allowed to remain in the flock.

Probably the greatest error in poultry management, as far as feeding is concerned, is failure to use the type of feeder most satisfactory for range conditions and growing pullets. The outdoor feeder should be larger than that used in the brooder house and so constructed that it will not only prevent waste and contamination of the feed, but will also keep the contents dry. For each brooder house there should be at least two good-sized feeders. Many poultrymen use one for the grain and the other for the mash.

Failure to move the feed hoppers is also a common error. Unless the feeder is placed on a wire platform, the ground around it will soon become badly contaminated with poultry manure, and the chances of chickens picking up disease and parasites are increased greatly.

Like the feed, the water should be protected from contamination. Cleanliness around the drinking.

Mr. W. T. Clark of Wilson, N. C., was elected president of the Tobacco Association of the United States at its thirty-fourth annual convention held in White Sulpher Springs, W. Va.

Interesting NEWS Notes

The Federal Housing Administration promises that its activities will put five million Americans to work building and repairing homes and supplying materials. Half a million will be employed by this fall.

First reports of Georgia tobacco which went on sale this year showed marked improvement in prices over last year. First row sales ran from 12 to 45 cents per pound. Good lugs sold from 25 to 28 cents Better leaves bringing 30 to 40 cents with as high as fifty cents per pound.

President Roosevelt was served watermelon sliced in half and stuffed with ice cream and various fruits while dining with Dr. Chas Mayo at the Maywood estate, Rochester, Minn. The presidient was delighted with the newly prepared watermelon.

200 acres of green beans being grown for canning purposes near Anderson, Mo., have been badly damaged by the drought.

Water is being sold to farmers in the Ozark county of Missouri

A. U. S. Reclamation Commissioner says that tens of thousands of people will have to be moved from the western half of the Dakotas and the eastern slope of the Rocky Mountains on account of the drouth which has left their farms in ruins.

Nine full bred Jersey cows were killed by lightning during a storm near Paris, Ill. Chester Boland, farmer, was the loser. The cows had sought shelter under an oak tree which was struck. The cows were part of one of the finest herds in Ill.

Forest Fountain, a southeast Iowa farmer, reports a yield of 50 bushels of oats per acre. Twelve acres yielded 600 bushels. It was double the average yield in the community.

Killed by Policeman

Atlanta, Ga., Aug., (ANP)—Eddie Williams was shot in the abdomen Thursday night by Patrolmen Geo. Ellis at a carnival. He died from the effects of the wound. Ellis said that Williams had shot another man, Will Grissol, and was fleeing when he was killed.

Killed by Train

Memphis, Tenn., Aug. (ANP)—Struck by a train, the mangled body of Charles Blackwell, 27 resident at the Transent Bureau, was found on the L. and N. tracks at Ayers Ave., early Monday morning.

Child Dies From Auto Injuries

Atlanta, Ga., Aug., (ANP)—Elizabeth Kate Rainey, seven years old, died last Sunday at Grady hospital from the effects of injuries sustained when she was struck by an automobile driven by a hit-and-run driver.

SAY "Y" SECRETARIES ARE UNDERPAID AND NEED NEW PROGRAM

Group of Leaders Wants Service Extended to Include Girls and Women

Chicago, Aug., (ANP)—Recommendations are being sent to the Y. M. C. A. National Council to investigate the inadequacy of salaries paid to Negro Y. M. C. A. executive secretaries. Feeling that Negro Y. M. C. A. heads are underpaid in proportion to the position they hold in the community, three laymen—John A. Patton, Indianapolis, Ind.; Richard L. Jones, Chicago, Ill., and Calvin K. Stalnaker, Toledo, Ohio; drew up the following recommendations after the recent National Conference of Midwest Laymen and Secretaries held in Chicago.

"We recommend that the National Council make a study of the salaries received and standards of living maintained by Negro Y. M. C. A. secretaries with special reference to the executive secretaries, with a view of ascertaining whether or not the present salaries are adequate. We would point out, in this connection, that the colored executive secretary occupies among his people a position and maintains community connections more comparable to the position of the general secretary than that of his white fellow branch executives. Because of the inadequacy of pay, we are not able to maintain the high type of leadership which the association must have if it continues to live and render useful service to our people."

Along with these recommendations a committee headed by B. W. Overton, Executive Secretary of the Y. M. C. A. of Cincinnati, Ohio and L. B. Marsh, of the Y. M. C. A. of Toledo, Ohio, framed resolutions calling upon the entire Association movement to rethink its program in terms of the present community needs.

"We, the Findings Committee of the National Conference of Mid West Laymen and Secretaries, wish to submit the following recommendations:

Whereas, the Young Men's Christian Association is dedicated to the enrichment of lives of Youth and since present-day conditions afford us unusual opportunity in the realization of this objective, we recommend that:

"We impress upon the brotherhood the importance of keeping the central purpose of the Y. M. C. A. ever before us: this purpose being to aid young men and boys in realizing the Christian ideal.

"That in view of the rapid changes which are taking place in our social order (a) Economically (b) Politically (c) Religiously (d) Educationally and (e) Socially, we constantly study our program and methods of procedure, making such changes as are necessary to obtain the desired results.

"That the Y. M. C. A. extend its service to the enitre family including the women and girls in order that we may keep pace with the new developments in family life and recent trends in recreation.

"That local secretaries identify themselves definitely with government projects as Housing, Transient Bureaus, Old Age Pension, Job Insurance, and other phases of the National Recovery Program.

Thanks Newspaper Publishers

Tuskegee, Aug. (ANP)—The Veteran's Press Club composed of soldiers confined to the United States' Veterans' Hospital here, passed resolutions at its meeting here this week, expressing appreciation to the many publishers who so generously made available to the inmates copies of their newspapers. Dr. A. D. Stone, chairman of the group said that the weekly racial newspapers were a source of inspiration, information and comfort to the inmates of the hospital.

Dressler Heirs to Visit Savannah

Savannah, Ga., (ANP)—Word has been received here that Mr. and Mrs. Jerry Cox, who received the largest bequest in the will of the late motion picture star, Marie Dressler, will shortly visit their brothers and sisters who live here. Mrs. Cox was formerly Miss Mamie Steel and attended West Broad street school here. When Miss Dressler went from New York to Hollywood, Mrs Cox sent her household furniture to Savannah where it has remained in storage.

QUICK COMPUTATION

Thayer News: Two small boys eagerly watched the stout woman on the scales. The woman dropped in her penny but the machine was out of order, and only registered 80 pounds. "Golly," gasped one of the youngsters, "she's hollow."

AN OFFER TO....

Farmers Of The Nation

A plan for membership in the Federation and a yearly subscription of the Modern Farmer

ONLY $5.00 TO BE PAID

Any farmer who desires membership in the National Federation of Colored Farmers and who wants to read the Modern Farmer every month for a year, may have this membership and this newspaper for that period by sending a money order or a certified bank check or cash by registered mail for $5.00. Send this to the Modern Farmer, 447 4th Avenue, North, Nashville, Tennessee. We will certify to the membership and send the paper. You will get all of the benefits of the Federation of Farmers from the Chicago Headquarters Every Farmer should belong to the Association and read the paper This offer is for the months of September, October and November.

Send all mail to

The Modern Farmer

447 - 4th Ave., No., Nashville, Tennessee

HOW HE GOT GEOGRAPHY

"Thirty years ago, said Judge P—, "I stepped into a book store in search of some books I wanted. A little ragged boy not over twelve years of age, came in also, inquiring for a geography.

'Plenty of them," said the salesman.

"How much do they cost?"

"One dollar, my lad."

The little fellow drew back in dismay, and, taking his little hand out of his pocket, counted some pennies and silver pieces that he had held until they were damp with the sweat. Several times he did it, then looking up, said, 'I didn't know they were so much." He turned to go out, opened the door, but then came back. "I have only got sixty-one cents," said he; "you could not let me have a geography and wait a little while for the rest of the money?"

Eagerly his little bright eyes looked up for the answer and he shrank within his ragged clothes when the man, not very kindly, told, him he could not.

The little bellow looked up to me, attempting a smile, and left the store. I followed him and overtook him.

"And what now?" I asked kindly.

'Try another place sir."

"Shall I go too, and see how you succeed?" I asked

"Oh, yes, if you like," said he in surprise.

Four different stores I entered with him, and each time he was refused.

"Will you try again?" I asked him.

"Yes, sir; I will try them all, or I shouldn't know if I could get one."

We entered the fifth store, and he manfully told the gentleman what he wanted and how much money he had. "You want the book verp much?" asked the proprietor.

"Yes sir; very much."

"Why do you want it so very, very much?"

To study, sir. I cannot go to school, but I study at home. All the boys have one and they get ahead of me. Then, my father was a sailor, and I want to learn of the places he used to go to."

"Does he go to those places now."

"He is dead," said the little boy softly; then he added, after a while, 'I am going to be a sailor, too."

"Are you tough," asked the gentleman.

"Yes, sir, if I live."

"Well, my lad, I will let you have a new geography, and you may pay when you can, or I will let you have one not new, for fifty cents."

"Are the leaves all in it, and just like the others, only not new?"

"Yes, just like the new ones."

"It will do just as well, then, and I'll have eleven cents left toward buying another book. I'm glad the other didn't let me have one."

The bookseller looked up inquiringly and I told him what I had seen of the little fellow. He was much pleased, and when he brought th book along, I put a nice new pencil and some white, clean paper in it.

"A present, lad for your perseverance. Always have courage like that, and you will make your mark.'

"Thank you, sir; you are very good."

"What is your name?"

"William Haverly, sir."

Do you need any more books," I asked him.

"More than I can ever get," replied. I have gave hi ma bank note. "It will buy some for you."

Tears of joy came into his eyes. "Can I buy what I want with it?"

"Yes, my lad, anything."

"Then I'll buy one book for mother."

He wanted my name and I gave it to him. I left him standing by the counter, and almost envied him; and many years passed before I saw him again.

Last year I went to Europe on one of the finest vessels that ever plowed the Atlantic. We had beauitful weather until near the end of our voyage, then a terrific storm would have sunk all on board, had it not been for the captain. Every spar was laid low, the rudder was almost useless, and a great leak threatened to fill the ship. Thecrew were all strong, willing men, and the mates practical seamen, but after pumping a whole night and still the water was gaining, they gave up in despair preparing to take to the boats, though no small boat could ride in such a sea. The captain, who had been below with his charts, now came up, and seeing how matters stood, with a voice that I heard distinctly above the roar of the tempest, ordered every man back to his post.

It was surprising to see them bow before his strong will, and hurry back to their pumps.

He then started below to examine the leak. I asked if there was any hope. He looked up to me an dthe other passenge s, who crowded to hear the reply, and said, rebukingly, "Yes, sir theer is hope as long as one inch of this deck is above water. When I see none of it then I shall abandon the vessel and not before; nor one of my crew, sir. Everything shall be done to save it, and if we fail it shall not be from inaction. Bear a hand every one of you at the pumps."

Thrice during that day did we despair but the captain's dauntless courage, perseverance, and powerful will mastered all on board and we went to work again.

"I will land you fasely at the dock in Liverpool," said he, "if you will be men."

And he did land us safely, but the vessel sunk, moored to the dock. The captain stood on its deck receiving the thanks and blessings of the passengers as they passed down the gang plank. I was the last to leave.

As I passed he grasped my hand and said "Jndge P — do you recognie me?"

·I said I was not aware that I ever saw him until I came aboard.

"Do you remember the boy in search of a geography years ago in Cincinnati?"

"Very well sir; William Haverly."

"I am he. God bless you."

"And God bless noble Captain Haverly!" — Selected.

Mrs. Rachel Ford Burris, a colored woman 111 years old, died recently at the Blair County Home, Cresson, Pa. For years she was noted in the district as the baker of the finest ginger bread. One son, Rev. Morris Burris, 75 years old, survives her.

Attack Victim Now Admits Man was Not Colored

New York, Aug., (ANP)—According to District Attorney William F. X. Geoghan of Brooklyn, Mrs. Pauline Bernstein, white, has admitted to him that the man who attacked her on June 20 was not a Negro, but a white man.

Mrs. Bernstein, according to the district attorney explained that she had read in the newspapers of an unidentified Negro attacking several women and had said that her assailant was a Negro "so suspicion would not be directed against a white man."

Clyde Allen was arrested early in June and indicted in connection with an attack of Mrs. Betha Smirles white. He was suspected of being the "giant Negro" sought in all the attacks, but the fact that he was in custody at the time Mrs. Bernstein made her false report, caused the district attorney to defer Allen's trial.

Change Consul at Addis Ababa

Addis Ababa, Ethiopia, Aug., (ANP)—William H. Crump, white of Philadelphia, who has been serving as American vice consul at London, England, has been assigned to Addis Ababa, Abyssinia succeeding William H. Farrell of Miller Place, N. Y., also white who has been transferred to Beirut, Spain.

FLORISTS VIE AT FAIR IN GLADIOLUS SHOW

Chicago.—One of the season's most beautiful showings at the World's Fair Horticulture building is scheduled for Saturday, August 18, when the national gladiolus growers begin a seven-day showing.

The prize schedule has been drawn up to provide for beauty, artistry and harmony. With the background at the horticultural spot on Northerly Island, the display should be productive of floral pictures that will leave indelible impression on gladiolus devotees.

The favorite pastime of Mickey Baehr, a two-and-a-half year old youngster of Pittsburgh, Pa., is smoking his grandfather's cob pipe. The child learned to smoke by soothing his gums on the pipe while his grandfather nodded. He comes from a long line of smokers, however, for his grandmother, 103 years old, still smokes regularly.

A Spanish butcher, on unlocking his ice box, found his wife's male friend frozen to death.

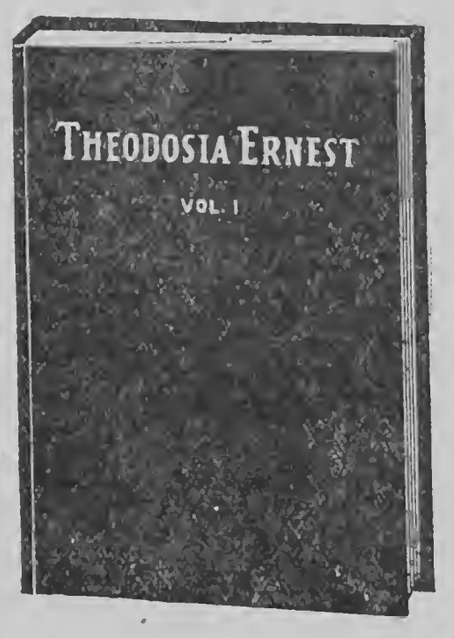
HOGS OFTEN ARE SICK BECAUSE OF POISONING

Sometimes hogs are sick because of poisoning rather than some disease, according to veterinarians in the United States department of agriculture. Hogs may be poisoned by spoiled feed, frosted alfalfa, excessive amount of cottonseed meal, poisonous plants, and garbage containing lye, soap powders, and other irritating substances. Sometimes hogs are poisoned by eating too much salt and frequently through drinking meat brine, of which they are very fond.

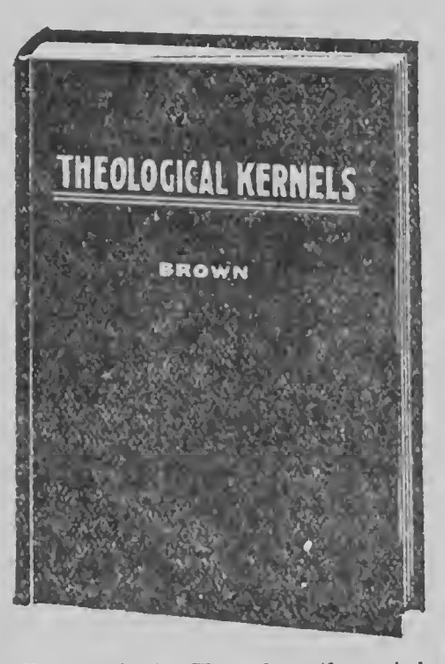
Carelessness in the handling of disinfectants, such as carbolic acid, bichloride of mercury, and crésol compound in hog lots may poison hogs. Salt poisoning creates an intense thirst, intestinal disturbances, and sometimes paralysis. Symptons of poisoning are similar in character, such as restlessness, loss of appetite, vomiting, frequent urination, weakness, unsteady gait, increased respiration, and sometimes convulsions.

Medical treatment is of little value, except where the exact cause is known and the illness detected early. Emetics, followed by purgatives, give good results. The sick hogs should have access to plenty of clean drinking water and should not be fed heavily for a few days following the poisoning.

Ministers and Laymen Should Seek Every Opportunity to Improve Their Minds.



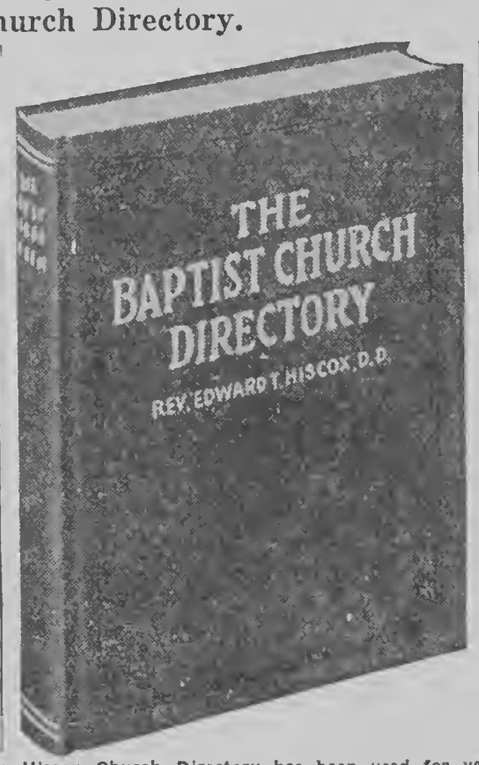
A religious Novel in most intriguing language. Price $1.00



Theological Kernels, the ministers best book of Helps.
Price $1.00

There is but One Old HISCOX Church Directory.

The Great Work of the late



REV. EDWARD T. HISCOX, D.D.

The Hiscox Church Directory has been used for years as a guide for Baptists everywhere.
Price $1.25

An Incomparable Church Record Roll And Minute Book
Price $2.50

The late Dr. R. H. Boyd devised a Church Record, Roll and Minute Book that was serviceable, indispensable and helpful to every church. It is three books combined in one. Aside from a place for the minutes of each session of the church meeting, a place for the enrollment of the members and a place for the financial record of the church, this publication has in it two outstanding ordinances of the Baptist Church, namely:—the ordinance of Baptism and the Articles of Faith, with other splendid helps. Any church clerk or financial secretary of a Baptist Church will be helped greatly in the keeping of his minutes, the preserving of their records and roll and the arranging of its financial side by purchasing one of these books for $2.50.

Editorials

From the Bible:

"Wealth gotten by vanity shall be dimished: but he that garthereth by labor shall increase." Prov. 13:11.

Boon Companions

Mr. Menti-to has a comrade
And his name is Didn't do.
Have you ever chanced to meet them?
Did they ever call on you?
These two fellows live together
In the house of Never-win,
And I'm told that it is haunted
By the ghost of Migh-have been.

DON'T DEPEND ON PROMISES

Colored American citizens, farmers and all others, are "easy-marks" when it comes to depending on promises. We are prone to believe that everyone in authority, — merchants, planters, bankers, government officials, politicians, preachers, teachers and all, no matter who,— if they know more or have more than we have, we believe they are angels and will do everything they promise to do. We trust every one except our own selves, and this is one big reason why we are in debt, why we are poor, and why we have it as hard as we do. We would gain more and have more if we would stop being so easily fooled and would learn to MISTRUST SOMETIMES INSTEAD OF TRUSTING ALL THE TIME.

We put too much faith in the other felow and not enough in ourselves. We forget that the other fellow and not enough in to gain a point,—that he has no intention of fulfilling them when he makes them. Political party platforms always sound like mighty fine declarations and promises but more than half of the platforms are forgotten after election. Government officials make promises,—often thoughtlessly, and they cannot possibly fulfill them. All promises should be taken and swallowed with a "grain of salt."

The New Deal has promised us much. The NRA promises to make life easier for the Race industrial worker and the AAA promises to make life easier for the Negro farmer. So far, the promises have amounted to little and probably will never amount to much for us. We should not depend upon them, but instead, we should get together, organize, buy and sell together, produce together,— have faith in ourselves and in our Race and START A NEW DEAL OF OUR OWN. Dependence on the other fellow,— on the government,— or on some political party will not get us one step out of debt, poverty or degradation. If we mean to progress we must stand on our own feet.— use our own heads,— and paddle our own canoe. And we can start doing this NOW.— even if we must live in tents, boxcars or shacks like many independent poor white people are doing right now all over this country. Better be independent and live in a shack than to be a dependent slave, serving a boss, creditor or master in a palace.

WORK YET TO BE STARTED

On account of the depression and general agricultural conditions, much work which the National Federation of Colored Farmers should do, has not even been started. In addition to instructing its members in the principles of co-operation, —helping them to practice co-operation, and enabling them in many ways to become better and happier farmers, it must endeavor in the near future to organize farm boys and girls into clubs that they may grow up knowing that organization is essential for our progress and success. Much more than is being done now must be done to keep our boys and girls on the farms and in love with the rural community. The 4-H clubs are okey, but there are few of them, and like so many of the things we pick up from the other Race, they teach our boys and girls to imitate well and much, but to originate little.

Our boys and girls need more than 4-H clubs. What they need most can only be supplied by such an independent organization as the N. F. C. F.

MISSISSIPPI LEARNS SOMETHING

Press reports assert that the great state of Mississippi at last has learned that she can feed herself. Thanks to the depression, the AAA cotton reduction plan and etc., food and feed crops are growing in every nook and corner. Her city folks and the planters will not have to bring in food and feed from other sections of the country as in days gone by.

Cane, Watermelons, peanuts and garden crops are growing on the acres taken out of cotton. The cattle, many brought in from the drouth stricken areas of Texas, are wading knee-deep in grass. Eighty thousand acres of cowpeas are growing. The Delta planters know there has been a drouth up north so they are not afraid of the river, —thanks also to the levee which has been raised several feet above the high water mark of 1927.

Perhaps Mississipians may eat more and better after this year,— we hope so,— but the big majority of her farmers who planted and cultivated her bountiful crops have a long way to go before they will be able to enjoy the benefits of American culture and civilization as enjoyed by farmers in other sections of the nation. There are many reasons. They own little of the land they till. They have never learned to want enough. They depend too much on the labor of their women and children. They are willing to work merely for a living. These are some of the reasons. Until they develop more backbone — learn how to organize and stick together for their own interests,—demand decent and sufficient pay for their labor, and opportunity to have something they can call their own,— until they do this, these farmers will remain little more than well fed animals. And most of these farmers belong to the colored Race.

Booze has drowned more men than water.

Better to go to bed hungry than to rise owing somebody something.

A patch is honorable but rags are a disgrace.

Little men quarrel and fuss and hate each other. Big men and great men have pity, and love and serve their fellows.

A fool's advice is worth something but its poor policy to give advice to a foolish person.

Can, can and keep a canning Every can of food you preserve for winter means money in your pocket.

Pay your subscription to the Modern Farmer and persuade your neighbor to subscribe.

New York's cabbage crop this year is said to be the largest and best ever produced. Growers expect to receive over a million dollars for their corp.

FARM EXPERTS TO SEEK FRESH IDEAS OVERSEAS

Washington, D. C., Aug. 20— Six Special to the Chicago Daily News. economists of the United States department of agriculture have sailed to Europe to participate in the third international conference of agricultural economists to be held at Bad Eilsen, Lower Saxony, Germany, Aug. 26 to Sept. 2.

Dr. O. C. Stine, in charge of the division of statistical and historical research, will present a paper at the international conference on the agricultural situation in the United States. Following the conference he will go to Rome as a United States delegate to the general assembly of the International Institute of Agriculture on Oct. 22. He will make a special study of bread grain supplies and of agricultural conditions in general in Russia, Roumania, Bulgaria, France, Yugolavia and Hungary.

Dr. O. E. Baker of the division of land economics will present a paper at the conference dealing with agricultural implications of the population changes in the United States.

David L. Wickens of the division of agricultural finance will present a paper on agricultural credit in the United States.

Samuel W. Mendum economist specializing in farm income surveys, will spend several weeks at the International Institute of Agricultural at Rome assisting Dr. Henry C. Taylor, the American delegate, in revising the statistical work of the institute on farm accounting.

Dr. Arthur Peterson an economist specializing in agricultural price indices, will participate in conferences on this subject.

H. M. Dixon will study methods in economic extension work as followed in European countries.— From Chicago Daily News.

PLAYTHINGS FROM GOURDS

By Mrs. J. E. Smith

Every year I have a few ornamental gourd vines on the back fence and the children have great fun using them to make different playthings. They make clever dolls from the ones with pretty markings and long handles. From the most perfect ones they make candy boxes, by cutting out one side and making a little hinge with ribbon, so that it can be opened like a door. They also make drinking cups from gourds.

They delighted their grandmother by making her a darning egg from a gourd. A hole was bored through the neck of a perfectly shaped one and tied with red ribbon. On one side of the gourd they printed in red ink "Darn Those Socks!" To their delight she declared it was the nicest darning egg she had ever used.

INTERESTING NEWS AND NOTES

(Continued from page 2)

A fifty year old farmer of Frazee, Minn., mistook a Fourth of July torpedo for a piece of candy. He bit into the torpedo, an explosion followed and he died from the effects of injuries received.

A permit to kill robins was granted to D. L. Swarts, fruit grower of Dumontsville, O. The birds have cost him seveal hundred dollars loss each year because they eat his fruit instead of bugs.

A farmer's wife in Dillon, Mont. found three rattle snakes curled up in her washtub. She dumped the tub, killed the snakes, and went along with her washing.

A Jersey cow, owned by T. D. Brixey of Tullahoma, Tenn., recently gave birth to triplets.

Ellis Purlee, register of the United States land Office in California, states that a total of over nine million acres of government land is still available for homesteaders in that state. Twenty-two hundred homesteads were entered last year. It might be well for colored farmers who desire to take up homesteads to write to Mr. Purlee in Sacramento, Cal., about this land. It is reported that most of the homesteaders are naturalized aliens or sons of aliens. American colored farmers should get their share.

Nevada sheep are being shipped to Colorado because of the drought.

Five box cars were purchased by Logan county, Kansas authorities to make homes for destitute families. Each family will have space for a garden, milk cow and chickens.

Early in 1932 a Chicago grain man bought several thousand bushels of corn in Nebraska for ten cents a bushel. He placed the corn in cribs where he bought it. A few days ago he sold it for 64 cents a bushel,—making 54 cents clear on each bushel. Colored farmers who have corn or feed to sell should try to hold it till next spring or late winter. Prices will be better.

Uncle Sam had paid, up to July 2, $28,498,207 in rental and benefit payments to cotton farmers in 20 states. Unfortunately, Race tenant farmers and sharecroppers who really raise the cotton, received little of this money. Landlords and merchants took most of it for "back debts" and interest, which in most cases was as high as 25 cents on the dollar. And the sharecroppers and tenants are still in debt according to the figures of those who do all the figuring.

A Negro funeral home in Ft. Worth, Texas, offered the commissioner's court five cents a body for the privilege of burying paupers of their race, even offering to furnish shroud and coffin. It was explained that the funeral home makes up its expenses by taking up collections from members of the Race.

During an electrical storm lightning struck two churches in Evansville, Ind.

Garden Topics

By Dr. Floyd Bralliar

This Is Best of Year To Transplant Bearded Iris and Peonies—Fromer Should Be Moved Into New Soil— Peonies Need Good, Rich Garden Soil.

We have come to the best time in the year for transplanting all of the bearded iris and peonies. It is true that bearded iris can be transplanted almost any time in the year without fear of loss and it is also true that many people prefer to transplant these iris immediately after they have bloomed. But as they are not dormant at this time, both theory and results of years of experience convince us that now when the seed has ripened or is ripening, the plants are at their most dormant stage and for the next four weeks will be in the best condition for transplanting.

Like all other plants, iris will do better if moved into new soil every few years, and while this plants is almost immune to serious diseases, there are two or three diseases that are very fatal to the plant. These diseases are largely eliminated by replanting in new soil. Select a place where the plants will get the full sun preferably a place where the soil has clay base and yet is fairly rich. Work this soil at least a foot deep and incorporate in it an abundance of lime. No plant loves lime more than does bearded iris. In fact this plant will thrive in a soil that is fully one-fifth lime. Of course, we are not advising using enormous quantities of lime like this, but we are giving this fact to emphasize using lime freely in the soil in which beared iris are to be planted. Even in limestone country it is always best to lime the soil before planting iris. A reasonable amount of other fertilizer is a good thing but the one most essential thing is lime. Cotton seed meal at the rate of a pound to each wheelbarrow load of oil will make a valuable fertilizer for these plants. Unleached wood ashes are also epecially good and if these are not to be had, potash in some other form should be added.

In digging iris for resetting it is well to cut off all foliage to within three or four inches of the base and to break the rhizome into pieces with not more than four or five bud. We have alway felt that we got better results from cutting the roots back to stumps two inches long. Others leave all the roots on the rhizome. You will have success in either way and there is no great choice between the two methods. The rhizomes are easier to set however, if the roots are pruned back. In setting, do not plant closer than a foot apart. Lay the rhizome flat and plant them just deep enough to barely cover them with soil. Some people make the mistake of trying to plant iris rhizomes on the end with the top stick out which means that new rhizomes must grow before the plant is in a normal position. Others feel that they should be buried three or four inches deep which means that one never gets really first class results until new rhizomes have time to grow on the surface and many even mean that the rhizomes will rot and not grow at all. Like many other plants that have just been transplated it is best to water, perferably with a spray, so as to firmly pack the soil around the plants. However, this is not really necessary.

Iris may be dug and allowed to lie exposed to the hot sun for three months and yet will grow if finally planted. Our common beared iris is a dry weather plant and should have excellent drainage. It is true that there are plenty of varieties of iris that will do best in swampy places but, these are not our common bearded varieties. There are so many new varieties of great beauty that it seems we should plant iris freely. even though we may have hundreds of thousands of the older varieties. It does not pay in the country to plant iris after the first of October for they are seldom well enough established in the soil to prevent their being heaved out by the freezing and thawing of the winter, and although this heaving out will not kill the plants, it will certainly weaken them.

We can plant peonies in the South at any time from the middle of August to the middle of December with every probability of success. Peonies should have, rich garden soil with an abundance ot decayed vegetable matter but they are more or less sensitive to the presence of stable manure. As they make very large roots the soil should be prepared at least two feet deep and the hole fo reach plant should be at least two feet in diameter. We need good, rich loamy soil throughout this entire space if we are going to get the best results. A little good soil on the surface and then a mass hard pure clay around the lower half of the roots will never give really satisfactory growth. The most important thing in transplanting peonies is to secure plants that have only been dug a short time, certainly not more than two weeks, unless the roots have been stored in damp packing material all of the time after they were dug. Properly packed, they may be kept in good condition for months, but this seldom done as it should be.

Better get the ground ready now and get the peonies sometime in September. Set them so that the top buds are covered from two to two and a half inches deep with soil. Water heavily enough to thoroughly settle the soil around the roots from top to bottom and then fill a little more earth so as to be sure you have maintained the right depth.

All varieties of peonies do not do well in the South, and you will have to inquire of some experienced grower in your neighborhood as to what varieties are likely to succeed.

LORD'S PRAYER ON PIN SEEN IN FAIR EXHIBIT

Chicago.—Spoons, so tiny that you can distinguish them only under powerful microscopes; the Lord's Prayer, engraved on the head of a pin; the smallest sewing machine, the littlest vacuum cleaner; minute and amazingly clever carvings in ivory—these are just a few of the highly interesting objects on view in Jules Charbneau's exhibit of the world's smallest things, seen in the Italian Village at A Century of Progress.

A Cottage Grove, Ore., farmer found gold nuggets in the gizzard of two ducks he killed. He is now searching his farm for the place the gold came from.

Colored Fair Sumner County

Gallatin Preparing to Entertain Hundreds on August 23, 24. 25

Announcements, catalogues and placards are already conspicuous around Nashville calling attention to the Twenty-eighth Annual Exhibit of the Sumner County Colored Agricultural Fair. This Show, Entertainment and Exhibit opens in Gallatin, the county seat of Sumner County, on Thursday, August 23rd, and is to continue through Friday and Saturday. The officials, some of whom were in the city last week, distributing their catalogues and putting up these large posters and placards, stated that they propose to have the Exhibit this year the largest in the history of the years of activity.

While the Fair itself was organized back in the early 60's, they just regard it as the Twenty-eighth Annual Exhibit this year. They will feature during the week agriculture, cattle-raising, poultry, dairy, farming, home economics, needle and art work. They are to have a horse show, music, concerts and many other attractions.

A special committee came down to Nashville to interest the Nashville people to come up in large numbers, and from year to year these citizens have given support to the Sumner County Fair.

Upper Train Berth Now in Favor

Pittsburgh, Pa., Aug., (ANP)—A whim of fate in the guise of air-conditioning again has brought to popular favor the old friend of the traveler, the upper berth, according to recent studies made by the Pennsylvania Railroad, following the general introduction of air-conditioned cars on its through passenger trains this spring.

The upper, although always comfortable and reasonably priced, until recently had been losing ground and with real beds, luxurious single rooms, compartments and all the rest of the competition on today's trains it was small wonder.

It took the magic of air-conditioning to waft the neglected upper back to public favor and patronage. The cool, clean air which refreshes and invigorates sleeping car passengers, no matter how hot it is outside, exerts its beneficent influences on the person in the upper as well as the person in the lower. With windows an unnecessary appendage for night travel, the upper berth patrons now enjoy the same restful, soothing atmosphere and quiet comfort as other passengers.

Secretary Wallace has ruled that coloring fruit with a dye to conceal damage or inferiority constitutes adulteration and is contrary to Law.

"STEVEDORE" MAKES MANY IMPRESSIONS

New York, Aug., (ANP)—If an article in the current issue of The Stage is to be believed, Margaret Larkin is a genius as a press agent because her "ordinary press releases (concerning "Stevedore") were run in banners across the front pages (of colored newspapers) much like the streamers of The Times when war was declared.

The Stage also informs that "Paul Robeson has completed his negotiations for the world rights of 'Stevedore." He will play Lonny Thompson, in London—probably before he takes the play to the Continent.

"Stevedore" led the list of best-sellers for the past month at the Drama Book Shop.

FATHER WHEN A BOY

Willie was doing penance in the corner. Presently he thought aloud pensively.

"I can't help it if I'm not perfect," he sighed. "I never heard of but one perfect boy, anyway."

"Who was that?" asked his mother thinking to point a moral.

"Papa," came the silencing reply, "when he was little."—Unidentified.

TELL OF TRIBE BELIEVING IT IS ALONE IN WORLD

New York, Aug. 9.—The exploring Johnsons returned from their favorite Africa today aboard the United States liner Manhattan and reported the discovery of a lost tribe of lake dwelling natives, seventy in all, who are living between Kenya and Abyssinia in the placid belief that they are the only people in the world. The arrival of the Johnsons, the explorers suspect, did little to disabuse the native minds of this impression.

"They probably forgot all about us within two days after we left," Mr. Johnson said, adding that the whole affair, including the arrival of the Johnsons by amphibian plane apparently made almost no impression on the immured seventy. They live on an island and lack even canoes to explore Lake Rudolph. They have no agriculture and live on fish. They are extremely skinny," Mr. Johnson added.

The nearest native settlement to them, the Johnsons believe, lies 50 or 100 miles distant. When the Johnsons dropped in "they were somewhat startled and we learned it had never occurred to them that other human beings might inhabit the earth or even, for that matter, that the earth existed beyond the shores of their lake."

"WHAT IS THY NAME?"

Gen. 32:27, John 10:3, Rev. 19:11

"race to face" with Sov'reign Saviour, when Redeemed is meeting there,

And the Lord has asked the question, serving Soul its name must give;
Not the name among one's fellows passing current everywhere

But a name that's deeper, truer, and in service cannot live.
There was one confessed "Supplanter,"* when his wrestling naught availed

Until He with whom he wrestled "touched the hollow of his thigh;"
When the servant learned in sorrow every human plan had failed,

And complete surrender only drew from sure and deep Supply.

Some must there acknowledge Willful"; others "Inattentive" are

There are some who must "Idler" in that Presence need confess
Others still must answer "Selfish" bearing with is ugly scar;—

And yet every one is pleading that the Lord will hear and bless.
It is well that each one longing for a moment pause and think,

For at instant unexpected may this searching qnestion come.

At this moment many a thoughtless one may be upon its brink;

And with Eye there fixed upon him find himself amazed and dumb.
From that Lord is nothing hidden, and his love will all reveal;

It is wirtten that he "calleth" every sheep he owns "by name;"
But he longs for open trusting with importunate appealfi

And he only wno surrenders may the depth of blessing claim.
For the boon that seems so precious Heaven taught the soul to ask:

And the Shepherd waits in patience until pressing grows the need;—
But his love will never falter till it has fulfilled the task,

And has shown in Self the hindrance that must thwart one taught to plead.

Name confessed, new name is given;—as it was in days of yore;

When "Supplanter" thence as "Israel" evermore by meen is kuown;—
For the wrestling Hand that reaches to the servant's weakest core

Is the Hand through which the Master's tend'rest love will yet be shown.
So, when one, there conquered, may the earnest name of "Bondslave" tell,

And his fellow-men about him note to this his actions trend,
Though his earthly life seems shadowed by adversity's stern spell

As in other days the Master answers:—"I have called you Friend"

And this Master, who has challenged each his heart-searched name to own,

For himself, through years of proving, will to us this challenge meet;
For each one in looking backward o'er his life sees clearly shown,

With each test, a double name by which his Lord he now may greet.
Was the need a deeper lesson? or "a word in season" given?

Or a lack that made him see earth's sufficiency anew?
Or a stern command with backing of the Majesty of Heaven?—

Never mind! The Master's Name each time was proven "Faithful, True!"

Sally Neil Roach

*The meaning of "Jacob".
*"One Prevailing with God".

SUBSISTENCE HOMES OPENED, OCCUPIED

Two Hundred Transients From Washington Move In

Washington, Aug., (ANP)—Two hundred colored transients, housed in Washington during the past few months, were moved this week to Beltsville, Md., to form the nucleus of the first subsistence homestead community to be opened in this district. H. C. Newman, local engineer is in charge of the project, which is under the supervision of Elwood Street, director of public welfare of the District. Both men are white.

Construction of housing facilities for the men has already begun and the camp' entire quota is expected to be settled within thirty days. A fifty acre tract, formerly belonging to the Federal experiment farm at Beltsville, has been allotted for the project, and varied activities, including truck gardening, chicken raising and dairy farming are being planned.

Startling Offense Against Colored Woman

Jackson, Miss., Aug. (ANP)—Although a colored man may be murdered for speaking loud to a white woman here, any offense he may commit against a colored woman is regarded lightly by the authorities.

John Johnson was recently arrested, charged with a statutory offense against a colored woman, Tuesday, by agreement in a vacation hearing before County Judge A. H. Longino, bond for Johnson was set at only $250.

Leonordtown, Md., residents reports that during the recent heat wave watermelons became so hot that steam generated in them and they exploded.

THE NEGRO MUST RECOGNIZE THAT AT PRESENT THERE IS A BUYERS MARKET IN WHICH THE CONSUMER HAS A CHOICE

By Walter R. Harrison

Professor Rural Economics,
Prairie View State College,
Prairie View, Texas

The Negro on going into any type of business, should not take the attitnde that he is in power and the consumer must buy from him or starve for the want of economic goods. The Negro in business must revolutionize his attitude toward economic problems.

The Consumer is Always Right

At present, there is a Buyer's Market in which the consumer has a choice. There are many businesses today carrying the same variety of goods and the same type of service. This means that the consnmer is not forced to trade with any particular dealer, but that he has a choice of buying from whom ever he wishes, on the basis of service, quality, and cheap ness of economic goods and services. The consumer dictates not only the production but the price as well. The most interesting party in our marketing scheme at present, then, is the sonsumer. It is this arty the Negro mnst ultimately satisfy. The Negro has for a long time considered as negligible the change of consumption. He has directed all of his attention to himself as a producer, which is altogether natnral, but now he must change his viewpoint to the importance of the consnmer. This change places the valne in man's want itself and not in the thing wanted. The Negro consumer ceases to be merely passive, but instead seems to be far more active than is generally recognized. The consumer s always rght. If he demands intelligence, orderly sarroundings, politeness, service and a special kind of economic goods, then, the Negro in any type of business must given the consumer those things that he desires

The Negro in Business Must Possess Intelligence, Politeness and Must Render an Indispensable Service to The Consumer

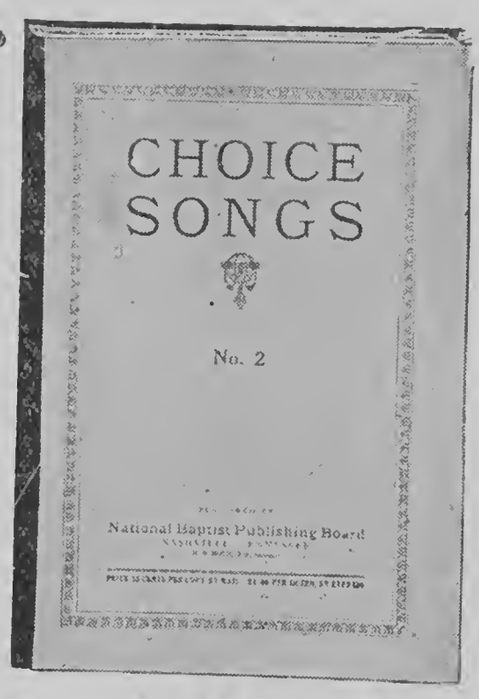
The Negro consumer is quick to feel a sense of injustice and wrong in economic dealings with his own. Therefore, it is necessary that the Negro in business work out a fair technique, which is the direct result of intelligence in dealing with the consumer. The Negro in business must be polite so as to gain the good will of the majority. In other words, he must be meek and humble, but yet maintain sufficient intelligence to make his business a succes.s.

Again the Negro in business, if necessary, must go out of his way to render a type of service that will satisfy his customers. Each new service and convenience will draw additional consumers.

The writer firmly believes that the correct starting point for the Negro in business is with the Negro consumer. The growth and prosperity of the Negro in business will depend entirely upon how well he pleases the consumer as to quality, price and service.

A Study Should be Made on the Consuming Power of the Negro in The State of Texas.

A study should be made on the amount of money the Negro spends for economic goods and services in the state. Comparative studies can also be made according to sections of the state. Such studies will be very valuable because it will enable the Negro going into business to have a definite knowledge of conditions. An investigation of the kind mentioned above will point out certain locations for Negro business, the value of consuming power and various types of businesses to be established. It is hoped that the above article will stimulate thought and action on the part of those who are interested and firmly believe in Negro business. The Negro in business will have to face this fundamental fact that there is at present a Buyer's Market in which the consumer has a choice'—The Prairie View Standard.



Choice Songs

NO. 2.

Exceedingiy popular, worth twice the money. Millions of folks have sung from this book, fitted for use in all meetings of an evangelistic nature and well adapted for any other religious use.

Price 20 cts. per copy. $2.40 per dozen. By the hundred, $15.00. express charges not paid.

SHORT TALKS ON MUSIC

This book contains the simple instructions for those who want to learn vocal music. It is almost a self instructor. No greater help can be found for the anxious student.

Price 30 cts. per copy, $3.60 per dozen.

RESIGNATION FROM FERA OF FORRESTER WASHINGTON, AIRED

Dr. W. J. Thompkins is Dissatisfied With Way Administration Dispenses Patronage

Washington—(C N S)—Repercussions are being heard in Washington following Forrester B. Washington's resignation from his governmental position as Director of Negro Work of the Federal Emergency Relief Administration. As the duties of his office concerned all phases of relief work, as they affected Negroes in all parts of the country, speculations are rife throughout the States—first, as to who is to succeed him and—second, as to which of the others of the progressive element of the race New Dealers are soon to join the trek back to the States from whence they came.

Some speculators are of the opinion that there is trouble, both within and without the charmed circle of these latter day office holders, and point to the opposition of the younger element to the suggestion that Eugene Kinckle Jones be shifted, fromr the Department of Commerce, where he is now serving as Adviser on Negro Affairs, to succeed Mr. Washington in Relief Administration.

Rumors to the effect that Mr. Washington's resignation was due to his sole desire to return to Atlanta to devote full time to his duties as director of the Atlanta School of Social Workers, were dispelled this week by too much explaining that failed to explain.

Some days ago it became known that immediately following Mr. Washington's notice to the "insiders" that he was going to resign, a hurried meeting was called and held in room 3814 Commerce Department Building to discuss the matter. Among those reported to have answered the call were Dr. William J. Thompkins, Lieut. Lawrence A. Oxley, Mr. Jones, Victor Cools, J. A. Murchison, and Robert L. Vann. It is charged that Vann tried to break up the meeting, when it became known that some of those present were, like Mr. Washington, very much dissatisfied because of the indifference and complete apathy on the part of the Administration toward doing anything tangible for the masses of the colored people, despite numerous recommendations and surveys which have been made at the suggestion of Administration officials for the past fifteen months.

It comes from a reliable source that Dr. Thompkins dropped a bombshell in this meeting when he presented and proceeded to read to the group one such document, in the form of a memorandum that the "then big four" presented to Mr. Farley in May, 1933.

This memorandum is reported to have been given to Mr. Farley at his own request for the purpose of guiding the Administration in its effort to "take care" of the "deserving colored Democrats" throughout the country. Nothing apparently has been done toward meeting the recommendations of the memo after the placement of one of the "big four" in the Department of Justice. The memo endorsed Dr. Thompkins, for Governor of the Virgin Islands; Dr. Joseph L. Johnson, for Minister to Liberia; Manuel Rogue, for Business Specialist in the Department of Commerce; Robert L. Vann, for a position in the Department of Justice; and several other prominent Democrats for choice political plums. The appointment of Vann to the position he holds is the only recommendation which was adopted.

It is claimed that when Thompkins began to read his file copy of memorandum to Mr. Farley, Vann tried to stop him. The militant Doctor, however, stopped only long enough to say: "I'm not used to being hushed." Vann then is reported to have lost his equilibrium, picked up a hat and rushed from the room. As he bolted into the corridor, he discovered he had the wrong hat. Whirling suddenly to return to get his own head piece, he bumped into "another newspaper man," who recognized the excited Pittsburgh Editor as he rushed back into room 3814 where he remained for some time. This incident gave the "other newspaper man" a clue to the story which is related here.

One rumor has it that the purpose of the meeting was to decide on a recommendation as successor to Washington and that Eugene Kinckle Jones of the Department of Commerce declared himself as wanting to go to the Relief job where he felt he could be of great assistance to the masses of colored people throughout the country.

Mr. Jones' bid, however, for the position was said to have been received very coolly by the younger brain trusters, who reports say want new blood injected into the scheme of things, since so far nothing has been done by the "older heads."

The concensus of opinion, in view of the many rumors afloat about the Washington resignation: the reason or reasons for it; the many denials as to it; and the disquietude of the remaining brain trusters; is that it augurs none too well for them as Negroes throughout the country who wanted a new deal, are demanding not only a new deal, but a more favorable deal, and look to these men who should have "pull" with the Administration to see to it that in just recognition of their party service, the new deal means a better deal.

A group of political observers here a few days ago, in comparing notes found to their amazement that what remains of the "big four' have not been able to see Mr. Farley for three months, despite their repeated attempts to contact the official patronage dispenser. This may call for more explanations. At least Washington has its ear to the ground and seems to hear mumbling which presage a stormy season for those of the race brain trusters who are still interested in the welfare of the race and its part in the New Deal program.

HOSPITAL OFFICIALS IN SHOOTING FRAY

Tulsa, Okla., Aug. (ANP)—Doctor G. I. Lythcott former head of the Municipal Hospital in Tulsa, Okla., but now located at Taft, Okla., as chief of the staff of Physicians at the Insane institution, was slightly injured by Leslie Beck, engineer at the Hospital. Exact details of the affair are not available but it is known that Lythcott suffered injuries of powder burns from the revolver in the hand of Beck.

E. C. Dowden, a farmer west of Whiting, Iowa, still uses a team of oxen for his farm power. He delivers cream, eggs and vegetables with the team, unhitching them and letting them graze while he does his shopping.

BEES USE STINGS ONLY FOR DEFENSE OF HIVES

"Bees never come to know their owner," says James I. Hambleton, apiculturist in the bureau of entomology, dispelling the belief that beekeepers do not get stung, because their bees know them. "Every person who works with bees will be stung occasionally. The layman, who is stung most often, is probably nervous and afraid of bees. Apiarists are well aware that their bees never get to know them. One who understands bees can work as safely in another apiary as in his own."

Bee specialists also point out that the worker bees, which do the stinging, do so only in defense of their hive, and even there only a few assume the responsibility of guards, leaving the others free to go about their work. If all bees rushed at once to the defense of the hive and were successful in stinging their victim, there would be no workers left, because in stinging a bee not only loses its sting but also loses its life. Away from the hive, bees are intent upon their work and can scarcely be induced to sting, unless they are caught and crushed.

Scientists have acquired amazing information about bees, but the traits and characteristies of these little workers have changed little, if any, since the beginning of history.

BRIGHTER HUGED CAKES MAY FOLLOW EGG EXPERIMENTS

Sponge cakes may some day blossom out in orange-yellow instead of pale yellow shades!

Experiments are being made at the Georgia experiment station to study the color of egg yolks produced by feeding hens pimento pepper. The use of dried pepper permits the careful regulation of the quantity fed so that uniformly colored eggs will result. To what extent these eggs may be utilized for their color and for any added vitamin value is still under investigation.

HALF PIG, HALF HORSE NEWEST FREAK

Seneca Falls, N. Y.,—(By International News Service.)--A new freak for the side show world, best described as half pig and half horse, was placed on exhibition here today by Dr. W. L. Clark, local veterinarian, at his hospital. The freak, born to a mare on a farm near here, has the head of a pig, breathes and snorts like a pig but has long legs and body of a colt. The animal is black with white marks in its head and nose.

CHINCH BUG TRAPPER TELLS HOW AT FAIR

Chicago.—'Chinch bugs? Nothin' to 'em. I can catch enough in one morning to buy plenty of tickets for my family and friends for the rest of the World's Fair," said Charles Clow, farmer from Plainfield, Ill., at the Court of Honor entrance of A Century of Progress during Farm Week.

Walter Beck, Fair cashier, somewhat puzzled by the wholesale inroads of chinch bugs—into the Fair, since the Fair started accepting them for admission, had asked Clow just how the "red devils" were being snared so easily.

"You dig a furrow," explained Farmer Clow. "Against the side of the bank you sink a post hole, about every rod or so. Then you spread a line of creosote along the bank from one hole to another, swinging upward in a little arc which reaches its height about midway between the holes. The bugs begin marching in great crowds up the furrow-bank, but they don't like the smell of creosote a-tall, so they try to march around it. Sooner or later they fall into the holes. Then when we're all through with our chores, we go around and scoop 'em out. By the millions."

Farmer Clow bit a piece off his cigar and spat.

Keep The Records of Your Sunday School Correct

Send for a copy of Boyd's Sunday School Record, Roll and Minute Book, price $1.00 per copy. This compilation of three books under one cover enables the School, by this simplified methods, to keep the records accurately for each Sunday so that you can make a report by the Quarter. It has the financial side, a place for keeping the minutes for each Sunday and a place for the enrollment of the School. It fits into the plan of the Sunday School. Almost any child in the school can act while the most cultured from the large Universities would find it helpful if they were acting as secretary.

Send $1.00 to the National Baptist Publishing Board for a copy of this publication and thus enable your school to keep the minutes, the roll and records under one cover.

An Incomparable Church Record Roll And Minute Book Price $2.50

The late Dr. R. H. Boyd devised a Church Record, Roll and Minute Book that was serviceable, indispensable and helpful to every church. It is three books combined in one. Aside from a place for the minutes of each session of the church meeting, a place for the enrollment of the members and a place for the financial record of the church, this publication has in it two outstanding ordinances of the Baptist Church, namely:—the ordinance of Baptism and the Articles of Faith, with other splendid helps. Any church clerk or financial secretary of a Baptist Church will be helped greatly in the keeping of his minutes, the preserving of their records and roll and the arranging of its financial side by purchasing one of these books for $2.50.

NEW PLAN

(Continued from Page 1)

appointed. Such appraisers shall appraise all the property of the debtor at its then fair and reasonable value, not necessarily the market value at the time of such appraisal. The appraisal shall be made in all other respects, with right of objections, exceptions, and appeal, in accordance with this Act: **Provided,** That in case of real estate either party may file objections, exceptions, and appeals within one year from date of order approving the appraisal.

"(2) After the value of the debtor's property shall have been fixed by the appraisal as herein provided, the referee shall issue an order setting aside to such debtor his exemptions as prescribed by the State law, subject to any existing mortgages or liens upon any such exemptions to an amount equal to the value, as fixed by the appraisal, of the value of such exempt property as is covered by any mortgage or lien, and shall further order that the possession, under the control of the court, of any part or parcel or all of the remainder of the debtor's property, shall remain in the debtor subject to a general lien, as security for the payment of the value thereof to the trustee of the creditors, if a trustee is appointed, such a lien to be subject to and inferior to all prior liens, pledges, or encumbrances. Such prior liens, pledges, or encumbrances shall remain in full force and effect, and the property covered by such prior liens, pledges, or encumbrances shall be subject to the payment of the claims of the secured creditors holding such prior liens, pledges, or encumbrances up to actual value of such property as fixed by the appraisal provided for herein. All liens herein on livestock shall cover all increase, and all liens on real property shall cover all rental received or crops grown thereon by the debtor, as security for the payment of any sum that may be due or pass due under the terms and provisions of the next paragraph, until the full value of any particular property have been paid.

"(3) Upon request of the debtor, and with consent of the lien holder or lien holder, the trustee, after the order is made setting aside to the debtor his exemptions, shall agree to sell to the debtor any part, parcel, or all of the remainder of the bankrupt estate at the appraised value upon the following terms and conditions.

WHICH ARE GIVEN

"(6) Having complied with the provisions of subsection (3), the debtor may apply for his discharge as provided in this Act.

"(7) If any secured creditors of the debtor, affected thereby, shall file written objections to the manner of payments and distribution of debtor's property as herein provided for, then the court, after having set aside the debtor's exemptions as prescribed by the State law, shall stay all proceedings for a period of five years, during which five years the debtor shall retain possession of all or any part of his property, under the control of the court, provided he pays a reasonable rental annually for that part of the property of which he retains possession; the first payment of such rental to be made within six months of the date of the order staying proceedings, such rental to be distributed among the secured creditors, as their interests may appear, under the provisions of this Act. At the end of five years, or prior thereto, the debtor may pay into court the appraised price of the property of which he retains possession: **Provided,** That upon request of any lien holder on real estate the court shall cause a reappraisal of such real estate and the debtor may then pay the reappraised price, if acceptable to the lien holder, into the court, otherwise the original appraisal price shall be paid into court and thereupon the court shall, by an order, turn over full possession and title of said property to the debtor and he may apply for his discharge as provided for by this Act. **Provided, however,** That the provisions of this Act shall apply only to debts existing at the time this Act becomes effective.

"If the debtor fails to comply with the provision of this subjection the court may order the trustee to sell the property as provided in this Act."

The Roosevelt administration is to be commended on the passage of this law, which was enacted for the express purpose of aiding all farmers regardless of race who are threatened with foreclosure. Farmers are urged however not to take advantage of this law to evade payment of their honest debts.

FRENCH SILO EASY

(Continued from Page 1)

isfactory for a trench silo. An objection against trench silos is the accumulation of water when there is a heavy winter rainfall. If the trench can be located so that the lower end opens on a slope, drainage is simple.

Because trench silos are not very deep, the silage does not pack much by its own weight, and it should be tramped during or after filling. This can be done by men or animals, or with a tractor. The silage keeps best if covered with straw and then with several inches of earth—enough to make a rounded top to shed water.

Emptied from End

Trench silos are emptied by ginning at one end and working to ward the other, rather than from top to bottom as in the case of silos above ground. If one end of the trench is sloping, a cart, wagon or truck can be backed in to make removal easier.

These storage pits for winter feed can be made to take care of almost any number of animals. Because of its shallow depth the average weight of silage per cubit foot is less in the trench silo than in the upright silo. If allowance is made for spoilage a storage space of sixty to seventy-five cubit feet or more will be required to obtain a ton of silage for feeding.

OLD DEAL ACHIEVED

(Continued from Page 1)

America initiated and won preeminence in aviation and aircraft building.

America brought into being electric power facilities on a scope dwarfing those of any other continent.

America led the world in telephony.

America led the world in motion pictures.

America led the world in radio.

America is leading the world in television.

America promises to outdistance all other peoples in air conditioning.

America, under the old Deal, afforded greater scope than any other country for earning wealth.

America set example to other people in large-scale generosity and philanthropy.

In their enthusiasm, New Deal ers should not entirely forget these Old Deal facts. The New Deal has not proved exactly faultless.

MAKES FARMERS

(Continued from Page 1)

failure; in spite of all of these perfectly obvious things reports from Washington indicate that the AAA crop control program is to go right ahead.

Sees No Stopping Place

Possibly one reason is that there is no good stopping place, and perhaps never will be short of disaster, though those in charge of the various projects seem to be well satisfied with results."

Turning to Secretary Wallace's admission that "this is an experimental administration," the publication comments:

"It is a strange thing that the people will permit just a few of their number, in official position, just a few very ordinary individuals, to try this and that, to see what will and what will not work, accepting apparently lightly, the tremendous risks involved. Probably this is because the government is doing the experimenting, and the absolutely unsound belief that in some mysterious way government judgement measures up to government power.

Raps "Expert" Judgment

"The fact is that government judgment is the judgment of individuals who had so little business of their own that government jobs appealed to them. No individual would permit another individual to come into his place of business or onto his farm and try this or that radical experimental remedy. But that is what is happening with business as a whole, and with a great many people it seems to be quite all right."

The assumption that business is like a machine and be operated by a throttle is "cheer theory," the publication declares.

Nature is on a rampage, it continues, and it is impossible to write optimistically of the food and crop outlook. City residents are faced with high prices. The live stock farmer and the man with feed are those who stand profit by present conditions and the promise of higher prices. The live stock farmers and the man with feed are those who stand to profit by present conditions the promise of higher prices. The paper points out that replacement in the animal industry requires years.

RAISE BLUEBERRIES OF GREAT SIZE BY CULTIVATING THEM

Cultivated blueberries, some of which measure three-quarters of an inch in diameter, are now being raised in some states. About 16,000 bushels of the berries will be marketed from New Jersey alone this year.

The blueberries are packed in quart baskets protected by cellophane, and are so large, firm, sweet, and dry on the surface that they can be eaten in the fingers like cherries. Some prefer to eat them in a dish with sugar and cream.

It seems unnecessary to cook these berries in any way, but if blueberry pie, cake, or muffins are desired they can be so used.

Australia has a boom in rural construction work.

BRING SPIRITUALITY TO EACH SERVICE

THE MODERN FARMER

Vol. VII. NASHVILLE, TENN., SEPTEMBER 15, 1934 No. 8.

On to Charleston Convention N.F.C. Farmers to Meet Oct. 29-31

OCT 13 1934

PROMINENT SPEAKERS INVITED TO BE PRESENT

Exhibits By Manufacturers of Much Interest Will be Seen—Prizes Will Be Awarded

CHICAGO, ILL.,— Hon. Henry A. Wallace, Hon. Clark Howell Foreman, Chas. E. Hall and many other prominent Americans of both races, have been invited to atttend the session of the annual convention of National Federation of Colored Farmers, Inc., which will be held in Charleston, Mo., Oct. 29-31. The convention promises to be the best ever held, both in attendance and in helpfulness.

Prominent manufacturers of farm implements and other products purchased by farmers and their families will exhibit and demonstrate their wares. The Ford Motor Co., has been requested to send a representative with samples of commodities made from soy beans, which will be of supreme interest. In addition to Milus Sutton, of Elko, Ga., inventor of the cotton bunching machine, Jonas Gray, a member of Mt. Olive Unit, who has invented a newly designed single plow, will also be on hand to demostrate his implement.

The Executive Committee of the organization has again agreed to award prizes to units and individual members for the best displays of farm, orchard and garden products and household art exhibits.

The local committee, composed of leading officers and members of various Missouri units, are preparing a rousing welcome for all delegates and visitors making plans to see that all are entertained royally and inexpensively. Members of the committee include: Marshall Currin, Chairman of Lincoln Unit, Charleston, a farmer and prominent business man of that city,—Prof. L. B. Boler, General Manager of Lincoln Unit, an agriculturist and educator of wide experience,—Prof. J. E. Coleman, Sec., of Lincoln Unit; Prof. N. H. Butler and Rev. G. W. Harris, Morley, Mo.; Rev. B. J. Franklin, Portageville, Mo.,—J. H. Westbrook and W. H. Hawley, Matthews, Mo.,—W. A. Henry, Sikeston, Mo.,—Rev. H. T. Littlejohn and Rev. W. T. Ghess,—Parma, Mo.,—Prof. Travis B. Howard, New Madrid, Mo., —M. D. Davis,—Canalou, Mo.,—Mrs. Tilly Lewis, St. Louis,—and Mrs. Legora Sanders, Hartsville, Mo. All members of local committees are leaders in their units and communities.

Letters received at the national office recently from members and interested friends verify the claims that the convention will entertain the largest representation of Race farmers ever assembled in the

Fall Cleaning of Poultry Houses Will Be Profitable

CORNSTALKS VALUABLE FOOD

Roughage Necessary for Cattle Found in Corn Stover

Because of the nationwide shortage of roughage, farmers can save surplus feed such as cornstalks with profit to themselves, whether they expect to need it or not. Leafy corn stover of good color has approximately the same feeding value as oat straw, according to Arthur T. Semple, forage and pasture investigator in the United States department of agriculture. If properly cured, and particularly if shredded, it can be baled and shipped or stored.

An acre of good corn will produce about a ton of leaves and stalks. Left in the field an acre of stalks will do well to furnish roughage for one cow for one month. But if cut and shocked and fed from a manger the waste is so much less that the same ton of corn stover will keep a cow in roughage from three to four months.

"In Illinois, Iowa, southern Minnesota, northeastern Nebraska, southern Michigan and parts of Indiana," says Mr. Semple, "there are millions of acres of good corn which customarily is husked from the standing stalk. After the corn is husked, such fields usually are grazed by a few cows and horses and most of the feed is wasted because it is of little cash value. This year farmers can add to their incomes if they cut and shock such corn and then husk or shred it."

Timothy Seed Price Highest In Many Years

Highest prices in more than twenty years are being paid for timothy seed in the Chicago market, reflecting the tremendous damage done to the crop by the drouth. Much timothy is said to have been cut for hay rather than seed this season, with the result there is little of the latter available to take care of the normal spring demand, according to local dealers. Country run lots in Chicago are quoted at 17.00 to $18.50 per 100 pounds, or three or four times the price which normally prevails. Dealers are said to be selling fancy recleaned seed at $20.50.

It was understood about 1,500,000 pounds of alfalfa seed were sold yesterday as dealers attempted to build up their stocks for the spring demand. As high as $29 per 100 pounds was reported paid for fancy Idaho "bluetag" seed in car lots. Southwestern alfalfa seed was quoted down to $15.50. The

ROGUES' GALLERY OF TICKS

Dr. F. C. Bishop Has Given Study to Their Destruction

Ticks take up most of the space in the rogues' gallery where Dr. F. C. Bishopp, entomologist in the United States department of agriculture, files his records on insects convicted of crimes against humanity. Many of these criminals have been proved guilty of carrying deadly diseases, such as rabbit fever, or tularemia, to human beings, as well as of carrying diseases of livestock, to say nothing of spreading diseases among wild animals.

The most notorious members of the tick tribe are the common wood ticks, which spread the Rocky mountain spotted fever, for years confined to the Rocky mountain country, but now breaking out here and there farther east. To find a way to combat this menace to the public health, entomologists are studying the ways of ticks from one end of the country to the other.

Ticks lay enormous numbers of eggs in the woods. These eggs hatch into tiny seed ticks that soon develop into slightly larger nymphs, and then into still larger adults, which lay the eggs that start the cycle all over again. At no stage of its existence is the tick able to support itself. As a seed tick and also as a nymph it must wait for a free meal ticket in the form of some small woods animal, such as a ground squirrel or wood mouse, to come along. Then it takes a firm hold on its host, fills up on blood for four to six days, drops off, and molts its skin. Adult ticks seek larger hosts as dogs, horses, cattle, and human beings.

Ticks that have at any time fed on a diseased animal are dangerous, as are also the offspring of infected ticks. The bite of such a tick, as soon as it has fed on blood for a few hours, is poisonous. The danger can be averted by prompt discovery and removal of the tick, unless when it attacks a person it has already partially gorged itself with blood from a dog or other animal. In such cases the person may be infected at once from the bite. After walking through underbrush or woods, careful examination is necessary, Dr. Bishopp says, for the adult tick is sly and has learned to crawl from a person's feet to the hair at the back of his head, a favorite feeding place, without being felt.

Although wood ticks start operations early in the season and in most parts of the country are not very abundant after midsummer, the tick season is not definitely over until cold weather.

FEDERAL LOANS POSSIBLE

Three Essential Points Must be Complied With

Here is how a home owner can proceed if he wants a loan under the Federal Housing Administration:

1. He can apply to an approved bank. The bank will give him a credit statement to fill out. If this is approved, he signs a promissory note. The bank gives him the money.

2. He can apply to an industrial bank. He presents his credit statement, and, if approved, he signs a promissory note and receives cash.

The difference in the two plans is that in the bank loan under the first plan a discount note probably would be used, with the discount and fees limited by law.

3. Property owner submits his credit statement to a contractor or dealer. The latter submits the statement to an approved financial institution for credit approval. If approved the contractor can proceed with the work. When completed the owner gives him a promissory note which the contractor can cash at the financial institution approving the credit.

The owner can hire a contractor or not, can do his own work, or hire workers, can buy where he pleases. No strings are attached to the loan. He repays it in installments, and under strict regulations protecting his interests.

Iowa Farmer Growing Sirup For Pancakes

SORGHUM SALES BEAT DEPRESSION

Keokuk, Ia., Sept. 25—(Special)—If Secretary Wallace and the other "triple-A" boys will just let Arthur Shumate alone long enough he is likely to take care of himself with sorghum, a by-product of farming.

The Shumate acreage is in Lewis county, Missouri, less than half an hour's drive south of here on U. S. highway 61, leading to St. Louis. The farm has an average annual production of 2,000 gallons of sorghum. Mr. Shumate's earnings thereon are 50c to $1.25 a gallon. Customers in Chicago, California, Texas, Nebraska, South Dakota, Colorado, Iowa and Missouri used it.

Money in Cane Seed

Mr. Shumate threshes about 200 bushels of cane seed each season. On that he gets 50 cents to $1.75 a bushel as a forage crop. He harvested 15 tons of that last season.

SUGGESTIONS FOR DESTROYING INSECTS BY M. D. FARRAR

Much Better Results Gained From Fowls Kept Clean and Warm

Urbana, Ill.,—Before farmers begin housing their more than 20 million chickens for fall and winter production, it will be decidedly profitable thoroughly to clean and treat the poultry buildings for lice, mites and other parasitic insects, suggests M. D. Farrar, entomologist of the state natural history survey.

Unless effective control measures are taken at this time, flocks often become so heavily infested with these insect pests that they become unthrifty, egg production declines and thousands of dollars in poultry profits are lost by producers.

Practically all poultry insects can be killed by applications of any kind of oil, points out Farrar in a report to the college of agriculture, University of Illinois. This applies particularly to mites, bed bugs and fleas which feed on the birds by sucking their blood at night. In the daytime these insects usually leave the birds and hide in cracks and crevices in the poultry house.

Some of the more economical and effective oils for this purpose are creosote, kerosene and waste crank case oil, applied with a brush or emulsified with soap and water and sprayed on the inside of the building. Dormant tree spray emulsions mixed at the rate of four or five gallons in 100 gallons of water are also efficient poultry insect destroyers. All corners, cracks and rough places in the wood should be saturated with the oils to insure satisfactory control.

Poultry lice spend their entire lives on the birds and thus must be controlled by treating the fowls with dips, powders or gas toxic to the insects. For this a good grade of sodium fluoride is economical. Each bird is dusted individually by applying a pinch of sodium fluoride under each wing and around the vent, roughing the feathers to allow the powder to sift into the plumage, or the birds may be dipped in a solution of one ounce of sodium fluoride in one gallon of water.

Where it is impractical to handle each bird, painting the roosts with 40 percent nicotine sulphate is recommended. A line of the disinfectant about one-fourth inch wide is applied along the roots just before the birds retire. The nicotine fumes filter through the birds' feathers, killing the lice.

NORTHERN HOTEL DISCHARGES TWENTY-TWO COLORED MEN AND WOMEN EMPLOYES SAYING THEY "DO NOT FIT INTO PICTURE"

Reason Given for Move is That Owners Want All Employes of the "Abraham Lincoln" to be In Line for Clerks and Managers

Springfield, Ill., Sept.—(By William M. Ashley for A. N. P.)—Twenty-two Negro bellmen and women elevator operators will be dismissed from their employment at the Abraham Lincoln Hotel here September 15. Most of them have held these jobs from four to nine years. They will be supplanted by white help. This action was the outcome of a change in management. On September 1, Mr. C. L. Corpening became manager of the hotel, assuming the full responsibility for its success or failure. He had been formerly assistant manager of the Palmer House, Chicago. Mr. Corpening is a South Carolinian by birth and it is alleged that he attempted to deprive Negroes of some of the jobs they have always held in that famous Chicago Hotel. But, there is no evidence to show that the action here is a child of his brain. It was passed on to him from sources higher up.

Says Negroes Do Not Fit Picture

Both the owners and Mr. Corpening deny that either race, inefficiency, disloyalty or economy has anything to do with the change. They simply state that it is a "change of policy." If this "change of policy" is carried to its ultimate conclusions all Negro hotel workers may soon expect complete elimination from their jobs. As explained by Mr. C. Hayden Davis, presdeint of the operating company which runs the hotel, it is as follows: Hotel business is now definitely committed to the plan of training and developing within its own ranks people who can do anything from being a bellboy to managing a great hotel. The argument is that since Negro men cannot become managers, assistant managers, stewards, purchasing agents, front office clerks, mail clerks, and since Negro women cannot become cashiers, stenographers, bookkeepers or switch board operators, why have them in the hotel at all. The disturbing point in assuming this position is that Negroes are not kept out because of hate or even dislike. It is simply because they no longer fit in any of the niches of a great business, employment from which they always felt sacredly and securely theirs.

Practice Growing

It may not be widely known among Negro hotel workers but this is now an almost generally accepted practice. And what makes it such a touching situation to deal with is that it is not negative race hatred. It is a positive development of a personnel to carry on a great nationwide business and this alone say hotel men—is the reason for its being and justifies its practice.

The Springfield Urban League condemned this action. I enlisted the active protests and support of leading white and colored citizens on the matter. Conferences were held with both the manager, Mr. Corpening, and Mr. C. Haydon Davis, president of the operating company. They insist no race issue is involved. Nevertheless, out go these twenty-two people on September 15, some of whom have families and perhaps none of them by that time will have found a job.

POLITICS AND PRESS IN THE FAR WEST

Hollywood, Calif., Sept. (By Fay Jackson for A. N. P.)—THE EPIC (end poverty in California) PLAN which found its way from the fertile brain of an Angel City newspaperman (Rube Burrought), dramatized by Upton Sinclair, to the fireside of Roosevelt's White House played no end of muschief in the season's political arena. And if anybody doubts that Angelenos take their politics seriously, just pay a little visit to the Central avenue district where governors are made and dethroned all within the course of an hour or so by the natives congregating around the corner of Forty-first and the Boulevard d'Nigre.

This is the one time in the year that an otherwise starved-out gentry of the fourth estate gets well. Consequently, new suits, blazing lizzies and a few fall overcoats, to say nothing of the missed meals that are caught up with form the major purchases of ou renterprising "journalists."

Last week, enougn new sundown absent was James Keys, editor and sheets were published and distributed to keep the linos running far into the night and many days. Casualties among the warring factions ran also high and Saturday, when all the boys and girls of the press met in weekly bull session, notably publisher of REFLECTOR, who sustained a couple of shady optics in an encounter with Jesse Graves, hefty politician resentful of attacks made on his candidate; Dan Shaw, who took the count before a "Sunday" delivered by Lawrence Lamar in defense of race consciousness, and odds and ends of others awaiting dental restoration.

Solution to all this is a new order instituted by a militant and sophisticated gang dedicated to the EPIC Plan: end bunk, bull, baloney in California. No candidates selected so far but their ticket is expected to swing a large majority tired of promises and pre-election stuff so generously distributed among the generously distributed among the colored citizenry on the Eastside.

SEVEN BROTHERS TO WED SEVEN SISTERS

Washington.— Dr. Simon P. W. Drew announced today he will marry seven brothers to seven sisters at his Cosmopolitian Baptist Church here next Sunday night.

Dr. Drew, who described himself as the "leading evangelist of the colored race," said there will be 100 bridesmaids and ushers.

The bridegrooms are Leroy, John, James, Simon, Richard, George and Walter Cobbs. The brides are Lulu, Mildred, Alice, Mary, Rachel, Susie and Julia Riley.

LIVINGSTON IS NOT FORGOTTEN.

Syracuse Post-Standard: Sixty-one year ago Dr. David Livingston, scientist an explorer, died in Chitambo's Village, South Africa. All these years have passed without a memorial to him on the site of his most spectacular discovery, the Victoria falls of the Zambesi river.

The Federal Caledonian Societies of South Africa are to be thanked at the belated permanent recognition of one of the grandest men that ever lived, whose selfsacrificing career will ever be an inspiration.

Dr. Livingstone was sent to South Africa in 1840 as a missionary. He was physician as well as a prodigious worker in the field of exploration and science. His opposition to the slave trade as a missionary was forceful and he devoted his efforts without stint towards its abolition.

In the face of disappointments and afflictions that would have beaten a less resolute soul, he carried on to become one of the most famous and best beloved men of his generation. Henry M Stanley, at the end of a thrilling search, found him in the wilds of Africa. It is well to recall what Stanley sad at that time:

"For four months and four days I lived with Livingstone in the same boat or in the same tent and I never found a fault in him ....Each day's life with him added to my admiration for him. His gentleness never forsake him; his hopefulness never deserts him."

When Livingstone died his native African attendants buried his heart in African soil and then carried his body over a dangerous journey to the coast that it might be returned to England. That journey took nine months.

They are all gone these many years but the memory of the gentle missionary and his devoted followers will be kept green from now on, thanks to the erection of the substantial memorial.

Washington Star: Gen. Hugh Johnson was last reported in Aqua Caliente, which translated means "hot water."

SALMON SKINS MADE INTO BAGS

PORTLAND, Ore., Sept. 17.—Skins which once covered the silvery sides of Chinook salmon as they swam the briny deep will, in the near future, dangle from milady's arm in the form of smart purses and handbags, if the dream of C. F. Bogart, Victoria inventor, comes true. Bogart has started investigations as to the possibilities of saving salmon skins for tanning. He believes the skins may be tanned in such a manner that the scales will not fall off, providing a useful and ornamental material.—Herald and Examiner.

ZOO BOASTS DOG MOTHER TO LION

TULSA, Okla., Sept. 17.—A lion cub, slightly over three weeks old, has an ordinary cur dog for a stepmother and according to zoo attendants the pair are "getting along nicely."

After killing two cubs the third was taken away from its mother and for a time was fed on cow's milk. When the cub failed to gain zoo officials broadcasted an appeal for a stepmother.

Since the strange adoption the young lion has grown prodigiously and neither has objected to the unique relationship.

WHY ARE BLACK PEOPLE SO APATHETIC? AUTHOR QUERIES

Drusilla Houston Writes On the Negro in History

By Drusilla Dunjee Houston

(For the Associated Negro Press)

We hear the pessimistic wail that the Negro will not accept Negro history. Why are black people so apathetic? We have some books on Negro history that are quietly making their way in both races, that treat of past greatness of Ethiopians but the astonishing thing is that educated whites calmly accept these books to be true while very many colored folk seem unable to overcome the "inferiority complex" established by white literature of Negro inferiority and the superiority of the white race.

This is because the conceptions that come to us in youth become set and after life has very little influence in changing them. We chatter much about the past greatness of the Negro but we forget that the Negro child reads in all authoritative white literature that the "Negro has been a hewer of wood and a drawer of water from time immemorial." This thought is played upon in all its keys. How can we reach Negro youth before this "inferiority complex" is established? By placing in his hands books bristling with authorities who tell the story of what the Ethiopian race once was. These books must be placed in our homes.

This must be because that vast number of Negro teachers fear to teach Negro history—that fear of losing their jobs. I remember one professor who taught Negro history 30 years ago. Negroes went themselves to the white school board and complained that he was teaching their children that they were better than white folk. Being strong with the board, he made his escape. In another city of this state ten years ago a colored principal was removed for teaching Negro history. This sprang out of ignorance as to what Negro history would teach.

You see the phenomenon of the bright, alter, ambitious Negro boy of nine or ten, who goes to school and is fascinated by the story of wonderful Americans and their achievements. Then at fourteen we see him with hat cocked on the side of his head, ambition is gone and hope for the sickening revelation comes to him: "None of this is for me." He can never be the mayor of his city, nor governor of his state. Stripped from the white history is the history of Crispus Attucks and his kind. No word is there that Negroes built Perry's ships on Lake Erie or that black soldier subdued the hostile Indians and made the frontiers safe for white men. There is a conspiracy in literature to keep historic truth from black people.

This need not be. The white Superintendent of Education of this state said that the book "Wonderful Ethiopians" should be in every Negro school room. The Text Book Commission sent word for the author to bring the book before them. The book had cost a dollar and the author knew that colored schools would only be able to buy a cheap edition. This shows an open mindedness in whites that we are not trying to use. Intelligent white and colored people must get together and remove this hazard that causes Negro teachers to fear the study.

Intelligent leaders must go before school boards and demand that the study be included into the schools course. We must develop the tact and broad-mindness that will evolve books on Negro history that white authorities will see as helpful to Negro development and not harmful. The book "Wonderful Ethiopians" hardly calls the word, Negro. But without rousing prejudice, it tells the story of a black empire that spread the first impulse of art and letters. over the primeval world. It does not tell the story to stir Negro conceit but to incite him to greater usefulness.

When we have developed to where we can write history dispassionately, no sane white man or black will be opposed to its being taught. To be a historian a man must rise above prejudice and narrowness. His sympathies must be cosmopolitan not provincial. He must rise above that cowardice often seen in scholarship that fears to look beyond what white teachers have told him—what the white university permitted him to see. Most of our writers of this class, imitating white depravity, are digging up in research, scum. They cannot blame the race for refusing to accept it as history.

One of the great failures of the little mind is inability to see life's great essentials. Men and women fail to reach success because they see petty things as primal and waste priceless energy and talent upon them. The successful man sees which are the important, vital things of life and makes every moment count in reaching a goal. One man writes the details of the petty things of history and advances us little in thought, but other man mountain step, showing us the great momentous movements of human progress.

NEGRO RACE SUBJECT OF SERA PRESS MEN

Los Angeles, Calif., Sept.—(ANP) Utilizing trained newspaper men and women on a new TERA project, research into relief problems such as the economic and social status-quo of the Negro race in Southern California and a complete history of the state are some of the subjects treated by the new workers.

SERA State Emergency Relief Administration officials said this week this project is the first of its kind and probably will be made nation-wide.

All workers are employed on a need basis and are paid according to the number of dependents.

Only one Negro is known to be employed on the press project so far, it was discovered this week. Qualifications for the job require experience on daily papers and publication of fiction which almost automatically excludes colored press workers.

ATLANTA UNIVERSITY OPENS SEPTEMBER 18

Atlanta, Georgia, September 15 (Special)—Atlanta University and affiliated colleges: Morehouse College for men and Spelman College for women, will reopen for the new academic year on Wednesday, September 19, with an enrollment that according to all advance indications is most encouraging, it was stated today. Registration for all beyond the freshman year will be held on Tuesday, September 18th. Freshmen will complete their enrollment at their respective colleges on Monday.

The University staff has been strengthened further by the appointment of Ira D. A. Reid, formerly director of research and investigations of the National Urban League, to be a member of the department of sociology, and the return of Clarence A. Bacote to the department of history after a year of advanced study at the University of Chicago. Mr. Reid is a graduate of Morehouse College and the University of Pittsburgh, and is nationally known for his researches and reports on many aspects of Negro life.

Two additions have been made to Morehouse College's faculty in the appointment of James H. Birnie as teacher of biology and Jay Mayo Williams as instructor in the department of physical education. Mr. Birnie, a graduate of Morehouse College, holds a Master of Science degree from Brown University, and has completed his residence requirements for his doctorate in biology at that institution. Mr. Williams is a graduate of Brown University, where he made a brilliant reputation as an athlete.

The reopening of Morehouse College will mark the return of two professors who have been on leave: Claude B. Dansby, who has been working for his doctor's degree in mathematics at the University of Chicago, and Burwell Towns Harvey, Jr., who has been at Columbia University studying for his doctor's degree in chemistry.

Three of Atlanta University's faculty will return to Atlanta after extended study abroad. Dr. W. B. Nathan spent the summer in Russia attending the Anglo-American Institute at the First Moscow University; Professor Rayford W. Logan went to Haiti where he carried on investigation of Haitian-American relations in connection with the doctoral dissertation he is writing under the direction of Dr. James Phinney Baxter, 3rd, professor of diplomatic history, Harvard University; and Professor Nathaniel P. Tillman has been in England during the past three months carrying on advanced studies in the field of early English.

While no major building construction has been done during the summer, considerable repairs are in course of completion. Chief item in the modernization program is the complete redecoration of Sisters Chapel, the interior of which is being repainted. A new road has been constructed to serve Morgan and Upton Malls on the Spelman College campus, twelve garages are to be constructed, and a new concrete roof on the coal bunkers is being laid. On the Morehouse College campus, the student activities rooms are being refurnished.

TAME CROW STEALS PIPE

WESTBORO, Mass.—The tame crow of Lena McPhail stole George Lynch's pipe. He laid the pipe down to get a match, when the crow took it and flew to the roof. It took Miss McPhail an hour to retrieve the pipe from him.

NOTED AMERICAN SCULPTOR BECOMES MEMBER OF FACULTY OF ATLANTA UNIVERSITY, AND MOREHOUSE, SPELMAN COLLEGES

Atlanta, Georgia, September 15 (Special)—N. Elizabeth Prophet, internationally recognized sculptor, whose work has been exhibited widely in France and the United States and is represented in several leading American art collections, will join the faculty of Atlanta University this fall, President John Hope announced today. She will conduct classes which will be open to students of Spelman and Morehouse Colleges, as well as persons in the Graduate School of the University, it was announced. The appointment of Miss Prophet was made possible through a grant from the Carnegie Corporation.

As a member of the University faculty, Miss Prophet will give instruction in drawing, clay modeling, and art and architectural appreciation, and will devote herself to creation of an interest in the fine arts among students of the University and affiliated colleges and a better understanding of the place of the fine arts in a liberal education, President Hope stated.

Miss Prophet, who is regarded as one of America's outstanding sculptors, studied at the Rhode Island School of Design, l Ecole des Beaux Arts de Paris, and subsequently for eight years engaged in independent study, creative work and travel in France. Her work was exhibited in the Salon des Artists Francais in 1929, 1931, and 1932, the Salon d' Autonne in 1927, the Boston Society of Independent Artists in 1929, and the Art Association of Newport (R. I.) where she won the Richard S. Grenough grand prize in 1932.

Two of her works are in the permanent collection of the Museum of Rhode Island School of Design. Another, "Congolaise," a striking piece of wood-carving, is in the Whitney Museum of Art, New York City, having been purchased by Mrs. Harry Payne Whitney for this notable collection of American art. A number of others are in private American collections.

The presence on the university faculty of Miss Prophet, who is acknowledged by critics as one of the most important creative artists now working in the field of sculpture, will afford students in the University system an unusual opportunity to study modeling and drawing.

Xavier University

NEGRO HISTORY COURSE TAUGHT AT XAVIER "U"

New Orleans, La.—A priest who is a native Philadelphian and possessor of an engaging personality has added to the many fine features of Xavier University of New Orleans, La., by introducing into the curriculum a compulsory course in Negro History. He is Father Hugh Conahan, professor of philosophy and Negro History at the southern institution, who is now visiting his home city.

"Father Hughey" as he is affectionately called, has formulated a complete course of study after extensive research work. He became interested in the history of the Negro while still a student and is familiar with all its details and also maintains an active interest in contemporary leaders and outstanding members of the race. He has been a member of the faculty at Xavier for three and one half years. The course which he introduced upon his arrival met with instant popularity and is now also being taught by Professor David Jackson, a graduate of Howard University.

Xavier is a Catholic institution founded by the Sisters of the Blessed Sacrament in 1915. It has a mixed faculty. The fine type of leadership as exemplified by "Father Hughey" explains the splendid work being done in combating race prejudice and producing the type of students so glowingly described by this educator who has a very evident interest in the progress of the race.

According to Father Conahan the majority of the Negroes there, most of whom are Creoles, are of the Catholic faith.

—Negro Councilman.

DENVER ATTORNEY IS NOMINATED FOR THE COLO. LEGISLATURE

Thomas Campbell Gets Place on Republican Ticket With 10,000 Votes

By Fritz Cansler

Denver, Colo., Sept. 15—At the primary election last Tuesday, Major Thomas Campbell, Spanish-American War veteran and prominent attorney for more than twenty-five years, was selected by a large vote to be a candidate on the Republican ticket for the legislature in the November election. Attorney Campbell stood eighth in a list of more than two score of candidates, fifteen of whom were designated. He polled close to ten thousand votes as an evidence of the enthusiasm and interest which were occasioned by his candidacy.

Mr. Campbell's nomination marks the first time in a number of years that a member of the race has won the high designation for a place in the State legislature and many of the citizens see in the large vote cast for him a sincere desire on the part of the Republican Party to give greater recognition to the colored voters and citizens of the state. His candidacy was endorsed by all of the leading clubs and political organizations prior to the primary election, and plans are being made by his friends of both races to secure for him an equally generous amount of support in the general election which is to take place on November 6 of this year.

Attorney Campbell is a graduate of Howard Law School, a member of the local bar, of the National Bar Association, and other local and national organizations. He is a prominent layman of the A. M. E. Church and serves on the official Board of the Shorter Church of Denver. The general interest which his candidacy has evoked seems to secure his election in November.

Bishop College

Registration Reaches 300

Marshall, Texas. —(Special) — Exceeding the expectations of college officials and threatening the record of pre-depression days, the registration at Bishop College approaches the 300 mark as the institution enters upon the second week of the college year.

"OUR SLOGAN"

STAY ON THE FARM IF YOU'RE ON IT! GO BACK TO THE FARM IF YOU'RE OFF IT.

OUR PLATFORM

1. A Unit of the National Federation of Colored Farmers in every community. of colored farmers.
2. Co-operative buying, producing and marketing.
3. Every colored farmer a farm owner.
4. Abolition of debt-slavery, injustice and persecution.
5. A written contract for every colored farm tenant and sharecropper.
6. Better rural churches, schools and homes.

From The Bible

"Behold, how good and how pleasant it is for brethren to dwell together in unity." Psalm 133:1.

Never Too Late

'Tis never too late to be watchful
When striving to live as we should.
'Tis never too late to remember
That all of creation is good.
'Tis never too late to be prayerful.
In shaping each portion of thought,
And never too late to be fearless
In doing the things that we ought.
'Tis never too late to be planning
To fight against errors and sin
'Tis never too late to be ready,
And never too late to begin.

Stokes Anthony Bennett.

DEBT—SLAVERY MUST BE DESTROYED

The masters of the colored debt-slave of the South are becoming bolder every hour. They are defying every law that has been enacted by the Roosevelt administration for the benefit of the "Forgotten Man." They have their feet planted firmly on the necks of thousands of colored farmers, —tenants, sharecroppers and farm hands,— and it looks like only a special army of angels from Heaven will be able to pry them off. These oppressors of their fellow-men are more ruthless,—are more cruel,— are more pitiless,— than any tyrants the world has ever known.

Recently we have received hundreds of letters from debt-slaves informing us of their troubles and begging assistance. We have tried to be helpful but must admit we have been able to accomplish little. The job is too large for ns. It is too big for the N. F. C. F. Even the Federal government,— powerful as it is at the present time,— seems to be unable to relieve the innocent and punish the guilty. But debt-slavery will never die of itself. Eventually a way must be found to destroy it. It is the duty of those who are leaders of their fellow men,—the social planners and builders,— the men and women who are running the federal and state governments,— the churches and the schools, — it is up to them to find the way.

These masters have little respect for the intelligent, industri- our colored farmer who raises his living, — looks after his own business affairs and keeps out of debt. They are afraid of the independent colored farmers. They are afraid of the example he sets in his community. So they are always seeking a change to persecute him,—to frame him, —to accuse him falsely. Often they succeed in making his life so miserable he must sell out for what he can get and move.

These masters are also afraid of an organization like the National Federation of Colored Farmers. They are afraid of its influence. They are afraid of its leadership. And they may well be frightened. The N. F. C. F. is telling the debt-slaves,—members and non-members,— to struggle for their own freedom. It is advising them to practice co-operative buying,—to raise and preserve foodstuffs,— to demand legal written contracts,— to refuse to work for the master who robs and persecutes them,— even if they have to break their chains and flee in the darkness of the night. Many are following this advice.

This debt-slavery, — this economic slavery, — is simply a kind of legalized peonage. It is a disgrace to the South. It is a disgrace to America. It benefits none except the selfish masters It must be destroyed.

DON'T SIGN TRICKY PAPERS

Elsewhere in this paper will be found an article about efforts being made in some Delta counties to get Race farmers to sign a paper naming certain individuals, —usually a committee of merchants. landlords and planters,— to act for them in selling their cotton and other crops. This is simply a slick scheme to get colored farmers to let others handle their money for them.

We are warning all colored farmers to refuse to sign papers and agreements. There is no law to compel you to do so. But if you sign the agreement, it becomes a legal contract,— and you have signed away your rights and privileges. Your crop, which you have labored so hard to produce,— passes from your control to the committee or trustees you have designated. The proceeds of your crop,— the money it brings,—also is sure to pass into the hands of the other fellows,— or a goodly portion if it.

Unless you have already signed a contract allowing the landlord or some other party the right to supervise selling your crop, then be wise and sell it yourself. Don't sign any paper you do not understand. As a rule, all farmers are slow to read and quick to sign most anything. Better get the advice of your farm organization and be on the safe side.

THE COMING N. F. C. F. CONVENTION

The 1934 convention of the National Federation of Colored Farmers, Inc., will convene in Charleston, Mo., October 29-31. All members of the organization who can possibly do so, should be present and take part in the proceedngs.

You farmers of our Race who are members of the N. F. C. F.— who are organized,— are about three jumps ahead of all the other farmers who are not organized. You are the "salt of the earth,"— so to speak, in this farming business. You are the farm leaders of our group. You have a big responsibility resting upon you, for, like all leaders and pioneers, — you must blaze the way. You must show the others how to stand united, —how to cooperate — how to help each other, — how we must work together in peace and harmony if we mean to prosper and progress. It really means something to be a member of the N. F. C. F.,—to be an organized farmer.

The best program ever will be presented at the coming convention. Subjects for delegates and members' discussion include:

How to own the soil you till. How to lift the mortgage hanging over your farm: Purchasing workstock and cattle for another year: Securing loans to improve your home and farm: Bnying groceries and farm supplies co-operatively; Prodncing and selling farm products co-operatively. Home canning and sewing: Legal contracts protecting sharecroppers and tenants: and last but not least,—WHY ALL COLORED FARMERS SHOULD BE ORGANIZED.

You cannot afford to miss the convention. Bring the family. The inspiration and instruction you will receive will make life more pleasant and profitable through coming years.

ABOUT SUBSISTENCE HOMESTEADS

The Modern Farmer has said little about the New Deal subsistence homestead projects because in our opinion, subsistence homesteads are fine for the "downs and outs" but no good for real farmers, and we are mostly interested in projects we believe will be beneficial to real farmers. We believe real farmers will never be satisfied until they own and live on real farms, and such farms are more than the homesteads.

We wish to see more Race farm communities established. But we want the farms to be of more than three or five acres. We want the real farmers who live on the real farms in these communities to feel that they are free, independent Americans, -- able to do their own planning and thinking. We do not want them to feel that they are wards of the Federal Government. Charity and a hand-out for some,— but for the real Negro farmer,—only a free man's chance and an American's opportunity.

THE LAW CAN BE ENFORCED

Not long, ago, a prominent southern editor spoke out bluntly and plainly and said,—"To tell the truth, the black citizen in the South has about as much chance before the law as he has in the hands of a lynch party."

This particular editor was indignant, and rightly so, because the law had failed to punish some Alabama lynchers who were well known to most of the inhabitants of a small community. But we believe he spoke too hastily. The law can be enforced in the South and we expect to see it enforced, especially the federal law. Right now we have at hand several letters from colored farmers complaining that they have not received the government checks they were due to receive last year in payment for cotton they plowed up. These checks were sent out. Where did they go? Why have not the rightful owners received them? We are trying to find out and if others have cashed these checks who had no right to cash them, we expect the government to find and punish them.

"Colored farmers should stop expecting to get something for nothing. We are constantly receiving letters from farmers wanting to know when the government is going to give them something He is a poor farmer who is looking for a hand-out. Be progressive. Go to work. Save all you can. Back up your organization. Co-operate with your neighbor farmers. Stop quarreling and fighting. We get in proportion as we give. The man who gives nothing of value to his fellow-men need never expect to get.

Now is the time to save feed for your stock. Feed is scarce. It is going to be too costly for you to buy. Save all of it. Save it well. Don't waste a bale of fodder or a single pea vine. If you have more than you need you will be able to sell it this winter at a good price. The south should be able to ship some feed north and west this winter.

Every member of the N. F. C. F. who can possibly do so should arrange now to attend the convention at Charleston, Mo., October 29-31. Come and bring your family.

Brains are worth more than money. Seek advice and knowledge. Read all you can. The more you know the more able you will be to get what you want and should have.

Let the other fellow have his way some time. It may be better than your way. It will keep down quarrels and you will feel better if you will "give in."

We have never been able to understand why Race people fight each other so much. If we must fight, let's fight for our rights. The more we fight each other the worse off we become.

Get in the habit of thinking out your problems. The good thinker always succeeds.

Don't be afraid of a change. Get out of the old rut. We gain experience by doing things differently every once in awhile.

Many a farmer stays poor and hard up because he talks too much to his neighbors as they pass by his place. Save your talks for rainy days when you are unable to do much farm work.

ALABAMA GOVERNOR SAVES CONDEMNED MAN FROM CHAIR

Montgomery, Ala., Sept.—(ANP) The death sentence of Frank Jackson was commuted Tuesday to life imprisonment by Governor B. M. Miller, overruling the recommendation of the pardon board.

Jackson had been sentenced in connection with the robbery of a traveling salesman and his girl companion. He was implicated in the crime by George Meadows, already electrocuted. Jackson has maintained his innocence throughout, and Pete B. Jarman, Jr., secretary of the State Pardon Board, wrote that the "evidence is not quite clear" that Jackson aided Meadows.

Negro Jockey In Boston Rides Six In One Day

Boston, Mass., Sept.—(ANP)—The only colored jockey at the Narragansett race track, Clarence Reid, rode his last race at the summer season, Labor Day, when he rode six horses during the afternoon. But the little fellow had no luck during the afternoon except in the eighth race when mounted on "Free" he was able to come in the money.

Reid took the raid in this race, piloted his horse into a lead, but was nosed out by "Chancing" on the home stretch. Free paid $23.00 and $9.20. The colored rider finished sixth in the first race; seventh in the second; fifth in the third; sixth in the fifth and sixth in the seventh.

After the races Monday, Reid immediately left for Rockingham where he will work the rest of the month before returning here in October.
